HER MAJESTY'S GOVERNMENT

MEMBERS OF THE CABINET

(FORMED BY THE RT. HON. MARGARET THATCHER, MP, JULY 1988)

PRIME MINISTER, FIRST LORD OF THE TREASURY AND MINISTER FOR THE CIVIL SERVICE—
The Rt. Hon. Margaret Thatcher, MP
SECRETARY OF STATE FOR FOREIGN AND COMMONWEALTH AFFAIRS—The Rt. Hon. Sir Geoffrey Howe, QC, MP
CHANCELLOR OF THE EXCHEQUER—The Rt. Hon. Nigel Lawson, MP
LORD CHANCELLOR—The Rt. Hon. The Lord Mackay of Clashfern
SECRETARY OF STATE FOR THE HOME DEPARTMENT—The Rt. Hon. Douglas Hurd, CBE, MP
SECRETARY OF STATE FOR WALES—The Rt. Hon. Peter Walker, MBE, MP
SECRETARY OF STATE FOR DEFENCE—The Rt. Hon. George Younger, TD, MP
SECRETARY OF STATE FOR EMPLOYMENT—The Rt. Hon. Norman Fowler, MP
SECRETARY OF STATE FOR NORTHERN IRELAND—The Rt. Hon. Tom King, MP
SECRETARY OF STATE FOR THE ENVIRONMENT—The Rt. Hon. Nicholas Ridley, MP
SECRETARY OF STATE FOR TRADE AND INDUSTRY AND PRESIDENT OF THE BOARD OF TRADE—
The Rt. Hon. The Lord Young of Graffham
SECRETARY OF STATE FOR EDUCATION AND SCIENCE—The Rt. Hon. Kenneth Baker, MP
SECRETARY OF STATE FOR HEALTH—The Rt. Hon. Kenneth Clarke, QC, MP
MINISTER OF AGRICULTURE, FISHERIES AND FOOD—The Rt. Hon. John MacGregor, OBE, MP
SECRETARY OF STATE FOR SCOTLAND—The Rt. Hon. Malcolm Rifkind, QC, MP
SECRETARY OF STATE FOR TRANSPORT—The Rt. Hon. Paul Channon, MP
SECRETARY OF STATE FOR SOCIAL SECURITY—The Rt. Hon. John Moore, MP
LORD PRESIDENT OF THE COUNCIL AND LEADER OF THE HOUSE OF COMMONS—The Rt. Hon. John Wakeham, MP
LORD PRIVY SEAL AND LEADER OF THE HOUSE OF LORDS—The Rt. Hon. The Lord Belstead
SECRETARY OF STATE FOR ENERGY—The Rt. Hon. Cecil Parkinson, MP
CHIEF SECRETARY TO THE TREASURY—The Rt. Hon. John Major, MP
CHANCELLOR OF THE DUCHY OF LANCASTER AND MINISTER OF TRADE AND INDUSTRY—
The Rt. Hon. Antony Newton, OBE, MP

LAW OFFICERS

ATTORNEY-GENERAL—The Rt. Hon. Sir Patrick Mayhew, QC, MP
LORD ADVOCATE—The Rt. Hon. The Lord Cameron of Lochbroom, QC
SOLICITOR-GENERAL—Sir Nicholas Lyell, QC, MP
SOLICITOR-GENERAL FOR SCOTLAND—Peter Fraser, Esq, QC

MINISTERS NOT IN THE CABINET

PARLIAMENTARY SECRETARY TO THE TREASURY—The Rt. Hon. David Waddington, QC, MP
MINISTER OF STATE, PRIVY COUNCIL OFFICE, (MINISTER FOR THE ARTS)—The Rt. Hon. Richard Luce, MP
MINISTERS OF STATE, FOREIGN AND COMMONWEALTH OFFICE—
The Rt. Hon. Lynda Chalker, MP
Minister for Overseas Development—Christopher Patten, Esq, MP
The Hon. William Waldegrave, MP
The Lord Glenarthur
PAYMASTER GENERAL—The Rt. Hon. Peter Brooke, MP
FINANCIAL SECRETARY TO THE TREASURY—The Rt. Hon. Norman Lamont, MP
MINISTERS OF STATE, HOME OFFICE—
The Rt. Hon. The Earl Ferrers
John Patten, Esq, MP
Tim Renton, Esq, MP
MINISTER OF STATE, WELSH OFFICE—Wyn Roberts, Esq, MP
MINISTERS OF STATE, MINISTRY OF DEFENCE—
Minister of State for the Armed Forces—The Hon. Archibald Hamilton, MP
Minister of State for Defence Procurement—The Lord Trefgarne
MINISTER OF STATE, DEPARTMENT OF EMPLOYMENT—The Rt. Hon. John Cope, MP
MINISTER OF STATE, NORTHERN IRELAND OFFICE—Ian Stewart, Esq, RD, MP
MINISTERS OF STATE, DEPARTMENT OF THE ENVIRONMENT—
Minister for Housing and Planning—The Rt. Hon. John Gummer, MP
Minister for Environment, Countryside and Water—The Earl of Caithness
Minister for Local Government—Michael Howard, Esq, QC, MP
MINISTER OF STATE, DEPARTMENT OF TRADE AND INDUSTRY—
Minister for Trade—The Hon. Alan Clark, MP
MINISTER OF STATE, DEPARTMENT OF EDUCATION AND SCIENCE—Mrs. Angela Rumbold, CBE, MP
MINISTER OF STATE, MINISTRY OF AGRICULTURE, FISHERIES AND FOOD—

MINISTERS OF STATE, SCOTTISH OFFICE—
Ian Lang, Esq, MP
The Lord Sanderson of Bowden
MINISTER OF STATE, DEPARTMENT OF TRANSPORT—
Minister for Public Transport—Michael Portillo, Esq, MP
MINISTER OF STATE, DEPARTMENT OF HEALTH—David Mellor, Esq, QC, MP
MINISTER OF STATE, DEPARTMENT OF SOCIAL SECURITY—Nicholas Scott, Esq, MBE, MP
MINISTER OF STATE, DEPARTMENT OF ENERGY—The Rt. Hon. Peter Morrison, MP

DEPARTMENTS OF STATE AND MINISTERS

Agriculture, Fisheries and Food—
MINISTER—The Rt. Hon. John MacGregor, OBE, MP
MINISTER OF STATE—
PARLIAMENTARY SECRETARIES—
The Baroness Trumpington
Donald Thompson, Esq, MP
Richard Ryder, Esq, OBE, MP

Arts and Libraries, Office of—
MINISTER FOR THE ARTS—The Rt. Hon. Richard Luce, MP

Chancellor of the Duchy of Lancaster and Minister of Trade and Industry—
The Rt. Hon. Antony Newton, OBE, MP

Civil Service, Office of the Minister for the—

Defence—
SECRETARY OF STATE—The Rt. Hon. George Younger, TD, MP
MINISTER OF STATE FOR THE ARMED FORCES—The Hon. Archibald Hamilton, MP
MINISTER OF STATE FOR DEFENCE PROCUREMENT—The Lord Trefgarne
PARLIAMENTARY UNDER-SECRETARY OF STATE FOR THE ARMED FORCES—Roger Freeman, Esq, MP
PARLIAMENTARY UNDER-SECRETARY OF STATE FOR DEFENCE PROCUREMENT—The Hon. Tim Sainsbury, MP

Education and Science—
SECRETARY OF STATE—The Rt. Hon. Kenneth Baker, MP
MINISTER OF STATE—Mrs. Angela Rumbold, CBE, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
John Butcher, Esq, MP
Robert Jackson, Esq, MP

Employment—
SECRETARY OF STATE—The Rt. Hon. Norman Fowler, MP
MINISTER OF STATE—The Rt. Hon. John Cope, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
John Lee, Esq, MP
Patrick Nicholls, Esq, MP

Energy—
SECRETARY OF STATE—The Rt. Hon. Cecil Parkinson, Esq, MP
MINISTER OF STATE—The Rt. Hon. Peter Morrison, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
Michael Spicer, Esq, MP
The Baroness Hooper

Environment—
SECRETARY OF STATE—The Rt. Hon. Nicholas Ridley, MP
MINISTERS OF STATE—
Minister for Housing and Planning—The Rt. Hon. John Gummer, MP
Minister for Environment, Countryside and Water—The Earl of Caithness
Minister for Local Government—Michael Howard, Esq, QC, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
David Trippier, Esq, RD, MP
Christopher Chope, Esq, OBE, MP
Mrs. Virginia Bottomley, MP
The Hon. Colin Moynihan, MP (Minister for Sport)

Foreign and Commonwealth Affairs—
SECRETARY OF STATE—The Rt. Hon. Sir Geoffrey Howe, QC, MP
MINISTERS OF STATE—
The Rt. Hon. Lynda Chalker, MP
Minister for Overseas Development—Christopher Patten, Esq, MP
The Hon. William Waldegrave, MP
The Lord Glenarthur
PARLIAMENTARY UNDER-SECRETARY OF STATE—Timothy Eggar, Esq, MP

Health—
SECRETARY OF STATE FOR HEALTH—The Rt. Hon. Kenneth Clarke, QC, MP
MINISTER OF STATE—
David Mellor, Esq, QC, MP
PARLIAMENTARY UNDER-SECRETARY OF STATE—
Mrs. Edwina Currie, MP

Home Office—
SECRETARY OF STATE FOR THE HOME DEPARTMENT—The Rt. Hon. Douglas Hurd, CBE, MP
MINISTERS OF STATE—
The Rt. Hon. The Earl Ferrers
John Patten, Esq, MP
Tim Renton, Esq, MP
PARLIAMENTARY UNDER-SECRETARY OF STATE—The Hon. Douglas Hogg, MP

Law Officers' Department—
ATTORNEY-GENERAL—The Rt. Hon. Sir Patrick Mayhew, QC, MP
SOLICITOR-GENERAL—Sir Nicholas Lyell, QC, MP

Lord Advocate's Department—
LORD-ADVOCATE—The Rt. Hon. The Lord Cameron of Lochbroom, QC
SOLICITOR-GENERAL FOR SCOTLAND—Peter Fraser, Esq, QC,

Lord Chancellor—
The Rt. Hon. The Lord Mackay of Clashfern

Northern Ireland Office—
SECRETARY OF STATE FOR NORTHERN IRELAND—The Rt. Hon. Tom King, MP
MINISTER OF STATE—Ian Stewart, Esq, RD, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
The Lord Lyell
Richard Needham, Esq, MP
Dr. Brian Mawhinney, MP
Peter Viggers, Esq, MP

Paymaster General—
The Rt. Hon. Peter Brooke, MP

Privy Council Office—
LORD PRESIDENT OF THE COUNCIL AND LEADER OF THE HOUSE OF COMMONS—The Rt. Hon. John Wakeham, MP
LORD PRIVY SEAL AND LEADER OF THE HOUSE OF LORDS—The Rt. Hon. The Lord Belstead
MINISTER OF STATE—The Rt. Hon. Richard Luce, MP

Scottish Office—
SECRETARY OF STATE FOR SCOTLAND—The Rt. Hon. Malcolm Rifkind, QC, MP
MINISTERS OF STATE—
Ian Lang, Esq, MP
The Lord Sanderson of Bowden
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
Lord James Douglas-Hamilton, MP
Michael Forsyth, Esq, MP

Social Security—
SECRETARY OF STATE FOR SOCIAL SECURITY—The Rt. Hon. John Moore, MP
MINISTER OF STATE—Nicholas Scott, Esq, MBE, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
The Lord Skelmersdale
Peter Lloyd, Esq, MP

Trade and Industry—
SECRETARY OF STATE FOR TRADE AND INDUSTRY AND PRESIDENT OF THE BOARD OF TRADE—
The Rt. Hon. The Lord Young of Graffham
CHANCELLOR OF THE DUCHY OF LANCASTER AND MINISTER OF TRADE AND INDUSTRY—
The Rt. Hon. Antony Newton, OBE, MP

PARLIAMENTARY UNDER-SECRETARY OF STATE FOR CORPORATE AFFAIRS—The Hon. Francis Maude, MP
PARLIAMENTARY UNDER-SECRETARY OF STATE FOR INDUSTRY AND CONSUMER AFFAIRS—Eric Forth, Esq, MP

Transport—
SECRETARY OF STATE FOR TRANSPORT—The Rt. Hon. Paul Channon, MP
MINISTER OF STATE
Minister for Public Transport—Michael Portillo, Esq, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
Minister for Roads and Traffic—Peter Bottomley, Esq, MP
Minister for Aviation and Shipping—The Lord Brabazon of Tara

Treasury—
PRIME MINISTER, FIRST LORD OF THE TREASURY AND MINISTER FOR THE CIVIL SERVICE—
The Rt. Hon. Margaret Thatcher, MP
CHANCELLOR OF THE EXCHEQUER—The Rt. Hon. Nigel Lawson, MP
CHIEF SECRETARY—The Rt. Hon. John Major, MP
PAYMASTER GENERAL—The Rt. Hon. Peter Brooke, MP
FINANCIAL SECRETARY TO THE TREASURY—The Rt. Hon. Norman Lamont, MP
ECONOMIC SECRETARY—Peter Lilley, Esq, MP
PARLIAMENTARY SECRETARY TO THE TREASURY—The Rt. Hon. David Waddington, QC, MP
LORDS COMMISSIONERS—
Tony Durant, Esq, MP
David Lightbown, Esq, MP
Kenneth Carlisle, Esq, MP
Alan Howarth, Esq, CBE, MP
David Maclean, Esq, MP
ASSISTANT WHIPS—
Stephen Dorrell, Esq, MP
John Taylor, Esq, MP
David Heathcoat-Amory, Esq, MP
The Hon. Tom Sackville, MP
Michael Fallon, Esq, MP

Welsh Office—
SECRETARY OF STATE FOR WALES—The Rt. Hon. Peter Walker, MP
MINISTER OF STATE—Wyn Roberts, Esq, MP
PARLIAMENTARY UNDER-SECRETARY OF STATE—Ian Grist, Esq, MP

Her Majesty's Household—
LORD CHAMBERLAIN—The Rt. Hon. The Earl of Airlie, GCVO
LORD STEWARD—The Rt. Hon. The Duke of Northumberland, KG, TD
MASTER OF THE HORSE—The Rt. Hon. The Earl of Westmorland, KCVO
TREASURER—David Hunt, Esq, MBE, MP
COMPTROLLER—Tristan Garel-Jones, Esq, MP
VICE-CHAMBERLAIN—Michael Neubert, Esq, MP
CAPTAIN OF THE HONOURABLE CORPS OF GENTLEMEN-AT-ARMS—The Rt. Hon. The Lord Denham
CAPTAIN OF THE QUEEN'S BODYGUARD OF THE YEOMEN OF THE GUARD—The Viscount Davidson

---

SECOND CHURCH ESTATES COMMISSIONER, REPRESENTING CHURCH COMMISSIONERS—The Rt. Hon. Michael Alison, MP

HOUSE OF COMMONS

PRINCIPAL OFFICERS AND OFFICIALS

THE SPEAKER—Rt. Hon. Bernard Weatherill, MP

CHAIRMAN OF WAYS AND MEANS—Rt. Hon. Harold Walker, MP

FIRST DEPUTY CHAIRMAN OF WAYS AND MEANS—Sir Paul Dean, MP
SECOND DEPUTY CHAIRMAN OF WAYS AND MEANS—Miss Betty Boothroyd, MP

CHAIRMEN'S PANEL

Donald Coleman, Esq, MP, Patrick Cormack, Esq, MP, Stan Crowther, Esq, MP, Miss Janet Fookes, MP, Geraint Howells, Esq, MP, John Hunt, Esq, MP, David Knox, Esq, MP, James Lamond, Esq, MP, Michael Latham, Esq, MP, Ted Leadbitter, Esq, MP, Geoffrey Lofthouse, Esq, MP, John McWilliam, Esq, MP, Michael J. Martin, Esq, MP, Sir Anthony Meyer, MP, Michael Morris, Esq, MP, Robert Rhodes James, Esq, MP, Sir Michael Shaw, MP, Michael Shersby, Esq, MP, Sir John Stradling Thomas, MP, Nicholas Winterton, Esq, MP

HOUSE OF COMMONS COMMISSION—

Rt. Hon. The Speaker (Chairman), Alan Beith, Esq, MP, Frank Dobson, Esq, MP, Rt. Hon. Sir Barney Hayhoe, MP, Rt. Hon. Peter Shore, MP, Rt. Hon. John Wakeham, MP

SECRETARY TO THE COMMISSION—W. A. Proctor

BOARD OF MANAGEMENT—

C. J. Boulton, CB (Chairman), Sir Victor Le Fanu, KCVO, D. Menhennet, D. Phil., A. C. J. Poole, K. S. Morgan, W. J. J. Smillie, FHCIMA, FCFA, ACF

SECRETARY TO THE BOARD OF MANAGEMENT—G. A. Roberts

OFFICE OF THE SPEAKER

SPEAKER'S SECRETARY—P. J. Kitcatt, CB

SPEAKER'S COUNSEL—H. Knorpel, CB, QC, G. E. Gammie, CB

SPEAKER'S CHAPLAIN—Rev. Canon D. C. Gray, TD, PhD

TRAINBEARER—D. J. Lord

DEPUTY TRAINBEARER—P. L. Warwick

HEO (ADMINISTRATION/DIARY)—Mrs. S. Norvell

ASSISTANT TO SPEAKER'S COUNSEL—P. Harvey, CB

OFFICE OF THE CHAIRMAN OF WAYS AND MEANS

SECRETARY TO THE CHAIRMAN OF WAYS AND MEANS—R. I. S. Phillips

DEPARTMENT OF THE CLERK OF THE HOUSE

CLERK OF THE HOUSE OF COMMONS—C. J. Boulton, CB

CLERK ASSISTANT—J. F. Sweetman, TD

CLERK OF COMMITTEES—M. T. Ryle

PRINCIPAL CLERKS—

H. M. Barclay (Public Bills)
D. W. Limon (Table Office)
W. R. McKay (Journal Office)
C. B. Winnifrith (Select Committees)
R. B. Sands (Overseas Office)
G. Cubie (Financial Committees)
A. J. Hastings (Select Committees)
J. R. Rose (Standing Committees)
R. J. Willoughby (Private Bills)

DEPUTY PRINCIPAL CLERKS—S. A. L. Panton, M. R. Jack, PhD, D. G. Millar, Mrs. J. Sharpe, Ms. A. Milner-Barry, R. W. G. Wilson, W. A. Proctor, F. A. Cranmer, R. J. Rogers, C. R. M. Ward, PhD, Ms. H. E. Irwin, D. W. N. Doig, A. Sandall, MLitt, D. L. Natzler, E. P. Silk

SENIOR CLERKS—Mrs. S. A. de Ste. Croix, A. R. Kennon, D. W. Robson, L. C. Laurence Smyth, A. R. Gren, S. J. Patrick, D. J. Gerhold, C. J. Poyser, D. F. Harrison, S. J. Priestley, A. H. Doherty, P. A. Evans, R. I. S. Phillips, R. G. James, Miss E. J. Baker, Miss P. A. Helme, J. B. Ingram (acting), I. G. Gilbert (acting), J. Darling (acting), J. M. Hope (acting)

CLERK OF SERVICES SUB-COMMITTEES—K. J. Brown

ASSISTANT CLERKS—D. R. Lloyd, R. A. Lambert, B. M. Hutton, J. S. Benger, Ms. E. C. Samson, P. A. Hibbert, N. P. Walker, M. D. Hamlyn

SENIOR EXECUTIVE OFFICERS—G. E. Clayton, Miss R. J. Challis, P. G. Moon

HIGHER EXECUTIVE OFFICERS—L. L. Kaye, A. P. Hubner, Miss S. J. Fox, Mrs. P. Fisher, F. McShane, J. D. Whatley, S. D. Barrett, M. Clark, Miss A. M. Loader, Mrs. S. M. Barrett, Miss F. L. Allingham, Mrs. L. M. Nugent, J. A. L. Dresner (temporary)

SPECIALIST ASSISTANTS—Ms. H. C. Beaumont, M. P. Hillyard, M. J. Cremin, Ms. A. S. Frost, Dr. L. M. Rosborough, Dr. S. A. Harvey

EDITORIAL SUPERVISOR OF THE VOTE—G. H. Bright, DEPUTY—B. Tidball, ASSISTANTS—Miss B. Balcomb, Miss L. Lewis, J. Puricelli, K. B. Wood, P. D. Howlett, Miss J. M. Williams

EXAMINERS OF PETITIONS FOR PRIVATE BILLS—R. J. Willoughby, M. G. Pownall

REGISTRAR OF MEMBERS' INTERESTS—A. J. Hastings

TAXING OFFICER—R. J. Willoughby

CHIEF OFFICE CLERKS—R. A. Broomfield, Mrs. K. J. Rodger, Miss D. Symes (temporary), M. P. Oxborough (temporary)

DEPARTMENT OF THE SERJEANT AT ARMS

SERJEANT AT ARMS—Sir Victor Le Fanu, KCVO

DEPUTY SERJEANT AT ARMS—P. N. W. Jennings

ASSISTANT SERJEANT AT ARMS—M. J. A. Cummins

DEPUTY ASSISTANT SERJEANTS AT ARMS—P. A. J. Wright, J. F. Collins

CLERK IN CHARGE—Miss M. Frampton, MBE

ADMISSION ORDER OFFICE—E. D. Palfrey, A. Chipperfield, BEM, Mrs. S. J. Warren

PRINCIPAL DOORKEEPER—G. H. Sargeant

SECOND PRINCIPAL DOORKEEPER—R. T. Warboys

SENIOR DOORKEEPERS—H. D. Bloxham, S. E. R. Skinner, R. A. F. Chapman, J. D. Garnett, R. H. Usher, C. Gray

HEAD OFFICE KEEPER—W. H. Hazard, MBE

SENIOR OFFICE KEEPERS—M. Bryant, K. R. Kemp, K. R. Dickason

NURSING SISTER—Miss E. Needham

DEPARTMENT OF THE LIBRARY

LIBRARIAN—D. Menhennet, DPhil

DEPUTY LIBRARIAN—D. J. T. Englefield

LIBRARY AND RESEARCH—

ASSISTANT LIBRARIANS (Heads of Division)—G. F. Lock, Miss J. B. Tanfield

DEPUTY ASSISTANT LIBRARIANS (Heads of Section)—J. B. Poole, Ph.D, S. Z. Young, Mrs. H. R. Coates, Miss P. J. Baines, BLitt, K. G. Cuninghame, Mrs. J. M. Wainwright, FI InfSc, C. C. Pond, Ph.D, Mrs. C. B. Andrews, R. C. Clements

SENIOR LIBRARY CLERKS—Mrs. J. M. Lourie, Ms. F. Poole, Mrs. J. M. Fiddick, C. R. Barclay, Mrs. C. M. Gillie, R. J. Ware, DPhil, Ms. D. Gore, Ph.D, R. J. Twigger, B. K. Winetrobe, T. N. Edmonds, R. J. Cracknell, Miss O. M. Gay, Miss E. M. McInnes, Mrs. G. Allen

ASSISTANT LIBRARY CLERKS—Miss C. J. Gilmour, Ph.D, Miss M. Baber, C. M. Bowlby, Miss A. J. Saville, A. D. Lyall, Miss A. J. Cook, Ph.D, Mrs. P. Carling (temporary)

SENIOR LIBRARY EXECUTIVES—Mrs. S. M. Withers, ALA, Mrs. H. V. Holden, ALA, Miss J. Seaton, FLA, K. N. H. Parry, ALA, Ms. A. Muir

EDUCATION OFFICER—Mrs. E. R. Stones

HIGHER EXECUTIVE OFFICERS—Mrs. P A. Bozdan, S. A. Wise

HIGHER LIBRARY EXECUTIVES—J. A. Prince, MLS, Mrs. P. V. Wiles, Mrs. D. W. Clark, Miss C. E. Fretten, ALA, Miss M. H. Fletcher, Ms. V. R. Cattell, Mrs. P. E. Cook, ALA, Miss I. O. White, ALA, Ms. H. Armstrong, Miss E. J. Jones, ALA, Mrs. J. A. P. Skipworth, ALA, G. Haig, Miss B. Mee, MIInfSc, Miss G. L. Cooper, Ruth Bacon ALA (temporary)

SUPERINTENDING CLERK—J. R. Hutson

LIBRARY EXECUTIVES—Mrs. M. A. Azim, ALA, Miss S. Holland, LLA, A. D. Parker, ALA, Mrs. E. H. Riley, ALA, Ms. J. B. Hall, ALA, R. Freebury, T. Holmes, P. M. Ward, Ms. F. Whittle, Mrs. J. M. Smith, ALA, C. Sear (temporary), Mrs. F. Klipstein (temporary)

TRANSPORT MANAGER—R. H. Hyde

THE PARLIAMENTARY DEBATES

OFFICIAL REPORT

IN THE FIRST SESSION OF THE FIFTIETH PARLIAMENT OF THE UNITED KINGDOM OF GREAT BRITAIN AND NORTHERN IRELAND
[WHICH OPENED 25 JUNE 1987]

THIRTY-SEVENTH YEAR OF THE REIGN OF
HER MAJESTY QUEEN ELIZABETH II

SIXTH SERIES — VOLUME 138

TWENTY-FIRST VOLUME OF SESSION 1987-88

House of Commons

Monday 25 July 1988

The House met at half-past Two o'clock

PRAYERS

[MR. SPEAKER *in the Chair*]

PRIVATE BUSINESS

BRITISH RAILWAYS (NO. 2) BILL *(By Order)*
Order for consideration read.
To be considered tomorrow.

NEWCASTLE UPON TYNE TOWN MOOR BILL *[Lords] (By Order)*
Read a Second time and committed.

HARWICH HARBOUR BILL *[Lords] (By Order)*
Order for Second Reading read.
To be read a Second time tomorrow.

Oral Answers to Questions

ENERGY

Magnox Power Stations

1. **Mr. Corbyn:** To ask the Secretary of State for Energy what recommendations he has received from the Nuclear Installations Inspectorate on the case for additional safety measures for Magnox power stations.

The Secretary of State for Energy (Mr. Cecil Parkinson): The Health and Safety Executive's Nuclear Installations Inspectorate has asked the licensees of the Magnox power stations to carry out a long-term safety review for each station. These reviews are assessed by the NII, whose findings and requirements for continued operation are being published.

Mr. Corbyn: What is the cost per station and in total of all the safety measures required by the NII? Is the Minister prepared to review the unit cost of electricity generated by Magnox nuclear power stations and, in the light of that review, to consider phasing out those stations on grounds of safety, environmental damage and cost of electricity generation?

Mr. Parkinson: No, Sir. Each Magnox station is independently subject to long-term review. Two reviews have so far been completed. In the case of Berkeley, the cost of making the changes necessary to enable the station to continue to work until 1992 simply was not justified, whereas in the case of Bradwell it was. These are matters for the commercial judgment of the Central Electricity Generating Board, coupled with the fact that the NII must be satisfied before issuing a certificate and allowing the station to continue. Each station will be reviewed individually. It will be for the NII to say what is necessary to be done and for the CEGB to decide whether it is worth doing.

Mr. Marlow: Will my right hon. Friend tell the sandal-wearing, nut cutlet-eating—[HON. MEMBERS: "*The Guardian*-reading."]—yes, *The Guardian*-reading, bearded fanatics who have it in for nuclear power that in reality the environmental danger of fossil-fuel generated electricity as it is now produced is far greater than that of nuclear power? Will my right hon. Friend consider implementing an urgent programme to extend the amount of nuclear power generation in this country?

Mr. Parkinson: My hon. Friend is right. There is a strong argument that the safest and least-polluting source of energy is nuclear power, when installations are properly built, designed and regulated.

Mr. Matthew Taylor: In view of the great public interest, will the Secretary of State make available the full report on Berkeley and not just a summary? Will he also state the time scale for reports on Oldbury, Trawsfynydd and Sizewell A?

Mr. Parkinson: The CEGB has had the report on Berkeley. It has announced that the station will be closed and will cease to operate from March next year. That is a matter for the CEGB and the NII. The NII is clearly satisfied that it is safe for the station to operate during that period, or it would have withdrawn the licence. The NII has made recommendations about what would need to be done to keep the station working and the CEGB has decided not to spend the money, but the main fact is that the station is safe.

Mr. John Garrett: Will the Minister please come clean about the cost of nuclear safety, the cost of decommissioning the old Magnox stations, which is roughly estimated at £2·5 billion, and the uneconomic cost of nuclear power in general? Is he aware that electricity privatisation will be subject to the Financial Services Act 1986, which makes it a criminal offence to make deliberately or recklessly misleading forecasts to induce shareholders to invest?

Mr. Parkinson: As I am sure the hon. Gentleman knows, it is very hard to put an exact figure on the cost of decommissioning. The process could take up to 100 years. There are three stages. The first is withdrawal of the fuel and the second is the immediate decommissioning. There then is the decision on how long the station will be allowed to be maintained in a secure state so that the natural reduction in radiation can take place, which will make it safer for the workers when the final decommissioning is carried out. Provision is made for each station and is estimated at about £300 million over the period of decommissioning, which could be up to 100 years. I should add that coal—the Opposition's preferred option—is a massively expensive pollutant. If costs could be attached to coal with the same certainty as they are to nuclear energy, coal might look very dubious. Indeed, there is a school of thought that the British electricity user has been subsidising the mining industry to the tune of about £1 billion per year for the past 10 years.

Electricity Industry (Regulator)

2. **Mr. Rost:** To ask the Secretary of State for Energy when he expects to appoint the Regulator to oversee the electricity industry in the private sector.

The Parliamentary Under-Secretary of State for Energy (Mr. Michael Spicer): We plan to appoint the Regulator and have his office established by the time the industry has been reorganised for privatisation.

Mr. Rost: Is my hon. Friend aware of the widely held view, especially among prospective independent electricity producers who can provide the competition that the Government want, that the Regulator should be appointed as soon as possible in the transition period so that the contractual arrangements can be monitored in the run-up to privatisation?

Mr. Spicer: We clearly cannot appoint a Regulator until the necessary legislation has passed through Parliament. Until the Regulator is appointed and the regulatory regime is in place, the Government will oversee, or, to use my hon. Friend's word, "monitor", the electricity supply industry's preparation for privatisation. In particular, we shall oversee the negotiations of the initial contracts between distribution boards and the CEGB's successors. We shall not permit practices designed to stifle competition or to prevent distributors from making contracts with new sources of supply.

Mr. Prescott: Will the Minister confirm that the profit rates allowed by the Regulator for privatised electricity will be double those allowed for the public sector, which will confirm the fears of industry and consumer groups that Britain's electricity prices will move from being among the cheapest to becoming among the most expensive in the world? Will he also confirm that the salary of Lord Marshall, chairman of the new privatised company, will treble to £200,000 for managing a company that is 30 per cent. smaller? Will the Regulator be able to consider that exploitation of the consumer?

Mr. Spicer: I cannot confirm either of those questions, the second of which is a figment of the hon. Gentleman's imagination. As to profit regulation, the hon. Gentleman clearly has not seen the procedents for regulatory regimes or what we have written about them, because they will operate, not on profit regulation, but on price regulation.

Coal Industry

3. **Mr. Allen McKay:** To ask the Secretary of State for Energy if he has discussed recently with the chairman of British Coal the effects of privatisation of the electricity industry upon the British coal industry.

Mr. Parkinson: I meet the chairman of British Coal regularly to discuss all aspects of the coal industry.

Mr. McKay: Given that the paper sponsored by the *Financial Times*, "Coal on the market", says that the deep mines which could compete in 1995 will be closed in 1990 if the Government encourage a free-for-all in coal imports, given that the International Coal Development Institute has said that nuclear power is never likely to be able to compete with coal-fired power stations, and given British Coal's argument that it will need a 10-year contract after the privatisation of the electricity industry to secure the coal industry's future and the energy future of this country, will the Secretary of State stop considering his long-term political future and consider instead the long-term energy requirements of this country and give British Coal the contract?

Mr. Parkinson: Under this Government more than £9 billion has been invested in the coal industry, £6 billion of which has been in new capital equipment. The Government have shown a commitment to the industry that no previous Labour Government have matched. Our objective is to produce a modern British coal industry that is capable of beating foreign competition, not because it is protected against it, but because it outperforms it. Given our plans for the electricity industry, which envisage a substantial market for coal, and the amount of money invested in the industry to put it in a position to compete, the hon. Gentleman should begin to share my optimism that British Coal has a good future.

Mr. Dickens: Does my right hon. Friend agree that the future of the coal industry is in the hands of the workers? High productivity, flexible working, less time off work and fewer strikes will help the industry to compete with the rest of the world. Other countries are exporting coal to the United Kingdom, and I believe that the workers are beginning to realise that.

Mr. Parkinson: My hon. Friend is correct, and the point is clearly understood by many people who work in the coal industry. For example, the Scottish miners have made it quite clear that they are prepared to adopt flexible working if that is a way to secure their jobs. The Welsh miners have made it quite clear that they want Margam, and they are prepared to adopt flexible working. The only people who appear not to understand the need for better productivity in the mining industry are Opposition Members and some trade union leaders in the industry.

Mr. Eadie: Is this anti-coal Secretary of State aware that there is widespread opposition to freeing private generators to buy coal at the cheapest possible price available—his stated policy—irrespective of whether it damages the British coal industry? Will he tell the House what reply he has made to the warnings of the chairman of British Coal about the policy that the right hon. Gentleman is hell-bent on pursuing?

Mr. Parkinson: During the previous energy Question Time the hon. Gentleman said that the Scottish coal industry was about to close down and that my remark, that I felt that agreement would be reached on a sensible basis, was not true. His assertions have been exposed as completely untrue and ill-founded. His earlier assertions about my approach to the coal industry are equally ill-founded. I believe that British Coal has a future free from the sort of protection and life support systems that the hon. Gentleman appears to believe are its only means of survival.

Piper Alpha Disaster

4. **Mr. Chapman:** To ask the Secretary of State for Energy if he will make a statement on the daily loss of oil and gas volumes as a result of the Piper Alpha disaster; and what proportions of the total United Kingdom production these represent.

Mr. Parkinson: At the time of the disaster the daily oil production of the Piper Alpha platform was 120,000 to 130,000 barrels a day. Some 150,000 therms of gas per day were also produced and sold to British Gas.

Five other fields linked to Piper, producing an additional 180,000 barrels of oil and 350,000 therms of sales of gas per day, are currently shut down, but should be back in production within a few months. The total combined loss in daily production of Piper and those other fields at the time of maximum impact is equivalent to about 12·5 per cent. and 1 per cent. of total United Kingdom production of oil and gas respectively.

Mr. Chapman: I thank my right hon. Friend for giving the House those figures. Does he agree that however serious the disaster is from an economic point of view, it is of paramount importance that the safety of those working on our rigs and winning valuable resources from under the North sea is the main issue, and that nothing must be done to prejudice their safety? Would he like to take this opportunity to comment on whether those figures, serious as they may be, have had a bad impact on our balance of payments, or whether they are not as bad as was first thought?

Mr. Parkinson: I wholeheartedly agree with my hon Friend—I am sure that the whole House does—that safety in the North sea must be of absolutely prime importance.

On my hon. Friend's second point, I read today an estimate that it would cost about £500 million a year to our balance of payments. We regard that as excessive. It is based on the assumption that the fields associated with Piper will remain out of action for the rest of the financial year. We believe that they will be back in action well before then. Our estimate of the impact is something less than £300 million.

Mr. Salmond: Does the Secretary of State accept that the environment and safety provisions in the North sea originated when early production from the North sea was an overwhelming priority? Might it not now be time to review that priority and the safety regimes?

Mr. Parkinson; As the hon. Gentleman knows, a number of different bodies take part in certifying the platforms and safety in the North sea. The independent certification authorities are responsible for the equipment and construction of the rigs; the Department of Transport for the safety arrangements, fire detection and fire fighting; the Civil Aviation Authority for the helicopters; and that under the Health and Safety at Work etc. Act 1974, which was extended to the North sea in 1977, my Department's inspectorate carries out its duties in the North sea. Therefore, a substantial range of different bodies check different aspects in the North sea. I have set up the inquiry. If the inquiry recommends that things should be done differently, we will accept those recommendations.

Mr. Barry Field: I understand that the advice of my right hon. Friend's Department on the durability of North sea oil supplies featured heavily in the minds of the military planners when establishing the amount of the tonnage required to service this country during time of armed conflict. In view of this dreadful disaster, will my right hon. Friend review that strategic advice.

Mr. Parkinson: I had not planned to do so to date. I hope that my hon. Friend heard my earlier answer, in which I pointed out that, at worst, the loss of production is about 12·5 per cent. of our total oil production and that we expect that figure to fall sharply when the associated fields come back on stream, which we expect to be within a few months.

Mr. Doran: The Secretary of State has already mentioned the public inquiry into the Piper Alpha tragedy. Many of the victims' relatives and survivors will wish to be represented at that public inquiry, which may be important to their compensation claims against whoever is responsible. Bearing in mind the precedents of other public inquiries, will the Secretary of State consider extending legal aid or meeting the costs of that representation for those victims and survivors?

Mr. Parkinson: I cannot commit the Government to doing that at the moment, but I am aware of the other precedents and am giving the matter serious thought.

Mr. Cormack: Is my right hon. Friend aware that his promise to accept the inquiry's recommendations will be reassuring to many people?

Mr. Parkinson: The overwhelming priority is to have a regime in the North sea that is as safe as possible. If the inquiry identifies ways of improving the present regime, of course we will adopt them, because we all have a prime interest in safety.

Acid Rain

5. **Mr. Pike:** To ask the Secretary of State for Energy what recent representations he has received for additional retrofitting of flue gas desulphurisation equipment at existing power stations to reduce the problems of acid rain.

Mr. Michael Spicer: A few letters have been received by my Department on this and other aspects of acid rain.

Mr. Pike: Does the Minister accept that there is obviously concern in Europe and in certain parts of the United Kingdom about the pollution and acid rain that is caused by our power stations? Is he satisfied with the CEGB's rate of progress in the retro-fitting that has already been agreed? Will he speed that up, and does he agree that there should be more?

Mr. Spicer: We accept that there is some anxiety on this matter in Europe and elsewhere. That is why the Government are committed to agreeing to the EC large combustion plant directive, by which sulphur dioxide emissions will be reduced by 40 per cent. on the 1980 figures by 1998, and by 60 per cent. by 2003. That comes on top of the 40 per cent. reduction since 1970.

Sir Trevor Skeet: Will the cost of the massive regulatory system to be introduced following privatisation be passed to the distribution industry or to the consumers, and not left with the manufacturers of electricity?

Mr. Spicer: The passing on of generating costs is being seriously considered in the context of consultations on regulation. I assure my hon. Friend that we are also seriously considering any discrimination between those which have flue gas desulphurisation and those which do not.

Mr. Barry Jones: May I have an assurance from the Minister that if Connah's Quay power station in my constituency, which is now redundant, were brought back on stream post-privatisation, desulphurisation equipment would be fitted? Does the Minister understand that up to 12 redundant power stations are being considered for use if privatisation goes forward? Does he know on average how much it would cost per power station to fit desulphurisation equipment? We should be told those figures.

Mr. Spicer: The cost per large station of, say, 2,000 MW is about £220 million. The answer to the hon. Gentleman's first question is yes, that would be required. It is a matter for Her Majesty's Inspectorate of Pollution whether smaller stations should be fitted with this equipment.

Mr. Heathcoat-Amory: Is my hon. Friend aware that one coal-fired power station fitted with this equipment will use about 300,000 tonnes of limestone a year and will produce large quantities of sludge which will somehow have to be disposed of? Does he agree that we are solving one problem by creating another and that it would be preferable simply to burn less fossil fuel?

Mr. Spicer: My hon. Friend makes his own point in the last part of his question. His figure of 300,000 tonnes of limestone is correct, but it must be put in context. It is 0·3 per cent. of the United Kingdom's annual production.

Mr. Wigley: In view of the Secretary of State's comments that if the full environmental cost of coal were compared with nuclear electricity the comparison would be very different, is it not incumbent upon the Government to make sure that all the expenditure necessary to minimise acid rain is undertaken so that we do not suffer the environmental consequences that Wales is presently suffering?

Mr. Spicer: My right hon. Friend the Secretary of State said and I repeat that we are taking major steps to reduce acid rain to 60 per cent. of the 1980 figure by the year 2003.

Nirex

6. **Mr. Simon Coombs:** To ask the Secretary of State for Energy when he next expects to meet the chairman of Nirex and what matters he proposes to discuss.

Mr. Michael Spicer: My right hon. Friend and I meet the chairman of Nirex from time to time. We discuss a range of issues.

Mr. Coombs: Is my hon. Friend aware of the widespread natural concern about the eventual location of the low-level waste disposal site? Does he agree that there is a need for Nirex to reach a decision on this matter as soon as it reasonably can? In view of the announcement in the House last week by our right hon. Friend the Secretary of State about the future of the fast breeder reactor at Dounreay, will my hon. Friend now undertake that if Nirex puts before the Department a choice of locations which include Dounreay, he will give favourable consideration to Dounreay on the grounds of the job creation that will result from the location of a low-level site there?

Mr. Spicer: I entirely understand my hon. Friend's view, which, I am sure, is shared by others, that a decision on the disposal of intermediate and low-level waste should be reached as soon as possible. We expect Nirex to report on its conclusions at the turn of the year or early in the new year. Until then it is keeping its options open on all possible disposal sites, including, but not especially,

Dounreay. I cannot give my hon. Friend any further assurances, but we are aware of the need for a speedy resolution of this matter.

Mrs. Margaret Ewing: Will the Minister pay special attention to the announcement at the weekend by the vice-chairman of the Highlands and Islands Development Board that the idea of using Dounreay as a base for the dumping of nuclear waste is completely unacceptable? Will the Department of Energy bear in mind that the dumping of low-level and intermediate waste in the Highlands and Islands is greatly resented by people, who see their enduring employment from fishing, agriculture and tourism being adversely affected?

Mr. Spicer: I think that there is some controversy in the area. I understand that Caithness council is quite in favour of deep disposal at Dounreay. I repeat what I said earlier. No decisions have been taken on this matter and all options are being kept open.

Mr. Moss: Will my hon. Friend allay the fears of some of my constituents who are worried about rumours that Nirex intends to bury nuclear waste beneath the sea bed in the Wash? Will he confirm that as yet Nirex has made no decisions, and does he agree that the technology required for sub-sea burial is still unproven?

Mr. Spicer: Deep sub-sea burial is certainly one of the options that Nirex is considering. The second option is burying on land, and the third is burying under the sea from the land.

Mr. Cryer: Will the Minister bear in mind that, among the critics of coal-fired powers stations on the Conservative Benches, there are a number of enthusiasts for nuclear power, led by the hon. Member for Northampton, North (Mr. Marlow)? Will the Minister communicate that information to the chairman of Nirex, so that he can sound them out and they can organise a welcome for the dumping of radioactive waste in every one of the constituencies of the Tory Members who are enthusiasts for nuclear power stations?

Mr. Spicer: I shall certainly ensure that the chairman of Nirex sees a copy of *Hansard*, so that he can read what the hon. Gentleman has said.

Electricity Transmission

8. **Dr. Michael Clark:** To ask the Secretary of State for Energy what research his Department is sponsoring into the technology of electricity transmission; and if he will make a statement.

Mr. Michael Spicer: My Department does not sponsor any research on the transmission of electricity. The CEGB is currently spending about £4·5 million a year on transmission research.

Dr. Clark: Will the application of new materials to electricity transmission lead to less unsightly pylons in the country, particularly in south-east Essex? Is there any commercial application for the materials that are associated with superconductivity, so that the size of the pylons can be reduced, making them smaller and less obtrusive?

Mr. Spicer: I am not a technical expert on this subject. The new superconducting materials were only discovered in the past 18 months or so. I understand that it is too early to say how they will affect developments in transmission.

Mr. Matthew Taylor: The Minister will be aware that, at present, transmission losses are not passed on in costs for getting electricity down to Cornwall. It is delivered to Indian Queens, and losses are paid for only after that. Can the Minister say whether that will still be the case after privatisation, or whether people in areas such as Cornwall, where there are considerable transmission losses in getting power there, will have to pay extra costs?

Mr. Spicer: I can assure the hon. Gentleman that the transmission costs will be transparent, both for the supergrid and for lower voltages. Everyone will know what the costs are, as will the Regulator when he decides which costs are allowable. That is one of the great advantages of the privatised system. Everyone will know to a far greater extent where he stands.

Mr. Knapman: Can the Minister confirm that the decision to close Berkeley power station, which is in my constituency, was made on financial grounds, and certainly not on safety grounds?

Mr. Spicer: I can confirm that. It was entirely a matter of the CEGB deciding that it would not be commercially sensible to carry out the requirements that the Nuclear Installations Inspectorate had laid down. It was entirely a commercial decision.

British Coal Corporation

7. **Dr. Reid:** To ask the Secretary of State for Energy when he last met the chairman of the British Coal Corporation; and if he will list the subjects discussed.

9. **Mr. Janner:** To ask the Secretary of State for Energy when he last met the chairman of British Coal; and what matters were discussed.

10. **Mr. Eadie:** To ask the Secretary of State for Energy when he next proposes to meet the chairman of British Coal to discuss matters affecting the coal industry.

17. **Mr. Strang:** To ask the Secretary of State for Energy when he last met the chairman of British Coal; and if he will list the subjects discussed.

Mr. Parkinson: I meet the chairman of British Coal regularly to discuss all aspects of the coal industry.

Mr. Janner: Has the Secretary of State discussed with the chairman of British Coal the rumour that is going around that the Government intend to close seven of the eight coal-powered stations in the Leicestershire, Staffordshire and south Derbyshire coalfields area by the year 2000? Can the Secretary of State confirm that it is intended instead to build coal-fired stations near the coast and to use imported coal? The Secretary of State will understand—if the rumours are correct—just how horrified coal miners, their families and all the people in those areas are.

Mr. Parkinson: I can truthfully tell the hon. and learned Gentleman that that is the first I have ever heard of that suggestion and that it has never been discussed at any time with me.

Mr. Eadie: When the Secretary of State told me last Question Time that an agreement between the SSEB and British Coal was imminent, was he aware that that agreement would last only until March next year? Does he agree that no industry, never mind the coal industry, can plan its operations over such a short period? In the light of his meetings with the chairman of British Coal, can the Secretary of State supply the House with information on the likelihood of British Coal taking the SSEB to court over the Longannet and Cockenzie power stations?

Mr. Parkinson: Last time we had energy questions we were approaching the deadline for agreement between the two parties, and I said that I had reason to believe that they would reach agreement. I hope that they will use the next year to negotiate to put the arrangements between them on to a long-term basis. I made it clear that both my right hon. and learned Friend the Secretary of State for Scotland and I believed that there was a good future for Scottish coal, especially with the strengthening of the inter-connector, which will open up the English market for Scottish electricity, which has previously been closed to it.

Mr. Eadie: What about the courts?

Mr. Parkinson: On the subject of the courts, the two parties are negotiating. I hope that the question of the interim interdict can be put on one side and that they can focus on reaching long-term agreement.

Mr. Ashby: Will my right hon. Friend congratulate the chairman on the most successful visit that he organised last Friday for my hon. Friend the Parliamentary Under-Secretary of State and me to opencast sites in my constituency of Leicestershire, North-West? Will my right hon. Friend remind the chairman that there are a large number of areas of dereliction caused by mineral extraction and that it is in those areas, and those areas only, that opencast mining should take place in the next 10 to 15 years?

Mr. Parkinson: I heard from my hon. Friend this morning that he had found the visit extremely interesting. I think we all recognise that there is an important place for opencast coal in meeting our future coal needs. I am sure that the hon. Member for Midlothian (Mr. Eadie), the Opposition Front Bench spokesman who speaks for Scotland on these matters, will share my pleasure that the Northern Ireland Electricity Company has decided that Kilroot will be a coal-burning station and that that coal will be supplied from Ayrshire on a very competitive basis.

Mr. Andrew Mitchell: When my right hon. Friend next speaks to the chairman of British Coal, will he make a point of congratulating the Nottinghamshire miners on turning in an operating profit of £48 million during the past year, as well as on the very steep increases in productivity obtained by those miners during the same period? Will he make it clear that the important point is for the industry single-mindedly to pursue increases in productivity as the best guarantee of competitiveness and the long-term future of the industry, regardless of whether it is in the public or the private sector?

Mr. Parkinson: I shall draw my hon. Friend's remarks to the chairman's attention. I repeat that this point is recognised increasingly throughout the industry. In the past 12 weeks, six successive productivity records have been achieved, so the men working in the industry recognise that their future is literally in their hands.

Mr. Redmond: Does the Secretary of State agree that British Coal pensioners who helped produce coal to meet the needs of the country during two world wars—with blood, sweat and tears—receive a smokeless fuel allowance that is totally inadequate? When he next meets the chairman of the Coal Board, will he ask for an increase for those pensioners and widows?

Mr. Parkinson: I confess that I have not come across that point before. I shall examine the matter and bring it to the attention of the chairman.

Offshore Installations

11. **Mr. Hanley:** To ask the Secretary of State for Energy if he will explain the detailed procedures used to ensure that offshore installations are properly designed and maintained.

The Minister of State, Department of Energy (Mr. Peter Morrison): Every installation in our offshore waters must be in possession of a valid certificate of fitness. To obtain that, the owner submits to one of the independent certifying authorities information to enable an assessment of the design to be carried out. The certifying authority is required to carry out a major survey of the installation and its equipment before a certificate of fitness, which is valid for up to five years, can be issued. The authority must also carry out an annual survey.

Every offshore installation and its equipment is required, under current regulations, to be properly maintained.

Mr. Hanley: Clearly, each of the steps that my right hon. Friend has set out is vital in trying to maintain safety. Can he tell the House when the technical investigation that he has set in motion over Piper Alpha is likely to be completed?

Mr. Morrison: The technical investigation began almost immediately after we had announced it, which was shortly after the disaster. A lot of work has already been done and a number of people—about 90—have been interviewed. However, it must be said that some of the evidence is at the bottom of the seabed, and hence that will dictate the speed at which the investigation can proceed. However, it is the intention of those conducting that investigation to proceed as fast as they practicably can.

Mr. Prescott: The Secretary of State has said that safety is the first priority in the North sea. Can the right hon. Gentleman explain why the Department's report into the 1984 explosion on the Piper Alpha rig is now to be made available to the inquiry, but not available to those who have worked on that rig since 1984? What action is he now taking to reverse the decision to withdraw funds from the Institute of Oceanographic Sciences, which is a world authority on wave effects and oil rig and metal fatigue, the study of which are essential to safety in the North sea?

Mr. Morrison: The hon. Gentleman has heard on many occasions that the 1984 report will be made available to Lord Cullen. My right hon. Friend the Secretary of State and I said the same when we met the trade unions. It will be for Lord Cullen to decide whether to publish it, but my

right hon. Friend has written to him to make the points that the trade union delegation—which approached the matter in a constructive manner last week—made to my right hon. Friend and myself. The hon. Gentleman will appreciate that the Institute of Oceanographic Sciences is a matter for my right hon. Friend the Secretary of State for Education and Science.

THE ARTS

Business Spending

46. **Mrs. Virginia Bottomley:** To ask the Minister for the Arts, if he will make a statement on the progress of his policy to promote business spending on the arts.

The Minister for the Arts (Mr. Richard Luce): I was glad to participate in the launch of the business in the arts scheme by the Association for Business Sponsorship of the Arts last week. I shall be supporting it with £25,000 for each of the first two years. It joins the already successful business sponsorship incentive scheme in promoting business spending and practical help for the arts.

Mrs. Bottomley: As a member of the Association for Business Sponsorship of the Arts, I welcome my right hon. Friend's new initiative and his encouragement of partnership between business and the arts, which has led to the development of high-quality art. Will my right hon. Friend outline the objectives of the new scheme? What steps will he take to spread further information about it?

Mr. Luce: I am grateful to my hon. Friend, who has continued to give encouragement to business support for the arts. The purpose of the scheme, which is organised independently by the Association for Business Sponsorship of the Arts, is to complement and supplement sponsorship and donations from business to the arts by giving practical support by the provision of expertise, which many businesses in the arts world and arts organisations will welcome most warmly, the loan of people with particular expertise in specific areas, and generally to help to provide training for people in the arts world in the organisation of their businesses. I am glad to say that eight businesses have come in as sponsors, and I have made a Government contribution to this exercise.

Mr. Robert Sheldon: I welcome any business spending on the arts, but will the right hon. Gentleman consider the reverse aspect—business-spoilation of the arts? I am referring to the sale of the Lyceum theatre, which is a disgraceful business. Will the Minister ensure that he investigates this matter thoroughly with a view to ending this shameful episode in the history of the Lyceum and gets it restored as a proper theatre in London?

Mr. Luce: I welcome the fact that the right hon. Gentleman supports more business spending and support for the arts world. I understand the concern and anxieties that have been expressed by many people in the London arts world about the future use of the Lyceum theatre. It is, of course, principally the responsibility of my right hon. Friend the Secretary of State for the Environment, with whom I am presently in touch. The right hon. Gentleman will be aware that this is a complex problem and that it is not straightforward. There are certain obligations that the residuary body must discharge to the London ratepayers. Nevertheless, I am keeping a close interest in this matter.

Mr. Jessel: Does my right hon. Friend agree that the 50-fold increase in business sponsorship of the arts from £600,000 in 1976 to £30 million in 1987 is a tremendous success story, which has benefited audiences, artists and sponsors alike?

Mr. Luce: My hon. Friend is absolutely right. It is interesting to note that the business sponsorship incentive scheme has now generated, as a result of the awards that we shall announce this week, £20 million of additional money for the arts. We now have 770 first-time sponsors as a result of the scheme and all the evidence suggests that the vast majority of those sponsors wish to support the arts for a long time.

Mr. Fisher: Returning to the question asked by my right hon. Friend the Member for Ashton-under-Lyne (Mr. Sheldon), why has the Minister for the Arts not spoken out about the Lyceum before? Everyone else has —the Arts Council, the Theatres Trust—but there has been a deafening silence from the Minister on this subject. Will he now approach the London Residuary Body and his right hon. Friend the Secretary of State for the Environment and urge them to do what they have the power to do and use their discretion to consider some of the other bids, which would preserve this great theatre as a theatre?

Mr. Luce: I have, of course, retained an interest in this problem, but, as I have already told the House, it is not my direct responsibility. It is the responsibility of my right hon. Friend the Secretary of State for the Environment. He has certain obligations, and so does the London Residuary Body. Those obligations are laid down and clearly stated. My right hon. Friend has obligations towards the ratepayers of London. All these factors must be taken into account. I made my position clear in answer to the earlier question.

Mr. Cormack: Is my right hon. Friend aware that his sympathy, which was evident in his reply to the last question and to that of the right hon. Member for Ashton-under-Lyne (Mr. Sheldon), will be much appreciated? I express the hope that he will be able to persuade our right hon. Friend that the theatre should be saved.

Mr. Luce: I am grateful to my hon. Friend, who retains a close interest in all these subjects. I should remind him and the House that this is not a straightforward issue. There are many complex aspects to it. As I understand it, an appeal is pending with regard to whether Mecca will continue to have responsibility for the Lyceum. All these factors must be taken into account.

Merseyside Arts

47. **Mr. Wareing:** To ask the Minister for the Arts if he will call for an urgent report from the Arts Council on the funds allocated to Merseyside Arts.

Mr. Luce: I see no reason to intervene in this way between the Arts Council and Merseyside Arts.

Mr. Wareing: I am sure that all who are engaged in the arts in Merseyside will be saddened by that answer. I hope that the Minister will review it. Is he aware that over the next three years there will be an estimated reduction of 7½ per cent. in the income that Merseyside Arts receives from

the Arts Council? Taking into account the slashing of local government grants from central Government, which makes it difficult for local government to make up the difference, and the abolition of the community programme, which affects many people in the arts on Merseyside, Merseyside Arts will be in for real touble. Does the right hon. Gentleman not realise that, in an area of declining resources, his answer will come as a blow?

Mr. Luce: Merseyside Arts will receive £1,100,000 worth of resources from the Arts Council. It is for the Arts Council to decide how it distributes its resources between the various regional organisations. Merseyside Arts is fourth highest per capita in terms of the amount of resources that it receives. The hon. Gentleman, who is interested in these things in Liverpool, will realise that additional resources are earmarked through the Arts Council to help all the regions of this country. They include incentive funding and extra help for touring. I hope that the Merseyside area will benefit from that.

Mr. Rathbone: In the context of the arts on Merseyside, will the Minister take this opportunity to welcome the opening of the Tate of the North in Liverpool, which is a magnificent extension of the Tate's activities, which are already well established in London?

Mr. Luce: I warmly respond to what my hon. Friend has said. This is a good example of how, by spreading our national activities outside London, we bring advantage to many parts of the country. The Tate of the North, and the vast range of other arts facilities in Liverpool and Merseyside, show the enormous scope that exists for the authorities in Liverpool to exploit this opportunity and attract more tourists, thereby earning more money for the arts organisations.

Mr. Speaker: I call Question No. 51.

Mr. Campbell-Savours: What about Question No. 48, Mr. Speaker?

Mr. Speaker: I saw the hon. Gentleman in his place, but I had notification that he had withdrawn this question. I believe that that was the Minister's impression, too.

Mr. Campbell-Savours: I do not know what your Office was told, Mr. Speaker, but I have not withdrawn it.

Mr. Speaker: If that is so, perhaps the Minister would agree to answer Question No. 48.

National Theatre

48. **Mr. Campbell-Savours:** To ask the Minister for the Arts if he will establish an inquiry into production costs at the National Theatre.

Mr. Luce: The Arts Council evaluates the work of its clients on a regular basis, and I see no need to intervene. Assessments take account of all aspects of the National Theatre's performance—artistic, financial and managerial.

Mr. Campbell-Savours: If the costs of the National Theatre are escalating and its grant is cut, as it was in real terms this year, how can it afford to pay proper wages and salaries to all its employees? Will the Minister ensure that next year the National Theatre is given enough grant to ensure that those people are properly remunerated?

Mr. Luce: For the first time in its history the National Theatre is entitled to make arrangements with the Arts Council for three-year funding, which gives it a solid base upon which to plan in the long term. It has excellent management, an excellent artistic director, an excellent administrator and an excellent board, which has authority over the progress of the theatre. They are doing their best to raise resources, not just from Government, but from the private sector. The more they can do that, the more they will strengthen their affairs in the long term. In addition, they are entitled to incentive funding, if they qualify, and to extra funds for touring the country, which should bring benefits to them as well as to the regions.

Donations

51. **Mr. David Martin:** To ask the Minister for the Arts what information he has about donations to the arts from private or corporate sources in excess of £1 million in the six months to the end of June.

Mr. Luce: I am extremely grateful to all benefactors of the arts. I shall circulate a list in the *Official Report*.

Mr. Martin: Will my hon. Friend confirm that in the past month there have been four donations of more than £1 million each? Does it not show that interest and investment in this form of funding for the arts is thriving?

Mr. Luce: My hon. Friend is right. In one week in early July alone the arts received £7 million of support by way of donations or sponsorship. That is a clear demonstration of the amount of support and help that goes to the arts——

Mr. Allen: It is a pity that that money did not go to the CTCs.

Mr. Luce: It would be very good news if Opposition Members would welcome the process and encourage those who wish to help the arts.

Following is the list:

Table showing sponsorships of and donations to the arts in excess of £1 million since January 1988

Organisation	*Donor*	*Amount*	*Date of announcement*	*Purpose*
South Bank Programme	British and Commonwealth Holdings (sponsorship)	£1 million (over 5 years)	January 1988	Music
Tate Gallery	Anonymous	US$6·5 million	20 June 1988	To set up American Fund for Tate Gallery
National Gallery	Mr. Walter Annenberg, KBE	£2·85 million	22 June 1988	Restoration of Impressionist and post-Impressionist rooms

Organisation	Donor	Amount	Date of announcement	Purpose
Victoria and Albert Museum	Mr. T. T. Tsui	£1·25 million	20 June 1988	To create new gallery of Chinese Art and Design
BAFTA	Shell (sponsorship)	£3 million	12 July 1988	Various projects

CIVIL SERVICE

Parliamentary Answers

71. **Mr. Dalyell:** To ask the Minister for the Civil Service if, pursuant to his reply of 4 July, *Official Report*, column *730*, he will make it his policy, when answering a parliamentary question to the effect that he has nothing to add to previous replies, to indicate the precise *Hansard* reference for the answer or answers which provide the information requested.

The Minister of State, Privy Council Office (Mr. Richard Luce): I shall continue to abide by the conventions of the House.

Mr. Dalyell: Instead of pretending that questions on Westland have been answered, when they certainly have not, would it not be better for our country, and helpful from the point of view of the Commissioner going to Europe, if Ministers finally admitted that at column 657 on 27 January 1986 the Prime Minister caused much of this trouble by telling an indispensable lie to the House of Commons?

Mr. Speaker: Order. I ask the hon. Gentleman to withdraw that allegation about the Prime Minister.

Mr. Dalyell: I believe that there is cynical corruption involved in this——

Mr. Speaker: Order. I ask the hon. Gentleman to withdraw those words.

Mr. Dalyell: The words were extremely carefully chosen——

Mr. Speaker: Order. If the hon. Gentleman does not obey the Chair I shall be forced to name him, and I should be very reluctant to do that. I give him the opportunity to withdraw the allegation that the Prime Minister lied to the House.

Mr. Dalyell: The truth of the matter is that Parliament has been insulted——

Mr. Speaker: Order. If the hon. Gentleman is not prepared to withdraw those words, I shall be forced to name him. I give him one final chance.

Mr. Dalyell: I do not wish to embarrass you, Mr. Speaker. I am not asking for a final chance. I would not have said those words unless I meant them——

Mr. Speaker: Order. I name Mr. Tam Dalyell.

The Lord President of the Council and Leader of the House of Commons (Mr. John Wakeham): I beg to move,

That Mr. Tam Dalyell be suspended from the service of the House.

Question put:—

Question accordingly agreed to.

Mr. Speaker: Order. I have to direct the hon. Member for Linlithgow (Mr. Dalyell) to withdraw in compliance with the order which the House has just made.

Mr. Dalyell: On a point of order, Mr. Speaker. *[Interruption.]*

Mr. Speaker: Order. I ask the House to allow me to deal with the matter. I have said to the hon. Member that he must now withdraw from the House, otherwise I shall have to take the next step.

Mr. Allen: On a point of order, Mr. Speaker.

Mr. Speaker: Order. The hon. Member for Linlithgow must withdraw from the House first.

Mr. Dalyell: On a point of order, Mr. Speaker.

Mr. Speaker: Order. I have said to the hon. Gentleman that he must now immediately withdraw from the House. The hon. Gentleman has been suspended from the service of the House. I am not going to give the hon. Gentleman a further chance on this matter. I must say to him that if I have to ask the Serjeant at Arms to lay a finger upon him, he will be suspended for the rest of this Session. That is a very serious step for me to take.

Mr. Dalyell *rose——*

Mr. Speaker: Order. I must say to the hon. Gentleman that he must now leave at once, please.

The hon. Member withdrew.

Mr. Allen: On a point of order, Mr. Speaker. At what point does the authority of the Chair come into play when Ministers, after one year or two years, continually refuse to answer questions directly? Is it not your role, Mr. Speaker——

Mr. Speaker: Order. The whole House knows that that has absolutely nothing to do with me.

Mr. Allen *rose——*

Mr. Speaker: Order. What I asked the hon. Member to do was to withdraw an unparliamentary phrase, which I would ask any hon. Member on either side of the House to do if he used it. The hon. Member was named for refusing to obey the Chair.

Mr. Allen *rose——*

Mr. Speaker: Order. I am not taking any further points of order on this matter.

Civil Service Agencies

The following question stood upon the Paper:

76. **Mr. Robert G. Hughes:** To ask the Minister for the Civil Service what progress has been made in setting up the new Civil Service agencies.

3.37 pm

The Minister of State, Privy Council Office (Mr. Richard Luce): As I told my hon. Friend the Member for Wokingham (Mr. Redwood) earlier today, we have now identified 29 activities, covering some 170,000 civil servants, which are immediate agency candidates. One of these was, as my right hon. Friend the Secretary of State for Transport, told the House earlier today, the vehicle inspectorate, which will be established as an agency from 1 August. The project manager is examining with Departments the rest of their activities, and I hope to make a report to the House later this year.

Mr. Hughes: Does my right hon. Friend accept that his statement will be very welcome to those of us who believe that these measures will improve the delivery of service in many areas, particularly the areas that have been announced today? Will he confirm that it is important that those services should be free to act in a commercial sense and that he should get on with the process as quickly as possible? When does he hope to be able to announce further services that will be put out in that way?

Mr. Luce: I am most grateful to my hon. Friend. Of course, the whole purpose of the exercise in devolution of responsibility within the Civil Service for the executive functions is to improve the delivery of Government services, to improve management still further than the already high standards and to get the best value for money. That can best be achieved by this objective. My hon. Friend will see that the framework agreement for the vehicle inspectorate is extremely thorough and very long and highlights a number of areas where there is substantial devolution of authority. That is very important indeed.

On the latter part of my hon. Friend's question, I can assure him that we are intending to make as rapid progress as we can. I have now identified three other areas which we expect to become agencies soon—the Companies Registration Office, the DHSS resettlement units and the employment services.

Mr. John Garrett (Norwich, South): Will the Minister confirm that his officials are saying that up to three quarters of the entire Civil Service will be subjected to the agency arrangements, including DHSS local offices? How is he responding to the misgivings of the Treasury, publicly expressed, about the different pay rates for different agencies, and the misgivings of many hon. Members that under agency arrangements we shall no longer be able to call civil servants to account, particularly for some sensitive areas of public policy, such as the social fund?

Mr. Luce: The hon. Gentleman poses a number of questions. First, the project manager did state in evidence to the Treasury and Civil Service Select Committee that he felt that within 10 years at least three quarters of the Civil Service could have agency status established. I see no reason to quarrel with that figure. On the hon. Gentleman's second question, the DHSS, at the request of my right hon. Friend the Secretary of State for Social Services, is being examined as a possible candidate for agency status. Thirdly, the hon. Gentleman will know that, through my right hon. Friend the Chancellor of the Exchequer, we are already developing a more flexible pay policy on recruitment and retention grounds. That is already evolving, irrespective of the agencies. The vehicle inspectorate document, which is fully published, shows that there is considerable devolution of responsibility. On accountability, at the end of the day the Ministers concerned are accountable to the House and that principle must remain firmly established.

Mr. Terence Higgins (Worthing): Is my right hon. Friend aware that the Treasury and Civil Service Select Committee has now taken a great deal of evidence on the subject and hopes to report soon? Clearly, I cannot anticipate what the report may say. On a personal basis, may I say that the selection of the vehicle inspectorate as an example seems to be an appropriate one.

Mr. Luce: I am grateful to my right hon. Friend. When he publishes the report by the Treasury and Civil Service Select Committee, I can assure him that I and my right hon. Friends will study the findings carefully.

Mr. Giles Radice (Durham, North): Is it not the case that if there is to be such a dramatic change by the end of 10 years, it will have profound implications for democratic and parliamentary accountability, particularly for the role of Ministers, Members of Parliament, Select Committees and the Public Accounts Committee?

Mr. Luce: I know that the hon. Gentleman is taking a close interest in the matter in his role as a member of the Select Committee. I must strongly reiterate that Ministers will remain ultimately accountable. The nature of the responsibility between the Secretary of State for broad policy matters and the chief executive for day-to-day management matters has to be spelt out clearly in the framework document. That is clear in the document available for the vehicle inspectorate. At the end of the day, Ministers are accountable but it is open to Select Committees to invite the chief executive and other officials to give evidence to them.

Mr. Michael Heseltine (Henley): I welcome my right hon. Friend's statement, but does he agree that the heart of enhanced responsibility in the management of such agencies is that the managers should be recruited from the public and private sectors, that they should be recruited on contract and not on life terms and that, as long as the Treasury has control over the pay and conditions of the employees of the agencies, the concept of responsibility at which my right hon. Friend is driving still has a long way to go?

Mr. Luce: I respect my right hon. Friend's view, since he has had considerable experience in the subject and did a great deal during his time in office to help improve the management and resources of the Civil Service. I can confirm that, on the recruitment of chief executives and other officials, it is open to Secretaries of State in charge of the particular agency to recruit from outside the Civil Service if they so wish. If they think that it is more efficient that way they are entitled to do so, provided that there is fair and open competition. I agree entirely with my right hon. Friend that there are definitely advantages in having

[Mr. Luce]

fixed contracts in certain circumstances. That is what has happened for the vehicle inspectorate, where there is a three-year contract.

As for the Treasury and my right hon. Friend the Chancellor, if my right hon. Friend looks at the framework agreement for the vehicle inspectorate, he will see the extent of devolution of responsibility that has already been provided for the management of personnel, for resources and for the giving of performance-related pay, which is extremely important. It must be in the interests of the Treasury as well as that of the Government to obtain better value for money. That is the point of the agency process. It is in all our interests that it should succeed.

Mr. Robert Sheldon (Ashton-under-Lyne): All hon. Members will agree that we want value for money in all respects in these matters. Will the right hon. Gentleman accept that accountability to Parliament is the crucial test? The Prime Minister said that the agencies will be accountable to Parliament. The right hon. Gentleman's comments seem to have gone a little astray from the Prime Minister's remarks. Will he give a further assurance that accountability to the Public Accounts Committee, to the National Audit Office and to the Comptroller and Auditor General will remain unchanged?

Mr. Luce: I can give that assurance to the right hon. Gentleman without any equivocation. There is no doubt about it.

Sir Peter Blaker (Blackpool, South): Will the agencies have power to relocate staff outside London and the south-east of England, in so far as they are not already relocated, if relocation is considered desirable to save costs, for example?

Mr. Luce: I know of my right hon. Friend's interest in the matter. He may have noticed that my right hon. Friend the Paymaster General recently made a statement about the relocation of the Civil Service. Four out of five civil servants are already outside London. In terms of recruitment and retention, if Departments find it more beneficial to move civil servants to other regions, they will look seriously at the matter, and it should be regarded as a high priority.

Mr. Harry Barnes (Derbyshire, North-East): Have there been full, free and frank discussions with the relevant Civil Service trade unions about this agency in the vehicle inspectorate? The matter should be discussed with the three other agencies that were referred to, and the 25 agencies that will follow.

Mr. Luce: I can give the hon. Gentleman an assurance that, in any case, if there is to be a suggested change in the terms and conditions of the Civil Service, there will be full and proper consultations with the Civil Service. The hon. Gentleman might like to know that, last Friday, the project manager for the next steps, Mr. Kemp, saw the trade unions to consult them about the next stages.

Mr. Nicholas Soames (Crawley): Does my right hon. Friend agree that, as in the rest of the Civil Service, many benefits would accrue to the agencies were there to be a great more fluency in the coming and going between the public and private sectors? As my right hon. Friend has already given an assurance in respect of new agencies, will he seek broadly throughout the Civil Service to have many more civil servants having experience in the private sector and vice versa?

Mr. Luce: My hon. Friend is absolutely right. We are looking at ways in which we can strengthen the interchange between the private sector and the Civil Service, not just by secondments but by other means. The establishment of these agencies will do quite a lot to strengthen that process. As I said earlier, we certainly will not exclude the possibility of chief executives being part of that process.

Mr. Max Madden (Bradford, West): Will the Minister confirm that he does not propose full privatisation but an agency because of opposition to privatisation from the road haulage industry? Will he confirm that all trade unions representing the appropriate staff have been fully consulted? Are we to take it that "a more flexible pay policy" is a euphemism for the ending of nationally agreed pay rates?

Mr. Luce: The Government's policy on privatisation has not changed as a result of the "next steps" policy. If a Minister decides that a particular function of his Department would be better carried out by means of privatisation, that must be his first priority. It is only when that is decided as not being the best process and the best next stage that an agency may be decided upon as the best move to strengthen the management of services. I simply reiterate that we have undertaken to consult trade unions whenever there are any proposed changes in terms and conditions. The project manager saw trade union leaders last Friday to talk about the next stages.

Mr. Peter Thurnham (Bolton, North-East): Does my right hon. Friend agree that service to the public should be much improved if the Companies Registration Office were put on an agency basis? Is he aware of the long delays at present? On average they are 10 weeks, and, in the case of some Barlow Clowes documents, over 200 days.

Mr. Luce: It will be for my right hon. Friend the Secretary of State for Trade and Industry in due course to announce the timing, if he eventually decides to establish an agency, and how he envisages an improvement in services. My hon. Friend is right to stress the importance of the improved delivery of services. That is one of the major objectives of this exercise. It is interesting that, earlier today, my right hon. Friend the Secretary of State for Transport highlighted some examples of how the services of the vehicle inspectorate can be improved.

Dr. John Marek (Wrexham): Will the Minister confirm that standards of testing will be maintained in the long term, following the setting up of the agency? Secondly, will he confirm that the road haulage industry opposed privatisation due to escalating costs and therefore that the agency is not a first step towards privatisation? What guarantees can the Minister give staff wishing to transfer to or from the agency in the future? Finally, when the Minster refers to flexible pay, many of us assume that he means lower pay for people in the north, Scotland and Wales. Can he deny that?

Mr. Luce: The first two questions are principally for my right hon. Friend the Secretary of State for Transport, but my right hon. Friend is happy for me to stress that, with

regard to the vehicle inspectorate, the safety interest will remain paramount. It is important to confirm that. I also confirm that my right hon. Friend has no plans whatever to take the matter a stage further to privatisation. His first and immediate priority is the establishment of an agency.

Hospital Patients (Radiation Overdose)

3.51 pm

Mr. John Hannam (Exeter) *(by private notice)*: To ask the Secretary of State for Social Services if he will make a statement on the radiation overdose given to patients receiving radiotherapy at the Royal Devon and Exeter hospital, Exeter.

The Parliamentary Under-Secretary of State for Health and Social Security (Mrs. Edwina Currie): The telecobalt machine at the Royal Devon and Exeter hospital was installed some years ago and is of a type commonly in use in the National Health Service to treat cancer patients. On 12 February 1988, a new cobalt source was installed as part of a routine service. Due to an error of calibration, the machine was then set to give a 25 per cent. higher dose of radiation. On 12 July 1988, staff dealing with patients drew attention to side effects in a small number of patients and the machine was checked. The error was immediately found and rectified. The machine is not itself faulty and continues in use.

Immediate steps were taken to identify the 153 patients who had been treated on the machine during this period. An independent assessor, Professor Charles Joslin of Leeds university, has been asked to give an opinion on each case. All the patients concerned are being called in this week and treated or counselled as necessary.

Exeter health authority has set up an inquiry drawing on the expertise of Professor Joslin, and an independent physicist called in at the authority's regional scientific officer, and the Health and Safety Executive. Their reports are expected to go to the health authority as soon as possible. I am satisfied that appropriate action has been taken and that patients should continue to have confidence in radiotherapy as a major lifesaving treatment both in Exeter and elsewhere.

Mr. Hannam: I and all hon. Members express sympathy to those facing terrible uncertainty as a result of this unfortunate error. Is my hon. Friend aware that there is great concern about the lack of a fail-safe check-up system for the recalibration of radiotherapy equipment? Should not the Health and Safety Executive give a clear specification of the requirements for such checks and the responsibility for such a system be placed on the health authority?

Finally, can my hon. Friend say to what extent the excess doses of radiation given to patients fell within the range of normal treatment practice elsewhere by other clinicians?

Mrs. Currie: On the last question, I am sure that my hon. Friend would not wish me to give a clinical view which might reflect on particular patients, but I am assured that much of what he has said is correct.

With regard to a fail-safe device, guidelines for inspections are set out in two sets of statutory regulations, both of which are accompanied by detailed guidance which builds on earlier similar guidance. I refer my hon. Friend to paragraph 7.22 of the guidance, which does not appear to have been followed in its entirety. We expect the Exeter inquiry to address this issue and I have asked the Health and Safety Executive to advise me further.

Mr. Matthew Taylor (Truro): Will the Under-Secretary of State confirm that all patients have been or will be contacted successfully and that there is no problem in identifying all concerned in this instance? Will she also confirm that all other machines which might be subject to similar errors will be checked and all steps taken to ensure that no such overdoses are taking place elsewhere and that none will occur in the future?

Mrs. Currie: Yes, we are not in any doubt about the nature of the error, the date on which it occurred or its duration. There is no doubt which patients have been affected, and they either have been or are being contacted. As to the second part of the hon. Gentleman's question, the output of the machines should be checked monthly, which is normal practice in National Health Service hospitals. I have asked the Health and Safety Executive to advise me further on the matter.

Sir Peter Emery (Honiton): Will my hon. Friend accept that, while there is much concern about the matter, everybody in the locality has much praise for the work that the Royal Devon and Exeter hospital does? When 153 patients are involved, some of whom are young children, there is much concern. How is the division between clinical control and executive management supervision affected? It seems that a clinical decision was taken but that it was very difficult for the executive management to spot the problem.

Will my hon. Friend confirm that there will be an independent chairman of the inquiry? It has been suggested that the deputy chairman of Exeter health authority might be appointed. That would be a mistake, because somebody from outside Devon should be appointed to ensure that nothing is being hidden. Why has there been a delay of over 10 days from 12 July to date? Patients should have been notified; many of them learned about the problem only because of television. That must be a terrifying factor, that should never be allowed to happen again.

Mrs. Currie: Yes, I agree with much of what my hon. Friend says. I concur with my hon. Friend that radiotherapy machines save lives. There is no doubt that, had patients not been treated on them, the condition from which they were suffering could have been terminal. I understand that the equipment is the responsibility of the physicists, and that advice from an outside adviser who is a physicist has been called for by the health authority. As to the question of an independent chairman, the health authority has called immediately for an inquiry, and it is appropriate that the inquiry should be conducted within that framework. I have said that I expect the inquiry, through the regional health authority, to report to me with its recommendations.

As to the delay in notifying patients, I understand that the intention was first to obtain a judgment on cases, if at all possible, so that the patients could be reassured or offered further treatment if necessary. In my view—I think that my hon. Friend will share this view—notifying patients where there is cause for concern should be a top priority. I have asked my officials to advise me urgently on a possible standard procedure that we could offer to all health authorities, bearing in mind that patients should have as much information as possible to set their anxieties at rest. Patients should not hear about the problem from the press first.

Mr. Robin Maxwell-Hyslop (Tiverton): Can my hon. Friend tell me whether Professor Joslin's report will be published and when she is expecting that it will be available to hon. Members as well as to the public at large and, indeed, to the general practitioners who referred the patients to the Royal Devon and Exeter hospital in the first place, because they will obviously have the more intimate and day-to-day contact with the patients?

Mrs. Currie: I am advised that Professor Joslin is offering detailed clinical guidance, case by case, on all 153 patients treated by the machine. It would almost certainly not be appropriate for that information, which is confidential, to be published. He will, however, be making a report, as requested, to the health authority, and I expect it then to take a view about whether a summary of it may be made available. We certainly intend to learn from all the lessons.

Several Hon. Members *rose*——

Mr. Speaker: Order. I remind those Opposition Members who were rising that this matter specifically refers to the Royal Devon and Exeter hospital. I shall call the hon. and learned Member for Leicester, West (Mr. Janner), but it is not about Leicester.

Mr. Greville Janner (Leicester, West): No, Mr. Speaker, but it could be.

Has the Minister taken legal advice as to whether or not a prosecution would be permitted of the Royal Devon and Exeter hospital, or any other where such a hazard has been caused not only to people at work but to those who are affected by its undertaking? If such a move were excluded by Crown immunity, it is not time that the rule was changed?

Mrs. Currie: It is far too early to answer questions such as that, as the hon. Gentleman, who is a lawyer, knows perfectly well. Responsibility for the safety of this type of equipment both for patients and for staff lies with the Health and Safety Executive in the first instance. I have asked it to check that the guidance which says that the equipment should be checked monthly is being followed and to advise me whether any further action is necessary.

Miss Emma Nicholson (Torridge and Devon, West): On Saturday, I had an opportunity to see some of my constituents, who are patients affected by the higher than anticipated doses of radiation. They have asked me to convey to the Minister their genuine confidence in the work of the consultant and the hospital technicians, and their extreme confidence that ameliorative action will be taken. Although this incident has added to their anxiety about their disease treatment, they are comfortable with the action that is now being taken.

Mrs. Currie: I am grateful to my hon. Friend. That is certainly the message that I have had, too. Many of the patients being cared for in this way were receiving palliative treatment—in other words, low dosages anyway —which was designed to make them more comfortable. I understand that a number of the other patients were taking part in a trial of low dosage treatment and, therefore, my anxieties are somewhat relieved.

Mr. Ron Leighton (Newham, North-East): Will the Minister deal with the advisability of having a chairman for the inquiry from outside that health authority?

Mrs. Currie: Our procedure, which we have followed on previous occasions when there has been any cause for concern, is to ask the health authority to carry out an inquiry. In this case, the health authority has already decided to do so and we will wait to see what it proposes to do and whether any action is necessary.

Mr. Tony Speller (Devon, North): I must own that the tenor of the impressions given by my hon. Friends suggests that a bucket of whitewash is adjacent already. I wish to speak for one constituent who had a course of treatment during May. At that time she was told, "No, you never get burned by this treatment." She was burned to the extent of needing in-patient treatment in the South Molton hospital. At that stage, someone should have said, "If people are not normally burned, why has this woman been burned?"

I must state that, at 2.30 this afternoon, this lady had not had any notification since the health authority discovered the problem a fortnight ago. I am glad that the press got hold of this leak some time after the authority discovered the problem. What happened was that this lady heard about the too high dosages of radiation on the radio. She then telephoned the hotline number. She was told, "If you have not heard, you are not concerned." She therefore relaxed. The next day, on the television, she saw a picture of the apparatus, which she recognised, so she telephoned again. She was told, "Yes, you are concerned." Just imagine the feeling of this poor person.

Mr. Speaker: Briefly, please.

Mr. Speller: This is an important matter, at least to us locally. Quite frankly, the surgeon or the chap who appeared on the television gave what can only be described as a flip collection of answers, including such answers as, "Some people have asked for higher dosages because they get better quicker." There is a whiff of scandal here, which I hope we shall not try to cover up.

Mrs. Currie: I hear what my hon. Friend has said, and he knows me well enough to be aware that there is never any whitewash around when I am in charge of something. As I said a moment ago, it is my firm view that patients should be contacted with as much information as possible, and as soon as possible. I understand why that was not done in the case of the Exeter health authority—it has been trying hard to get a proper clinical view for each patient before they are contacted. That is a reasonable thing to try to do, but in the circumstances I hope it will ensure, and indeed that we can develop procedures in future to ensure, that patients are well informed in advance.

I cannot comment further on the clinical advice that my hon. Friend's constituent was given, except to say that it is quite normal to have mild side effects from treatment of this sort. If it is to cure the cancer, it sometimes causes other damage as well.

Ms. Harriet Harman (Peckham): Does the hon. Lady recognise that people are worried not just because a mistake of this nature was made, but that it remained undetected for so long? Will she ensure that all hospitals follow the good practice that is followed in some—and which is not in the regulations—which is that machines are checked on the basis of output rather than simply by calculating what the machine should be sending out? That check should be made every month and should be made by two physicists.

As the district health authority has admitted liability, will the hon. Lady ensure that compensation for suffering and anxiety is speedily assessed and paid? Will she tell the House how long ago the machine in question was installed?

Mrs. Currie: In connection with the last question, I cannot answer in detail, but I know that the machine has been in use for some time. It has been in use in Exeter for a number of years. The answer to the first question is yes.

The answer to the second question is yes, and I shall simply read into the record paragraph 7.22 of the guidance which goes out with the statutory regulations. It says:

> "A qualified and experienced radiation physicist should be made responsible for ensuring that all gamma and beta-ray apparatus is checked for correct operation and applicability of the output data in use, at least once every month".

That has been the guidance for a very long time and we would expect the health authority to know about it.

In answer to the third question about compensation, I think our first job is to look after patients' health and we can concern ourselves with other issues, if necessary, later.

European Commission (Appointments)

4.5 pm

Mr. Nigel Spearing (Newham, South): I beg to ask leave to move the Adjournment of the House, under Standing Order No. 20, for the purpose of discussing a specific and important matter that should have urgent consideration, namely,

"the appointments by Her Majesty's Government to the Commission of the European Economic Community."

The matter is specific, as these appointments are the responsibility of a Minister of the Crown and specified under a treaty to which both Government and Parliament are currently subject. They therefore arise not from prerogative powers, but from obligations specifically entered into by the House by Act of Parliament.

The appointments are of great public importance as the holders of those offices are thought to have significant powers and influence over the nature and range of legislation that can be applied indirectly to both people and Government of the United Kingdom—even, on occasion, against their express desires. It thus follows that the procedures relating to such appointments, the role of the Commissioners, the proven record of public service and the qualities of the person so nominated, transcend the normal practices relating to domestic appointments. Until recently, that principle appears to have been recognised by successive Governments, but it is now in doubt.

In addition, in respect of one of the nominees, there have been press and other reports relating to the fourth report of the Defence Select Committee, House of Commons paper for the 1985-86 Session, which in paragraph 177 referred to conduct which was "especially reprehensible", and in paragraph 179 to

"an outrageous way in which to treat a Law Officer of the Crown".

The matter is urgent because, while no formal decision on the Adjournment of the House had yet been made, the time available for debate on the matter is likely to be limited to two or three days, within which both the probability and form of debate by other means are not assured when weighed against the importance of the topic.

As the guardian of the role of the House of Commons, Mr. Speaker, you are thus instructed to be mindful of the responsibilities of Members to debate matters of urgent public importance, especially those which both assert and put into practice the accountability of Ministers of the Crown, and thus their accountability to those who sent us here.

Mr. Speaker: The hon. Gentleman asks leave to move the Adjournment of the House, under Standing Order No. 20, for the purpose of discussing a specific and important matter that he believes should have urgent consideration, namely,

"the appointments by Her Majesty's Government to the Commission of the European Economic Community."

As the hon. Gentleman knows, I have to decide, when making my judgment on these matters, whether an application meets the criteria laid down under Standing Order No. 20.

I listened with care to what the hon. Gentleman said, but I regret that I do not consider that the matter he has raised is appropriate for discussion under Standing Order No. 20. I cannot, therefore, submit his application to the House.

Several Hon. Members *rose*——

Mr. Frank Dobson (Holborn and St. Pancras): On a point of order, Mr. Speaker, I would certainly not wish to dispute your view that the matter that my hon. Friend the Member for Newham, South (Mr. Spearing) raised merits taking precedence over other business, but have you had any representations from the Prime Minister about a desire, or even a lack of a desire, on her part to make a statement about the rather remarkable circumstances in which a right hon. and learned Member of the House, who resigned in disgrace from the Cabinet, is now being put forward as one of this country's nominees to serve on the European Commission? As you know from events earlier today, Mr. Speaker, there are deep and bitter feelings about the whole question of the Westland scandal and the role of Ministers in it—*[Interruption.]*

Mr. Speaker: Order. I have to say to the shadow Leader of the House that the application to which I have just listened was not concerned with that matter. It was concerned with the appointments—both appointments—to the European Commission.

Mr. Dobson: I was going to go on to say, Mr. Speaker, that there is most legitimate concern in this House about what happened over the Westland affair and whether significant people involved in that affair are, in effect, getting pay-offs for keeping quiet about those events. My right hon. and hon. Friends are especially concerned about the difference between the treatment of the person whom it is proposed should replace Lord Cockfield and that of Stanley Clinton Davis, a former Member of the House, a man of the highest integrity who served this country well in his post as a commissioner, and who appears to have been dispensed with entirely on the basis of personal spite on the part of the Prime Minister. In those circumstances, it is only right and proper that she who makes the appointments should come to this House to explain what she is up to——

Several Hon. Members *rose*——

Mr. Speaker: Order. If hon. Members look at the Order Paper, they will see that we have a very heavy day and perhaps even a heavy night ahead of us—*[Interruption.]* Allow me to answer this question. I can deal only with matters which are my responsibility. I have not received any notification from the Prime Minister that she wishes to make any statement. *[Interruption.]* Order. However, the House knows that she will be present here tomorrow and the House knows equally that there are other opportunities this week when this matter could be raised if hon. Members think that it is important.

Mr. Tony Marlow (Northampton, North): On a point of order, Mr. Speaker. May I say briefly how totally devastated and baffled we are on this side of the House that the hon. Member for Newham, South (Mr. Spearing) should wish to continue the reign of Lord Cockfield in Brussels? Having said that, Mr. Speaker, may I also say how baffled we are that we have just received a lecture on parliamentary morality from the Shadow Leader of the House some 10 or 15 minutes after a vote in this House to sustain your authority for which the hon. Gentleman was not present? That must be almost without precedent. The hon. Gentleman's predecessor, the right hon. Member for Blaenau Gwent (Mr. Foot), is here and he can tell us

whether it is without precedent. It is my belief that usually when there is a vote in this House to sustain your authority, not only the Leader of the Opposition and the Opposition Chief Whip, but the Shadow Leader of the House, also comes to your support. We on this side feel that this is totally reprehensible and quite disgraceful.

Mr. Speaker: I hope that the whole House will always support the Chair in these difficult matters. *[Interruption.]* Order. I cannot see any profit in dealing further with this matter because they are not questions that I can answer

---

Several Hon. Members: On a point of order, Mr. Speaker.

Mr. Speaker: Order. If it is on a different issue, I will try. Mr. Winnick.

Mr. David Winnick (Walsall, North): As you will know, Mr. Speaker, there is concern that power and sovereignty are being taken from this House to the European Commission, and I should have thought that that matter would concern you. As power and sovereignty are being transferred more and more from this House to Brussels, are we not now in the ironic position where the Government's appointments of commissioners are not even being debated in prime parliamentary time?

You said a moment ago, Mr. Speaker, that this issue could be raised with the Prime Minister tomorrow, but what about the possibility of having a debate and the necessity of being able to put forward points of view? It is not just a question of the very controversial appointment of the right hon. and learned Member for Richmond, Yorks (Mr. Brittan)—that may well be a matter for debate—or of what is, in my view, the justified dismissal of Lord Cockfield, the Euro-fanatic; it is also about the right of this House to be able to debate who should be our commissioners in Brussels.

Mr. Speaker: Obviously the hon. Gentleman was not here last Thursday when the Leader of the House announced the business for this week—*[Interruption.]* Well, it is not for me to give hints to hon. Members, but there is an opportunity on the summer Adjournment motion to debate this very matter.

Mr. Alastair Goodlad (Eddisbury): Further to the point of order, Mr. Speaker. Is it not the case that any suggestion from Opposition Members that my right hon. and learned Friend is anything other than a man of the highest integrity and ability is not only out of order but untrue?

Several Hon. Members *rose*——

Mr. Speaker: Order. The whole House will agree that the right hon. and learned Member for Richmond, Yorks (Mr. Brittan) is a man of the highest integrity and that there has never been any suggestion to the contrary.

Mr. Bob Cryer (Bradford, South): On a point of order, Mr. Speaker. You announced that in the business of the House there will be opportunities to raise this issue this week, such as in the Consolidated Fund debate and in the summer Adjournment debate, but I would point out that those opportunities will not provide decisions. Is it not one important aspect of this—I seek your guidance, Mr. Speaker—the fact that a decision has been announced by the Prime Minister? We should like to know in what way this House can reverse that decision if it is necessary to do so, bearing in mind that this is the last week before we reassemble on 18 October. Presumably, if this House passed a resolution reversing that decision and appointing other persons, that decision of this House would be superior to the patronage doled out by an ever-grateful Prime Minister to the right hon. and learned Member for Richmond, Yorks (Mr. Brittan).

Mr. Speaker: As I understand it, the appointments do not take effect until January and in any case, if the hon. Gentleman really wishes to push this matter, he could make the case that we need not adjourn.

Mr. Anthony Beaumont-Dark (Birmingham, Selly Oak): In the 40 years up to 1984, 12 Members of this honourable House were suspended on Mr. Speaker's instructions; in the past five years 14 Members—now 15 Members—have been suspended. I believe that the Select Committee on Procedure is now looking into the discipline of the House. Do you not agree, Mr. Speaker, that we have now come to a stage when, often at the end of a parliamentary Session, because suspension means little, any hon. Member who is suspended today, tomorrow, on Wednesday or on Thursday is not really suspended at all, and the abuses of privileges of this House will go on and on? As we are getting to a stage where every day is more like changing guard at Buckingham Palace, wondering who is going to go next, should not we, as a House, decide that people who wish to exercise their privilege to be suspended, should be so for a Session at least, possibly for a Parliament, since otherwise this House gets into great disrepute?

Mr. Jonathan Aitken (Thanet, South) *rose*——

Mr. Speaker: Is it on the same matter?

Mr. Aitken: Yes, Mr. Speaker. On the point raised by my hon. Friend the Member for Birmingham, Selly Oak (Mr. Beaumont-Dark), may I appeal to you not to suspend the hon. Member for Holborn and St. Pancras (Mr. Dobson), because he has made a most important announcement of a new leadership race in the Opposition—first because of the Leader of the Opposition having been asleep during the endless arguments about the sovereignty of this Parliament and, secondly, because he completely missed his chance in the Westland debate? We must not be allowed to exhume all those issues on the bogus issue that there is something wrong with my right hon. and learned Friend the Member for Richmond, Yorks (Mr. Brittan).

Mr. Speaker: Let me deal with the question that was put to me about discipline in this House. I hope that it was a slip of the tongue for the hon. Member for Birmingham, Selly Oak (Mr. Beaumont-Dark) to say that it is a "privilege" to be named in this place. It is a serious step. I hope that the whole House will always uphold the authority of the Chair. If that does not happen, anarchy becomes the order of the day, and that is not the way in which we can conduct our affairs.

Mr. Dobson: Further to the point of order, Mr. Speaker. Could you confirm that it is not a matter for you as Mr. Speaker if someone lies to this House, but that it is a matter for you if someone else says that they have lied?

Mr. Speaker: I confirm to the House that we do not use unparliamentary phrases, words or allegations about each

[Mr. Speaker]

other. The whole House knows the reason why the hon. Member for Linlithgow (Mr. Dalyell) was suspended today.

STATUTORY INSTRUMENTS, &c.

Mr. Speaker: With the leave of the House, I propose to put together the 14 motions relating to statutory instruments.

Motion made, and Question put forthwith pursuant to Standing Order No. 101(5) (Standing Committees on Statutory Instruments, &c.).

Value Added Tax

That the Value Added Tax (Special Provisions) (Amendent) Order 1988 (S.I., 1988, No. 1124), dated 28th June 1988, a copy of which was laid before this House on 29th June 1988, be approved.

Urban Development

That the Tyne and Wear Development Corporation (Vesting of Land) (Various Local Authorities) Order 1988, dated 15th June 1988, a copy of which was laid before this House on 22nd June 1988, be approved.

Urban Development

That the Tyne and Wear Corporation (Vesting of Land) (Borough of Sunderland) Order 1988, dated 15th June 1988, a copy of which was laid before this House on 22nd June 1988, be approved.

Urban Development

That the Tyne and Wear Development Corporation (Vesting of Land) (British Shipbuilders and British Steel Corporation) Order 1988, dated 23rd June 1988, a copy of which was laid before this House on 29th June 1988, be approved.

Urban Development

That the Black Country Development Corporation (Vesting of Land) (British Steel Corporation) Order 1988, dated 23rd June 1988, a copy of which was laid before this House on 29th June 1988, be approved.

Urban Development

That the Tyne and Wear Development Corporation (Vesting of Land) (Port of Tyne Authority) Order 1988, dated 30th 1988, a copy of which was laid before this House on 1st July 1988, be approved.

Urban Development

That the Tyne and Wear Development Corporation (Vesting of Land) (British Coal Corporation) Order 1988, dated 28th June 1988, a copy of which was laid before this House on 1st July 1988, be approved.

Urban Development

That the Black Country Development Corporation (Vesting of Land) (Borough of Walsall) Order 1988, dated 27th June 1988, a copy of which was laid before this House on 1st July 1988, be approved.

Urban Development

That the Black Country Development Corporation (Vesting of Land) (Borough of Sandwell) Order 1988, dated 27th June 1988, a copy of which was laid before this House on 1st July 1988, be approved.

Urban Development

That the Black Country Development Corporation (Vesting of Land) (British Railways Board) Order 1988, dated 30th June 1988, a copy of which was laid before this House on 1st July 1988, be approved.

Urban Development

That the Tyne and Wear Development Corporation (Vesting of Land) (Tyne and Wear Passenger Transport Executive) Order 1988, dated 27th June 1988, a copy of which was laid before this House on 1st July 1988, be approved.

Urban Development

That the Black Country Development Corporation (Vesting of Land) (General) Order 1988, dated 27th June 1988, a copy of which was laid before this House on 1st July 1988, be approved.

Urban Development

That the Black Country Development Corporation (Vesting of Land) (Central Electricity Generating Board) Order 1988, dated 1st July 1988, a copy of which was laid before this House on 4th July 1988, be approved.

Urban Development

That the Tyne and Wear Development Corporation (Vesting of Land) (City of Newcastle upon Tyne) Order 1988, dated 15th June 1988, a copy of which was laid before this House on 22nd June 1988, be approved.—*[Mr. Lennox-Boyd.]*

Question agreed to.

COPYRIGHT, DESIGNS AND PATENTS BILL [MONEY] (No. 2)

Queen's Recommendation having been signified—

Resolved,

That, for the purposes of any Act resulting from the Copyright, Designs and Patents Bill [*Lords*], it is expedient to authorise the payment out of money provided by Parliament of any increase attributable to the Act in the sums so payable by government departments in respect of Crown use of patents and designs.—*[Mr. Lennox-Boyd.]*

Orders of the Day

Copyright, Designs and Patents Bill

[Lords]

As amended (in the Standing Committee), considered.

Ordered,

That the Bill be considered in the following order: Clause 205, Clause 27, new Clauses, Clauses 1 to 26, Clauses 28 to 204, Clauses 206 to 294, new Schedules, Schedules.—*[Mr. Butcher.]*

4.22 pm

Mr. Michael Foot (Blaenau Gwent): On a point of order, Mr. Speaker. In connection with the selection of amendments and clauses for debate, can you tell the House whether there has been an alteration to what was put on the board earlier about the clauses to be selected? There is a widespread belief that there should be a fresh debate on the general subject of the rights of journalists and writers. I hope that the new clause put down by my hon. Friends will be selected for debate. If that is the case, I hope that you will tell the House.

Mr. Speaker: I do not know which new clause the right hon. Gentleman is speaking about, but I think I am right in saying that the new clause put down by his hon. Friends has been selected for debate.

Mr. Tony Blair (Sedgefield): Further to that point of order, Mr. Speaker. I am pleased to say that it has been selected for debate and will be debated.

Clause 205

DESIGN RIGHT

Mr. Blair: I beg to move, amendment No. 224, in page 93, leave out lines 12 to 19.

Mr. Speaker: With this it will be convenient to consider the following amendments: No. 274, in page 93, leave out lines 17 to 19.

No. 225, in clause 228, page 101, line 17, leave out 'in the last five years of the design right term'.

No. 226, in page 101, line 19, at end insert—

'(a) In respect of an article which is manufactured as a replacement part.

(b) In any other case in the last five years of the design right term.'.

No. 328, in page 101, line 19, at end insert—

'(1A) Where a design right subsists in:—

(i) features of shape or configuration which enable an article to be connected to, or placed in, around or against, another article so that either article may perform its function.

(ii) features of shape or configuration dependent upon the appearance of that of which the article is intended to form part,

any person is entitled as of right to a licence to do during the design right term any act which would otherwise infringe the design right.'.right.'.

No. 227, in page 101, line 33, at end add—

'(5) In this section an article is manufactured as a replacement part if it is primarily made for use as a replacement for a thing which forms part of, or functions in connection with, another article.'.

Mr. Blair: I think it is fair to say that at times the Bill evoked an interest inside the House that was almost in inverse proportion to the interest outside the House. We have been subjected to the most intense lobbying and hardly a sector of British industry that will be affected by the Bill has not clearly made known its views to us.

The difficult balance that we have to strike in the Bill is between ensuring that industry has a proper incentive to invest and recognising that the consumer must be protected against the lack of competition that will inevitably come from copyright protection. If we protect industry too much the consumer will suffer through the abuse of monopoly, and if we give too little protection to industry it will lose the incentive to invest. Our task is not to choose between the interests of industry and the consumer but adequately to balance those interests. A competitive industry will require a powerful consumer and the wise consumer knows that the value of industry must be built on investment.

The clause that we are debating is perhaps the most contentious for industry in the entire Bill. It is about the new concept introduced by the Government of unregistered design right. Although protection is already given to aesthetic designs, there has been considerable debate about the protection that should be given to functional designs—the designs of everyday articles used in industry and in the home. We agree with the Government that reform is necessary because the law has been left in an entire mess. Functional designs enjoy protection equivalent to artistic works under copyright —life plus 50 years—whereas aesthetic designs enjoy a much shorter period of protection. In addition to that inherently unlikely and wrong position, an important court case in 1986, British Leyland and Armstrong, dealt with the whole question of functional design and car spare parts. In effect, the court said that the law needed to be reformed because it was uncertain.

The important matter to stress when talking about spare parts is that we are not talking merely about spare parts in the car industry. One of the things made clear to us in Committee and in the representations addressed to us is that if the debate proceeds simply on the basis of car spare parts we shall be in grave danger of legislating for the particular and forgetting entirely about the general. To illustrate that point more graphically I shall read from a letter sent to me by the Society of British Aerospace companies. It says:

"Unless modified, the Bill will act as an impediment to the progressive development of UK industry, particularly the aerospace industry, in its need for continued and vigorous innovation to meet world-wide competition on a fair and realistic basis."

The electrical appliance industry is also significantly affected by unregistered design right. In the briefing prepared by the Association of Manufacturers of Domestic Electrical Appliances, the association says:

"Although we believe that many parts of the Bill are an improvement on existing laws, we would take this opportunity to focus attention on one specific area of the Bill which we feel would be particularly detrimental to the interests of our member companies. Our concern relates to the manufacture and provision of spare parts."

Representations have also been addressed to us by the Variety Group which operates in industrial constructions and farm machinery. It makes the same points. A brief was also prepared by, I think, the Design Council. There have been so many briefs on this issue that it is difficult to know exactly where letters or briefings come from. The Design Council says:

[Mr. Blair]

"The zero protection proposed for a great deal of human ingenuity seems at odds with the 25 years protection proposed for the decorative panel"—

Those are designs with aesthetic qualities. The brief says:

"A cuddly toy will get 25 years' protection but a new educational construction kit will be open for all to copy from day one."

Of course the car spare parts industry is important and will be greatly affected. However, it is not the only industry that will be affected. In addition to the problem of deciding how functional designs should be protected in relation to spare parts there is also a problem about the definition of spare parts. That is because the Government have not defined spare parts in the Bill. They have gone for what is now called the "must fit"/"must match" exemption. They are saying that when a part must fit or must match another part it loses its copyright protection. In Committee we saw the anomalies to which that could lead. In a Hoover two end parts must fit and must match the main body of the machine. In the middle there is a joining part that picks up fluff.

Mr. Ted Rowlands (Merthyr Tydfil and Rhymney): That is called the agitator.

Mr. Blair: I thought that that was a political term, but apparently it is used in relation to Hoover spare parts. The Bill has been a continuing education for us all.

The agitator part does not get the benefit of the "must fit"/"must match" exception and is protected. However, the two end bits that join it to the machine fall within the "must fit"/"must match" exception and will not be protected. That is an inherently foolish way in which to leave the law. The solution proposed by the Government, at which I shall shortly look in detail, does not merely arouse the anxiety of many companies across the spectrum of industry. Even the definition of spare parts has been subjected to criticism.

At the beginning of my speech I spoke about a balance and such a balance applies strongly to this part of the Bill. We must pay attention to the need to reward investment while not allowing the abuse of monopoly because of anti-protection practices. Under the Government scheme, functional designs are to be given 10 years' protection. During the last five years of that 10-year term, spare parts manufacturers or copiers can manufacture that functional design under a licence of right from the original manufacturer. That scheme of 10-year protection for unregistered design right with licences of right in the last five years sits alongside the "must fit"/"must match" exception. That means that spare parts that must fit or must match lose protection altogether. The three components of the scheme are the 10-year period, the five years with the licence of right and no protection at all for spare parts that fall within the "must fit"/"must match" exception.

4.30 pm

The difficulty with the Government's proposal is that it does not address the problem of the requirement to balance the need to reward investment and the need to protect the consumer. The Government's scheme decides what spare parts will be given protection simply by reference to an accident of design; if the piece must fit and must match another, it loses protection, irrespective of the investment made and the development costs. If it does not fall foul of the "must fit"/"must match" exception, it attains full unregistered design right protection as any other functional design would, even though few research or development costs may have been involved.

The Government say that they have thought about the proposal carefully. They say that they have been through all the various arguments and reached a considered view. It is worth reminding Ministers, however, that one thing of which the Government cannot be accused in this matter is consistency. They have constantly changed their mind, and I do not entirely criticise them for that because, as I said, it is a difficult issue. None the less, the Government have swerved this way and that throughout a debate that has lasted for a period of years.

When the 1986 White Paper was published, the Government's position was as clear as it could possibly be. In the White Paper the Government clearly said that, having considered all the arguments, they believed that spare parts should be given functional design protection. That was the position that they adopted in 1986, and it was only changed the following year. The Government say that they have considered the matter over a long period, and I accept that, but they have also constantly changed their mind over a long period. At the end of the Committee stage the question arose whether they should not change their mind again and realise the strength of the arguments put to them.

I have described the Government's proposal, and I shall now deal with our alternative proposal. There are two major problems about what the Government have done. First, they have not defined spare parts but have simply introduced the concept of "must fit"/"must match". Any workable scheme to deal with functional design as it relates to spare parts must define spare parts. That is why we have provided a definition of spare parts as replacement parts for another article in amendment No. 227. To take my earlier example of the Hoover machine, the agitator would be included in the definition of spare parts along with the two end parts. That seems sensible, as we should thus avoid the absurd anomaly that one part of what is essentially the same spare part has design right protection and another does not.

I freely confess that the second part of our proposal is a compromise, but it is a compromise that has some merit, and it is certainly superior to the Government's proposal. At the moment, spare parts lose all protection if they fall within the "must fit"/"must match" definition. That is clearly wrong, for all the reasons that I have given. On the other hand, it is correct that we need to guard against the abuse of the monopoly position that copyright protection confers—a monopoly position that has been abused.

We propose, therefore, that spare parts should be given full design right protection, but that they should none the less be able to be copied under licence from the original manufacturer. If the terms of that licence cannot be agreed between the parties, there should be a right of appeal to the Comptroller-General of Patents, who will then decide what the terms of the licence should be.

That would allow copiers to carry on copying original parts, but it would ensure that they could do so only under licence from the original manufacturer. That would mean that the original manufacturer would be able to secure some reward, within the terms of the licence, for his investment—his research and development costs. I accept that that means that copying could continue, but it would

be infinitely preferable for it to continue only under licence, whereas under the Bill as drafted it could continue without any restriction.

When we pressed this point, the Government said that those arrangements would be too complicated and that it would lead to too much bureaucracy if the Comptroller-General of Patents was given the right of appeal on the licences of right. We were told that it would be too problematic to administer. The conclusive answer to that argument is that clause 228 already provides for licences of right during the five years of an unregistered design right term. In other words, there is the ability to copy any functional design, subject to licence, during the last five years of the 10-year term. That is already in the Bill.

The Opposition say that spare parts should also be able to be copied only under licence and that to give adequate protection to the consumer that licence should be available from day one, if terms can be agreed. The copier could then copy but only with the consent of, and on terms agreed with, the manufacturer. If the parties could not agree terms, the matter would go to the Comptroller-General of Patents who would adjudicate upon it. That is precisely what would happen in the last five years of the unregistered design right term in any event. Whereas our proposal does not give complete design right protection, as we suggested in Committee, it is a workable compromise between the interests of consumers and the interests of industry.

Mr. Terry Davis (Birmingham, Hodge Hill): My hon. Friend has clearly made a detailed study of this difficult matter. Specifically on the question of car spare parts and replacement parts, will my hon. Friend make it clear whether the proposal would mean that there would be a licence of right during the first five years as well as during the second five years, or does the proposal replace the existing provisions altogether?

Mr. Blair: Under the Bill as drafted, car spare parts could be manufactured without any hindrance at all. In Committee, it was strongly suggested that spare parts should be given proper design right protection, but the amendment embodying that suggestion was not accepted by the Government. Our compromise proposal would allow copying, but only under licence from the original manufacturer. That would mean that the original manufacturer could secure—in the form of royalties, for example—compensation for his development costs and other investment.

I fully accept that the car industry would like full unregistered design right protection for the entire five-year term, as with other functional designs. However, in view of the Government's opposition to that, we have produced a workable compromise. Whereas under the Bill as drafted copying could go on without any let or hindrance, under our proposal it could happen only under licence from the original manufacturer. That would allow the manufacturer to negotiate the terms on which the copying of spare parts could take place. As I said, that is a much better way of dealing with the matter than the Government's proposal.

The Parliamentary Under-Secretary of State for Industry and Consumer Affairs (Mr. John Butcher): Perhaps I may clarify the position. The hon. Member for Sedgefield (Mr. Blair) said that under the Bill as drafted, copying could go on unhindered. That is not the case. Copying would be unhindered only for those parts of the spare part for which the alternative designer had no choice under the "must match" exception. In the case of a functional part for which an alternative design solution could be found—away from the parts of the part that must fit—there is design freedom. I would not want the hon. Gentleman to have the impression that copying of all kinds of any spare part is unlimited and free. That is not the case.

Mr. Blair: That brings us back to the great bone of contention in Committee, what "must fit"/"must match" encapsulates and what it concerns. The Minister's intervention simply underlines the point. The truth is that industry has been through this Bill carefully and it does not have the faintest idea how it will be applied. Those involved in the car industry fear that their spare parts will be copied without any hindrance or obstacle. They are concerned that that will mean that their research and development costs and the investment that they made to manufacture the original part will be lost because the copier will be able to copy the spare part without difficulty. If we are being told that "must fit"/"must match" does not do that, we are being told something different from what we understood to be the truth in Committee.

The advantage of our scheme is that it would ensure that the manufacturer had a bargaining point not merely in terms of a reward for the investment made, but, as one Conservative member of the committee said, in terms of quality. We are already aware that the quality of some of the spare parts manufactured by copiers is not the same as the originals. That is something that could be taken into account by the parties coming to an agreement or, in default of the agreement, by the comptroller. The Government argue that such a step is too bureaucratic and too complex, but the conclusive rebuttal of that argument is that licences of right will be available in any event for designs in the last five years of their term.

In Committee the Minister advanced two other arguments in defence of the Government proposals. We have done some research on them and found them lacking in substance. The first argument that the Minister advanced was that the spare parts used in the aerospace industry will not get the benefit of unregistered design right, but that, none the less, many of those things could be patented and therefore the patent law could supplement whatever deficiencies may arise regarding unregistered design right. We have studied that argument carefully and the aerospace industry has told us that that is not the case. Concorde, for example, which is a fairly advanced piece of engineering on anyone's terms, only has 12 parts that are patented. The likelihood of being able to resolve the difficulties of unregistered design right through patent law is remote.

The second argument advanced by the Minister with which I must take issue is that we are in step with other countries by not giving protection to functional design spare parts. He quoted West Germany as an example. I have studied the West German system and most of what we describe as functional design spare parts are protected by West German law. That protection is afforded in a slightly different way from our system, but none the less that protection is available.

West Germany has two particular ways in which to protect functional designs. The first is under what the

[Mr. Blair]

Germans entitle a "gebrauchsmuster", which is a utility model term of protection. Italy uses a similar device. As a result, new functional designs that include some type of technical advance are given protection. Under the German design Act new and original designs which are not purely technical are also protected. Therefore its visual appearance has some bearing. That protection is so broad that it encompasses many of the things that would fit within our ordinary unregistered design right spare parts system. Although registered designs in the United Kingdom amount to 6,500 per year, in Germany registered designs run at 65,000 a year—10 times as many. In effect West Germany offers protection in many different circumstances to spare parts.

The Minister will be aware that industry is extremely concerned about the Government proposals. There has been intensive lobbying from practically every part of British industry. Industry has said that many of the spare parts that are currently manufactured as original parts and which have protection will not be protected after the passage of the Bill. Is that correct? I asked the Minister that in Committee and I would like an answer today. Has there been a study of the exact impact of the Bill on British industry? Even allowing for the normal hype generated by lobbyists, they have made a powerful case to us about the effects of the Bill.

4.45 pm

In this Bill I do not believe that we should create some false dichotomy between industry and the consumer and that one must choose either to be pro-industry or pro-consumer. If copyright protection was abolished tomorrow it would inevitably mean that certain items would be copied and the price would come down. That might mean short-term benefits for the consumer, but in the long term there would be no benefits because industry would cease to invest. We must not make a choice between those interests, but strike a balance between them. We believe that we have struck a better balance than the Government and, for that reason, I commend our amendments to the House.

Mr. Richard Page (Hertfordshire, South-West): I should like to discuss amendment No. 274, which is tabled in my name and in the name of my hon. Friend the Member for Thurrock (Mr. Janman). Our amendment removes the "must match" exception in the Bill.

I shall not rerun the complete Committee stage. I accept the Government's argument that the existing position on functional designs needs reassessing and must be brought into better order. The recent case to which the hon. Member for Sedgefield (Mr. Blair) referred shows that the existing system has been allowed to run for too long and that the consumer has suffered.

In Committee it was clear, as the debate went on, that there was gathering disquiet about the Government's proposals. If the amendment that I put down in Committee had been put to a vote I believe that it would have been carried. That would have meant that the "must match"/"must fit" exception would have been removed. In that debate it became clear that industry was just waking up to the effects of those exceptions. More and more industries have been contacting me day by day to outline the effects of the "must match"/"must fit" exceptions on their businesses. As time has gone by and as industry has become more aware, it is clear that the "must match" exception has given most concern.

In Committee we had a marvellous time as many hon. Members produced all sorts of exhibits to illustrate their case. The hon. Member for Merthyr Tydfil and Rhymney (Mr. Rowlands) produced something which I thought at first was vaguely obscene, but which I then discovered was the seal from the front of a Hoover washing machine. One can see how a vital part such as that could be abused by a copyist.

The forms of protection that have been proposed by the Government appear to be out of kilter. It is rather peculiar that a registered design can be given for 25 years for some fairly innocent item—I gave the Committee the example of a belt buckle—but under design right an item is given only five years' complete protection and for the other five years it can be copied under licence. It now appears that design right protection has been removed with the exceptions introduced in the "must fit"/"must match" areas. Surely, as night follows day, it is inevitable that when one talks about "must match" a discussion of car panels will follow. I shall be the first person to talk about car panels, since nobody else has.

The issue that we are discussing is rather confusing. I agree with the hon. Member for Sedgefield, who said that the legislation will cause confusion. It could be a lawyer's paradise. I hope for greater clarification of the borderlines of where the exceptions will apply—and where they will not. The hon. Member for Sedgefield illustrated the point by mentioning Hoover parts, and a legal gentleman could have considerable fun and game in court ascertaining just where the line should be drawn.

Let us return to car panels. I shall not take the House through the process of making a motor car again. I bored the Committee enough with that in June.

Mr. Nicholas Baker (Dorset, North): Hear, hear.

Mr. Page: I thank my hon. Friend for his endorsement of the quality of my speeches in Committee.

A considerable investment is made. The sum of £800 million has been quoted as the price of producing a new body shell that goes on the market. As the Bill stands, that £800 million-worth of body shell can be copied in bits and pieces from day one. It is not fair that a copier can start copying the bits that he wants with no recompense for or acknowledgment of the huge investment put in by the manufacturer.

The Government say that the cry of competition is the reason. Fair enough: let us have competition, but let us make it fair. This is not fair, because a manufacturer makes a huge investment, which is entailed in his obligation to the consumer to make every spare part or panel that goes to make up a car. He cannot make only the parts that he thinks will sell in large numbers and ignore the ones that will be the subject of only limited demand.

What is the copyist's obligation? None. He will cream off the panels that get damaged and for which there is high volume demand—and to blazes with the rest. He will not produce roof panels in competition with the manufacturer or produce bulkheads to ensure that the manufacturer is given appropriate competition. Copyists will put only high-moving parts into their factories. They will assure themselves of volume sales and manufacturers will be left to pick up their obligation to the customers.

The hon. Member for Sedgefield concentrated on the exception of "must fit". I have a growing impression from the companies that have contacted me that they can live with that exception. They do not like it or think it fair but when the crunch comes they think that they can just about accept it. But they cannot accept the "must match" exception and have vigorously campaigned to try to remove it.

It is only right that we should cast an eye over what is happening in the rest of the EEC. In Germany and Italy, design registration protection is given to new and original designs, with an emphasis on aesthetic appearance. The German design law, passed in 1976, means that a typical design would require registration which would confer protection for a limited period. In France, protection is for designs that are industrially produced and of novel appearance, including designs whose shape is dictated by function. The Benelux and Scandinavian countries have a unified industrial law for designs in relation to appearance. Looking across at the EEC and some Scandinavian countries, we can see that the protection is in place there. As has already been said, there seem to be far more registrations there, too.

In the EEC countries there are laws about unfair competition in Germany, France, Italy, Benelux, Denmark and Spain. The protection that those laws provide against unfair competition has supplemented some of the missing intellectual property rights. In the Benelux countries, the law is broad enough to cover a variety of activities which, in the United Kingdom, would have to be dealt with by copyright, if they could be dealt with at all. So an unfair competition approach permits a sensible distinction to be drawn between parts that can be copied, if there is not to be a monopoly, and those which can at least be differentiated.

In the United Kingdom, now that we are a part of a larger economic unit, there is a feeling that some protection is needed for the enormous outlay of time and money involved in developing and testing new products of mass production which fall short of the test of inventiveness that qualifies a product for a patent. The hon. Member for Sedgefield mentioned a number of items that could possibly be patented that went into the construction of Concorde. I urge my hon. Friend to re-examie the provisions of the clause a little more closely. I hope he will find it in his heart to be charitable at this last-ditch stage and withdraw the "must match" exception.

Mr. Rowlands: The value of Report stage of the Bill is that it gives us the opportunity to disgest some of the arguments and issues and to scrutinise what Ministers have said. Sometimes we find they have fobbed us off, or have bent the argument; sometimes they have addressed it and produced cogent cases against our amendments. Some of us have thus scrutinised the Minister's words since Committee stage. Now we have the chance to scrutinise the Minister's case against the pitch and argument of my hon. Friend the Member for Sedgefield (Mr. Blair) and the hon. Member for Hertfordshire, South-West (Mr. Page).

One of the Minister's arguments was that a licence of right from day one would create a horrendous bureaucracy. There is a problem with that: he is not certain which way to argue. In his earlier intervention in the speech of my hon. Friend the Member for Sedgefield, the Minister seemed to imply that many designs would attract that right. At the same time he argues that horrendous bureaucracy would follow if we included a large number of parts in any form of copyright. We need to know exactly how many parts will be excluded from any design right by the "must fit"/"must match" arrangements. If a large number is involved, the Minister's argument that giving design rights and licensing rights from day one would entail bureaucracy might have some validity, but I shall argue that that grossly exaggerates the case.

The Minister must make up his mind: will a large number of "must fit"/"must match" exclusions be free of any form of design right? If so, imposing the licence to right will create bureaucracy, in the Minister's view. On the other hand, the Minister seemed to give the impression earlier that we were exaggerating the number of parts that will not attract design right. He seemed to say that many more parts would attract design right than the industries that have made representations to him or those who have presented this case think.

I shall not trespass on the subject of the important next group of amendments, which are concerned with what is original and what commonplace. That is another fundamental issue in the problem of defining how far design right reaches—or does not reach.

I wish to tackle the Minister's case against what I thought was an extremely important initiative taken by a large part of industry. I am glad that the CBI has endorsed the suggestion that one way forward in the argument over spare or replacement parts would be to grant licences of right from day one. When we discussed this in Committee, the CBI had not yet supported that principle, and we had heard from only some sections of the industrial community. Since then, there has been general acceptance of that generous compromise by those who represent industry. The granting of a licence of right from day one would also enable the designer and manufacturer to specify the quality and safety of copies. I am deeply disappointed that the Minister will not seize on that compromise and carry it forward.

5 pm

The Minister argued that the compromise would create bureaucracy. From talking to firms in my area and others, and from representations that I have received, I know that the greatest administrative burden would be placed on those who grant the licences—the very people who support the amendment. A large part of the administrative burden will fall on those who advocate granting a licence of right from day one. They are willing to carry the burden of the many applications from companies that wish to make the parts that they originally designed.

The Minister has grossly exaggerated the character of the licensing arrangements. Industry already spends a great deal of time licensing and has developed standard documentation and routines for dealing with applications. We should not be bamboozled or cajoled into conceding the Minister's argument that it would cause undue bureaucracy.

The Minister also argued that much bureaucracy will fall on the Comptroller and that, if we waited for five years, we would have some case law to follow. He exaggerates the number of cases that would go to the Comptroller under our arrangement. We should not forget that parts are usually supplied under warranty. They will not need to be copied from day one, but those who want the right to copy them will then be able to apply for a licence. The copyists are not being placed at a great

[Mr. Rowlands]

disadvantage. By the time that the negotiations have taken place and a market in those spare parts has been created —after the warranty has expired—they will have the licences to copy those parts.

In Committee, we pointed out to the Minister that we would have this problem in five years' time. Why will it be less bureaucratic after five years? The Minister said that, by that time, a considerable amount of case history will have been built up and there will be less bureaucracy, but how will case history be built up if there is a five-year delay? We shall have to deal with arguments about case history irrespective of whether licences of right are granted on day one or in the fifth year.

On 14 June, the Minister said:

"But it has been made clear to us that the European Commission would object if we increased the term or reduced or eliminated either of the exceptions."—[*Official Report, Standing Committee E;* 14 June 1988, c. 555.]

Where is the evidence for that? We had many exchanges in Committee about the EC Green Paper on copyright law. Neither the Minister nor members of the Committee had seen it, although it had been seen by those concerned with the home taping levy and had been passed on to the Japanese. I thought that that would contain the evidence for the Minister's statement, but it contains little if any reference to those issues. If the EC objected to our suggestion, there would have been a specific reference to it in the Green Paper. The Minister said that we cannot amend our Bill because the EC would object, but its Green Paper makes no reference to the issue. We should not allow his argument to stand. Even if he produces such evidence, the House has the right—in the absence of EC law—to amend the Bill as we suggest.

The Minister may try to argue about bureaucracy, but the most important thing about the key amendment in this group is that no one suggests that the original manufacturers or designers of parts should have a monopoly right. We are going much further than many others are willing to go. We are destroying the concept of monopoly and would grant people from day one the right to copy parts. That is an important compromise and, given the lack of consensus on the issue, it would be foolish for the Minister to turn his back on our important suggestions.

Sir Hal Miller (Bromsgrove): I am a stranger to the debate so far, not having had the privilege of being a member of the Standing Committee, but I feel that something needs to be said in support of the Government on the issue, with specific reference to car panels. I was not provoked on this subject by my hon. Friend the Member for Hertfordshire, South-West (Mr. Page), but I was reminded of certain facts that need to be drawn to the attention of the House in support of the Government's position.

I had intended to make the burden of my remarks on the series of amendments coupled with new clause 5, which deal with licences. I think that that is where my hon. Friend and I would find common ground, in that there should be a system of licensing that should provide for some reward for the original designer, although we might have some disagreements about how soon that licence should be obtainable and the royalty that should be paid.

My point is about the need to match. With regard to car panels, it is important to bear it in mind that the whole business came into being for two very good reasons. The first was the introduction of the MOT test, which is a measure that I hope we all welcome, but it necessitated the replacement of rust-damaged part panels. Our original equipment manufacturers were not in the habit of supplying part panels and had no wish to do so at that stage. They made a great deal more profit from supplying whole panels. We shall come to the point about the prices at which they supply whole panels, but the original concept was the rust-corroded part panel, which gave rise to the suppliers.

Mr. Page: I agree with my hon. Friend about how this all came about. In the Bill we have the design right protection for five years and more, beyond which the panel makers will be able to produce automatically those types of panels. It is most unusual for a car panel to rust away after the five years. In the second five years, one can have a licence of right. So I agree with my hon. Friend, and look forward to what he says.

Sir Hal Miller: I was coming to a further development, that the products of the independent panel makers were originally part panels, but later whole panels, for crash-damaged cars, for which there was a large demand. The whole panel's price was kept up by the original equipment manufacturers, particularly through their franchise system. Now we are reaching the subject of competition in the retailing of motor vehicles and supply of parts. The figures show that most customers remain with the franchise dealer while their vehicle is under warranty, super-cover and so on, but when that period expires there is a sharp decline in the numbers of those who travel, perhaps some distance, to the franchise dealer, and a great rise in the numbers of those who go round the corner to the man at the local garage, as I have been in the habit of doing, and ask for a repair. Many of us are familiar with the question that is asked: "Is this for insurance or are you standing the rap?" Often that produces a different answer from the customer, as to the type and extent of the repair that he wishes to be undertaken.

What is beyond doubt is the decline in the number of people attending franchise dealers for spare parts after the period of warranty has expired and the tremendous growth that we are now experiencing in alternatives to franchise dealers. I am not supposed to be advertising, but a large number of firms are growing up, which supply various parts. We are seeing that trend partly because of the rigidities, expense and restrictions of the franchise system. That area needs to be further examined.

I am not carrying out a vendetta against our car manufacturers, but when they complain about the independent panel manufacturers, we must say that they themselves have had recourse to those independent manufacturers. For example, if one peels the label of one of our well-known makers from the panel, one finds the independent panel maker's name underneath. That might strike some of us as a curious protection of the rights——

Mr. Tim Janman (Thurrock): In that example, would the original equipment manufacturer have given all the necessary details of the original design to the third-party copier so that he can manufacture the panel to the correct quality and standards?

5.15 pm

Sir Hal Miller: I am happy to respond to that question. I was not trying to lure my hon. Friend onwards, but I have to tell him that the independent company that supplied the panel from Germany is being prosecuted in this country by the same original equipment manufacturer for supplying identical panels in this country, although the manufacturer was buying the panels from the same company in another country. It was a ham-fisted attempt but that is what one is led to when trying to protect the franchise system.

In another case, one of our original manufacturers, whom I shall protect by not naming him, set up his own subsidiary in Taiwan with the express purpose of manufacturing those selfsame panels. So the idea that we are getting the panel hot off the press in this country or in Germany, from one of our original car manufacturers, is far removed from the truth. We should not mislead ourselves into thinking that that is so.

Mr. Matthew Carrington (Fulham): Does my hon. Friend agree that having multiple sources is often a great advantage for the manufacturers of body panels, in case one of the sources of the body panels has a strike, goes out of business, and so on? Frequently one finds that many manufacturers are encouraged to produce components of all sorts for the motor industry, just to ensure that there is continuity of supply.

Sir Hal Miller: I am one of those who constantly pay tribute in the House to the efforts of our major manufacturers to overcome their industrial relations problems. Those considerations are not so relevant now as they were 10 years ago. In the motor industry as a whole, it is commonplace that manufacturers seek single-source suppliers for longer-term deals and put out the design of the part, as long as the specification and quality reach the right standard. That is the trend. What my hon. Friend was talking about may have been true 10 years ago, but it is not so much the case for motor manufacturers now.

We must support the Government on the "must match" exception because the panels have to comply with the original contours of the car if they are to be an effective replacement. One of the reasons given for maintaining the hoped-for monopoly and the franchise deal in respect of the panels is that there is a commitment to keep supplies for earlier models for 10 or 12 years. I wish that that was shown to be true and that the prices, where such panels were eventually discovered in the warehouse, bore some relation to the prices for panels that could be readily obtained from the independent manufacturers. The argument is not quite so much one way as some of my hon. Friends believe.

Mr. Rowlands: I have listened carefully to the hon. Gentleman's case, but not one of his arguments has been deployed against the right to license from day one. He referred to a warranty period, which means that the right to license from day one would enable any copier to get his part into the market place in good time. The hon. Gentleman also referred to the quality of the specification. A right to license from day one could specify that. He also spoke about the relationship between the independents and the main manufacturer. A right to license from day one would take care of that. I remind the hon. Gentleman that the clause does not relate only to the body panels of cars. It deals with washing machines and other complicated machinery.

Sir Hal Miller: I said at the beginning of my speech that I intended to devote most of it to licensing, particularly registered design rights. We shall deal with that question when we consider the amendments grouped with new clause 5. I said that I thought that my hon. Friend the Member for Hertfordshire, South-West and I would reach common ground on that point. However, the Government need some support over the "must match" exception because the argument seems to be all in one direction. There are very good reasons for supporting the Government.

Mr. Terry Davis: My hon. Friend the Member for Merthyr Tydfil and Rhymney (Mr. Rowlands) has just reminded the House that although the clause applies to replacement parts for motor vehicles, it also applies to the aerospace industry and a number of other industries, such as the electrical appliances industry. I accept what my hon. Friend has said, but I shall concentrate my remarks on the effect of this legislation on the car industry. I worked for many years on the marketing and the supply of spare parts for the industry. That was some years ago, but I continue to take an interest in it.

My hon. Friend the Member for Sedgefield (Mr. Blair) said that a balance must be struck in the car industry. I agree with him. He referred to the need for the industry to be neither pro-industry nor pro-consumer. I agree with him about that, too. However, he spoke as though the industry consisted solely of motor manufacturers. It is a much more complex industry than that. It includes the manufacturers of spare parts. They are an extremely important part of the industry. Manufacturers of spare parts include a wide range of businesses, from Lucas and GKN at one end to very small firms, sometimes described as back-street firms, producing items such as body panel parts, at the other.

We must also consider the dealers. There is a divergence of interest between the franchised dealer—franchised by the motor manufacturers—who receives a percentage of the price of a spare part and the unfranchised garage that does a large part of the servicing of motor vehicles. The latter is an extremely important part of the motor industry, consisting mainly of very small firms—of people starting up on their own.

Similarly, the importers of vehicles have not been mentioned in this debate, but they must also be taken into account. If the Bill protects vehicle importers, we shall bar our own industry from supplying spare parts. French, German, Japanese and Italian cars account for a considerable number of the cars that are sold in this country. I should be loth to do anything that cut our spare parts manufacturers out of that very profitable business.

Furthermore, the interests of consumers are not always identical. The original buyer of a motor car will have a different interest in spare parts from that of the person who buys a second-hand motor car. The second-hand car owner will have the greatest interest in the price of spare parts. He will require more of them, particularly the more expensive spare parts that the original owner of the car will not have to buy, unless there is an accident.

Mr. Janman: The hon. Gentleman compares the interests of a person buying a new car with those of a

[Mr. Janman]

person buying an older car. Does he accept that as a car gets older it is inevitable that the number of parts that make up the total market place for that model will reduce and become more and more slow moving? If we allowed the "must match" exception to remain, the copiers would not be interested in the slow-moving parts. Only the manufacturer of the original equipment would be interested, and the price of the slow moving parts that go into older vehicles would increase.

Mr. Davis: No, it is not like that at all. There is a business cycle for spare parts. To begin with, it is very slow moving. Then it builds up to a peak. That is when a motor vehicle is several years old. Depending on how long that model is kept in production and the number of vehicles sold, there is a rise to a peak in sales of spare parts. Then it tails off. It is not the case that the older the vehicle and the older the parts, the more slow-moving they will be. One could be selling more parts for older vehicles. I am referring to parts that wear out. There is a different pattern for parts that are replaced because of crash damage. I shall not bore the House by describing the various life cycles and business cycles of spare parts, but the hon. Gentleman has over-simplified the case.

The owners of second-hand cars have a different interest in spare parts from those of fleet buyers or the owners of new cars. They will buy different sorts of parts. The person who buys a second-hand car will have to buy more expensive replacement parts, particularly body panel parts and engine parts. However, there is some community of interest between the motor manufacturer and the small manufacturer of body panel parts. When a car goes out of production, a motor manufacturer may run out of spare parts because it was impossible to envisage how many buyers of a spare part there would be when production ended.

The motor manufacturer will want to obtain small runs of pressed parts from the so-called back-street manufacturers. If they did not exist, the motor manufacturers would be in great difficulties. Motor manufacturers rely on spare parts manufacturers in places like Coventry, particularly to provide spare parts for the kind of cars that are bought by enthusiasts and that people drive not for years but for decades. It is very difficult to obtain such body parts unless it is possible to arrange for a small run of pressed parts every few months or, more likely, every few years.

It follows that there is not a complete divergence of interest between the various sections of the motor industry, even when we speak about motor manufacturers and body panel manufacturers.

My hon. Friend the Member for Sedgefield referred to the need to reward the investment by motor manufacturers.

Mr. Rowlands: My hon. Friend referred to the life cycle of parts. Will not the design right also have been worked out for spare parts? Would not licences for spare parts exist for up to five years? During that life cycle, copying would certainly be allowed. Has not my hon. Friend argued against the amendment?

Mr. Davis: My hon. Friend is absolutely right. I am simply explaining that it is a more complicated industry than has been suggested. I shall turn to my hon. Friend's point in a moment.

It is necessary to reward the motor manufacturer: but how is he to get his reward? It has been suggested in this debate that the motor manufacturer will be rewarded for his investment by selling spare parts. To do that, he will ask a lower price for the vehicle when it is sold and then ask a higher price for replacement parts. It is rather similar to a razor blade manufacturer who is prepared to give away razors, provided that he is allowed to sell the blades that fit the razor. But the interests of consumers vary. If we are not careful, we shall penalise consumers who buy second-hand cars. Generally speaking, they are in the lower income groups.

To turn directly to the point made by my hon. Friend the Member for Merthy Tydfil and Rhymney, it is not a question of body parts only. One of the largest segments of the spare parts business is exhaust systems. They do not last five years on a new car. The owners of cars often have to replace the exhaust system before the cars are five years old, so the replacement of exhaust systems becomes important within five years. Therefore, within that five-year period, some of those reasonably expensive parts and systems will be sold.

It has been suggested that there should be a right to a licence from day one. That is a constructive suggestion. The difficulty is how much the licence will cost—that is, how much the motor manufacturer will charge the spare parts manufacturer for a licence from day one. That is where the conflict will occur. Of course, it will be in the interest of the motor manufacturer to extract the highest possible price for a licence from the replacement parts manufacturer. I am concerned as to how that will be sorted out.

5.30 pm

My hon. Friend the Member for Sedgefield suggested that there should be an appeal to some registrar. I understand that. But we are talking about many parts. It is not a case of a licence to make a single part. A very large number of parts will be involved, presumably with a different licence fee for each part.

I am not surprised that at least some motor manufacturers agree with the idea of a right to licence from day one, provided that they can set the price of the licence. That is a key point. While they are negotiating, does the spare part manufacturer have the right to make the body panel or other part? That is an extremely important issue which my hon. Friend did not mention.

My hon. Friend the Member for Merthyr Tydfil and Rhymney raised the very important questions of safety and quality. There are other ways of ensuring the safety of spare parts, and it is wrong to try to do it through this Bill, which does not deal with safety. There are laws on product liability and regulations on British standards. It is quite right that we control the safety of spare parts. As for quality, again it may be against the interests of the consumer for motor manufacturers to impose a quality standard upon the manufacturers of spare parts. Some famous names entered the replacement parts business making parts of a lower standard and quality than the original equipment provided by the motor manufacturers, but of a quality and standard acceptable to the consumer.

A classic name is the pioneer of exhaust systems known as Quinton Hazell, who founded his business on that principle. The consumers did not want the equivalent of gold-plated exhaust systems; they wanted serviceable exhaust systems, and he built a whole business on that concept by setting a standard of quality acceptable to the consumer, but of a lower standard than the original equipment from the manufacturers. That is part of the right of the consumer to choose. If a consumer pays a far lower price, he will not expect a standard of quality which he would receive from the original equipment manufacturer at a higher price.

Mr. Page: Although an exhaust pipe is obviously not a safety part of a motor car, some manufacturers would be extremely concerned about the quality of any product made under licence, particularly a body panel, for example, that had taken part in crash tests to conform to the various regulations, and would not wish a cheapjack copier to make it out of much thinner material that would not deform in the same way, and give controlled deceleration and therefore, if it were fitted, would put the occupants of the car through the windscreen.

Mr. Davis: The hon. Gentleman and I have no difference in our concern about road safety. We differ as to how those standards, which are important for road safety, should be imposed and monitored. I suggest that there are other ways to control the safety and quality of products. There are other laws which do that—not by giving the motor manufacturer a monopoly over the supply of replacement parts. That is the difference between us, although we have the same objectives.

I am not surprised that the motor manufacturers do not like the "must fit"/"must match" concept. I am not surprised that the CBI does not like it because the CBI tends to reflect the views of the motor manufacturers, and I am not convinced that the CBI reflects the view of those who make the replacement parts. Certainly it would be to the disadvantage of those manufacturers, which are small firms, and if we are not very careful about the way in which we engage in this legislation, it may lead to higher prices to the consumers. The motor manufacturers are, by any definition, big business. Some of the manufacturers and suppliers of replacement parts are small firms, and their consumers tend to be people in the lower income groups.

I have reservations about some of the views expressed by my hon. Friends, and I shall listen carefully to the Minister's reply.

Mr. Janman: It is worth looking back at the Standing Committee, and worth remembering that when we had a long and intensive debate on the "must match" exception clause, every Conservative Member who spoke on the clause either counselled the Minister to proceed with at least caution, or expressed total opposition to it.

Although I do not wish to repeat all that I said on Second Reading or in Standing Committee, I wish once again to make some comments against the "must match" exception and with that in mind I wish to speak in support of amendment No. 274, tabled by my hon. Friend the Member for Hertfordshire, South-West (Mr. Page) and me. It is also worth noting that when we debated the clause in Standing Committee, I hope that I am right in saying that we did not go to a vote because the Opposition had been left in a state of limbo as industry, through various different bodies—the CBI being the most notable—had not really got its act together in presenting a coherent alternative strategy to the one which the Government were proposing at the time.

My hon. Friend the Member for Hertfordshire, South-West said earlier that if there had been a vote in Committee on the "must match" exception clause, knowing how some Conservative Members would have voted or abstained in that Division, that clause would have been taken out of the Bill in Committee. I can verify that.

Today, we are discussing how to improve the market place for the consumer. My hon. Friend the Minister will acknowledge that I am a strong supporter of increasing choice for the consumer and freeing up and deregulating markets and liberalising them so that the consumer has more choice. On the other hand, we wish to maintain fair competition and an adequate reward for the considerable investment in design and innovation by original equipment manufacturers.

I agree with the hon. Member for Sedgefield (Mr. Blair) that this is not a case for deciding whether one is pro-consumer or pro-industry. I do not believe that the "must match" exception clause is pro-consumer, although I agree with earlier comments that the exception will hit a large number of manufacturers across the face of British industry and in many different industrial sectors—white goods, electronics, the motor industry and others. Because of my experience of working in the motor industry, I wish to focus my comments on how it will not help the consumer in that spare parts sector because the consumer does not have an interface with the people who are supplying the body panel. The middle man has that interface.

My hon. Friend the Member for Bromsgrove (Sir H. Miller) was quite right when he said that if one goes to a back-street garage or a franchised dealer, one does not normally go there for a body panel. One goes there to have one's car serviced or, if body panels are involved, one is more likely to be going there to have a car repaired. One goes there to buy a repair service, not one particular body panel. Therefore, the consumer has no direct connection with the decisions as to which body panel and which supplier is used, whether it is a Taiwanese import, an import from the original equipment manufacturer or a body panel made in this country by the original equipment manufacturer. The consumer does not have the chance to exercise choice and value judgment as to the difference in quality, albeit accepting that a bottom-line safety net of quality and safety exists.

The consumer is not in a position to make that choice because he does not come into contact with the supplier. The person carrying out the repair will decide whether he puts on a copied body panel or one from the original equipment manufacturer. He will decide what price is passed on to the consumer. If there is some fiddling going on—as there often is in this area—the consumer will be none the wiser as to what type of body panel is being fitted and whether the price paid correlates with that asked by the original supplier of the body panel.

My hon. Friend the Member for Bromsgrove pointed out that in about 80 per cent. of cases, the consumer is not paying for the work done. Therefore, the consumer's interest in the intricacies of where the repairer is obtaining supplies is somewhat diminished. It would be different if the consumer was paying for it with readies from his own pocket. Whether it is a company car or a car owned by the consumer himself, in 80 per cent. of cases the repair is paid

[Mr. Janman]

for by the insurance company. It is fair to say that insurance company inspectors do not take much notice of whether the panel being fitted to the car says "Made in Dagenham" or whether it is made in Milan or wherever.

Mr. Page: From my experience, when the inspector comes to estimate a job, he does not see any panels, because at that stage they would not have been ordered.

Mr. Janman: I am grateful to my hon. Friend for pointing that out. It is a useful clarification of my point.

To some extent I bow to the superior knowledge of the hon. Member for Birmingham, Hodge Hill (Mr. Davis), given his experience in this sector of the motor industry. However, surely he would accept that the total amount of business available to spare part manufacturers, whether it be the original equipment manufacturer or a copier, for gearboxes, front wing body panels or whatever for a 10-year-old mark I or mark II Escort is different from the business available for a one, two or three-year-old Sierra. He will acknowledge that the number of parts being sold for two or three-year-old Sierras is far greater than for 10-year-old Escorts. Therefore, the market for body panels for two or three-year-old Sierras is far more lucrative than that for 10-year-old Escorts.

The copiers do not have to invest in copying the panels, because they do not have the original specification. They simply set up shop cheaply many thousands of miles away and copy the fast-moving panels. Therefore, understandably they are able to vastly undercut the original equipment manufacturer. The original equipment manufacturer will be left to supply the slower-moving parts and its margins will be squeezed because of the inevitable reduction in market share of fast-moving parts. Therefore, they will put up their margins on slow-moving parts. People on lower incomes who generally own older cars will have to pay the price if the "must match" exception clause remains in the Bill.

I understand that the United Kingdom consumer organisations have expressed support for this liberalising measure. However, it is interesting that the BEUC, the European consumer body, understands what the ramifications will be for the overall standard of quality and safety and realises that the "must match" exception clause will lead to a diminution of quality. Therefore, it is not surprising that the BEUC did not intervene in the Veng *v.* Ford body panel case, brought by the European Commission. It takes the view that it will be against consumer interests for the Government to press ahead with the principle of the "must match" exception clause.

We have to decide whether there are benefits to the consumer; I do not believe that there will be. We also have to decide whether there will be benefits to the nation as a whole; again, I do not believe that there will be. The legislation would put us out of step with design right protection for spare parts manufacturers in virtually every major European Community nation. The loss of revenue and the reduction of jobs in, for example, Ford, British Leyland and Vauxhall will not be balanced by any increase in opportunity for the small number of British-based copiers.

Also, there will be no opportunities for new British-based copiers to spring up because they will not have European markets available to them in the same way as foreign copiers do, because of the difference in law in terms of the strength of protection given to spare parts manufacturers in this country and the rest of Europe. Therefore, the jobs lost in the original equipment manufacturing sector of the industry will not be compensated for by any gains in the spare parts sector.

5.45 pm

The answer to the problem is not to move ahead with the "must match" exception clause but to give the right of compulsory licensing if there is proven monopoly abuse. I do not think that there is monopoly abuse at present. Because the original equipment manufacturer has to invest in the original technology and design of all parts, his costs for producing a particular body panel are much greater than those of a copier in Taiwan who has not had to invest in the early stages. It is worth noting that, in 1986, Ford's return on investment in body panels was only 3·6 per cent. That is hardly ripping off the consumer. Given an environment of fair competition and the costs that large manufacturers face when they first design a car, we do not want consumers to be ripped off. We should force manufacturers who are abusing their position to give licences to other people to compete.

Unless circumstances of monopoly abuse prevail, the "must match" exception clause is not to the benefit of the consumer in the motor industry. It will have a detrimental effect on our manufacturing base in the motor industry and in the other industries affected. Therefore, I repeat the request by my hon. Friend the Member for Hertfordshire, South-West and ask my hon. Friend the Minister, at this late stage, to think again on this misguided course.

Mr. Butcher: I thank hon. Members for continuing what has become a firm tradition of the Bill, which is to focus entirely on the merits of the argument. Yet again we have seen a diversity of opinion on both sides of the House. Without immediately displaying which side of the argument I wish to favour, all I will say is that my hon. Friend the Member for Bromsgrove (Sir H. Miller) and the hon. Member for Birmingham, Hodge Hill (Mr. Davis) did not grace our Committee. However, they have a reputation in the House as Members who are assiduous in the representation of all sectors of the motor industry and the interests of midlands manufacturing generally. There was much in what they said, and in the past I have found it to be compelling. I hope that the hon. Member for Hodge Hill will not be embarrassed, given the traditions of debates on this subject, if I say that his was a fine speech. There were many fine speeches in Committee and I hope that there will be many more on Report.

The advantages of the Report stage and remaining stages are many. The hon. Member for Merthyr Tydfil and Rhymney (Mr. Rowlands) reminded us that we have a chance to look at the recorded comments and to re-analyse and retune our own arguments. It is also an opportunity to continue the discussions on several items within the Bill that remain controversial. It was during that period that hon. Members have spoken to several people outside who consider that vital interests are at stake. They have done so at all times with a sense of perspective and fair play.

I hope that Opposition Members who have keyed some of their arguments against the position of the CBI as reported and of the British aerospace companies will not mind if I point out that I do not believe that the amendments have the unanimous support of the CBI. A

couple of weeks ago, I received a letter from the chairman of the CBI working group, which had been looking into design rights. He considered that he had to write to let me know that he could not support the CBI's views on the matter. The chairman's view was:

"The Government had got its design proposals just about right."

We have received further letters from other industrial sources who are also of the view that, at present, the design right proposals offer the right balance between the needs of designers and competitors. We had further discussions with the CBI.

British aerospace companies are concerned because some matters of interpretation and principle are at issue. One of the outcomes of my discussion with them is that they better understood some of the terminology that we were using, but, perhaps most important of all, I was able to point out that the term of protection will not begin until articles made to a design are actually manufactured and are made available for sale or hire. I recently met representatives of the Society of British Aerospace Companies. They seemed to be content, particularly with the formulation of that part of the Bill. They suggested that the trigger for the term of protection might be the granting of an airworthiness certificate—that aircraft must be granted a certificate of airworthiness before they can be sold. So, usually, the 10-year term will begin only after such a certificate is granted.

I agree with the hon. Member for Hodge Hill and my hon. Friend the Member for Bromsgrove. We discussed the interests of the motor industry in a variety of ways, but, on most occasions, it was said that, for every job in vehicle assembly plants, there are three or four jobs outside for those who supply components and parts to vehicle assemblers. We must bear in mind the interests of that part of the industry if the preoccupation of Opposition Members—I am sure that it is the case with Conservative Members—is with jobs, competitiveness and opportunities for such companies.

Opposition Members have told us many times that we should be concerned about the ratio of imports into the United Kingdom. It is a matter of some sadness to those hon. Members who have loyalties to the midlands in particular to note the fall in the share of the British car market that is occupied by domestic manufacturers. It has happened. No doubt, on another day, we shall debate why it happened, but if 50 per cent.-plus of the car park, which is the term that manufacturers use, now rattling around this country is of foreign manufacture, should we not give an opportunity to British components and panel suppliers —those in the "must match" exception—to compete to supply Renaults, Volkswagens, Datsuns, and "fow-vays"? All such people could be legitimate targets for companies that hitherto have not found a friendly environment in which to ply their art, certainly in regard to industrial copyright.

The hon. Member for Hodge Hill asked several questions. He asked whether it is true that industry will lose protection for spare parts when the Bill becomes law. The answer is that, in most cases, spare parts will gain the protection that they now lack. He referred to the judgment in the BL *v.* Armstrong case. Therefore, he should know that their Lordships held that copyright does not protect spare parts. However, design right will protect spare parts, subject to the "must fit"/"must match" exceptions. In summary, the protection of spare parts will, in general, be increased rather than decreased by the Bill. The amendments bring us to those main features—"must fit"/"must match".

I shall refer to the amendments tabled by my hon. Friend the Member for Bromsgrove in a few moments, but first I shall summarise my understanding of the main thrust of the amendment moved by the hon. Member for Sedgefield (Mr. Blair) to make sure that we are all on the same wavelength. The hon. Member wants to delete the "must fit"/"must match" exceptions and, instead, provide that licences of right will apply to all spare parts from day one. He believes that that will allow competition in what would otherwise be captive after-markets, while giving original designers more of a say in what goes on.

The hon. Member for Merthyr Tydfil and Rhymney has a slightly different solution. He wants to subject "must fit"/"must match" features to licences of right, again from day one. In some ways, the proposals are perfectly respectable—I can say that in respect of what is essentially a non-political Bill—but they suffer from one fundamental and, I am bound to say, fatal flaw. They would both mean that, every time someone wanted to compete by making an article that had to be fitted or matched to another article, he would need a licence.

I appreciate that licences would enable the rights owner to exercise some control over what a competitor produces —for example, in respect of matters such as safety and quality. But any intellectual property right comes to an end at some point. In the case of design right, it is after 10 years in the market. All the factors such as safety that are of concern to the hon. Gentleman, are just as important after the intellectual property right has run out. At that point, the intellectual property law is of no help. That is why we have left a whole raft of separate, free-standing legislation and regulations on safety, and that is how it should be. In my view, the existing provisions on safety provide all that is necessary, and additional licensing provisions in design right are not necessary.

That is particularly so because the licensing arrangements that have been proposed would have a number of highly undesirable consequences. First, the need for a licence would arise not only when a competitor wanted a copy the whole of an article in its entirety, but when a competitor wanted to use his own design and his own technology.

We must bear it in mind that hon. Members have tried to champion the cause of the creative designer. In such circumstances, he would still need to copy the connecting features to make his product fit. The need either to seek a licence or to negotiate the terms and conditions of a licence of right could, at best, act only as a disincentive to design innovation. With the hon. Gentleman's amendments, if the article is not a replacement part, the design right owner could refuse a licence in the first five years. That would result in a monopoly that would shut everyone else out, and that would be the ultimate disincentive.

Mr. Blair: If the "must fit"/"must match" exceptions do not apply, whoever wants to manufacture or copy a certain design must apply for the permission of the original designer in any event.

Mr. Butcher: At this stage of a Bill's consideration, amendments are tabled as alternatives in a last try to come to a consolidated and considered view. The effect of the hon. Gentleman's amendment is as I have described it. He

[Mr. Butcher]

tests me on the practicalities of my own position. I am bound to say that there is a surety to give suppliers of component parts a clear idea of what is required of them. In general, it is in common with median protection in other parts of western Europe. In taking this route, we have listened carefully to those who argued, as the hon. Gentleman has just argued, that we should seek a much better period of protection for original designers or we should erode it almost in its entirety. The hon. Gentleman's amendments seem to face in both directions. That is not a criticism of Opposition Members. They have had to wrestle with the same dilemma. To return to the comment of the ex-chairman of the CBI committee, I believe that we have the balance about right.

6 pm

I should do the hon. Member for Sedgefield the service of replying to the other implications of his amendments. The second, related problem is that they would involve a great deal of unnecessary red tape, although I do not intend to labour that point. The hon. Member for Merthyr Tydfil and Rhymney teased me about this in Committee and has done so again today. Nevertheless, it is true that, whenever a competitor wished to produce something that fitted or matched something else, a licence would be required. In some circumstances he would be entitled to a licence of right, but he would still have to negotiate the terms and conditions.

We are working—I hope—to create a larger, more open, more competitive market. The thought of industry having to negotiate licences on every occasion as a precondition of competition does not merely irritate me or lead me to question the bureaucracy involved—it makes my blood run cold. It is simply not true that there are large areas of industry in which there will be no argument about licences. I have been involved with design protection for some years and one thing is crystal clear—there is controversy and argument wherever one looks.

Under the Bill as drafted, the licence of right provisions will come into play only when a competitor wishes to copy an entire article or that part of an article for which there is design freedom and for which an alternative design is possible. They will not apply whenever somebody wishes to compete, as would be the case under the proposals of the hon. Member for Sedgefield. The difference in the number of times that licences would be needed under the two sets of proposals would be many orders of magnitude. To me, that difficulty is of itself fatal to both the hon. Gentleman's proposals.

There are other detailed but no less important problems with the hon. Gentleman's amendments. For example, when is a replacement part not a replacement part? The hon. Gentleman made a valiant stab at a definition, but it is important to bear in mind that that question will have to be answered as each article is made. A single article cannot be "primarily made" as a replacement part. Amendment No. 227 states:

"an article is manufactured as a replacement part if it is primarily made for use as a replacement".

But it either is or is not made as a replacement part. I shall not go into that at length; I am sure that the hon. Member for Sedgefield does not wish me to reinterpret his amendment for him at this stage.

My hon. Friend the Member for Bromsgrove again spoke eloquently in defence of the "must match" condition that he seeks for the original manufacturer. Reference has been made to the possibility of the consumer being duped —for instance, a supplier taking a margin on what may be sold as an accredited spare panel from the original manufacturer. As the hon. Member for Hodge Hill reminded us, that is perhaps more within the remit of other legislation. Misleading the consumer can be dealt with in that way.

With regard to safety, there are the general safety requirement and the British standards. I accept those arguments, and the insurance industry is highly interested in them, although there are times when it finds replacement parts fitted by non-original manufacturers perfectly acceptable for insurance purposes. I am familiar with the example given by the hon. Member for Hodge Hill—that of Quinton Hazell and his exhaust pipes. We discussed exhaust pipes at great length in Committee and at the current rate of progress we shall probably still be discussing them at 4 am tomorrow. Many companies begin their lives offering the customer cheaper alternatives and then move up market to become considerable and respected members of the industrial community.

I have tried not to recast the arguments used in Committee in exactly the same way or on the same basis. The Opposition will, however, expect a reply from me on two important questions, and this is the last opportunity for me to give the information that they have demanded.

I was asked what evidence we had that the European Commission would object to our increasing the term of design protection or removing the exceptions. I accept that there is no published evidence in recent Commission documents or elsewhere, but we discussed the matter with the Commission in the run-up to the Bill. The Commission had already objected to the excessive protection for functional designs given by United Kingdom copyright and was equally concerned that any new design law should not move out of line with protection elsewhere in the Community.

The Commission was satisfied with our proposals on this basis but made it clear that additional protection might well lead to a formal complaint under the European Community treaty. That does not amount to being dictated to by the European Commission, because 10 years' protection, with appropriate exceptions and licensing arrangements, represents what we regarded as necessary in any event. It shows, however, that there is no truth in the allegation that we are giving less protection than the rest of the Community.

Several references were made to design protection in Germany and the basic facts were largely correct. There is protection for basic designs under a utility model or petty patent system. There are also large numbers of design registrations; the Opposition were absolutely right about that. The essential point, however, is that neither of those forms of protection is equivalent to the design right protection provided by the Bill. Petty patents are granted only for inventive designs and registrations are possible only where the appearance of the design matters. A large number of designs, especially for spare parts, do not fall into either category, but they would be protected in the United Kingdom when the Bill becomes law although they are not protected in Germany.

I hope that I have met the points raised by my hon. Friend the Member for Bromsgrove and by the Opposition

and that hon. Members will not seek to divide the House on an amendment which is not just illogical but impracticable.

Mr. Blair: I entirely accept that these are difficult matters of judgment and I welcome the contributions of the hon. Member for Bromsgrove (Sir H. Miller) and my hon. Friend the Member for Birmingham, Hodge Hill (Mr. Davis). I repeat, however, that the problem must not be seen merely as one concerning car spare parts. There is a great deal more to "must fit"/"must match" and design right than that. The Opposition have been accused of seeking a monopoly for the original manufacturer, but the basis of our proposal is that no such monopoly would exist. Rather, there would be a licence of right from the first day. That seems to take care of many of the objections, apart from the Minister's last point. The amendment would not affect the vast majority of original manufacturers or, indeed, of component manufacturers, so the car industry could operate very much as before, but under licence of right.

The Minister found great difficulty in defining a replacement part, but that is as nothing compared with the difficulties of "must fit"/"must match", which give rise to enormous problems as to how much of a replacement part would have protection and the absurdity of some parts of the part having protection while others did not. If that exception is not applied, there is total protection over the entire period of the design right term. The Minister accused the Opposition of facing both ways on this. In fact, we are merely seeking a compromise between the interests of industry in rewarding its investment and the interests of the consumer.

It is important to attain that compromise if we can. The only argument that has been advanced against it is that it would be too bureaucratic. I cannot believe that that is right. Licences of right and the concept of licensing apply throughout industry. Licences of right for the last five years of a design right are written into the Bill. Any function or design has a licence of right in its last five years, so provision is already made for licences of right in the Bill.

I cannot believe that sensible people could not come to agreement in the vast majority of cases. Where they cannot, a body of case law will grow up from appeals, and the position will become clearer. We cannot allow manufacturing industry and its forward pattern of investment to be distorted, because a view is taken based simply on the problems of the motor industry.

Our amendment is the best way forward as it provides for a workable compromise. We believe that it has the support of those in industry, who should know best how to look after their own affairs, and that the concept of licences of right for spare parts will protect the consumer.

Nothing that the Minister has said convinces us that those arguments are wrong, so I ask my hon. Friends to support the amendment in the Lobby

Question put, That the amendment be made:—

The House divided: Ayes 132, Noes 257.

Tellers for the Noes:
Mr. Alan Howarth
Mr. David Lightbown.

Amendment accordingly negatived.

Mr. Rowlands: I beg to move amendment No. 322, in page 93, line 22, at end insert—

'in determining whether a design is commonplace those features which are not visible to the naked eye shall be taken into account'.

Madam Deputy Speaker (Miss Betty Boothroyd): With this it will be convenient to take amendment No. 323 in, page 93, line 22, at end insert—

'(4A) A design is not commonplace for the purposes of this part if the creation of the design required a substantial input on the part of the designer of that design in terms of time and cost.'.

Mr. Rowlands: I remind the House that clause 205(4) says:

"A design is not 'original' for the purposes of this Part if it is commonplace in the design field in question at the time of its creation."

Hon. Members who served on the Committee will know that we had considerable discussion, not about the semantics, but about the real meaning of the words "original" and "commonplace". I remind the Minister that, on 14 June, he said:

"I am not able to accept the hon. Gentleman's amendment. I do not think that it was designed to be accepted, but we wish to achieve its objective. If 'commonplace' will not suffice, we shall try to find another solution."

A little later he said:

"I am not wedded to the word 'commonplace'. Amendment No. 407, tabled by the hon. Member for Merthyr Tydfil and Rhymney, is a good attempt to refine the expression."

Therefore, he offered me some hope that he would study those words and their definitions.

The Minister further said:

"The meaning of 'commonplace' is a matter of ordinary English."

I believe it is, but it is not an easily definable term when relating to design matters. The Minister continued:

"Whether a design is commonplace will be determined on the facts of the case. If we can find a better way of handling the matter, we shall do so."—[*Official Report, Standing Committee E*, 14 June 1988, c. 575-766.]

We considered several illustrations in Committee, one of which was the armature which I am holding. It is for a Hoover washing machine. We asked whether it would be a commonplace part or whether it would attract a design right. For example, we asked whether the design of this door seal of a Hoover washing machine, which I am holding, is commonplace or whether it attracts originality and, therefore, a design right. Those are reasonable illustrations of the difficulty of matching practicality to legislation. The Minister assured us that he was not wedded to those words and therefore he felt that was a case for looking for another solution. That is what I am now trying to do.

I am rather disappointed about the events that have fallen between Committee and Report stage. The Minister and his Department—I am sorry to make this criticism—but especially his Department, seem to have taken a completely passive, if not negative, view of the efforts made by others to define or redefine the words "original" and "commonplace". The Department just stood back and said, "If you lot can come up with any ideas to redefine the words, we will look at them." It has made little or no effort to join in a partnership of consideration to redefine the terms in subsection (4) and to decide whether the design of the Hoover armature or of the door seal would be a commonplace or an original design.

Various industries and companies went to the Department and put up one or two suggestions which the Department, understandably, took apart. I have not, therefore, tabled amendments such as were discussed in Committee, but instead I have introduced two new ideas. Actually, they are not new and I shall describe their parentage.

Before doing so, I remind the House that this is not just a matter of semantics and fiddling around with words—it is an important and serious issue. There is a fundamental difference of interpretation of the Bill as it stands as to what will attract design right and what will not. The Minister believes that many more parts in industry will attract design right and will be considered original, as opposed to commonplace, than at present, especially in a company such as the one I am privileged to represent in Merthyr Tydfil—Hoover. It believes, however, that parts of its washing machines would be deemed in law to be commonplace, but the Minister and his officials may believe them to be original. It is not just a matter of semantics—it is one of considerable concern as there are differences of interpretation.

Having reminded the House of the two illustrations that I gave in Committee, I turn now to my two amendments, which seek to redefine first the word "commonplace" and secondly the word "original". Amendment 322 suggests that

"in determining whether a design is comonplace those features which are not visible to the naked eye shall be taken into account".

6.30 pm

Where did I get those words? They did not come from any outside lobby. They were not from industry or from an axe-grinding group. I took them almost word for word from the Department's own notes on the clause, especially those to the subsection. The valuable notes that were given to hon. Members serving on the Committee should be made available to any hon. Member. I draw attention to paragraph 3, which helped us to amplify and explain subsection (4) and the word "commonplace", and which stated:

"It is important to note that there is no requirement that the design be aesthetically pleasing for design right to subsist. Nor is there any requirement for the design to be visible to the naked eye. Thus, for example, a design of the aesthetic appearance of a table lamp, the functional form of the external and internal parts of a pump and the functional internal layout of an integrated circuit microchip could all give rise to design right."

That is why I am travelling with the hope that the Minister will accept my amendment. The words

"not visible to the naked eye"

are taken from the Minister's Department's interpretation of the subsection, so they have impeccable parentage. If the Department regards something that one cannot see as being relevant in design terms, it is worth stating that in the clause.

Mr. Dafydd Wigley (Caernarfon): As the hon. Gentleman knows, I have an interest in Hoover as I am a previous employee. Following our debate on this point in Committee, the British Automotive Parts Promotion Council has raised with me the point that stopping water coming out and dampening down harmonic vibrations would be a technical argument, as opposed to one relating to the shape of the configuration, and that as such it would not be a criterion for design right protection. How does the hon. Gentleman respond to that? I believe that we are both trying to go in the same direction.

Mr. Rowlands: The hon. Gentleman is absolutely right. If he recalls, the issue of the design of the Hoover door seal for a washing machine arose on the basis of the amendment that I was moving, which would state that technical factors would be taken into account in determining whether a part or the design of a part attracted design right. We used the door seal to illustrate that point. The very design of that part had an important effect on the whole performance of the machine. The Minister commented that he was not against the objective of my amendment when we discussed it in Committee.

Amendment No. 322 about

"not visible to the naked eye"

is a way of recognising that the technical features are factors which could attract design right. Therefore, although to some extent I am going back to earlier arguments, on this occasion I am resting my case on the Department's own words. In paragraph 3 on the note of the clause, the Department made the clear point that the functional character of the design and not just its look, and therefore, in my view, its technical efficiency, could be a deciding factor whether the design is "commonplace" or "original". The hon. Member for Caernarfon (Mr. Wigley) is making an important point. I believe that my amendment reaches towards that principle.

Amendment No. 323 tackles the issue slightly differently. It tries to establish that

"A design is not commonplace for the purposes of this part if the creation of the design required a substantial input on the part of the designer of that design in terms of time and cost."

That would capture the designs of the two parts that I have used as illustrations, but it would also cover many other parts. I believe that it expresses in words what the Minister

[Mr. Rowlands]

claims that the Bill states. I got those terms from a letter that the Minister sent to the Association of Manufacturers of Domestic Electrical Appliances. In an interesting and important paragraph, rejecting one suggestion from the industry, the Minister replied:

"As I explained in Committee, and as I understand my officials said during your recent meeting,"—

that is a reference to the meeting between AMDEA and his officials—

"the term 'original' by itself does not require a design to be in any way different from what is widely known and used. Consequently the term 'commonplace' is needed simply to prevent mundane, routine, everyday, well-known designs from acquiring design right."

I am sure that we all understand that because it is a reasonable statement. What interested me is that the letter continued:

"For example, if someone were to 'design' a piece of uniform hollow tubing, such a design would be unlikely to pass the 'commonplace' test, and I would hope you would agree that this is the right result. It is, of course, not a question of whether the article is commonplace, but rather whether the design is commonplace,"

The key words are:

"I think if a company had spent two years designing something the result would be hardly likely to be a commonplace design."

Therefore, in responding to a series of suggestions by the industry about what the words "commonplace" and "original" mean, the Minister's letter gave an important interpretation of the difference. He introduced the concept that if the design of the part had taken two years, it would be highly unlikely that it would be a commonplace design. That prompted me immediately to table amendment No. 323, which turns into legislative form the interpretation placed on the difference between commonplace and original in the Minister's letter to the industry. Therefore, I travel hopefully on both these amendments because of their excellent parentage.

Mr. Thomas McAvoy (Glasgow, Rutherglen): As my hon. Friend knows, I too am a former employee of the Hoover company, having worked at the Cambuslang plant. I am sure that my hon. Friend will agree that the substantial input into design and investment by the Hoover company in Cambuslang and in Merthyr has resulted in stable employment in those areas, and that the Government's proposals put that at risk.

Mr. Rowlands: I am grateful to my hon. Friend. I seem to be surrounded by former employees of Hoover. I never had the privilege of having a start at Hoover. I never qualified and I do not think that the company would have let me near its factories. However, I am sure that both my hon. Friend and the hon. Member for Caernarfon speak from experience.

I am simply saying that I do not see how the Government and the Minister could object to my two amendments because one comes from a note on the clause issued by the Minister's own Department and the second comes virtually straight from a letter that the Minister sent to the industry explaining and interpreting what "design", "commonplace" and "original" mean and the difference between them.

As we all know, the problem is that *Hansard*, letters from Ministers and notes on clauses are not the law and have no legislative force when it comes, as no doubt it will in the not-too-distant future, to a court case about what is commonplace and what is original. Therefore, I am seeking to make sure that what the Minister intends or what the Minister tells people that he is intending is translated into legislative form.

Mr. Bob Cryer (Bradford, South): I am interested in these two amendments because they seem to provide the sort of protection to which a manufacturer should be reasonably entitled. I was not a member of the Committee and there is sometimes a sort of understanding that only hon. Members who served on the Bill Committee have a contribution to make. That is not the case.

I should like the Minister to elaborate on the case of a manufacturer of motor car pistons in my constituency. That manufacturer is Hepworth and Grandage Ltd. Are motor car pistons regarded as commonplace? If they are it would mean that any manufacturer could make or replace Hepworth and Grandage pistons. That firm has developed pistons that cause engines to use less oil than more conventional pistons. For example, the firm uses hardening in sections of the aluminium pistons. Such a difference is not often visible to the naked eye and would fall within the criteria of amendment No. 322.

Hepworth and Grandage use many and varied techniques that are also covered by amendment No. 323. The firm has spent a great deal on research and development. For example, it has fitted sets of pistons that it has designed into test engines made by manufacturers such as British Leyland and Jaguar and those engines have been run over many hours. The engines were then dismantled and the pistons carefully examined to see where wear has taken place and to see what disadvantages accrued from the design features being tested.

Such tests cost a great deal and it seems quite wrong that the design, testing and development of an object which to all intents and purposes, and certainly to the average onlooker, seems commonplace should be set to one side. Those processes might cost many hundreds of thousands of pounds and put a British manufacturer at a clear disadvantage. In any case, Hepworth and Grandage is at a clear disadvantage because it is the only major piston manufacturer left in the United Kingdom. Several have gone out of business in the past quarter of a century and we must make sure that we protect our diminishing manufacturing base.

I remind the Minister that about 2 million jobs in manufacturing have gone since 1979. There has been an onslaught on the manufacturing base that the Government inherited in 1979. We are entitled to say that manufacturers that do not simply copy other products but invest in research and development and produce products superior to others should have the right not to have their products treated as commonplace and therefore open to imitation and production by other manufacturers. Such other manufacturers may not have invested in research and development and may not employ research and development staff. Such staff are often expensive to employ because of their specialist skills.

Hepworth and Grandage is the largest private manufacturer in Bradford, with the largest number of workers. Its expertise and skill have enabled it to obtain a contract to provide pistons for the American company Buick. Because of its acknowledged position as one of the world's leading piston manufacturers it is building for Buick a piston manufacturing plant in America. That

world position has been achieved only because of its investment in research and development and for that reason I seek the Minister's assurance that amendments Nos. 322 and 323 will be accepted. If the Minister does not accept them, will he assure us that it is because there is within the Bill adequate protection for manufacturers such as Hepworth and Grandage? Will the Bill protect such a company from pirate imitations by manufacturers working on rock bottom prices and therefore able to obtain a competitive advantage?

6.45 pm

The Minister may talk about the market place being the sole criterion, but to adopt such an attitude would be extremely unfair. That is because it is easy for a manufacturer to pick up an object that it claims is commonplace and manufacture it without any research and development costs, thereby gaining a competitive advantage. That may seem attractive to the Minister, but if further research and development is needed to keep up with international competitive developments, a manufacturer such as Hepworth and Grandage will be placed at a severe disadvantage. It seems fair and reasonable to give such a company some protection.

I look to the Minister to accept the amendments that were tabled and explained in Committee and based on the words of the Minister and a briefing provided to the Committee. If the Minister does not accept the amendments, will it be because he is satisfied beyond peradventure, as the lawyers say, that the Bill provides adequate protection? Almost certainly lawyers will become involved in this legislation and our job is to try to keep the lawyers out. When there is confrontation in court because of ambiguities in legislation it means that despite all the scrutiny in Committee upstairs and in the House this place has failed to provide clear legislation that will not lead to confrontation in court.

I hope that no obscurities will exist in the legislation because of the Minister's refusal to accept the amendments that clarify and perfect the legislation in the way that my hon. Friend the Member for Merthyr Tydfil and Rhymney (Mr. Rowlands) has suggested. On the face of it those amendments seem to put forward very strong arguments.

Mr. Butcher: I agree with the hon. Member for Bradford, South (Mr. Cryer) that our objective must be to design—if I may use that word—the Bill so that interpretation is minimal or at best simple. As a parliamentarian of some experience, he will know that trying to do that is never easy. Sometimes the efforts of parliamentary counsel who wish to clarify matters for the lawyers confuse things for the legislators, and we have even greater difficulty understanding some of the jargon.

I shall shortly deal with the hon. Gentleman's point about that excellent company Hepworth and Grandage. Before I do that I should tell the House that my motivation was to try to find a better word than "commonplace". After consultation with my officials who consulted all these infamous draftsmen, I wrote to the hon. Member for Merthyr Tydfil and Rhymney (Mr. Rowlands) and said —I hope he did not think I was being flippant—that we had difficulties in finding another word that gave the benefits he sought to achieve.

The hon. Gentleman criticised us for being passive, but that is a little unfair. Over many years my Department has been active in attempting to draw up clear and workable provisions for the Bill. The word "commonplace" was chosen not at random but after much consideration, including the deliberations of a working group which looked at the protection of semiconductor chip design at European Community level. We have looked at the matter again to be sure, but try as we might we have not seen a better formulation.

The hon. Member for Merthyr Tydfil and Rhymney teased us about whether the notes on clauses and their relationship to my letter to him and subsequent observations meant that we were entirely convinced and not only agreed with his objectives but agreed that we should try to find another way. The passage that the hon. Gentleman quoted from the notes on clauses is, as he said, an explanation of the meaning of "design". Design does not need to be visible to receive design right. Amendment No. 322 is about the meaning of "commonplace", and that meaning is not assisted by adding other words out of context. The hon. Gentleman is still worried about the effect of the exclusion of commonplace designs. As I explained in Committee, the word "original" has the same meaning as that used in copyright in part I of the Bill—that is, independently created and not a copy.

By itself, the word "original" does not require the design to be in any way different from what is already widely known and used, and that is too generous a test for the acquisition of rights in designs. We therefore need a test to prevent well-known, everyday, standard designs from acquiring rights. That is all that the commonplace test is intended to do. I said in Committee that I was open to suggestions about how that might be expressed in the Bill and the hon. Member for Merthyr Tydfil and Rhymney is now seeking to refine the meaning of the word "commonplace". I believe that the word "commonplace" expresses our intention well. I have considered the hon. Gentleman's suggestions carefully, but I do not think that they would help—indeed, amendment No. 323 could be positively harmful.

Amendment No. 322 would require features that are not visible to the naked eye to be taken into account when assessing whether a design is commonplace. The problem is that that does not need saying. Design right is not restricted to visible features. There is nothing in the wording of the Bill that limits design right to features that are visible to the naked eye. Those features that are not visible to the naked eye, whether because they are internal, concealed features in the finished product or because they are too small to be seen, are covered by the Bill and, as a result, will automatically be taken into account at all levels. The only possible effect of stating the obvious—which is what the amendment seeks to do—is to cast doubt where none existed before.

Amendment No. 323 is slightly different. The Bill does not achieve what the hon. Member for Merthyr Tydfil and Rhymney wants, and I do not think that it should. If the amendment were accepted, a designer who had spent a lot of time and money to come up with a well-known, everyday, commonplace design would get rights in that design. That is not the sort of design that we want to encourage.

The test must be an objective one—is the design an everyday, commonplace design? If it is, there is no basis for an intellectual property right. It is for that reason, and not because we have not tried, that I have been resisting the amendment.

Mr. Rowlands: I should like to answer the Minister's comments on amendment No. 323. I tabled the amendment to establish that time and input should be a factor in determining whether a design was commonplace or original because in his letter, the Minister said specifically:

"I think if a company had spent two years designing something the result would be hardly likely to be a commonplace design."

Yet he has now said to the House that that is not the sort of design that he wants to encourage. Did he mean the words when he wrote them, and is he now withdrawing them, or what? I do not understand his argument. I have used his own words and criteria in the amendment.

Mr. Butcher: We are now interpreting plain English and attempts to make the English plainer or clearer. It is perfectly legitimate for me, or any hon. Member, to consider designers who make a considerable effort. The pistons which were mentioned by the hon. Member for Bradford, South (Mr. Cryer), although an allegedly commonplace article, required considerable effort, whether in heat treatment or a characteristic which gave a particular performance.

If I identified as commonplace a paper clip or a piece of straight tubing that had been chopped into certain lengths, I believe that that would be a fairly accurate assessment. In saying that items that need far more intellectual effort and investment are not commonplace, I am not saying anything that the House under normal circumstances would find unacceptable.

The hon. Member for Bradford, South made a fine speech on behalf of the prime employer in his constituency and asked whether the motor pistons that it produced were commonplace. I am afraid that that is the wrong question. As I have explained on several occasions, the question should be whether the piston design is commonplace. Some pistons will receive design right protection and some will not. It will depend on whether the design features employed are or are not commonplace.

The hon. Member for Bradford, South mentioned a particular feature of a particular piston and said that it deserved protection; that is an argument that we have to meet. As I understand the example, the feature concerned was the material used, not the shape and configuration of the pistons.

Design right applies only shape and configuration and it cannot and should not protect materials and composition. Such features should be protected under the patent system if they have sufficient merit.

I agree with the contention of the hon. Member for Bradford, South. Massey-Ferguson in my own constituency is very concerned with the behaviour of mixtures of metals at very high temperatures; and it uses special heat treatment processes to produce special features in its components.

Mr. Wigley: The Minister said that design right applied to shape and configuration. Surely that is the whole point of the amendment, which seeks to apply design right to what is out of sight, which is excluded at present.

Mr. Butcher: We have wrestled with this matter for a long time. It is my duty, and it was the duty of the Committee, to try to make clear what would happen in the aftermath of our decision. Having gone through the matter with my officials and listened to advice from outside, I believe that the use of the word "commonplace" will satisfy the requirement to deal with this thorny duty that I thought the House had placed upon us. Unfortunately, this is our last chance to do that, so we must treat the matter very seriously, and I think that this is the very best shot that we can make.

Mr. Cryer: Does not the Minister agree that if there are to be differences from the commonplace in design, the relevant materials must be involved? For example, motor car pistons often work at high temperatures. The design shape is retained by virtue of the materials that are used, and they are part of the design. The piston is designed to maintain the compression of gases in the combustion chamber and to prevent the excess burning of oil from the crank case chamber. Designers therefore cannot ignore the material which, under pressure and heat, will change in one instance but remain true to the original design in the other, thus showing a superior design. The materials are not entirely separate from the shape and design. Amendment No. 322 deals with features that are not apparent to the naked eye, and materials must be among those.

Mr. Butcher: I think that we are arguing at cross purposes. There is not much between us on the question of the interplay between materials and processes of manufacturing, but there is a distinction between those features and the shape and configuration of the article. Consider the most modern techniques of precision casting or heat treatment; certain shapes may become possible only if such technologies and techniques are introduced.

Let me return to the practicalities. Someone may come along and try to rip off the shape of a piston into which a lot of work has gone. A competitor can do that only if the performance of the rip-off part is the same under certain engineering conditions. It is therefore legitimate to argue that we are discussing related issues. It is certainly true that some design options become possible because of the performance of certain materials, but the protection that the hon. Gentleman seeks is already there. A Taiwanese operation might want to supply rip-off, straight-copy pistons to given specifications but it would, I think, have great difficulty in convincing General Motors, for example, that the performance of those pistons—the aspects in which General Motors would be interested—would be adequate.

The hon. Member for Merthyr Tydfil and Rhymney tested me further and said that the letter I had sent to him showed that I was inconsistent. I said that it was unlikely that anyone who spent two years and a lot of money on a design would come up with something commonplace, but that it was just possible that he might. As I have said, in that case he should not get protection. There is nothing inconsistent between the letter that I wrote to industry and what I said today.

7 pm

Mr. Rowlands: I am extremely puzzled and rather disappointed by the Minister's reply. I would have thought that the Minister would have reached out to us more in an attempt to assure us, if nothing else, about the cases that we have quoted.

My hon. Friend the Member for Bradford, South (Mr. Cryer) has spoken about the close interrelationship between a design and the materials used to create it. The

Hoover washing machine door seal took a considerable time to design, but its success also depends upon the materials used to create it. Without such a combination there would be many problems regarding the performance of that machine.

We have sought to emphasise the aspects of a design that are not naked to the eye and it is a strong case to make —it was mentioned in the Department's report. The time and effort that is put into a design should also be taken into account when determining whether something is commonplace or original.

Mr. Cryer: The Minister has said that a rip-off imitation could be easily detected, but does my hon. Friend agree that that is not necessarily true? An original manufacturer of pistons may produce one that lasts for 90,000 miles and provides good service. The rip-off piston may only provide good service for between 20,000 and 30,000 miles, but by that time it is possible that the source of the rip-off will have been forgotten.

Mr. Rowlands: It is true that a copy may work perfectly well for a given period of time, but when it breaks down the consumer will not complain to the copyist, but to the manufacturers, for example Hoover. The same is true if a piston or other car part breaks down.

I shall not push this amendment. The Minister says one thing, but industry says another. We give the Minister notice that if we find that we were right and he was wrong after the Bill has been passed, we shall demand amending legislation as quickly as possible. We shall have to wait and see. I hope that we are wrong and that the Minister is right, but if not we shall have to come back to it.

In the light of the arguments, I beg to ask leave to withdraw the amendment.

Amendment, by leave, withdrawn.

Clause 27

MEANING OF "INFRINGING COPY"

Amendment made: No. 162, in page 12, line 26, at end insert—

'section *(Transfer of copies of works in electronic form)* (2) (further copies, adaptations, &c. of work in electronic form retained on transfer of principal copy),'.—*[Mr. Butcher.]*

The Parliamentary Under-Secretary of State for Corporate Affairs (Mr. Francis Maude): I beg to move amendment No. 242, in page 12, line 31, leave out from beginning to 'or'.

Mr. Deputy Speaker (Sir Paul Dean): With this it will be convenient to discuss the following amendments:No. 6, in page 27, line 26, leave out clause 69.

No. 234, in clause 69, page 27, line 26, leave out from 'private' to end of line 35 and insert—

'purposes of—

(a) a recording of a broadcast or cable programme, or a copy of such a recording, or

(b) a photograph of a television broadcast or cable programme, or a copy of such a photograph,

does not infringe any copyright in the broadcast or cable programme.

(2) An act done with a view to the thing made being sold or let for hire, played or shown in public, broadcast or included in a cable programme service shall be treated for the purposes of this section as not done for private purposes.'.

No. 316, in page 27, line 29, leave out—

'or in any work included in it'.

Government amendment No. 243.

Amendment No. 25, in schedule 2, page 152, line 21, leave out from 'purpose' to end of line 23.

Mr. Maude: This amendment is about time shifting and it is a subject that has given pleasure to many people. I am bound to say that I have some hesitation tonight in proposing to the House that we should remove from the clause that element that has given so much innocent fun to so many.

In Committee, when I moved the proposal to legalise private recordings which were kept for 28 days or less, I did not foresee the excitement that that modest proposal would generate. It was regrettable that those who expressed opinions so vividly and so swiftly left out the usual preliminary stage of finding out what the proposal was about. I was astonished, for example, only a day or so after the Committee had reached its decision, to read in the newspaper the remarks of a Queen's counsel who thought that the Government's proposal was outrageous and that it was quite wrong to use the criminal law to prohibit home copying. The propositions that we were invoking the criminal law and that in some way we were taking steps to restrict home copying were wrong, as a cursory examination of the proposal would have disclosed.

I am bound to say that, in the middle of all the innocent fun that was had, some serious harm was done by those who reacted in a somewhat hysterical way to the proposal.

I received a number of letters from people, especially from the elderly, who were in genuine distress and anxiety at the spectre of police invading their homes to check the age of their video recordings. The pundits and the politicians who made those fanciful suggestions must or should have known how far from the truth they were.

Let us be quite clear about the present position. It is a breach of copyright to copy any television programme except a live broadcast of, for example, a sporting event. Therefore it is legal to record the test match live in the afternoon—should there be any play and should anyone want to—but not legal to record the highlights in the evening. Presently, virtually all video recording of television programmes is in breach of copyright law. The amendment that was passed by the Committee was thus a liberalising measure and not a restrictive one. Perhaps I should read that out again at dictation speed to make sure that it is understood. The amendment made legal much more than is at present legal. It sought to bring within the law those people who are at present outside it.

Because it is widely accepted that the practice of time shifting—the recording of a programme in order to watch it at a more convenient time—does no harm to the copyright owner, we have sought to make it legal. Because the building up of video libraries by individuals may well cause detriment to the copyright owner, it is necessary under the Berne convention that copyright law should continue to apply to those recordings.

Clause 69 will allow recording of a broadcast or cable programme solely for the purpose of enjoying it at a more convenient time without infringement of any copyright, whether of the broadcast or cable programme or of any work included in it. Under its provisions, Members of this House could set their video recorders to record this evening's television broadcasts in order to view them tomorrow morning or at the weekend and they would not infringe any copyright.

When the clause was introduced in Committee, we added the 28-day proviso since we thought this would

[Mr. Maude]

provide an additional safeguard to copyright owners against practices which damage their interests. The rest, as they say, is history. The rule gave some people a lot of fun, some of it perhaps at my expense. I do not begrudge them their fun all that much.

It occurs to me that there may be those—no doubt the same people who criticised the first proposal—who will seek to present this amendment as a U-turn. They would be as wrong now as they were then. The 28-day proposal made the law more liberal than it is now. By removing the 28-day proviso the law will be more liberal still. So, far from making a U-turn, this is a further move in exactly the same direction.

Clause 69 minus the 28-day rule still only permits time shifting. It does not permit the recording and long-term retention for repeated viewing of television programmes. Such practices may, and in the case of broadcast feature films do, damage the copyright owner's interest by their impact on the rental market, and to a lesser extent on cinema exhibition.

The adoption of amendments Nos. 242 and 243 will allow the public to record television programmes for the purposes of time shifting. In passing I assume that amendment No. 25 is an error and was tabled in over-enthusiasm to remove the 28-day period. The 28-day period in schedule 2, which amendment No. 25 would delete, is concerned with the broadcasters' so-called "ephemeral right" only and is set out in clause 67.

I commend the amendment to the House.

Mr. Mark Fisher (Stoke-on-Trent, Central): We have heard a delightful and extremely subtle speech from the Minister. Anyone coming into this debate might have felt that he was treating us to an example of time shifting since there were times during his speech when I thought I was back in Committee listening to exactly the same speech that he gave us about 28 days ago.

Perhaps people will wish to delete both speeches and erase them from their recorder and library of video tapes of the Minister's favourite speeches. Hon. Members who have been treated to his speech before found it a little rich that he tried to pass this off as a great liberalising measure. He may have convinced himself, but I doubt whether he will convince many members of the public who have suffered anxiety and distress on this score. He limited legality to 28 days and said that from then on people would be in breach of the law, which caused anxiety, so it was difficult for him to say that it was an example of his great liberalising mood. However, he kindly said that he did not begrudge us our fun—adding slowly, "all that much." His hon. Friends behind him may not have seen his icy, stretched smile when he said that. Nevertheless, the words came out even if the eyes and mouth remained static.

The truth is that the Government and the Minister got themselves into the most almighty mess in Committee and were justly ridiculed there and, the next day, in the press. One of the more serious newspapers referred to the Minister as a parliamentary jester. Many hon. Members might think that my hon. Friend the Member for Newham, North-West (Mr. Banks) fills that role to everyone's satisfaction, but obviously the Minister was trying to compete with him. He certainly awoke to fame the next morning, but it was fame of an unfortunate sort. Being a reasonable and sensible man, he set to work with his civil servants to review the matter and find some alternative. The difficulty was that he had considered the obvious solution—to delete subsection (2)—in Committee and categorically refused it. I do not want to rub salt in his wounds, but it is worth repeating his words: that deleting subsection (2)

"would be in breach of the Berne Convention and it would not be a reasonable balance between the rights of copyright owners and the users."—[*Official Report, Standing Committee E*, 9 June 1988; c. 479.]

Having so categorically ruled out the one thing that would get him off the hook, the Minister has had difficulty in recent weeks squaring the position. I am delighted to say that he has now come forward with an amendment that will delete subsection (2), in spite of the fact that, as far as I can see, nothing has changed. Certainly, the Berne convention has not. If the Minister believed this was in breach of it then, it still is now. Nor has the Government's view of the convention changed; nor has the balance between the rights of consumers and users. In any case, the Government have come to their senses and now propose to leave out subsection (2). If hon. Members look at the Order Paper they will notice that it must be enormously encouraging for the Government to know that they have the unqualified support of the hon. Member for Northampton, North (Mr. Marlow), without which no Government can survive.

Although this is a huge improvement which will relieve the anxiety and distress to which I have referred, the provision is by no means perfect yet. There are still problems. I hope the Minister understands them. The last seven words of subsection (1)—

"or in any work included in it"—

mean that internal composite copyrights as part of any broadcast are still included. That presents some problems, unfairnesses and potential dangers which could, in future, become very serious.

There are still anomalies in merely deleting subsection (2). Hon. Members on both sides must understand that the Minister is legalising off-air recording, but tape-to-tape recording will remain illegal. The Minister may have some way out of that, in which case I hope he will tell us about it. The distinction between off-air recording and tape-to-tape is not easily made. Even after the Government amendment goes through, tape-to-tape will be illegal, and off-air recording legal. Is that reasonable? How can the Minister possibly enforce it? It is as unenforceable as his original 28-day ruling.

7.15 pm

There is a further difficulty, in that the rights of copyright owners will be harmed. Libraries of film, opera and other broadcast work will be able to be built up, to the financial detriment of copyright owners. That is in breach of the Berne convention, article 9 of which states that unless there is compensaion such actions are serious matters. So, although this gets the Minister out of being ridiculed by the popular press and most people in pubs all over the country, the new provision does not deal with these and other anomalies and problems which remain.

The difficulties are genuine. We all want time shifting for domestic purposes to be legal—so much is common sense. Broadcasters want that, too. However, we should not ignore the rights of copyright owners and of composers which, in five or 10 years' time, when there will be different technology, more tape-to-tape machines, more

stereos with better quality of recording for sound and more satellite services, will be more complex than we can anticipate now. So we must get it right now. I fear that although we have freed ourselves of one difficulty with this amendment, which we welcome, we have not solved all the problems.

Possibly the only way to deal with this is the tape levy, which we shall consider later. It is a solution that other European countries have come up with. But for the time being, we welcome the Minister's having admitted, with some dignity, the error of his former ways on time shifting —though not perhaps with the enormous grace and humour for which we had hoped. In doing so, he has pleased a great many people.

Mr. Simon Coombs (Swindon): I join the hon. Member for Stoke-on-Trent, Central (Mr. Fisher) in congratulating my hon. Friend the Minister on the way in which he has escaped from his dilemma and spoken about the subject.

I had the misfortune not to catch the eye of the Chairman of the Selection Committee and was not a member of the Standing Committee. I learned of this proposal on a Friday morning while mowing my lawn. I received a phone call from my local newspaper reporter who asked me for a comment. It is said that we can all remember where we were when the late President Kennedy was assassinated. I can vividly remember the sense of shock on coming to the phone and being asked to comment on a proposal by the Government that we should impose a 28-day restriction on the recording of programmes from the television.

My immediate reaction is recorded in the Swindon *Evening Advertiser* as having been an expression of surprise, which was an understatement. I used rather stronger language than that. I said that I thought the proposal would be unenforceable and that it was very unlikely that a civil action would be taken by film manufacturers—in the case of films shown on television —or by the television companies which caused the films to be shown. I wondered aloud to my friend the reporter how the evidence would be obtained which would show when recordings had been collected, and the most recent occasion when they had been used, which would call into question the number of days for which they had been kept.

The hon. Member for Stoke-on-Trent, Central put the argument clearly and I shall not repeat it. Time shifting cannot reasonably be limited to 28 days. I received a letter from the wife of an army officer who is serving abroad. She said that she would like to be able to keep programmes that she had recorded until her husband's return from his next tour of duty abroad, which would not be within 28 days. Under the Bill, that would constitute a more reasonable time, but it would not be within 28 days.

People have told me in my surgery that they have stayed within the law all their lives but wonder whether they will be put outside it by this provision. However innocent and well intentioned my hon. Friend's proposal may have been, it caused genuine distress to a large number of people. What is time shifting? Under the Bill, even with subsection (2) deleted, we are told that it is keeping a recording until a more reasonable or convenient time in order to watch a product that has been recorded. Why is that not the case with a tape library compiled by someone who is busy in his normal life but considers that he would like to watch a film in the future which he does not have time to watch at present? It could be argued that tape libraries fall within this general principle of time shifting, and I invite my hon. Friend to comment on that.

I am delighted that the Government have not looked for half measures and have not tinkered with the subsection, but have agreed to delete it completely. That is much the best way of resolving the problem. I welcome the Minister's conversion, and I enjoyed the way in which he justified it in terms of greater liberalisation. It is interesting that the Government are prepared to change their mind on the matter not once, but twice. It gives me hope that they will listen to our arguments on another important aspect of the Bill. When we come to the debate on home taping, we must persuade the Government to change their mind on that aspect, too. In the end, it is not the change of mind that matters but getting the Bill right. In this instance, they have got it right—for the time being. In the other case, we still have an argument to make. I am pleased to support the amendment.

Mr. Page: I welcome the withdrawal of the subsection. I was a member of the Committee—I heard my 5 per cent. of the debate—and I was grateful to the Whip on duty who released me from the Committee five minutes before the end, which enabled me to turn a cowardly cheek towards the more ribald comments of my less-than-respectful constituents during that weekend.

But the withdrawal of the subsection does not mean the disappearance of the problem of breach of copyright. In the absence of compensation to copyright owners under clause 69, it is doubtful whether it complies with article 9 of the Berne convention. We shall have more than enough time during the debate on the blank tape levy to deal with those points, but I hope that my hon. Friend the Minister will consider the protection of copyright and the introduction of some recompense to copyright owners when the Bill proceeds to another place.

Mr. Maude: I appreciate the dilemma in which my stance put the hon. Member for Stoke-on-Trent, Central (Mr. Fisher). He could not make up his mind whether to carp or gloat, so he did a bit of both. But his carping was misplaced. He asked about my remarks in Committee on the Berne convention. The convention says that copying must not conflict with normal exploitation of the work, or unreasonably prejudice the legitimate interests of the copyright owner. Even without subsection (2), the clause is limited to time shifting and, as we have said on previous occasions, time shifting does not conflict with normal exploitation or unreasonably prejudice legitimate interests.

Subsection (2) was included to reinforce the fact that subsection (1) does not permit indefinite retention of recordings, but we now accept that specifying an arbitrary limit would produce the wrong result in many cases of genuine time shifting. Removal of subsection (2) legitimises genuine cases, but practices going beyond time shifting will continue to infringe copyright. The Berne convention must be given an interpretation that produces a realistic and practical result, and we consider that our approach in this difficult area does that.

My hon. Friend the Member for Swindon (Mr. Coombs) said that his constituents who had always abided by the law were anxious that my proposals would put them outside the law. That is not the case. Anyone who has been recording television programmes has been in breach of

[Mr. Maude]

copyright law. The proposal that I moved in Committee would have brought some of them within the law. It would not have put outside the law anyone who is at present inside it. It is important to get that straight. It is not a question of withdrawing the amendment that we moved in Committee, which was a liberalising measure. Removing the 28-day subsection is a further liberalising measure. Both move in the same direction: bringing people who carry out an essential innocent activity within the law. I commend the amendment to the House.

Amendment agreed to.

New clause 3

APPLICATION FOR REVIEW OF ORDER AS TO LICENCE

'.—(1) Where the Copyright Tribunal has made an order under section 123 or 124, the licensing body or the persons entitled to the benefit of the order may apply to the Tribunal to review its order.

(2) An application shall not be made, except with the special leave of the Tribunal—

(a) within twelve months from the date of the order or of the decision on a previous application under this section, or

(b) if the order was made so as to be in force for 15 months or less, or as a result of the decision on a previous application under this section is due to expire within 15 months of that decision, until the last three months before the expiry date

(3) The Tribunal shall on an application for review confirm or vary its order as the Tribunal may determine to be reasonable in the circumstances.'.—*[Mr. Butcher.]*

Brought up, read the First and Second time, and added to the Bill.

New clause 4

EFFECT OF ORDER OF TRIBUNAL AS TO LICENCE

'.—(1) Where the Tribunal has made an order under section 123 or 124 and the order remains in force, the person entitled to the benefit of the order shall if he—

(a) pays to the licensing body any changes payable in accordance with the order or, if the amount cannot be ascertained, gives an undertaking to pay the charges when ascertained, and

(b) complies with the other terms specified in the order,

be in the same position as regards infringement of copyright as if he had at all material times been the holder of a licence granted by the owner of the copyright in question on the terms specified in the order.

(2) The benefit of the order may be assigned—

(a) in the case of an order under section 123, if assignment is not prohibited under the terms of the Tribunal's order; and

(b) in the case of an order under section 124, if assignment was not prohibited under the terms of the orginal licence.'.—*[Mr. Butler.]*

Brought up, read the First and Second time, and added to the Bill.

New clause 5

PROVISIONS WITH RESPECT TO CERTAIN DESIGNS REGISTERED BEFORE COMMENCEMENT

'.—(1) Where a design is registered under the Registered Designs Act 1949 in pursuance of an application made after 12th January 1988 and before the commencement of this Part which could not have been registered under section 1 of that Act as substituted by section 255 above—

(a) the right in the registered design expires ten years after the commencement of this Part, if it does not expire earlier in accordance with the 1949 Act, and

(b) any person is, after the commencement of this Part, entitled as of right to a licence to do anything which would otherwise infringe the right in the registered design.

(2) The terms of a licence available by virtue of this section shall, in default of agreement, be settled by the registrar on an application by the person requiring the licence; and the terms so settled shall authorise the licensee to do everything which would be an infringement of the right in the registered design in the absence of a licence.

(3) In settling the terms of a licence the registrar shall have regard to such factors as may be prescribed by the Secretary of State by order made by statutory instrument.

No such order shall be made unless a draft of it has been laid before and approved by a resolution of each House of Parliament.

(4) Where the terms of a licence are settled by the registrar, the licence has effect from the date on which the application to the registrar was made.

(5) Section 11B of the 1949 Act (undertaking to take licence of right in infringement proceedings), as inserted by section 260 below, applies where a licence is available as of right under this section, as it applies where a licence is available as of right under section 11A of that Act.

(6) Where a licence is available as of right under this section, a person to whom a licence was granted before the commencement of this Part may apply to the registrar for an order adjusting the terms of that licence.

(7) An appeal lies from any decision of the registrar under this section.

(8) This section shall be construed as one with the Registered Designs Act 1949.'.—*[Mr. Butcher.]*

Brought up, read the First and Second time, and added to the Bill.

New clause 6

TRANSFER OF COPIES OF WORKS IN ELECTRONIC FORM

'(1) This section applies where a copy of a work in electronic form has been purchased on terms which, expressly or impliedly or by virtue of any rule of law, allow the purchaser to copy the work, or to adapt it or make copies of an adaption, in connection with his use of it.

(2) If there are no express terms—

(a) prohibiting the transfer of the copy by the purchaser, imposing obligations which continue after a transfer, prohibiting the assignment of any licence or terminating any licence on a transfer, or

(b) providing for the terms on which a transferee may do the things which the purchaser was permitted to do,

anything which the purchaser was allowed to do may also be done without infringement of copyright by a transferee; but any copy, adaptation or copy of an adaptation made by the purchaser which is not also transferred shall be treated as an infringing copy for all purposes after the transfer.

(3) The same applies where the original purchased copy is no longer usable and what is transferred is a further copy used in its place.

(4) The above provisions also apply on a subsequent transfer, with the substitution for references in subsection (2) to the purchaser of references to the subsequent transferor.'.—*[Mr. Butcher.]*

Brought up, read the First and Second time, and added to the Bill.

New clause 7

PERIOD AFTER WHICH REMEDY OF DELIVERY UP NOT AVAILABLE UNDER PART I

'(1) An application for an order under section 98 (order for delivery up in civil proceedings) may not be made after the

end of the period six years from the date on which the infringing copy or article in question was made, subject to the following provisions.

(2) If during the whole or any part of that period the copyright owner—

(a) is under a disability, or

(b) is prevented by fraud or concealment from discovering the facts entitling him to apply for an order,

an application may be made at any time before the end of the period of six years from the date on which he ceased to be under disability or, as the case may be, could with reasonable diligence have discovered those facts.

(3) In subsection (2) "disability"—

(a) in England and Wales, has the same meaning of the Limitation Act 1980;

(b) in Scotland, means legal disability within the meaning as in the Prescription and Limitation (Scotland) Act 1973;

(c) in Northern Ireland, has the same meaning as in the Statute of Limitations (Northern Ireland) 1958.

(4) An order under section 108 (order for delivery up in criminal proceedings) shall not, in any case, be made after the end of the period of six years from the date on which the infringing copy or article in question was made.'.—*[Mr. Butcher.]*

Brought up, and read the First time.

Motion made and Question proposed, That the clause be read a Second time.—*[Mr. Butcher.]*

Mr. Deputy Speaker (Sir Paul Dean): With this it will be convenient to discuss the following: Government new clause 8—*Order as to disposal of infringing copy or other article.*

Government new clause 9—*Jurisdiction of county court and sheriff court: Part I.*

Government new clause 10—*Period after which remedy of delivery up not available under Part II.*

Government new clause 11—*Order as to disposal of illicit recording.*

Government new clause 12—*Jurisdiction of county court and sheriff court: Part II*

Government new clause 13—*Order as to disposal of infringing article, &c.*

Government new clause 14—*Jurisdiction of county court and sheriff court: Part III.*

Government amendments Nos. 164 to 169, 174 to 177, 180 to 183, 185 to 190, 193, 195 to 198.

Amendment No. 279, in clause 288, page 133, line 40, leave out from 'court' to end of line 5 on page 134, and insert

'before which a person is charged with an offence under section 58A may, whether he is convicted of the offence or not, if it appears to the court that he has in his possession, custody or control any goods or material which are

(a) good or material in respect of which any offence under section 58A has been committed; or

(b) goods of the same description as those in respect of which the offence was committed, or material similar to that in respect of which the offence was committed, bearing a mark identical to or nearly resembling that in relation to which the offence was committed; or

(c) goods or material which fall within paragraph (a) or paragraph (b) of section 58A(1) and whose resemblance to the goods or material bearing a registered trade mark is such as to satisfy the court that they have been created with the intent mentioned in paragraph (b) of section 58A(2) (whether or not the creator is before the court);

order that the goods shall be forfeited and destroyed or otherwise dealt with as the court may think fit.'.

Government amendments Nos. 199 to 203.

Mr. Iain Mills (Meriden): The Minister knows my strong views on counterfeiting and the need for forfeiture. It is highly desirable to ensure that all articles identified as counterfeits are removed from circulation. As I understand it, clause 288 allows for forfeiture only when a person has been convicted.

I am grateful to the Minister and his officials for listening to my comments on the matter when we met recently, and I had hoped that he might have had some sympathy or a more wide-ranging power. It is important to summarise the fact that forfeiture should not be altered on the sole ground that counterfeit goods have been found under the present powers in the Bill. If the goods are counterfeit, forfeiture should be possible.

7.30 pm

Mr. Butcher: My hon. Friend's amendment would make it possible for a criminal court to order forfeiture of a person's property whether or not he had been convicted of an offence. Such provisions appear in earlier clauses in relation to copyright and performance rights, but not here in relation to counterfeits.

There is a fundamental difference between counterfeits and articles that infringe copyright or performance rights. Counterfeits are essentially trade mark infringements that are created or used with the purpose of passing them off as being genuinely associated with a legitimate user of the mark in question. Whether that additional element is present is a question for the court to determine, and it cannot do so on the basis of goods or materials alone. It depends on the state of mind of the accused. If there has been no conviction, we can see no way in which the courts could, in law, distinguish between counterfeits and purely civil trade mark infringements. It would be wholly wrong to give criminal courts jurisdiction over purely civil infringements. That is the function of the civil courts and the procedure applying there.

For that reason only, I cannot accept my hon. Friend's amendment as drafted.

Question put and agreed to.

Clause read the Second time, and added to the Bill.

New clause 8

ORDER AS TO DISPOSAL OF INFRINGING COPY OR OTHER ARTICLE

'(1) Where an infringing copy or other article has been delivered up in pursuance of an order under section 98 or 108, or has been seized and detained in pursuance of the right conferred by section 99, an application may be made to the court—

(a) for an order that it shall be forfeited to the copyright owner or destroyed or otherwise dealt with as the court may think fit, or

(b) for a decision that no such order should be made.

(2) In considering what order (if any) should be made, the court shall consider whether other remedies are available in an action for infringement of copyright would be adequate to compensate the copyright owner and to protect his interests.

(3) Provision shall be made by rules of court as to the service of notice on persons having an interest in the copy or other articles, and any such person is entitled—

(a) to appear in proceedings for an order under this section, whether or not he was served with notice, and

(b) to appeal against any order made, whether or not he appeared;

and an order shall not take effect until the end of the period within which notice of an appeal may be given or, if before the

end of that period notice of appeal is duly given, until the final determination or abandonment of the proceedings on the appeal.

(4) Where there is more than one person interested in a copy or other article, the court shall make such order as it thinks just and may (in particular) direct tht the article be sold, or otherwise dealt with, and the proceeds divided.

(5) If the court decides that no order should be made under this section, the person in whose possession, custody or control the copy or other article was before being delivered up or seized is entitled to its return.

(6) References in this section to a person having an interest in a copy or other article include any person in whose favour an order could be made in respect of it under this section or under section *(Order as to disposal of illicit recordings)* or *(Order as to disposal of infringing article, &c.)* of this Act or section 58BA of the Trade Marks Act 1938 (which make similar provision in relation to infringement of rights in performances, design and trade marks).'.—*[Mr. Butcher.]*

Brought up, read the First and Second time, and added to the Bill.

JURISDICTION OF COUNTY COURT AND SHERIFF COURT: PART I

'.—(1) In England, Wales and Northern Ireland a county court may entertain proceedings under—

section 98 (order for delivery up of infringing copy or other article),

section 101(5) (order as to exercise of rights by copyright owner where exclusive licensee has concurrent rights), or

section (*Order as to disposal of infringing copy or other article*) (order as to disposal of infringing copy or other article),

where the value of the infringing copies and other articles in question does not exceed the county court limit for actions in tort.

(2) In Scotland proceedings for an order under any of those provisions may be brought in the sheriff court.

(3) Nothing in this section shall be construed as affecting the jurisdiction of the High Court or, in Scotland, the Court of Session.'.—*[Mr. Butler.]*

Brought up, read the First and Second time, and added to the Bill.

New clause 10

PERIOD AFTER WHICH REMEDY OF DELIVERY UP NOT AVAILABLE UNDER PART II

'(1) An application for an order under section 190 (order for delivery up in civil proceedings) may not be made after the end of the period of six years from the date on which the illicit recording in question was made, subject to the following provisions.

(2) If during the whole of any part of period a person entitled to apply for an order—

(a) is under a disability, or

(b) is prevented by fraud or concealment from discovering the facts entitling him to apply,

an application may be made by him at any time before the end of the period of six years from the date on which he ceased to be under a disability or, as the case may be, could with reasonable diligence have discovered those facts.

(3) In subsection (2) "disability"—

(a) in England and Wales, has the same meaning as in the Limitation Act 1980;

(b) in Scotland, means legal disability within the meaning of the Prescription and Limitation (Scotland) Act 1973;

(c) in Northern Ireland, has the same meaning as in the Statute of Limitations (Northern Ireland) 1958.

(4) An order under section 194 (order for delivery up in criminal proceedings) shall not, in any case, be made after the end of the period of six years from the date on which the illicit recording in question was made.'.—*[Mr. Butcher.]*

Brought up, read the First and Second time, and added to the Bill.

New clause 11

ORDER AS TO DISPOSAL OF ILLICIT RECORDING

'(1) Where an illicit recording of a performance has been delivered up in pursuance of an order under section 190 or 194, or has been seized and detained in pursuance of the right conferred by section 191, an application may be made to the court—

(a) for an order that it shall be forfeited to such person having performer's rights or recording rights in relation to the performance as the court may direct, or shall be destroyed or otherwise dealt with as the court may think fit, or

(b) for a decision that no such order should be made.

(2) In considering what order (if any) should be made, the court shall consider whether other remedies available in an action for infringement of the rights conferred by this Part would be adequate to compensate the person or persons entitled to the rights and to protect their interests.

(3) Provision shall be made by rules of court as to the service of notice on persons having an interest in the recording, and any such person is entitled—

(a) to appear in proceedings for an order under this section, whether or not he was served with notice, and

(b) to appeal against any order made, whether or not he appeared;

and an order shall not take effect until the end of the period within which notice of an appeal may be given or, if before the end of that period notice of appeal is duly given, until the final determination or abandonment of the proceedings on the appeal.

(4) Where there is more than one person interested in a recording, the court shall make such order as it thinks just and may (in particular) direct that the recording be sold, or otherwise dealt with, and the proceeds divided.

(5) If the court decides that no order should be made under this section, the person in whose possession, custody or control the recording was before being delivered up or seized is entitled to its return.

(6) References in this section to a person having an interest in a recording include any person in whose favour an order could be made in respect of the recording under this section or under section *(Order as to disposal of infringing copy or other article)* or *(Order as to disposal of infringing article, &c.)* of this Act or section 58BA of the Trade Marks Act 1938 (which makes similar provision in relation to infringement of copyright, design right and trade marks).'.—*[Mr. Butcher.]*

Brought up, read the First and Second time, and added to the Bill.

New clause 12

JURISDICTION OF COUNTY COURT AND SHERIFF COURT: PART II

'.—(1) In England, Wales and Northern Ireland a county court may entertain proceedings under—

section 190 (order for delivery up of illicit recording), or

section *(Order as to disposal of illicit recording)* (order as to disposal of illicit recording),

where the value of the illicit recordings in question does not exceed the county court limit for actions in tort.

(2) In Scotland proceedings for an order either of those provisions may be brought in the sheriff court.

(3) Nothing in this section shall be construed as affecting the jurisdiction of the High Court or, in Scotland, the Court of Session.'.—*[Mr. Butcher.]*

Brought up, read the First and Second time, and added to the Bill.

New clause 13

ORDER AS TO DISPOSAL OF INFRINGING ARTICLE, &C.

'(1) Where an infringing article or other thing has been delivered up in pursuance of an order under section 222, an application may be made to the court—

(a) for an order that it shall be forfeited to the design right owner or destroyed or otherwise dealt with as the court may think fit, or

(b) for a decision that no such order should be made.

(2) In considering what order (if any) should be made, the court shall consider whether other remedies available in an action for infringement of design right would be adequate to compensate the design right owner and to protect his interests.

(3) Provision shall be made by rules of court as to the service of notice on persons having an interest in the article or other thing, and any such person is entitled—

(a) to appear in proceedings for an order under this section, whether or not he was served with notice, and

(b) to appeal against any order made, whether or not he appeared;

and an order shall not take effect until the end of the period within which notice of an appeal may be given or, if before the end of that period notice of appeal is duly given, until the final determination or abandonment of the proceedings on the appeal.

(4) Where there is more than one person interested in an article or other thing, the court shall make such order as it thinks just and may (in particular) direct that the thing be sold, or otherwise dealt with, and the proceeds divided.

(5) If the court decides that no order should be made under this section, the person in whose possession, custody or control the article or other thing was before being delivered up or seized is entitled to its return.

(6) References in this section to a person having an interest in an article or other thing include any person in whose favour an order could be made in respect of it under this section or under section *(Order as to disposal of infringing copy or other article)* or *(other as to disposal of illicit recordings)* of this Act or section 58BA of the Trade Marks Act 1938 (which make similar provision in relation to infringement of copyright, rights in performances and trade marks).'.—*[Mr. Butcher.]*

Brought up, read the First and Second time, and added to the Bill.

New clause 14

JURISDICTION OF COUNTY COURT AND SHERIFF COURT: PART III

'.—(1) In England, Wales and Northern Ireland a county court may entertain proceedings under—

section 222 (order for delivery up of infringing article, &c.),

section *(Order as to disposal of infringing article, &c.)* (order as to disposal of infringing article, &c.), or

section 226(5) (application by exclusive licensee having concurrent rights),

where the value of the infringing articles and other things in question does not exceed the county court limit for actions in tort.

(2) In Scotland proceedings for an order under any of those provisions may be brought in the sheriff court.

(3) Nothing in this section shall be construed as affecting the jurisdiction of the High Court or, in Scotland, the Court of Session.'.—*[Mr. Butcher.]*

Brought up, read the First and Second time, and added to the Bill.

New clause 16

BRITISH SHIPS, AIRCRAFT AND HOVERCRAFT: PART I

' .—(1) This Part applies to things done on a British ship, aircraft or hovercraft as it applies to things done in the United Kingdom.

(2) In this section—

"British ship" means a ship which is a British ship for the purposes of the Merchant Shipping Acts (see section 2 of the Merchant Shipping Act 1988) otherwise than by virtue of registration in a country outside the United Kingdom; and

"British aircraft" and "British hovercraft" mean an aircraft or hovercraft registered in the United Kingdom.'.—*[Mr. Butcher.]*

Brought up, read the First and Second time, and added to the Bill.

BRITISH SHIPS, AIRCRAFT AND HOVERCRAFT: PART II

' .—(1) This Part applies to things done on a British ship, aircraft or hovercraft as it applies to things done in the United Kingdom.

(2) In this section—

"British ship" means a ship which is a British ship for the purposes of the Merchant Shipping Acts (see section 2 of the Merchant Shipping Act 1988) otherwise than by virtue of registration in a country outside the United Kingdom; and

"British aircraft" and "British hovercraft" mean an aircraft or hovercraft registered in the United Kingdom.'.*[Mr. Butcher.]*

Brought up, read the First and Second time, and added to the Bill.

New clause 18

CROWN USE OF DESIGN RIGHT: COMPENSATION FOR LOSS OF PROFIT

' .—(1) Where Crown use is made of a design, the government department concerned shall pay—

(a) to the design right owner, or

(b) if there is an exclusive licence in force in respect of the design, to the exclusive licensee,

compensation for any loss resulting from his not being awarded a contract to supply the articles made to the design.

(2) Compensation is payable only to the extent that such a contract could have been fulfilled from his existing manufacturing capacity; but is payable notwithstanding the existence of circumstances rendering him ineligible for the award of such a contract.

(3) In determining the loss, regard shall be had to the profit which would have been made on such a contract and to the extent to which any manufacturing capacity was under-used.

(4) No compensation is payable in respect of any failure to secure contracts for the supply of articles made to the design otherwise than for the services of the Crown.

(5) The amount payable shall, if not agreed between the design right owner or licensee and the government department concerned with the approval of the Treasury, be determined by the court on a reference under section 242; and it is in addition to any amount payable under section 232 or 233.

(6) In the application of this section to Northern Ireland, the reference in subsection (5) to the Treasury shall, where the government department concerned is a Northern Ireland department, be construed as a reference to the Department of Finance and Personnel.'.—*[Mr. Butcher.]*

Brought up, and read the First time.

Mr. Butcher: I beg to move, That the clause be read a Second time.

Mr. Deputy Speaker: With this it will be convenient to take the following: Government new clause 19—*Crown use of registered design: compensation for loss of profit*

Amendment No. 14, in clause 231, page 102, line 41, at end insert—

'(d) purposes of protecting the environment.'.

No. 15, in page 102, line 41, at end insert—

'(d) civil defence purposes'.

Government amendment No. 99.

Amendment No. 32, in page 102, line 46, after 'matters', insert—

'and which agreement relates specifically to the articles concerned or to equipment embodying such articles'.

No. 26, in page 103, line 11, at end insert—

[Mr. Deputy Speaker]

'"competent authority" means a Secretary of State, a Minister of State or a Parliamentary Under-Secretary of State acting in person.'.

No. 28, in page 103, line 19, leave out 'either before or after the use and'.

No. 29, in page 103, line 21, at end insert— 'but may not be given after the use'.

No. 27 in clause 232, page 103, line 26, leave out subsection (1) and insert—

'(1) Subject to this section, Crown use of a design by a government department, or by a person authorised by a government department, under section 231 shall be made only after a competent authority has given notice in writing to the government department concerned authorising such use.

(1A) No authorisation shall be given under this section unless the competent authority has notified the design right owner in writing of the intention to use or authorise the use of his design for the services of the Crown and such authorisation shall not be given unless either—

(a) at the expiration of three months beginning with the date of service of the notice on the design right owner no agreement between the design right owner and the government department has been concluded; or

(b) before the expiration of said period the design right owner has given notice in writing to the government department concerned that no such agreement is likely to be concluded within that period.

(1B) An authorisation under this section may be given by a competent authority without compliance with subsection (1A) of this section in any case where the government department concerned.

(a) is unable to ascertain the identity of the design right owner on reasonable enquiry; or

(b) where, and for so long as, it appears to the competent authority that the disclosure of use of the design for the services of the Crown would be prejudicial to the safety of the State.

(1C) Where Crown use is made of a design, the government department concerned shall, in cases not falling within paragraphs (a) and (b) of subsection (1B) of this section, give to the design right owner such information as to the nature and extent of use as he may from time to time require.'.

Government amendments Nos. 335 to 337, 245, 249 and 157.

Mr. Butcher: New clauses 18 and 19 and amendments Nos. 335 to 337, 245 and 249 deal with the issue of how the compensation to be paid for Crown use is to be calculated, especially in relation to lost profits. That was a point raised in Committee by my hon. Friend the Member for Canterbury (Mr. Brazier) and we think that it is right that there should be compensation for lost manufacturing profit. In this respect, a rights owner will be able to claim compensation both for lost trading profit and for losses in respect of underused capital assets. Of course, any claimant must be in a position to supply the Crown from his existing capacity; he will not be able to claim losses by arguing that he could supply the Crown by building a new factory, and he will not be able to claim for further losses. For example, where a foreign Government order from the same source as the Crown, the claimable loss will not include lost profits in respect of foreign orders that go elsewhere because the Crown has gone elsewhere.

I am sure that those new arrangements will make a very significant contribution towards ensuring that the Crown user provisions do not act in any way as a disincentive to those who would invest in R and D. Unlike a number of other issues arising on Crown use, they are concerned only with the practical, economic effects of Crown use and do not depend on the nature of the property right involved. We are therefore proposing to make the necessary change in respect of design right, registered designs, and patents, which will mean that any manufacturer can be sure that he will receive fair and proper compensation, irrespective of the type of right he holds.

Another point raised in Committee by my hon. Friend was the width of the provisions on foreign defence. His point was that the Bill would allow any article to be supplied to a foreign Government wherever we had any sort of agreement with the Government concerned. Amendent No. 99 includes the words "in pursuance of", which has exercised my hon. Friend to a considerable extent, the idea being that there must be a connection between what is in the agreement and what is supplied to the Government concerned. I do however recognise that my hon. Friend may see amendment No. 99 as a case of one step forward, one step back, because it refers to "agreements or arrangements".

The inclusion of a reference to "arrangements" will cover any memorandum of understanding that we have with a foreign Government. That is unavoidable because the United Kingdom has very few formal "agreements" with other countries. In this regard, "agreements" is a legal expression and most of the United Kingdom's dealings with other countries will not qualify as an "agreement". The expression "arrangement" is therefore quite proper. However, my hon. Friend made the point that many of these "arrangements" are cast in very broad terms, without any reference to particular equipment. His argument is that, as a consequence, clause 231 will give the Ministry of Defence carte blanche to supply any equipment to those countries.

I can, however, tell my hon. Friend that the Ministry of Defence does not intend to rely on general, non-specific memoranda of understanding that do not define the equipment to be supplied. It is concerned here with the more specific arrangements that refer to particular equipment, and it would not normally expect to use the Crown use powers to supply equipment to foreign Governments without giving the rights owner prior notification, which is the key point for my hon. Friend.

I appreciate that my hon. Friend would prefer to see all that written into the Bill, but we have found it impossible to distinguish in statute between the different types of "arrangements". I must therefore ask my hon. Friend to accept what I have said about the Ministry of Defence not seeking to abuse the unavoidable width of the provision.

Mr. Julian Brazier (Canterbury): I should repeat the declaration of interest that I made to the Committee. Before I came to the House I worked as a management consultant and several of my clients were in the defence industry. However, I severed all financial ties with them when I was elected to the House.

I thank my hon. Friend the Minister for the considerable amount of time that both he and his officials have put into the area of Crown user provisions, and I welcome the introduction of new clause 18 and amendment No. 249. The House will recall that my concern with the Crown use provision in clauses 231 to 233, relating to the Crown's rights to seize design rights outside emergency situations, was that such powers accidentally strangle the goose that lays the golden eggs. Companies will invest their own money in design only if they feel that they will benefit from the results. Therefore,

I welcome new clause 18, which, as my hon. Friend rightly said, provides for a proper level of compensation if the Crown user rights are invoked, and which takes account of the loss of manufacturing profit and of unused manufacturing capacity that would result from the award of an order somewhere else.

I have two concerns and one question on new clause 18, and also one question on amendment No. 249. My view and the view of the industry, or such parts of it as I have been able to consult since new clause 18 was tabled, is that it provides adequate safeguards for the bulk of the defence industry, but I am concerned about the position of smaller companies which cannot afford to go to court to enjoy the protection that new clause 18 would give.

In particular, the small company is opened up to two weaknesses, one of which is being threatened: there is nothing to stop an official in a negotiation saying to a company, "If you don't cut your prices a bit further, we will get one of these slapped on you," in the knowledge that the company cannot afford to go to court. The other weakness is the problem of retrospective use. If, by accident, the Ministry should leak information and as a result do millions of pounds' worth of damage to a company, as the law is now drafted, it could retrospectively authorise that leak.

That is why I have introduced some safeguards in my suggested amendments. The first is in amendment No. 26, which says that a Minister must authorise use of these powers. That means that it will not be done lightly by an official. Secondly, amendment No. 27 imposes a three-month cooling-off period. Both amendments were incorporated in the Defence Contracts Act 1958, which dealt with technical information. The second provision ensures a clean break between a company and the Ministry on one hand and the point at which the powers are invoked on the other. Thus the small company can talk to its Member of Parliament, trade association and so on in the knowledge that that is next best to being able to go to court if the company cannot afford that. In amendments Nos. 28 and 29, the retrospective use of those powers is banned.

My hon. Friend the Minister more or less covered the other area of concern, which is the extreme width of the foreign defence purposes clause. Let me expand a little on what my hon. Friend said. Basically, there are two types of arrangements or memoranda of understanding between the British Government and foreign Governments. There are general ones that cover a blanket agreement to trade and can be signed at the drop of a hat by the Ministry, without consultation with industry. There are specific ones, which involve a specific agreement to supply a specific type of equipment. My concern, which is embodied in amendment No. 32, is that the Ministry should invoke those powers only in the second case where there is a specific agreement by the Ministry with the foreign power, covering a specific piece of equipment.

The Minister has assured us that, if powers are to be invoked for foreign defence purposes, the company will be given notice. Notice is worth something, but if the Minister is unable to accept amendment No. 32 I hope that he will go a little further and say that the Ministry will not invoke it without a specific agreement being entered into on that particular equipment.

If I read new clause 18 correctly, the compensation for which it provides is in addition to the small licence fee to which a company will be entitled under clause 232. I hope that the Minister will confirm that I am right. Amendment 249 deals with a completely new matter, a change to the Patents Act 1977. That was completely unexpected. Indeed, such a change was not asked for in Committee. It is a bold move and I welcome it. It will encourage companies to invest their money in projects that might lead to the issue of patents, in the full knowledge that they will enjoy the benefit of those patents. It is a good move and I strongly support it.

I understand the merits of this proposal for future agreements on patents, but I am not sure that the Ministry of Defence's flank is covered regarding past agreements. I hope that the Minister will confirm, either now or in writing, that past agreements are covered and that the Ministry will not have to pay compensation to companies for patent rights for which it has already paid under past agreements.

Abraham Lincoln, that great statesman, said that the introduction of patents into the American economy added the fuel of interest to the fire of innovation. My hon. Friend has gone to much trouble to meet my requests about design rights and he has taken a very bold step regarding patents. The defence industry will be much healthier for it. More defence companies will be willing to put their money up front. I congratulate him.

Mr. Frank Doran (Aberdeen, South): I am pleased that the hon. Member for Canterbury (Mr. Brazier) has modified his position since Committee, when he thought that the clause would

"effectively destroy our armed forces' re-equipment programme in the next century."—[*Official Report, Standing Committee E*, 16 June 1988, c. 602.]

My conversion will not be quite so dramatic.

Mr. Brazier: If the hon. gentleman looks at my words, he will see that I said that the clause unamended would do that. I tabled amendments and the Government have gone a long way towards meeting my criticism.

Mr. Doran: My conversion will not be quite so dramatic, but I welcome the compensation arrangements in the new clause.

As for amendments Nos. 14 and 15, clause 231(2) introduces an interesting element. For some years, the Government have had the power to override design right and patents in the interests of defence. They have now introduced the power to override design right for what subsection (2)(c) refers to as "Health Service purposes." The point was made forcibly in Committee that this was an interesting concept for a Conservative Government, and we teased the Minister about the effect, had such a clause been introduced by a Labour Government. It opens up the possibility of local health authorities using the powers. There is nothing to prevent them from doing so. They act as agents of a Government Department and they would be entitled to ignore the design rights of the drugs industry.

The two amendments deal with other important matters that affect the public interest—the defence of the realm, foreign defence purposes and health service purposes. It is important that the Government should also consider the use of these powers for the purpose of protecting the environment. The Select Committee on Agriculture is to publish a report tomorrow that we understand will be fairly critical of the Government's response to Chernobyl. We may in future be faced with a similar tragedy to that of Chernobyl in this country. The clause is restricted to foreign defence purposes and the

[Mr. Doran]

defence of the realm. It says nothing about civil defence purposes. I hope that the Minister will consider that issue. Purposes to protect the environment and civil defence purposes are two important issues.

I urge the Minister to let us have his views on that matter. I hope that he will also say how Health Service purposes, which he did not explain properly in Committee because he was slightly embarrassed by the points that were put to him, will work in practice.

7.45 pm

Sir Geoffrey Johnson Smith (Wealden): As I take a keen and active interest in defence matters, I hope that my hon. Friend the Minister will accept that the new clause will be welcomed by those who work in the defence industry. I have to declare an interest. I am associated with a subsidiary of Philips which is known as MEL. My interest is wider than that, as is my concern. My hon. Friend knows that considerable apprehension was felt in the defence industry about the possibility of this Bill being passed unamended. We live in a tougher and, rightly, more competitive world for defence equipment. It is only right that money that is wholly funded by defence companies should be treated as set out in the Bill.

My hon. Friend the Member for Canterbury (Mr. Brazier) expressed other concerns. He shows a deep appreciation of the need for defence and takes an active interest in this country's defence policy. We cannot expect to get everything at one go, but we much appreciate what has already been done.

Mr. Butcher: The House is indebted to my hon. Friend the Member for Canterbury (Mr. Brazier) for the work that he has done. It is almost unprecedented for a colleague in his position to change so much in so short a period. It involved two, and possibly three, Ministries. I witnessed the way that he went about it, not least in my office, but he was perfectly amenable and agreeable in the way that he put forward his arguments. He impressed two Government Departments simultaneously. I hope, however, that he will not mind if I refer first to amendments Nos. 14 and 15 that deal with civil defence and environmental protection.

Amendments Nos. 14 and 15 would add environmental protection and civil defence to the purposes for which the Crown use provisions could be activated. These are two important and worthy topics. I do not wish the fact that I shall advise the House to resist the amendments to be taken as decrying their significance. There are other significant areas that are not covered by the powers in clause 231, because defence and Health Service purposes are unique. For example, the soldier in the field needs to be completely familiar with his equipment, especially in difficult circumstances. That means that as far as possible the equipment must be uniform and instantly recognisable. If the new manufacturer cannot manufacture exactly to the old design, the service man may hesitate while working out how to use the equipment. In those vital moments of hesitation under battlefield conditions the battle may be lost. For defence purposes we need to be able to manufacture to an established design.

Similar considerations apply to the Health Service. Where health, or life and death, is an issue, there can be no compromise on design. The Health Service must have the best equipment, whether it is surgical, artificial joint replacements, or whatever. The existence of a design right covering the best equipment must not prevent the health authorities from going for the best. Important as they are, environmental protection and civil defence do not have that ultimate level of immediacy. Defence and Health Service purposes bear directly upon life and liberty in a particularly final manner. In our view, neither environmental protection nor civil defence qualify in quite the same way.

As I have been reminded repeatedly over the past few weeks, the Crown use powers represent a limitation on the rights of designers. We should not seek to limit design right except where it is necessary in the national interest, and that is the case only in defence and the Health Service and that is why the Crown use powers should be limited to those areas.

I now come to the points raised by my hon. Friend the Member for Canterbury (Mr. Brazier) and endorsed by my hon. Friend the Member for Wealden (Sir G. Johnson Smith). It is appropriate for me to record, as I did earlier, the cogency and enthusiasm of my hon. Friend the Member for Canterbury. He first made his case in Committee and I undertook to write to him and to other members of the Committee with our conclusions. I have done that on the four points he raised in Committee. I dealt with manufacturing profit in my earlier remarks and I shall now deal with the other matters in turn.

First, on ministerial authorisation, the question whether Crown use powers should only be invoked by a Minister personally, we have been persuaded that only Ministers should invoke those powers. Vigilant hon. Members will have noticed that we have not tabled an amendment on that matter. That is because that very question was dealt with when the Defence Contracts Bill, as it then was, was before the House. The view then was —and nothing has happened since to change it—that the most appropriate way of ensuring that only Ministers exercise the power is an assurance to that effect in the House. My hon. Friend has cited the resulting Act, the Defence Contracts Act 1958 as his precedent, and it would therefore be appropriate for me to deal with the matter in the same way as it was dealt with under that precedent. Therefore, we have decided, and we shall ensure that the powers in clause 231 will be invoked only by a Minister personally, and will not be delegated.

I now turn to the cooling-off period. I have to say that we cannot accept that in the form proposed by my hon. Friend. Formal invocation of the Crown powers will happen only where there is no alternative. The very urgency of which I spoke earlier will be paramount. A cooling-off period would compromise a vital need for continuous supplies in defence or the Health Service and for that reason I am not able to agree to one. Nevertheless, I appreciate that small firms in particular may be placed at a disadvantage because they are unfamiliar with the ins and outs of Crown use power. To meet that point, we have decided that, as soon as it appears that there is a need to invoke the powers set out in clause 231, steps will be taken to ensure that people concerned are aware of the rights and obligations of both sides. I cannot of course give any commitment on how far in advance of the powers being exercised this will happen, simply because the circumstances will inevitably vary from case to case.

Nevertheless, the Ministry of Defence will always endeavour to give the firm concern as much notice as

possible of its intention to use the Crown use powers. I hope that my hon. Friend will accept that assurance, which will mean that everyone will know where they stand so that negotiations can proceed on a fair and sensible basis.

Returning to my hon. Friend's point on foreign defence, I have already explained why we cannot avoid using the expression in pursuance of an agreement or arrangement. I can only reiterate that there is nothing sinister about the expression. It has been used to define the United Kingdom's dealings in statutes going back to 1949 and earlier. I have also said, and I am happy to repeat, that the Ministry of Defence does not intend to rely on general, non-specific memoranda of understanding. That is my hon. Friend's concern. It intends to consider only those arrangements which relate to specific equipment. It would expect to give rights owners prior notification if it intends to supply equipment to a foreign Government under the Crown use powers.

That is as far as I wish to go. I am sorry that my hon. Friend has at times—and he would argue, with due cause—seen my hon. Friends in other Ministeries in a particularly bleak light. He will not be surprised if I say that his views are not as justified as he may think, but I am satisfied that they will deal sensibly and responsibly if they ever have cause to use the design right Crown use powers. It is the time-honoured way of things that my hon. Friends at the MOD have not demurred in that draft.

I shall also say a few words about retrospective authorisation. My noble Friend has already given an assurance in the other place that the Crown use provisions will not be used to legitimise someone who has deliberately infringed design right. I am happy to repeat that assurance today.

As to the question whether loss manufacturing profit compensation will be in addition to payment fees for the right, the answer is yes. On compensation on manufacturing profits, my hon. Friend asked whether the payment which industry will obtain under the new clauses is additional to the payment industry will be entitled to under clause 232 or the equivalent patent or registered design provision. I am happy to assure him that it will be an additional payment and that is expressly stated in the new clauses.

Existing patent agreements fall into two categories. Where the MOD has made a settlement with a patentee manufacturer based on the use of a privately owned patent, that manufacturer will be able to renegotiate terms for all use after commencement. Where the MOD places a contract for the development of new equipment, and the contractor makes an invention with public funds, the practice is for the contractor to retain ownership. The MOD retains the right to use the invention free of charge for the services of the Government. That practice is not expected to change.

I apologise for the length of my reply, but in Committee all members of the Committee brigaded behind my hon. Friend, and the Committee expected such a reply to be forthcoming on Report.

Question put and agreed to.

Clause read a Second time and added to the Bill.

New clause 19

CROWN USE OF REGISTERED DESIGN: COMPENSATION FOR LOSS OF PROFIT

'.—(1) In Schedule 1 to the Registered Designs Act 1949 (Crown use), after paragraph 2 insert—

"*compensation for loss of profit.*

2A.—(1) Where Crown use is made of a registered design, the government department concerned shall pay—

(a) to the registered proprietor, or

(b) if there is an exclusive licence in force in respect of the design, to the exclusive licensee,

compensation for any loss resulting from his not being awarded a contract to supply the articles to which the design is applied.

(2) Compensation is payable only to the extent that such a contract could have been fulfilled from his existing manufacturing capacity; but is payable notwithstanding the existence of circumstances rendering him ineligible for the award of such a contract.

(3) In determining the loss, regard shall be had to the profit which would have been made on such a contract and to the extent to which any manufacturing capacity was underused.

(4) No compensation is payable in respect of any failure to secure contracts for the supply of articles to which the design is applied otherwise than for the services of the Crown.

(5) The amount payable under this paragraph shall, if not agreed between the registered proprietor or licensee and the government department concerned with the approval of the Treasury, be determined by the court on a reference under paragraph 3; and it is in addition to any amount payable under paragraph 1 or 2 of this Schedule.

(6) In this paragraph—

'Crown use', in relation to a design, means the doing of anything by virtue of paragraph 1 which would otherwise be an infringement of the right in the design; and

'the government department concerned', in relation to such use, means the government department who or on whose authority the act was done.".'.

(2) In paragraph 3 of that Schedule (reference of disputes as to Crown use), for sub-paragraph (1) substitute—

"(1) Any dispute as to—

(a) the exercise by a Government department, or a person authorised by a Government department, of the powers conferred by paragraph 1 of this Schedule,

(b) terms for the use of a design for the services of the Crown under that paragraph,

(c) the right of any person to receive any part of a payment made under paragraph 1(3), or

(d) the right of any person to receive a payment under paragraph 2A,

may be referred to the court by either party to the dispute.".

(3) The above amendments apply in relation to any Crown use of a registered design after the commencement of this section, even if the terms for such use were settled before commencement.'.—*[Mr. Butcher.]*

Brought up, read the First and Second time, and added to the Bill.

New clause 22

COPYRIGHT IN ACTS AND MEASURES

'(1) Her Majesty is entitled to copyright in every Act of Parliament or Measure of the General Synod of the Church of England.

(2) The copyright subsists from Royal Assent until the end of the period of 50 years from the end of the calendar year in which Royal Assent was given.

(3) References in this Part to Crown copyright (except in section 160) include copyright under this section; and, except

as mentioned above, the provisions of this Part apply in relation to copyright under this section as to other Crown copyright.

(4) No other copyright, or right in the nature of copyright, subsists in an Act or Measure.'.—*[Mr. Butcher.]*

Brought up and read the First time.

Motion made and Question proposed, That the clause be read a Second time.

Mr. Deputy Speaker: With this it will be convenient to discuss also Government new clause 23, and Government amendments Nos. 253, 254, 256 to 259 and 261 to 264.

Mr. Blair: I wish to raise just one point. This provision is obviously necessary following the separation of the Crown and parliamentary copyright. I understand that the regime is essentially that Bills will enjoy parliamentary copyright up until Royal Assent or rejection, whereas Acts of Parliament after Royal Assent will be Crown copyright. I understand that that has been done after consultation with officials from both Houses. Has the Minister received any other representations about this?

Mr. Butcher: We have received no other representations in relation to this matter.

Question put and agreed to.

Clause read a Second time and added to the Bill.

New clause 23

Copyright in Parliamentary Bills

'.—(1) Copyright in every Bill introduced into Parliament belongs, in accordance with the following provisions, to one or both of the Houses of Parliament.

(2) Copyright in a public Bill belongs in the first instance to the House into which the Bill is introduced, and after the Bill has been carried to the second House to both Houses jointly, and subsists from the time when the text of the Bill is handed in to the House in which it is introduced.

(3) Copyright in a private Bill belongs to both Houses jointly and subsists from the time when a copy of the Bill is first deposited in either House.

(4) Copyright in a personal Bill belongs in the first instance to the House of Lords and after the Bill has been carried to the House of Commons to both Houses jointly, and subsists from the time when it is given a First Reading in the House of Lords.

(5) Copyright under this section ceases—

(a) on Royal Assent, or

(b) if the Bill does not receive Royal Assent, on the withdrawal or rejection of the Bill or the end of the Session:

Provided that, copyright in a Bill continues to subsist notwithstanding its rejection in any Session by the House of Lords if, by virtue of the Parliament Acts 1911 and 1949, it remains possible for it to be presented for Royal Assent in that Session.

(6) References in this Part to Parliamentary copyright (except in section 161) include copyright under this section; and, except as mentioned above, the provisions of this Part apply in relation to copyright under this section as to other Parliamentary copyright.

(7) No other copyright, or right in the nature of copyright, subsists in a Bill after copyright has once subsisted under this section; but without prejudice to the subsequent operation of this section in relation to a Bill which, not having passed in one Session, is reintroduced in a subsequent Session.'.—*[Mr. Butcher.]*

Brought up, read the First and Second time, and added to the Bill.

New clause 24

Use of the term "patent attorney": supplementary provisions

'.—(1) The term "patent attorney" may be used in reference to a solicitor, and a firm of solicitors may be described as a firm of "patent attorneys", without any contravention of section 265.

(2) No offence is committed under the enactments restricting the use of certain expressions in reference to persons not qualified to act as solicitors—

(a) by the use of the term "patent attorney" in reference to a registered patent agent, or

(b) by the use of the term "European patent attorney" in reference to a person on the European list.

(3) The enactments referred to in subsection (2) are section 21 of the Solicitors Act 1974, section 31 of the Solicitors (Scotland) Act 1980 and Article 22 of the Solicitors (Northern Ireland) Order 1976.'.

Brought up, and read the First time.

Mr. Deputy Speaker: With this it will be convenient to discuss the following: New clause 15—*Authorised persons for purpose of acting as patent agents etc.*—

'(1) A person holding an authorisation granted by the Secretary of State under the provisions of this section is an authorised person for the purpose of carrying on the business of acting as agent for others for the purpose of—

(a) applying for or obtaining patents, in the United Kingdom or elsewhere, or

(b) conducting proceedings before the comptroller relating to applications for, or otherwise in connection with, patents.

'(2) An application for authorisation by the Secretary of State may be made by an individual, partnership or body corporate.

(3) The Secretary of State may make rules:—

(a) regulating the manner in which any such application shall be made and any authorisation granted, and providing for the withdrawal, termination or suspension of any such authorisation, and

(b) regulating the competence, professional practice, conduct and discipline of authorised persons.

(4) Without prejudice to the generality of the preceding subsection, rules under this section shall:—

(a) prescribe minimum standards of general education that must have been obtained by persons who seek to hold an authorisation,

(b) prescribe any education or training to be undergone by persons who seek to hold an authorisation,

(c) require authorised persons to take out and maintain insurance with authorised insurers, and prescribe conditions which an insurance policy must satisfy, and

(d) provide for a fund to indemnify members of the public against any losses incurred as a result of the advice or actions of authorised persons.

(5) In subsection (4), "authorised insurers" means a person permitted under the Insurance Companies Act 1982 to carry on:—

(a) insurance business of class 13 in Schedule 2 to that Act; or

(b) insurance business of classes 1, 2, 14, 15, 16 and 17 in that Schedule.

(6) Rules under this section shall be made by statutory instrument which shall be subject to annulment in pursuance of a resolution of either House of Parliament.'.

Amendment No. 18, in clause 263, page 119, line 10, leave out from beginning to 'carry' in line 11 and insert 'A person shall not'.

Amendment No. 229, in page 119, line 16, after 'patents', insert

', unless he is a registered patent agent, a solicitor, or an authorised person holding an authorisation under the provisions of section [*authorised persons for purpose of acting as patent agents etc.*]'.

Amendment No. 20, in page 120, line 1, leave out clause 265, and insert—

'(1) An individual shall not practise, describe himself, or hold himself out or permit himself to be described or held out as, or under any name, title, addition, or description which states or implies that he is, a patent agent or a patent attorney unless he is a registered patent agent.

(2) A partnership shall not practise, describe itself or hold itself out or permit itself to be described or held out as, or under any name, title, addition or description which states or implies that it is, a firm of patent agents or patents attorneys unless all the partners are registered patent agents or the partnership satisfies such conditions as may be prescribed for the purposes of this section.

(3) A body corporate shall not practise, describe itself or hold itself out or permit itself to be described or held out as, or under any name, title, addition or description which states or implies that it is, a firm of patent agents or patent attorneys unless—

(a) all the directors of the body corporate are registered patent agents or the body corporate satisfies such conditions as may be prescribed for the purposes of this section; or

(b) in the case of a company which began to carry on business as a patent agent before 17th November 1917, a director or the manager of the company is a registered patent agent and the name of that director or manager is mentioned as being so registered in all professional advertisements, circulars or letters issued by or with the company's consent on which its name appears.

(4) No individual, partnership, or body corporate shall take or use any name, title, addition or description, nor permit the use of any name, title, addition or description which states or implies that the individual, partnership, or body corporate is authorized by or is in any way connected with the Patent Office.

(5) This section is not contravened by the use of the term "European patent attorney" or "European patent agent" in the circumstances specified in section 266.

(6) A person who contravenes this section commits an offence and is liable on summary conviction to a fine not exceeding level 5 on the standard scale; and proceedings for such an offence may be begun at any time within a year from the date of the offence.'.

Government amendments Nos. 108, 284, 285, 109 and 286.

Amendment No. 228, in clause 269, page 123, leave out lines 12 to 16 and insert—

'(c) a person whose authorisation has been withdrawn, terminated or suspended;".

Mr. Butcher: New clause 24 and amendments Nos. 284 to 286 concern the use of the expression "patent attorney". At present, this term as such is not in general use in the United Kingdom, although I understand that solicitors specialising in patent matters sometimes refer to themselves as "patent attorneys", particularly when dealing with foreign clients. Patent agents are, however, currently inhibited from using the term by the Solicitors Acts, which make it an offence for an unqualified person to pretend to be a solicitor. It is arguable that the use of "patent attorney" by a non-lawyer would contravene these provisions.

As far as possible, the Bill has attempted to maintain the status quo on the use of titles by those providing patent services in the United Kingdom. However, since it was felt to be highly likely that the newly-legalised unqualified patent practitioners would, in the absence of a specific prohibition, adopt the term "patent attorney" as an alternative to the restricted title "patent agent" the Bill provides that it is to be an offence for a person who is not a registered patent agent to call himself a "patent attorney". The question whether, under the Solicitors Acts, a registered patent agent could do so is left open.

Following representations made to us by the solicitors' profession, we now realise that that approach fails in its objective of maintaining the status quo. In fact, the balance has shifted significantly away from solicitors by banning them from using the title "patent attorney". There are good reasons for allowing patent agents and solicitors to use the title. Following consultations with the professional bodies involved, that is what we have decided to do. I am pleased to say that both the professions are able to agree to the common-sense approach.

8 pm

Mr. Doran: Apparently, word is on the tapes that the Minister will be moving to another job. I congratulate him on that move and I welcome the fact that he is able to complete the Bill. When we realised who was to be his successor, it was a tremendous relief to those of us involved in the Bill that the Minister will be able to see it through.

There is serious concern about what the Government intend to do. At present, the office of patent agent is well known. It is regulated, there are strict entrance requirements and there is registration, which ensures that unregistered patent agents are an unknown concept in Britain. Obviously, solicitors can act as patent agents. After an Office of Fair Trading inquiry in 1986, the Government seemed to have accepted the recommendation that there should be deregulation in this area also. I will not say that I oppose the concept of deregulation: monopolies are there to be broken. If there was a monopoly of patent agents, I would not expect the Government to sit on their hands once the monopoly had been examined.

The Government's proposals have caused severe disquiet. There was a serious and long debate on this matter in Committee and I do not propose to rehearse all the details, because I know that we are under pressure of time. However, it is important to draw out one or two points.

One of the major reasons for breaking up any monopoly would be consumer protection. It is difficult to see that consumers will be protected by this set of proposals. The Bill prohibits the use by individuals or partnerships of the expressions "patent agent" and "patent attorney". However, that will not prevent the spread of what I regard as unscrupulous operators.

The Minister accepted that we would have a two-tier system where those who could afford it would seek the services of the fully registered and qualified patent agent or attorney and those who could not or did not want to afford them could seek advice in a sort of black market, which would be totally unregulated. The only restriction would be that those who practise in that area would not be entitled to call themselves patent agents. That is totally opposed to the interests of consumers. For that reason, we have tabled new clause 15, which would oblige the Secretary of State to seek in some way to regulate that part of the market.

We raised an analogy in Committee, and we had the benefit of the experience of my hon. Friend the Member for Great Grimsby (Mr. Mitchell), who had been heavily involved in what we might regard as the deregulation of

[Mr. Doran]

the legal profession. He made a significant contribution to the passing of the Administration of Justice Act 1985, which created the new concept of the licensed conveyancer. I took the trouble to check that Act and it is fascinating to see the difference between what is proposed for patent agents and what the Government did in 1985. For patent agents the only restriction is the inability to use the expression "patent agent". There is nothing to say that analogous descriptions such as "patent expert" could not be used. The Comptroller-General of Patents is given the power to refuse to deal with anyone who transgresses in any way.

It is important to look at the 1985 Act. There are 26 sections dealing with the regulation, training, licensing and so on of conveyancers. Patents are extremely complicated. I have had 10 years experience of conveyancing in Scotland and I know that patents are a far more complicated area than modern-day conveyancing. Yet there is to be a totally unregulated market. Individuals will be able to pass themselves off as experts and, without any prior condition, qualification, registration, licence or anything of the sort, they will be able to set themselves loose on the public.

Clause 269 (2) gives the Comptroller-General the power to refuse to deal with certain agents. It gives no redress or compensation for the victims of bad advice or inadequately drafted patents. Often, that will not become known until the damage is done. In Committee we made the point forcibly that there should be a requirement for professional indemnity insurance. The Minister rather glibly dismissed the idea out of hand, on the basis that if anyone wanted to use an unlicensed patent agent, they were entitled to do so. He did not say that it should be necessary to protect the public.

It should be borne in mind that there are other areas where it would be difficult for people to find out about bad advice and so on, until the damage has been done. For example, what about an inventor who is told by an unlicensed or unregistered patent agent that his invention is not patentable? He may accept that advice, because he has chosen to use that patent agent, but he has no redress because the Government do not seek to provide it. There are no provisions for the payment of compensation or the finding of negligence. That will not even come before the Comptroller-General because he will not be exercising supervision over what goes on in the offices.

There are serious matters of public concern, which, as I said, were forcibly and fully expressed in Committee. We seek to allay the fears and the general concern by new clause 15, which would require the Secretary of State to regulate the market. The Government have done that forcibly for conveyancers, and there is no reason why they should not do the same in this equally important area.

Mr. Butcher: The issues raised by the hon. Member for Aberdeen, South (Mr. Doran) were looked at in some detail in Committee. However, the arguments bear further examination, although the hon. Gentleman will be disappointed to know that I am no more persuaded of the strength of his arguments now than I was before.

We believe that these proposals are unwarranted and burdensome. The Director General of Fair Trading made it clear in his report published in 1986 that restrictions on those wishing to offer patent services have a detrimental effect on costs to users of the system. He found in particular that under the present system many small firms and private inventors were being deterred from seeking advice. New clause 15 and other amendments consequential to it would ensure that they would continue to be deterred by the establishment of a new burdensome regulatory procedure.

We have said that there should continue to be a register and reserved titles that will signal which practitioners have undergone practical and theoretical training and hold a certain qualification. Such practitioners will no doubt continue to offer a high standard of service, but there should also be competition and choice in the provision of patent services.

We must recognise that those who require patent services are a relatively specialised class of consumer and must surely be credited with sufficient awareness to be able to chose the type of service that they need and can afford. A balance has to be struck between the seriousness of the risks to the consumer and the disadvantages that restrictions entail. Financial risk alone is not a decisive reason for the existence of restrictions. The patents profession is not alone in dealing with complex matters; anyone can offer an architect's services, although not call himself an architect. Anyone can offer legal advice—for example, staff of the citizens advice bureaux do so every day—without being solicitors. The activity and title of accountant are also unrestricted. In such cases, the consumer decides whether to employ a fully qualified practitioner or whether his needs can be met by someone else.

The new clause and its consequential amendments do not merely seek to restrict entry. They seek also to impose rules on practitioners, including the obligation to insure and to provide for a fund to indemnify against loss. That runs directly contrary to the need to create a more competitive environment by allowing a wider range of services and a reduction in costs to develop in response to consumer demand.

Restrictions still exist on the provision of conveyancing. The hon. Member for Aberdeen, South emphasised the need to protect the consumer of patent services from the unqualified, and drew comparisons with controls in that respect. As I have said, we recognise that there are risks involved in seeking advice from unqualified patent practitioners, but we must not lose sight of the fact that patent agents are employed by those whose business, to some extent, is that of inventor. Conveyancing services are used by millions of ordinary people who cannot be expected to have an appreciation of the procedures or risks involved in taking unskilled advice. It will be for the individual practitioner to decide what protection he requires against the possibility of giving poor advice. The individuals who are most likely to benefit from the reduction in costs and the wider availability of advice are those who currently receive no advice at all. It must be for them to choose a practitioner and to decide what value to put upon the protection that he is able to offer.

Mr. Lewis Stevens (Nuneaton): Does my hon. Friend agree that many inventors will not necessarily have any great business expertise, but many have an excellent idea? They can easily be dissuaded by an unqualified person from recognising the need for a patent. I should have thought that it is necessary to differentiate much more

clearly between those who can act on behalf of ordinary people with an idea and those whose advice can be recognised as having professional status.

Mr. Butcher: I am grateful to my hon. Friend. As he will know, when we considered the issue in other contexts we usually came to the view that competition coming in from the bottom end of the profession normally has a beneficial effect. My hon. Friend talked about that class of potential users who currently may not wish to go straight to a full-blown patent agent. Many people do not get advice. We are saying that there can be a lower tier of people who do not have a formal and detailed qualification to offer advice to that group of people who most often do not seek the advice that we think they should have. We are convinced that, in this respect as in others, the consumer —in this case, the inventor—gets a wider choice and advice is more widely available to those who need it most, very often an individual inventor or a small firm.

It will come as no surprise to the hon. Member for Aberdeen, South that I am unable to accept amendment No. 20 either. The restrictions in subsection (1) of the proposed new clause are so wide that it would be virtually impossible for anybody who is not a registered patent agent to advertise the fact that patent services were available. Thus the clause would defeat our overall objective of lifting restrictions on who may offer patent services. Similar arguments apply in respect of subsections (2) and (3), which relate to partnerships and companies.

I now refer briefly to subsection (4). I cannot really see why this provision should exist. It deals with misuse of the title patent office or related words. The subject matter is already covered by section 112 of the Patents Act 1977, which is not affected by anything in this Bill. Admittedly, section 112 is framed in different and slightly narrower terms, but we have never received any representations that it is deficient and ought to be extended in scope.

For those reasons I must resist amendment Nos. 18, 20, 228 and 229 and new clause 15.

8.15 pm

Briefly, amendments Nos. 108 and 109 relate back to amendments made in Committee. They were intended to ensure that the use of words related to the protected titles patent agent and patent attorney would also be caught by the clause. We had in mind expressions such as "patent agency". Since then, we have received representations that the amended clause is still too restricted in scope. For example, it has been put to us that, even though the letters "RPA" after a person's name are the normal abbreviation for registered patent agent, as it now stands the clause would not prohibit the use of those letters by an unregistered person.

Although we do not accept that a court would necessarily take that view, it does no harm to put the matter beyond doubt, so we are making these amendments so that the clause will refer to expressions rather than just words.

Mr. Blair: We can briefly deal with this new clause, as we had a full debate in Committee. I endorse what my hon. Friend the Member for Aberdeen, South (Mr. Doran) said. We are not against ending the monopoly for patent agents. We are simply concerned to ensure that those who have ideas and may hold themselves out to people as patent experts and patent consultants have some minimum qualifications. The Minister drew an analogy between the staff of citizens advice bureaux and patent experts giving advice. It seemed to be entirely beside the point. Staff of citizens advice bureaux make it absolutely clear that they are giving an informal service. They do not hold themselves out as experts.

Yet, under the provisions of the Bill, if the Opposition's new clause is not accepted, someone can say that he or she is a patent expert or patent consultant, but have no qualifications, no training whatsoever, no indemnity insurance, and absolutely no regulations whatsoever covering them in the conduct of their business. That seems to be wrong. A much better analogy is licensed conveyances. There should be an open, competitive market, but it should be subject to basic rules of protection for the consumer. Our new clause 15 gives such rules and protection, and the Government do not. I ask my hon. Friends to support our new clause in the Division Lobby tonight.

Question put and agreed to.

Clause read a Second time, and added to the Bill.

New Clause 15

AUTHORISED PERSONS FOR PURPOSE OF ACTING AS PATENT AGENTS ETC.

'(1) A person holding an authorisation granted by the Secretary of State under the provisions of this section is an authorised person for the purpose of carrying on the business of acting as agent for others for the purpose of—

(a) applying for or obtaining patents, in the United Kingdom or elsewhere, or

(b) conducting proceedings before the comptroller relating to applications for, or otherwise in connection with, patents.

(2) An application for authorisation by the Secretary of State may be made by an individual, partnership or body corporate.

(3) The Secretary of State may make rules:—

(a) regulating the manner in which any such application shall be made and any authorisation granted, and providing for the withdrawal, termination or suspension of any such authorisation, and

(b) regulating the competence, professional practice, conduct and discipline of authorised persons.

(4) Without prejudice to the generality of the preceding subsection, rules under this section shall:—

(a) prescribe minimum standards of general education that must have been obtained by persons who seek to hold an authorisation,

(b) prescribe any education or training to be undergone by persons who seek to hold an authorisation,

(c) require authorised persons to take out and maintain insurance with authorised insurers, and prescribe conditions which an insurance policy must satisfy, and

(d) provide for a fund to indemnify members of the public against any losses incurred as a result of the advice or actions of authorised persons.

(5) In subsection (4), "authorised insurers" means a person permitted under the Insurance Companies Act 1982 to carry on:—

(a) insurance business of class 13 in Schedule 2 to that Act; or

(b) insurance business of classes 1, 2, 14, 15, 16 and 17 in that Schedule.

(6) Rules under this section shall be made by statutory instrument which shall be subject to annulment in pursuance of a resolution of either House of Parliament.'.—*[Mr. Blair.]*

Brought up, and read the First time.

Motion made and Question put, That the clause be read a Second time:—

Mr. David Maclean.

Question accordingly negatived.

New clause 20

RECORDINGS OF FOLKSONGS

'.—(1) A sound recording of a performance of a song may be made, for the purpose of including it in an archive maintained by a designated body, without infringing any copyright in the words as a literary work or in the accompanying musical work, provided the conditions in subsection (2) below are met.

(2) The conditions are that—

(a) the words are unpublished and of unknown authorship at the time the recording is made,

(b) the marking of the recording does not infringe any other copyright, and

(c) its making is not prohibited by any performer.

(3) Copies of a sound recording made in reliance on subsection (1) and included in an archive maintained by a designated body may, if the prescribed conditions are met, be made and supplied by the archivist without infringing copyright in the recording or the works included in it.

(4) The prescribed conditions shall include the following—

(a) that copies are only supplied to persons satisfying the archivist that they require them for purposes of research or private study and will not use them for any other purpose, and

(b) that no person is furnished with more than one copy of the same recording.

(5) In this section—

(a) "designated" means designated for the purposes of this section by order of the Secretary of State, who shall not designate a body unless satisfied that it is not established or conducted for profit,

(b) "prescribed" means prescribed for the purposes of this section by order of the Secretary of State, and

(c) references to the archivist include a person acting on his behalf.

(6) An order under this section shall be made by statutory instrument which shall be subject to annulment in pursuance of a resolution of either House of Parliament.—*[Mr. Butcher.]*

Brought up, and read the First time.

8.30 pm

Mr. Norman Buchan (Paisley, South): I beg to move, That the clause be read a Second time.

Mr. Deputy Speaker: With this it will be convenient to take the following: New clause 21—*Parody in folk material*

"The publishing of a song in print or a sound recording does not infringe any copyright, where the words of the song are totally or substantially different from the original, the authorship is unknown, and the publishing is in connection with the study or dissemination of contemporary folk-lore.'.

Amendment No. 252, in page 152, line 1, at end insert—

'Recordings of folksongs

6A.—(1) A recording of a performance of a song may be made for the purpose of including it in an archive maintained by a designated body without infringing any of the rights conferred by Part II, provided the conditions in sub-paragraph (2) below are met.

(2) The conditions are that—

(a) the words are unpublished and of unknown authorship at the time the recording is made.

(b) the making of the recording does not infringe any copyright, and

(c) its making is not prohibited by any performer.

(3) Copies of a recording made in reliance on sub-paragraph (1) and included in an archive maintained by a designated body may, if the prescribed conditions are met, be made and supplied by the archivist without infringing any of the rights conferred by Part II.

(4) In this paragraph—

"designated body" means a body designated for the purposes of section *(Recordings of folksongs)*, and

"the prescribed conditions" means the conditions prescribed for the purposes of subsection (3) of that section;

and other expressions used in this paragraph have the same meaning as in that section.'.

Mr. Buchan: I owe a debt of gratitude to the Department of Trade and Industry. I apologise for not being involved in the Bill at an earlier stage—to some extent I should have been. The response that I received from the Department of Trade and Industry did not go as far as I should have liked, but if the new clause is accepted it will create a modus vivendi for those concerned with copyright.

I support the case for the individual artist's remuneration and moral rights, whether he be a writer or a musician but we are dealing with material that is or should be in the public domain and which, if it is unamended, may create difficulties if the copyright laws are applied too strictly. I am seeking to create not a loophole but a modus vivendi for serious researchers, serious collectors and, where possible, for the dissemination of information and material to interested and involved people.

It might be useful to describe the material that will be affected. All folk material is derivative and imitative. Bronson printed 200 tunes for "Barbara Allen". They are all recognisable as Barbara Allen tunes but different variants are equally recognisable as separate variants. No one copyrighted "Barbara Allen" material: it was mentioned as long ago as the 1660s when Pepys heard what he called the "little Scotch ballad of Barbara Allen".

The problem facing the contemporary collector of such material, or someone who wishes to write about it, as I have, is that since the time of Pepys and all the early collectors—Bishop Percy and others—copyright has been developed. If a man hears a tune now, learns it and writes other words to it, as I and others have done, he faces a problem if the tune is copyrighted. Sometimes the material is such that the dissemination of it, if it were disseminated let alone collected, would not cause the composer much fear. A sea-song from the last war goes as follows:

"My job is to clean a naval latrine,
I'm the man with the plan for the pan that everyone uses."

Hon. Members might guess that is the beginning of the tune, Beguine the Begin. I do not think that Cole Porter or

[Mr. Buchan]

whoever wrote it would be worried that the tune has been published in a book of seamen's songs, some of which are serious and some funny.

Doctor Ian Russell of the *Folk Song Journal*, in a paper called "Parody and Performance", found that he would be charged quite a lot of money for a publication that would not raise much. He intended to print the tune with a parody of "Show Me the Way to Go Home" but, because the tune was copyright, he was to be charged.

How do we cope with the problem of making parodies of tunes that are copyrighted? We argue that parodies are a part of the public domain and of our contemporary heritage. Some of them are funny and some are bawdy, but nevertheless they are a means of repeating what people said. I was reminded of Hamlet talking to the players, when he said:

"let them be well used; for they are the abstracts and brief chronicles of the time: after your death you were better have had a bad epitaph than their ill report while you live."

I remember an incident not long ago, which hon. Members may also remember, in which one of the verses went:

"For there was a Tory and a Ryebuck Red,
Fighting out the Cold War in Christine's bed."

Some hon. Members may recall the incident that it described.

Parodies are used to comment because it is important to know what people are commenting about. Hon. Members will be aware of the well-known children's song:

"Now the war is over, Hitler he is dead,
He went to Heaven with a pain in his head.
The Lord said, 'No, you'll have to go below—
There's only room for Elvis and his wee banjo.'"

Another parody says:

"Now the war is over, Vaseline's dead."

I puzzled for some time as to what was meant by vaseline. Of course, Hitler is remembered, but Mussolini is completely forgotten.

We had to seek means by which material could be disseminated because of the greater consciousness of copyright as a result of this Bill, and the greater importance of the moral rights of the person who does not want his material to be used, and even has the ability to intervene to prevent matters being commented on by its use in another way.

I suspect that new clause 21 will be opposed. I talked to the copyright bodies and said that as the clause was imperfect I expected that it would be opposed. It sets out what we should like to establish in one form or another so that we can publish a song, whether it be a children's song or a seaman's; where the words of a song are substantially or totally different from the original, when the authorship is unknown and the publication is in connection with the study or dissemination or contemporary folklore.

I do not think that new clause 21 will be accepted. I recognise that the inclusion of the word "dissemination" will worry the copyright bodies. I hope that they will recognise that when a work such as "Grey Funnel Lines" is published it should become part of the public understanding and within public view.

I am reminded of an older song, which says:

"Hark the herald angels sing,
Mrs. Simpson's pinched our King."

I move the new clauses and amendment so that such material can be preserved, remembered and pass into our history.

Mr. Andrew F. Bennett (Denton and Reddish): I join my hon. Friend the Member for Paisley, South (Mr. Buchan) in supporting the new clauses and the amendment. I apologise to the House for coming rather late to the debate. I was made aware by my wife, who is a member of the Folklore Society, of the concerns about the recording and copyrighting of material.

I am concerned not only with the folksong and the parody, but with the song, the dance, the folk tale, the traditional play, the urban legend and matters such as herbal remedies, children's rhymes, Xerox jokes that are printed on many copying machines and even graffiti. That is all traditional material, but it belongs to people rather than the individual. The first concern is how far one individual can secure copyright for material simply because he records it.

Traditional material feeds on what is clearly copyright material. Songs are parodied. A most obvious example is the way in which children use jingles from television advertisements and put new words to them. I suspect that none of the television companies or advertisers would mind in the slightest, although sometimes the jingle becomes fairly derogatory to their product.

The worry is that, if somebody parodies or uses material in some new form, he may become liable to a charge under copyright law. Because material is in the public domain, it is difficult for anyone to demand a fee for its use. No one will accuse a group of children singing a song in a street of taking the tune for their song from a television jingle, and it is unlikely that anyone will raid a public house where folk singers are performing a song for which they have taken the turn from recently published copyright material and put a parody to it. It is not worth anyone pursuing them at that point, even if the folk singers are being paid a small sum or are taking a collection.

The problem arises when someone records the material in some form. An example is to be found at party conferences—for Labour it is the Red Review, but I am not sure what the Tory review is called. Those reviews almost always use popular songs and send up various political figures to their tunes. I do not suppose that anyone would chase for the copyright of a tune at that point, but an excerpt may then be shown on television or recorded in some form. It is at that point that people may start to pursue a royalty on the material.

The importance of the new clause is that it makes it absolutely clear that if people record material either in written or in taped form, they should not be liable; they are the people who would be pursued for a royalty.

There is a slight question mark in my mind about whether, if there is an academic study, and material is recorded, its nature is changed. That is my reservation.

I look forward to hearing what the Government have to say. I hope that they will assure use that the Bill will not make it easier for an individual to steal a copyright on material that is in general circulation and that, when people take material in the general public domain, adapt and alter it, and do not normally make any money from it, there will not be restrictions and difficulties for those who wish to record the material either in taped or written form.

Mr. Butcher: I am pleased to say that the Government are able to go some of the way towards meeting the worries expressed by the hon. Members for Paisley, South (Mr. Buchan) and for Denton and Reddish (Mr. Bennett).

It appears to be de rigeur to think of a piece of material that may be relevant here. I can only commend an alternative version of the Rubáiyát of Omar Khayyám to this gathering. I especially commend it to parliamentary draftsmen who once every two decades come forward with a Copyright, Designs and Patents Bill. It goes something like this:

"The moving finger writes and having writ, moves on and writes another bit."

The difficulty is that in the House we appear to be writing more and more bits with greater and greater frequency, but in this case I believe that our boulder in the avalanche of legislation which some say afflicts the House is important.

One can argue that, infrequent as these Bills are, we should get them right. It is with that objective in mind that I hope that Opposition Members will confirm that this has been as close as one can get to an exercise in open government by way of open doors, open to ideas, close relationships and advice from officials in the Department of Trade and Industry and hon. Members of all parties. This trio of new clauses and amendments comes into that category, and I believe that, although I can accept two, and have to resist one, they benefit from a free and open exchange of views.

In this country we have always celebrated events of both national and personal importance in song. From the balladeer of the medieval court to the songs heard today at a rugby match, folk music provides a lively guide to our social development. However, many of our modern folk songs consist of new words being fitted to existing copyright music and that can cause problems for those who want to research and collect folk music.

I do not think that these problems are as severe as the hon. Member suggested. The Bill already allows fair dealing with musical works for the purposes of research, private study, criticism or review. However, we accept that there is a difficulty in relation to the making of sound recordings of performances of the folk versions of the copyright music.

8.45 pm

New clause 20 provides a way round this difficulty. It is a new exception to copyright which, together with amendment No. 252, its corresponding exception in schedule 2, I am happy to accept. The clause will allow recordings of performances of songs to be made for the purpose of inclusion in an archive maintained by a designated body without infringing the copyright in the words or music. This is, however, subject to several conditions which will safeguard the interests of composers, lyricists and performers. The practical effect is that only the copyright in the music is overriden and for a very limited purpose.

Subsequently, anyone requiring a copy of the recording for the purpose of research and private study will be able to obtain it from the archivist. I believe this is a reasonable exception to copyright that will result in an archive providing a useful insight into our social history.

Unfortunately, I cannot be so accommodating about new clause 21.

Mr. Wigley: There is obviously some inspiration behind the wording of new clause 20. Am I right to say that, although the title is "Recordings of folksongs" the definition of folk songs is broad? The new clause relates not only to folk songs, but to anything that falls within the definitions that we have here.

Secondly, will the Minister confirm that the designated bodies will be wide-ranging enough to take in the bodies that exist in Scotland, Wales and Ireland, as well as in England, that involve themselves in those activities?

Mr. Butcher: I am 90 per cent. sure at this stage that the answer to the hon. Gentleman's second question is yes. I will do my best to discharge an obligation to reply to the hon. Gentleman's first point before I resume my seat. In the interim, I will continue with my observations on new clause 21.

Mr. Andrew F. Bennett: I understand that suggestions have been made to the Minister about who the designated bodies will be. My only slight reservation is that several of the designated bodies have put together collections which were made by individuals. Those designated bodies would not have such good collections but for the work of individuals in the past. The slight reservation is that there are private individuals who have put together a collection which, in the future, will become a valuable archive. It appears that they are excluded from new clause 20, which is being accepted. Has the Minister any observations on that?

Mr. Butcher: Again, I will attempt to give the hon. Gentleman satisfaction before we complete this debate. There are several examples of individual collections being incorporated in national archives. That is a trend which we all want to be consolidated and enhanced. I hope that my reply supports what is the universal objective of the House.

New clause 21 goes far beyond the archival exception that I have just explained. It could seriously affect the legitimate interests of copyright owners. It would allow the publication of books and records of any song, providing that the words were different from the original. There are safeguards, but I do not think that they are adequate. The clause says that the author of the words must be unknown and that the publishing has to be in connection with the study or dissemination of contemporary folklore. That would, however, open the way for the commercial exploitation of music without any control by, or payment to, the owner of copyright in the music. A record company could, for example, claim that it was merely disseminating folklore if it were to become aware of an anonymous set of words having been put to some already popular music, and were to issue a professionally produced sound recording of that version. It would clearly be quite wrong to deny the writer of the original music any say in that.

While I realise that new clause 21 is motivated by a genuine concern to allow the research and dissemination of folklore, it would take away the basic rights of the copyright owner to an unacceptable degree and would be incompatible with our obligations under the Berne convention.

New clause 20 and the existing provisions ensure that those genuinely involved in folk music research can collect and maintain archives of such music and can report the results of their research without infringing copyright. To take the exception any further would undermine the legitimate interests of composers and, at this late stage, I regret that I must ask hon. Members not to press new clause 21.

[Mr. Butcher]

As regards the definition of "folk song", which was the issue raised by the hon. Member for Caernarfon (Mr. Wigley), there is no definition, because it covers any unpublished anonymous words set to copyright music whether or not it would be called folk song. Therefore there is no need to refer to "folk song" in the clause, because it would not add anything to the identification of what is covered. However, it is useful to refer to folk song as a shorthand in the title of the clause. That title will have no legal effect. It is merely a signpost.

I hope that hon. Members are satisfied, but I should point out to the whole House that there is a tradition which was established in Committee that hon. Gentlemen who wish to have a question answered immediately are obliged to stand up and make a not-too-lengthy intervention while the answer is prepared.

Mr. Buchan: In that case, I shall try to oblige the Minister and to give the House a little help. First, I congratulate whoever suddenly produced the definition of folk song as not being amenable to definition. That is absolutely right. My shelves are full of definitions, none of which can totally agree because they all become restrictive. It is rather like the story of Attlee replying to an organisation set up in, of all unlikely folk bodies, the Labour party—which if hon. Members recall, should not set up other organisations. Nobody could define what was meant by an organisation, so he said, "Well, we cannot define an elephant but we can recognise it when it comes through the door." In reply Zilliacus then told the famous story of the plague of rabbits in the Ukraine. All the rabbits poured over the border into Poland and the Polish rabbits said, "What are you running away from?" The other rabbits said, "They have declared a purge on all camels." The Polish rabbits said, "But you are rabbits". The other rabbits replied "Have you tried proving that to the OGPU?" That shows that what is available is always amenable to one's own definition.

I should like to make two points. First, the Minister has been slightly over-restrictive, which was unfortunate. We have no intention of opening any loopholes, and I do not believe that the new clause would do that. I can understand that, as with the definition of folk song, this definition might seem to open up a loophole, but that is most unlikely. Even in dissemination, if the song had been printed in a particular book about the man who cleaned the latrines, it would not have given Cole Porter a sleepless night. There can be a modus vivendi and the best thing that we can do is to have a chat with the copyright bodies—I intend to do that—to see what will happen.

Secondly, nothing more pleases some people who write songs than to write a song and then find, as I found recently, that it is being sung as traditional. Although that deprived me of my copyright fees, I was pleased that it passed as traditional—once in a learned book and then on a disc, so in the end I was quite pleased that it happened.

The classic case is that of a song of the last war, "Those D-day dodgers"—we now know who wrote it—which then became in every other way a folk song. I was in the 8th Army and we all knew the song long before I met the man who wrote it, Hamish Anderson. It contained some beautiful lines about Nancy Astor:

"Dear Lady Astor . . .
England's sweetheart and her pride,
We think your mouth's too bloody wide."

That was from the D-Day Dodgers way out in Italy.

I should now like to make a serious point because I think that the Minister will have collected his thoughts by now. I want to talk about private collectors and their collections in relation to organisations. I hope that we can put our heads together about the organisations, including obviously, the School of Scottish Studies, Cecil Sharp house and the institute in Sheffield. In addition to those bodies, many academic bodies, including most polytechnics and universities, have cultural curricula and institutions of some kind. I hope that all those fall within the scope of the provisions.

The individual collector and the individual singer is almost always involved. For a long period I could hardly exist because of young people knocking at my door, looking for words and tunes, when the folk song revival was taking place. Similarly, almost all people connected with this would want to involve themselves with those bodies. All that we need to do is to help those wishing to sing or learn such material to associate with one of the bodies.

The final point I should like to make—unless the Minister is now ready to reply before I come back to withdraw my amendment——

Mr. Butcher: The position on private collections is that we cannot legislate retrospectively to make those collections legal if they are not legal at the time the recordings were made. However, in many cases, copyright owners will give permission for their music to be dealt with in that way. For the future, private individuals will be able to make recordings without seeking permission in order to put the recordings in an archive. I hope that that answer is helpful to the House.

I heard what the hon. Gentleman said about future negotiations and about seeking clarification. However, I hope that for the time being the House will be satisfied if I repeat that I am perfectly happy to endorse and support new clause 20 and amendment No. 252. Unfortunately, for the reasons I have given, I cannot support new clause 21. I believe that the House has found a more or less agreeable modus vivendi.

Mr. Buchan: I will, of course, withdraw new clause 21 partly because I would lose it in any case, but partly because it is imperfect. I hope that, when thanking me for withdrawing it, the Minister will say that he would find it useful if we discussed it with the copyright bodies, and that he might go so far as to say that he hopes that the copyright bodies will have equally open minds when we discuss the kind of modus vivendi. It would help me if the Minister would say so.

Mr. Butcher: Yes, that would be perfectly feasible. I hope that I have recorded the thanks of the House and my Department for the hon. Gentleman's work. A major constituency has an interest in these issues and if my earlier remarks were not interpreted as an appropriate acknowledgment of the hon. Gentleman's work I apologise to him because it is most certainly acknowledged.

Question put and agreed to.

Clause read a Second time, and added to the Bill.

Clause 6

BROADCASTS

Amendments made: No. 33, in page 3, line 31, leave out 'generally'.

No. 34, in page 3, line 32, at end insert

'or the person providing the contents of the transmission'.

—[Mr. Butler.]

Clause 7

CABLE PROGRAMMES

9 pm

Miss Emma Nicholson (Torridge and Devon, West): I beg to move amendment No. 321, in page 4, leave out lines 19 to 26.

The purpose of my amendment is to ask the Government why they do not intend to provide adequate protection for the part of computer software that is known as interactive or expert or knowledge-based systems. In Committee the Minister said that these were excluded from the protection provided by the clause because such communications were private. I challenge that thinking on three counts and ask the Minister how else he intends to protect this valuable and fast-growing area of computer software work.

First I shall deal with the question of privacy. If it is accepted that such communications are private—and I do not accept that premise—why should privacy and protection be seen as incompatible? It could be said that correspondence on paper between two people is private, but such letters are protected. The author of a letter holds the copyright and the recipient cannot publish without the author's consent. Where a computer system encodes, transmits and displays a letter, why is that letter excluded from copyright protection when one manually scripted or typewritten on to paper, transported by the Post Office and opened on arrival at its destination has copyright protection?

Electronic mail cannot be considered to be private because one may walk into any office and see the recipient's mail or messages on screen for all to see. We do not wish to see the exclusion of expert systems. What is an expert system and why does it need protection under this law? An expert system is one in which the system, or rather the database making up the system, is self-modifying in response to external interrogation and data input. This adaptive feature explains another system name—knowledge-based—although of course it is not the system that is knowledgeable but the team of software designers and programmers that has created it.

What are the practical applications of expert systems and how will those applications be threatened by exclusion from the clause? An easy example is the airline reservation system. Without my amendments, clause 7 would ensure that computer hackers—the catchphrase for unwanted electronic breaking and entering—are not prosecutable under copyright law. If the hacker were a bucket shop operator he could obtain valuable information on the availability of airline seats to be used commercially without investment in the reservation system.

A medical diagnostic database is available to doctors on-line. That means it is open all the time to communication. It is altered by the data put into the network and those data affect the response to the next interrogation. Such a network is at present excluded by clause 7(2)(a) from being a cabled programme service and thus excludes the information being conveyed on the network from the protection given to information conveyed on a licensed cable programme service. Why should it be protected through copyright? The European Green Paper on copyright and the World Intellectual Property Organisation, which is known by the comfortable name of WIPO, although I am not sure whether it means wipe it on or wipe it off, suggest that copyright is the most suitable law to protect against copying for computer programs. I suggest that as this is recognised by nearly all our trading partners, and as our industry has to operate in the real world, this is the way forward.

I cannot resist commenting on a powerful article in last Thursday's *Financial Times*. It suggested that a special legal framework should be created for computer software. However, the European Green Paper published on 1 June says that author's rights and neighbouring rights are the primary means of protecting computer programs, both at the level of Community member states and at international level, and that copyright is the best way of ensuring adequate protection programs against unauthorised reproduction.

In 1983 the World Intellectual Property Organisation said at a discussion meeting that the special treaty giving sui generis protection, which the organisation had identified in 1979 as the way forward, should no longer be pursued. It said that instead, WIPO and UNESCO, the two bodies responsible for the main international copyright conventions, should study further software copyright protection. The result was that in 1985 its committee of Government experts showed that, by that time, copyright protection for computer software existed in the most industrialised countries and in nearly all the European Community member states. We have now advanced to the possible European Community draft convention which will be at least partially, if not wholly, based on the Bill.

Perhaps it is because of all these things that through the amendment I ask the Minister to explain the exclusion of expert systems and reassure the computer software industry that the totality of its work is within copyright protection through the Bill.

Mr. Butcher: I am grateful to my hon. Friend the Member for Torridge and Devon, West (Miss Nicholson) for providing the opportunity for me to make a clarifying statement. I understand that the amendment is intended to ensure that interactive cable services are not excluded from copyright protection. We have put considerable effort into devising a definition of cable programme service in the Bill that will cover the elements of an interactive service, in which sounds, images or other information are conveyed to the user without any modification by him, but which will exclude the elements that are genuinely interactive, in the sense that input from the user modifies what is contained in or sent through the system.

The reason for that approach is that, while we obviously want the definition to cover all the elements of a database, for example, that are capable of purely passive reception—even though the system may be capable of being used interactively—it would not be right to bring within copyright control those elements that are essentially private communications between a single user of the service and the provider of it.

[Mr. Butcher]

Thus, with teleshopping through Prestel, we want to cover the display of catalogue pages, but not the placing of orders. With a medical diagnostic service, we want to cover the sending of information to the user, but not the act of inputting data by the user. I am confident that the definition that we now have in the Bill, which we dealt with at some length in Committee on 12 May, provides the best answer that we can hope for at this stage.

My hon. Friend is admirably persistent in these matters, so may I say that if I am wrong and the definition, when tested in the real world, turns out to be deficient, we have the possibility of putting matters right through an order under subsection (3). However, to remove subsection (2)(a) from the Bill altogether would bring within the controls of copyright a variety of private communications that should remain free of them. I must therefore ask my hon. Friend to withdraw the amendment in the knowledge that she will at least have an insurance policy.

Miss Emma Nicholson: With that assurance from the Minister, I beg to ask leave to withdraw the amendment.

Amendment, by leave withdrawn.

Amendments made: No. 35, in page 4, line 23, leave out 'material' and insert 'information".

No 36, in page 4, line 32, leave out from 'for' to 'and' in line 33 and insert

'purposes internal to the running of the business and not by way of rendering a service or providing amenities for others,'. —*[Mr. Butcher.]*

Mr. Page: I beg to move amendment No 265, in page 5, line 4 leave out

'premises run as a business' and insert 'any premises'.

I am moving the amendment in the unavoidable absence of my hon. Friend the Member for Beaconsfield (Mr. Smith), and I do so for the purposes of clarity. The amendment makes it clear that cable services operated as part of the amenities provided for the residents or inmates of any premises are not exempt from the Bill, regardless of whether the premises are run as a business—for example, a private apartment block—or are publicly funded—for example, prisons or hospitals. No distinction should be made between the different premises that use cable services. The amendment is self-explanatory, and I look forward to the Minister's reply.

Mr. Butcher: The amendment would bring within the definition of "cable programme service" a closed-circuit cable system operated as part of the amenities for residents and inmates of the premises that are not run as a business. My hon. Friend gave the obvious example of a cable system in a public sector hospital or a prison.

I am sorry to have to disappoint my hon. Friend, but I have to say that the amendment is not acceptable to the Government. We do not consider that a cable system in the special circumstances of a hospital or a prison, to take the examples to which I referred, can be put on the same footing as a cable programme service offered to the public in general.

The inmates of both hospitals and prisons have one thing in common: they are not there by choice. If they watch videos on an internal cable system, it is for the most part a straightforward substitute for watching a video recording or television broadcast at home, which circumstances have deprived them of the opportunity to do. In prisons, particularly, there are security reasons for preferring to show videos on a closed-circuit system rather than by the traditional use of television sets and video recorders.

We accept that in premises run for profit, a closed-circuit cable system may exploit copyright material in a way which will result in financial benefit to the operator. For that reason it is right that such systems should be subject to the controls of copyright, and that goes as much for a hospital run for profit as for any other kind of premises.

In non-commercial premises, cable systems will generally, as I have said, be a substitute for domestic television or cable reception. It is therefore right that they should be no more caught by copyright law than is watching a television at home. If, in the future, it can be shown that this exception is being abused and the interests of copyright owners unfairly damaged, the exception could, if necessary, be amended by an order under clause 7(3).

In common with my hon. Friend the Member for Torridge and Devon, West (Miss Nicholson), my hon. Friend the Member for Hertfordshire, South-West (Mr. Page) also has a fall-back position and insurance policy. In the light of what I have said, I hope that he will be willing to withdraw his amendment.

Mr. Page: I was unaware that prisoners in Her Majesty's prisons were forced to watch videos and various programmes that come through cable services. In view of my hon. Friend's startling revelations, I am forced to withdraw my amendment.

I am happy to note that under subsection (3) there is opportunity for an order to be introduced if it is discovered that prison inmates can watch various programmes voluntarily.

I beg to ask leave to withdraw the amendment.

Amendment, by leave, withdrawn.

Clause 11

First ownership of copyright

Mr. Austin Mitchell (Great Grimsby): I beg to move amendment No. 3, in page 6, line 22, at end insert

'except that where a literary, dramatic or artistic work is made by the author in the course of his employment by the proprietor of a newspaper, magazine, or similar periodical under a contract of employment, or apprenticeship, and is so made for the purpose of publication in a newspaper, magazine or similar periodical, the said proprietor shall be entitled to the copyright in the work in so far as the copyright relates to publication of the work in any newspaper, magazine or similar periodical, or to reproduction of the work for the purpose of its being so published; but in all other respects the author shall be entitled to any copyright subsisting in the work.'.

Mr. Deputy Speaker: With this it will be convenient to discuss amendment No. 4, in page 6, leave out lines 20 to 22 and insert—

'(2) Where a literary, dramatic, or artistic work is made by an employee in the course of his employment, his employer is the first owner of any copyright in the work, subject to:—

(a) any agreement between the parties or their representatives

(b) the application of sections 76 to 88 inclusive (Moral Rights).'.

Mr. Mitchell: I declare an interest as a member of the National Union of Journalists and also as a journalist. Sometimes that word is put in inverted commas when I am so described.

The amendment is about the balance of power between working journalists and the proprietors of newspapers. We believe that with the unamended clause 11 the Government are shifting that balance of power unjustifiably towards the proprietors. Why the Government are acting thus escapes us, but it must be connected in some way with their general generosity to newspaper proprietors—a generosity which is, in the main, applied to get a press amenable to the Government. We have a press whose only concession to balance is to use slightly less glowing adjectives in their panegyrics about the Prime Minister.

The press has been larded with honours by this Government—usually in inverse ratio to the quality of the papers. We have had Sir Loin of Lamb, Sir David English, Lord Matthew of Whelks and Lord Stevens. It must be rather frustrating to the Government that they cannot confer a title on Lord Murdoch of Wapping Breasts, Lies and Sex Scandals, simply because he is an Australian.

The Government want to keep the press sweet and favourable to them. That is the only motive that we can see for shifting the balance of power towards the proprietors and against working journalists. Before clause 11 was introduced, the law was set out in clause 4 of the Copyright Act 1956. That law referred to

"Where a literary, dramatic or artistic work is made by the author"—

or photographers, who are also concerned about clause 11—

"in the course of his employment by the proprietor of a newspaper, magazine or similar periodical under a contract of service or apprenticeship, and is so made for the purpose of publication in a newspaper, magazine or similar periodical"

In all other respects, copyright was retained by the author.

The NUJ wanted that original law tightened to restrict the proprietor's rights to staff journalists and to periodicals under his ownership. That tightening of the law would have brought us into line with the legal position as it prevails in most of Europe. However, the Government went the other way and they amended their proposals in the House of Lords to make the proprietor the first owner and to give him unfettered right of exploitation everywhere, including databases, which are becoming increasingly important.

The journalist's work is creative and should be the intellectual property of the creator. It should not be liable to wholesale exploitation without reward for or acknowledgment of the journalist who created it in the first place. In the act of creation, he brings his skills and abilities to bear and his name is used, all to enhance the sales and revenues for the proprietor. To take away from such people their rights over what they have created robs them of their reputation, skills and efforts and dedicates them all to the greater glory and income of the proprietors. In other words, it creates much the same relationship between journalists and proprietors as existed between serfs and their masters in 19th century Russia. Journalists get slightly higher expenses than were paid to serfs in 19th century Russia, but if their rights over their intellectual property are taken away in this fashion they will operate in the same sort of relationship.

9.15 pm

In Committee, the Government rejected all our efforts to enlarge journalists' rights. These amendments seek to retain the dignity accorded them by the Copyright Act 1956. We can see no justifiable reason why the Government should take away the rights conferred in that Act and change them in the way in which they appear in clause 11. Unless we return to the position under the 1956 legislation, journalists will effectively be robbed of all their rights when their intellectual property is used in books, broadcasts and databases. It is essential to allow them to retain their rights over all those uses.

The Opposition are adopting an essentially conservative role. We are advocating the preservation of the status quo. What is the Government's case for this monstrous, inexplicable and so far unexplained usurpation of journalists' rights? We know that the usurpation is subject to any agreement to the contrary, but surely no group of employed journalists is in a position to negotiate an agreement to the contrary. We propose to redress the balance in a relationship that is inevitably dependent to give journalists a platform on which to stand, by having rights within that relationship over their intellectual property.

Mr. Foot: Like my hon. Friend the Member for Great Grimsby (Mr. Mitchell), I must declare an interest as a member of the National Union of Journalists, although, like him, I cannot exactly calculate how much my income would be affected if the clause were passed. My hon. Friend put the case so strongly that I believe that it is possible to make this debate a short one.

The Government and the Minister should be aware of how strong is the feeling of outrage among journalists throughout the country at the Government's proposal. Even at this hour we hope the Government will be prepared to change their mind. I have listened to the Minister for most of the day, although I did not have the special opportunity of hearing him in Committee. He has sought to present himself as being in an appeasing mood. He has accepted opposition amendments and tried to create a perfectly emollient atmosphere. That is the best course for the Government to take, from their point of view, especially as they are trying to get through a Bill of this nature in this time.

It is quite improper that the Government should have introduced such a major Bill with so many ramifications that affect free speech and the rights of journalists and others in this way. It was wrong to introduce it in another place. Now, in the last week of Parliament, we are landed with a great disability. The possibilities of getting through sensible amendments are greatly diminished by the way in which the Government have done things. They have crammed in a long list of amendments at this stage. Some of them, admittedly, are formal, but it is quite improper for such a vast range of amendments to be pushed through like this. Only last week, on a similar measure—although it was not introduced in the House of Lords—many amendments, new material and major changes had to be forced through the House under a guillotine. We are under great pressure to do the same on this Bill.

It is wrong for the Government to deal with such matters in that way. As my hon. Friend the Member for Great Grimsby said, why do they not stick to the provisions that have worked already? The 1956 Act has been operating reasonably and people understand it. The

[Mr. Foot]

application of this part of the law of copyright goes back for about 70 years. The Minister said that we have a Copyright Bill about every 20 years and that they arrive with the comet. Perhaps his scientific knowledge is better than his legal knowledge.

The Government had plenty of time for preparation, negotiations and discussions before the legislation was introduced, yet at the very last moment before Royal Assent we are confronted with a proposal to remove from journalists rights that they have had for at least 20 years and probably a good deal longer. It removes those rights without any effort having been made to discuss the matter with the National Union of Journalists.

No doubt the Minister will tell us about the negotiations that they had with the Members of the House of Lords. The place is so stuffed with peers who own newspapers that I suppose they did not need to set up a special Committee to examine the Bill. How did those negotiations manage to produce a proposal that is of financial advantage to some peers? What will be the financial advantage—collectively or severally—to those peers? How did they bring pressure on the Government? Did the meetings take place in the same hole in the corner where they cooked up the plan to introduce an entirely new method of ensuring the teaching of religious education in our schools? It is an example of bad government.

I do not wish to spoil the Minister's temper, especially as he is moving along the stepping stones to higher things or lower things—at any rate, sideways—because he has kept it well during our proceedings. But he should not have allowed such major legislation, altering the rights of journalists and many others, to be introduced in the House of Lords, and he should not have been a party to the House being confronted with such a measure at the fag end of the Session. As a last generous gesture to the House on the Bill, which he has piloted through with such skill, I hope that he will say that he has changed his mind and will accept in its entirety the amendment so ably moved by my hon. Friend the Member for Great Grimsby.

Mr. Brian Wilson (Cunninghame, North): This is a press baron's clause. Appropriately, it was introduced in the place to which press barons are sent by Tory Governments. It is an appalling example of special pleading and lobbying by an interest group that the clause should have left the House of Lords thus altered, and that the privilege of sitting in that place should have been used by press barons to improve their position in relation to journalists, who are not by and large Members of the House of Lords.

Like previous Opposition speakers, I must declare an interest as a member of the National Union of Journalists.

Mr. Buchan: My hon. Friend is a press baron, too.

Mr. Wilson: My hon. Friends have pointed out that I have a vested interest as a press baron, but that is in only a fairly minor way.

Mr. Buchan: Not at all in a minor way. If the incidence of the *Daily Mirror* was as heavy as that of the *West Highland Free Press* in its own area, it would sell about 15 million.

Mr. Wilson: It is decent of my hon. Friend to point that out. Copies are available on subscription. I assure the House that the journalists whom I employ are more than welcome to their intellectual property, and the last thing that I would want to do would be to profit from their efforts. Hon. Members will gather that I am a philanthropic press baron, in a minor way.

This is a serious point. The rights of journalists to their intellectual property should be expanded rather than contracted. Increasingly, we live in an age not just of press barons in the old style but of multi-media barons—the same people who own the press increasingly own every other means of communication. They do so in rapidly diminishing numbers. We see the media world being carved up among very few people.

My hon. Friend the Member for Grimsay—I mean Grimsby——

Mr. Malcom Bruce: Another Hebridean island.

Mr. Wilson: I am sorry. Grimsay is in North Uist. My hon. Friend the Member for Great Grimsby (Mr. Mitchell) was wrong when he said that Mr. Murdoch is an Australian. I think that this week he is an American. Doubtless when he gets into satellite, if it suits his purpose, he will become a Martian, which might be more appropriate——

Mr. Austin Mitchell: An improvement.

Mr. Wilson: Indeed, it might be an improvement.

Those are powerful people in our society. It is intolerable that journalists, the people who work for them, should be put at a further disadvantage.

I do not want to pre-empt what the Minister says because the reply from any self-respecting Opposition Member would be, "Up to a point, Lord Copper!" but in Committee the Minister explained his thinking and said:

"To retain the provision would be anomalous and would keep newspaper proprietors at a disadvantage compared with other employers".

To seasoned members of the journalistic profession such as my right hon. Friend the Member for Blaenau Gwent (Mr. Foot), and anyone who has worked in that industry, the idea that legislation should be formulated on the basis that newspaper proprietors are a disadvantaged class in society who have to have special little clauses inserted in the Bill to protect their interests, has a ring of improbability to it.

We are dealing with a greedy set of interests, like most vested interests who sit along the corridor in the other place, and who can never get enough. They can make special pleading work and having discovered that they can lobby on their own behalf, they do so ruthlessly and interminably. This will not be the end of their demands.

The National Union of Journalists and others are concerned about the works of the big journalists, the guy with the big name whose work can be paid for by one newspaper, by Murdoch or Maxwell, and so on, which can then be flogged relentlessly around the world on every conceivable means of communication. I should also like to put in a bit of pleading for the small guy, the person who does not receive large amounts of remuneration, who works for a local or provincial paper and who might happen upon the once-in-a-lifetime story. That story would go around the world. If it were a photographer, his pictures would go around the world. But that will not be a break for the journalist or the photographer. For years

to come it will be yet another source of revenue for the proprietor—the disadvantaged creature whom the Minister is so concerned to protect.

There is a myth that everybody in journalism is earning a huge salary and raking in large expenses. There is a parallel with professional footballers. Everybody forgets those who are playing in the second, third or fourth divisions. The vast majority of journalists are in that category. To take away the limited rights that journalists enjoy under the 1956 Act and to replace them by the amendment in the Bill, which serves no function other than to extend the tentacles of proprietors and turn journalists into the vassals of proprietors with no independent rights of their own, is intolerable.

The press needs to be more independent. The rights of journalists must be defended. There is no need for the amendment. To use the Bill as a stick with which to beat journalists is wrong. I hope that the Minister will be able to defend what he is doing on rather better grounds than "newspaper proprietors are at a disadvantage compared with other employers".—[*Official Report, Standing Committee E*, 12 May 1988; c. 82.] That is an injustice with which most of us could live.

9.30 pm

Mr. Malcolm Bruce (Gordon): I have to declare an interest as a member of the National Union of Journalists, but I am speaking entirely on my own account.

The amendment twists the relationship between a journalist and his employer to a wholly unjustifiable extent. The hon. Member for Cunninghame, North (Mr. Wilson) referred to a local reporter hitting on a major story. When the Bill becomes an Act, there will be many such instances. In the past, journalists thought that they would fall foul of their proprietor or employer, so they fought to find out which side he was on. The result was that, rather like the chap in "Local Hero", they spent a large part of their time in telephone boxes making reverse charge telephone calls to the United States and having money put into numbered post office accounts so that their employers would not find out that they were making money. In many cases that was totally legitimate; money was being made out of news and information that the journalists had unearthed, much of it in their own time. Nevetheless, they thought that they would be intimidated, got at or even dismissed if they chose to reveal that fact to their employers, because they would be unable to defend their copyright.

It might be argued that that is what happens under the law as it stands and the Government are seeking to regularise it, but journalists should be entitled to the copyright of the information that they have procured by means of their own creative ability or talent.

The Minister will no doubt tell us that if there is a real market for his work, a journalist can write his own contract. That is all very well for a Terry Wogan or a star with an established reputation, but it is not so easy for either an aspiring young reporter or an established reporter who has ability but not star quality. The amendment moved by the hon. Member for Great Grimsby (Mr. Mitchell) is, in a sense, speaking up for middle range and aspiring young journalists against the press barons. I look forward with interest to the Minister's justification of a newspaper owner being given extra rights to defend himself against the vicious assaults of middle-ranking reporters and journalists on his staff.

Many hon. Members will be aware that, with the particularly severe competition that exists in journalism at the moment, many journalists in employment are forced to sign contracts that reduce their working conditions and pay in their existing posts, and forgo the opportunity to freelance or to sell to interested third parties the benefits of their own work. That is happening under the present law, and it would appear that the Government are anxious to repress still further aspiring young and middle-ranking journalists and prevent them from developing their talents in a constructive and effective way.

I was not a member of the Committee, and I have not followed the passage of the Bill, but what I have heard makes it sound as if the Government, hiding behind the press barons in the Lords, are trying to ensure that those people have a dominant position over the livelihood of people who, as the hon. Member for Cunninghame, North said, can often find it very difficult to find employment that is not controlled by those press barons.

If the Minister is anxious to break open a closed shop, it is the owners' and proprietors' closed shop that should be broken open, not that of aspiring and successful middle-ranking journalists. Therefore I am very happy to support the amendments and look forward with interest to hearing how the Minister can possibly justify resisting them.

Mr. Wigley: I hesitate to follow the eminent litterateur the right hon. Member for Blaenau Gwent (Mr. Foot) and th press baron of the Western Isles, the hon. Member for Cunninghame, North (Mr. Wilson). I do not have an interest to declare and I am not a member of an appropriate union, so it is appropriate to add my support to the amendment.

I find it difficult to accept that a Government that believe in greater freedom, as they claim, should be putting forward such a proposition, and that they should be using people in a way that they should never be used. The argument is absolutely overwhelming, that if a proprietor has paid a journalist to undertake a job and the journalist has done that job, the proprietor should get the first nibble at the work that has been done, and having had the opportunity of publishing the story, the journalist should have the benefit thereafter. The publication can reflect in the glory that the journalist had written the story for that paper in the first place. That should apply to any creative work, not just to the written word.

It applies particularly to photographs. If one thinks back to perhaps a happier time in the saga of *The Times* newspaper, when it used to publish excellent photographs, some of those photographs were worthy objects of art in their own right and the fact that they appeared in *The Times* first was to the credit of that newspaper, but thereafter they should have stood in the names of the photographers who had the vision and creativity to produce them.

In Committee, the Minister was decidedly unhappy about four or five parts of the Bill. He never admitted which four or five parts they were, but we know that he was not entirely comfortable with some of the measures that he had to advocate from time to time. I should like to think that this was one of the parts of the Bill about which he was decidedly uncomfortable. Having heard the argument put forward tonight, he should be so much more uncomfortable that he should feel in his heart that, even if he cannot accept the amendments now, the Bill must go

[Mr. Wigley]

back to another place with the amendments from this place. If any straightening out can be done, for goodness' sake, in this day and age let us not go back to the time when somebody working in an honest job is treated as a serf by his employer. That will happen under the provisions of the Bill.

Mr. Butcher: Having heard the arguments of a Scot and of two Welshmen, a south Walean and a north Walean, it is always very hard to resist that combination of Celtic elegance. Unfortunately, this is one occasion on which the word "but" is followed by a word of what Opposition Members would interpret as negativity. Much as I am persuaded of the logic of the earlier part of their arguments listed in the first amendment, I cannot go along with much of what I have heard of the substance of the second amendment. What appears to be happening is that Opposition Members have come to see the wisdom of vesting in the employer the ownership of copyright in a work made by an employee. Therefore, I have no trouble in accepting the principle underlying amendment No. 4. However, I must resist the amendment because it is unnecessary. The Bill as drafted provides all that Opposition Members want.

Clause 11(2) provides that, when a work is made by an employee in the course of his employment, his employer is the first owner of copyright. That meets the wish of Opposition Members as expressed in the first part of the amendment. The provisions of subsection (2) are subject to agreement to the contrary. That already provides what paragraph (a) of the amendment seeks. Amendment No. 4 requires that clause 11 be subject to clauses 76 to 88. That does not need to be said. Moral rights are distinct from copyright and the application of those rights is determined by the clauses in question. In particular, clauses 76 and 79 set out cases where the rights apply and clauses 78 and 80 give the circumstances where they do not. Therefore, although I applaud the sentiments expressed in amendment No. 4, I cannot accept it. With the assurance that the Bill as drafted delivers what is required by the amendment, I trust that it will be withdrawn.

Amendment No. 3 would introduce, with one or two drafting changes, the provisions of section 4(2) of the Copyright Act 1956. That provides for a split ownership of copyright in the case of a work produced by an employee of a newspaper, magazine or similar periodical. The employer is to own copyright for the purposes of publication in newspapers, magazines and periodicals and the author is to own copyright for all other purposes.

Mr. Doran: The Minister said that we accept the principle that copyright should lie with the employer. As I understand it, that is the present position. The point of amendment No. 4 is that clauses dealing with moral rights are also excluded from employees. Under subsection (2)(b) that would not apply. Therefore, there are significant differences between what we want and what the Minister wants.

Mr. Butcher: We are consistent in terms of remuneration rights and moral rights. We had an exhaustive debate on that, and obviously I was unable to convince the hon. Gentleman. I should say, en passant, that there have been assertions about special pleading in each of the contributions made. I have not noticed a scale of lobbying from the National Union of Journalists that is anything like the scale of lobbying that has occurred on virtually every issue of substance in the Bill. Opposition Members say that we should not indulge in special pleading, and they are not indulging in special pleading for their own purposes. They are saying that journalists, compared with other creative employees, should be set apart and be given rights that are not given to creative people in other industries.

Before we proceed further, I should make it clear that we are dealing only with journalists, photographers and others who are employed by newspapers. Under the Bill as it stands, the first copyright in a work made by a freelance or commissioned author is vested in the author. He may assign all or part of the copyright to the newspaper or merely license the newspaper to print the work in question. I do not think that anyone seriously objects to that principle. A newspaper wanting to publish an author's work must have his consent, and can acquire as much or as little of the copyright as it needs for those purposes. The freelance author who depends on his work for his livelihood is the owner of copyright in his work, and can use that copyright to negotiate payment.

The debate on amendment No. 3 is concerned only with employees of newspapers, magazines and similar periodicals. The question before us is, what should be the position of works created by an employee during the course of the employment? The general principle under the 1956 Act, set out in section 4(4), is that the employer is entitled to the copyright, and that principle is re-enacted in clause 11(2).

That it is right that an employer should own the fruits of his employee's labour seems to me to be a self-evident truth. If I employ a man to use his skills to make a product and provide all the resources that he needs to do it, it is only right that I should own what he has made in my time and at my expense. Opposition Members who tabled the amendment fully accept that basic principle, as is evidenced by amendment No. 4, which vests copyright in the employer.

9.45 pm

Had Opposition Members proposed the deletion of subsection (2) and argued that an employer could acquire his employee's copyright contractually, I would have resisted, but I would have recognised that such an amendment would be consistent with their professed concern for the employee's side of the employee-employer relationship. I understand that they have seen the light and have recognised the sense and justice of the principle enshrined in clause 11(2).

One question remains: why single out employed journalists for special treatment? Why should an employee of a newspaper be better placed than, say, the employee of an advertising agency, a software house or a book publisher? There are numerous industries in which people are employed for the purpose of creating copyright works for their employees, yet it is not suggested that the employee should own copyright. The anomaly is most starkly presented in the case of an employed journalist. If he is employed by a newspaper, he is to own a part of the copyright in his work. If he is employed by a television company, his employer owns all the copyright.

The most ardent supporter of amendment No. 3 could not deny that it is anomalous, but it must be admitted that the anomaly has been around for 70 years or more. Why

do away with it now? The answer is that it is not an innocuous anomaly. First, it seems to be wrong in principle to say to newspapers, "You, and you alone of all the many employers of the authors of copyright works, are not to receive the full benefit of your investment in your work force."

Secondly, there are practical effects that harm newspapers. Hon. Members should consider the case of a television company that sends a crew to some trouble spot —say, the Gulf. The pictures and reports sent back by the staff can be sold by the company to a newspaper to help to recoup some of its investment. But if a newspaper sends a journalist and photographer to the Gulf, it cannot sell the story and pictures to a television company. For those purposes, copyright would be vested in the employees, even though the story had been obtained at the not inconsiderable expense of the employer. That means that different branches of the media are not competing on a equal footage, and that is wrong.

The anomalous treatment of newspapers also hinders the development and exploitation of databases—another point that was raised by Opposition Members. Under this agreement, a newspaper would have to obtain copyright clearance from its own employees to put the works that they have produced on to a database. Back issues of a newspaper cannot be transferred to microfiche or other more convenient forms of storage, as that involves the consent of the employee. It may be that the employee would consent, but he could seek a high price. Why should the employer pay again for work that he has already paid for?

The general principle should be that, subject to contrary agreement, the employer owns the copyright in his employee's works. Any exception to that general rule has to be fully justified. An exception to favour newspaper employees may have been justifiable 30 years ago, but it is not so today, in an age when the boundaries between sectors of the media are not clear cut and special treatment can act as an obstacle to the dissemination of information. I must ask the House to reject the amendments.

The hon. Member for Cunninghame, North (Mr. Wilson) called the clause a piece of special pleading. I must say again that it is for the hon. Gentleman to plead why newspaper employees should be set apart from other categories of creative people.

Mr. Austin Mitchell: The Minister's speech will not feature among the highlights of his collected Department of Trade and Industry speeches as he moves on. It is as though he made it in *Times*-speak—that is to say, I could not understand a word of it—rather than *Sun*-speak, when he could have said, "Rearrange the following words to form a well-known English phrase or expression: Off bludge."—which is essentially what he said. It is inconceivable to suggest that all that we are doing in reality is just to return the legislation to what it has been since 1956.

The Minister can show no examples of any problems, anomalies or disputes arising from the existing legislation that he is changing. He has produced no argument for the change and had no consultations with the National Union of Journalists—only apparently, with the press barons. He has not even told us what peculiar quality of intelligence, integrity or dignity in British press barons, as shown in their newspapers, justifies giving them so much greater power over their journalists than the press barons of most other countries, who do not have the rights that the Bill provides and which our amendments seek to reduce.

Our conclusion must be that the Government are on their knees before the press barons. Certainly we intend to bring them to their knees by opposing the clause and voting for our amendments. We want to see the headline in *The Sun* tomorrow, "Journos Butchered by Soaraway Supermin Before Being Jerked Off".

Amendment negatived.

Amendment proposed: No. 3 in page 6, line 22, at end insert

'except that where a literary, dramatic or artistic work is made by the author in the course of his employment by the proprietor of a newspaper, magazine or similar periodical under a contract of employment, or apprenticeship, and is so made for the purpose of publication in a newspaper, magazine or similar periodical, the said prioprietor shall be entitled to the copyright in the work in so far as the copyright relates to publication of the work in any newspaper, magazine or similar periodical, or to reproduction of the work for the purpose of its being so published; but in all other respects the author shall be entitled to any copyright subsisting in the work.'—*[Mr. Austin Mitchell]*

Question put, That the amendment be made:—

The House divided: Ayes 117, Noes 221.

Amendment accordingly negatived.

BUSINESS OF THE HOUSE

Ordered,

That, at this day's sitting, the Copyright, Designs and Patents Bill *[Lords]*, may be proceeded with, though opposed, until any hour.—*[Mr. David Hunt.]*

Clause 12

DURATION OF COPYRIGHT IN LITERARY, DRAMATIC, MUSICAL OR ARTISTIC WORKS

Amendment made: No. 253, in page 7, line 22, leave out 'and 161' and insert

'(Copyright in Acts and Measures), 161 and (Copyright in Parliamentary Bills)'.—[Mr. Butcher.]

Clause 16

THE ACTS RESTRICTED BY COPYRIGHT IN A WORK

Amendment made: No. 37, in page 8, line 35, leave out from 'VII' to end of line 36 and insert

'(provisions with respect to copyright licensing).'.—*[Mr. Butcher.]*

Clause 17

INFRINGEMENT OF COPYRIGHT BY COPYING

Amendment made: No. 38, in page 8, line 41, at end insert—

'This includes storing the work in any medium by electronic means.'.—*[Mr. Butcher.]*

Clause 18

INFRINGEMENT BY ISSUE OF COPIES TO THE PUBLIC

Amendment made: No. 39, in page 9, line 16, leave out 'their importation' and insert

'any subsequent importation of those copies'.—*[Mr. Butcher.]*

Amendment proposed, No. 40, in page 9, line 18, leave out 'hiring' and insert 'rental'.—*[Mr. Butcher.]*

Mr. Speaker: With this it will be convenient to take Government amendments Nos. 41, 53, 55 to 57, 59 to 62, 68, 69, 82, 86, 87, 96, 97 and 134.

Mr. Blair: These amendments deal with the new rental provisions and, in effect, are all based on the deletion of the word "hiring" and the insertion of the word "rental". We had a full debate in Committee when the Government moved a long way towards the position that was being urged on them by hon. Members of all parties. However, it is not right to let the amendment pass without obtaining for the record the Government's explanation of why they are changing the word "hiring" to the word "rental". I shall be grateful if the Minister will reply.

Mr. Maude: The answer to the hon. Gentleman's query lies someway through this group of amendments, in amendment No. 96, which sets out the new definition of "rental" and states:

"'rental' means any arrangement under which a copy of a work is made available—

(a) for payment (in money or money's worth), or

(b) in the course of a business, as part of services or amenities for which payment is made,

on terms that it will or may be returned;"

Put simply, that will cover the sort of circumstances as those obtaining in a hotel which keeps a library of videos for the use of its guests. If no additional charge were made for that service, it would fall outside the Bill as it stands and the copyright owner would have no claim for remuneration. The reality is, however, that the hotel is paid for that service in its basic room charge. We do not think that businesses should be able to make copies available to the public and thus avoid copyright liability by including the cost of quasi-rental operation in the charge for the amenities or services that they provide. This group of amendments remedies that.

Amendment agreed to.

Amendment made: No. 41, in page 9, leave out lines 20 to 22.—*[Mr. Maude.]*

Clause 24

SECONDARY INFRINGEMENT: MAKING, IMPORTING, POSSESSING OR DEALING WITH ARTICLE FOR MAKING INFRINGING COPIES

Mr. Butcher: I beg to move, amendment No. 42, in page 11, line 9, at end insert—

'(2) Copyright in a work is infringed by a person who without the licence of the copyright owner transmits the work by means of a telecommunications system (otherwise than by broadcasting or inclusion in a cable programme service), knowing or having reason to believe that infringing copies of the work will be made by means of the reception of the transmission in the United Kingdom or elsewhere.'.

We have now been persuaded that there is a lacuna in the secondary infringement provisions, which this amendment is to fill. The transmission of a work in electronic form by a telecommunications system, which is not a broadcast or cable programme service, will be a secondary infringement if the person transmitting the work knows, or has reason to believe, an infringing copy will be made at the other end.

Amendment agreed to.

Clause 29

RESEARCH AND PRIVATE STUDY

Mr. Blair: I beg to move amendment No. 310, in page 13, line 10, leave out from 'the' to end of line 15 and insert—

'purpose of—

(a) private study, and

(b) research other than commercial research,

does not infringe any copyright in the work or, in the case of a published edition, in the typographical arrangement'.

Mr. Speaker: With this it will be convenient to consider the following amendments: No. 304, in page 13, line 22, at end insert—

'(4) This section does not apply in terms of fair dealing to copies made for commercial research if or to the extent that there is a licensing scheme certified for the purposes of this section under section 137 providing for the grant of licences.'.

No. 43, in clause 38, page 16, line 43, leave out 'research or private study' and insert

'private study, or research other than commercial research'.

No. 305, in page 17, line 5, at end insert—

'(d) This section does not apply to the supply of copies by a librarian to persons requesting them for commercial research if or to the extent that there is a licensing scheme certified for the purposes of this section under section 137 providing for the grant of licences.'.

No. 313, in clause 39, page 17, line 13, leave out 'research or private study' and insert

'private study, or research other than commercial research'.

No. 306, in page 17, line 21, at end insert—

'(3) This section does not apply to the supply of copies by a librarian to person requesting them for commercial research if or to the extent that there is a licensing scheme certified for the purposes of this section under section 137 providing for the grant of licences.'.

Mr. Blair: This group deals with the fair dealing provisions of the Bill. We had a full debate in Committee and I shall be brief in moving what are substantially the same amendments. The Bill provides for copyright protection but it also provides for what is known as a fair dealing exception. Where it is considered that the use of a work, even though in breach of copyright, is none the less fair dealing, the copyright rules do not apply if any infringement is made.

The question that arises, especially in relation to photocopying, is how wide the fair dealing exceptions will be. The difficulty for the publishing industry arises because, although many people photocopy documents for use in research or private study—and that is plainly fair dealing—most of our large business and commercial establishments have their own research departments where

[Mr. Blair]

photocopying is extensively used and where the circulation of the photocopy will be to several hundreds if not several thousands of people.

Throughout the passage of the Bill, industry has been saying that, in order to have a proper incentive to invest and to protect its legitimate rights, there must be copyright protection against infringing copying. The problem faced by the publishing industry in relation to photocopying is that where photocopying is done—*[Interruption.]*

Mr. Speaker: Order. Hon. Members behind the Bar should come into the Chamber or go outside.

Mr. Blair: The commercial research establishment of an organisation copies very generally and, effectively, the copyright in a work will be breached. That is what worries the publishing industry. It is difficult to see how the breach of a copyright in such a case lies at all adequately with the fair dealing exception. That summarises the case that has been made in favour of the amendments.

When this matter was debated in Committee the Minister used a rather curious phrase when forced to the point. I quote from memory but I think I quote him accurately. He said that he was obliged to come down on the side of those who exploit information, and had decided to come down on their side rather on the side of those who had the original copyright in a work. Since our deliberations in Committee, the Government have moved some way towards accepting some of the things that the Opposition have said. For example, in the next group of amendments they have provided for a much tighter definition of what constitutes multiple copying so that such copying will not fit the fair dealing exception.

If the Government accept—as is implicit in some of their later amendments—that one does not have to choose between those who exploit information and its original authors, they are driven to justify why they are not even becoming more precise and excluding commercial research from the ambit of fair dealing. If they do not, large-scale photocopying for commercial purposes by commercial establishments will continue.

The trend of developments abroad is much in favour of the type of licensing scheme that the Publishers Association has been mooting. There is a scheme in existence in the United States but there are arguments about how successful it has been. Whatever the situation, it is clear that it has had a significant effect on making people pay attention to the rights of publishers against those who are abusing copyright. We see these amendments as being necessary to do for our publishing industry what other industries are anxious to see in the Bill —proper protection for original creative work. In the light of the amendments that the Government will move, why are they unwilling to include commerical research when it was never the true purpose of the fair dealing exception and when the arguments in favour of our amendments are so strong?

10.15 pm

Mr. Gerrard Neale (Cornwall, North): I also wish to be brief, in view of the remarks of the hon. Member for Sedgefield (Mr. Blair), particularly as the matter was debated extensively in Committee. If the Minister is unable to accept amendment No. 310, he may consider that my amendments are a little less heavy on the Bill. In his charitable feeling towards those who are interested in copyright, the Minister may, as he moves deservedly on to other things, consider the amendments not so much as probing amendments as an invitation to treat.

As the hon. Member for Sedgefield said, there is a strong feeling in the publishing industry and among those representing copyright interests that those interests have been subordinated to the interests of other industries and commerce. It is felt that it is in the interests of commerce and industry outside the publishing world to have material produced on which they can call for research purposes, so they should be required to pay for it. If they do not pay something for the copying of research material, there is a severe risk that there will be less and less incentive for those who produce and publish research material. I hope that, even at this late stage, the Minister will consider the strong misgivings in parts of the publishing industry and that he may be able to change his mind even now.

Mr. Eric Martlew (Carlisle): I was pleased when we discussed commercial research and fair dealing in Committee because it was the only part of the legislation that I understood. I learned two things from being in Committee: first, never to volunteer, and secondly, not to be surprised by Government actions. I was surprised that the Government did not take the opportunity to get the Bill right or to clarify the position on commercial research and fair dealing.

My experience has been in industry. In Committee, the hon. Member for Beaconsfield (Mr. Smith) said that when he worked in commerce he would flick through the journals on his desk, find the one that interested him, make a photocopy of it and pass the journal on. I had a better system. When the journal came to my desk, I passed it on to someone else's desk without looking at it.

As my hon. Friend the Member for Sedgefield (Mr. Blair) said, the reason why I could do that is that I worked for a large organisation. I knew that somebody in headquarters went through the journals and that if anything appertained to my speciality, it would be photocopied and sent to me. I was a personnel manager and if anything on personnel or training appeared in the journals, the chap at headquarters made 15 copies and sent them off to all the personnel managers in the group. That was how the company "stole" research information. I worked for a good company and I am sure that it would be happy to come to a licensing arrangement, if it were available, to buy particular research. It is a wealthy company and could afford it. Many of the technical journals are not as well off. They are on the borderline and it would be a disaster if they went to the wall.

I must emphasise my disgust for the lobbying that has been done by some of the major companies. I understand that Shell, BP and ICI have all made representations to the Government and are twisting the Government's arm to change the legislation. That was reported in the *Official Report* of the Committee proceedings. I also understand that the CBI has made representations. It is a pity that the hon. Member for Beverley (Mr. Cran) is not in the Chamber. He used to be the northern director of the CBI and I used to be a regular attender at his meetings. [HON. MEMBERS: "He is here."] He is beyond the Bar, so he cannot intervene. The CBI was a short-sighted, narrow-minded organisation then and it does not surprise me that it is against giving the publishers their dues.

Why have the Government changed their mind? The Whitford inquiry recommended that an amendment to the law should be accepted by the Government. The Government accepted that in their Green and White Papers. It was only after an amendment in the other place that the Government decided to change their mind. I have studied what the Minister said in Committee. My hon. Friend the Member for Sedgefield drew the right conclusion about that speech when he said that the Government were on the side of the exploiter—or words to that effect. The Government appear to be prepared to exploit publishers. That does not come as a surprise to me because when I was a young lad an old Socialist told me that the Tories always sided with the exploiter. What does surprise me is the candour with which the Minister expressed that. I would much prefer the Minister to be on the side of the angels and to accept the amendment, which will help small publishing companies against the big organisations. However, the amendment will not hurt those big organisations.

One scheme to help small companies has already been accepted by the Government and it relates to education and university services. Those institutions are under licence to the Copyright Licensing Agency and pay money to it. I understand that, last year, the Government paid £900,000 to that authority on behalf of those institutions. It appears that we have dual standards. Either the Government should make an amendment to get rid of that payment or they should make private companies pay the same. It is all right to pay public money to the Copyright Licensing Agency, but it does not appear all right to pay private money to that authority. That smells of duplicity and I hope that the Minister will explain that position. I am sure that fair-minded people will wonder why those educational institutions are give such a fair deal.

My wife is a chartered librarian and is involved in issuing information. I told her that I was intending to speak on a clause that intended to exclude her from giving information to commercial organisations. She was not too pleased about that. It was only after I explained to her that she would not go to prison if caught doing so that she allowed me to come here.

I do not believe there will be any objection if the Government return to the stance they took before they were got at by big business. In the sense of fairness I hope that the Government will accept the amendment.

Mr. Rowlands: I underline what my hon. Friend the Member for Carlisle (Mr. Martlew) said. He illustrated the strength of the case for the amendment with his references to educational establishments and the money they pay to the Copyright Licensing Agency.

We have been lobbied for and against the Government's proposal, formally and informally. For me it is a question whether I lose my British Library friends or my publishing friends. When two sets of friends are recommending contradictory opinions, one must look for a set of principles. Occasionally I try to publish some research material in obscure academic journals. If people wish to have their research work published they can place it in the public domain. That way more and more people read it and the photocopying of that material is a compliment to their research.

My original instinct was that one should be on the side of the extensive dissemination of information. However, when one realises the way in which some of that research is grossly exploited on a commercial scale by vast photocopying of key articles, often published in marginal obscure journals, one realises that there is another side to the argument. That case has been made by the publishers of some of the most marginal journals. Much research would not see the light of day were it not for these technical journals—including the historical ones in which I am interested. Many people who have done research find an outlet and make their reputations through these journals, which are often scientific and technological. Their work would not reach the larger commercial concerns without these organs.

The Government should think twice about the impact of their proposals on marginal research journals. If no compensation is paid for the mass exploitation of the research in them, their numbers will diminish and the opportunities for young researchers in, say, Welsh history or technology will decline. We have a perfectly reasonable way of handling this problem of large-scale photocopying of commercial research, so I cannot understand the Government shrugging their shoulders and saying they can do nothing about it.

Much of the Bill is devoted to establishing a copyright licensing system which is designed to deal with the large-scale photocopying of work of potential commercial value. My hon. Friend the Member for Carlisle effectively posed the question of who will be expected to obey the new licensing regulations. The answer is the public sector: libraries and education authorities will be expected to come to licensing arrangements for large-scale photocopying with the publishers and will have to pay under an agreed system.

Why should not such photocopying by commercial research organisations be put on the same footing as the operation of public libraries and education authorities? Why should not these organisations come to a deal with the publishers through a copyright licensing arrangement, the rules of which are established in many clauses of the Bill? The Minister must justify why a poor education authority such as Mid Glamorgan has to come to a deal and make a contribution to the £1 million for the publishers whereas large-scale organisations that exploit research work published in marginal journals get off scot-free. If the Minister does not answer that, we shall have a case for forcing the amendment to a vote.

Mr. Butcher: The hon. Member for Merthyr Tydfil and Rhymney (Mr. Rowlands) reminded us again that the Bill is not about which lobbyists press us the hardest but about coming down in favour of particular arguments. This debate has been especially excruciating because all the arguments have been finely balanced. As the hon. Gentleman reminded us, too, it comes down in the end to principle and the points that give us basic guidance.

The amendments fall into two groups. Those in the names of Opposition Members would mean that the fair dealing and library exceptions in clauses 38 and 39 would not be available for commercial research. The amendments in the name of my hon. Friend the Member for Cornwall, North (Mr. Neale) do not go quite as far. They would allow copying for commercial research under the exceptions if no certified licensing scheme was in place.

It is self-evident that a large amount of photocopying takes place in British commerce and industry. Whether it

[Mr. Butcher]

is as much as the 1·7 billion copies that have been suggested is neither here nor there; but much copying goes on with no return to the copyright owner.

The Opposition amendments suggest that the answer is to deprive commercial research of the exceptions to copyright in clauses 29, 38 and 39. I shall not go over the arguments that were made in the Committee, but I maintain that the effect would be suddenly to shut off access to much of the information contained in journals and scientific publications. That would bring our research effort grinding to a halt. The House would find that completely unacceptable, and I do not believe that copyright owners would want us to go that far.

10.30 pm

Mr. Blair: That statement is an absurd exaggeration of the position. The amendment would not mean that industry could not copy things. It would simply mean that it could copy them only with the permission of the copyright owner, which is the same position as obtains in copyright throughout the Bill.

Mr. Butcher: I was trying not to repeat the arguments that we had in Committee. If the exceptions do not apply to commercial research, it means that industry must obtain the consent of the copyright owner for any copying that it may wish to do, however minimal it might be. To seek out the copyright owner for every piece of copying would place an intolerable burden on industry, and if the search was unsuccessful, copying could not take place.

The amendments of my hon. Friend the Member for Cornwall, North recognise the impracticality of taking commercial research out of the exceptions completely. Amendments Nos. 304 to 306 would mean that the exceptions would continue to apply unless a licensing scheme certified by the Secretary of State were established. That approach has the merit that industry would not be prevented from making copies. Industry could make copies either freely or, if the copyright owners got together to form a licensing scheme, on payment to the copyright owners.

The central question is whether researchers of whatever sort should be prevented from, or required to pay for, fair dealing in copyright works. If we accept the basic principle underlying the fair dealing exception, I cannot see the justification for denying a researcher the benefit of the exception just because his research is directed to commercial ends. We do not want to discourage any research, least of all that which will benefit the economy. We wish to encourage research.

But that does not mean that because copying is for research purposes, it should be permitted without constraint. That is not the case now, nor will it be under clause 29. Copying beyond the limits of fair dealing is infringement if done without the licence of the copyright owner. That is true for private research, for pure academic research and for commercial research.

Copying for commercial research is either fair dealing or it is not. Copying that is not fair dealing must be paid for under the present law, and the Bill preserves that. The amendments in the next group will help to define more clearly what is, and what is not, permissible.

For similar reasons, I am not persuaded that industry should be deprived, either wholly or in part, of the exceptions in clauses 38 and 39. It is accepted that libraries should be able to copy within defined limits. The amendments to clauses 38 and 39 raise again the practical problems that librarians saw about how they could distinguish between different types of research. In this context the efficiency or otherwise of licensing schemes is relevant. Even the most streamlined scheme will add burdens to the already stretched resources of libraries.

I cannot accept the amendments, for the same reasons as I rejected them in Committee. They would hamper the country's research effort. Amendments Nos. 310, 312 and 313 would make illegal what is now permitted and could mean that either industry stopped using photocopiers or was placed on the wrong side of the law. Amendments Nos. 304 to 306 would require industry to pay for something to which it is presently entitled—hardly an encouragement for research. Industry would have to pay the licence fee and carry the cost of administration of schemes which, even on a sampling basis, would involve record-keeping, staff training and so on. There would also be a burden on the library system which is best avoided.

As I said in Committee, whether the copyright interests wish to offer industry licensing schemes in respect of copying that is not fair dealing is up to them. Industry has no legitimate grounds for complaint about having to pay for copying that is not fair dealing. Although industry should not be singled out for special adverse treatment, it should not expect any sympathy for special privileges which would weaken the position of copyright owners.

I hope that hon. Members feel able not to press their amendments.

Mr. Blair: I apologise to the Minister for the fact that in my desire to keep up with what is happening to the Bill I omitted to congratulate him on his new appointment. He has handled the Bill with considerable sensitivity in many areas. We are sorry to lose him from the Department of Trade and Industry, but I am sure that his successor will try to live up to the high standard that he has set.

The fallacy of the Minister's line of argument is that the whole purpose of fair dealing is what the term implies—to allow dealings with copyright, though strictly in breach of copyright, where it is fair to do so. To treat photocopying for commercial ends in a different way from photocopying for private research or study is wrong in principle. Commercial companies claim the privilege of copyright for themselves in many other cases.

The problem is made all the more acute by the fact that educational establishments will be subjected to a licensing scheme. They will pay about £1 million a year to use copyright material. The Minister resisted our amendments, but a licensing scheme is already in existence for educational establishments. It is bizarre that large companies such as BP, ICI and Shell should be able to use commercial research and pay no money for photocopying when schools have to do so. The Minister has not answered that point.

I do not intend to press the amendment to a Division, but the Minister will have to keep a careful watch. In principle, the practice is wrong. Many of industry's arguments against our amendments are the ones that

they have used strenuously on other parts of the Bill. It is not right that publishers should be subjected to punishment for breach of copyright when that punishment does not apply to anybody else. There are clear anomalies. The Minister has not addressed them adequately.

Amendment negatived.

Mr. Butcher: I beg to move amendment No. 238, in page 13, line 16, leave out subsections (3) and (4) and insert—

'(3) Copying by a person other than the researcher or student himself is not fair dealing if—

(a) in the case of a librarian, or a person acting on behalf of a librarian, he does anything which regulations under section 40 would not permit to be done under section 38 or 39 (articles or parts of published works: restrictions on multiple copies of same material), or

(b) in any other case, the person doing the copying knows or has reason to believe that it will result in copies of substantially the same material being provided to more than one person.'.

Mr. Speaker: With this, it will be convenient to consider the following: Amendment (a) to amendment No. 238, in line 9, at end insert

'at substantially the same time and for substantially the same purpose.'

No. 311, in page 13, line 18, at end insert—

'(3A) Subsection (3) shall not permit any person to make at substantially the same time or for substantially the same purpose more than one copy of or from substantially the same work, or to provide systematic services for the making of copies of or from copyright works, for another person.'.

Mr. Butcher: A similar amendment was moved in Committee. We were asked to define cases of multiple copying that are not regarded as fair dealing. We have tried to reflect the view then expressed that we should table an amendment that provides an appropriate definition.

I should also mention that the Government are happy with the amendment of my hon. Friend the Member for Battersea (Mr. Bowis).

Mr. Blair: When we are given what appears to be a gift it would be strange to be churlish about it, and I do not intend to be churlish. However, we need to be told what the Government's amendment implies. Any form of multiple copying would, I understand, be excluded from fair dealing. The amendment ensures that nobody will be allowed to take more than one copy for distribution to others, which is what happens in the case of commercial research. If that is right, will the Minister tell us exactly where that leaves commercial research?

When we were discussing earlier amendments, he was asking why on earth commercial research should not be allowed without any hindrance, without the payment of any money and without it being a breach of copyright. I find the amendment slightly curious, and I have to pause before accepting it, because it appears to be saying that multiple copying is a breach of copyright and is not fair dealing. I find it difficult to put together the amendment and the position the Minister was adopting in the previous clause. That is why it is right to ask at least for an explanation.

Mr. Butcher: In the interests of making progress, I may have glossed over a point on which the hon. Gentleman wished to have clarification. I shall set his mind at rest. The amendment reflects a mutual concern. It seeks to define cases of multiple copying which are not regarded as fair dealing.

Clause 29 provides that fair dealing for purposes of research or private study does not constitute an infringement of copyright. Subsection (3) was included in the Bill to make it explicit that a student could avail himself of the fair dealing exception even if he did not do the copying personally. We believe that to be the existing law but this statement on the face of the Bill caused some alarm, particularly among publishers. They were concerned that this could lead to systematic multiple copying—that is the key phrase—where a class of students could ask a librarian to make 30 copies of, say, a learned article and each would then rely on his own individual fair dealing exception.

As far as library copying is concerned, clause 40 already imposes restrictions on multiple copies of the same material, and subsection (4) was added to clause 29 so that those restrictions are read over to fair dealing. But, of course, librarians are not the only ones to copy on behalf of others. Copy shops do so. Industry does much in-house copying. Amendment No. 238 therefore extends the principle of clause 29(4) to the general case.

Since tabling amendment No. 238, we have had the benefit of seeing my hon. Friend's amendment (a), and in the light of this we have concluded that our original wording is rather too broad. There will be many occasions where someone copying a particular item will have reason to believe that someone else will also want a copy of it some time in the future. However, it should be possible to make a copy under this clause if there is no immediate prospect of further copying taking place. For that reason I am happy to accept my hon. Friend's amendment to my amendment.

This brings my amendment closely into line with the existing provisions in clause 40 governing multiple copying in libraries, and with the first part of amendment No. 311 in the names of hon. Gentlemen opposite. I cannot, however, accept the remainder of the wording of that amendment since the concept of systematic services for the making of copies is extremely broad and vague. It could well be that this provision would make the systematic supply of photocopiers an infringement of copyright and this would clearly be absurd.

Mr. Blair: I take the Minister's point about drafting, but it is not the drafting that concerns me. Perhaps if I put a specific case to him it may help elucidate the matter. If someone within a company's research department decided to photocopy a particular article and circulate it among 50, 100 or 1,000 people, would that be fair dealing or would that be excluded from fair dealing under the provisions?

Mr. Butcher: That is an example of the systematic and multiple copying which is not fair dealing.

In conclusion, I believe that my amendment, as amended by my hon. Friend, provides what is needed in this area. As a result of it, the hand of the copyright interests will be strengthened in negotiations for licences for copying which is not fair dealing. I hope that Opposition Members will not move their amendment 311 in the light of my remarks.

Mr. John Bowis (Battersea): I beg to move amendment (a) to the proposed amendment, at end insert

'at substantially the same time and for substantially the same purpose.'

I am grateful for the opportunity to move amendment (a) and I am grateful to my hon. Friend for accepting it. It is slightly unusual to wait so long to speak in the debate and then to have one's amendment accepted. I am doubly grateful to my hon. Friend.

I have been seeking to strike a sensible balance between the interests of education and the interests of copyright ownership and to stop some of the abuses that appear to be possible. Multiple copying and systematic single copying have been referred to in that context. I had in mind to bring the academic world into line with librarians so that academic books that are not readily available from libraries could be copied for students. Without further debate or discussion I commend my amendment to the House.

10.45 pm

Mr. Rowlands: We are a little unclear as to what the Government are doing in the amendments. We were somewhat relieved when the Minister promptly replied to my hon. Friend the Member for Sedgefield (Mr. Blair) saying that multiple copying inside a commercial concern is not fair dealing. That was a clear statement that we will happily bag and take away.

Amendment No. 238 refers to

"A librarian, or a person acting on behalf of a librarian".

It then refers us to clauses 38 to 40. What is the Minister trying to do? Is he saying that if a librarian or a person acting on behalf of a librarian does multiple copying, he or she is breaching the fair dealing provision? I hope that we can obtain that clear statement from the Minister.

I want to know how this provision will be enforced. We went through all the problems when education authorities were involved. Eventually a court case arose and we moved to a licensing arrangement. The logic of much of what the Government amendments do would to be have some sort of licensing system sooner or later so that everybody knows exactly where they stand. We would like to know where we stand at the moment.

Mr. Butcher: The answer to the question asked by the hon. Member for Merthyr Tydfil and Rhymney (Mr. Rowlands) is that librarians will infringe if they make multiple copies.

Mr. Blair: In the light of what the Minister has said, I am content not to move amendment No. 311. I am grateful to the Minister for the clear reply he gave in that in a commercial establishment, making multiple copies of a particular article or piece of material is not fair dealing and is an infringment of copyright.

Amendment (a) agreed to.

Amendment No 238, as amended, agreed to.

Clause 30

CRITICISM, REVIEW AND NEWS REPORTING

Amendment proposed: No. 43, in page 13, line 25, leave out 'or' and insert

'does not infringe any copyright in the work provided that it is accompanied by a sufficient acknowledgement.

(1A) Fair dealing with a work (other than a photograph)'.

—[Mr. Butcher.]

Madam Deputy Speaker (Miss Betty Boothroyd): With this it will be convenient to consider amendment No. 8 in, page 13, line 26, after '(b)', insert

'with the exception of articistic works, for the purpose of reporting current events.'.

Mr. Blair: As I understand it—I wish to be clear about this—the Government amendment gives us exactly what we asked for in Committee. Members of the Committee will recall that there was great concern that the fair dealing provisions as drafted meant that photographers lost copyright protection in circumstances where, for example, news and current events were reported. That was of tremendous concern to them. It was a right that they had held and they had always been in a particular position in relation to the use of photographs.

As I read Government amendment No. 43, photographs are specifically and expressly excluded from fair dealing. If I am right, there is no need for me to move amendment No. 8.

Mr. Butcher: The hon. Gentleman will remember the Committee exchanges on this matter. I prayed in aid the learned Lord Denning. The line of argument that I then deployed would have satisfied such distinguished lawyers as the aforesaid Lord when the matter was discussed in another place. I regret to say that it has not eased photographers' worries. They make the point that, even if we are right in our interpretation of clause 30, they should not be put to the trouble of having to argue the fairness of copying in court.

Given that we find it difficult to find examples of cases in which the exception could apply, we have concluded that we should not provide a current affairs exception for photographs. To retain clause 30 as it stands would be perfectly proper, but we are prepared to remove the widespread alarm that it has caused in the photographic community. I hope that Opposition Members do not consider it necessary to press their amendment, given amendment No. 43 standing in the name of my right hon. and learned Friend the Minister of Trade and Industry, which gives them what they and the photographers want.

Amendment agreed to.

Clause 32

THINGS DONE FOR PURPOSES OF INSTRUCTION OR EXAMINATION

Mr. Butcher: I beg to move amendment No. 44, in page 14, line 22, after ',hire', insert 'or'.

Madam Deputy Speaker: With this it will be convenient to take the following amendments: Government amendments Nos. 45 to 49.

No. 332, in clause 62, page 24, line 45, after 'hire', insert 'or'.

No. 333, in page 24, line 46, leave out 'or distributed'.

Government amendments Nos. 204, 205, and 137 to 140.

Mr. Butcher: Clauses 32, 35 and 36, and an order under clause 139, permit copies to be made within clearly defined limits for educational purposes to prevent abuse of the exceptions. Such copies are regarded as infringing copies when they are subsequently dealt with by being sold, for example. The definition of "subsequent dealing" includes distribution. That is not right, as it could prevent a teacher distributing copies to his pupils or an education authority distributing material to its schools. What is needed is to prevent subsequent sale or hire, and that is what our amendments will achieve.

Mr. Blair: We understand what the Government are doing. Having looked at the amendment, we consider that it is in accordance with what we wish.

Mr. Bowis: Amendments Nos. 332 and 333 are my amendments. Why do we not consider the whole series of amendments? When I raised the matter in Committee, my hon. Friend the Minister kindly said that he would examine the problem. In a subsequent letter, he said that he did not intend that

"distribution by the teachers to pupils should be excluded."

He promised to table amendments, and here are the amendments. I am grateful to my hon. Friend.

Clause 62 omits the omission of the word distribution. I should be grateful if my hon. Friend would elaborate on that point. I appreciate that the matter in this clause may seem a little remote from education, but there are occasions when galleries, museums and so on have links with universities and the academic world. There could be a case for suggesting that such a provision should apply here. Am I right in thinking that a gallery, for example, that has works of art for sale could put on its door a poster, which is a copy of the prime work in the collection, but could not send prints in postcard form to sell the prime object to other people?

Mr. Butcher: My hon. Friend the Member for Battersea (Mr. Bowis) raised in Committee the matter of subsequent distribution of copies made under the various education exceptions in clauses 32 to 36. He was right to do so. He will have noted the amendments that we are making. However, I do not think that it would be right to make the same amendments to clause 62. If he wishes to tease the arguments from us on this occasion, I shall be happy to discharge an obligation to provide a rationale.

The purpose of clause 62 is to allow those selling an artistic work to copy it and to issue copies to the public for the purpose of advertising the sale without infringing copyright. Auctioneers, art dealers and others engaged in selling works of art want to be in a positon to include a reproduction of a work in catalogues advertising an auction or sale. That is a long-standing practice, but it may be an infringement of copyright under existing law.

Subsection (1) allows the production and distribution of catalogues and so on for the purposes of advertising a sale, but subsection (2) ensures that subsequent dealing in copies made for such a purpose is an infringement. This is to protect the interests of the artists involved. Thus, a work may be included in a catalogue to advertise a sale but such catalogues cannot subsequently be sold as art books unless the copyright owner has consented. Nor should they be distributed for any purpose other than that for which clause 62 is intended, which is advertising the sale of artistic works. Any exception to copyright should not be wider than needed to achieve its purpose, which in this instance is sale of artistic works, and the amendment of my hon. Friend the Member for Battersea would have that effect. Accordingly, I hope that he will be sympathetic to my request that he does not press it further.

Mr. Bowis: I wished only to test the water. I happily accept my hon. Friend's reassurances.

Amendment agreed to.

Amendment made: No. 45, in page 14, line 23, leave out 'or distributed'.—*[Mr. Butcher.]*

Clause 35

RECORDING BY EDUCATIONAL ESTABLISHMENTS OF BROADCASTS AND CABLE PROGRAMMES

Amendments made: No. 46, in page 15, line 29, after ', hire', insert 'or'.

No. 47, in page 15, line 30, leave out 'or distributed'.—*[Mr. Butcher.]*

Clause 36

REPROGRAPHIC COPYING BY EDUCATIONAL ESTABLISHMENTS OF PASSAGES FROM PUBLISHED WORKS

Amendments made: No. 48, in page 16, line 5, after ', hire' insert 'or'.

No. 49, in page 16, line 6, leave out 'or distributed'.—*[Mr. Butcher.]*

Clause 50

ACTS DONE UNDER STATUTORY AUTHORITY

Mr. Butcher: I beg to move amendment No. 50, in page 20, line 43, at end insert—

'(3) Nothing in this section shall be construed as excluding any defence of statutory authority otherwise available under or by virtue of any enactment.'.

Madam Deputy Speaker: With this it will be convenient to discuss Government amendment No. 141.

Mr. Butcher: The amendment will ensure that a defendant is not debarred from pleading a statutory authority for an act which infringes copyright merely because there is no specific provision in an Act of Parliament. It will be, as under the present law, a matter of construction of the statutory provision in question.

On about half of the occasions when I have moved an amendment formally, my purpose has been to comply with a request from the Opposition.

Amendment agreed to.

Clause 54

USE OF TYPEFACE IN ORDINARY COURSE OF PRINTING

Amendments made: No. 164, in page 22, line 27, leave out from '99' to end of line and insert '(order for delivery up and right of seizure)'.

No. 165, in page 22, line 29, leave out 'forfeiture of such an article' and insert 'order for delivery up'.—*[Mr. Butcher.]*

Clause 56

INCIDENTAL COPYING IN COURSE OF USE OF WORK IN ELECTRONIC FORM

Amendment made: No. 163, in page 23, line 2, leave out Clause 56.—*[Mr. Butcher.]*

Clause 59

PUBLIC READING OR RECITATION

Mr. Butcher: I beg to move amendment No. 51, in page 24, line 13, leave out subsection (2) and insert—

'(2) Copyright in a work is not infringed by the making of a sound recording, or the broadcasting or inclusion in a cable programme service, of a reading or recitation which by virtue

of subsection (1) does not infringe copyright in the work, provided that the recording, broadcast or cable programme consists mainly of material in relation to which it is necessary to rely on that subsection.'.

The amendment is our response to the arguments of the hon. Member for Caenarfon (Mr. Wigley) in Committee. It ensures that those who record or broadcast live events, such as eisteddfodau, will not find themselves infringing copyright when unforeseeably—it is often unforeseeably—a speaker recites an extract from a literary or dramatic work without the consent of the copyright owner, placing reliance on clause 59. I am happy to give the hon. Gentleman credit for the amendment, which he richly deserves.

Mr. Wigley: I thank the Minister for responding to the arguments that I advanced in Committee. I am not sure whether the broadcasting authorities in Wales, the governors of the three channels and those involved in the organisation of eisteddfodau fully understood the implications of the Bill when it first appeared in print. When they read the report of our proceedings in Committee, there was apoplexy.

The House will know—the hon. Member for Merthyr Tydfil and Rhymney (Mr. Rowlands) will certainly be aware of this—that BBC Wales, S4C and HTV are much dependent on their capability to broadcast on radio and television the Eisteddfod Genwedlaethol Cymru—the National Eisteddfod of Wales—which will be held next week at Newport. Were they not able to broadcast without being in danger of breaching copyright, they would be extremely concerned. The same applies with Eisteddfod Genwedlaethol Urdd Gobaith Cymru—the Welsh League of Youth eisteddfod—which took place in Merthyr Tydfil last year. The hon. Member for Merthyr Tydfil and Rhymney and his wife Janice, worked extremely hard for its success. That, too, would have been in trouble had it not been for the amendment. The same goes for the international eisteddfod. For all these reasons, I welcome the amendment. I congratulate the Minister on his change of post and say that, following the amendment, there will still be a welcome for him at Aberdaron this summer.

Amendment agreed to.

Clause 60

Abstracts of scientific or technical articles

11 pm

Mr. Fisher: I beg to move amendment No. 318, in page 24, line 16, leave out clause 60.

Madam Deputy Speaker: With this it will be convenient to discuss amendment No. 331, in page 24, line 18, after 'abstract', insert 'or its typographical arrangement'.

Mr. Fisher: The purpose of amendment No. 318 is to delete clause 60, in particular its provision for the republication of abstracts by, in effect, a form of compulsory licensing, which is referred to in clause 141(1)(b).

The amendment raises a point that is different from those that we have been making about copying, but none the less it is important. Abstracts are copyright works of much value, especially to academics and researchers. As we understand it, clause 60 will allow not only copying of abstracts but their republication. That would be in contravention of the Berne convention. Surely authors should at least have the right to preserve their copyrights without the arm-twisting that clause 60 appears to impose on them. Some publishers of abstracts will not wish to have such valuable material republished or copied by others, but clause 60(2) may force them to comply under the certifiable schemes referred to in clause 141(1)(b).

Clause 60 is an undesirable provision, and throws the problems of copying far too wide. We hope that the Government will withdraw the clause.

Mr. Bowis: I should like my hon. Friend the Minister to elucidate a couple of points regarding facsimile copies of abstracts.

Although abstracts of articles in the humanities are less common than in the sciences, will my hon. Friend explain why the humanities have been excluded? Should not reference have been made to academic as well as scientific work?

The fastest way to publish abstracts is reprographically, but under clause 8(1) that would seem to be a breach of the copyright of the typographical arrangement. Clause 8(2) relates to reproduction of the same work. I doubt whether that is what was intended, but I should be grateful for my hon. Friend's elucidation.

Mr. Butcher: Clause 60, which amendment No. 318 seeks to remove from the Bill, is an exception to the rights of copyright owners, which I moved in Committee. I did so because, after full investigation of the matter, the Government believe that it provides a valuable safeguard for the continued operation of abstracting services, which play an essential role in the dissemination of scientific and technical information.

As I explained in Committee, the scientific and technical communities are served by a number of abstracting services. Some of them are purely commercial, such as Derwent Publications, and others are offshoots of learned societies, such as the Institution of Electrical Engineers. They scan periodicals from around the world and write or reproduce abstracts of articles of scientific or technical interest. They will normally apply a classification system to the abstracts, so that their clients can readily find those of particular interest to them.

All that is carried out under the present law, which, in our view, does not allow the republication of abstracts in the absence of authorisation by the copyright owner. We understand that, where authorisation is sought from publishers, it is normally given—usually without any request for payment. However, we also understand that in many cases consent is not sought, for practical or other reasons. In that event, the republication is an infringement of copyright.

Clearly, abstracting services are highly valued by the scientific and technical communities, and it is unsatisfactory that they should be carrying out their activities on a legally uncertain footing. The easy way of meeting their worries would have been simply to provide an exception to copyright, allowing republication of this kind. We resisted an amendment to this effect in another place, but said that we would consider alternative ways of meeting the problem, in consultation with publishing interests.

This clause is the outcome. I acknowledge that it has caused some concern to the Publishers Association and the Periodical Publishers Association Ltd. We have, however, taken account of the commercial interests of publishers by providing that the exception in subsection (1), allowing

[Mr. Butcher]

republication of abstracts, will be overridden if there is a licensing scheme. Consequently, authors and publishers will have the opportunity to obtain remuneration from this secondary use of abstracts if they wish. Conversely, they will be relieved of the burden of having to respond to individual requests for permission to republish abstracts.

I should add that we have consulted the Association of Learned and Professional Society Publishers, whose journals and periodicals are among those most likely to be affected, and it is content to see an exception of this sort.

Amendment No. 331 would extend the exception even further. It would allow the abstracting service not merely to copy the original abstract word for word, but also to copy the original publisher's typography, which would be going too far. Abstracting services are themselves publishers and should be prepared to do their own typesetting. The scientific community needs the information, but it does not need to have it presented in a particular typeface or layout. There is no need to reduce the original publisher's rights any further.

For the reasons I have given, I must resist both these amendments and I hope that they will not be pressed.

Mr. Fisher: The Minister said that these abstracts are valued. Will he also confirm that they are valuable and that there is considerable commercial advantage and potential in these abstracts? If he does accept that, and that is the case, is it not bizarre that this uniquely should be ignored in a clause contained in a Bill which seeks to protect people's economic copyright?

Mr. Butcher: We have debated this at some length, and I have not found an argument to considerably change our view on this. The hon. Gentleman has asked me to come back on a point, so I shall use the opportunity to reply to the question of my hon. Friend the Member for Battersea (Mr. Bowis). He asked why the humanities were excluded, and the answer lies in the remark that I made earlier—that the exceptions should be no wider than necessary. The only case put to us that needed action related to science and technology.

Amendment negatived.

Clause 61

REPRESENTATIONS OF CERTAIN ARTISTIC WORKS ON PUBLIC DISPLAY

Amendment proposed: No. 52, in page 24, line 34, leave out 'showing,'.—*[Mr. Butcher.]*

Mr. Martlew: The Committee was replete with my pedantic legal interventions, but tonight we have been free of them until now. The amendment deletes the word "showing", and it appears from clause 61, as it now stands, that it is not an infringement of copyright to make a graphic work. Does the deletion of the word "showing" not suggest that it may be an infringement to show the results of that graphic work or photograph? Will the Minister explain why that word requires to be deleted?

Mr. Butcher: The exhibition of an artistic work is not a restricted act either under existing law or under the Bill. That means that the showing of a film, including an artistic work, cannot infringe the copyright in the artistic work. The word "showing" is therefore not needed in clause 61(3).

Amendment agreed to.

Clause 65

HIRING OR COPYING OF SOUND RECORDINGS, FILMS AND COMPUTER PROGRAMS

Amendments made: No. 53, in page 25, line 12, leave out 'hiring' and insert 'rental'.

No. 54, in page 25, line 14, after 'royalty', insert 'or other payment'.—*[Mr. Maude.]*

Mr. Fisher: I beg to move amendment No. 315, in page 25, line 14, at end insert—

"to the copyright owner and to owners of the copyright in works included in such recordings, films or computer programs".

This is a simply addition to the Bill. It would protect the copyright of works included in copyright works in hire arrangements. We are not certain whether the Government have inadvertently omitted to mention the copyright of works in existing copyright works or whether they have been omitted deliberately. We believe that they should be included.

Mr. Maude: They are certainly not omitted by inadvertence. We debated this matter at some length in Committee. The recollection of that debate may be warmer with some of us than with others.

The amendment is an attempt to ensure that authors and composers are remunerated when records, films and computer programs are rented out under a statutory licence. We do not believe that the amendment, with which we have some sympathy, as the hon. Gentleman will probably remember from our debate in Committee, will be workable, so I ask the House to resist it.

Amendment negatived.

Amendments made: No. 55, in page 25, line 22, leave out 'hired' and insert 'rented'.

No. 56, in page 25, line 22, leave out 'hirer' and insert 'renter'.

No. 57, in page 25, line 22, leave out 'hiring' and insert 'rental'.—*[Mr. Maude.]*

Mr. Maude: I beg to move amendment No. 58, in page 25, line 26, leave out subsections (5) to (7).

Madam Deputy Speaker: With this it will be convenient to take the following amendments: No. 230, in page 25, line 28, after 'works', insert 'or films'.

No. 231, in page 25, line 35, after 'works', insert 'or films'.

No. 232, in page 25, line 38, at end insert 'or films'.

Mr. Maude: When I spoke in the Committee debate on the blank tape levy, it was at about this time of night. The difference is that that was the closing speech in the debate; the slightly depressing thing is that this is the opening speech in this debate. In deference to the hour and the great familiarity of hon. Members in the Chamber with the arguments, I shall be brisk in describing the Government's stance.

The perceived problem is that thousands of people make copies of music from records and the radio in infringement of copyright. Since these infringements take place in the privacy of the home, the copyright owner

cannot enforce his copyright. He cannot get remuneration for the use of his works and so, it is said, the answer is to put a levy on recording tape and/or recording equipment.

Mr. Page: My hon. Friend said that thousands of people make copies. Will he amend that to "millions of people", and get it accurate?

Mr. Maude: I am prepared to admit almost anything. I am prepared to make that trifling correction.

The money from such a levy would be distributed to copyright owners and, in return, the public would be licensed to make recordings for their private and domestic use. As will no doubt be said during the debate, the Government's view has gone first one way and then the other, but we have had to reach final conclusions and tonight the House must do the same. The Government's conclusion is that a levy should not be introduced, and I ask the House to endorse that conclusion.

Amendment No. 58 would remove three subsections which were added in Committee. The intention behind them was, as I understand it, not to require the introduction of a levy but to leave the door open for the Secretary of State to introduce a levy if he saw fit.

Mr. Jeremy Hanley (Richmond and Barnes): I am grateful to my hon. Friend for his candour in admitting that the Government have moved one way and then the other. However, it is difficult for someone such as myself who is so keen on this issue that I spoke in the House on it at half-past seven in the morning of 18 December 1985, and on three subsequent occasions. Each time I was assured that the levy on blank tapes was being carefully considered and then I was told that it had been accepted through the White Paper.

Therefore, perhaps my hon. Friend can tell us what thought processes occurred to force the Government to change their mind and what consultations were carried out between the general election, when every Tory candidate fought in support of this issue, and when the Secretary of State made his decision. Did the Government consult the British phonographic industry or the music industry before changing their mind?

11.15 pm

Mr. Maude: If I may proceed a little with my speech, the thought processes may become a little clearer. It is clear that the Government did not suddenly wake up one morning and decide to change their mind. If ever any Bill was consulted upon, this is it. The Bill has been subjected to the most enormous consultation and there have been enormous lobbies on both sides. I do not think that anyone could seriously suggest that the blank tape levy is not a matter on which there has been a great deal of consultation because there certainly has been throughout the history of the debate.

Mr. Hanley: I am grateful to my hon. Friend for giving way again. I asked him what consultations with the music industry had taken place between the general election and the announcement of the change of policy.

Mr. Maude: I cannot give my hon. Friend a specific answer on that matter at the moment. However, the Department was well aware of the views of all those concerned. We have been consulting all those concerned with this matter over a long period and, as I said at the outset, the arguments are clear and are well understood by all concerned.

The amendments which are grouped with Government amendment No. 58 are, I presume, intended to open up the possibility of a levy on videos as well as one on audio tape. Subsections (5) to (7), which were added in Committee, are technically defective in several respects, not least in that they do not allow the introduction of a licensing scheme in respect of literary works forming the lyrics of songs. If my hon. Friend's amendments were accepted, any video levy would license only the recording of silent movies.

As I said in Committee, we have not the slightest intention of seeking to use the powers with which the Committee endowed us. If, in the distant future, a Secretary of State were minded to use those provisions, he would find them unusable for their intended purpose. The only consequence of failure to accept my amendment No. 58 would be to leave an unwanted and unworkable power in the Bill.

In terms of strict law, it was unnecessary for us to table this amendment. We could have accepted the amendments made in Committee, content in the knowledge that they make no difference, but that would have been disingenuous. We do not want a levy, nor, I believe, do the majority of hon. Members. In the circumstance, we should remove from the Bill any suggestion that this House favours the levy solution.

I have no new arguments to advance tonight. They have all been aired before. It is wrong in principle for the private rights of a few to be enforced by means of a general tax, which hits innocent and guilty alike. That is especially so when the beneficiaries of such a levy would be the relatively well-to-do record companies and pop stars; and those who would pay include the visually handicapped, those with impaired hearing the churches, younger consumers—not a cast list of the rich and famous. It may be that there are poor composers—I hear it said many earn less than £5,000 per year from performances of their work—but let us not delude ourselves. A copyright levy would not benefit them; the money would go to swell the coffers of the composers who already make large sums. It is successful and popular music which is copied most and which would receive the lion's share of any levy. Much would flow overseas, especially to the United States of America, without any corresponding return to United Kingdom composers.

Mr. Wilson: Does the hon. Gentleman agree that his list of categories containing people that he says would be unfairly penalised under a levy coincides remarkably with groups of people who will lose under the poll tax? It is disingenuous in the extreme to come to the House this week to plead for a few pennies for the blind and disabled when only a week ago the Government bludgeoned out of existence every amendment that favoured the disabled and involved infinitely greater sums of money than this.

Mr. Maude: That is not the best point that the hon. Gentleman could have raised. It was a fairly poor one. The list that I read to the House contained people who are particularly heavy users of blank tape. It seems wrong that they should be asked to pay a special levy on something that they use for perfectly innocent purposes, in order to provide extra money for an industry that is already doing rather well.

[Mr. Maude]

All hon. Members who spoke in Committee in favour of a levy said quite properly that their support for this proposal depended on acceptable arrangements being found for innocent users, especially blind people. An acceptable relief scheme for blind people is a pipe dream. After we published the White Paper in 1986, we explored every possibility and could not find a way to satisfy the Royal National Institute for the Blind. Hon. Members cannot say that they favour a levy but that, of course, the blind must be looked after. Those are mutually exclusive propositions. Those who favour a levy must do so in the full recognition that blind people will be prejudiced. I do not want to spend a long time going through all the arguments again.

Mr. Toby Jessel (Twickenham): My hon. Friend is speaking at some length about the blind. Of course everybody cares about blind people and wants to support them. One person in 300 is registered as visually handicapped and on average, people buy eight blank tapes per year. A levy of 10p per tape would come to 80p a year. If a blind person bought twice as many it would come to £1·60 a year. That is 3p a week. Does my hon. Friend seriously believe that blind people who derive a great deal of enjoyment from listening would resent paying 3p a week to musicians, composers and actors who entertain them? Is my hon. Friend not employing a rather small argument to try to defeat the proposal?

Mr. Maude: The argument is put in perfectly good faith by many organisations that represent blind people. I do not think that the RNIB is filled with any sort of animus against copyright owners. It is an organisation of good will doing charitable work for the good of the blind people that it represents. For my hon. Friend to write this off as a trifling argument and to say that people can perfectly well afford such a levy will not do.

Members of the Committee who advanced the argument for a blank tape levy were perfectly straightforward about it. They said that no scheme should be introduced unless a relief scheme for blind people could be introduced. In good faith the Government have explored all the possibilities for devising such a scheme. It cannot be done.

Miss Emma Nicholson: Does my hon. Friend the Member for Twickenham (Mr. Jessel) know that only one in three of all people with visual handicaps are registered, and a smaller percentage of those people with aural handicaps are registered? The Minister has, perhaps, not spoken about those with handicaps quite as forcefully as he has spoken about the blind. I have here a letter from the chief executive of the Royal National Institute for the Deaf and it clearly makes the point on behalf of both problem areas. It says:

"The RNID fully recognises the rights of copyright owners to protect their interests, but does not believe that a workable levy system including exemptions and rebates for deaf people has been found. Accordingly we are most concerned that should the power in the Bill be used it would penalise deaf people for using a most valuable resource."

My hon. Friend the Member for Twickenham (Mr. Jessel) said that blind people bought only eight tapes a year. He completely omitted to mention the talking newspapers, from which many hon. Members have had letters; I have copies of all those letters, of which there were 400 or 500 in the last three weeks. Even the small talking newspapers regularly use about 400 tapes a week.

Mr. Maude: My hon. Friend makes a vivid point. I know that the House will accept the argument that she advances on behalf of aurally handicapped people, and I am grateful to her for making her point so powerfully.

The arguments have been fully exposed. The fashion for a levy solution has now passed. It is worth noting that in its recent Green Paper the European Commission did not build on the levies in France and West Germany to propose a Communitywide system, as some had expected it to; it did quite the reverse.

People are beginning to realise that levies are not the solution. We should perhaps even begin to question whether there is a problem that needs a solution. The countries with the most buoyant music and record industries—the United States, the United Kingdom and Japan—have survived private copying without a levy, and it now seems that Europe, too, is to turn away from a levy. I invite the House to do the same.

Mr. Page: Amendments Nos. 230, 231 and 232, standing in my name and that of my hon. Friend the Member for Battersea (Mr. Bowis), provide a simple solution to the Government's difficulty. The Government have introduced the Bill for a variety of reasons, but one of the major reasons must be related to the advances that have been made in new technology. Without those advances, the Bill would be a considerably slimmer volume than it is and we should almost certainly not be discussing a blank tape levy, as it would be quite difficult to reproduce plastic or bakelite discs.

New technologies have brought advances principally in the handling and dissemination of information—from computers through new printing and reproduction techniques to laser discs, satellites and cables. Those new methods of storing, accessing and spreading information increase its value, but the same technology has made illicit copying that much easier. To take a classic example, educational software never got off the ground because of the ease of making illicit copies. Illicit copies have destroyed the very investment that makes progress possible.

I say that in reply to those who argue, "Home taping does no harm; the record companies are wealthy enough anyway and can afford to forgo whatever revenue might come their way because of the levy." My hon. Friend the Minister made virtually the same point. I have never believed that one strengthens the weak by weakening the strong, and I do not believe that we shall help the music industry by asking it to forgo what rightfully belongs to it.

Our debate tonight is not just about money; it is about principles of right and wrong. The loss of sales to British products through illicit copying and breaches of copyright runs into hundreds of millions of pounds. It is impossible to estimate the exact sum but there are figures to suggest that it is in excess of £500 million. No economy in the world would happily forgo that amount of revenue.

Not only is the overall loss of sales through illicit reproductions virtually incalculable; the creators of original work see their ideas being lost through copying. They also see the sheer difficulties of enforcement. I hope

that it is those difficulties that lie at the heart of the levy argument. I hope that that, rather than the question of legalising home taping, is at the front of our minds.

Mr. Tim Devlin (Stockton, South): Surely the Government's best argument relates to the proportion of a levy that would go to the artist or the original producer of the work. Can my hon. Friend tell us how much of the levy would go to the artist? My experience of the record industry tells me that the bulk of the levy would go to a record company that had bought the copyright from the artist at a knockdown price when he was a young man.

11.30 pm

Mr. Page: My hon. Friend the Member for Stockton, South (Mr. Devlin) did not have the privilege or the opportunity of attending the Committee, but that matter was fully debated then. Whether we like it or not, copyright is invested in whoever has purchased it and in the particular case cited by my hon. Friend it lies with the record company. The strength of the contract between the artist or composer and the record company is another matter. If they become famous enough they may write into their contracts that they should get an advantage from the revenue derived from the levy, but it is up to them.

I do not apologise for my preamble. Tonight the Government have failed to solve the question of copyright on time shift, and they will shortly make exactly the same mistake with audio taping. For some reason the Government, or rather one or two Ministers, have tied themselves to the rails as the express is thundering towards them—just like the "Boys' Own" stories. There is an alternative, but even after the Green and White Papers and the manifestoes, the Government refuse to take that alternative course of action.

I accept what the Minister said about the amendment passed in Committee. I accept that it was not up to strength and that it would not have stood up to scrutiny and the test of operation. In Committee we made that same point. We said that the amendment was being used as an example to test the strength of opinion for blank taping. We accepted that it was not pure milk as regards the introduction of a blank tape levy. However, if the amendment had been cleaned up a little, it would have given enabling power to the Minister, had that power been required at a later date. The Government can still untie themselves from the rails, but I do not believe that the will is there.

Some people may wonder at all the fuss about a "little private copying". One instance of private copying may not be much, but regular home taping is widespread and hits the record, film and video industries. The Minister said that thousands of people are involved, but as he knows from my earlier intervention, we are dealing not with thousands but with millions of people. The problem will get worse as new forms of recording equipment become available.

I know that great store is set by the introduction of spoilers and that it is believed that they will block the reproduction of digital audio tapes when those tapes become more generally available and attractively priced. I have some experience in the security industry, and I know that for every lock there is a key. For spoilers that key is already available: it is called an enhancer. There may be a proposal to make such enhancers illegal, but making things illegal has never stopped them being used. To anyone connected with the production of pre-recorded tapes, the most fair and workable solution is a royalty or levy system. Although such a system would mean revenue to the companies involved, I also believe that it would signify a return to moral standards.

The Government have done a magnificent job in pioneering a return to a revived economy. Most of the economic indicators show that things are on the way up and the economy is looking more promising than it has done for years. Although that economic success is still too short-lived to be taken for granted, it needs to be reinforced by a social and cultural revolution.

I shall resist talking about family values and the reinforcement of traditional values, but I believe that it is wrong for the Government to walk away from introducing and supporting the principle of copyright. Technological changes will constantly require control and the guidance of law. That has happened in medicine, and the law will be changed with regard to embryo experimentation. In the same way, by rejecting the amendment, the Government are abandoning the principle of copyright. I do not want to labour the obvious——

Mr. Andrew F. Bennett: If the hon. Gentleman is so concerned about what is morally right, will he tell us what is morally right about imposing a levy on people who use blank tapes in a perfectly legal way and never copy material that they should not copy? Surely it is wholly unfair to penalise people who obey the law, as opposed to those who break it?

Mr. Page: The hon. Gentleman has a point. A degree of rough justice is involved in this. I accept that some will be caught in the trap that he has described. With the exception made for people who are visually handicapped and with the proviso that tapes of under 35 minutes length would be exempt, I suggest that very few—perhaps no—users would be thus caught. If they want to avoid this levy —incidentally, it has been absorbed by every tape producer in the countries in which it has been introduced —all they have to do is make sure that they buy tapes less than 35 minutes long——

Mr. Bennett: Does the hon. Gentleman accept that an oral historian, for instance, would use a large amount of tape? Often such historians are not well funded and the cost of buying tapes of their work is high. They do not want to keep changing tapes for less than 35 minutes length when interviewing people for oral history projects. They want tapes that are as long as possible.

Mr. Page: As I said, there is an element of rough justice. If a vast number of tapes are being bought for educational purposes, I see no difficulty about arranging some sort of exemption for genuine use.

We come back to blank tapes and the principle of copyright. The whole purpose of the Bill is to enshrine in legislation a protection for ingenuity and creativity, which constitute two of the great advantages of this nation. Turning a blind eye to the issue shows a lack of moral leadership.

Mr. Devlin: Would my hon. Friend be in favour of imposing a levy on blank paper for photocopying machines? The principle is the same.

Mr. Page: When my hon. Friend reflects on that intervention, he may wish he had never made it.

[Mr. Page]

The House will not be surprised to hear that I do not accept the permissive argument that home taping should be allowed free, gratis and for nothing. A certain body of opinion advocates that line of action, but it breaches the principle of copyright. It becomes almost impossible to know where to draw the line. Will a home owner be allowed an extra copy for his car? Will the standard family with 2·4 children have one or two more copies for the Walkman? If a relative drops in and likes the music that is on, will he be allowed a copy, too? The only safe position is to adhere to the principle of copyright.

The debate about the legality of home taping in Committee was instructive, if nothing else. My hon. Friend the Minister tackled the matter by saying:

"If the Committee decide . . . that it should remain a criminal act to copy copyright audio works, stringent action by the industry could have a salutary effect."

He went on to say:

"there are private rights which are enforceable in the courts. They are not enforced at present, and there is scope for that practice to be enhanced."—[*Official Report, Standing Committee E,* 24 May 1988; c. 336.]

That was interesting. How did my hon. Friend envisage enforcing the time shift proposal on the 28-day limit?

The Government's decision to alter that proposal because it was unenforceable provides the answer to my hon. Friend's question. He almost admitted it later in Committee, when he prayed in aid the judgment of Lord Templeman in the Amstrad case—a judgment which most Committee members quoted at one time or another in support of their arguments. The judgment said:

"A law which is treated with such contempt should be amended or repealed."

That point was also made in the 1986 White Paper.

My hon. Friend the Minister tried to justify the Government's changed stance on the levy, at which point the debate became interesting. He said:

"We have seriously considered such a scheme. I did not simply study it for a few minutes before I began my speech or talked to a couple of people."—[*Official Report, Standing Committee E;* 24 May 1988, c. 340.]

That was a Freudian slip, because I reckon that a couple of people spoke to him, and those two people had decided that it would not work.

The blank tape levy has created more confusion than any other subject. The Conservative manifesto stated:

"As part of a major reform in the law of copyright home taping will be legalised in exchange for a 10 per cent. levy on blank audio tapes. Organisations and their members who use tapes without breaching copyright, ie blind people, will be able to claim a full rebate."

Is my hon. Friend saying, as he seems to be implying tonight, that the Government went into the election knowing that they did not have a proper agreed rebate system for blind people? The briefing notes sent out by Conservative Central Office said that special provision would be made for the blind, as well as organisations and individuals who do not infringe copyright. Perhaps that answers the question asked by the hon. Member for Denton and Reddish (Mr. Bennett). I was asked two similar questions, one at the public meeting. Safe with the manifesto and the speaking notes in front of me, I replied, "Yes, we shall introduce a blank tape levy."

I can only assume that, until election day, the blank tape levy was policy—with the provisos to help the visually handicapped, and exemptions for tapes with a short running time. But within a few weeks of the election, in a puff of smoke and a flash of light, the proposal disappeared. I want to know from my hon. Friend what happened. I echo the words of my hon. Friend the Member for Richmond and Barnes (Mr. Hanley), who asked what had happened since the election to reverse the policy contained in the Green Paper, the White Paper and the manifesto.

The temptation to run through the history of the matter and to list all the committees that have been formed is almost irresistable, but in deference to those who wish to speak I shall resist it. It is a few years since I felt moved enough to vote against the Government. The previous occasion was in 1980, when I voted against them on the employment legislation, and the next year, under a three-line whip, the Government exhorted me to vote for the very proposal that they had tried to block the year before.

The amendment in the names of my hon. Friends the Members for Battersea (Mr. Bowis) and for Beaconsfield (Mr. Smith) provides a solution to the video and audio tape problem. It reinforces copyright. I do not understand why the Government do not embrace the ideas in the Green Paper, the White Paper and the manifesto. Even at this last moment, I urge my hon. Friend to think again.

11.45 pm

Mr. Blair: The blank tape levy, or royalty, was discussed fully in Committee. I do not pretend, and I have never pretended, that this is an easy judgment to make. It is not. But in an imperfect world we should adopt not the perfect solution, because there is rarely one, but the best solution that can be found.

No hon. Member has suggested either on Second Reading, or in Committee or today that home taping is not practised on a considerable scale and that in the main it is illegal. At the very least, the House has a duty either to make it legal or to provide a proper means of enforcing the remedies against illegality.

The hon. Member for Hertfordshire, South-West (Mr. Page) referred to the Amstrad judgment. What was remarkable about that judgment was its unanimity about the desirability of removing an unenforceable law. In his speech Lord Templeman said:

"From the point of view of society the present position is lamentable. Millions of breaches of the law must be committed by home copiers every year."

He ended the paragraph by saying:

"A law which is treated with such contempt should be amended or repealed."

The Government have introduced proposals not to amend or repeal the law but to leave it in an inherently unsatisfactory state.

The solution to home taping in other countries is a royalty on blank tapes. That solution has been adopted all over Europe, most recently in Spain. It is being operated in West Germany and France. While the Bill was being debated in Committee the Australian Government announced that they intended to introduce a blank tape levy. It could not therefore be said that it would be odd for this country to adopt such a solution. A royalty on blank tapes has been introduced elsewhere, even though the record industries in those countries are far less important than our own.

Mr. Devlin: How much of the levy in West Germany goes to the composers?

Mr. Blair: About 60 per cent. I shall turn in a moment to the question of how much of the levy goes to the rich composers and how much of it goes to poorer composers.

The rest of Europe is moving sensibly towards the introduction of a blank tape levy while the scale of the problem in this country is growing. Many more blank tapes are sold every year than pre-recorded cassettes. Probably two thirds of those tapes, or even more, are used to make illicit copies. Unlawfulness on that scale puts into the context the arguments against the blank tape levy.

Another argument is that all the money will go to the very rich, to the Michael Jacksons of this world, not to poorer composrs and song writers. The best judges of the interests of poorer composers and song writers are the bodies that represent those people. Their view is unanimous: that the poorer composers and song writers will secure a significant part of that levy. A limit is placed in West Germany on the amount that any song writer can receive. That is a means of distributing the money raised by the levy. It would be bizarre if we were to say that poorer composers and song writers in this country are in a different position.

The second objection that is made to the blank tape levy concerns the blind, the disabled and other groups. All hon. Members quite rightly take seriously any representations made on behalf of blind, deaf or otherwise disabled people. However, my view is that for the Government, this has become something of a shroud behind which they hide what has been essentially a political and tactical decision, taken for other reasons. I say that because we have made it absolutely clear throughout that we believe that proper exemption schemes should and could be found for such groups. That is why the amendment we tabled in Committee gave the Government a power to introduce the levy scheme. It did not even go as far as some wanted, and impose an immediate obligation on them to do so. That is because the problems of the blind, the disabled, and indeed the oral historians to whom my hon. Friend the Member for Denton and Reddish (Mr. Bennett) referred, require proper schemes to be found.

At present, a scheme to the satisfaction of the blind, the deaf and the disabled has not yet been found. However, copyright Bills come before the House once every 30 years. Surely it is not unreasonable, given the trend of events elsewhere, to say that at least a power should be on the statute book so that negotiations can be held, hopefully leading to a satisfactory conclusion.

Miss Emma Nicholson: I am most grateful to the hon. Gentleman for giving way. Perhaps he can explain why two years of solid negotiations with the blind and deaf organisations, with the Government heavily committed in print to a blank tape levy, have wholly failed to come up with anything that will satisfy those organisations. Will he also explain how on earth he expects a blind person to become other than more dependent, given that any exemption scheme will rely on paperwork, and a blind person will have to find a sighted person to help fill in the form?

Mr. Blair: I do not think that all exemptions schemes necessarily depend on that. Indeed, West Germany provides an interesting analogy. In West Germany, the royalty has been subsumed into the cost of the tape so the price of a blank tape has not risen at all. In any event, paperwork is not the only way of providing an exemption scheme. It could be provided through the allowances paid to blind and disabled people.

I appreciate that the blind, the disabled and the lobbies associated with those groups will oppose any notion of a blank tape royalty or levy, but ultimately, we have to weigh that objection and consider how serious it is—given the commitment to finding a decent exemption scheme —against the interests of those who are having their copyright transgressed and who, if we leave the law as it is, will continue to have it transgressed without any comeback whatsoever. I find that wholly unsatisfactory.

Miss Emma Nicholson: I am most grateful to the hon. Gentleman and I shall not ask him to give way again. I recognise his genuine concern and commitment to making a blank tape levy work for the blind and the deaf, as well as for composers. But can I not get it over to him and to other hon. Members that the majority of those who are blind or deaf are not known as such to society? They are not registered, and they are not members of voluntary organisations. They are invisible because they prefer to be treated as normal and we shall not be able to find them.

Mr. Blair: Those problems are exactly the problems that have been addressed by other legal systems and other Administrations in other countries and they have been overcome.

It is also important to stress that we must be careful not to exaggerate just how much difference the levy or royalty will make. Listening to some of the comments made outside, it seems as if blind people will be prevented from buying tapes following the passage of a royalty levy. That is simply not the case.

It is important to retain a sense of perspective. I do not believe that we could not find a workable exemption that would be acceptable to all parties. If a proper exemption scheme cannot be found, a levy should not be introduced. We have made that clear throughout. That is why we have said that a power should be given to the Government rather than an obligation.

Mr. Andrew F. Bennett: Does my hon. Friend agree that there should be an exemption, not just for the blind and disabled, but for at least all educational users so that the oral historian I mentioned earlier as well as anthropologists, folklorists and others who use tapes in large quantities should not have to pay the levy? Will my hon. Friend also look at the problems for schools? In the new GCSE examination a large amount of work from pupils has to be recorded for moderation purposes. Those are all cases for exemption. However, if there are exemptions will there not be two prices for tapes? If one is not careful, there will be as many infringements by people moving from a legitimate exemption to an illegitimate exemption.

Mr. Blair: Obviously we have to be careful. It would be absurd to have two different prices for tapes. The Australian Government, who a few weeks ago introduced their own proposals for a blank tape royalty, included specific exemptions for educational institutions.

If one put all the exemptions together, they would make up a fraction of the problem of illicit home taping. About 50 million to 60 million blank tapes every year are used for illicit home taping. Therefore, it is important to retain a sense of perspective when talking about the necessary exemptions.

[Mr. Blair]

We believe that the rights of copyright owners are important and it is virtually beyond doubt that they are being infringed on a large scale. We do not say that the levy solution is a perfect one but we do say that it is the best one available. If workable exemptions can be found to take account of the needs of those who deserve exemption, we shall be in a much better position than we are now. Legalising home taping, plus the introduction of a levy system to compensate, must be preferable to the present position. That is the real choice we have to make and we are sure that our judgment is correct.

Mr. Wigley: The Government have got themselves into an almighty tangle. That became clear in Committee and has become clear again tonight. Day after day we hear from the television advertisements that we are moving towards 1992. Surely we should be taking account of what has been happening in continental countries in recent years and we should be arranging our affairs in a way that gives fair play to the composers and musicians in the countries of Britain.

The Government are guilty of bad faith on this issue. That has been pointed out to Ministers by Conservative Back Benchers. The Conservatives fought an election only a little over 12 months ago on a policy of introducing charges on blank tapes and then did an immediate somersault. Government Back Benchers and voters outside the House, let alone Opposition Members, are entitled to some explanation of why the change was made. We have not had an explanation. It would seem that some of the big battalions, possibly geared to Japanese interests and so on, have been lobbying hard and that the Government have succumbed to the lobbying. The way in which blind people and other disabled people have been used as part of that lobby is distasteful. I am not willing to accept, from either side of the House, any accusation that we are not interested in the rights and well-being of disabled people.

Only last week in the debate on the poll tax we heard that there are other ways of looking after disabled people, who will suffer considerably greater increases in the costs imposed on them from the poll tax than from the few pence involved in this issue. We were told that they could be helped through income support and other methods. That argument appealed to Conservative Members at that time. If the argument was valid then, it is valid now.

The argument put by the Royal National Institute for the Blind to those who have been campaigning on behalf of musicians about why it has not come forward with a scheme is that it is not run in a way that facilitiates the drawing up of a scheme. It is a fragmented organisation, and that makes it difficult. If those who campaign on behalf of blind people were to perceive a real difficulty, they would find a way around it, as has been done in other countries.

12 midnight

Doing a wrong to one group does not justify not finding a formula for another group. Pitting one deserving group against another is not a reasonable way forward. Hon. Members from the Opposition parties, at least, are aware of the interests of music unions. Many composers and others have to do on a small income. There could be a scheme similar to that in Germany, where there is a mechanism for spreading out the benefits that come from a charge on blank tapes. Goodness only knows that such groups deserve it. There are mechanisms for safeguarding the interests of disabled and blind people. I am convinced of that. People who are involved with disablement believe that that can be done.

It is not a lucid argument to say that, because of an effect on another group, we shall do an injustice and that we shall not apply the laws of copyright to musicians and composers. There is a way round it. It may be by exemption, it may be by passing over a fund en bloc to the RNIB or other organisations, or it may be by other schemes. I am convinced that it can be achieved.

We are doing the arts in general a disservice by not moving in the direction in which other groups have been moving on the issue. I do not know whether the Government really believe in what they are doing. We have heard from the Under-Secretary of State for Industry and Consumer Affairs, in his last few hours in his present post. I do not know whether he really believes in the change of course that the Government are taking. I do not know whether the Under-Secretary, the hon. Member for Coventry, South-West (Mr. Butcher), who has done such a great job for the Government on the Bill, really believes, as a Minister with a considerable interest in music and composition, in what the Goverment are doing as he moves on to a post in the Department of Education and Science.

The arguments of justice are on the side of making sure that there is a mechanism for recompensing composers, musicians and others. There are other mechanisms for making sure that, in doing so, we shall not do down groups such as disabled people. I should have thought that the Government, with the abilities that they have in other directions, could surely find a way around the problem, even at this late stage.

Mr. Bowis: A little earlier, with great grace and panache, my hon. Friend the Under-Secretary of State for Corporate Affairs stepped down from a previous policy held during the consideration of the Bill. He reminded us of Oscar Wilde's cry that what the world needs is more geniuses with humility; there are so few of us. My hon. Friend was a genius. He showed great humility, and down he stepped with the 28-day shift, and quite rightly, too. Otherwise, we would have condemned our fellow citizens, every month for the rest of their lives, to going back to the tape machine to put on another video to fulfil the terms of the law. We have come up with another solution. He acknowledged that he had left the matter open and had left copyright rather bare and undefended. He suggested that our amendments might cover silent movies only. At least it is a way forward that he can pick up, take away and run with.

I have some sympathy with the Government. I understand their dilemma. They support the principle of copyright and acknowledge that the present law is unenforceable. They accept the principle of finding an alternative, but they do not think that a viable alternative is the tape levy scheme. I am not one who thinks that the levy is the perfect solution for all problems. The best solution is to find a way of enforcing copyright. The trouble is that copyright is difficult to enforce, yet the House was the authority that decided that performers, composers and producers of music and films should have copyright.

The purpose of such a decision was, and can only have been, to provide a right to income for one's work and the right not to have one's work tampered with. But Parliament did not provide the realistic means or the method for the performers, composers and producers to enforce that right. In theory, little Johnny, who takes a cassette to his room and records the tape that his friend has lent him, could be taken to court by the record producer. That is clearly absurd. Such a case would not stand up in court and the public would not accept the "catch-you-out" society that sent tape-detector vans out to establish whether little Johnny was recording in his back bedroom. The tape-copying detector van is not with us yet, and I suspect that it never will be.

We have a law that is unenforceable, and unenforceable laws are bad laws. I do not say that we should abandon copyright law and remove it from the statute book. I say that an alternative form of compensation must be found for those whom we sought to protect originally. The Government have rightly rejected the first option as unfair to the music and films industries, and to composers and performers especially. They rightly proposed a modest tape levy in the past. That was the policy of the Conservative party at the general election and that was the policy on which the Government were elected.

During the general election, my hon. Friend the Minister talked about not wanting to have a tax, but there was a campaign to portray the levy as a tax. The Conservative party explained that none of the revenue would go to the Government. It was said that the funds raised would go to the performers and copyright owners as a royalty payment by the consumer for recording copyright material. Although composers, lyricists and artists assigned their rights to the recording companies, they would be entitled to a proportion of the levy revenue in their own right. That was the policy on which we were elected, and it was a policy which made sense.

Everyone was agreed on the principle and the question was how to implement the scheme. Since then, the Government have said that the scheme cannot be implemented. The industry has said that it could and that it would implement it. France has said that it has been implementing such a scheme since 1985. Germany says that it has been doing it for the past 20 years. Portugal, Spain, Belgium and Italy are saying, "We are about to do it." When the Bill was being considered in Committee, Australia said, "We shall do it too."

The issue was debated in Committee, and it is right that it should be discussed again this evening. We are conscious of the needs of the visually and aurally handicapped and we understand their concern. We insist that any levy should not impose hardship on such people. In other countries, such levies are absorbed by the industry. That means that no cost is passed on to the consumer. The British industry went further than that. The music industry offered a special deal for the blind and the deaf, with free tapes to be provided for such people until and unless it was clear that there would be no increase in price. Instead of having an imposition on such people, a new deal is on offer for those who suffer from sight or hearing problems.

The Government have said that it would be difficult to work out a scheme. In Committee, they said, "It will be difficult to work it out and we do not like the sound of what is being proposed." Surely we had a right to expect that between Committee and Report the Government would be consulting—"You, the industry, say that you could do it. How would you do it? You, the members of the Committee, said that it could be done. How could it be done?" I, as a member of the Committee, have not been asked for my views. I think that, similarly, my colleagues in Committee have not been asked. I do not know whether Opposition Members have been asked for their views, but I doubt it. The industry has not been asked to come forward with a scheme. The Music Copyright Reform Group has not been asked. The same goes for British Phonographic Industry Ltd. the Composers Guild of Great Britain and the British Copyright Council. Since the Committee reported, these bodies have not been asked by the Government how they would put the will of the Committee into practice.

It seems that a decision has been taken behind closed doors to oppose enabling legislation that would enable a scheme to be implemented of the sort that the members of the Committee had in mind.

The Government and hon. Members must remember that we are talking about 100 million blank tapes being imported and sold every year in this country. If we deduct 10 per cent. for those who use tapes for oral history studies —I think that was the phrase used by the hon. Member for Denton and Reddish (Mr. Bennett)—for little Johnny or for recording little Joanna's first squeaks on the recorder, we are still talking about 90 million tapes. Not one penny of the proceeds of those tapes is given to those whose music is being recorded. That is what we are trying to put right. The Government's first thoughts were right. The election policy on which we stood and were elected was right, and I tell those composers, performers and companies to whom I gave my word at the election, "This is not the moment to let you down."

Mr. Malcolm Bruce: I found the Minister's explanation puzzling. Part of the argument is that if it is difficult to enforce copyright, we should not legislate to protect it. Having not been a member of the Committee, I am left wondering why large tracts of the Bill have been enacted if that is the Government's sentiment.

We are discussing a disabling amendment. The Committee included in the Bill—the legislation will be in force for 20 or 30 years—the power to consider a scheme. The Government have said, "We do not want even to consider the possibility of introducing the scheme for the foreseeable future." That is an inexplicable stance for the Government to take, especially as they fought the election on precisely this issue. We are being asked to remove something from the Bill which does not require the Government to do anything; it simply allows them to consider a possibility in the future.

The arguments that have been advanced about the problems of disabled people are out of proportion and perspective. I have not heard any pleas or squeals from those who are opposed to the levy about the VAT that disabled people must pay on blank tapes, which is a far more substantial burden than any levy. I would be in favour of a scheme that reduced or eliminated the impact of the levy on disabled people, but that does not justify removing from the Bill the possibility of considering a scheme in the future without primary legislation.

None of the arguments that have been advanced as special pleading from disabled people are convincing. From certain quarters, that pleading is only crocodile tears. Disabled people could do with many more radical

[Mr. Malcolm Bruce]

reforms and more assistance from the Government than they have received. To hear Ministers pleading the cause of disabled people is, in some cases, a little distasteful.

There are many ingenious ways in which a levy could be introduced so that the concerns of interested groups could be accommodated. We heard the arguments about distribution and who would receive the money, but we are talking only about the principle of setting up a scheme and discussing in detail how that could be done. Limits could be set, and part of the levy could be specifically earmarked for promotional purposes. It would be possible to allocate some of the money to the Royal National Institute for the Blind and the Royal National Institute for the Deaf and make them agencies for the distribution and sale of exempt tapes.

The arguments that have been advanced are not convincing; they are cosmetic and are designed to cover up the nakedness of the Government, who have done a volte-face that has embarrassed their supporters, many of whom have gone out on a limb to support the party line only to be asked to deny what they said after such a short period. It is not often that I speak on behalf of the Government's supporters, but many of them have been given a shabby deal.

I have been involved in one or two meetings where I have heard the vigorous and enthusiastic support of Conservative Members of Parliament for the principle of the levy, and I have seen their satisfaction when they have presented that as the Government's official policy. It is somewhat embarrassing from their point of view that they should be left to defend a volte-face for which they have had no adequate explanation.—*[Interruption.]* The protests suggest that they are deserving of sympathy.

12.15 am

We have failed to receive any explanation for this change, and I believe that the Minister will do himself a great disservice if he does not come up with a more convincing explanation at the end of this debate than he did at the outset. The issue has been thoroughly discussed, had all-party support and had the majority of the House behind it, but has reached the stage where we are now being asked to reverse that policy.

The Minister should explain to us why he cannot leave in the Bill enabling clauses, why the prospect of ever having a levy should be excluded from the legislation and why we will have to come back to the House and introduce new legislation if there is to be such a levy. We should resist the Government amendment. I hope that the Conservative Members, who have made clear how strongly they feel about it will stay behind and join us in the Lobby. I believe that they should defend their manifesto in a way that the Government are incapable of doing.

Mr. Chris Butler (Warrington, South): On 24 May, my hon. Friend the Minister said:

"I will look again to see whether we can find a way to meet the mischief that we have identified."—[*Official Report, Standing Committee E;* 24 May 1988, c. 343-4.]

I listened carefully to my hon. Friend's speech, but I did not hear any new way to meet the mischief that he admitted. There was no remedy for the injustice that the White Paper recognised in 1986, when it said:

"the law should be amended to ensure that the owners of rights are able to derive benefit from them."

My hon. Friend has dismissed the blank tape levy as rough justice. That is so, but the present situation that the Government support trades rough justice for no justice. At the moment, the record industry is getting the rough end of the Government's judgment.

Large amounts of money are involved. It is estimated that two and a half times as much music is privately copied as is bought in the shops. The record industry has not been greedy. It said that it would settle for the tape levy, which would raise £6 million or £7 million a year. I believe that that is remarkedly reserved. The record industry is healthy, but many composers and song writers earn less than £5,000 a year from performing royalties—in fact, some 94 per cent. fall into that category. Their loss would be proportionately more significant, and it is they who will suffer most if this illegality is not clamped down.

I wonder whether there is a parallel with the public lending right, which gives compensation to authors for loss of sales because their books are being lent from public libraries. I wonder whether a similar scheme could be devised for records, perhaps costing £3 million to £4 million. I am sure that that would cost less to administer and be easier to collect than the blank tape levy.

If the majority of adults now tape illegally, if they are not to be penalised in any way, and if no payment is to be collected by this admittedly cumbersome levy, at least I believe that we, the collectivity of taxpayers, can right the most glaring injustices caused by those infringements. After all, the formula or any public listening right could be weighted in favour of the song writers and composers, which may be a way to meet the mischief that the Minister has admitted.

Mr. Buchan: I shall be brief, but I thought it right that a voice which was not heard in Committee should be heard on this issue, especially as my only other contribution was to release certain aspects of copyright in relation to music.

I am impressed by the power, force, scale and nature of the people who have been advocating in Britain the need for such a levy to secure not rough justice, but an element of justice. The Musicians Union is one. I remember a campaign with which I have been associated with the Musicians Union over the years—the campaign for live music. It is interesting that even at this late stage the Musicians Union has again reminded us of the importance and value to it of such a levy.

The problems facing professional musicians in this country are exacerbated by the increasing access to recording and broadcasting, which has meant that live music is under threat because we have been getting a kind of diminution of the base from which our leading musicians come. At one time, when music was heard live, there was a broader base of practising musicians from which the top players emerged. As soon as there is mass recording and broadcasting, as we have now, the base begins to wither because the concentration is on those at the top of the apex who are heard and broadcast. We see that not only in pop and rock, but in classical music.

I was recently reading some of Bernard Shaw's music critiques and realised that the majority of people in this country could hear any of the Beethoven quartets far more frequently than Bernard Shaw could have heard them in his lifetime. If he heard one of the quartets three or four times, he was lucky, yet any of us can hear any of them any

number of times. That makes me all the more aware of the perception of his criticism. We never take such facts on board.

I believe that we should have such a levy precisely because I believe that we could feed it back into the music world in general. One problem is that because of the absence of a levy—however small—the concentration is on only a few elite musicians. I mean elite in the sense of the best known because although I do not think that some of them, are good musicians, they are at the top of the pop scale, for a period. Music then becomes specialised, and advanced recording of that elite militates against the advanced recording and sales of cassettes of others who are not quite at the level of Michael Jackson in terms of the public's boosted and and hyped eye.

Therefore, the second, middle or young stage of musicians are militated against. When other music is bought, there is a limitation on the recording of that which those groups want to record. All that helps to militate against what we are seeking to do, which is to extend the base and productivity of the live musicians from whom we will get growth for the apex and the top players of the future.

It is for that reason—among many others—that there is a musical argument about the blank tape levy. Hon. Members have referred to the difficulties that will arise from such a levy and have asked how it will be applied and dealt with, and whether we will put it back into the industry in the form of lending rights as we do with libraries, which was mentioned by the hon. Member for Warrington, South (Mr. Butler).

I think that we can go one better than that. The problem of library lending rights is that those who are already well paid also receive the best royalties from the libraries. The single serious writer may end up with virtually nothing. Jeffrey Archer, for example, would receive more than, say, G. M. Trevelyan at present. G. M. Trevelyan said that it was a disaster for him when his "History of England" became a best-seller, because he had all his taxation problems in one period. If it had been spread over 10 years, as he had expected of an academic work, he would have been a good deal better off.

The problem of lending rights is that those who have, get again. I do not know what Jeffrey Archer pays—but come to think of it, never mind what he pays. As I have said, there is a problem. There is a better solution which was advocated in Labour's "Charter for the Arts", which I fear has suffered a sad demise. We argued that the levy should be used to develop the industry. I have argued for a public domain copyright for traditional music, and I think that we should seriously consider a dead writer copyright to assist theatres and to encourage new writers for the theatre. Such a levy could be an encouragement for new musicians and composers.

I believe that the Musicians Union is saying the same as me, except that it cannot say it so directly. We should invest in the base, for the musical development and education of new musicians, new compositions and their inspiration. The modern classical composer has great difficulties. They are not all Maxwell-Davies. A serious composer has difficulty making any money. They teach or perform. Edward McGuire is one of our leading Scottish composers but he lives by, among other things, teaching and playing in a folk group.

We could assist the levy to help new composers. All political parties have been pledged to a levy. The Conservative party has not made a convincing case for reneging on its pledge. The Government have talked about difficulties. Every Government, including the one I was in, talked about difficulties when they were afraid to face up to a principle. Difficulties become a substitute for tackling the principle.

Of course there are problems with various organisations, but we should involve them more, saying, "Here is money. How can you best use it?" I do not accept that there is a basic problem. It is a matter of will. The new clause does not say how we should proceed. It says that it will be 30 or 40 years before we consider the matter again, so we should at least write in the power to act. It does not suggest that we should act. Such a provision will sharpen thinking enormously.

I hope that Conservative Members will stick to their pledges. Whatever may be their cowardice in the face of pressures such as we have witnessed, they should say to those who say, "Think of the deaf, the poor, the blind, the lame and the halt": "You did not give a damn for the deaf, the poor, the blind, the lame and the halt when the poll tax was being passed." Such an argument will not wash. Conservative Members who want to stick by their policies had better stick by their courage, their convictions and their party programme, and vote with us.

Mr. Jim Lester (Broxtowe): My role in life in this Parliament seems to be speaking late and briefly about matters on which we feel strongly.

I support my hon. Friends the Members for Hertfordshire, South-West (Mr. Page) and for Battersea (Mr. Bowis), who toiled long on the Committee, as have all who have spoken in this debate. I declare an interest in that I am concerned about intellectual property and have been since I came to the House. I welcome this, the first Bill to begin to deal with that issue.

It is not possible to divide the concept of intellectual property between deserving authors, computer programmers and designers and the undeserving performers of music, and expect to carry any weight in international circles. We have a Bill with 294 clauses, and we are leaving a damned great loophole in it. Some 90 million tapes are bought each year. They exceed the number of tapes of original works. If the Bill is left as it is, it will contain a massive loophole on the most essential element of intellectual property. I have listened to all the arguments. I have rehearsed all the arguments with every Secretary of State in the Department of Trade and Industry since 1982. At the beginning many of them were reluctant to listen to the arguments but in the end everyone accepted the justice of a blank tape levy.

12.30 am

As has been said, we have been through the procedures of a Green Paper, a White Paper, the Queen's Speech and the Bill. The only two Ministers I got my hands on were the two who arbitrarily reversed the decision without consulting anybody. If the Government think that they can gain respect in the House by passing such legislation, they should think again. There is the matter of rough justice. I have taken part in phone-in programmes. Young people have phoned in and when they understand that they are being asked to pay 10p for the privilege of legally copying anything that they wish, they have said that that

[Mr. Jim Lester]

is nothing. They say that compact discs cost £9 or £12 and that they would welcome being put on the right side of the law.

Many hon. Members do not understand what young people do. I invite those hon. Members to go into record shops and have a look around them. On the same side of the shop as the compact discs and tapes they will find blank tapes. Most young people that I know, and certainly my nephews, rush home with a new record and copy it for all their friends and dish it out generally. Of course they do not necessarily charge, but such recording is common practice using the equipment that is now available. They might even copy records for my hon. Friend the Minister so that he can play it in his car when he drives down from his constituency. Perhaps he does not realise that he is breaking the law when he puts such a tape in his machine.

Mr. John Butterfill (Bournemouth, West): Does my hon. Friend agree that the people he is seeking to protect, small composers and people who are struggling, would not benefit from the levy? The large record producers who do not seem to be in financial difficulties would benefit.

Mr. Lester: Does my hon. Friend seek to defend the interests of successful authors such as Jeffrey Archer? I see no point in protecting his rights because he sells many books and makes much money from copyright. Under this levy contracts would change dramatically. With the levy in place new contracts in the music industry would contain clauses that would be different from those that were in place before the levy.

People who would not use blank tape to copy copyright are a tiny minority. The argument of rough justice is turned on its head. It is rough justice that satisfies 90 per cent. of the people who use tape to break copyright as opposed to the tiny percentage who do not. My right hon. Friend the Secretary of State for Trade and Industry defended his decision in the Lords. The only argument that he could think to advance was about the blank tape in his answerphone. He perhaps did not realise that that tape was excluded from the legislation because it would be very unlikely to run for more than 35 minutes. Even if it was not excluded, how many times does one buy a blank tape for an answerphone? I suggest that it comes free with the kit and probably lasts 10 years. On that basis it probably costs a penny a year and I hardly think that that would cause hardship to my right hon. Friend.

This is a shabby move and we will regret it. It makes the legislation that we seek to pass very arbitrary. It will be difficult for my hon. Friends to defend in the courts of Europe and in Singapore and Taiwan, where we choose to reinforce the principle of the copyright of intellectual property. I hope that, even at this stage, the Government will consider thinking again.

Mr. Simon Coombs: There is no more intractable problem in the whole Bill than that which exercises us in this clause. Deliberations by many Governments and, most recently, by the European Commission, have failed to find a good solution to the problem of home taping. Where the rights of the owners of copyright are enshrined in law, as in the United Kingdom, Eire, Belgium, Greece, Luxembourg and Italy—all countries within the European Community—copying is simply theft.

Normally and naturally, society's response to theft is to condemn it and to demand action to stop it. But what happens when the theft is perpetrated by a substantial proportion of the population? It has been estimated that more than 50 per cent. of the population indulges in home taping. When my hon. Friend the Minister said that we were talking about thousands of people, he was rightly corrected by my hon. Friend the Member for Hertfordshire, South-West (Mr. Page). We could be talking about 28 million people or more; it is certainly not thousands.

It is the development of the technology involving a major improvement in the quality of copying equipment and a reduction in its price which has made this practice possible, and the steady reduction in the cost of the equipment has made it increasingly widespread.

The members of the Standing Committee were annoyed that they had been unable to obtain a copy of the European Commission's Green Paper. That document has now become more widely available, and it would be worth while for the House to consider what happens in a number of other European countries. In six countries of the European Community—the United Kingdom, Eire, Greece, Luxembourg, Belgium and Italy—copying is not permitted. In one country, the Netherlands, it is permitted, and in the remainder—Denmark, Germany, Spain, France and Portugal—it is permitted but with the understanding that there should be recompense for the owners of the copyright.

In other words, nearly half the countries of Europe allow for a levy or royalty on blank tapes and the trend in Europe and elsewhere in the world is in that direction, yet in this country the Government choose to buck the trend and deny copyright owners what is rightfully theirs.

The 1986 White Paper "Intellectual Property and Innovation" put forward proposals for a blank tape levy in considerable detail. The Government concluded that copyright owners and performers should be remunerated for the use of their material. The White Paper said:

"there is no realistic alternative to a compulsory levy on blank recording tape as a means of providing such remuneration".

The Government were right.

It was proposed that the royalty should be payable by manufacturers and importers who were the first traders in the United Kingdom and that the Secretary of State should specify by order the categories and performers entitled to benefit from the royalty proceeds. At that stage it was suggested that the rate of the royalty should be fixed at 10 per cent. of the manufacturer's price for the blank tape.

The Government said that in reaching their conclusions they had had particular regard to

"the need to put the law on a sensible and—as far as possible—enforceable basis, as well as the need to balance the interests of copyright owners and performers with those of the public at large."

I make no apology for putting those words on record once again. They represent the views of the Government in 1986 and even in 1987 at the general election. Those of us who fought the election on that clear understanding of the Government's intention feel aggrieved. We feel let down by what happened subsequently. A new Government took office and new Ministers were appointed to the Department of Trade and Industry. Suddenly, and without any warning, the weathercock swung and the policy changed. None of the facts had changed and none

of the background arguments had changed—only the Ministers. It could go down on record as the fastest U-turn of all time.

What are the arguments that the Government now advance in support of their rejection of the levy, given that they argued comprehensively and satisfactorily for such a levy prior to the election? The Minister has said that there is no acceptable scheme for organisations representing the blind. That is not a great surprise to me. If those organisations were asked, "Is there a scheme that you would accept?", the answer would naturally be no. If the Government had said, "We intend to introduce the levy; will you tell us how you would like to see your members helped?", the answer would have been yes. If one asks the wrong question, one gets the wrong answer.

Many blind people do not want to be treated differently from the rest of the community. Many are keen to have their disability set aside and to be treated as ordinary people, as they are in every other respect. Therefore, why should the Government lean over backwards to help a small proportion of the population who do not want to be treated differently? That would be unsatisfactory, especially as the vast majority of the population would be allowed to abuse copyright and break the law.

Perfectly adequate proposals have been put forward for exempting tapes of less than 35 minutes as well as proposals to make other exemptions that would have satisfied blind organisations had they been put on the spot and asked to discuss them seriously.

The idea that the levy is a tax is constantly raised as a reason for its rejection. My hon. Friend the Member for Battersea (Mr. Bowis) has already quoted what the Government, prior to 1987, said about that. It is not a tax but a royalty or a levy. A tax can only be an impost of Government on people for the benefit of raising funds for that Government. The levy does not fall into that category and every time a Minister uses the word "tax", he is wrong and it is right that we should correct him.

We have been told that the bureaucracy involved is too complicated. The collecting societies already exist and have already said that they are prepared to take on that extra responsibility; after all, what is the responsibility? It means collecting one cheque per annum from each importer of blank tapes, most of which come from the far east. There would not be a great deal of bureaucracy. The cost would lie in the distribution of the revenue from the levy to those who are entitled to receive it. It is up to those receiving it to reach a solution as quickly as possible about how to distribute the levy proceeds to reduce their loss of income. West Germany and France have embraced the levy and it seems to work well for them. I find it impossible to understand the argument that it could not work well here.

Even at this late hour, a number of factors relating to the problem have not been discussed. Six times more music comes from taping than from the original records and tapes. That recording is made from the radio or from records borrowed from others. The basic product of composers, musicians and record companies—irrespective of which of them is the copyright owner—is exploited and the reward of that owner is drastically reduced. The Government would want us to believe that the amount involved is small, but more than 50 per cent. of the population copy music. Already 50 per cent. of the owners of compact disc players use them in conjunction with tapes to record improved quality music. Eighty per cent. of those between the ages of 8 and 14 are already copying music. More and more younger people are copying music and therefore, in the future, a higher proportion of the population will copy music.

Ninety million blank tapes were imported in 1986. The figure for 1987 will be nearer 100 million. Ninety per cent. of them are used for copying music. The only weapon that the Government offer the aggrieved owners of a copyright is a civil action for damages or compensation, which is virtually unsustainable in the courts. The Government are failing in their duty to these people.

12.45 am

In Committee my hon. Friends proposed that the Government should be enabled to introduce a licensing scheme. The Government do not want it. Why not? Are they particularly anxious to support the importers of Japanese tapes? Are they anxious to deny support to a highly successful indigenous industry, which brings in foreign earnings and is being robbed? Are they anxious to avoid following the lead of their partners in the European Community? Surely not. Are they anxious to resist the sensible arguments of my hon. Friends? Are they anxious to do a U-turn away from their policies of the previous Parliament? Surely not. I do not know why the Government persist with this crazy policy. They will not tell us why——

Mr. Butterfill: Does my hon. Friend agree that it might be something to do with the fact that the general public might conceivably not understand why we would be taking money from the blind to give to the Beastie Boys?

Mr. Coombs: My hon. Friend attempts to drag me back to the arguments about the blind. If he has been listening to my speech he must know the answer to his question. I shall deal with his point about the Beastie Boys, by which I assume he means the pop group and, perhaps, the record industry. It is not the job of the House or the Government to play Robin Hood and decide that the rich are rich enough. The law is the law, and the House should consider that. If, as a result of upholding the law, those who are wealthy become more wealthy, so be it. We cannot pick and choose and tell wealthy people to give up some of their wealth because someone else has found a way of stealing it from them. If we adopt that view, we are all wasting our time here. I do not want to do that.

In fairness, we should note the Government's willingness to take action on the rental right and on the protection of anti-spoiler devices. Both of those are potentially greater threats to the record industry than home taping. We thank the Government for the action that they propose to take. But it amounts to a policeman telling someone that he would take action to stop him being murdered but that he was too busy to stop him being robbed. I do not see the logic or justice of that. We are entitled to demand that the law be upheld. The idea that action on future problems obviates the need to deal with the present one is not tenable.

Finally, I declare my interest. I am a customer of the record industry. I want it to prosper. Without its success, there will be no money for the non-commercial classical music which I love, and no money for the experimental new groups of tomorrow. Had we adopted this policy 25 years ago, when there was little home taping because the technology was not available, we might not have enjoyed

[Mr. Coombs]

the music of groups such as the Beatles, because the money for contracts to record them would not have been forthcoming.

The Government have failed to deal with the problem of home taping. They have rejected a sensible solution that has been accepted by other Governments. I cannot be like the Vicar of Bray and agree with everything the Government say. If the Government want to stand on their heads from time to time, that is fine; but I shall not join them in what must, for all of us, be an uncomfortable and undignified attitude. If I must be disloyal, I choose to be disloyal to the current policy. Two years ago, I should have been loyal, because the policy then was the opposite of what it is today. I may prove to be loyal again in the future.

Miss Emma Nicholson: Perhaps I may make a point that has not been covered tonight or in Committee. There has been a change since the general election; indeed, there has been a change since the White Paper. If right hon. and hon. Members have a moment to listen—it is not late, but early—they may see the reasoning behind the Government's change in stance.

I speak about technological advance and about further consultation with the computer software industry. Since the White Paper was issued, there has been a shift in the way in which sound recordings are made. Traditionally, music has been recorded in analogue form and computer software has been recorded digitally. That is now changing, and music is being recorded digitally. That means that there is no difference between what one chooses to record and what one chooses to copy. Some of the machines that are coming over from Japan—far more worrying than the market being flooded by blank tapes from Japan—will have exactly the same effect on recording computer software as they will have on recording material produced by the Rolling Stones, if they still exist, or by J. S. Bach. It is the same equipment, and it will make the same recording.

The problem is that, if we legalise the home taping of sound recordings, which we would do by imposing a 10p levy on the price of a blank tape, we shall also legalise —perhaps without meaning to—the home taping of computer software. That represents a very different amount of money. The imposition of a 10p levy on a blank tape may lead one to believe that the composer has been properly recompensed. Perhaps the tape on which one is recording costs £1, so 10p is a nice sum. But computer software may have £2 million-worth of human intellectual endeavour within it. How could we price the levy on that blank tape? I suggest that £100,000 would not be too much.

The technology has shifted in the past 18 months or year. Perhaps that is why the Government have shifted their stance. The computer industry is a £2 billion industry and is growing at the rate of 25 per cent. a year. Of course, people who want home taping to be legalised will answer that the 10p is not meant to pay for computer software, and that people will be authorised to copy only sound recordings. But there will be a problem in that industry, because in today's world sound recordings also include video recordings. The general practice is that when a pop group makes a sound recording, it makes a video, too. The music is recorded not just for the ear, but for the eye. What fun we shall have if it becomes legal to re-record a video at home, but it is legal to record the audio tape only if one has paid the levy. Yet with an optical disk one uses the same machinery to record both. Perhaps we should leave the proponents of the 10p levy to sort out that red herring for themselves. My problem is how to explain to the House why it is impossible to go ahead with a blank tape levy, given the advances in modern technology.

The computer industry has adopted a completely different stance from that adopted by the sound recording industry. It has put its house in order. I have already referred to the fact that it is growing at the rate of 25 per cent. a year. In the last three years it has managed to contain the growth of theft. Theft has not increased by 25 per cent., in line with the growth of the computer industry. It has remained static.

The industry has saved itself £50 million a year in each of the last three years. It has done that by mounting prosecutions in the civil and criminal courts against those who illegally take computer software. I ask myself whether that might be a possible way forward for the sound recording industry. It has not mounted a single prosecution during the last 10 years against illegal theft. I wonder whether the sound recording industry has dragged its feet because it expected the Government to do its work for it.

Mr. Lester: Is there not a considerable difference in scale between copying computer software and those who are likely to do it for gain and prosecuting every young person between 16 and 18 who makes copies of compact discs? It is difficult to accept my hon. Friend's comparison, because of the gains that those who copy computer software make when they resell the item.

Miss Nicholson: My hon. Friend asks three questions in one. He may not realise the relevance of personal computers. Their sale has increased markedly in recent times. Young people often have in their bedroom a small machine, relatively modest in price, whose disks contain several million pounds-worth of research. Young people like to copy the hard disks of personal computers, thereby creating another floppy disk or hard disk, and to pass them on to brothers, sisters, cousins and school friends. That is why I referred not just to criminal prosecutions but also to civil prosecutions.

I failed to refer to the third leg of the computer software industry's tripod: the education campaign. It has been shaming people into not copying. It has conducted a good educational campaign, including the distribution of pamphlets. There has been education, as well as civil and criminal prosecutions.

My hon. Friend also referred to compact discs and, by implication, to the quality of the recordings. I believe that compact discs will be out of date fairly soon. They will be overtaken by digital recordings that produce excellent, perfect copies which will be sold all over the world. Digital recording has changed the picture. The quality of digital recording means that the copy is as perfect as the original recording.

Much has been made in the debate of the European Community's Green Paper. Chapter 3 deals with home taping. My hon. Friends have quoted selectively from it, but the Green Paper does not recommend the harmonisation by member countries of their approach to the levy. It proposes a multi-faceted approach. In other

words, it suggests that there are a number of ways in which member countries of the European Community can tackle the problem of home copying. The blank tape levy is only one solution, and because of its difficulties the Green Paper does not recommend that all member countries should be harmonised and should follow that route.

I am

The Green Paper recommends a hardware solution which it highlights as the method which would solve the problem completely. That is the solution whereby, burnt into the core of the recording machine, is material which stops home copying. Encoded on the tape machine and burnt into the hardware is a piece of equipment which will stop copying of that tape if the particular encoding is not present. That is the route which the European Green Paper overwhelmingly recommends to member states.

Finally, if I may look back for a moment, I extend to the Government thanks for their sensitivity in dealing with the practical problems of the disabled, and for listening to the concerns of the computer software industry about information technology. In this clause, as in new clause 5, clauses 17(2) and 24 in particular, the Government have reached conclusions which will provide the proper framework for the continuing creativity and growth of that immensely valuable industry. The Minister and his civil servants in the Department of Trade and Industry have all our thanks.

Mr. Maude: When I introduced the amendment I said that I had no new arguments to offer. This subject has been well aired over many years and the arguments are all familiar. I hope that my hon. Friends and Opposition Members who have spoken in the debate will not take it amiss when I say that no new arguments have been offered by them either. We are all very familiar with this well-worn ground and I hope that the House will agree that we now need to reach a decision.

The hon. Member for Sedgefield (Mr. Blair) said earlier that these were not matters on which any of us could be certain that we had a monopoly of the truth or of wisdom. He ended his speech with a ringing declaration that he was certain that his judgment was right. Nonetheless, clearly we are not dealing with the eternal verities, but with a practical matter on which a practical judgment has to be made. The practical judgment which the Government have made is that a scheme to introduce a blank tape levy cannot be formulated in such a way to do justice to the interests of disabled people.

I have to say to hon. Members who have blithely and glibly said that it can be done if people of good will put their heads together in a practical way and resolve it, that, at a time when the Government were fully committed to introducing such a scheme, we worked hour after hour with the relevant bodies to try to formulate such a scheme, and I have to say, in all honesty, that it cannot be done. It has been suggested that we keep the power on the statute book just in case it becomes possible later on. I honestly do not think that it would be an act of good faith to do that and to hold out the hope to those who set store by it that at some stage such a levy will be introduced. It cannot be done, so it would not be right to retain the power.

It has been pointed out that West Germany has had such a scheme for 20 years. However, that scheme makes no provision for exempting or providing relief for innocent users of blank tapes. To say that that provides a model for us is to ignore the remarks of those who have been propounding the scheme. As has been made clear tonight as well as in Committee, a precondition of having a levy was that a scheme for providing relief for innocent users should be incorporated. In view of the Government's practical conclusion that no such scheme can be formulated, I have no alternative but to invite the House to agree with my amendment.

Question put, That the amendment be made:—

The House divided: Ayes 134, Noes 37.

Tellers for the Noes:
Mr. Allen McKay and
Mr. Alun Michael.

Amendment accordingly agreed to.

Amendments made: No. 59, in page 25, line 39, leave out 'hiring' and insert 'rental'.

No. 60, in page 25, line 41, at end insert 'in electronic form'.

No. 61, in page 25, line 42, leave out subsection (9).

No. 62, in page 26, line 2, leave out 'hiring' and insert 'rental'.—*[Mr. Maude.]*

1.15 am

Mr. Doran: I beg to move amendment No. 5, in page 26, line 2, at end insert—

'(11) No order made under this section shall apply to a public library and such libraries shall be treated as licensed by the copyright owner to hire to the public copies of sound recordings, films or computer programs without payment of royalty.'.

Mr. Deputy Speaker (Sir Paul Dean): With this it will be convenient to discuss Government amendments Nos. 156, 158 and 160.

Mr. Doran: As clause 65 stands, it provides for an automatic licence of right for the payment of royalties in certain instances. This applies to

"the hiring to the public of copies of sound recordings, films or computer programs".

The amendment seeks to exclude public libraries from the operation of the royalty clauses. Libraries are public bodies carrying out public duties. They tend to hire tapes and videos that are not in demand and thus are not easily obtainable from commercial lending sources.

Mr. Maude: Public libraries in the United Kingdom spend about £4 million a year on purchasing sound and video recordings for lending. The interests of copyright owners would be adversely affected if public libraries were exempt from the rental right.

Making public libraries subject to the right will not necessarily add to public expenditure. Library authorities have power, if they wish, to pass the rental fee on to the people who borrow sound and video recordings and computer programs from them.

The Bill as it stands would allow public libraries to avoid the rental right by lending sound and video recordings and computer software without charge.

It is Government policy to encourage public libraries to generate new income for growth by providing a wider range of charged services. The Government therefore intend to make public libraries subject to the rental right whether they lend free or for a charge. Amendments 156, 158 and 160 will achieve that.

Mr. Doran: I am not satisfied with the Minister's response, but I beg to ask leave to withdraw the amendment.

Amendment, by leave, withdrawn.

Clause 69

RECORDING FOR PURPOSES OF TIME-SHIFTING

Amendment made: No. 243, in page 27, line 31, leave out subsection (2).—*[Mr. Maude.]*

Clause 76

REQUIREMENT THAT RIGHT BE ASSERTED

Mr. Fisher: I beg to move amendment No. 9, in page 30, line 19, leave out from 'public' to end of line 21.

Mr. Deputy Speaker: With this it will be convenient to discuss amendment No. 10, in page 30, line 22, after 'public', insert

'otherwise than by broadcasting or including it in a cable programme service'.

Mr. Fisher: As Ministers know only too well, we are staunch supporters of the importance of moral rights. We shall be advancing that support when we come to support amendment No. 11. There are circumstances, however, where moral rights are impracticable, and we believe that the case that has been made by broadcasters—I understand that the Government are aware of it—is one such example. If clause 76(4)(a) stands, broadcasters filming a programme of pictures or sculptures for an arts programme would be obliged to identify at the end of the programme every artist and every work that has passed in front of the camera.

Mr. Butcher: I am rather surprised that the hon. Member for Stoke-on-Trent, Central (Mr. Fisher) tabled the amendment. Opposition Members devoted much time in Committee to trying to strengthen the moral rights of authors, but are now suggesting that we considerably weaken them. They are singling out one group of authors whose cause they have hitherto championed—photographers. Amendments Nos. 9 and 10 seek to deprive the authors of artistic works of the right to be identified when their works are broadcast or included in a cable programme service. I assume that the amendments have been tabled on behalf of broadcasters who are concerned about identifying photographers whose works are included in television and cable programmes.

In Committee, I explained our reluctance to introduce any further exceptions to moral rights. We feel that we have gone far enough to meet the concerns of users of copyright works who feared that their normal business practices would be turned upside down by the new moral rights. The Bill already provides that, first, the paternity right does not apply to employees. It would not even arise in the case of a photographer employed by a broadcaster. Secondly, clause 78(5) disapplies moral rights in respect of

any work made for the purpose of reporting current events. This would include a photograph taken to illustrate a news item.

For works made by freelance authors for non-current affairs programmes, there are further safeguards. The paternity right has to be asserted formally by the author concerned before it can be effective, and there is always the possibility of agreeing to a waiver of the right. These provisions offer plenty of scope for broadcasting organisations to reach satisfactory contractual arrangements with freelance photographers.

The amendments pick on one group of authors for rather unfair treatment. I cannot see why the author of a literary work—such as a poem recited on television—should enjoy the paternity right when the author of the photographs broadcast to illustrate the poetry should not. I believe that they should be treated in the same way. Television is a very important medium for authors, as it offers a unique opportunity to reach a wider audience. It would be unfair to take this opportunity away from photographers without very good reasons. I am not persuaded by the hon. Gentleman that there are difficulties for broadcasters in the Bill, and, regrettably, I must therefore resist the amendments.

Mr. Fisher: It is late, and I accept that it is confusing when there are so many amendments. The Minister's brief to resist the case of photographers was a good one, but I was not making a case on behalf of photographers.

Visual images are referred to in line 20 of clause 76, which amendment No. 9 seeks to delete. A broadcast for "Arena" or a similar arts programme, which showed in front of a camera a series of sculptures or paintings, would be a visual images broadcast. If the clause stands unamended, the moral rights of all artists involved would have to be recognised, and at the end of the programme there would have to be a long and tedious list of every artist represented in the documentary or programme. Surely that cannot be the Government's intention. I accept what the Minister has said about photographs, but could he deal with works of art that are broadcast during a television programme?

Mr. Butcher: I am grateful for the hon. Gentleman's indulgence, especially at this time in our proceedings. I do not know whether the particular category I was referring to was the one that he wished me to deal with, but I did mention the point about waivers. I said that alternative arrangements could be made. It is a question of presumptions in the Bill. I believe that the arguments that I have adduced for one category are pertinent for the category that he mentioned.

Amendment negatived.

Clause 78

EXCEPTIONS TO RIGHT

Mr. Fisher: I beg to move amendment No. 11, in page 32, leave out lines 8 and 9.

I believe that the Government have recognised, and the Minister has recognised in his remarks, that in Committee we had been staunch supporters of moral rights. Amendment No. 11 seeks to assert the moral rights for journalists. It is a pair with our amendments Nos. 4 and 3 that we discussed earlier, and, sadly, we were not able to persuade the Government to change their mind on that occasion. However, it is important that we should go on record as saying that the journalists, having lost their effective economic copyrights because the Government refused to accept amendment No. 3, should retain at least their moral rights. Sadly, clause 78(3)(a) removes even their moral rights. It is a black evening for journalists when the rights that they enjoyed under the 1956 Act are not only being taken away in economic copyright, but when, at last, other classes and sectors of copyright owners are being granted moral rights. We applaud the Government for granting those rights but do not agree that the journalists, as employed authors, should be excluded.

The Government have not had a good night in protecting the rights of journalists, but if they accepted amendment No. 11 it would be some sop to the journalists that their moral rights—their integrity tied up with their intellectual copyright—would be acknowledged. If the Minister does not accept this amendment, he will compound the felony of the Government's economic copyrights with the ending of their moral copyrights even before they have begun.

Mr. Rowlands: Subsection (3) is the most obnoxious part of the Bill. It says that anyone who is an employee does not have moral rights over what he writes. It is a simple point, but it is the reason why we seek to delete it.

I shall remind the House of what moral rights are. They are the rights of a person who writes or produces something to prevent distortion of his work by the owners—in this case by the owner of a newspaper or a magazine. Apparently, we give those rights to individuals who write on a freelance basis up to a point, but we do not give it to anyone who is employed. The notion that an employee has no moral rights over what he writes is one of the most obnoxious features of the clause.

On various occasions it has been said that moral rights could not be given, because a person is writing for a newspaper on a daily basis, events are moving and there is a need to edit copy, and therefore what was actually printed was often a collective work. In some ways, I can understand the practical arguments of daily journalism, but when the removal of those rights is considered with subsection (6)(b)—which actually removes the moral rights of anyone who writes for a newspaper, magazine or a similar periodical—one finds that if one wrote an in-depth article as an employee of a quarterly magazine, which would have nothing to do with the instant nature of daily journalism, one would still not have moral rights over that work. It would still be possible for the editor of a quarterly magazine to distort, edit and change the whole nature and character of that in-depth article. If one takes 3(a) and subsection (6) together, that is the effect of the provisions of the clause.

We should object strongly and press the Minister again to explain why all employees are not entitled to moral rights. Many newspapers, magazines and periodicals will carry reflective pieces which require the sort of research that should attract moral rights.

I did not find the Minister at all convincing in Committee about subsection 3(a) or subsection (6). He got in a terrible tangle about what a periodical and a magazine are. We believe that an employee of a newspaper, magazine or periodical is perfectly entitled to moral rights over what he writes.

1.30 am

Mr. Doran: The 1981 Green Paper introduced the idea of moral rights. It was fairly specific about what a moral right was to be. It emphasised that it was to be quite separate from the economic right which attaches to copyright.

There was no mention of any restriction of the moral right. The White Paper of 1986 used the same terms and said:

"the Government proposes to legislate for moral rights as follows:

(a) authors will be given the right to claim authorship and to object to distortion, but not to modification of a work to which they could not reasonably refuse consent;

(b) these moral rights will be independent of the economic rights, and will be exercisable only by the author."

It then explained what would happen after the death of the author. There is no restriction to the right there. A moral right seems to fill the gap left by the Government's removal of copyright from journalists. I wonder what the Government find so objectionable about the author of a work, regardless of whether he has any economic rights on the basis of being the author, having such a right.

We had a long debate in Committee about the impact of the law of defamation in this area. The Government are being disingenuous. I do not understand why such employees should be excluded from having a moral right. It is a concept I welcome.

Mr. Butcher: As the hon. Member for Merthyr Tydfil and Rhymney (Mr. Rowlands) said, the issue has been debated at length. I am sorry that he did not find what I said in Committee convincing. The situation with regard to the paternity right now is not too dissimiliar from that which is proposed in the Bill.

Local and national newspapers are not littered with bylines by right in the exercise of moral rights of authors over every piece that appears, and I have not heard Opposition Members argue that that should be the case. Their difficulty has been to find amendments that would not impose new conditions, not to say restrictions, on how newspapers have traditionally been put together.

The question before us is whether we should unravel one of the basic principles of the Bill—the distinction we have made between the rights of employed authors and those of freelance authors. We have tried to produce a formula which recognises the needs of the market place and which defers, as it should at the appropriate moments, to the Berne convention. That is the basis of our approach. I feel that I can ask the House to resist the amendment, but I shall come back to that point in a moment.

Mr. Fisher: Before the Minister leaves this point, will he widen his remarks? Once again, as in Committee, he has confined his examples to the newspaper industry, with some of the pressures of time and the difficulties that my hon. Friends have already referred to. We all acknowledge that there are genuine difficulties there, although we believe that they are not as great as the Government make out. Will the Minister accept that the way in which clause 76 is worded covers a range wider than just the newspaper industry?

The curator of an art museum or gallery, for instance, might write the foreword of the catalogue for an exhibition, which will be a work of great scholarship, perhaps distilling a lifetime's work and understanding of a particular artist or period of furniture. However, because that person would be an employed author, employed by the gallery, he or she would have absolutely no rights to be acknowledged at the beginning of the catalogue. Such work is as important as a PhD thesis, a doctorate or any other sort of learned treatise, but because the curator would be employed, he or she would not have any moral rights. Surely that cannot be what the Government intend. Will the Minister address the point that this issue goes far wider and has many more serious implications than for just the newspaper industry?

Mr. Butcher: I was going on to address that point, but the hon. Gentleman began his remarks with a statement of fairly fundamental belief to his side of the House; and I was simply responding in like manner.

To come to the point at issue and the broader implications, the Bill provides that where copyright vests in the employer of an author or a film director the paternity rights will not apply. Opposition Members appear to agree with us on film directors because their amendment leaves the position of directors unchanged, but not that of authors. I can see no justification for this distinction as I believe that exactly the same principles apply in each case.

The House has accepted the general rule that the employer should own the copyright in a work created by his employee—in other words, the employer should be able to obtain the financial reward from the work and use it in any way that he likes. However, although economic and moral rights are separate, it is clear that the requirement to identify authors might well interfere with the freedom of the employer to use the work in the way he thinks best. A company issuing its annual report is making a corporate statement and it would not be appropriate to identify the author of that work in the manner that is required by clause 76. It is probable that the report is an amalgam of works of many different contributors. Even if the separate works could be identified, it would not be appropriate to list all the individuals concerned.

In some situations, the provisions for assertion and waiver of paternity right could offer a way round the problem, but we do not think it would be appropriate to have to rely on these provisions in the employer-employee context. Apart from the matter of principle that I have mentioned, administering moral rights would create an extra burden on employers. Details of assertions and waivers would need to be kept up to date and associated with particular works. That in itself would be a complex task since the paternity right can be asserted or waived generally or in relation to any specified act or description of acts. Extra staff might be needed to cope with it.

Mr. Rowlands: The Minister is resting his case on principles and clear distinctions between what he described earlier as employed and freelance writers—at least, that is what I thought he said. Will he confirm that a freelance writer making a contribution to a periodical, encyclopaedia or any collective work also loses his moral rights?

Mr. Butcher: I shall be glad to deal with that and with the point about a curator. For the moment I shall continue my response to the hon. Gentleman, who is moving away from his amendment. Instead of using his paternity right to achieve greater public recognition, an employee might agree to waive his identification right only in return for extra money or improved conditions. This economic use of

the right would be no more justifiable than the exercise of copyright by employees. An employer should not have to buy the right to use a work for which he has already paid, nor should he be forced to choose between identifying the author or not using the work at all. That would happen if the employee refused to waive his paternity right.

The only common-sense approach to avoid such problems is to disapply the paternity right for employees. As Opposition Members will know, it is for that reason that I must resist the amendment just as I resisted their blandishments, no matter how elegantly argued, in Committee. The nub of the matter is that the principle goes right through the Bill and is absolute. If a curator is an employee, no matter how learned, he would be caught by the moral rights provision in the Bill. I cannot give the hon. Member for Stoke-on-Trent, Central (Mr. Fisher) the assurance that he seeks. The curator is an employee and as such has the advantages that I have listed in earlier debates. It is for him to deal with the matter when he accepts the normal conditions of employment.

Mr. Rowlands: The Minister said that he would answer my question but he has made the distinction between an employee and a freelance. Am I right in thinking that a freelance writer for any periodical, dictionary, encyclopaedia or collective book of reference would not have moral rights?

Mr. Butcher: The freelance writer has moral rights unless, as I said earlier, he decided in his contractual arrangements to waive them or if he enters into any other sort of waiver arrangement. We have made the distinction throughout the Bill between freelance and employed authors. With the exceptions that we discussed in Committee, moral rights apply to the freelance author. The hon. Gentleman will remember those exceptions, one of which was for the purposes of reporting current events. In general, we have not moved our position since Committee stage. The hon. Member for Merthyr Tydfil and Rhymney asked about work written for a newspaper or other periodical or for a collective work of reference. That does not enjoy the moral rights provided in subsection (6) of the clause and in clause 80(4).

Mr. Fisher: The Minister has said several times that this is a matter of principle running throughout the Bill. Will he clarify that it is the intention of the Government, where possible, to stick by the Berne convention? Am I right in thinking that article 6 bis of that convention makes moral rights, the rights of paternity, absolute and does not make the exemptions that the Minister is making? Once we start breaking up the absolute integrity of moral rights, we lead ourselves into the difficulties with which the Minister is struggling.

Mr. Butcher: Of course we defer to the Berne convention to the extent that we need to sign it in order to get appropriate protection for our works and our intellectual and industrial property rights in other countries. A convention is a convention and it is for national Governments to decide how far they go in slavish adherence to its provisions and in observing its spirit and practicalities.

Earlier in the debate it became fairly clear that we have a duty to say to those who draft Berne convention provisions that our copyright reforms on matters such as music and time shifting and the levy are compatible with that which Berne seeks to achieve. The question of moral rights has first been raised in the Bill. We have brought that forward because Berne invites us to do so. However, I cannot say that we shall accept lock, stock and barrel the argument that the hon. Gentleman's interpretation of Berne should be applied universally. He will find that in different nation states there are different routes to achieving the protection of the Berne convention.

1.45 am

Mr. Fisher: We are deeply dissatisfied and unhappy with the debate and with the Minister's response. He will recall that we have gone to some lengths—with great sincerity—to pay tribute to his handling of the Bill in Committee, which was conducted with great sensitivity, tact and perseverance through the varied and difficult briefs with which he had to deal. Our compliments to him have been absolutely sincere. On this occasion, however, he has let his high standards slip considerably, and we are most unhappy with his response.

It is simply not good enough for the Government to say that although they stand by Berne they propose completely to disregard the spirit of article 6 bis, which is that moral rights are absolute rights for the author. We have acknowledged that there are difficulties in getting the right balance in economic copyright between the interests of industry, investors, consumers and users. We are all well aware that there are no right answers on that because the balance varies from industry to industry and from one set of circumstances to another.

Moral rights are a simpler matter. Both on Second Reading and in Committee we welcomed the fact that the Government were introducing the concept of moral rights. Now, however, they are undermining and undercutting their good intentions by removing a person's moral rights simply because he is employed, so that he does not have the right to have his work acknowledged as the work of his intellect and as his intellectual property. That cannot be a principled view for the Government to take, and it is not to the credit of the Government or the Minister.

Amendment negatived.

Mr. Michael Morris (Northampton, South): I beg to move amendment No. 276, in page 32, line 29, at end insert 'or to any work created for the purposes of advertising'.

Mr. Deputy Speaker: With this it will be convenient to take amendment No. 277, in clause 80, page 34, line 16, at end insert

'or to any work created for the purposes of advertising'.

Mr. Morris: The amendments deal with advertising. The first deals with the moral rights of the creator of an advertisement in relation to the identification in clause 76 and the exceptions to it in clause 78 and the second with the integrity of a piece of work, mentioned in clause 79, and the exceptions to it provided in clause 80, to which the amendment refers.

I think that the House knows of my deep involvement with the world of advertising, which has lasted in a general sense for some 25 years. As someone who has tried to keep track of the Bill's proceedings—a task made all the more difficult by the fact that I was chairing another Committee—I venture to suggest that the reality of the world of advertising is a factor on which Ministers have not really had time to reflect.

[Mr. Morris]

Some of us would maintain that the central issue of ownership of copyright on commercially produced material should rest with person paying the bill and not with the artist, photographer, copywriter, visualiser or anyone else. In industry there is absolutely no difference between the role of the creator of advertising and that of reseach chemists, market researchers, production engineers, packaging people or anyone involved in the marketing of a product.

The involvement of the creator of an advertisement is transitory, whereas a manufacture is far from transitory. Some of our great brands have been nurtured by generations of marketeers who have seen the gaps in a market, and identified opportunities arising from changes in taste or attitude—opportunities that have then been taken and backed by the resources of the company.

The issue before us is even more tightly drawn. Amendment No. 276 deals with identification of credit. Exemption has been given to newspapers on the grounds that one cannot have a whole newspaper full of by-lines. I ask the Minister how on earth one can have a list of credits for a piece of packaging. How on earth, on a 15-second commercial, is one to list the producer, director, film company, dubbing studio, visualiser, copywriter, creative group head, sound studio, agency and others—all of whom are in some respects authors of the advertisement? By definition they should all have credit, but, frankly, that is unworkable and unreasonable. The idea is also unrealistic as regards press advertisements, many of which are worked on and created within a short deadline.

In a previous incarnation I used to handle some of the Central Office of Information work, particularly in the role of standby agency. During the three-day week I remember that we produced layouts in the morning, got them approved by lunchtime and were running the advertisement the same night. On occasion I even used to write some of the copy out of sheer necessity. Who will get the credit in such a situation? In reality it should be absolutely no one.

My other amendment refers to integrity of work. I accept the importance of that to a creative person. The advertising world has, as near as possible, a perfect market —a willing seller and a willing buyer. The creation of an advertisement is dependent on a good brief from the client or the agent; it is they who determine the boundaries of the product proposition, the media in which it will appear and the message that is to be conveyed. The advertisements for Guinness, for example, have changed dramatically over the years from the Toucan of the early years to the situation advertisements and so on. A brand also undergoes subtle changes and I do not believe that any advertiser can afford a creative prima donna to prevent the development of a brand.

If the reporting of current events argument is to be accepted, it is clear that, on grounds of practicality, common sense and the need to ensure that our marketeers are unfettered, my amendment should be accepted.

Mr. Butcher: The amendments propose to add to the list of exceptions to the paternity and integrity rights found in clauses 78 and 80. They would disapply moral rights to all works made for the purpose of advertising, and my hon. Friend the Member for Northampton, South (Mr. Morris) put his arguments well.

Moral rights are being introduced to give authors and film directors the means to protect their artistic reputation and integrity. That is particularly important if they have transferrred their economic rights, as is likely to be the case in works commissioned by an advertising agency. Careful consideration has been given to the provisions to try to give authors and directors a worthwhile level of protection while, at the same time, ensuring that moral rights do not create unnecessary burdens on users of copyright material.

As far as the advertising industry is concerned, we feel that the Bill already provides acceptable safeguards. To begin with, the rights do not arise in relation to works created by employees. Moral rights will therefore arise only where works are made by freelance authors and directors, and then the paternity right has to be asserted before it can be effective, and this must be done in writing by the individual concerned. Further, clause 86 provides for the waiver of the rights and I believe that there is sufficient scope for mutually acceptable arrangements to be agreed.

As we shall discuss shortly, special exceptions have been made for reporting current events and for newspapers and magazines. We felt that the need for news reporting to be unhampered by moral rights and the very tight deadlines that newspapers have to work within, merited specific exceptions. We do not believe that the same considerations apply in advertising. I accept that it will frequently be inappropriate for the advertisement itself to identify the authors concerned, but authors are just as aware of this as the agencies which commission them, and in the real world I do not believe that they would make life difficult for themselves by unreasonably asserting their rights. After all, they have a living to earn and could find that agencies will simply refuse to employ authors who make that kind of assertion.

On the other hand, however, there are other ways in which advertisements may come to public attention. For example, awards are made for advertising excellence and it would be entirely reasonable for an author to require that his contribution to a prize-winning advertisement should be acknowledged when the results are published in the trade press.

For these reasons, I do not accept that the Bill as drafted will cause difficulties. I hope that, in view of what I have said, my hon. Friend will feel able to withdraw the amendment. I have mentioned waivers, the need to assert and the issue of employees. Within that mix, and the workings of those who wish to continue to freelance into an agency, there is a formula that would protect my hon. Friend's colleagues and ex-colleagues in the advertising world from the sort of difficulties that they may fear.

Mr. Michael Morris: I am grateful to my hon. Friend, especially for the point about the waiver of rights.

There is a misunderstanding in the Department. The vast majority of work is put out. There is very little employee-related work. I still foresee difficulties, particularly with commercials, but I accept what my hon. Friend has said. We shall have to wait and see what happens; I think that at some later date there will be a need to amend this provision.

Amendment negatived.

Clause 79

RIGHT TO OBJECT TO DEROGATORY TREATMENT OF WORK

Mr. Bowis: I beg to move amendment No. 329, in page 33, line 13 after 'otherwise', insert 'unjustly'.

Mr. Deputy Speaker: With this it will be convenient to consider amendment No. 330, in clause 103, page 43, line 37, at end insert—

'(3) Where in an action under subsection (1) above the court finds that the plaintiff's right under section 79 has been infringed but that the treatment complained of was not unjust in all the circumstances, it shall award to the defendant the costs of the action subject to taxation on the indemnity basis.'.

Mr. Bowis: In Committee I sought to protect the right to justified criticism. These amendments—they are either or; I do not seek to have them both accepted—try to take that one little stage further. I ask my hon. Friend to consider them.

I have in mind the problem of a hostile review which tries to show up inconsistencies of argument in an author's work and, to that end, juxtaposes extracts or quotations from it. Such extracts would, by definition, be incomplete. Equally, in a hostile review, they would necessarily be prejudicial to the reputation of an author.

However, I submit that no distortion or mutilation is involved. Under the Bill, such a review, it would seem, could be actionable. I have tried to compare the Berne convention and the Bill. The convention does not make distortion an alternative to prejudicing an author's reputation: it makes it a prerequisite. In Committee, my hon. Friend kindly said he would look further into this matter and wrote me a letter which he arranged to be placed in the Library. He said:

"In our view, it is difficult to conceive of a distortion or mutilation of a work which would not be prejudicial to honour or reputation."

I do not disagree with that. My point is the other way around: something can certainly be prejudicial to an author without involving distortion or mutilation. The wording of clause 79(2)(b) is:

"the treatment of a work is derogatory if it amounts to distortion or mutilation of the work or is otherwise prejudicial to the honour or reputation of the author or director."

In the Berne convention, that "or" is "and".

To overcome this problem, I have submitted two solutions. I hope my hon. Friend will consider at least one of them. Amendment 329 is the simpler of the two. It suggests inserting the word "unjustly" after "otherwise". Then there would be no doubt—if a review was unjustly prejudicial, it would be actionable. If it was not, it would not. Amendment No. 330 seeks to protect the position of people who are sued for derogatory treatment which the plaintiff may have deserved. That is a more complicated way of achieving what I propose. The word "unjustly" would, however, be simpler than legal retribution and indemnity. I hope my hon. Friend will consider such a simple amendment with favour.

Mr. Butcher: The issue is familiar, but my hon. Friend's amendments are fairly recent. In the time that we have had to consider the two amendments, we have concluded that they would limit the scope of the integrity right to an unacceptable extent and would undermine the principle on which it is based. Clause 79 confers the integrity right: it is the right of the author or film director not to have his or her work subjected to derogatory treatment. The treatment of a work is derogatory if it amounts to distortion or mutilation of the work or is otherwise prejudicial to the honour or reputation of the author or director.

Amendment No. 329 would limit this by providing that the treatment would have to be "unjustly" prejudicial to honour or reputation. Following on from this, amendment No. 330 provides that in an action for infringement where the court finds that the integrity right has been infringed, but that the treatment was not unjust, the defendant would have to pay the costs.

2 am

We are already introducing quite a complex provision, and it will not always be easy to tell whether the modification of a work amounts to derogatory treatment. It would be difficult, if not impossible, then to decide whether the treatment was justly or unjustly prejudicial to the author or film director's reputation.

The whole point of moral rights is to protect the author's artistic reputation, and if we allowed users, in modifying works, to prejudice the author's honour and reputation, there would be no point in having the integrity right. The amendment raises the question whether it is possible to have prejudice that is not unjust—surely all prejudice is unjust. Furthermore, the draconian measure suggested in amendment No. 330 would deter authors and film directors from suing for infringement, because, even if their integrity right was found to be infringed, they might end up having to pay the costs of the case.

We have already gone a long way towards meeting the legitimate concerns about moral rights of those who use copyright works. We have employee exceptions, and current events and newspaper exceptions. Those, together with the waiver provisions, give plenty of scope for mutually acceptable arrangements on moral rights to be reached. For those reasons, I must resist my hon. Friend's amendments.

My hon. Friend mentioned hostile reviews. The Bill prevents no one from expressing hostile opinions about a copyright work or from quoting extracts from it to support the argument. The work itself is not being distorted or mutilated in those circumstances. For that to be the case, the extracts chosen would have to be distorted so that they did not express what the author wrote.

Mr. Bowis: My hon. Friend's latter point was helpful in terms of establishing what is a distortion. In the light of his remarks, I beg to ask leave to withdraw the amendment.

Amendment, by leave, withdrawn.

Clause 97

UNDERTAKING TO TAKE LICENCE OF RIGHT IN INFRINGEMENT PROCEEDINGS

Amendment made: No. 166, in page 41, line 19, leave out from 'for' to 'shall' in line 20 and insert 'delivery up'.—*[Mr. Butcher.]*

Clause 98

RIGHT TO DELIVERY UP OF INFRINGING COPIES, &C.

Amendment made: No. 167, in page 41, line 26, leave out from 'work' to end of line 41 and insert

'may apply to the court for an order that the infringing copy or article be delivered up to him or to such other person as the court may direct.

(2) An application shall not be made after the end of the period specified in section *(Period after which remedy of delivery up not available under Part I)* (period after which remedy of delivery up not available); and no order shall be made unless the court also makes, or it appears to the court that there are grounds for making, an order under section *(Order as to disposal of infringing copy or other article)* (order as to disposal of infringing copy or other article).

(3) A person to whom an infringing copy or other article is delivered up in pursuance of an order under this section shall, if an order under section *(Order as to disposal of infringing copy or other article)* is not made, retain it pending the making of an order, or the decision not to make an order, under that section.

(4) Nothing in this section affects any other power of the court.'.—*[Mr. Butcher.]*

Clause 99

RIGHT TO SEIZE INFRINGING COPIES, &C.

Amendments made: No. 168, in page 41, line 42, leave out subsections (1) to (5) and insert—

'(1) An infringing copy of a work which is found exposed or otherwise immediately available for sale or hire, and in respect of which the copyright owner would be entitled to apply for an order under section 98, may be seized and detained by him or a person authorised by him.

The right to seize and detain is exercisable subject to the following conditions and is subject to any decision of the court under section (*Order as to disposal of infringing copy or other article*).

(2) Before anything is seized under this section notice of the time and place of the proposed seizure must be given to a local police station.

(3) A person may for the purpose of exercising the right conferred by this section enter premises to which the public have access but may not seize anything in the possession, custody or control of a person at a permanent or regular place of business of his, and may not use any force.

(4) At the time when anything is seized under this section there shall be left at the place where it was seized a notice in the prescribed form containing the prescribed particulars as to the person by whom or on whose authority the seizure is made and the grounds on which it is made.'.

No. 169, in page 42, line 25, leave out subsection (8) —*[Mr. Butcher.]*

Clause 100

EXCLUSIVE LICENSEE TO HAVE SAME RIGHTS AND REMEDIES AS COPYRIGHT OWNER

Amendment made: No. 170, in page 42, line 31, leave out subsections (2) and (3) and insert—

'(2) His rights and remedies are concurrent with those of the copyright owner; and references in the relevant provisions of this Part to the copyright owner shall be construed accordingly.'.—*[Mr. Butcher.]*

Clause 101

COPYRIGHT OWNER AND EXCLUSIVE LICENSEE TO BE JOINED AS PARTIES TO INFRINGEMENT ACTION

Amendments made: No. 172, in page 43, line 10, leave out 'This section does' and insert 'The above provisions do'.

No. 171, in page 43, line 11, at end insert—

'(4) Where an action for infringement of copyright is bought which relates (wholly or partly) to an infringement in respect of which the copyright owner and an exclusive licensee have or had concurrent rights of action—

(a) the court shall in assessing damages take into account—

(i) the terms of the licence, and

(ii) any pecuniary remedy already awarded or available to either of them in respect of the infringement:

(b) no account of profits shall be directed if an award of damages has been made, or an account of profits has been directed, in favour of the other of them in respect of the infringement; and

(c) the court shall if an account of profits is directed apportion the profits between them as the court considers just, subject to any agreement between them;

and these provisions apply whether or not the copyright owner and the exclusive licensee are both parties to the action.

(5) The copyright owner shall notify any exclusive licensee having concurrent rights before applying for an order under section 98 (order for delivery up) or exercising the right conferred by section 99 (right of seizure); and the court may on the application of the licensee make such order under section 98 or, as the case may be, prohibiting or permitting the exercise by the copyright owner of the right conferred by section 99, as it thinks fit having regard to the terms of the licence.'.—*[Mr. Butcher.]*

Clause 102

PECUNIARY REMEDIES WHERE CONCURRENT RIGHTS OF ACTION

Amendment made: No. 173, in page 43, line 12, leave out clause 102.—*[Mr. Butcher.]*

Clause 104

PRESUMPTIONS RELEVANT TO LITERARY, DRAMATIC, MUSICAL AND ARTISTIC WORKS

Amendment made: No. 63, in page 44, line 10, leave out from 'of' to ', and' in line 12 and insert 'section 153 (qualification by reference to country of first publication)'. —*[Mr. Butcher.]*

Clause 105

PRESUMPTIONS RELEVANT TO SOUND RECORDINGS AND FILMS

Mr. Page: I beg to move amendment No. 269, in page 44, line 33, leave out 'to the public' and insert

'either to the public, or as issued for purposes of performance in public or being broadcast or included in a cable programme service,'.

Mr. Deputy Speaker: With this it will be convenient to discuss the following amendments: No. 270, in page 44, line 34, leave out 'author or director of' and insert 'owner of copyright in'.

Government amendment No. 280.

No. 271, in page 44, line 36, at end insert

', or

(c) that the film is protected by copyright in a specified country,'.

Government amendments Nos. 64 and 281.

No. 272, in page 44, line 41, at end insert

'or in the case of a film before the date on which the copies were issued for purposes of performance in public or being broadcast or included in a cable programme service.'.

Government amendment No. 282.

Mr. Page: The amendments in the name of my hon. Friend the Member for Beaconsfield (Mr. Smith) are designed to strengthen the presumption of copyright ownership in relation to films. If I understand the Bill

correctly, it establishes certain presumptions with respect to sound recordings and films. The clause provides that a person named as the author or director on copies of a film issued to the public shall be presumed to be the author or director until the contrary is proved.

It also provides that, where copies bear the statement that the film was first published in a specified year or in a specified country, the statement shall be presumed to be correct until the contrary is proved. The statutory provisions go some way towards assisting copyright owners to bring film piracy cases to court by saving them the time and expense of proving the name of the author, the date of publication and the country of publication. Sometimes these three facts are not enough in themselves. Without proof, a piracy case will fail.

There are three gaps in the clause as it relates to films. The purpose of the amendments is to plug them, and thereby to ensure that the clause applies to every case of film piracy. The first gap is where the clause applies only when copies of films are issued to the public. That terminology includes the sale of video cassettes to the public, but it does not attach to copies of a film that are issued to cinemas for purposes of theatrical exhibition, which is how most feature films are first released. Nor does it attach to copies issued for showing on broadcast or cable television.

The second deficiency in the clause as it relates to films is that it establishes only a presumption of authorship at the date of issue. The second amendment overcomes that problem by substituting the term "owner of copyright", as used in the presumption relating to sound recording, in place of the phrase "author or director." The effect of the amendment is to place films in exactly the same position as sound recordings.

The third defect is that, while the presumption of publication in a specified year and country is usually sufficient to establish the subsistence of copyright in a published work, it is not sufficient in the case of an unpublished work. Therefore, the effect of the amendment will be to put unpublished films on precisely the same basis as published films. and sound recordings, both of which are entitled to a presumption of copyright subsistence under the clause as drafted, so long as they have been correctly issued.

The four amendments plug the three gaps. I shall be most interested to hear whether my hon. Friend the Minister is prepared to accept these amendments, which would make the prosecution of piracy cases very much easier.

Mr. Butcher: There has been much debate over the presumptions that should apply in civil proceedings for copyright infringement. We recognised that the Bill as introduced in another place went too far in providing that the court should presume generally that the plaintiff was the owner of copyright and that copyright subsisted in the work in question until evidence was produced to the contrary. We therefore dropped that clause from the Bill.

Those who have urged us to restore it have tended to brush aside the fact that the old clause tended to put the onus on the defendant to prove his absence of liability rather than on the plaintiff to establish his case. They have also tended to overlook the fact that clauses 104 and 105 make provision for evidence in copyright cases, which will greatly assist the copyright owner in establishing the critical questions of subsistence and ownership.

My hon. Friend the Member for Hertfordshire, South-West (Mr. Page) has spoken about the presumptions that apply. I readily concede that clause 105 needs to go further in order to assist in the fight against piracy. That is what motivated my amendments Nos. 280, 281 and 282. I believe there is common ground between us and I hope that he will feel able to withdraw his amendments in favour of those standing in the name of my right hon. and learned Friend.

The first deficiency in the existing presumptions is identified by my hon. Friend in amendment No. 269. In many cases, films remain unpublished, since copies are not issued to the public. Even in cases where copies are issued to the public in the form of videograms, this usually comes some time after cinema release and it is during the period before the issue of legitimate videos that the market for pirate videos is most bouyant. But if a pirate is caught, the existing presumption in clause 105 will not help. I believe the answer to this problem is as set out in amendment No. 282 rather than as in amendment No. 269.

I must also resist amendment No. 271. I do not think the courts should be asked to rely on a statement as to the subsistence or otherwise of copyright under a foreign law. We have rejected a presumption that United Kingdom copyright subsists in the film in question; it would be curious if we were to presume on the existence of foreign copyright, about which we can know little. In any event, such a presumption would rarely be relevant in a British court. Nevertheless, I believe my amendments will give my hon. Friend what he wants and I hope he can accept them.

As for amendment No. 64, we have come to recognise that the presumptions in clause 104 may not be ideally suited to computer programs. These are literary works, but their mode of exploitation is very different from books. The name of the author will normally appear on a book, but this is not normal practice in the case of a program. What is likely to appear is the name of the software house or company which owns copyright in the program and in this respect programs are more akin to sound recordings and films than they are to literary works.

Amendment No. 64 will provide the owners of copyright in computer programs with presumptions that are analogous to those which are applicable to records and videos. I believe that the various amendments we have tabled will be of considerable assistance, both to the rights owners in prosecution of cases against pirates and in reducing the burden on the courts.

Mr. Page: I thank my hon. Friend for his reply. As he correctly said, his amendments are fully superior to the ones that I have been advocating this evening, and go a long way to solving the problems that I have outlined. I beg to ask leave to withdraw the amendment.

Amendment, by leave, withdrawn.

Amendments made: No. 280, in page 44, line 34 leave out 'or' and insert—

'(aa) that a named person was the owner of copyright in the film at the date of issue of the copies, or'.

No. 64, in page 44, line 38, at end insert—

'(2A) In proceedings brought by virtue of this Chapter with respect to a computer program, where copies of the program are issued to the public in electronic form bearing a statement—

(a) that a named person was the owner of copyright in the program at the date of issue of the copies, or

(b) that the program was first published in a specified country or that copies of it were first issued to the public in electronic form in a specified year.

[Mr. Page]

the statement shall be admissable as evidence of the facts stated and shall be presumed to be correct until the contrary is proved.'.

No. 281, in page 44, line 39, leave out 'These' and insert 'The above'.

No. 282, in page 44, line 41, at end insert—

'(4) In proceedings brought by virtue of this Chapter with respect to a film, where the film as shown in public, broadcast or included in a cable programme service bears a statement—

(a) that a named person was the author or director of the film, or

(b) that a named person was the owner of copyright in the film immediately after it was made.

the statement shall be admissible as evidence of the facts stated and shall be presumed to be correct until the contrary is proved.

This presumption applies equally in proceedings relating to an infringement alleged to have occurred before the date on which the film was shown in public, broadcast or included in a cable programme service.'.—*[Mr. Butcher.]*

Clause 108

FORFEITURE OF INFRINGING COPIES, &C.

Amendment made: No. 174, in page 46, line 1, leave out subsections (1) and (2) and insert—

'(1) The court before which proceedings are brought against a person for an offence under section 107 may, if satisfied that at the time of his arrest or charge—

(a) he had in his possession, custody or control in the course of a business an infringing copy of a copyright work, or

(b) he had in his possession, custody or control an article specifically designed or adapted for making copies of a particular copyright work, knowing or having reason to believe that it had been or was to be used to make infringing copies,

order that the infringing copy or article be delivered up to the copyright owner or to such other person as the court may direct.

(2) For this purpose a person shall be treated as charged with an offence—

(a) in England, Wales and Northern Ireland, when he is orally charged or is served with a summons or indictment;

(b) in Scotland, when he is cautioned, charged or served with a complaint or indictment.

(3) An order may be made by the court of its own motion or on the application of the prosecutor (or, in Scotland, the Lord Advocate or procurator-fiscal), and may be made whether or not the person is convicted of the offence, but shall not be made—

(a) after the end of the period specified in section *(Period after which remedy of delivery up not available under Part I)* (period after which remedy of delivery up not available), or

(b) if it appears to the court unlikely that any order will be made under section *(Order as to disposal of infringing copy or other article)* (order as to disposal of infringing copy or other article).'.—*[Mr. Butcher.]*

No. 175, in page 46, line 19, leave out subsection (4) and insert

'; and in Scotland, where an order has been made under this section, the person from whose possession, custody or control the infringing copy or article has been removed may, without prejudice to any other form of appeal under any rule of law, appeal against that order in the same manner as against sentence.'.

No. 176, in page 46, line 21, leave out subsection (5) and insert—

'(5) A person to whom an infringing copy or other article is delivered up in pursuance of an order under this section shall retain it pending the making of an order, or the decision not to make an order, under section *(Order as to disposal of infringing copy or other article)*.

(6) Nothing in this section affects the powers of the court under section 43 of the Powers of Criminal Courts Act 1973, section 223 or 436 of the Criminal Procedure (Scotland) Act 1975 or Article 7 of the Criminal Justice (Northern Ireland) Order 1980 (general provisions as to forfeiture in criminal proceedings).'.

No. 177, in page 48, line 14, leave out clause 113.—*[Mr. Butcher.]*

Clause 114

LICENSING SCHEMES AND LICENSING BODIES

Amendments made: No. 65, in page 49, line 24, after 'only', insert

'—

(a) '.

No. 66, in page 49, line 25, at end insert

', or

(b) works made by, or by employees of, or commissioned by, a single individual, firm, company or group of companies.

For this purpose a group of companies means a holding company and its subsidiaries, within the meaning of section 736 of the Companies Act 1985.'.—*[Mr. Butcher.]*

Clause 115

SCOPE OF GENERAL CONTROL OF LICENSING SCHEMES

Amendment made: No. 67, in page 49, line 27, leave out 'general control' and insert 'references and applications with respect to'.

Amendments made: No. 68, in page 49, line 44, leave out 'hiring' and insert 'rental'.

No. 69, in page 50, line 1, leave out subsection (2).—*[Mr. Butcher.]*

Clause 116

REFERENCE OF PROPOSED LICENSING SCHEME TO TRIBUNAL

Mr. Lawrence Cunliffe (Leigh): I beg to move amendment No. 302, in page 50, line 17, at end insert—

'(5) In the event that a proposed licensing scheme relates to the grant of copyright licences in any class of case in respect of which copyright licences have not previously been granted, then the operator of the proposed licensing scheme shall refer the proposed licensing scheme to the Copyright Tribunal and shall not seek to apply or implement any such proposed licensing scheme until the proceedings on the reference thereof are concluded.

(6)(a) In the event that the provisions of a proposed licensing scheme would constitute a variation or replacement of an existing licensing scheme then the operator of the proposed licensing scheme shall refer the proposed licensing scheme to the Copyright Tribunal and shall not seek to apply or implement any such proceedings on the reference thereof are concluded.

(b) Until the proceedings on the reference of any such proposed licensing scheme to the Tribunal have been concluded any such existing licensing scheme which would be varied, replaced or otherwise affected by the proposed licensing scheme shall remain in force.'

Madam Deputy Speaker (Miss Betty Boothroyd): With this it will be convenient to take amendment No. 303, in clause 117, page 50, line 18, after '(1)', insert

'Without prejudice to the provisions of section 116(5) and (6),'.

Mr. Cunliffe: I shall say only a few brief words on amendment No. 302 and reserve amendment No. 303 on commitment to the Minister. I understand that the Minister has some sympathy with this matter, and that he will lend support to this moderate measure which is clearly designed to assist political and charitable working men's clubs for ex-service men and others dedicated to non-profit-making principles.

I declare an interest in an association with some 6 million male and 4 million women members under the aegis of several associations. Obviously, we are concerned about various issues, including VAT on bingo and gaming machines, and the new Sunday licensing laws that discriminate against non-profit-making clubs. With great respect to the Government and the Minister, we hope that he will acknowledge that our interest is genuine and sincere and that, ultimately, there is a great deal of British social interest in the society that we cater for in the organisations that I have described. I commend to the Minister's discretion amendments Nos. 302 and 303.

Mr. Butcher: What I am about to say is not a symptom of being demob-happy, but a symptom of a late reading of the amendment tabled by the hon. Member for Leigh (Mr. Cunliffe). I thank him for the way in which he moved the amendment, with the support of my hon. Friends who have spoken to me about it.

We are in a rather unorthodox position, in that I am fairly sure that the first two thirds of the hon. Gentleman's amendment—subsections (5) and (6)—are probably defective. However, what he wishes to deliver—I believe on an all-party basis—is what is contained in subsection 6(b). On that basis we knowingly accept the defective amendment in the knowledge that we need to consult without commitment on paragraph (b) and what it implies. I can give the hon. Gentleman the undertaking that amendment No. 302 will be sent to another place, which will be charged with a drafting requirement, subject to prior consultations with the other interested parties.

I hope that *Hansard* will accurately convey what I am trying to say to the hon. Gentleman. I think that he understands the gist of it. I thank the clubs that have made representations on an all-party basis and I thank the hon. Gentleman for bringing this to our attention. It was rather late in the day and, on the consideration I have been able to give at this late stage, I hope that what I have suggested will satisfy him.

2.15 am

Mr. Greg Knight (Derby, North): I hope and believe that the non-profit-making clubs organisations will welcome wholeheartedly the undertaking that my hon. Friend the Minister has given to the House. I hope, in the same spirit, that Opposition Members will agree that the House can accept amendment No. 302 without a Division and that the hon. Member for Leigh (Mr. Cunliffe) will not press amendment No. 303.

Mr. Blair: We are grateful to the Minister for the indication he has given. We all recognise the tremendous importance of the clubs and the contribution they make to British society. We accept that there may be drafting difficulties, but I am sure that they can be ironed out at a later stage. The important thing is that the principle is accepted and I know that my hon. Friend the Member for Leigh (Mr. Cunliffe) will be grateful to the Minister for that.

Amendment agreed to.

Clause 120

APPLICATION FOR REVIEW OF ORDER AS TO ENTITLEMENT TO LICENCE

Amendments made: No. 70, in page 51, line 47, leave out from 'scheme' to end of line 2 on page 52.

No. 71, in page 52, line 5, leave out subsection (2) and insert—

'(2) An application shall not be made, except with the special leave of the Tribunal—

(a) within twelve months from the date of the order or of the decision on a previous application under this section, or

(b) if the order was made so as to be in force for 15 months or less, or as a result of the decision on a previous application under this section is due to expire within 15 months of that decision, until the last three months before the expiry date.'.

No. 72, in page 52, line 10, leave out from 'review' to end of line 13 and insert

'confirm or vary its order as the Tribunal may determine to be reasonable having regard to the terms applicable in accordance with the licensing scheme or, as the case may be, the circumstances of the case.'.—*[Mr. Butcher.]*

Clause 121

EFFECT OF ORDER OF TRIBUNAL AS TO LICENSING SCHEME

Amendment made: No. 73, in page 53, line 1, leave out subsection (5).—*[Mr. Butcher.]*

Clause 122

SCOPE OF GENERAL CONTROL OF LICENCES GRANTED BY LICENSING BODIES

Amendment made: No. 74, in page 53, line 4, leave out 'general control of licences granted'

and insert

'references and applications with respect to licensing'.

No. 75, in page 53, line 14, leave out 'or'.

No. 76, in page 53, line 18, at end insert

'; and

(c) all licences in relation to the copyright in sound recordings, films or computer programs so far as they relate to the rental of copies to the public;'.

—*[Mr. Butcher.]*

Clause 124

REFERENCE TO TRIBUNAL OF TERMS OF EXISTING LICENCE

Amendments made: No. 77, in page 53, line 32, leave out subsections (1) and (2) and insert—

'(1) A licensee under a licence which is due to expire, by effluxion of time or as a result of notice given by the licensing body, may apply to the Copyright Tribunal on the ground that it is unreasonable in the circumstances that the licence should cease to be in force.

(2) Such an application may not be made until the last three months before the licence is due to expire.'.

No. 78, in page 53, line 39, at end insert—

'(3A) If the Tribunal finds the application well-founded, it shall make an order declaring that the licensee shall continue

to be entitled to the benefit of the licence on such terms as the Tribunal may determine to be reasonable in the circumstances.'.—*[Mr. Butcher.]*

Clause 125

FURTHER REFERENCE OF TERMS OF LICENCE

Amendment made: No. 79, in page 53, line 42, leave out Clause 125—*[Mr. Butcher.]*

Clause 126

EFFECT OF ORDER OF TRIBUNAL AS TO TERM OF LICENCE

Amendment made:

No. 80, in page 54, line 15, leave out Clause 126.—*[Mr. Butcher.]*

Clause 127

GENERAL CONSIDERATIONS: UNREASONABLE DISCRIMINATION

Amendment made: No. 81, in page 54, line 41, leave out 'those other persons' and insert

'licensees under other schemes operated by, or other licences granted by, the same person'.—*[Mr. Butcher.]*

Clause 131

LICENCES TO REFLECT PAYMENTS IN RESPECT OF UNDERLYING RIGHTS

Amendment made: No. 82, in page 55, line 38, leave out 'hiring to the public' and insert

'the rental to the public of'.—*[Mr. Butcher.]*

Clause 131

LICENCES TO REFLECT PAYMENTS IN RESPECT OF UNDERLYING RIGHTS

Amendment made: No. 334, in page 55, line 40, after 'royalty', insert 'or other sum payable'.—*[Mr. Butcher.]*

Clause 135

POWER TO EXTEND COVERAGE OF SCHEME OR LICENCE

Amendments made: No. 83, in page 57, line 32, leave out 'general control of licensing schemes'

and insert 'see section 115'.

No. 84, in page 57, line 35, leave out from 'apply' to end of line 36 and insert '(see section 122),'.—*[Mr. Butcher.]*

Clause 139

STATUTORY LICENCE WHERE RECOMMENDATION NOT IMPLEMENTED

Amendments made: No. 204, in page 61, line 7, after 'hire', insert ' or'.

No. 205, in page 61, line 7, leave out 'or distributed'.—*[Mr. Butcher.]*

Clause 140

ROYALTY FOR HIRING OF SOUND RECORDING, FILM OR COMPUTER PROGRAM

Amendments made: No. 85, in page 61, line 19, leave out 'rate of royalty' and insert 'royalty or other sum'.

No. 86, in page 61, line 20, leave out 'hiring' and insert 'rental'.—*[Mr. Butcher.]*

Clause 141

CERTIFICATION OF LICENSING SCHEMES

Amendments made: No. 87, in page 61, line 42, leave out 'hiring' and insert 'rental'.

No. 88, in page 62, line 5, leave out

'clearly identifies the works to which it relates'

and insert

'enables the works to which it relates to be identified with sufficient certainty by persons likely to require licences'.—*[Mr. Butcher.]*

Clause 142

POWERS EXERCISABLE IN CONSEQUENCE OF REPORT OF MONOPOLIES AND MERGERS COMMISSION

Mr. Fisher: I beg to move amendment No. 17, in page 62, line 39, at end insert

'but such powers shall in no case be exercisable where to do so would contravene Article 9(1) of the Berne Convention (Paris Revision 1971).'.

Madam Deputy Speaker: With this it will be convenient to take Government amendment No. 283.

Mr. Fisher: Amendment 17 would amend clause 142 to reconcile it with the Berne convention. At this late hour —or early hour—I shall not weary the House with a detailed submission. The Minister and his Department have received several opinions from the BBC. I have a substantial and fat opinion from Mr. Ian Brownlie QC, another from Mr. Hugh Laddie QC, and two more from Mr. E. P. Skone James. Together they present a formidable case that I understand that the Minister has already studied in great detail. He has taken all the finer points of those legal gentlemen's opinions.

In brief, they say that clauses 142 and 97 are in conflict with the Berne convention and that, if clause 142 is enacted, it will prevent the United Kingdom from adhering to the Paris revision of Berne. I understand that the Government's view is that there is a potential conflict between Berne and the public interest. We certainly believe that that may not be the case and that the Berne convention takes account of public interest.

We are convinced by the weighty documentation that has been given to us by the BBC and counsel's opinions, and believe that the only way to reconcile the matter is to amend clause 142 in the way that the amendment provides.

Mr. Butcher: Amendments Nos. 17 and 283 are intended to ensure that the powers in clause 142 should not be exercised in contravention of the United Kingdom's international copyright obligations. However, Government amendment No. 283 is considerably more comprehensive in regard to the obligations to be met. Therefore, I hope that the hon. Gentleman will be willing to withdraw amendment No. 17 on the basis that our amendment is more comprehensive.

Mr. Fisher: I am delighted that the learned opinions have convinced the Government so comprehensively. I beg to ask leave to withdraw the amendment.

Amendment, by leave, withdrawn.

Amendment made: No. 283, in page 62, line 42, at end insert—

'(2A) A Minister shall only exercise the powers available by virtue of this section if he is satisfied that to do so does not contravene any Convention relating to copyright to which the United Kingdom is a party.'.—*[Mr. Butcher.]*

Clause 147

JURISDICTION OF THE TRIBUNAL

Amendment made: No. 89, in page 64, line 37, leave out from 'proceedings' to end of line 2 on page 65 and insert 'under—

(a) section 116, 117 or 118 (reference of licensing scheme),
(b) section 119 or 120 (application with respect to entitlement to licence under licensing scheme),
(c) section 123, 124 or *(Application for review of order as to licence)* (reference or application with respect to licensing body),
(d) section 137 (appeal against order as to coverage of licensing scheme or licence),
(e) section 140 (application to settle royalty or other sum payable for rental of sound recording, film or computer program),
(f) section 142(3) (application to settle terms of copyright licence available as of right),
(g) section 185 (application to give consent for purposes of Part II on behalf of performer),
(h) paragraph 5 of Schedule 6 (determination of royalty or other remuneration to be paid to trustees for the Hospital for Sick Children).'.—*[Mr. Butcher.]*

Clause 149

COSTS, PROOF OF ORDERS, &C.

Mr. Michael Colvin (Romsey and Waterside): I beg to move amendment No. 239, in page 65, line 32, leave out subsection (1) and insert—

'(1) The Copyright Tribunal may not order that the costs of a party to proceedings before it shall be paid by any other party.'.

Madam Deputy Speaker: With this it will be convenient to take the following amendments: No. 241, in page 65, line 32, leave out subsection (1) and insert—

'(1) If the Copyright Tribunal considers that a party to proceedings before it has behaved unreasonably it may order that that party shall bear the whole, or such part as may be specified in the order, of the costs of any other party to those proceedings; and in that case the Tribunal may tax or settle the amount of the costs, or direct in what manner they are to be taxed; but in no other case may an order in respect of costs be made.'.

No. 240, in page 65, line 33, after 'proceedings before it', insert

'(other than those of a licensing body)'.

Mr. Colvin: At this hour of the morning, I shall not take long in moving amendment No. 239, but I shall speak to amendments Nos. 240 and 241. They relate to clause 149 and the same subject, the costs involved in appearing before copyright tribunals for trade associations representing pubs and clubs, which are the National Licensed Victuallers Association in the case of public houses, and the Committee of Registered Clubs Associations—CORCA—in the case of clubs.

I declare an interest as a licensee, although I must say that mine is a silent pub; there is no piped music. I always insist on drinking my beer in peace. I am also an adviser to the NLVA.

The House will know that from time to time, fees for the licence to play music in pubs and clubs are negotiated between the trade associations and the Performing Rights Society, the PRS. We have appreciated that, at times, the PRS can be extremely heavy-handed. For example, it recently tried to lay down a new club tariff that made no distinction between the profit-making disco type of club and the non-profit-making club such as the British Legion. Following an outcry and some powerful lobbying by CORCA, the increase for non-profit-making clubs has been limited to only 100 per cent. CORCA can be tough in its negotiations.

With some justification, it is felt that the negotiations can be a little one-sided. If a matter is taken to the copyright tribunal, it is often costly for the loser, not just in terms of the new fees but costs. A trade association might try to reduce its costs by appointing a solicitor to represent it, but the PRS, which enjoys substantial resources, can field leading, and sometimes extremely expensive counsel. The association might have costs awarded against it, so under the present system, and that which is proposed in the Bill, appeals are discouraged. Surely that is not just.

My amendments would give some protection against heavy costs being awarded against an unsuccessful appellant. I could commend any of the three amendments to the House, but I moved No. 239 because it seemed to be the best, being a compromise between amendments Nos. 240 and 241.

In effect, amendment No. 239 provides that in proceedings before the copyright tribunal, each party should pay its own costs in all circumstances. The House will appreciate that that is a proposition that can cut both ways. If a trade association were to succeed in proceedings before the tribunal, however handsomely, it would have to bear its own costs.

Mr. Blair: I am following the hon. Gentleman's argument closely. I should like to know the present practice of the copyright tribunal. Does it make costs follow the event in the cases that he is describing—in other words, if a party loses, does it automatically pay the costs—or does it exercise discretion?

Mr. Colvin: I believe that it operates on a discretionary basis. I want a provision written into the Bill to ensure that all the costs cannot be awarded against the appellant in some cases.

Amendment No. 240 is throughout one-sided, in that it would ensure that a licensing body had always to pay its own costs while leaving the tribunal free to order that such a body should pay the costs of other parties as well. That may seem a bit steep, but it is not when we bear in mind the position of the licensing body—in this instance the PRS—that is responsible for forming and operating the licensing schemes.

Amendment No. 241 is a qualified version of amendment No. 239. It sets out to ensure that the tribunal should not cast the costs of any party upon another party unless it considers that the other party has behaved unreasonably.

Other amendments could be devised to give similar protection against the awarding of costs. Of the three amendments which I have tabled, I believe that No. 239 comes closest to that which is required. I consider it to be modest, sensible and just, and I hope that my hon. Friend the Minister will accept it.

Mr. Butcher: The amendments seek to limit in varying degrees the power of the copyright tribunal to order that

[Mr. Butcher]

the costs of one of the parties to proceedings before it should be paid by the other. This power is already given to the performing right tribunal by paragraph 5 of schedule 4 to the Copyright Act 1956. Of course it would be wrong if the tribunal used it unfairly or so as to deter parties with a legitimate case from bringing proceedings, but there is no evidence at all that the performing right tribunal has acted in this way or that the copyright tribunal would be likely to do so.

On the contrary, I understand that orders as to costs are made by the performing right tribunal extremely rarely. In the limited time available since my hon. Friend the Member for Romsey and Waterside (Mr. Colvin) tabled his amendments, we have been able to identify only one such case in recent years, where the originators were considered to have persisted with an application that was wholly misconceived after this fact had been made clear to them. Even in that instance the originators were asked to contribute only £250 towards the costs of the other party. Moreover, in making the award the tribunal specifically drew attention to the importance

"that individual applicants should not be deterred from applying to it by apprehension of the possibility that very substantial costs might be awarded against them".

The power in clause 149(1) is discretionary only and I am confident that the copyright tribunal can be trusted not to abuse it. The record shows that that is exercised only in exceptional circumstances, and I believe that that will continue to be the case. I see no reason to deprive the tribunal of this power, or to limit it in the ways provided by amendments Nos. 240 or 241. The possibility of frivolous and time-wasting applications or references occurring from time to time cannot be ruled out, and the power to make an order for costs in those circumstances is important. The provisions in the Bill regarding the copyright tribunal have been scrutinised by the Council on Tribunals and it has raised no objection to this provision.

My hon. Friend hoped that I would be able to agree to the amendments. Regrettably, I cannot, and I hope that he will withdraw them for the reasons that I have given.

2.30 am

Mr. Colvin: With the leave of the House, I shall withdraw the amendments because the remarks of my hon. Friend the Minister have reassured me.

I noted that the powers are already available in legislation and that orders for costs are rare in practice; I hope that that will continue. My hon. Friend the Minister obviously places much trust in the tribunal's activities, but, if things go wrong, I trust that he and his successor will keep a careful watch on matters. I notice that, on the same page as clause 149, clause 148 relates to the general powers of the Lord Chancellor to make rules in respect of the activities of the Copyright Tribunal. There is power to use secondary legislation under the statutory instrument procedure to make rules to govern the operation of the tribunal. Given that those reserve powers are available to the Government, I beg to ask leave to withdraw the amendment.

Amendment, by leave, withdrawn.

Clause 150

APPEAL TO THE COURT ON POINT OF LAW

Amendments made: No. 90, in page 66, line 13, leave out subsection (4).—*[Mr. Butcher.]*

Clause 151

QUALIFICATION FOR COPYRIGHT PROTECTION

No. 254, in page 66, line 27, leave out 'and 161' and insert

'(Copyright in Acts and Measures), 161 and *(Copyright in Parliamentary Bills)'.—[Mr. Butcher.]*

Clause 155

COUNTRIES TO WHICH THIS PART EXTENDS

Amendment proposed: No. 91, in page 68, line 31, leave out subsection (5).—*[Mr. Butcher.]*

Madam Deputy Speaker: With this it will be convenient to discuss Government amendments Nos. 92, 101, 129 and 136.

Mr. Blair: I should like a word of explanation, because clause 155 is important as it declares the jurisdiction, extent and application of this part of the Bill.

I am not entirely sure what are the effects of the amendments, but if they are to extend or limit the territorial application of the Bill, we should be told.

Mr. Butcher: The hon. Gentleman is correct.

The five amendments together make three technical changes to the provisions in the Bill about extension of its effect to dependent terrorities.

Clause 155 provides for the extent of part I of the Bill. Orders in Council may be made to extend the part to the Channel Islands, the Isle of Man or any colony. In a sort of mirror-image provision, paragraph 36(3) of schedule 1 provides for Orders in Council to repeal the extension of existing copyright law to the Channel Islands or the Isle of Man if they introduce their own copyright laws, as the Isle of Man is doing. In both cases, the orders are subject to the negative resolution procedure. The use of this procedure would be contrary to the principle that an Order in Council extending an Act of Parliament to a dependent territory is not subject to parliamentary scrutiny. Amendments Nos. 91 and 136 therefore leave out the provision for the negative resolution procedure in those cases, thus bringing clause 155 and schedule 1 into line with clause 245, which deals with the extension of part 3 to dependent territories. I hope that that is a sufficient explanation for the hon. Gentleman.

Mr. Rowlands: I was pleased to hear the Minister use the words "dependent territories," as I tried to move an amendment to the effect that that was the appropriate term. The Minister told me that it would require such immense legislative changes that he could not accept the amendment.

Secondly, I ask the Minister the time scale in which he will implement this legislation. The Lego case—*[Interruption.]* My hon. Friend the Member for Aberdeen, South (Mr. Doran) throws his hands up in horror because I have referred to the Lego case again. It was some years after the Lego case that the copyright legislation was applied to Hong Kong. Will there be a long time lapse between the implementation of the legislation domestically

and its application to dependent territories? It was in some of the dependent territories that battles were fought over design and copyright. The Minister will remember that it was in a dependent territory that the Lego battle was initially fought. It was the application of the legislation to dependent territories which led to that case.

It would be useful if the Minister could give some idea of the speed or lack of speed with which the Bill will be applied to dependent territories. That can have profound effects on the copyright rights of companies if those cases are taken up in dependent territories.

Mr. Butcher: It is, of course, up to the Governments of the independent territories to decide when the Bill should be extended, and it is not for us.

Amendment agreed to.

Clause 160

CROWN COPYRIGHT

Amendments made: No. 225, in page 71, line 10, at end insert 'calendar'.

No. 256, in page 71, line 19, leave out from 'that,' to end of line 20 and insert

'Parliamentary copyright subsists in the work (see sections 161 and (*Copyright in Parliamentary Bills*)).'.—[*Mr. Butcher.*]

Clause 161

PARLIAMENTARY COPYRIGHT

Amendment made: No. 92, in page 72, line 12, leave out 'the provisions of this Part extend'

and insert 'this Part extends'.—[*Mr. Butcher.*]

Clause 166

RIGHTS AND PRIVILEGES UNDER OTHER ENACTMENTS OR THE COMMON LAW

Amendment made: No. 257, in page 74, line 26, at end insert—

'(5) The savings in subsection (1) have effect subject to section (*Copyright in Acts and Measures*) (4) and section (*Copyright in Parliamentary Bills*) (7) (copyright in Acts, Measures and Bills: exclusion of other rights in the nature of copyright).'.—[*Mr. Butcher.*]

Clause 167

GENERAL PROVISIONS AS TO CONSTRUCTION

Amendment made: No. 178, in page 74, line 34, leave out 'such'.—[*Mr. Butcher.*]

Clause 170

MEANING OF PUBLICATION AND COMMERCIAL PUBLICATION

Mr. Page: I beg to move amendment No. 273, in page 76, line 39, at end insert—

'(7) In the case of a film, and notwithstanding subsection (4)(c) of this section, the issue of copies of the film for purposes of performance in public, or being broadcast or included in a cable programme service, constitutes publication.'.

Amendment No. 273 adds to the definition of publication the release of a film for purposes of theatrical, broadcast or cable performances. At the moment, publication is defined as issue of copies to the public and expressly excludes broadcasting or cable casting of a film from the definition. That has two consequences. First, a film that has been the subject of a theatrical release in the cinema or a first run showing on broadcast or cable television may not be considered a public work. I could be wrong in my reading of that, and I should be grateful if my hon. Friend could reassure me. However, if I am right, it would appear that only the sale of video cassettes to the public satisfies the definition of publication.

Secondly, a foreign film that has only been shown in cinemas or broadcasts or on cable television in a foreign country is not eligible for copyright protection in the United Kingdom unless the copyright owner can prove that the author was a national of a country with which the United Kingdom had a copyright treaty at the relevant time.

By contrast, in the case of a published work, eligibility for copyright protection in the United Kingdom can be established more easily by showing that the work was first published in a country with which the United Kingdom had copyright treaty relations at the time of the first publication.

Those rules place the owner of copyright in a foreign film at a significant disadvantage if he wishes to enforce those rights in an English court before the film has been published within the meaning of the Bill. The proof of nationality of the author is much more difficult and costly than trying to prove the place of the first theatrical or television release. I leave aside the difficulties of trying to prove the nationality of an author who is a production company incorporated in a country that may not meet the nationality requirements.

I believe that the amendment overcomes those difficulties. It provides for the publication of films and it includes the issue of copies of the film for purposes of performance in public or being broadcast or included in a cable service. I hope that my hon. Friend will be able to reassure me that I am misreading the definitions, or that he will be able to accept the amendment.

Mr. Butcher: I am grateful to my hon. Friend for his explanation, as his amendment puzzled us considerably. I must tell him that the amendment is largely unnecessary, even in terms of its own objectives. Under subsection (1)(a) of the clause, the issue of copies of a film to the public, for whatever purpose, already constitutes publication, so the amendment is relevant only to the extent that the "group of persons" it refers to is not a sector of the public. That means that the effect of the amendment would be limited to cases where a copy of a film is issued to a group which does not constitute the public, but where the objective is nonetheless to give a public performance. That seems a very limited set of circumstances.

I find the amendment enigmatic because my hon. Friend seems to be trying to make publication not a restricted act. Virtually all that is achieved by providing that in particular circumstances the issue of copies of a film constitutes publication is to ensure that the term of copyright starts to run from that date because, under clause 13, the term of copyright in a film expires 50 years from the end of the calendar year in which the film is released, and "released" includes when it is first published.

I hope that my hon. Friend therefore accepts that the amendment is not entirely necessary.

Mr. Page: I am grateful to my hon. Friend for his explanation. I have some difficulty with the definition of what will be accepted as a publication, particularly as, for some reason, the clause goes out of its way to exclude

"the broadcasting of the work or its inclusion in a cable programme service"

in subsection (4)(iv).

In view of my hon. Friend's assurance, however, I beg to ask leave to withdraw the amendment.

Amendment, by leave, withdrawn.

Clause 173

MINOR DEFINITIONS

Amendments made: No. 93, in page 77, line 29, leave out 'a'.

No. 94, in page 78, line 3, leave out 'means' and insert 'includes'.

No. 95, in page 78, line 4, leave out from 'having' to end of line 5 and insert 'authority to decide any matter affecting a person's legal rights or liabilities'.

No. 96, in page 78, line 7, at end insert—

'"rental" means any arrangement under which a copy of a work is made available—

(a) for payment (in money or money's worth), or

(b) in the course of a business, as part of services or amenities for which payment is made,

on terms that it will or may be returned;'.—*[Mr. Butcher.]*

Clause 174

INDEX OF DEFINED EXPRESSIONS

Amendments made: No. 179, in page 79, line 32, column 2, leave out 'Section 168' and insert 'Sections 100(2) and 168'.

No. 258, in page 79, line 37, column 2, leave out 'section 160(2)' and insert

'sections 160(2) and (*Copyright in Acts and Measures*) (3)'.

No. 259, in page 80, line 39, at end insert

'and (*Copyright in Parliamentary Bills*)' (6).

No. 97, in page 80, line 55, at end insert—

'rental section 173'.—*[Mr. Butcher.]*

Clause 190

RIGHT TO DELIVERY UP OF ILLICIT RECORDINGS

Amendment made: No. 180, in page 86, line 18, leave out from 'Part' to end of line 24 and insert

'may apply to the court for an order that the recording be delivered up to him or to such other person as the court may direct.

(2) An application shall not be made after the end of the period specified in section *(Period after which remedy of delivery up not available under Part II)*; and no order shall be made unless the court also makes, or it appears to the court that there are grounds for making, on order under section *(Order as to disposal of illicit recording)* (order as to disposal of illicit recording).

(3) A person to whom a recording is delivered up in pursuance of an order under this section shall, if an order under section *(Order as to disposal of illicit recording)* is not made, retain it pending the making of an order, or the decision not to make an order, under that section.

(4) Nothing in this section affects any other power of the court.'.—*[Mr. Butcher.]*

Clause 191

RIGHT TO SEIZE ILLICIT RECORDINGS

Amendments made: No. 181, in page 86, line 25, leave out subsection (1) to (5) and insert—

'(1) An illicit recording of a performance which is found exposed or otherwise immediately available for sale or hire, and in respect of which a person would be entitled to apply for an order under section 190, may be seized and detained by him or a person authorised by him.

The right to seize and detain is exercisable subject to the following conditions and is subject to any decision of the court under section (*Order as to disposal of illicit recording*) (order as to disposal of illicit recording).

(2) Before anything is seized under this section notice of the time and place of the proposed seizure must be given to a local police station.

(3) A person may for the purpose of exercising the right conferred by this section enter premises to which the public have access but may not seize anything in the possession, custody or control of a person at a permanent or regular place of business of his and may not use any force.

(4) At the time when anything is seized under this section there shall be left at the place where it was seized a notice in the prescribed form containing the prescribed particulars as to the person by whom or on whose authority the seizure is made and the grounds on which it is made.'.

No. 182, in page 87, line 8, leave out subsection (8).—*[Mr. Butcher.]*

Clause 192

MEANING OF "ILLICIT RECORDING"

Amendments made: No. 183, in page 87, line 20, leave out 'criminal liability and forfeiture' and insert 'offences and orders for delivery up in criminal'.

No. 184, in page 87, line 29, at end insert

'paragraph 12(2) (recordings of performance in electronic form retained on transfer of principal recording).'.—*[Mr. Butcher.]*

Clause 194

FORFEITURE OF ILLICIT RECORDINGS

Amendments made: No. 185, in page 88, line 37, leave out subsections (1) and (2) and insert—

'(1) The court before which proceedings are brought against a person for an offence under section 193 may, if satisfied that at the time of his arrest or charge he had in his possession, custody or control in the course of a business an illicit recording of a performance, order that it be delivered up to a person having performers' rights or recording rights in relation to the performance or to such other person as the court may direct.

(2) For this purpose a person shall be treated as charged with an offence—

(a) in England, Wales and Northern Ireland, when he is orally charged or is served with a summons or indictment;

(b) in Scotland, when he is cautioned, charged or served with a complaint or indictment.

(3) An order may be made by the court of its own motion or on the application of the prosecutor (or, in Scotland, the Lord Advocate or procurator-fiscal), and may be made whether or not the person is convicted of the offence, but shall not be made—

(a) after the end of the period specified in section *(Period after which remedy of delivery up not available under Part II)* (period after which remedy of delivery up not available), or

(b) if it appears to the court unlikely that any order will be made under section *(Order as to disposal of illicit recording)* (order as to disposal of illicit recording).'.

No. 186, in page 89, line 2, leave out subsection (4) and insert

'; and in Scotland, where an order has been made under this section, the person from whose possession, custody or control the illicit recording has been removed may, without prejudice to any other form of appeal under any rule of law, appeal against that order in the same manner as against sentence.'.

No. 187, in page 89, line 4, leave out subsection (5) and insert—

'(5) A person to whom an illicit recording is delivered up in pursuance of an order under this section shall retain it pending the making of an order, or the decision not to make an order, under section *(Order as to disposal of illicit recording)*.

(6) Nothing in this section affects the powers of the court under section 43 of the Powers of Criminal Courts Act 1973, section 223 or 436 of the Criminal Procedure (Scotland) Act 1975 or Article 7 of the Criminal Justice (Northern Ireland) Order 1980 (general provisions as to forfeiture in criminal proceedings).'.—*[Mr. Butcher.]*

Clause 198

SUPPLEMENTARY PROVISIONS WITH RESPECT TO FORFEITURE ORDERS

Amendment made: No. 188, in page 89, line 43, leave out clause 198.—*[Mr. Butcher.]*

Clause 222

RIGHT TO DELIVERY UP OF INFRINGING ARTICLES, &C

Amendment made: No. 189, in page 99, line 8, leave out from 'question' to end of line 13 and insert

'may apply to the court for an order that the infringing article or other thing be delivered up to him or to such other person as the court may direct.

(2) An application shall not be made after the end of the period specified in the following provisions of this section; and no order shall be made unless the court also makes, or it appears to the court that there are grounds for making, an order under section *(Order as to disposal of infringing article, &c.)*.

(3) An application for an order under this section may not be made after the end of the period of six years from the date on which the article or thing in question was made, subject to subsection (4).

(4) If during the whole or any part of that period the design right owner—

(a) is under a disability, or

(b) is prevented by fraud or concealment from discovering the facts entitling him to apply for an order,

an application may be made at any time before the end of the period of six years from the date on which he ceased to be under a disability or, as the case may be, could with reasonable diligence have discovered those facts.

(5) In subsection (4) "disability"—

(a) in England and Wales, has the same meaning as in the Limitation Act;

(b) in Scotland, means legal disability within the meaning of the Prescription and Limitation (Scotland) Act 1973;

(c) in Northern Ireland, has the same meaning as in the Statute of Limitations (Northern Ireland) 1958.

(6) A person to whom an infringing article or other thing is delivered up in pursuance of an order under this section shall, if an order under section *(Order as to disposal of infringing article, &c.)* is not made, retain it pending the making of an order, or the decision not to make an order, under that section.

(7) Nothing in this section affects any other power of the court.'.—*[Mr. Butcher.]*

Clause 223

SUPPLEMENTARY PROVISIONS WITH RESPECT TO FORFEITURE ORDERS

Amendment made: No. 190, in page 99, line 14, leave out clause 223.—*[Mr. Butcher.]*

Clause 225

RIGHTS AND REMEDIES OF EXCLUSIVE LICENSEE

Amendment made: No. 191, in page 100, line 19, leave out subsections (2) to (4) and insert—

'(2) His rights and remedies are concurrent with those of the design right owner; and references in the relevant provisions of this Part to the design right owner shall be construed accordingly.'.—*[Mr. Butcher.]*

Clause 226

PROVISIONS WITH RESPECT TO CONCURRENT RIGHTS OF ACTION

Amendment made: No. 192, in page 101, line 8, at end insert—

'(5) The design right owner shall notify any exclusive licensee having concurrent rights before applying for an order under section 222 (order for delivery up of infringing article, &c.); and the court may on the application of the licensee make such order under that section as it thinks fit having regard to the terms of the licence.'.—*[Mr. Butcher.]*

Clause 228

LICENCES AVAILABLE IN LAST FIVE YEARS OF DESIGN RIGHT

Amendment made: No. 98, in page 101, line 18, leave out 'any act' and insert 'anything'.—*[Mr. Butcher.]*

Clause 230

UNDERTAKING TO TAKE LICENCE OF RIGHT IN INFRINGEMENT PROCEEDINGS

Amendment made: No. 193, in page 102, line 19, leave out

'the forfeiture of any articles'

and insert 'delivery up'.—*[Mr. Butcher.]*

Clause 231

CROWN USE OF DESIGNS

Amendment made: No. 99, in page 102, line 44, leave out from 'realm' to 'or' in line 46 and insert

', in pursuance of an agreement or arrangement to which the government of that country and Her Majesty's Government in the United Kingdom are parties;'.—*[Mr. Maude.]*

Clause 242

REFERENCE OF DISPUTES RELATING TO CROWN USE

Amendments made: No. 335, in page 108, line 28, leave out 'or'.

No. 336, in page 108, line 29, at end insert

', or

(c) section *(Crown use of design right: compensation for loss of profit)* (Crown use: compensation for loss of profit),'.

No. 100, in page 109, line 15, leave out 'a' and insert 'any'.—*[Mr. Maude.]*

Clause 245

COUNTRIES TO WHICH THIS PART EXTENDS

Amendment made: No 101, in page 110, line 26, at end insert—

'(5) Where a country to which this Part extends ceases to be a colony of the United Kingdom, it shall continue to be treated as such a country for the purposes of this Part until —

(a) an Order in Council is made under section 246 designating it as a country enjoying reciprocal protection, or

(b) an Order in Council is made declaring that it shall cease to be so treated by reason of the fact that the provisions of this Part as part of the law of that country have been amended or repealed.

(6) A statutory instrument containing an Order in Council under subsection (5)(b) shall be subject to annulment in pursuance of a resolution of either House of Parliament.'. —*[Mr. Maude.]*

Clause 253

MINOR DEFINITIONS

Amendment made: No. 102, in page 112, line 11, leave out 'a'.—*[Mr. Maude.]*

Clause 254

INDEX OF DEFINED EXPRESSIONS

Amendments made: No. 194, in page 113, line 1, column 2, leave out 'Section 248' and insert 'Section 225(2) and 248'.

No. 337, in page 113, line 5, at end insert 'government department concerned (in section 231(5) relation to Crown use)'.—*[Mr. Maude.]*

Clause 255

REGISTRABLE DESIGNS

2.45 am

Mr. Rowlands: I beg to move amendment No. 326, in page 113, line 26, after 'eye', insert 'of persons acquiring or using the article'.

Madam Deputy Speaker: With this, it will be convenient to discuss the following: Amendment No. 325, in page 113, line 41, leave out subsection (3).

Government amendment No. 103.

Mr. Rowlands: Important issues arise from my amendment. The Minister will recall that we covered this course and discussed this issue in Committee on 16 June when we discussed what was required to attract registered design right. The Minister stated that the Government wanted to

"ensure that purely functional designs do not qualify for the longer and stronger protection given by the Registered Designs Act 1949".—[*Official Report, Standing Committee E,* 16 June 1988; c. 621.]

Then, he stated that we had to show that not only were the articles that would attract registered design aesthetically pleasing in themselves, but that they made an impact on the purchaser. We had a considerable discussion about the basis on which one could decide how to define whether a purchaser had bought an article on the grounds of the attraction of its design. That is what new section 1(3) attempts to do.

The clause meets the problem of whether a purely functional design could attract a registered design right. That is barred in subsection (1)(b)(i) of the new section 1 in clause 255. Therefore, there is no problem on that front, as we have already covered ourselves on that. However, it is possible that a problem will arise in connection with subsection (3) of clause 255.

I understand from the advice that I have received that under the law as it stands, the court must have regard to the eye of the customer when deciding whether an article attracts a registered design right. It was in the case of Amp *v.* Utilex in 1972 that that principle was established. Therefore, the idea that one must go beyond the aesthetic appeal and prove and demonstrate that the design would attract the purchaser in such a way as to qualify for a registered design right, is already enshrined in case law, and in existing law. It is under subsection (3) as it was drafted that we believe that problems might arise.

I have referred to cases where the number of articles that may attract design right may be ruled out under subsection (3) on the ground that it would be difficult to prove that anyone had had his design to purchase certain articles affected by the design itself. I have argued that that would lead to greater confusion and that, even worse than confusion, it might rule out whole series of articles which could attract a registered design right under existing law but might not do so as a result of subsection (3).

In column 623 the Minister said that he could not see any difficulty as to why a telephone or even a computer —I am sure that the hon. Member for Torridge and Devon, West (Miss Nicholson) will be interested in this —would not attract a registered design right and that he believed that this subsection would not rule that out.

I cast doubt then in Committee and do so again now on whether that would be the case. How would one prove whether the purchaser of hi-fi equipment, a computer or a telephone had been materially affected in making the decision to purchase by the design as opposed to the many functional and pricing issues? Does one buy a computer because of its design, its purely functional character or its price? Those issues are raised by clause 255(3), which says:

"A design shall not be registered in respect of an article if the appearance of the article is not material, that is, if aesthetic considerations are not taken into account to a material extent by persons acquiring or using the article."

It is the phrase "material extent" that worried me, and I think that it worried others.

Many designs might not qualify for registered design right because it could not be proved that the purchase had been made as result of the material extent to which the aesthetic appeal of an article had attracted the purchaser. My two amendments seek to return to that argument, first by deleting subsection (3) and secondly by underpinning what we think is the existing law as a result of the 1972 Amp *v* Utilex case. Amendment No. 326 says:

"after 'eye', insert 'of persons acquiring or using the article'."

That makes it quite clear not just that one must take into account some theoretical aesthetic appeal but that the appeal must have some impact on the consumer.

The amendment reinforces the law as we think it stands, and as the Government intend. We are worried about the nature of clause 255(3). The Government have tabled amendment No. 103, which introduces the word "normally". I wait with bated breath to hear from the Minister whether the amendment meets the worry that I expressed in Committee. If he can say that, I shall be

happy to withdraw my amendment. We are on solid ground in worrying the Minister and the House about the potential impact of subsection (3) and the broad reference to the material extent to which purchases are affected by aesthetic design.

Mr. Butcher: We are aware that the hon. Member for Merthyr Tydfil and Rhymney (Mr. Rowlands) does not like new section 1(3) of the Registered Designs Act 1949. However, it will not produce any significant change to the law as it stands following the recent Lego case, which I know has been keeping him awake for at least 12 months.

As I explained in Committee, the new section 1(3) is intended to make it clear that the question to be answered is not simply whether something has eye appeal in an abstract sense, but whether the eye appeal has a real impact on purchasers. It is important that designs of essentially functional articles are not registered, and the registry needs a workable test if it is to exclude essentially functional designs.

We are, of course, proposing a small change ourselves so that the test would be whether customers normally—the word to which the hon. Gentleman drew attention—take aesthetic appearance into account when they acquired articles of the kind in question. This is essentially the test stated by the Judicial Committee of the Privy Council in its recent judgment in the Lego case. We want to make this explicit so that the designs registry has a workable test that it can apply. That would be the difficulty with the hon. Gentleman's proposal. It would mean that we would still have a law which does not explicitly make clear what is required. That would be a mistake.

I am satisfied that there will be no problem about the clarity of the provision. I hope that that statement will not be held against me in future. When someone applies to register a design for a particular article, what will have to be decided is whether the aesthetic appearance of that kind of article normally matters to the customer. In other words, do customers normally care about the appearance of the article?

The fact that they may care as much, or even more, about other things is neither here nor there. All we want to know is whether aesthetic appearance normally matters, and in most cases there will be no doubt. In a few cases, however, there will be a doubt, and the registry will ask for evidence. Given that the reward is a registration giving a 25-year monopoly, I do not think that it is too much to ask applicants to follow such procedures in doubtful cases. The test is there to prevent essentially functional articles, such as internal structural girders, from being registered. It is not there to make life difficult or to limit unreasonably what can be registered, and I am confident that it will not do so.

Mr. Rowlands: The Minister is being extremely helpful, I think. Is the word "normally" being introduced to qualify the words "to a material extent"? We were worried that the requirement was broad and sweeping, but if the Minister can confirm that the word "normally" is intended to limit and restrict the concept of "to a material extent", I shall be more than happy to withdraw the amendment.

Mr. Butcher: I am divining what I think is an affirmative answer to the hon. Gentleman's question.

Mr. Rowlands: In that case, I beg to ask leave to withdraw the amendment.

Amendment, by leave withdrawn.

Amendments made: No. 103, in page 113, line 43, leave out from 'not' to end of line 44 and insert

'normally taken into account to a material extent by persons acquiring or using articles of that description'.

No. 338, in page 114, line 15, leave out '256' and insert *'(Provisions with respect to certain designs registered before commencement)'.—[Mr. Butcher.]*

Clause 256

PROVISIONS WITH RESPECT TO CERTAIN DESIGNS REGISTERED BEFORE COMMENCEMENT

Amendment made: No. 104, in page 114, line 17, leave out clause 256.—*[Mr. Butcher.]*

Clause 258

RIGHT GIVEN BY REGISTRATION OF DESIGN

Mr. Butcher: I beg to move Government amendment No. 105, in page 116, line 11, at end insert—

'(6) The right in a registered design is not infringed by the reproduction of a feature of the design which, by virtue of section 1(1)(b), is left out of account in determining whether the design is registrable.'.

Mr. Doran: I am not sure whether at this time in the morning I can articulate my argument. The amendment appears to introduce a "must match" type provision into registered design right. Read together with new section 1(1)(b) of the 1949 Act, it seems to open up a whole new area of potential conflict and dispute. Can the Minister explain how he expects the proposal to operate in practice?

Mr. Butcher: The amendment is needed to overcome an unwanted effect of a part of the reasoning in the Lego judgment. Part of the reasoning in that judgment was that a design qualifies for registered designs protection if it includes any features that are not excluded by the definition of "design" in section 1 of the 1949 Act, and of course it is quite right that non-excluded features should be protected. However, according to Lego, what is registered, and therefore what is protected, is the whole of the design, including any excluded features. That would mean that "must match" and any other excluded features would in fact be protected, provided only that the design of which they form a part contains at least one non-excluded feature. This is, of course, the wrong result.

The aim of the "must match" exclusion is to allow copying of those features of a design for which there is no design freedom while protecting those features where there is design freedom. It is therefore necessary to make a specific provision to ensure that "must match" and other excluded kinds of design features do not get protection by the back door. The amendment makes the necessary provision.

Amendment agreed to.

Clause 259

DURATION OF RIGHT IN REGISTERED DESIGN

Mr. Butcher: I beg to move amendment No. 106, in page 116, line 19, leave out from 'design' to 'if' in line 28 and insert—

'(2) The period for which the right subsists may be extended for a second, third, fourth and fifth period of five years, by applying to the registrar for an extension and paying the prescribed renewal fee.

[Mr. Butcher]

(3) If the first, second, third or fourth period expires without such application and payment being made, the right shall cease to have effect; and the registrar shall, in accordance with rules made by the Secretary of State, notify the proprietor of that fact.

(3A)'.

Madam Deputy Speaker: With this it will be convenient to take the following Government amendments: Nos. 107, 151 to 153, 295 and 154.

Mr. Blair: I would be grateful if the Minister could confirm that nothing in this group or the next group of amendments is inconsistent with our discussions in Committee, because they follow the pattern of points raised in Committee and concerns expressed to the Minister then.

Mr. Butcher: The amendments follow up the amendments that the hon. Member for Sedgefield (Mr. Blair) and his hon. Friends tabled in Committee and which I agreed to consider. They will require the design registry to send reminders when renewals are overdue and will allow registered designs that have inadvertently been allowed to lapse to be restored. We are also taking the opportunity to revise and update the corresponding provisions of the Patents Act 1977.

3 am

Mr. Rowlands: The amendments are important because they touch on the duration of rights in registered design. Do the amendments have any effect upon existing design rights? Under clause 259(2), existing design rights will be unable to qualify for the extra period.

When the patent law was changed, a concession was given. Do the amendments offer any hope that some extension will be granted to those holding existing design rights? If people enjoy design rights under the existing 15-year rule, surely there is no harm in offering a transitional extension to that right as we move over to the 25-year term. Such an extension was offered during the transitional period when the patent law was changed.

Mr. Butcher: Hon. Members will notice that we are also proposing some changes to the existing patent restoration provision. Our examination of registered designs has revealed that there are a few problems with the existing patent provision, which concern the way in which restoration is backdated and the protection given to those who take steps to work an invention that is the subject of a lapsed right, before an application for restoration is published.

The amendments deal with those matters, which are also embodied in the new registered design provisions. Amendment No. 154 also makes corresponding changes to section 64 of the Patents Act 1977 because, although it concerns a different subject, its drafting is similar to that in the restoration provisions.

It is clear from all this that I have reason to be particularly grateful to the Opposition. Not only have they suggested a worthwhile addition to the registered design provisions, but they have enabled us to attend to some necessary remedial work in the patents provisions. In reply to the hon. Member for Merthyr Tydfil and Rhymney (Mr. Rowlands), a number of the amendments that I have moved formally are amendments that I believe he would have welcomed in response to questions asked in Committee.

Mr. Rowlands: In clause 259(2), none of the extensions to 25 years applies to the existing 15-year registered design right. Will the amendments help those who enjoy an existing registered design right? That right will last for 15 years under the existing provisions, but could be 25-year design right under the new terms. Under subsection (2), none of the existing registered design rights would enjoy any additional years, as provided for during the changeover in patent law.

Mr. Butcher: We contemplated whether the amendment to the Registered Designs Act 1949 should contain transitional provisions, since no such provisions presently exist. Present registration can be renewed, at most, twice only. The complexity of any amendment seems to outweigh any benefit.

Amendment agreed to.

Amendment made: No. 107, in page 117, line 11, at end insert—

'Restoration of lapsed right in design

8A.—(1) Where the right in a registered design has expired by reason of a failure to extend, in accordance with section 8(2) or (3A), the period for which the right subsists, an application for the restoration of the right in the design may be made to the registrar within the prescribed period.

(2) The application may be made by the person who was the registered proprietor of the design or by any other person who would have been entitled to the right in the design if it had not expired; and where the design was held by two or more persons jointly, the application may, with the leave of the registrar, be made by one or more of them without joining the others.

(3) Notice of the application shall be published by the registrar in the prescribed manner.

(4) If the registrar is satisfied that the proprietor took reasonable care to see that the period for which the right subsisted was extended in accordance with section 8(2) or (3A), he shall, on payment of any unpaid renewal fee and any prescribed additional fee, order the restoration of the right in the design.

(5) The order may be made subject to such conditions as the registrar thinks fit, and if the proprietor of the design does not comply with any condition the registrar may revoke the order and give such consequential directions as he thinks fit.

(6) Rules altering the period prescribed for the purposes of subsection (1) may contain such transitional provisions and savings as appear to the Secretary of State to be necessary or expedient.

Effect of order for restoration of right

8B.—(1) The effect of an order under section 8A for the restoration of the right in a registered design is as follows.

(2) Anything done under or in relation to the right during the period between expiry and restoration shall be treated as valid.

(3) Anything done during that period which would have constituted an infringement if the right had not expired shall be treated as an infringement—

(a) if done at a time when it was possible for an application for extension to be made under section 8(3A); or

(b) if it was a continuation or repetition of an earlier infringing act.

(4) if after it was no longer possible for such an application for extension to be made, and before publication of notice of the application for restoration, a person—

(a) began in good faith to do an act which would have constituted an infringement of the right in the design if it had not expired, or

(b) made in good faith effective and serious preparations to do such an act,

he has the right to continue to do the act or, as the case may be, to do the act, notwithstanding the restoration of the right in the design; but this does not extend to granting a licence to another person to do the act.

(5) If the act was done, or the preparations were made, in the course of a business, the person entitled to the right conferred by subsection (4) may—

(a) authorise the doing of that act by any partners of his for the time being in that business, and

(b) assign that right, or transmit it on death (or in the case of a body corporate on its dissolution), to any person who acquires that part of the business in the course of which the act was done or the preparations were made.

(6) Where an article is disposed of to another in exercise of the rights conferred by subsection (4) or subsection (5), that other and any person claiming through him may deal with the article in the same way as if it had been disposed of by the registered proprietor of the design.

(7) The above provisions apply in relation to the use of a registered design for the services of the Crown as they apply in relation to infringement of the right in the design.'.—*[Mr. Butcher.]*

Clause 265

PERSONS ENTITLED TO DESCRIBE THEMSELVES AS PATENT AGENTS

Amendments made: No. 108, in page 120, line 35, leave out 'words' and insert 'expressions'.

No. 284, in page 120, line 38, leave out subsection (6).

No. 285, in page 120, line 44, at end insert—

'(7) This section has effect subject to—

(a) section 266 (persons entitled to describe themselves as European patent attorneys, &c.), and

(b) section *(Use of the term "patent attorney": supplementary provisions.)* (1) (use of term patent attorney" in reference to solicitors).'—*[Mr. Butcher.]*

Clause 266

PERSONS ENTITLED TO DESCRIBE THEMSELVES AS EUROPEAN PATENT ATTORNEYS, &C.

Amendments made: No. 109, in page 121, line 26, leave out 'words' and insert 'expressions'.

No. 286, in page 121, line 30, leave out subsection (6).—*[Mr. Butcher.]*

Clause 268

PRIVILEGE FOR COMMUNICATIONS WITH PATENT AGENTS

Amendments made: No. 287, in page 122, leave out lines 23 to 25 and insert—

'(1) This section applies to communications as to any matter relating to the protection of any invention, design, technical information, trade mark or service mark, or as to any matter involving passing off.

(2) Any such communication—'.

No. 110, in page 122, leave out line 43.

Clause 272

PRIVILEGE FOR COMMUNICATIONS WITH REGISTERED TRADE MARK AGENTS

Amendment made: No. 288, in page 125, leave out lines 1 and 2 and insert—

'(1) This section applies to communications as to any matter relating to the protection of any design, trade mark or service mark, or as to any matter involving passing off.

(2) Any such communication—'.—*[Mr. Butcher.]*

Mr. Iain Mills (Meriden) *rose*——

Mr. Deputy Speaker (Sir Paul Dean): We are dealing with amendments that have been discussed at the moment. I think the hon. Gentleman is concerned with amendment No. 278, which we shall come to later.

Amendments made: No. 111, in page 125, line 14, after 'partnership', insert

'entitled to describe itself as a firm of registered trade mark agents, or

(c) a'.

No. 112, in page 125, leave out line 16.—*[Mr. Butcher.]*

Clause 284

DEVICES DESIGNED TO CIRCUMVENT COPY-PROTECTION

Amendments made: No. 113, in page 130, line 28, leave out 'have been' and insert 'are'.

No. 114, in page 130, line 31, leave out 'who issues' and insert 'issuing'.

No. 289, in page 130, line 32, leave out from 'who' to end of line 33 and insert

"knowing or having reason to believe that it will be used to make infringing copies—'.

No. 115, in page 130, line 35, leave out 'apparatus or device' and insert 'device or means'.

No. 290, in page 130, line 35, at end insert 'specifically'.

No. 291, in page 130, line 38, leave out 'calculated' and insert 'intended'.

No. 116, in page 130, line 42, leave out 'apparatus or device' and insert 'device or means'.

No. 195, in page 130, line 45, leave out from 'an' to end of line 46 and insert 'infringing copy'.—*[Mr. Butcher.]*

No. 237, in page 131, line 2, after 'prevent' insert 'or restrict'—*[Mr. Tim Smith.]*

No. 196, in page 131, line 14, at end insert

'; and section *(Order as to disposal of infringing copy or other article)* of this Act applies, with the necessary modifications, in relation to the disposal of anything delivered up or seized by virtue of subsection (3) above'.—*[Mr. Butcher.]*

Clause 285

OFFENCE OF FRAUDULENTLY RECEIVING PROGRAMMES

Amendment made: No. 117, in page 131, line 17, leave out from 'a' to 'with' and insert 'broadcasting or cable programme service provided from a place in the United Kingdom'.—*[Mr. Butcher.]*

Clause 286

RIGHTS AND REMEDIES IN RESPECT OF APPARATUS, &C. FOR FRAUDULENTLY RECEIVING PROGRAMMES

Amendments made: No. 292, in page 131, line 29, leave out from 'who' to 'is' in line 31 and insert '—

(a) makes charges for the reception of programmes included in a broadcasting or cable programme service provided from a place in the United Kingdom, or

(b) sends encrypted transmissions of any other description from a place in the United Kingdom,'.

No. 119, in page 131, line 35, leave out 'without payment' and insert

'or other transmissions when they are not entitled to do so'.

No. 120, in page 131, line 37, leave out 'without payment' and insert

'or other transmissions when they are not entitled to do so'.

No. 197, in page 131, line 41, leave out from 'an' to end of line 42 and insert 'infringing copy'.

No. 198, in page 131, line 48 at end insert—

'(5) Section *(Order as to disposal of infringing copy or other article)* of this Act applies, with the necessary modifications, in relation to the disposal of anything delivered up or seized by virtue of subsection (4) above '.

No. 293, in page 131, line 48, at end insert—

'(4A) In section 96(1) (innocent infringement of copyright) as it applies to proceedings for infringement of the rights conferred by this section, the reference to the defendant not knowing or having reason to believe that copyright subsisted in the work shall be construed as a reference to his not knowing or having reason to believe that his acts infringed the rights conferred by this section.'.—*[Mr. Butcher.]*

Clause 287

SUPPLEMENTARY PROVISIONS AS TO FRAUDULENT RECEPTION

Amendments made: No. 121, in page 132, line 1, leave out from beginning to 'no' in line 10 and insert—

'(1) Her Majesty may by Order in Council—

(a) provide that section 285 applies in relation to programmes included in services provided from a country or territory outside the United Kingdom, and

(b) provide that section 286 applies in relation to such programmes and to encrypted transmissions sent from such a country or territory.

(2)'.

No. 122, in page 132, line 13, leave out 'services falling within subsection (1)' and insert

'broadcasting or cable programme services provided from the United Kingdom or, as the case may be, for encrypted transmissions sent from the United Kingdom.

(2A) A statutory instrument containing an Order in Council under subsection (1) shall be subject to annulment in pursuance of a resolution of either House of Parliament.'.

No. 123, in page 132, line 15, leave out first 'service'.

No. 124, in page 132, line 19, leave out subsections (4) and (5) and insert—

'(5) In sections 285 and 286, and this section "programme", "broadcasting" and "cable programme service", and related expressions, have the same meaning as in Part I (copyright).'.—*[Mr. Butcher.]*

Clause 288

FRAUDULENT APPLICATION OR USE OF TRADE MARK AN OFFENCE

Amendment proposed: No. 125, in page 133, line 7, at end insert—

'(1A) It is also an offence, subject to subsection (2) below, for a person to possess in the course of a business goods or material bearing a mark identical to or nearly resembling a registered trade mark with a view to enabling or assisting another person to do any of the things mentioned in subsection (1)(a) to (c), knowing or having reason to believe that the other person is not entitled to use the mark in relation to the goods in question and that the goods are not connected in the course of trade with a person who is so entitled.'.—*[Mr. Butcher.]*

Mr. Deputy Speaker: With this we are considering the following: Government amendments Nos. 126 and 127.

Amendment No. 278, in page 135, line 7, at end insert—

'Information, 58D

(1) Where articles seized or detained by any enforcement authority are, or appear to that authority to be, goods or material bearing such a mark as is mentioned in subsection (1) of section 58A of this Act, the authority may notify the proprietor of the registered trade mark or his authorised agent of the seizure or detention, as the case may be, and may disclose to him—

(a) the time, and the address of the place, of seizure or detention of the goods or materials;

(b) the nature and quantity of the goods seized or detained

and, if the authority is satisfied that the following information is required for the purpose of preventing the continuance of activities which amount to an offence under section 58A of this Act, or which are being committed abroad and would, if committed within the jurisdiction, amount to such an offence then the authority may also disclose to the said proprietor—

(c) the name and address of the person from whom the goods or materials have been seized or detained;

(d) any information identifying the source from which the goods or materials have come or by which they were produced.

(2) Any disclosure of information or documents made pursuant to this section shall not amount to an offence.'.

Mr. Mills: I apologise to you, Mr. Deputy Speaker. There was some confusion: I had wished to speak on privilege—patent agents and trade mark agents—but the remarkable and exciting pace of our proceedings rather caught me out. I hope that you and the House will forgive me.

Clause 288 introduces one of the most important matters in the Bill—criminal penalties against industrial counterfeiting. It is perhaps mean of me to raise a final point at this time of night, but I congratulate officials and the Minister on a job well done. They have done something to help industry and to ensure that the jobs that we have been losing—perhaps 100,000 of them—through industrial counterfeiting will now be protected against such activities.

My amendment tries to ensure that the communications between the statutory bodies—the trading standards officers, the customs and the police—are as good as they can be, so that information about industrial counterfeiting is exchanged when it is suspected or detected. I raised this in Committee, but I am told by trading standards officers that the solution described by the Minister then was not entirely simple. My amendment would allow freer disclosure of information between the statutory authorities, as well as between trading standards officers, the Customs and industry.

My hon. Friend knows the point that I am making. So as not to detain the House for too long, I shall ask him only two questions. First, is he truly satisfied that we have communication both ways between the statutory authorities? I am assured by the trading standards officers that it is not a simple matter of saying that the powers already exist. Secondly, will he go further and accept my amendment or, if not, make some helpful remarks on the information that will be passed between those authorities and industry?

Mr. Butcher: Amendment No. 278 is very similar to an amendment moved by my hon. Friend the Member for Meriden (Mr. Mills) in Committee. At that time, I said that there was little harm in the authorities disclosing the types of information identified in what are now paragraphs (a) and (b) of subsection (1) of the new clause to be inserted in the Trade Marks Act. However, I said that no specific provision was needed because the authorities were already free to disclose the information. Nothing has happened since to cause me to change my opinion on this point, and I consider that it would be positively misleading to insert a provision along those lines, with the implication that without it disclosure would be prohibited.

That leads me to paragraphs (c) and (d). They also featured in the previous amendment, and I resisted their inclusion on two grounds. The first was that information of this sort necessarily includes an element of judgment on

the facts that would prejudge the very matters that must be decided by a court, whether civil or criminal. It would be wrong for the authorities to release to one side only information that may be of use in possible litigation.

Our other reason for rejecting the amendment was that it would be wrong to regard trade mark proprietors or their representatives as being on a par with the official enforcement agencies. If anything, the way in which the amendment is now structured brings that point into stark relief.

I hope that for the reasons that I have given, especially that it would be misleading to insert such a provision, my hon. Friend will sympathetically consider withdrawing his amendment.

Mr. Deputy Speaker: The hon. Gentleman need not do that. His amendment is being discussed with a group.

Amendment agreed to.

Amendments made: No. 126, in page 133, line 8, after '(1)' insert 'or (1A)'.

No. 127, in page 133, line 17, leave out 'that subsection' and insert 'subsection (1)'.

No. 199, in page 133, line 41, leave out from 'may' to 'goods' in line 43 and insert

', if satisfied that at the time of his arrest or charge he had in his possession, custody or control—

(a)'.

No. 200, in page 134, leave out lines 4 to 9 and insert 'order that the goods or material be delivered up to such person as the court may direct.

(2) For this purpose a person shall be treated as charged with an offence—

(a) in England, Wales and Northern Ireland, when he is orally charged or is served with a summons or indictment;

(b) in Scotland, when he is cautioned, charged or served with a complaint or indictment.

(3) An order may be made by the court of its own motion or on the application of the prosecutor (or, in Scotland, the Lord Advocate or procurator-fiscal), but shall not be made if it appears to the court unlikely that any order will be made under section 58BA (order as to disposal of offending goods or material).'.

No. 201, in page 134, line 14, leave out subsection (4) and insert

'; and in Scotland, where an order has been made under this section, the person from whose possession, custody or control the goods or material have been removed may, without prejudice to any other form of appeal under any rule of law, appeal against that order in the same manner as against sentence.'.

No. 202, in page 134, leave out lines 17 to 23 and insert—

'(5) A person to whom goods or material are delivered up in pursuance of an order under this section shall retain it pending the making of an order under section 58BA.

(6) Nothing in this section affects the powers of the court under section 43 of the Powers of Criminal Courts Act 1973, section 223 or 436 of the Criminal Procedure (Scotland) Act 1975 or Article 7 of the Criminal Justice (Northern Ireland) Order 1980 (general provisions as to forfeiture in criminal proceedings).'.

No. 203, in page 134, line 23, at end insert—

'Order as to disposal of offending goods or material

58BA.—(1) Where goods or material have been delivered up in pursuance of an order under section 58B, an application may be made to the court for an order that they be destroyed or forfeited to such person as the court may think fit.

(2) Provision shall be made by rules of court as to the service of notice on persons having an interest in the goods or material, and any such person is entitled—

(a) to appear in proceedings for an order under this section, whether or not he was served with notice, and

(b) to appeal against any order made, whether or not he appeared;

and an order shall not take effect until the end of the period within which notice of an appeal may be given or, if before the end of that period notice of appeal is duly given, until the final determination or abandonment of the proceedings on the appeal.

(3) Where there is more than one person interested in goods or material, the court shall make such order as it thinks just.

(4) References in this section to a person having an interest in goods or material include any person in whose favour an order could be made under this section or under section *(Order as to disposal of infringing copy or other article), (Order as to disposal of illicit recordings)* or *(Order as to disposal of infringing article, &c.)* of the Copyright, Designs and Patents Act 1988 (which make similar provision in relation to infringement of copyright, rights in performances and design right).

(5) Proceedings for an order under this section may be brought—

(a) in a county court in England, Wales and Northern Ireland, provided the value of the goods or material in question does not exceed the county court limit for actions in tort, and

(b) in a sheriff court in Scotland;

but this shall not be construed as affecting the jurisdiction of the High Court or, in Scotland, the Court of Session.'.—*[Mr. Butcher.]*

Clause 292

EXTENT

Amendments made: No. 128, in page 136, line 16, leave out 'broadcasts' and insert 'transmissions'.

No. 339, in page 136, line 19, leave out 'broadcasts' and insert 'transmissions'.

No. 129, in page 136, line 26, leave out from first 'which' to 'amends' in line 27.—*[Mr. Butcher.]*

Schedule 1

COPYRIGHT: TRANSITIONAL PROVISIONS AND SAVINGS

Amendments made: No. 130, in page 138, line 49, at end insert—

'(2) However—

(a) copyright subsists in the sound recording only if copyright subsisted in the film immediately before commencement, and it continues to subsist until copyright in the film expires;

(b) the author and first owner of copyright in the film shall be treated as having been author and first owner of the copyright in the sound recording; and

(c) anything done before commencement under or in relation to the copyright in the film continues to have effect in relation to the sound recording as in relation to the film.'.

No. 131, in page 139, line 8, at end insert

'in accordance with the new copyright provisions for the purposes of the rights conferred by Chapter IV of Part I (moral rights), and for all other purposes shall be determined'.

No. 260, in page 140, line 25, after 'Crown', insert 'or Parliamentary'.

No. 261, in page 140, line 26, leave out 'paragraph 40' and insert 'paragraphs 40, 40A and 41'.

No. 132, in page 140, line 35, leave out from 'VII' to 'and' and insert

'(provisions with respect to copyright licensing).'.

No. 133, in page 140, line 44, leave out from beginning to first 'of' and insert

'So much of section 18(2) as extends the restricted act of issuing copies to the public to include the rental to the public'.

No. 134, in page 140, line 47, leave out 'hiring' and insert 'renting'.

No. 206, in page 141, line 19, leave out from 'Section' to second 'in' and insert

'*(Transfer of copies of works in electronic form)* (transfer of copies, adaptations, &c. of work'.

No. 135, in page 142, line 38, leave out from '239' to 'apply' and insert

'and 240 (appeals and rules)'.

No. 136, in page 146, line 41, leave out sub-paragraph (6).

No. 244, in page 147, line 25, at end insert—

'*British ships, aircraft and hovercraft*

38A. Section *(British ships, aircraft and hovercraft: Part I)*(British ships, aircraft and hovercraft) does not apply in relation to anything done before commencement.'.

No. 262, in page 147, line 27, leave out sub-paragraph (1) and insert—

'(1) Section 160 of this Act (general provisions as to Crown copyright) applies to an existing work if—

(a) section 39 of the 1956 Act applied to the work immediately before commencement, and

(b) the work is not one to which section *(Copyright in Acts and Measures)*, 161 or *(Copyright in Parliamentary Bills)* applies (copyright in Acts, Measures and Bills and Parliamentary copyright: see paragraphs 40A and 41 below).'.

No. 263, in page 148, line 17 at end insert—

'40A.—(1) Section *(Copyright in Acts and Measures)* (copyright in Acts and Measures) applies to existing Acts of Parliament and Measures of the General Synod of the Church of England.

(2) References in that section to Measures of the General Synod of the Church of England include Church Assembly Measures.'.

No. 264, in page 148, line 19, leave out paragraph 41 and insert—

'41.—(1) Section 161 of this Act (general provisions as to Parliamentary copyright) applies to existing unpublished literary, dramatic, musical or artistic work, but does not otherwise apply to existing works.

(2) Section *(Copyright in Parliamentary Bills)* (copyright in Parliamentary Bills) does not apply—

(a) to a public Bill which was introduced into Parliament and published before commencement,

(b) to a private Bill of which a copy was deposited in either House before commencement or

(c) to a personal Bill which was given a First Reading in the House of Lords before commencement.'.—*[Mr. Garel-Jones.]*

Schedule 2

RIGHTS IN PERFORMANCES: PERMITTED ACTS

Amendments made: No. 137, in page 150, line 1, after ', hire', insert 'or'.

No. 138, in page 150, line 2, leave out 'or distributed'.

No. 139, in page 150, line 28, after ', hire' insert 'or'.

No. 140, in page 150, line 29, leave out 'or distributed'.

No. 141, in page 151, line 15, at end insert—

'(2A) Nothing in this paragraph shall be construed as excluding any defence of statutory authority otherwise available under or by virtue of any enactment.'.

No. 207, in page 151, leave out lines 17 to 28 and insert—

'*Transfer of copies of works in electronic form*

12.—(1) This paragraph applies where a recording of a performance in electronic form has been purchased on terms which, expressly or impliedly or by virtue of any rule of law, allow the purchaser to make further recordings in connection with his use of the recording.

(2) If there are no express terms—

(a) prohibiting the transfer of the recording by the purchaser, imposing obligations which continue after a transfer, prohibiting the assignment of any consent or terminating any consent on a transfer, or

(b) providing for the terms on which a transferee may do the things which the purchaser was permitted to do,

anything which the purchaser was allowed to do may also be done by a transferee without infringement of the rights conferred by this Part, but any recording made by the purchaser which is not also transferred shall be treated as an illicit recording for all purposes after the transfer.

(3) The same applies where the original purchased recording is no longer usable and what is transferred is a further copy used in its place.

(4) The above provisions also apply on a subsequent transfer, with the substitution for references in sub-paragraph (2) to the purchaser of references to the subsequent transferor.

(5) This paragraph does not apply in relation to a recording purchased before the commencement of Part II.

(6) Expressions used in this paragraph have the same meaning as in section *(Transfer of copies of works in electronic form)*.'.

No. 252, in page 152, line 1, at end insert—

'*Recordings of folksongs*

6A.—(1) A recording of a performance of a song may be made for the purpose of including it in an archive maintained by a designated body without infringing any of the rights conferred by Part II, provided the conditions in sub-paragraph (2) below are met.

(2) The conditions are that—

(a) the words are unpublished and of unknown authorship at the time the recording is made,

(b) the making of the recording does not infringe any copyright, and

(c) its making is not prohibited by any performer.

(3) Copies of a recording made in reliance on sub-paragraph (1) and included in an archive maintained by a designated body may, if the prescribed conditions are met, be made and supplied by the archivist without infringing any of the rights conferred by Part II.

(4) In this paragraph—

"designated body" means a body designated for the purposes of section *(Recordings of folksongs)*, and "the prescribed conditions" means the conditions prescribed for the purposes of subsection (3) of that section;

and other expressions used in this paragraph have the same meaning as in that section.'.—*[Mr. Garel-Jones.]*

Schedule 3

REGISTERED DESIGNS: MINOR AND CONSEQUENTIAL AMENDMENTS OF 1949 ACT

Amendments made: No. 142, in page 154, line 34, leave out from 'fit' to end of line 40 and insert—

'(3A) The registrar may, in such cases as may be prescribed, direct that for the purpose of deciding whether a design is new an applicant shall be treated as made on a date earlier or later than that on which it was in fact made.'.

No. 143, in page 156, line 41, leave out '(3)' and insert '(3A)'.

No. 208, in page 158, line 41, leave out paragraph 17 and insert—

'17.—(1) Section 28 of the Registered Designs Act 1949 (the Appeal Tribunal) is amended as follows.

(2) For subsection (2) (members of Tribunal) substitute—

"(2) The Appeal Tribunal shall consist of—

(a) one or more judges of the High Court nominated by the Lord Chancellor, and

(b) one judge of the Court of Session nominated by the Lord President of that Court.".

(3) In subsection (5) (costs), after "costs" (twice) insert "or expenses", and for the words from "and any such order" to the end substitute—

"and any such order may be enforced—

(a) in England and Wales or Northern Ireland, in the same way as an order of the High Court;

(b) in Scotland, in the same way as a decree for expenses granted by the Court of Session.".

(4) For subsection (10) (seniority of judges) substitute—

"(10) In this section 'the High Court' means the High Court in England and Wales; and for the purposes of this section the seniority of judges shall be reckoned by reference to the dates on which they were appointed judges of that court or the Court of Session.'.

(5) The amendments to section 28 made by section 10(5) of the Administration of Justice Act 1970 (power to make rules as to right of audience) shall be deemed always to have extended to Northern Ireland.'.

No. 245, in page 163, line 3, at end insert—

'(5) In paragraph (4) for "a department of the Government of Northern Ireland" substitute "a Northern Ireland department", and at the end add "and in relation to a Northern Ireland department references to the Treasury shall be construed as references to the Department of Finance and Personnel".'.—*[Mr. Garel-Jones.]*

Schedule 4

The Registered Designs Act 1949 as amended

Arrangement of Sections

Amendments made: No. 144, in page 164, line 14, at end insert—

'8A. Restoration of lapsed right in design.

8B. Effect of order for restoration of right.'.

No. 145, in page 165, line 42, leave out from 'not' to 'and' in line 43 and insert

'normally taken into account to a material extent by persons acquiring or using articles of that description'.

No. 146, in page 166, line 43, leave out from 'fit' to end of line 51 and insert—

'(3A) The registrar may, in such cases as may be prescribed, direct that for the purpose of deciding whether a design is new an application shall be treated as made on a date earlier or later than that on which it was in fact made.'.

No. 147, in page 170, line 38, at end insert—

'(6) The right in a registered design is not infringed by the reproduction of a feature of the design which, by virtue of section 1(1)(b), is left out of account in determining whether the design is registrable.'.

No. 148, in page 170, line 41, leave out from 'design' to 'if' in line 1 on page 171 and insert—

'(2) The period for which the right subsists may be extended for a second, third, fourth and fifth period of five years, by applying to the registrar for an extension and paying the prescribed renewal fee.

(3) If the first, second, third or fourth period expires without such application and payment being made, the right shall cease to have effect; and the registrar shall, in accordance with rules made by the Secretary of State, notify the proprietor of that fact.

(3A)'.

No. 149, in page 171, line 27, at end insert—

'Restoration of lapsed right in design

8A.—(1) Where the right in a registered design has expired by reason of a failure to extend, in accordance with section 8(2) or (3A), the period for which the right subsists, an application for the restoration of the right in the design may be made to the registrar within the prescribed period.

(2) The application may be made by the person who was the registered proprietor of the design or by any other person who would have been entitled to the right in the design if it had not expired; and where the design was held by two or more persons jointly, the application may, with the leave of the registrar, be made by one or more of them without joining the others.

(3) Notice of the application shall be published by the registrar in the prescribed manner.

(4) If the registrar is satisfied that the proprietor took reasonable care to see that the period for which the right subsisted was extended in accordance with section 8(2) or (3A), he shall, on payment of any unpaid renewal fee and any prescribed additional fee, order the restoration of the right in the design.

(5) The order may be made subject to such conditions as the registrar thinks fit, and if the proprietor of the design does not comply with any condition the registrar may revoke the order and give such consequential directions as he thinks fit.

(5) Rules altering the period prescribed for the purposes of subsection (1) may contain such transitional provisions and savings as appear to the Secretary of State to be necessary or expedient.

Effect of order for restoration of right

8B.—(1) The effect of an order under section 8A for the restoration of the right in a registered design is as follows.

(2) Anything done under or in relation to the right during the period between expiry and restoration shall be treated as valid.

(3) Anything done during that period which would have constituted an infringement if the right had not expired shall be treated as an infringement—

(a) if done at a time when it was possible for an application for extension to be made under section 8(3A); or

(b) if it was a continuation or repetition of an earlier infringing act.

(4) If after it was no longer possible for such an application for extension to be made, and before publication of notice of the application for restoration, a person—

(a) began in good faith to do an act which would have constituted an infringement of the right in the design if it had not expired, or

(b) made in good faith effective and serious preparations to do such an act,

he has the right to continue to do the act or, as the case may be, to do the act, notwithstanding the restoration of the right in the design; but this does not extend to granting a licence to another person to do this act.

(5) If the act was done, or the preparations were made, in the course of a business, the person entitled to the right conferred by subsection (4) may—

(a) authorise the doing of that act by any partners of his for the time being in that business, and

(b) assign that right, or transmit it on death (or in the case of a body corporate on its dissolution), to any person who acquires that part of the business in the course of which the act was done or the preparations were made.

(6) Where an article is disposed of to another in exercise of the rights conferred by subsection (4) or subsection (5), that other and any person claiming through him may deal with the article in the same way as if it had been disposed of by the registered proprietor of the design.

(7) The above provisions apply to the use of a registered design for the services of the Crown as they apply in relation of the infringement right in the design.'.

No. 150, in page 174, line 49, leave out '(3)' and insert '(3A)'.

No. 209, in page 181, line 48, leave out from 'of' to end of line 50 and insert—

(a) one or more judges of the High Court nominated by the Lord Chancellor, and

(b) one judge of the Court of Session nominated by the Lord President of that Court.'.

No. 210, in page 182, line 18, after 'costs', insert 'or expenses'.

No. 211, in page 182, line 20 leave out from 'be' to end of line 21 and insert 'enforced—

(a) in England and Wales or Northern Ireland, in the same way as an order of the High Court;

(b) in Scotland, in the same way as a decree for expenses granted by the Court of Session.'.

No. 212, page 182, line 43, at end insert 'or the Court Session'.

No. 246, in page 187, line 43, leave out from 'a' to end of line 44 and insert

'a Northern Ireland department, and in relation to a Northern Ireland department references to the Treasury shall be construed as references to the Department of Finance and Personnel'.

No. 247, in page 191, line 50, at end insert—

'COMPENSATION FOR LOSS OF PROFIT

2A.—(1) Where Crown use is made of a registered design, the government department concerned shall pay—

(a) to the registered proprietor, or

(b) if there is an exclusive licence in force in respect of the design, to the exclusive licensee

compensation for any loss resulting from his not being awarded a contract to supply the articles to which the design is applied.

(2) Compensation is payable only to the extent that such a contract could have been fulfilled from his existing manufacturing capacity; but is payable notwithstanding the existence of circumstances rendering him ineligible for the award of such a contract.

(3) In determing the loss, regard shall be had to the profit which would have been made on such a contract and to the extent to which any manufacturing capacity was under-used.

(4) No compensation is payable in respect of any failure to secure contracts for the supply of articles to which the design is applied otherwise than for the services of the Crown.

(5) The amount payable under this paragraph shall, if not agreed between the registered proprietor or licensee and the government department concerned with the approval of the Treasury, be determined by the court on a reference under paragraph 3; and it is in addition to any amount payable under paragraph 1 or 2 of this schedule.

(6) In this paragraph—

"Crown use", in relation to a design, means the doing of anything by virtue of paragraph 1 which would other-wise be an infringement of the right in the design; and

"the government department concerned", in relation to such use, means the government department who or on whose authority the act was done.".

No. 248, in page 191, line 52 *[Schedule 4]*, leave out from 'to' to 'may' in line 2 on page 192 and insert—

'(a) the exercise by a Government department, or a person authorised by a Government department, of the powers conferred by paragraph 1 of this Schedule,

(b) terms for the use of a design for the services of the Crown under that paragraph.

(c) the right of any person to receive any part of a payment made under paragraph 1(3), or

(d) the right of any person to receive a payment under paragraph 2A,'.—*[Mr. Garel-Jones.]*

Schedule 5

PATENTS: MINOR AMENDMENTS

Amendments made: No. 294, in page 194, line 15 at end insert—

'4A. In section 130(1) of the Patents Act 1977 (interpretation), in the definition of "search fee", for "section 17 above" substitute "section 17(1) above".'.

No. 151, in page 194, line 26 at end insert—

'(2A) After subsection (2) insert—

"(2A) Notice of the application shall be published by the comptroller in the prescribed manner.".'.

No. 152, in page 194, line 30, leave out from beginning to 'does' and insert 'This amendment'.

No. 153, in page 194, line 34, at end insert—

'(4) Omit subsections (5) to (9) (effect of order for restoration).

5A. After that section insert—

"*Effect of order for restoration of patent*

28A.—(1) The effect of an order for the restoration of a patent is as follows.

(2) Anything done under or in relation to the patent during the period between expiry and restoration shall be treated as valid.

(3) Anything done during that period which would have constituted an infringement if the patent had not expired shall be treated as an infringement—

(a) if done at a time when it was possible for the patent to be renewed under section 25(4); or

(b) if it was a continuation or repetition of an earlier infringing act.

(4) If after it was no longer possible for the patent to be so renewed, and before publication of notice of the application for restoration, a person—

(a) began in good faith to do an act which would have constituted an infringement of the patent if it had not expired, or

(b) made in good faith effective and serious preparations to do such an act,

he has the right to continue to do the act or, as the case may be, to do the act, notwithstanding the restoration of the patent; but this right does not extend to granting a licence to another person to do the act.

(5) If the act was done, or the preparations were made, in the course of a business, the person entitled to the right conferred by subsection (4) may—

(a) authorise the doing of that act by any partners of his for the time being in that business, and

(b) assign that right, or transmit it on death (or in the case of a body corporate on its dissolution), to any person who acquires that part of the business in the course of which the act was done or the preparations were made.

(6) Where a product is disposed of to another in exercise of the rights conferred by subsection (4) or (5), that other and any person claiming through him may deal with the product in the same way as if it had been disposed of by the registered proprietor of the patent.

(7) The above provisions apply in relation to the use of a patent for the services of the Crown as they apply in relation to infringement of the patent.".'.

No. 295, in page 194, line 34, at end insert—

'5B. In consequence of the above amendments—

(a) in section 60(6)(b) of the Patents Act 1977, for "section 28(6)" substitute "section 28A(4) or (5)"; and

(b) in sections 77(5), 78(6) and 80(4) of that Act, for the words from "section 28(6)" to the end substitute "section 28A(4) and (5) above, and subsections (6) and (7) of that section shall apply accordingly.".'.

No. 296, in page 195, line 3, at end insert—

'6A. In section 74(6) (meaning of "entitlement proceedings"), for "section 37(1)(a) above" substitute "section 37(1) above".'.

No. 154, in page 196, line 37, at end insert—

'*Right to continue use begun before priority date*

10A. For section 64 of the Patents Act 1977 (right to continue use begun before priority date) substitute—

"*Right to continue use begun before priority date*

64.—(1) Where a patent is granted for an invention, a person who in the United Kingdom before the priority date of the invention—

(a) does in good faith an act which would constitute an infringement of the patent if it were in force, or

(b) makes in good faith effective and serious preparations to do such an act,

has the right to continue to do the act or, as the case may be, to do the act, notwithstanding the grant of the patent; but this right does not extend to granting a licence to another person to do the act.

(2) If the act was done, or the preparations were made, in the course of a business, the person entitled to the right conferred by subsection (1) may—

(a) authorise the doing of that act by any partners of his for the time being in that business, and

(b) assign that right, or transmit it on death (or in the case of a body corporate on its dissolution), to any person who acquires that part of the business in the course of which the act was done or the preparations were made.

(3) Where a product is disposed of to another in exercise of the rights conferred by subsection (1) or (2), that other and any person claiming through him may deal with the product in the same way as if it had been disposed of by the registered proprietor of the patent.".'.

No. 249, in page 196, line 37, at end insert—

CROWN USE: COMPENSATION FOR LOSS OF PROFIT

10A.—(1) In the Patents Act 1977, after section 57 insert—

"*compensation for loss of profit*

57A.—(1) Where use is made of an invention for the services of the Crown, the government department concerned shall pay—

(a) to the proprietor of the patent, or

(b) if there is an exclusive licence in force in respect of the patent, to the exclusive licensee,

compensation for any loss resulting from his not being awarded a contract to supply the patented product or, as the case may be, to perform the patented process or supply a thing made by means of the patented process.

(2) Compensation is payable only to the extent that such a contract could have been fulfilled from his existing manufacturing or other capacity; but is payable notwithstanding the existence of circumstances rendering him ineligible for the award of such a contract.

(3) In determining the loss, regard shall be had to the profit which would have been made on such a contract and to the extent to which any manufacturing or other capacity was under-used.

(4) No compensation is payable in respect of any failure to secure contracts to supply the patented product or, as the case may be, to perform the patented process or supply a thing made by means of the patented process, otherwise than for the services of the Crown.

(5) The amount payable shall, if not agreed between the proprietor or licensee and the government department concerned with the approval of the Treasury, be determined by the court on a reference under section 58, and is in addition to any amount payable under section 55 or 57.

(6) In this section 'the government department concerned', in relation to any use of an invention for the services of the Crown, means the government department by whom or on whose authority the use was made.

(7) In the application of this section to Northern Ireland, the reference in subsection (5) above to the Treasury shall, where the government department concerned is a department of the Government of Northern Ireland, be construed as a reference to the Department of Finance and Personnel.".

(2) In section 58 of the Patents Act 1977 (reference of disputes as to Crown use), for subsection (1) substitute—

"(1) Any dispute as to—

(a) the exercise by a government department, or a person authorised by a government department, of the powers conferred by section 55 above,

(b) terms for the use of an invention for the services of the Crown under that section,

(c) the right of any person to receive any part of a payment made in pursuance of subsection (4) of that section, or

(d) the right of any person to receive a payment under section 57A,

may be referred to the court by either party to the dispute after a patent has been granted for the invention.";

and in subsection (4) for "under this section" substitute "under subsection (1)(a), (b) or (c) above".

(3) In section 58(11) of the Patents Act 1977 (exclusion of right to compensation for Crown use if relevant transaction, instrument or event not registered), after "section 57(3) above)" insert ", or to any compensation under section 57A above,".

(4) The above amendments apply in relation to any use of an invention for the services of the Crown after the commencement of this section, even if the terms for such use were settled before commencement.'.

No. 297, in page 196, line 37, at end insert—

'*Compulsory licensing: reliance on statements in competition report*

10A. In section 53(2) of the Patents Act 1977 (compulsory licensing: reliance on statements in reports of Monopolies and Mergers Commission)—

(a) for "application made in relation to a patent under sections 48 to 51 above" substitute "application made under section 48 above in respect of a patent"; and

(b) after "Part VII of the Fair Trading Act 1973" insert "or section 17 of the Competition Act 1980".'.

No. 213, in page 199, leave out lines 32 to 34 and insert—

'(2) If the application, or the designation of the United Kingdom in it, is withdrawn or (except as mentioned in subsection (3)) deemed to be withdrawn under the Treaty, it shall be treated as withdrawn under this Act.'.

No. 214, in page 199, line 35, leave out

'cease to be treated as an application'

and insert 'be treated as withdrawn'.

No. 215, in page 199, leave out lines 45 to 49.

No. 216, in page 200, line 12, at end insert

'having such date of filing as he may direct'.

No. 217, in page 200, line 21, leave out from 'begins' to end of line 27 and insert

'—

(a) when the prescribed period expires, provided any necessary translation of the application into English has been filed at the Patent Office and the prescribed fee has been paid by the applicant; or

(b) on the applicant expressly requesting the comptroller to proceed earlier with the national phase of the application, filing at the Patent Office—

(i) a copy of the application, if none has yet been sent to the Patent Office in accordance with the Treaty, and

(ii) any necessary translation of the application into English,

and paying the prescribed fee.'.

No. 218, in page 200, line 36, leave out from 'if' to 'otherwise' in line 38 and insert

'—

(a) when the prescribed period expires, any necessary translation of the amendment into English has been filed at the Patent Office, or

(b) where the applicant expressly requests the comptroller to proceed earlier with the national phase of the application, there is then filed at the Patent Office—

(i) a copy of the amendment, if none has yet been sent to the Patent Office in accordance with the Treaty, and

(ii) any necessary translation of the amendment into English;'.

No. 219, in page 200, line 51, leave out from 'where' to second 'the' in line 52 and insert

'in accordance with the Treaty any extra days are allowed'.

No. 220, in page 201, line 4, after 'application', insert—

', not having been published under this Act,'.

No. 221, in page 201, line 11, after 'application', insert—

', not having been published under this Act,'.

No. 222, in page 201, line 27, leave out 'an' and insert 'the'.—*[Mr. Garel-Jones.]*

Schedule 7

CONSEQUENTIAL AMENDMENTS: GENERAL

No. 156, in page 207, line 4, at end insert

'*Public Libraries (Scotland) Act 1955 (c. 27)*

5A. In section 4 of the Public Libraries (Scotland) Act 1955 (extension of lending power of public libraries), make the existing provision subsection (1) and after it add—

"(2) The provisions of Part I of the Copyright, Designs and Patents Act 1988 (copyright) relating to the rental of copies of sound recordings, films and computer programs apply to any lending by a statutory library authority or copies of such works, whether or not a charge is made for that facility.".'.

No. 157, in page 207, leave out lines 5 to 8.

No. 158. in page 207, line 14, at end insert—

'*Public Libraries and Museums Act 1964 (c. 75)*

7A. In section 8 of the Public Libraries and Museums Act 1964 (restrictions on charges for library facilities), after subsection (5) add—

"(6) The provisions of Part I of the Copyright, Designs and Patents Act 1988 (copyright) relating to the rental of copies of sound recordings, films and computer programs apply to any lending by a library authority of copies of such works, whether or not a charge is made for that facility.".'.

No. 159, in page 210, line 11, leave out from 'or' to 'of' in line 12 and insert

'any patents county court having jurisdiction by virtue of an order under section 275'.

No. 160, in page 212, line 4, at end insert—

'*Education and Libraries (Northern Ireland) Order 1986 (S.I. 1986 594 (N.I.3))*

32A. In Article 77 of the Education and Libraries (Northern Ireland) Order 1986 (charges for library services), after paragraph (2) add—

"(3) The provisions of Part I of the Copyright, Designs and Patents Act 1988 (copyright) relating to the rental of copies of sound recordings, films and computer programs apply to any lending by a board of copies of such works, whether or not a charge is made for that facility.".'.—*[Mr. Garel-Jones.]*

Schedule 8

REPEALS

Amendments made: No. 298, in page 216, line 51, column 3, at end insert—

'Section 28(5) to (9).'.

No. 299, in page 216, line 52, column 3, at end insert—

'Section 72(3).'.

No. 300, in page 217, line 9, column 3, at end insert—

'In section 130(7), the words "88(6) and (7),".'.

No. 161, in page 217, line 10, column 3, leave out 'paragraph' and insert 'paragraphs 1 and'.—*[Mr. Garel-Jones.]*

Title

Amendment made: In line 10, leave out 'programmes' and insert 'transmissions'.

Order for Third Reading read.

Motion made, and Question proposed, That the Bill be read the Third time.—*[Mr. Garel-Jones.]*

3.12 am

Mr. Blair: This is an historic Bill in the law of copyright. I say that because Copyright Bills are so rare that when they occur they are invariably historic. None the less, this Bill has done a tremendous amount to bring the law of copyright up to date.

I thank the officials of the Department of Trade and Industry, who were of tremendous assistance to Members on both sides of the Committee. I also thank many of those who lobbied us on the Bill. We have always had an ambivalent attitude to those lobbies. On the one hand, they can make life extremely hot for us, but on the other, if they had not been there to lobby us, we would not have appreciated many of the issues to be debated in the Bill.

I thank also my hon. Friends who have raised many points with considerable assiduity and concern. The Government have met many of the problems that we raised. I commend them for doing so. They have met the difficulties raised concerning photographers. They have partly met those on publishing and commercial photocopying, rentals, computers and a host of other minor matters. The Government have rejected other Opposition pleas, particularly those relating to journalists, the blank tape levy and moral rights, but ultimately the Bill will be judged by its effect on industry and its ability to strike a correct balance between industry and the consumer.

I do not believe that the Opposition are necessarily right about every aspect of the Bill. We do not have a monopoly of wisdom. However, we have done our best to ensure that an adequate balance has been struck. Ultimately it will be those who work and earn their living in the copyright industries who will have the final word.

3.14 am

Mr. Butcher: First, I thank you, Mr. Deputy Speaker, and also Madam Deputy Speaker, Mr. Speaker and the hon. Member for Cambridge (Mr. Rhodes James) who presided over the Committee stage, for the courtesy, kindness and, when needed, the brisk approach that have been applied to our proceedings.

My officials have been in the trenches on this issue for about four years. Therefore, I thank them on behalf of the whole House. They have made themselves available at all times to all members of the Committee, on both sides. There were even occasions when they briefed Opposition Members before they briefed me. I am sure that the House wishes to acknowledge their great efforts on our behalf.

In my view, the proceedings on this Bill have shown the House of Commons in its best light. Such a view of the House is not often presented to the public. Its mood has almost always been constructive. Sincerely held views were expressed and the exchanges were candid.

I thank all my hon. Friends who served on the Committee and who have stayed so late tonight. In particular I thank my two parliamentary private secretaries who served the Committee without a formal brief. As volunteers, their work was very much appreciated.

I commend the Bill to their Lordships. I hope that they will be particularly kind to it. I believe that it will stand the test of time but that, like Halley's comet, it will come back after another two decades. We hope that it will return to this House in good shape.

Question put and agreed to.

Bill accordingly read the Third time, and passed, with amendments.

PETITION

Greyhound Racing (Taxation)

3.17 am

Mr. Austin Mitchell (Great Grimsby): I beg to present a petition from Mr. Robert Anthony Fisher of 32 Colne avenue, Watford, in the county of Hertford. It states that various dog tracks have imposed a levy on all winning bets and that bookmakers have imposed an additional levy on top of the off-course betting duty, both without

Parliament's consent. Mr. Fisher is petitioning Parliament to stop that illegal taxation. I shall ask the Clerk to read the petition.

The Clerk at the Table *read the petition, which was as follows:*

To the Honourable the Commons of the United Kingdom of Great Britain and Northern Ireland assembled in Parliament.

The Humble Petition of Robert Anthony Fisher:

Sheweth

That, whereas by authority of Parliament held in the twenty-fifth year of the reign of Edward the Third, King of England, it was declared and enacted that thenceforth by the good laws and statutes of this Realm your petitioner has inherited the freedom that he should not be compelled to contribute to any tax or other like charge not set by common consent in Parliament and later called the 'Petition of Right' and

Whereas of late divers persons have, contrary to this freedom, usurped the authority of Parliament and notwithstanding the protests of your humble petitioner, imposed upon him and many others of Her Majesty's subjects, Taxes, which have not been approved by Parliament and in the manners following.

Notwithstanding that by the gracious consent of Parliament in 1987 on course Betting Duty, for the benefit of the public purse was abolished absolutely, the proprietors of a number of greyhound stadia, having the power to admit bookmakers at their discretion, have persuaded the latter to levy a tax upon all winning bets placed by members of the public and to deliver the proceeds to the said proprietors for their use or benefit. Your humble petitioner has thus been unlawfully taxed at Wembley, Wimbledon and Wathamstow and

Whereas it has been enacted by Parliament that off-course Betting Duty be set at 8% divers persons and companies, namely Ladbrokes, William Hill, Mecca, Corals, Ansell & Sons and many others have imposed rates of tax in excess of 8% upon your humble petitioner and other good and loyal subjects and have converted the surplus to their own devices and benefit.

And all these taxes are taken contrary to protest, without the consent of those who are required to pay and without consideration and contrary to the laws, freedoms and customs of this Realm and Reckless of the authority of the honourable Commons in Parliament assembled.

Wherefore your petitioner prays your honourable House do put down those pernicious practices and do confirm and strengthen the laws of this Realm and the Authority of Parliament so that it be a punishable offence for any person to demand or receive any tax or like charge

(i) levied upon the public or any part thereof, for which no consideration is given or consent obtained, save as may be lawfully sanctioned by Parliament

(ii) as aforesaid in respect of any amount or rate of tax in excess of that laid down and approved by Parliament

And your petitioner, as in duty bound, will ever pray etc. . . .

To lie upon the Table.

Trainees (Dyslexia)

Motion made, and Question proposed, That this House do now adjourn.—*[Mr. Garel-Jones.]*

3.20 am

Mr. James Paice (Cambridgeshire, South-East): Obviously, at this late hour, it is difficult to be grateful for everything, but I am extremely grateful for the opportunity to present this short Adjournment debate to bring to the attention of the House a matter which I believe is of great significance for a small number of people, who are, in their own way, very important. I refer to young people on youth training schemes who suffer from severe dyslexia, a malady which has been researched in some detail, but about which a great deal is still to be discovered.

Before explaining the problem more fully to the House, I should explain that the initial impetus for my inquiries came from problems experienced by a company of which I am a director, and which operates a managing agency for the youth training scheme.

Although I wish to approach the general aspects of the problem, I shall refer to a specific example and I am grateful to my right hon. Friend the Member for Suffolk, Coastal (Mr. Gummer) and to my hon. Friend the Member for Suffolk, Central (Mr. Lord) for their agreement to my using information pertaining to their constituencies.

One of the great strengths of the youth training scheme is the amount of effort that has been put in by the Manpower Services Commission, now the Training Commission, in ensuring the provision and the promotion of equal opportunity for all young people in YTS, and particularly the comprehensive range of special help which is provided for people with disabilities so that they should be able to achieve the same advantages from YTS training as their peers.

The commission's definition of disability includes moderate or severe learning difficulties, however, caused. The information which I wish to draw to the attention of the House and my hon. Friend the Minister shows that the highly commendable objective of the commission and the Government is being thwarted by the intransigence of at least one vocational examining body.

There are a number of occupations which are purely practical in nature and which a dyslexic worker could fulfil just as well as any other individual. Obviously, in terms of future advancement in the industry, illiteracy due to dyslexia can become a hindrance, but at the craft level, the ability to obtain and to practise the skills is unaffected by dyslexia.

The problem is that in some cases the vocational qualifications to demonstrate the skills can be achieved only by written examination. For example, I have here a total of four question papers put out in June 1988 by the City and Guilds of London Institute for an agriculture phase 2 exam. There is a total of 10 hours of written examinations.

I have read carefully every single question in those papers, and it is extremely difficult to conceive of a time when a working person would ever have to read one of those questions, let alone write down the information required, other than for the purposes of passing that examination. As my hon. Friend the Minister is aware, in

[Mr. James Paice]

agriculture the City and Guilds phase 2 is recognised as the appropriate qualification at craft level and was the final qualification under the agricultural apprenticeship offered by the Agricultural Training Board.

What is essential for the trainee and for a future employer is that the young person has demonstrated the level of knowledge and skill required. Obviously, an employer would wish to know if there are problems of illiteracy, but that is a matter separate from the assessment of skills.

The example I shall give demonstrates that all that could be achieved under this system is a failure of the examination paper with the result that any potential employer would almost certainly jump to the conclusion that the examination had been failed through ignorance rather than because of a fundamental problem of dyslexia, which is totally unrelated to the knowledge and skills involved in the occupation.

I should like to refer to the example of a young lad named Ian Hurren. He is a constituent of my hon. Friend the Member for Suffolk, Central. Ian has just completed a two-year youth training scheme in agriculture but he has not achieved any national vocational qualification, despite the view of the managing agent and staff of the agricultural college he attended that he is a student of exceptional ability. I have with me a catalogue of documents, including several letters. I have one from his original school, in which the senior teacher says:

"throughout his time at the school, he suffered from a form of dyslexia which presents him with considerable reading and, therefore, learning problems."

I also have a letter from the senior educational psychologist of Suffolk county council which states—this is significant—

"On a short form of the Weschler Adult Intelligence Scale, Ian's sub-test scores show wide variation. This can be readily attributed to his reading deficiency as those sub-tests which are more directly related to this are scored lower whilst the others are scored much higher. Indeed, on the block design sub-test, a measure of ability to analyse and synthesise, he scored maximum points and well within the allocated time limits. If this had been repeated throughout, Ian would be intellectually outstanding."

That demonstrates that that young lad has an inbuilt difficulty but that it would be totally unjustified and unwarranted to associate that with any lack of overall ability or intellect. That letter demonstrates the opposite. The same letter goes on:

"I recommend unreservedly that Ian is given some dispensation for formal academic examinations. There is a need for questions or instructions to be read to him for practical tests with the opportunity for repetition on request (perhaps pre-recorded magnetic tape) otherwise, an amanuensei is necessary."

Armed with information such as that, one would have expected notice to have been taken. Requests from the managing agent, the agricultural college and the Training Commission at headquarters level to the City and Guilds of London all met with a nil response. In a letter to the college it stated:

"I am afraid that our current policy regarding students with differing disabilities of dyslexia is quite firm in not permitting readers or amanuenses."

Yet the regulations of the City and Guilds of London state:

"in general the employment of readers or amanuensis is not permitted except where such activity could be shown to be a normal aspect of the job being examined. It is, however, usually possible for a candidate who is suffering from a temporary handicap such as a fractured wrist to be permitted the assistance of an amanuensis provided medical evidence is available."

In other words, if young Ian Hurren had conveniently broken his wrist the week before the examination, he could have taken it, had an amanuensis and nobody would have been any the wiser. Because he had a different problem, that was not allowed. No help was available other than the offer of extended time for the examination. The Dyslexia Association has told us that that is of no value to somebody who is genuinely suffering from dyslexia.

The House will not be surprised to note that, as a result of that intransigence, Ian did not take the exam formally. However, he sat it informally, with an amanuensis, under the auspices of the agricultural college. On the four papers to which I have referred, he achieved marks of 77 per cent., 69 per cent., 73 per cent., and 69 per cent.—a clear illustration of his ability.

That is but one example. I do not wish the House to believe that I have come to the debate with just one problem. I considered that I should illustrate the problem and bring it to the attention of the House and in particular of my hon. Friend the Minister.

I am aware that, because of the level of intransigence regarding the provision of amanuenses, it has been the practice of certain examination centres to provide an amanuensis and not to tell the City and Guilds of London. Many would say that that is a dishonest practice, but, in the circumstances, it is an understandable reaction.

I look forward to hearing what my hon. Friend says in reply. It is important to remind the House of the policy of the National Council for Vocational Qualifications. It is totally endorsed by the Training Commission in its codes of practice. The council states:

"key criteria for national vocational qualifications, of particular relevance to trainees with special needs, is that they should be based on the assessment of standards, free of definition of mode, place or pace of learning".

It goes on to state:

"any valid method of assessment which demonstrates that the competence under test has been achieved to the specified standard should be encouraged, for example, it may be possible to substitute oral questions for written ones."

Again it states:

"where a trainee's performance can be assisted with the use of mechanical aids such as typewriters or tape recorders, these should also be permitted".

As my hon. Friend knows, I have a total commitment to the youth training scheme and to the Government's efforts to provide opportunities for all young trainees, regardless of their backgrounds or personal problems. YTS has come a long way since it began. The advent of the National Council for Vocational Qualifications has added great depth and meaning to many qualifications that are available through YTS. It is now policy that, under the NCVQ, assessment must not become a barrier to achievement. I am sure that that view will be shared by all hon. Members. Sadly, though, as I have explained, there are individuals for whom it is very much a barrier.

Although there are practical occupations, it is absolutely essential that we have a vocational qualification system that allows skills and knowledge to be accurately assessed without them being hidden by other problems such as dyslexia. I am well aware that dyslexia is sometimes used as a means of hiding a lack of academic ability, but there are several genuine cases in which the

lack of an effective means of assessment—I have demonstrated one—can jeopardise a young person's career.

The charge of ignorance is often laid at the door of the dyslexic. I hope that the House will agree that that charge is totally unwarranted. The example that I quoted demonstrates that point. It is essential that we remove that slur from the dyslexic's existing list of problems.

I have quoted just one example from one industry. I have discussed the matter with the National Council for Vocational Qualifications. It assured me that it is a genuine and important problem across a whole range of practical occupations. It is important, not only to the lad to whom I have referred but to many other people, now and in the future, who embark on training within and outside the YTS, who will look to a form of assessment of their genuine skills. I hope that such opportunities for forms of assessment exist in future and that my hon. Friend will be able to give me some encouragement.

3.35 am

The Parliamentary Under-Secretary of State for Employment (Mr. Patrick Nicholls): Despite the lateness of the hour, I compliment my hon. Friend the Member for Cambridgeshire, South-East (Mr. Paice) on choosing this subject for debate, for the way that he has introduced it and for the detail that he has given us. I am grateful to him for his courtesy in giving me a detailed idea of the sort of material that he would be bringing before the House.

It might help the House if I outline briefly where the youth training scheme programme stands and then try to pick up the points that my hon. Friend has made in the time that remains available to me. We can all agree that the YTS has been a remarkable achievement. We spend over £1 billion a year on YTS, and 70 per cent. of 16-year-old school leavers and a growing proportion of 17-year-olds who leave school are involved in the scheme. In many parts of the country, and for many industries, YTS has become the normal route into work for those who do not go into some form of further or higher education. The YTS offers a sustained and well-structured vocational training course with on and off the job training and the opportunity to study for relevant vocational qualifications.

The figures show that the scheme is working. For example, 80 per cent. of young people who have been trained through YTS say that they found it worth while, and over 75 per cent., when we follow them up three months later, say that they are in a job or going into some form of further education.

An important development in YTS is the provision for YTS trainees to work for nationally recognised vocational qualifications. That is at the heart of tonight's debate. All trainees on two-year YTS have the opportunity to work for nationally recognised qualifications or, at the least, a credit towards one, and 98 per cent. of trainees who have gone on to a second year in YTS went in for a qualification in their first year. It is the aim that trainees with different needs and abilities should be able to proceed at their own pace. That brings me on to young people on YTS with disabilities and special training needs.

From the start, YTS has always made provision for young people with disabilities. "Disabilities" is widely defined, and includes those who suffer from dyslexia. There are a number of ways in which special help is made available on YTS to enable such young people to take full advantage of the opportunities that are offered, and to compete on equal terms with their peers. We are much aware of the need to ensure equality of access to vocational qualifications. We established the National Council for Vocational Qualifications in 1986 to reform the qualification system and make qualifications more relevant to work. The council is addressing this task by giving its kitemark—the NVQ—only to qualifications that reflect competence to do the job.

It is a corollary of that that those who are competent should not be prevented from gaining or even taking a qualification because of a disability which is irrelevant to their chosen occupation. Where an examination is intended to measure a practical skill, the NCVQ may well ask the examining body to consider testing techniques other than a written examination to ensure equality of access to the qualification.

My hon. Friend the Member for Cambridgeshire, South-East will understand that I cannot comment specifically on the particular instances that he has in mind. However, the relevant awarding body has submitted the qualification in agriculture to the NCVQ for accreditation and the council has given the qualification a conditional accreditation at level 1 of the NCVQ framework. Conditional accreditation means that the qualification substantially meets the NCVQ's criteria but that certain improvements need to be made to bring the qualification fully into line with the council's requirements. I understand that the conditions in the case to which my hon. Friend referred relate to whether the qualification is a valid measure of competence in the job.

I am sure that my hon. Friend the Member for Cambridgeshire, South-East will understand also that I cannot preface my remarks by talking specifically about the case that he has in mind that involves the NCVQ, but there are a number of points, subject to that caveat, to which I can helpfully draw attention.

My hon. Friend mentioned amanuenses, and quoted from a letter written by the City and Guilds of London Institute, which stated, in effect, that it is not current policy to provide amanuenses. Perhaps my hon. Friend derived some comfort from that. That use of "current" suggests that there might be the possibility of change.

My hon. Friend spotted in the correspondence, as I did, the reference to it being possible to provide extra time in most instances. Without commenting on the particular case, it may be that because of the disability, as my hon. Friend said, the provision of extra time is wholly inapplicable. One can imagine, without stretching credulity too far, being given an extra half an hour to sit an examination in Spanish, which is not much use if one does not speak Spanish or wish to learn it.

I had a look at the various examination boards that deal with academic subjects. Until now, it has not been the practice of the Oxford and Cambridge board to allow the use of an amanuensis, but it intends to do so from 1990. The northern examination board already provides for dyslexics to be able to use its facilities. There might be the rather bizarre result that somebody could do their O and A levels on the northern examination board, go to university, use the facilities of an amanuensis there, graduate with a first-class degree in ergonomics or agriculture, go to the finest agricultural college in the land —Seale-Hayne, in my constituency—leave it with a first-class examination qualification, be competent to get a job running a substantial estate, but, because of dyslexia,

[Mr. Patrick Nicholls]

be incapable of being an agricultural craftsman. That may be reductio ad absurdum, but it is a point that one should bear in mind.

Without commenting on the merits of the case that we are discussing, it might be said that a farm worker should be sufficiently literate because of the requirements of the health and safety legislation. If we were to say that no one should be entitled to work on a farm unless they were literate to that extent, I am not sure what it would do to agriculture, but I certainly have my suspicions. It would be bizarre if a graduate manager were able to work on a farm but not an agricultural worker.

My hon. Friend made two telling points. He mentioned the ludicrous proposition that if Mr. Hurren had broken his wrist he would have been able to avail himself of the services of an amanuensis and pass his examinations. My hon. Friend said that this young man had a trial run and passed with flying colours. Mr. Hurren is a young man of proven ability in his chosen job. He is of substantial intellectual ability that is incapable of being measured in conventional terms. He has secured the support of the college where he studies, and I understand from my hon. Friend that he has secured a job. He was obviously capable of convincing his employer that he was capable of operating at a high level.

My hon. Friend is concerned that facilities that would be available to those in middle-class cerebral occupations —where one might have thought that the necessity for literacy would be greater—are being denied to somebody who is in a more manual occupation. It is no secret that hon. Members who have made substantial contributions to our deliberations over the years—sometimes in government—have suffered from dyslexia. In a middle-class way, they have been able to compensate for their disability and have made a substantial contribution.

I prefaced my remarks—I make no apologies for doing so—by saying that it would be inappropriate for me to comment on the circumstances of this specific case. I cannot fail to be impressed not only by the way in which my hon. Friend advanced his case but by the struggles that this young man has had, and the creditable efforts he has made to equip himself for life. I have tried to say something to my hon. Friend other than mere pious platitudes and compliments. As a result of the debate, I shall read *Hansard* and write to the City and Guilds of London Institute telling it of my concern about the debate and drawing it to its attention. I shall ensure that the Training Commission and NCVQ understand the concern that has been expressed in the debate.

Certainly, even at this late hour—or it may be an early hour—if the effect of the debate is to ensure that such young people have the ability to qualify for tasks that they are obviously capable of doing, the fact that one or two of us may have slightly blurry eyes will be a small price to pay.

Once again, I thank my hon. Friend for giving us the opportunity to consider this subject.

Question put and agreed to.

Adjourned accordingly at sixteen minutes to Four o'clock.

House of Commons

Tuesday 26 July 1988

The House met at half-past Two o'clock

PRAYERS

[MR. SPEAKER *in the Chair*]

PRIVATE BUSINESS

BRITISH WATERWAYS (NO. 2) BILL *[Lords]*
Order for Third Reading read.
To be read the Third time tomorrow.

LONDON DOCKLANDS RAILWAY (BECKTON) BILL
Order for consideration read.
To be considered tomorrow.

BRITISH RAILWAYS (NO. 2) BILL *(By Order)*
Order for consideration read.
To be considered tomorrow.

HARWICH HARBOUR BILL *[Lords] (By Order)*
Order for Second Reading read.
To be read a Second time tomorrow.

Oral Answers to Questions

DEFENCE

NATO (Conventional Stability Talks)

1. **Mr. Harry Ewing:** To ask the Secretary of State for Defence what discussions North Atlantic Treaty Organisation Defence Ministers have had concerning a mandate for the North Atlantic Treaty Organisation negotiators at the forthcoming conventional stability talks.

6. **Mr. David Marshall:** To ask the Secretary of State for Defence what discussions North Atlantic Treaty Organisation Defence Ministers have had concerning a mandate for the North Atlantic Treaty Organisation negotiators at the forthcoming conventional stability talks.

The Secretary of State for Defence (Mr. George Younger): NATO Heads of State and Government set out their approach to conventional arms control at their summit on 2 March this year. We have regular discussions with our NATO partners concerning the translation of this overall approach into NATO proposals for tabling at the conventional stability talks which we hope will begin later this year.

Mr. Ewing: I congratulate the Secretary of State on holding on to his job yesterday when all around were losing theirs. Is he aware that that is the second narrow escape that he has had in the past 12 months?

Will the Secretary of State now finally accept the need for demilitarised zones as a contribution towards preserving world peace and reducing the risks of war? Is he aware that, in the next decade, the West German armed conscript forces will be reduced by 40 per cent. because of demographic changes? Against that background, is it not now vital that we establish demilitarised zones and negotiate for extensive disarmament in conventional weapons?

Mr. Younger: As the hon. Gentleman knows, the Government are pursuing disarmament most vigorously and, unlike all their predecessors, are achieving successful results in doing so. We are taking an active role in working out a mandate for the conventional disarmament talks. It is on our text that the discussion is now taking place. I cannot share the hon. Gentleman's enthusiasm for demilitarised zones. They are wholly unenforceable and, therefore, not something that we should approach.

Mr. Marshall: Will the Secretary of State tell the House whether the European Community's Foreign Ministers have welcomed Mr. Gorbachev's suggestion of a pan-European summit to reduce conventional forces in Europe? Is it only the Government's refusal to include in the talks dual-capable weapons that is standing in the way of NATO's mandate and of an agreement?

Mr. Younger: No, I do not agree with the hon. Gentleman. The preparations for the talks are going well. Discussions are proceeding principally on the text of the Western proposals. As the hon. Gentleman probably

knows, the inclusion of dual-capable systems will depend on whether their conventional role is applicable to the talks. That is not an obstacle to proceeding.

Sir Geoffrey Finsberg: As the European pillar of the NATO Alliance, does my right hon. Friend envisage any part being played by the Western European Union?

Mr. Younger: Yes. As my hon. Friend knows, we are now in the chair of the Western European Union and, in the course of our year's chairmanship, we shall encourage the WEU to make a contribution towards strengthening the European pillar of the Alliance and forwarding the disarmament talks.

Mr. Forman: Is there any hard evidence available to my right hon. Friend and to his NATO Defence Minister colleagues that, as a consequence of the internal changes that are in train in the Soviet Union, the Soviet Government are now more amenable than they have been over the years to appropriate reductions in conventional weapons on each side?

Mr. Younger: The new atmosphere in Moscow is more conducive that the previous atmosphere to achieving reductions in weapons, including conventional weapons. However, I am afraid that at this stage there is no sign of any reduction, or even easing, in the growth of military expenditure in the Soviet Union. We hope to see that, but there is no evidence of it yet.

Mr. O'Neill: Does the Secretary of State agree that it is a sad day when the French and German Foreign Ministers are prepared to accept the need for conventional cuts of the kind that have been suggested, but the British Government are not willing to enter into the spirit of the new hopes that many have for relations with the Soviet Union? Therefore, will the Secretary of State explain to the Foreign Secretary that there is scope for European initiatives as well as NATO initiatives on conventional talks and conventional cuts?

Mr. Younger: There is scope for ideas and initiatives from anyone involved in these processes, but it would be extremely disruptive of the opportunity to make progress in the talks if we were to start separate talks on other bases at the same time as we prepare for these major and important talks.

Spare Parts (Labelling)

3. **Mr. Riddick:** To ask the Secretary of State for Defence what evidence he has on the effect on prices charged of his Department's policy of requiring suppliers to stick a two-tier price label on packages of spare parts; and if he will make a statement.

The Parliamentary Under-Secretary of State for Defence Procurement (Mr. Tim Sainsbury): Last year the Department introduced the requirement for spares to be price-labelled. This initiative is part of the Ministry's drive to ensure value for money in defence procurement. Price labelling will provide a further check against possible overcharging for spares by contractors and improve cost awareness among our personnel. It is much too early to quantify the benefits that will be obtained.

Mr. Riddick: Is my hon. Friend aware that in practice in some cases the labelling requirement is resulting in higher prices being quoted to the Ministry of Defence? Is he aware that a company of my acquaintance made two quotes, one without the labelling requirement and one with the labelling requirement at a 5 per cent. premium, and the MOD contracts office accepted the higher price? Is there not a case for introducing greater flexibility into the system?

Mr. Sainsbury: I am sure my hon. Friend will understand that adding a small additional piece of information to a label that is already required is likely to result in a negligible increase in cost in the vast majority of cases. If particular difficulties are associated with one product, we are prepared to discuss that with the supplier, but, overall, we see major benefits which would greatly exceed the small extra cost of putting that information on the label.

Mr. Nicholas Brown: That is not the only anomaly in the Ministry of Defence's procurement policy. Is the Minister aware that his Department told the Public Accounts Committee that it

"sought to avoid getting into a situation where one"——

Mr. Speaker: Order. The hon. Gentleman must not quote. Paraphrase, please.

Mr. Brown: Is the Minister aware that his Department told the Public Accounts Committee that it sought to avoid a situation where one contractor was supplying all the frigate procurement package in order to make long-term savings and then went on to place the entirety of the frigate procurement package with one yard in direct contradiction to what was said to the Public Accounts Committee? How does the Minister account for that?

Mr. Sainsbury: We have capable frigates on order, and I scarcely think that they fall into the category of spares.

Mr. Page: Price labelling will help to give value for money on the £2 billion-plus spares order for military equipment and prevent scandals such as occurred in the United States with the $1,200 ashtray and the $1,500 toilet seat, but does my hon. Friend agree that more could be saved by avoiding small uneconomic batch ordering and looking more closely at the quantities that are being ordered?

Mr. Sainsbury: My hon. Friend has a good point. We are looking at the size and frequency of each order, but, as he is clearly aware, there is a large spend on spares—over £2 billion—and we must ensure that we avoid the sorts of instances that have been reported from the United States, where, to give another example, a list of stores contained what was called a multi-directional impact device priced at $400, which, on closer examination, turned out to be a hammer.

Royal Dockyards

4. **Mr. Pike:** To ask the Secretary of State for Defence if, in the light of the projected redundancies at Devonport and Rosyth, he will reconsider the balance between the core programme and unallocated work for the royal dockyards.

10. **Mr. Ray Powell:** To ask the Secretary of State for Defence if, in the light of the projected redundancies at

Devonport and Rosyth, he will reconsider the balance between the core programme and unallocated work for the royal dockyards.

Mr. Sainsbury: With permission, Mr. Speaker, I will answer questions Nos. 4 and 11 together.

The balance between the core and unallocated programmes is kept under regular review.

Mr. Pike: Does the Minister accept that since privatisation it has been proved that the Government gave incorrect information at that time? Has not half the work force been destroyed in job terms since privatisation, and is it not a fact that another 1,500 jobs are in jeopardy at the Portsmouth repair yard? Will the Government reconsider the question of allocation and look at the situation again in order to safeguard the remaining jobs?

Mr. Sainsbury: I totally reject the hon. Gentleman's suggestion that we gave inaccurate information. We gave the information on job losses that was available to us at the time. The level of employment in the dockyard is a matter for DML. I am surprised that the hon. Gentleman should suggest that we re-examine the balance between the core and unallocated programmes, because about two dozen firms throughout the country benefit from the jobs provided by the unallocated programme. It would be totally inappropriate and destructive of our urge to seek greater competition to deprive them of the opportunity of tendering for that part of the work that is in the unallocated programme.

Mr. Speaker: Order. The Minister mentioned question No. 11, but I believe that he meant question No. 10.

Mr. Powell: Have not the Government's assurances to the Devonport workers before privatisation proved to be more useless than a bent penny? They were promised 60 per cent. of the core naval refit and repair programme, but that work has since been slashed. Will the Government give an assurance that the cuts made to the naval refit programme will be reviewed and that some jobs will be saved?

Mr. Sainsbury: I apologise to the House, Mr. Speaker. We have had rather a large number of changes in questions. I should have referred to question No. 10.

It was known at the time of the contractorisation tender that we were maintaining a core programme to give a base work load for the new contractors. The royal dockyards, DML and BTL have an opportunity to tender for the work that is in the unallocated programme. As I have already said, it would be totally wrong to take that work back into the core programme and deprive a large number of other ship repair yards of the opportunity of obtaining work from the Ministry of Defence.

Mr. Robert Hicks: Is my hon. Friend aware that there is still genuine anxiety locally about dockyard capability to respond in an emergency? If he is not prepared to increase the core programme, will he consider lifting the artificial restraint placed on the dockyards in respect of the allocated work?

Mr. Sainsbury: I appreciate that there is concern in my hon. Friend's constituency about the dockyard's work load. As I have said previously, we keep under review the ship repair industry's total capacity, which covers not only the royal dockyards but the private sector as well. One of the factors taken into account is the opportunity in an emergency to transfer workers from refitting to repair work, because that could provide a considerable surge capacity. In those circumstances, we are confident that there is sufficient capacity in the dockyards to meet any crisis.

Mr. Brazier: Will my hon. Friend confirm that the purpose of offering all that repair work for tender is to obtain the best possible value for money for the Royal Navy rather than to provide local jobs in any particular area? Will he further confirm that the remaining core programme for Devonport is of a size and scope that almost any other naval repair facility in Europe would greatly envy?

Mr. Sainsbury: We have a substantial capacity in both the former royal dockyards and in the private sector, which we believe is sufficient to meet the Royal Navy's needs and to ensure that its ships are maintained to the usual high standards.

Mr. Douglas: Will the Minister review what he has been saying to the House, in the light of the evidence given to the Public Accounts Committee and to the Select Committee on Defence about the rate of redundancies at Devonport and Rosyth? Will he confirm that the rate of redundancies at Devonport is far in excess of what was anticipated, and that the crux of the matter is that the core programme has been diminished and the dockyard at Devonport has not found itself capable of obtaining additional work? We are finding it difficult to keep up an adequate repair and maintenance service in the Navy. Will he come clean on the issue?

Mr. Sainsbury: I assure the hon. Gentleman and the House that we are confident that we have an adequate ship repair capacity throughout the country in both the public and the private sectors. We have ample capacity to meet any surge of demand in a crisis, for the reasons that I have already advanced.

There has indeed been a more rapid rate of job loss than originally anticipated. We have discussed the matter in the House. The reasons include the lower maintenance needs of modern ships, as the hon. Gentleman is well aware. The total naval work load has been reduced, and that has been reflected in a more rapid reduction in the number of jobs available at Devonport than was first envisaged.

Challenger Tank (Replacement)

5. **Mr. Fatchett:** To ask the Secretary of State for Defence when he expects to decide on a replacement for the Challenger tank; and if he will make a statement.

Mr. Younger: The Challenger tank entered service in 1984, and deliveries to equip a total of seven regiments will not be completed until the end of the decade. We have no plans at present to replace Challenger.

Mr. Fatchett: We seem to go through this process of questioning every month. At the Vickers factory in Leeds there appears to be an unfortunate hiatus in orders for the new Challenger tanks and in their development. If an order is not placed before long, 700 jobs will be lost at the factory. Is the Secretary of State at all concerned about the potential loss of jobs in Leeds, or is he happy to allow the order to go to its German and American counterparts?

Mr. Younger: There is no question of that at present. As the hon. Gentleman knows, we are considering whether we can replace the Chieftain tank and, if so, with what tank we should replace it. We hope that there will be competition and that the Leeds factory will feel able to put in a competitive bid for whatever orders are put out to tender. We hope to decide what to do before the end of the year.

Mr. Wilkinson: Can my right hon. Friend assure the House that in making that important decision, which is overdue for the Army, he will take into consideration the potential of dedicated battlefield anti-tank helicopters against armour?

Mr. Younger: I thank my hon. Friend for his suggestion. We are looking widely at the whole range of methods by which we can deal with the threat from enemy armour. One is the provision of effective tanks, but there are other alternatives, and I shall not rule out what he has said.

Mr. Duffy: The Secretary of State's reply, that he has no successor programmes in hand, is very alarming. He must know that the last significant British development in tank technology was announced by a Labour Government, in respect of Chobham armour. There has been nothing of significance since, although, as the right hon. Gentleman will know, the Soviets have made significant developments over the past two years. As his hon. Friend the Member for Ruislip-Northwood (Mr. Wilkinson) has just reminded him, that also applies to anti-tank weaponry.

Mr. Younger: That is perfectly true, and that is why we are examining the choices that we can make for the replacement of Chieftain and whether we can afford it.

Mr. Wiggin: Does my right hon. Friend accept, when taking advice on the matter, that the great weight of anti-tank weaponry possessed by all sides in a future battle is likely to make the tank about as effective as the horse was at the beginning of the last war? Will he be very careful before he proceeds to spend large sums on future tank technology?

Mr. Younger: I appreciate that there are various ways of dealing with the threat from tanks, but I do not think that I would subscribe to my hon. Friend's description of the tank as being quite so ineffective.

Mr. Wallace: Is not the delay in placing orders for Challenger tanks and coming forward with a replacement programme for Chieftain a symptom of the problems that the Secretary of State faces in trying to get his defence budget to match? He is postponing important decisions. Now that such a distinguished Conservative Back Bencher as the right hon. and learned Member for Richmond, Yorks (Mr. Brittan) has advocated a defence review, does he not think that it is time to take that advice?

Mr. Younger: I do not agree. As there was no question in the past of further tank orders, we are now considering what to do about replacing the Chieftain tank. We review the defence programme every year and balance resources with the programme. This year is no exception.

Mr. Patnick: If and when my right hon. Friend considers a replacement for the Chieftain tank, will he bear in mind that the tracks and turret are made in a subsidiary of a Sheffield firm, William Cook plc? Will he take that fact into account in ensuring that the best possible equipment is obtained for the British Army?

Mr. Younger: I thank my hon. Friend for drawing my attention to that fact. It would be for the makers to decide whether subcontractors should be employed to do the work. I have no doubt that in due course that my hon. Friend will be drawing that fact to the attention of the makers of the tank.

Front-line Aircraft

8. **Mr. Buckley:** To ask the Secretary of State for Defence what is his estimate of the current proportion of the Royal Air Force's front-line aircraft which are not fully operational.

13. **Mr. Soley:** To ask the Secretary of State for Defence what is his estimate of the current proportion of Royal Air Force front-line aircraft which are not fully operational.

The Minister of State for the Armed Forces (Mr. Archie Hamilton): It has been the policy of successive Governments not to provide detailed information about the operational readiness of elements of the armed forces. However, I can assure the hon. Members that all Royal Air Force aircraft assigned to operational duties are fully manned and equipped and thus able to undertake their designated missions.

Mr. Buckley: The Select Committee on Defence has reported that, despite the high cost of the maintenance and repair budget, one third to one half of the front-line defence aircraft are not available. Is that not dangerous and deplorable, and is it not yet another example of the Ministry of Defence procuring expensive equipment and then having to spend large sums of money on repairing and maintaining it?

Mr. Hamilton: I think that the hon. Gentleman is referring to the Tornado aircraft. It is customary to have reserve aircraft, although I accept that the number of Tornado aircraft in reserve is very high. These aircraft are due to be modified at the end of the production run. I expect them to come on stream in the early 1990s.

Mr. Soley: No Opposition Member will be surprised to learn that the Conservatives have consistently refused to give such information, even though it is readily available to research workers at airports around the world. Will he say whether some of the operational failures are due to the lack of Foxhunter radar? Does he intend to return to the bizarre idea of filling the noses of some of the aeroplanes with concrete, with which, presumably, to ram our opponents?

Mr. Hamilton: The hon. Gentleman knows that in 1984-85 the non-availability of Foxhunter radar meant that the programme had to be rescheduled. That is why we are now operating according to the availability of both radar and pilots to fly the aircraft.

Sir Antony Buck: I congratulate my hon. Friend on his front-line appointment and wish him a long and happy tenure in his office.

Will he ensure that pressure is put on the Royal Air Force to make sure that a larger number of aircraft that at all times are operational are in service? Will he keep up pressure to that effect on the Royal Air Force?

Mr. Hamilton: I am grateful to my hon. and learned Friend for his kind remarks.

The intention is that the aircraft should operate at maximum efficiency. That is why we are not prepared to bring the reserve aircraft into service until they have been modified.

Sir Ian Lloyd: The ratio is of great significance, but what is the point of either the Royal Air Force or NATO maintaining a high ratio of operational aircraft if they are unable to communicate with each other in times of war, except through a third party, or if they are unable to be rearmed on the aerodromes of another allied nation or if, because of the current disastrous IFF position, a very large proportion are likely to be shot down by our own forces?

Mr. Hamilton: My hon. Friend confirms the remark that I made, which was that the operational efficiency of those aircraft must be supreme before we are prepared to let them fly.

Mr. Rogers: May I offer my congratulations to the Minister and welcome him back to quiet pastures.

The Defence Select Committee has rightly pointed out on a number of occasions in the past year that the Government's defence procurement programme is a shambles. When will the Government acknowledge that many of our front-line aircraft and other services are unable to meet a threat that may come at any time?

Mr. Hamilton: I thank the hon. Gentleman for his kind remarks.

That is precisely the point that I have been trying to make. In practice, it is very important to ensure that those aircraft maintain operational effectiveness on the front line. That is why aircraft that do not meet that requirement are kept in reserve.

Low-frequency Sonar

11. **Mr. Cousins:** To ask the Secretary of State for Defence what research is being done into low-frequency sonar for defence purposes.

Mr. Sainsbury: Low-frequency passive sonar is already in use with the Royal Navy. The Ministry of Defence is currently conducting a research programme into low-frequency active sonar and its potential applications. That work is being undertaken within the Ministry of Defence research establishments. For security reasons it would not be appropriate to comment on the specific research projects.

Mr. Cousins: Does the Minister accept that there has been a dangerous weakening in Britain's anti-submarine defences because of the declining effectiveness of towed array sonar and the hydrophone barrier? Will the Minister therefore give the research into long range low-frequency active sonar to which he has just referred the utmost priority and accompany it with design studies into a new generation of ships that are capable of deploying it?

Mr. Sainsbury: The hon. Gentleman was not very accurate in referring to the declining effectiveness of towed array sonar. The towed array sonars in use are very effective. What has changed is that the latest Soviet submarines are a great deal quieter than earlier generations.

With regard to the platforms from which we might deploy low-frequency active sonar, it is too early to make any decision. We can make a decision on the appropriate platform only after a decision on the sonar itself has been arrived at. As the hon. Gentleman knows, low frequency sonar exists in a number of forms. Some of them—like the sonar systems currently in service—could be fitted to existing or planned warships.

Mr. Harry Greenway: When does my hon. Friend expect to be in a position to make the decision to which he has referred, and when will the order for new sonar buoys be placed? Will he remember that the firm of Dowty's in my constituency has always done a brilliant job in such matters?

Mr. Sainsbury: I am aware of the contribution made by firms in my hon. Friend's constituency to our sonar capacity. We have a steady programme of new sonar buoys and sonar equipment. The particular type of sonar involved in the question is currently the subject of a major research programme and has not yet reached the stage where we can make a decision to purchase.

NATO (Expenditure)

12. **Mr. Clay:** To ask the Secretary of State for Defence when he next expects to discuss with NATO colleagues the relative share of military expenditure borne by individual countries within the Alliance.

Mr. Younger: I shall have a number of opportunities later in the year for discussion with NATO colleagues on the sharing of risks, roles and responsibilities within the Alliance, including at the defence planning committee in December.

Mr. Clay: Why is the Secretary of State being so acquiescent and weak-willed about the United States' demands that Britain and other European members should pay a higher proportion of NATO's costs? Has he ever pointed out to the United States—or will he point out to the United States—that Britain already pays disproportionately high amounts of NATO's costs? Are the British Government bailing out President Reagan's economic incompetence, with his budget and trade deficits? Most of NATO's policy decisions are made in the interests of the United States, so why does the Secretary of State not suggest that the United States pays most of the costs?

Mr. Younger: The United States does pay most of the costs. It pays more than any other member of NATO. It is worth noting that it does so because it takes the view that it is in the interests of defending the United States that Europe should be sound and solidly defended. It is my view, and that of the whole Alliance, that the European members should do more than they do at present, and I shall be encouraging them to do so.

Mr. Dykes: Does my right hon. Friend agree that the American request is entirely reasonable and that the European countries should respond? Bearing in mind that there is already limited discreet French co-operation on air

defence and related matters, although the French are not members of the military command, is my right hon. Friend confident that that can be extended, by a further limited amount at least, so that the pressure on the other contributors can be mitigated?

Mr. Younger: The European members of the Alliance have a major role to play in ensuring the defence of western Europe. The United States has drawn attention to that, and that matter has been dealt with by a NATO Alliance initiative to set in hand a study of the relative shares of the burden carried by Europeans and the United States. We hope to get a report of that study by the end of the year.

Mr. Sean Hughes: In view of the financial implications of our respective defence policies, will the Secretary of State tell us whether the Government believe that conventional parity is compatible with flexible response?

Mr. Younger: Yes, it is a very compatible aim that we should get conventional weapons on each side down to parity, or much nearer to parity, while the whole question of the flexible response enables us to have a variable range of different types of major weapon to respond to whatever threat comes.

Mr. John M. Taylor: Does my hon. Friend agree that it is most important that the United States, as the largest contributor to NATO by far, should be reassured that Europe is prepared not merely to contribute to its own defence but to pay for it as well?

Mr. Younger: I quite agree with my hon. Friend. It is remarkable that the United States is not only a full member of NATO but plays the largest part in providing resources for all of us to defend western Europe. That solidarity and that linkage across the Atlantic have prevented war for 40 years, and if the policy is maintained I see no reason why it should not continue to do that.

Nuclear Test Site (Nevada)

14. **Mr. Heffer:** To ask the Secretary of State for Defence what assessment he has made of the likely continued availability of Nevada as a test site for British nuclear weapons and as to the factors which will influence this.

Mr. Sainsbury: Her Majesty's Government are satisfied that the Nevada test site will continue to be available for as far ahead as we can foresee. Any change to that position would have to be considered in the light of the needs and circumstances pertaining at the time.

Mr. Heffer: Is the Minister aware that it is now 43 years since Hiroshima was bombed? Is it not time that we worked towards a comprehensive test ban treaty? Is it not also time that we stopped following the United States of America, made our own decisions and recognised that we do not really have an independent nuclear deterrent? We are very much dependent upon the United States of America, and we ought to start declaring some independence from it.

Mr. Sainsbury: As the hon. Gentleman knows, we continue to play a leading role in efforts towards balanced and verifiable disarmament. That will continue to be the policy of Her Majesty's Government. In that policy we are fully supported by the whole of the NATO Alliance, which, as my right hon. Friend the Secretary of State has just said, shares the view that there is a need for flexible response.

Mr. John Marshall: Will my hon. Friend look at the question again and note that it is interesting that the hon. Member for Liverpool, Walton (Mr. Heffer) should be worried about whether we shall continue to be able to test our nuclear deterrent? Does that not show a scintilla of sense that is unusual in the hon. Member for Walton?

Mr. Sainsbury: I have some sympathy with my hon. Friend's view. The hon. Member for Liverpool, Walton (Mr. Heffer) has his own special views on nuclear deterrence—to my mind he does not fully appreciate the nature of deterrence—and his views may be quite widely shared on the Opposition Benches.

Disabled Ex-Service Personnel

15. **Mr. Ashley:** To ask the Secretary of State for Defence what representations he has received regarding ex gratia payments for ex-service men and women seriously disabled by alleged negligence before 8 December 1986.

The Parliamentary Under-Secretary of State for the Armed Forces (Mr. Roger Freeman): A number of representations have been received from the right hon. Gentleman and others.

Mr. Ashley: Does the Minister agree that every service man and woman now has a right to sue for compensation if he or she is disabled as a result of negligence and that that right was won partly by the campaigning efforts of a group of severely disabled ex-service men who, ironically, are denied that right? Will the Minister reconsider his refusal to set up a trust fund to make ex gratia payments to ex-service men who are disabled but who do not have the right to sue?

Mr. Freeman: I can confirm to the right hon. Gentleman that service men and women now have the right to sue for negligence. I pay tribute to him and to many other right hon. and hon. Members for the campaign that was waged to draw attention to this inequity. As was made clear during proceedings in the House, we have no intention of making that repeal retrospective, and that includes the application of the trust fund. But I can confirm that those ex-service men and women to whom he referred receive benefit payments from the DHSS and from the Ministry of Defence.

Mr. David Martin: Will my hon. Friend tell the House how many serving men and women have made claims for damages since December 1986?

Mr. Freeman: Yes. Since 8 December 1986 some 250 service men and women have made claims for damages and those cases are now in course of settlement.

Mr. Cohen: Have not many of the nuclear test veterans and their families suffered terribly purely in the course of serving their country? Should not the Government provide proper compensation for those families?

Mr. Freeman: The Government maintain that there is no evidence of any causal link between the nuclear tests

that took place in Australia in the 1950s and any injuries or disease that may or may not be suffered by service men and women.

Mr. Alexander: If there is negligence, surely an ex-service man or service men ought to be entitled to sue? What is so magical about the cut-off date? Is not the cut-off date causing grave damage and disturbance to those members of the services who otherwise would have perfectly valid claims?

Mr. Freeman: That was just the reason why the Government decided to repeal the law to permit service men and women, effectively from 8 December 1986, to sue for damages, so I agree with my hon. Friend, but we cannot turn the clock back and make that repeal retrospective.

F111 Aircraft (Cruise Missiles)

16. **Mr. Mullin:** To ask the Secretary of State for Defence what recent discussions he has had with his United States counterpart about the possibility of F111s stationed in the United Kingdom carrying air-launched cruise missiles.

Mr. Younger: The United States Defence Secretary and I met at the NATO nuclear planning group meeting in April, when Ministers discussed the need to keep the Alliance's forces properly structured and up to date. No decisions on NATO force adjustments have yet been taken.

Mr. Mullin: Has the Secretary of State seen the report in the recent Jane's *Defence Weekly*, which says that a fleet of Amrican FB 111A planes will be stationed here in 1989-90 and that they will be armed with short-range attack missiles and air-launched cruise missiles? Is that not a cynical attempt to subvert the recent arms control treaties?

Mr. Younger: I did see some report of that nature, but there is no truth in it. NATO is still considering a number of options for adjusting its remaining nuclear forces following the INF agreement. Options include possible redeployment to a number of European countries of longer-range dual-capable aircraft currently based in the United States, but no decisions have yet been taken. Deployment to Europe of strategic air-launched cruise missiles is not one of the matters under consideration.

Mr. Wilkinson: Does not the INF accord enhance the importance for deterrence of air-launched systems such as the F111s stationed in this country? Is it not important that they should be able to continue to penetrate Warsaw pact air defences?

Mr. Younger: Yes. My hon. Friend is perfectly correct. It is necessary that at all times we should have the capability in the NATO Alliance to respond to any level of attack. To do so we have to be able to penetrate Soviet territory. It is our policy to make sure that in the evolving situation of threat we are always able to do so.

Mr. O'Neill: In the light of the Secretary of State's reply to my hon. Friend the Member for Knowsley, South (Mr. Hughes), conventional balance and flexible response are compatible. Is it not the case that it logically flows from that statement that the right hon. Gentleman would be prepared to accept air-launched cruise missiles as part of that flexible response?

Mr. Younger: I was talking about air-launched strategic cruise missiles. I made it clear that that was not one of the options. I have already made it clear that among the options that we are considering for the possible replacement of our nuclear free-fall bombs is an air-launched, air-to-ground cruise missile. That is perfectly well known, and we are still studying whether it will be possible.

NATO Ships (Nuclear Weapons)

17. **Mr. Galloway:** To ask the Secretary of State for Defence if he has any plans to review with his colleagues in the North Atlantic Treaty Organisation the number of nuclear weapons carried by North Atlantic Treaty Organisation ships; and if he will make a statement.

Mr. Younger: NATO Ministers regularly review the nuclear forces available to the Alliance, including sea-based weapons.

Mr. Galloway: The Secretary of State would not be so complacent if he had read the recently published American report, entitled "Nuclear Warships and Naval Nuclear Weapons", which reveals that 16,000 nuclear bombs are currently sailing on the world's waterways—that is, 16,000 nuclear accidents waiting to happen in a nuclear traffic jam on the high seas. Does the right hon. Gentleman agree that, even within his policy, and even within his nuclear obsessions, there is a case for talking to the other side about a reduction in the sheer number of weapons that are currently sailing on the high seas?

Mr. Younger: I am sure that there must be better ways of trying to get headlines than that. The hon. Gentleman must come to terms with the fact that, as long as nuclear weapons exist, our security depends upon any aggressor being certain that it cannot attack us without the risk of receiving an attack in return. That is the basis of the maintenance of peace, which the Government and the NATO Alliance are successfully achieving at the moment.

PRIME MINISTER

Engagements

Q1. **Mr. Franks:** To ask the Prime Minister if she will list her official engagements for Tuesday 26 July.

The Prime Minister (Mrs. Margaret Thatcher): This morning I had meetings with ministerial colleagues and others. In addition to my duties in the House I shall be having further meetings later today, including one with Mr. Paul Obeng, chairman of the Committee of Secretaries of Ghana.

Mr. Franks: I take this opportunity to thank the Prime Minister, who, in stark contrast to the Leader of the Opposition, once again when abroad batted for Britain and for Barrow to try to secure the Canadian submarine order. After almost eight weeks on strike, pending further negotiations to settle the dispute, is it not time that local unions in Barrow balloted their members for a return to work?

The Prime Minister: I have great sympathy with what my hon. Friend said. I understand that management and unions are meeting today, and I hope that the dispute will be resolved. I share my hon. Friend's view that the strike is damaging to Britain and to our prospects of getting more orders from abroad. It is particularly damaging to Vickers, and it could even be damaging the prospect of getting more home orders, too.

Mr. Kinnock: Does the appointment of a new Secretary of State for Health mean that the Government are now ready to provide the actual cost of the nurses' pay award and the grading review?

The Prime Minister: Dividing the DHSS is something that many people have thought should have been done for some time. I was in the Ministry of Pensions and National Insurance when it was mooted that the two Departments should be put together. The two Departments together were more than one person could legitimately undertake. The burden was very great indeed, so we have separated them.

With regard to nurses' pay, as the right hon. Gentleman is aware, we have provided the full amount of £803 million estimated by the review body. We believe that that should be sufficient for a fair implementation of the new structural pay agreement, and we hope that regional health authorities and districts will get on with making that structural arrangement.

Mr. Kinnock: The pay review body said:

"the actual cost of our recommendations may well differ from our estimates".

Will the Prime Minister now give a specific undertaking that if the actual costs are higher than the estimates she will make up the difference, or is she again to betray nurses and patients?

The Prime Minister: We believe that the £803 million is sufficient to reach a fair implementation of the structural pay agreement. It is for the regions to determine how to allocate the funds to the districts. The main allocation of the central funds has already been made to the regions. It is for the regions to determine how to allocate funds to districts, because they are best placed to take account of local factors that may affect the outcome of the grading exercise. One of the problems is that the local health authorities are not getting on sufficiently rapidly with the regrading and, therefore, the nurses do not quite know where they are.

I remind the right hon. Gentleman of the cuts to nurses pay under the last Labour Government.

Mr. Nicholas Baker: Do my right hon. Friend and her newly enlarged Cabinet plan to introduce legislation to abolish oaths of allegiance being sworn to the Crown and to replace them with democratic oaths? Does she not regard such a proposal as disloyal, if not treacherous? Is she surprised that a Bill has been introduced by a group of Members of the Labour party who expect that their candidate will win the next Labour leadership election on that basis?

The Prime Minister: I think that my hon. Friend has made his own point very effectively indeed.

Dr. Owen: In view of the deplorably short sighted decision not to give any further financial support to the HOTOL project, will the Prime Minister agree, first, to declassify the patents and, secondly, if any other Government are prepared to come forward in a collaborative project, that this Government will also support HOTOL?

The Prime Minister: As the right hon. Gentleman knows, the HOTOL project is only in its very early research stages, but I think that a contrary impression may have been given in certain newspapers. It is a concept of a space plane to reduce the cost of launching satellites. There is no question of this country being able to finance the research or production of such an enormous project, which would be in the order of £4 billion to £6 billion. We think that our research moneys could far better go to many other projects which would help our own people far more.

Mr. Alexander: Following my right hon. Friend's recent involvement with the Tidy Britain Group, will she consider turning her energies towards the problems of noise in our streets? Does she agree that some of the noise coming from open car windows and transistors in the streets is deeply offensive and that legislation should now be considered to reduce that noise to much more acceptable levels?

The Prime Minister: I agree—*[Interruption.]*

Mr. Speaker: Order. We should hear the answer.

The Prime Minister: Answering from this Dispatch Box, I agree with my hon. Friend about noise and how very difficult it can be to make oneself heard.

With regard to a clean Britain, if people did not throw things down, had more personal pride and responsibility for their villages, towns and cities, and made less noise and objection to such an unexceptionable statement, we might have very much cleaner towns and cities.

Q2. **Mr. Andrew Welsh:** To ask the Prime Minister if she will list her official engagements for Tuesday 26 July.

The Prime Minister: I refer the hon. Gentleman to the reply that I gave some moments ago.

Mr. Welsh: As the Prime Minister in her reshuffle has now made the Secretary of State in charge of the Department of Health and Social Security half the Minister that he once was, will she now sort out the mess in the Scottish Office? Is she aware that, on the one hand, there is no Law Officer or Agriculture Minister who can participate in debates in the House and, on the other, the one-man band from Stirling, for example, is responsible for education, for health, for social work, for sport and so on? He is not very good at it. To those have now been added agriculture, forestry and fishing. Will she turn her attention to a sensible and organised form of government in Scotland, for the first time in decades?

The Prime Minister: The Scottish Office works extremely well under one of the best Scottish Secretaries of State that it has ever had. It has an excellent team—*[Interruption.]* I point out to the hon. Gentleman, if I can be heard through the noise, which is such an awful example to schoolchildren, that the Scottish earnings are the third highest in Britain.

Q3. **Mr. Andy Stewart:** To ask the Prime Minister if she will list her official engagements for Tuesday 26 July.

The Prime Minister: I refer my hon. Friend to the reply that I gave some moments ago.

Mr. Stewart: Does my right hon. Friend recall that, when she visited the Nottinghamshire coalfield in 1976 output stood at 2 tonnes per manshift? Today, under the leadership of the Union of Democratic Mineworkers, output has reached over 5 tonnes per manshift. Recently, the Black Diamond of Sherwood Thoresby colliery broke the European weekly record for deep-mined coal, at 61,700 tonnes. Will my right hon. Friend take time in the next year to visit Nottinghamshire to see for herself how the Notts miners are preparing to meet the challenge of privatisation of the electricity industry?

The Prime Minister: Yes, Sir. The record that my hon. Friend mentions is quite outstanding and it is a great tribute to the UDM and all of those who work in the coal mine. It puts miners in a very good position to meet the challenges of the next decade. I shall certainly try to come up next year and give them my personal best wishes on their marvellous record.

Mr. McAvoy: Is the Prime Minister aware of the widespread anger in the country at her appointment of the right hon. and learned Member for Richmond, Yorks (Mr. Brittan) as European Commissioner? Is she further aware that that appointment is regarded by the overwhelming majority of people as a pay-off for silence during the Westland affair?

The Prime Minister: The nomination—*[Interruption.]*

Mr. Speaker: Order. I ask the House to listen to answers.

The Prime Minister: The nomination of my right hon. and learned Friend the Member for Richmond, Yorks (Mr. Brittan) is an excellent one——

Mr. Skinner: Why did the right hon. Lady sack him then?

The Prime Minister: I believe——

Mr. Speaker: Order. It is only fair that, when the Prime Minister has been asked a question, she is given an opportunity to answer it.

The Prime Minister: The Opposition cannot debate—they can only shout. That is why they shout. The nomination of my right hon. and learned Friend, the former Secretary of State for Trade and Industry, is an excellent one. I believe very strongly that we should put to Europe those who have had considerable experience of Cabinet office. My right hon. and learned Friend served in the Treasury as a Cabinet Minister, he served in the Home Office as a Cabinet Minister and he served in the Department of Trade and Industry as a Cabinet Minister. He will be very well placed to represent Britain at an extremely difficult and important time for the future of Europe and of the Commission. I hope that the Opposition will see fit to put up names that are as distinguished.

Q4. **Mr. Neil Hamilton:** To ask the Prime Minister if she will list her official engagements for Tuesday 26 July.

The Prime Minister: I refer my hon. Friend to the reply that I gave some moments ago.

Mr. Hamilton: As the secretary of the ANZAC group, may I wish my right hon. Friend a successful visit to Australia at the end of the week? Will she confirm that while she is there she will not make any speeches critical of the Leader of the Opposition, that she will not make any tasteless jokes about his wife, that she will not swear at any Australian soldiers and that she will behave with a dignity that will forever elude the Leader of the Opposition?

The Prime Minister: I have no difficulty in giving the confirmation that my hon. Friend seeks.

Q5. **Mr. Wallace:** To ask the Prime Minister if she will list her official engagements for Tuesday 26 July.

The Prime Minister: I refer the hon. Gentleman to the reply that I gave some moments ago.

Mr. Wallace: The Prime Minister will be aware that although the closure of Dounreay is being phased over many years the job loss implications are worrying for the north of Scotland. Is she aware that we will not be satisfied by being fobbed off with the idea of a nuclear dump in the north of Scotland? Indeed, it might discourage many of the employment opportunities that we shall now have to develop in that part of the country.

The Prime Minister: I hope the hon. Gentleman appreciates the strenuous efforts that we have made to phase out those job losses over a long period, because we are well aware of the problems of getting extra jobs in that area. I did not know that the hon. Gentleman was such an enthusiast for nuclear energy. With regard to Nirex, we have not yet received a report from that organisation about the disposal of some of the waste.

Foreign Terrorist Organisations

Q6. **Mr. Hunter:** To ask the Prime Minister what is Her Majesty's Government's policy with regard to foreign terrorist organisations known to be in regular contact with the IRA having offices in the United Kingdom.

The Prime Minister: The IRA is a proscribed organisation in this country, and anyone who has a meeting with members of the IRA may be liable to prosecution under section 1 of the Prevention of Terrorism (Temporary Provisions) Act 1984.

Mr. Hunter: Since the IRA, the ANC and SWAPO, as exemplified by the statement made by Mr. Sam Nujoma in Dublin last November, not only show interest in one another but support one another's tactics, and bearing in mind that the ANC is responsible for the murder of 600 black South Africans in the past two to three years, is it right that London should be an open haven for South African terrorist organisations, which are the self-confessed friends of the IRA?

The Prime Minister: The information that my hon. Friend has given about the links between those organisations will, of course, be investigated. As he knows, the other organisations that he has mentioned are not proscribed in this country. Therefore, the tradition is that anyone is free to express his political views, provided that he does so within the law. Of course, we condemn violence from whatever quarter it comes in South Africa. The only way in which progress can be made is by peaceful negotiation. The current talks on Angola and Namibia are encouraging in that respect.

Select Committee Report

3.31 pm

Mr. Eric Martlew (Carlisle): On a point of order, Mr. Speaker. I wonder whether you would investigate a serious breach of the procedures of the House. I am talking about the pressure that has been put on the Chairman of a Select Committee by the Government to change a report arbitrarily without taking it to the Committee. Today there was a press conference on the Chernobyl report, which had been agreed by both sides of the Committee. The Chairman instructed the Clerk of the Committee to alter the report—[HON. MEMBERS: "Oh!"]—where it said that it was "highly probable" that lamb had got into the food chain. The Chairman instructed the Clerk to delete the word "highly", so the report reads only "probable". The only reason for that was that the Chairman had been got at by the Government. It is a disgrace.

Mr. Speaker: Order. Matters of that kind must be dealt with in the Committee. They cannot be dealt with by me. I call Mr. Harry Barnes to move his motion on the ten-minute Bill.

Several Hon. Members *rose*——

Mr. Speaker: Order. I call Mr. Harry Barnes.

Mr. Dennis Skinner (Bolsover): Further to that point of order, Mr. Speaker.

Mr. Speaker: Order. It is not a matter for me—[HON. MEMBERS: "It is."] Order. Matters relating to a Select Committee are for the Select Committee concerned. They must be taken up in the Select Committee.

Mr. Skinner: Further to that point of order, Mr. Speaker. Is it not true that at some point Select Committees must report to the House and that on occasions those reports are debated? What my hon. Friend has said is that the Chairman of that Committee has doctored that report, on the advice of the Government. The report has been nobbled. That means that a report that will be presented to the House, under your stewardship, Mr. Speaker, has been nobbled by the Government. Of course it is a matter for you to investigate.

Mr. Speaker: I am not responsible for reports made by Select Committees. That must be a matter for the Committee concerned. If the Committee does not like what has happened, it can report to the House.

Several Hon. Members *rose*——

Mr. Speaker: Order. I call Mr. Wiggin.

Mr. Jerry Wiggin (Weston-super-Mare): Further to that point of order, Mr. Speaker, of which I was given no warning by a member of my Committee. I was informed by the Clerk of the Committee that there had been a misprint in the summary of recommendations—[HON. MEMBERS: "Oh!"] Accordingly, I directed that that change should be reported to a press conference that I held this morning.

Several Hon. Members *rose*——

Mr. Speaker: The Chairman of the Committee has given his explanation.

Mr. Dick Douglas (Dunfermline, West): Further to that point of order, Mr. Speaker. With great respect to you, I, and I believe the House, would be extremely grateful if you would review, with great accuracy—as I know you will—the words that you used about the responsibilities of Select Committees. I am sure that the House will recognise that the sole function of a Select Committee is to report to the House. The substance of the remarks of my hon. Friend the Member for Carlisle (Mr. Martlew) related to a report to the House.

Mr. Martlew: It has been published.

Mr. Douglas: Yes. Therefore, if that report has been put into the public domain, any consequential alteration of that report is a matter for you and the House. I ask you to take that on board.

Mr. Speaker: First, as I understand it, this is not the report of the Committee, but a summary of it given at a press conference. Secondly, the substance of a Select Committee report is for the whole Committee to agree. If the Committee feels that something has gone wrong and that an alteration, which the Chairman has said is a technical one, has been made, it is a matter for the Committee to investigate.

Mr. Bob Cryer (Bradford, South): Further to that point of order, Mr. Speaker. While a Select Committee is considering a report it remains the property of that Committee, but once the report is published by the Committee—the report in question obviously has been published, because it was dealt with at a press conference—it is then reported to the House. The general rule is that until a Committee has concluded its deliberations the report remains its property and you, Mr. Speaker, would object to hon. Members referring to its contents on the Floor of the House.

That is not the case here. The report has been published, the Government have apparently brought their influence to bear on the final report and therefore it is the job of this Chamber to ensure that some sort of investigation is established, because——

Mr. Speaker: Order. Let me deal with this, because the House knows that this is an Opposition Day, and we should get on with the debate. The position is absolutely clear. The report that is made to the House cannot be altered except by the Committee. It is not open to any individual hon. Member to do that. That is the position.

Several Hon. Members *rose*——

Mr. Speaker: Order. I shall take the points of order, but there must be no complaint if hon. Members who wish to take part in the housing debate do not get called.

Mr. Neil Hamilton (Tatton): On a genuine point of order, Mr. Speaker. In *Hansard* yesterday you rightly said that you hoped that

"the whole House will always uphold the authority of the Chair. If that does not happen, anarchy becomes the order of the day".—[*Official Report*, 25 July 1988; Vol. 138, c. 33.]

It is clear that that is what is happening. In the Division yesterday, on a motion to support you in your decision to name a Member, only three Opposition Members supported you and 26 voted against you. How does that in any way square with your advice to the House that the whole House should uphold the authority of the Chair when, patently, only a minuscule number of Opposition Members are prepared to support you and nine times as many are prepared to oppose you?

Mr. Eric S. Heffer (Liverpool, Walton): On a point of order, Mr. Speaker. In view of what my hon. Friend the Member for Carlisle (Mr. Martlew) said about the Select Committee report, I ask you to say that, for once, you will look into the matter, consider it and report back to the House, rather than taking a hasty decision based upon the fact that my hon. Friend may or may not have been right. This is a matter that should be decided by Back Benchers and the House. Surely, as the representative of Back Benchers, it is your duty to uphold the rights of all Members of the House.

Mr. Speaker: Undoubtedly it is, but I believe that the whole House feels that it would be wrong for the Speaker to assume responsibilities that he has not got. As the hon. Gentleman has pressed the matter, and so that we may get on with the debate, I shall look into it. However, I do not believe that it is my responsibility and, as I have already said, I believe that it is the responsibility of the Committee. Once a Committee has reported, it is not possible to alter its report.

Mr. Doug Hoyle (Warrington, North): On a point of order, Mr. Speaker——

Mr. Speaker: Order. The time taken by points of order will have to be taken into account later in the day.

Mr. Hoyle: Does it not concern you, Mr. Speaker when it is being said that a Select Committee report has been tampered with by the Chairman of that Committee?

Mr. Speaker: I have said that I shall look into the matter.

Mr. Harry Ewing (Falkirk, East): The point of order raised by the hon. Member for Tatton (Mr. Hamilton) has provoked me to take this up with you, Mr. Speaker. I was a bit disappointed that you did not respond to that point of order. It seemed to me that the hon. Gentleman was trying to put you in a position in which you felt that you did not have the support of the Opposition. That is simply not true. It is very unfair of the hon. Member for Tatton to raise that sort of point of order and it should not go unanswered. It should be denied here and now.

Mr. Speaker: I thank the hon. Gentleman for what he has said. I assure the House that if I felt that I did not have the support of the whole House there would be no point in continuing.

Mr. David Curry (Skipton and Ripon): On a point of order, Mr. Speaker. You should know that the hon. Member for Carlisle (Mr. Martlew) is suffering from amnesia. He should recall that it was said in the body of the report that it was "probable", and that the whole Committee agreed to exclude the word "highly". That reflects what is in the body of the report. The hon. Gentleman's amnesia betrays him, and he should not cast aspersions on the Chairman of the Committee.

Mr. Speaker: I have no knowledge of this report. I said in answer to the hon. Member for Liverpool, Walton (Mr. Heffer) that I would look into the matter, even though I do not think that it is really for me.

Petitioners' Rights

3.42 pm

Mr. Harry Barnes (Derbyshire, North-East): I beg to move,

That leave be given to bring in a Bill to protect the signatories of petitions presented to any organisation or body outside the House of Commons from any penalty or discrimination, legal or otherwise.

The Bill that I seek to introduce is about petitioners' rights. Three of the greatest petitions ever presented to Parliament were the people's charters of the 19th century. They contained six points of wide constitutional and democratic significance: secret ballots, equal electoral districts, payment of MPs, the end of property qualifications for people entering Parliament, universal male suffrage and parliaments to be elected annually. Only that last demand has not yet seen the light of day. The suffragettes helped to overcome the sexist limitations of the initial Chartists' demands.

The poll tax legislation which has just been adopted, together with the earlier measure for Scotland, likewise contains six points of great constitutional and democratic significance, but they are all regressive, making it a counter-charter. First, the franchise will be cut, as many of those who cannot afford their poll tax seek to evade it by leaving their names off the poll tax and electoral registers. Secondly, normal democracy will be virtually ended as the central state machine takes over the last remnants of local government independence. Thirdly, just to be on the safe side, local government elections will be fixed as pressure is created to keep down poll tax levels and the services that they provide.

Fourthly, the poor will be required to subsidise the rich, in contrast to the norms of democratic taxation systems. Fifthly, for the first time since the universal franchise was finally achieved in the Acts of 1918 and 1928, people will have to pay tax to qualify to vote. Sixthly, civil liberties essential to a democracy will be damaged, as poll tax registrars will be required to invade all sorts of sensitive information to try to discover who is missing from their registers.

In the House on 28 March, at column 839, the hon. Member for Stockton, South (Mr. Devlin) even hit on the notion of using anti-poll-tax petitions as an avenue for placing people's names on poll tax registers. The Minister of State, Scottish Office agreed with that in column 851 —as, it seems, did the Leader of the House in answer to my business question on 23 June, in columns 1278-79.

There is, of course, a logic to such illiberal thought. If criminal records, housing benefit and educational grant records and so on can be invaded by the poll tax registrar, why not use petitioners' names and addresses? Fortunately, public petitions to Parliament are out for such purposes because, as you confirmed, Mr. Speaker, in column 1281 of *Hansard* of 23 June, the names and addresses of such petitioners are Parliament's property and are not available to the Government or to the registrars. However, petitions to the Prime Minister, Government Departments and poll tax registrars are available for this use and abuse unless the House decides to pass a Bill on the lines of the one that I seek to introduce.

It is time to turn the logic of the hon. Member for Stockton, South the right way round. If there is a sound, democratic and constitutional reason for protecting

[Mr. Harry Barnes]

petitioners' names and addresses, might there not be a similar reason for protecting sensitive information on housing, employment and education? The word "petition" means a prayerful request and in its constitutional form it is an application for redress to an authority, and no duress can be levelled at petitioners for the act of petitioning. Nowadays such authorities are often Government Departments and agencies, but it is essentially the monarch, Parliament and the courts that are currently covered by petitioners' rights.

My Bill would protect the signatories to petitions presented to any organisation or body outside Parliament from any discrimination, legal or otherwise, and would include such petitions as the people's petition recently presented to the Prime Minister. Petitions to the Commons must be in writing and must be free from disrespectful language or imputations against any tribunal or constituted authority. The Bill would require similar provisions and checks over petitions qualifying for protection when delivered outside Parliament.

I am seeking to place petitions in this country on the same, or on a similar, level to petitions in the United States of America, while acknowledging the constitutional differences between the United Kingdom and the United States. The right to petition the Government in the USA is secured by the first amendment to the United States constitution, which was ratified between 1789 and 1791. It says:

"Congress shall make no law . . . abridging . . . the right of the people peacefully to assemble and to petition the Government for a redress of grievances."

A United States Supreme Court ruling in 1875 in the United States *v.* Cruikshank case took the view that the first amendment assumes

"the existence of the right of the people to assemble for lawful purposes and protects it against encroachment by Congress. The right was not created by the amendment; neither was its continuance guaranteed except as against congressional interference. For their protection in its enjoyment, therefore, the people must look to the states. The power for that purpose was originally placed there, and has never been surrendered. The right of the people peaceably to assemble for the purpose of petitioning Congress for a redress of grievances, or for anything else connected with the powers or duties of the national government is an attribute of national citizenship, and as such under the protection of and guaranteed by the United States. The very idea of a government republican in form implies a right on the part of its citizens to meet peaceably for consultation in respect to public affairs and to petition for a redress of grievances".

That protection should be provided in this country in connection with petitions to Government. My Bill seeks to protect petitioners who add their names and addresses to petitions to the Government and other official bodies. That protection would be similar to the protections provided to those who petition Parliament in the way that is laid down in "Erskine May".

In seeking to extend petitioning rights I should tell hon. Members that they should be aware of the role that petitioning played in the development of Parliament and parliamentary democracy. The right to petition the monarch goes back to Saxon times and was implicitely recognised in Magna Carta. The Bill of Rights 1688, the tercentenary of which we have just celebrated, said:

"it is the right of the Subjects to petition the King, and all commitments and prosecutions for such petitions are illegal."

Parliament probably originated in meetings of the King's Council, which considered petitions. Up to the start of the 15th century the main work of Parliament was the considering of petitions. It was only with the final growth of parliamentary democracy, especially with the slow start of the working-class franchise from 1867, that petitioning started to lose its constitutional significance.

When people acquire the vote, have the freedom to join together in trade unions which can freely negotiate for their interests, start to have their ideas and interests expessed in the press, make the political system respond to their concerns through a progressive taxation system and a growing welfare state, petitioning will be of minor significance. However, when employment Bills, Budgets, cuts in the Health Service, attacks on housing benefit and income support, Murdoch and the poll tax start to dismantle the workers' achievements, petitioning rights become important in an age of declining freedoms.

Furthermore, we can no longer be described as a parliamentary democracy. Elections are presidential. Governments dictate to Parliament through the Whips and through their use of patronage. The new computer technology adds to central control and authority. Against such trends, democratisation at the workplace and decentralisation are essential. Petitioning rights have their part to play in the struggle for re-enfranchisement, similar in many ways to the Chartists' initial struggle for working-class enfranchisement.

Question put and agreed to.

Bill ordered to be brought in by Mr. Harry Barnes, Mr. Thomas Graham, Mr. Max Madden, Mrs. Alice Mahon, Ms. Dawn Primarolo, Mr. Jim Cousins, Mr. John Cummings, Mr. Jimmy Wray, Mr. Dick Douglas, Mr. John Hughes, Mr. Harry Cohen and Mr. Alan Meale.

PETITIONERS' RIGHTS

Mr. Harry Barnes accordingly presented a Bill to protect the signatories of petitions presented to any organisation or body outside the House of Commons from any penalty or discrimination, legal or otherwise: And the same was read the First time; and ordered to be read a Second time upon Wednesday 27 July and to be printed. [Bill 209.]

Opposition Day

[19TH ALLOTTED DAY]

Housing Benefit Transitional Scheme

3.52 pm

Mr. Robin Cook (Livingston): I beg to move,

That this House recalls that in April Her Majesty's Government imposed savage cuts in Housing Benefit which continue to cause serious hardship to millions of claimants; notes that the vast majority of losers are not eligible for help from the emergency scheme of transitional protection which Her Majesty's Government was forced to set up; is concerned that three months after this scheme was announced to the House only a handful of applications have been processed and that at the present rate it will be at least February 1989 before Her Majesty's Government achieves its inadequate target of 350,000 successful applications; records its alarm at recent Ministerial statements that even many of those who are successful will lose their transitional protection next March; takes the view that the scheme has failed to relieve the pressing hardship caused by the cuts in Housing Benefit; and calls upon Her Majesty's Government to reverse those cuts forthwith.

Mr. Speaker: I must announce to the House that I have selected the amendment in the name of the Prime Minister.

Mr. Cook: Last April, the Government, as an act of deliberate policy, cut housing benefit. That removed housing benefit from 1 million claimants and reduced housing benefit for 4·5 million other claimants. How popular that step turned out to be can be gauged from the front pages of today's newspapers in which the Secretary of State, who had to defend those cuts in the House, is variously described as "shunted sideways", "chopped in half" or "sidelined".

Over the past 12 months, I have developed a degree of affection for my sparring partner. I was not always sure whether that affection was reciprocated, but, nevertheless, I have a healthy respect for my opposite number. I regret the fact that he is unable to be with us on this occasion, owing to another engagement, but I am sure that he will read the report of our proceedings. As his skills of presentation have been somewhat criticised over the past 24 hours, I take this opportunity of putting it on the record that I, for one, am quite sure that, if it were possible to make popular the idea that taking £10 off the weekly benefit of a pensioner was a step toward ending the dependency culture, the right hon. Gentleman could have achieved it.

The Government are in trouble over health and social security not because the man at the top is not a good enough saleman, but because nobody wants to buy the Government's policies on welfare. I note that one of today's papers says that the Secretary of State is now left with

"the dull routine of benefit payments."

Let me offer encouragement to the Secretary of State, because he may need cheering up in his current position. Those constituents whom we meet who live on benefits do not regard the question of their payments as a dull routine. On the contrary, they are matters of vital necessity and importance to them. To nobody is that more important than those constituents whom my hon. Friends have met over the past three months, who have seen their housing benefit cut by £40, £80, £100 a month—by definition, people on low incomes.

There is a droll debate going on among the new Right on how one can define poverty. Let me offer an invitation to any hon. Members who may find it difficult to work out what poverty is. They need not worry themselves any more about such a difficult question. All they have to do is to come with me and my hon. Friends and meet the people we know who know the meaning of poverty because they live with it every day of their lives and have seen it worsen over the past three months. The most telling testimony to their poverty is the evidence that they simply cannot afford to pay the new levels of rents that are being demanded of them.

Rent arrears across Britain have bounded ahead since April. In Wales, a survey by the Association of District Councils has found that rent arrears have increased by 50 per cent. Lancaster informs me that its rent arrears have increased by one third since April, and it understands that that is one of the lowest increases in Lancashire. Edinburgh projects that the increase in rent arrears will double over the course of this year.

That evidence was not available to the House when we last debated the matter on 27 April. On that occasion, the then Secretary of State for Social Services wisely gave up the attempt to defend the scheme that he had just imposed. Instead, he pulled out of the hat an emergency package to mitigate the worst consequences of his own scheme. We were invited then, and we are invited again in the Government's amendment, to applaud the Government for their generosity in protecting some people from the worst consequences of the Government's cuts.

It is now three months almost to the day of that debate and I—and I suspect that I speak for many of my hon. Friends—have yet to meet anyone who has received a payment for transitional protection. I know that I meet different people from Ministers. I know that with some confidence because two weeks ago, opening a debate in the Scottish Grand Committee, the Under-Secretary of State for Scotland, the hon. Member for Edinburgh, West (Lord James Douglas-Hamilton), expressed surprise when he heard of complaints that people had not been receiving transitional protection and proceeded to assure the Committee that if any hon. Members had evidence that somebody was not receiving the transitional protection he would investigate it on their behalf. He was obviously blissfully unaware that, on the day that he spoke, nobody in Britain had received a single payment for transitional protection. He is, I concede, not a Minister in the Department of Health and Social Security, only a Scottish Office Minister with responsibility for housing and, as such, cannot be expected to know about such things.

Since then, a handful of claimants have managed to get under the wire. Last week, in answer to a parliamentary question from me, the DHSS stated that 18 people had received payment for transitional protection. I checked again this morning and was informed that yesterday that figure of 18 leaped ahead to a total of 68 claimants who have been paid transitional protection. Some of my hon. Friends have met more losers of housing benefit in a single weekend in their constituencies than that figure.

I note that in today's amendment Ministers again preen themselves on the fact that it is remarkable that anyone

[Mr. Cook]

has been paid in such a short time. The last time that the Minister of Social Security and the Disabled took part in Question Time, he said:

"It is a remarkable achievement that we have been able to set up the new office, employ and train the staff, establish the procedures and advertise".—[*Official Report*, 12 July 1988; Vol. 137, c. 172.]

What busy people those Ministers are. No wonder they need another Secretary of State to help them shift the furniture around the new office. The truth is that it is not the Ministers who did all this, but the much-abused civil servants who have gamely set out to make sense of Minister's decisions.

I give credit to the civil servants who have been working these past three months to fit into that tight timetable, but I give none to the Ministers because for three years they knew that the cuts were coming. For three years they were warned what those cuts would mean by the citizens advice bureaux, Help the Aged, the Child Poverty Action Group, and the National Consumer Council, and for three years they did nothing to soften the blow.

One of the last things that the current crop of Ministers did before the blow fell was to abolish housing benefit supplement in the last week of March, rather than in the first week of April, in a deliberate attempt to stop those claimants qualifying for the transitional protection that they would otherwise have received. It is perfectly clear not only that Ministers did nothing for three years before the cuts were made, but that they would have done nothing in the three weeks that followed had they not faced the possibility of defeat on our motion of 27 April. As it was, the Secretary of State then produced the minimum necessary to buy off rebellion among his own Back Benchers.

I must utter a word of warning to Conservative Back Benchers, because I fear they are about to discover from their outraged constituents that they were bought off too cheaply. There has been another fresh development in the past couple of weeks. Not only have the first payments been made by the transitional protection unit, but the first rejection slips have been issued by that unit. Last week, 190 claims were processed by the transitional protection unit and, of that number, 96 did not qualify for a penny in transitional protection. Half of those who applied have been refused all benefit. They are the claimants who do not meet the scheme's small print.

I note from the circular to local authorities explaining the inquiry form that is completed in response to every application for transitional protection that where they fill in the boxes marked "No", they should then go straight to what are described as the "escape points". There are plenty of escape points in that form, each of them devised to evade liability to that particular claimant.

First, young tenants with no children are excluded from transitional protection. That is rather odd, because they are the very people who are hit hardest by the invention of a new junior rate of benefit. Any young adult under 26 years of age loses housing benefit at the ferocious marginal rate of 85p in every £1 on any income above £26 per week. I know of one case in Nuneaton of an unemployed man who has been in work, has paid his contributions, and who therefore qualifies for unemployment benefit of £32·75 per week. Out of that meagre income he must pay, as a result of the cuts in housing benefit, £5·70 rent per week, although his sole income is unemployment benefit. He is not entitled to a penny in transitional protection.

In my own constituency, I know of one person who is working on an MSC scheme, as are many of his generation, and whose net pay is £56 per week. He is now paying a full rent of £24 a week. He would be better off out of work than in work. He also does not qualify for a penny of transitional protection.

Nor is the existence of children itself sufficient to unlock the key to transitional protection. On the contrary, I predict that relatively few families with children will qualify. I can predict that with confidence because the Government's scheme offsets what they lose in housing benefit by any gain that they make in family credit.

I refer to a case that has been passed to me by my hon. Friend the Member for Renfrew, West and Inverclyde (Mr. Graham) concerning a Mrs. White, who is a single parent holding down a low-paid job. She gained £12·60 in family credit, but she also lost £13·60 in rent and rate benefits. On top of that, she lost £3·50 per week in free school meals and milk for her children. Therefore, she is £4·50 per week worse off. My hon. Friend took up Mrs. White's case with Ministers. I have before me the reply from the former Under-Secretary of State. I shall preserve it all the more carefully, because this morning I heard John Cole announce that he is a man who should be watched as a future Prime Minister. I shall treasure his letter with due care and as a memento that I knew him when he was a young man.

Replying to the case of Mrs. White, who the House will recall lost £4·50 per week in benefits because of the changes, the former Under-Secretary wrote that her case "demonstrates the success of this scheme."

Mrs. White is deemed to be a success. If the scheme's successes loses £4·50 per week, how much do its failures lose? Still, the Under-Secretary was promoted. In his letter, he helpfully went on to explain the scheme's details, although it must already have been clear to him, as it is clear to me, that Mrs. White has no hope of qualifying for transitional protection because her net loss of £4·50 is not large enough to make her eligible for it.

I turn to the largest number of people not qualifying for help because they are not hit hard enough by the cuts. The Government claim that anyone who has lost more than £2·50 housing benefit will qualify for transitional protection. That comes with a number of footnotes. First, that commitment to £2·50 maximum loss does not include the new 20 per cent. rates penalty that is now excluded from housing benefit. Since that is a new feature of the most startling novelty, I am perplexed as to why it is not covered by the transitional protection that was devised to help phase in the new scheme. I am particularly perplexed because, having met many tenants who have seen their benefits reduced, I can assure Ministers that not one of them has the remotest idea which part of that loss is attributable to the 20 per cent. cut and which is attributable to the general housing benefit cut.

In my own constituency—and, conveniently and coincidentally, in the constituency of the Minister of State—that 20 per cent. adds an average of another £2·60 per week to loss of benefits. Additionally, there are this year's rent and rates increases, most of which took place in April and which are good for another £2 increase in most weekly charges. That, again, is exempt from any transitional protection. That also is rather curious because the

increased rent and rates charge qualifies for housing benefit but apparently it does not qualify for transitional protection, to compensate for the cut in housing benefit.

There may be no logic in those exclusions, but I can understand their political attraction. They enable Ministers to keep saying that they have limited losses to a maximum of £2·60 per week, when in reality they are only helping people who have seen their weekly bills increase by a minimum of £7 per week. One of the dangers of which I am conscious—and it is a failing of which I myself am sometimes guilty—is that, because from time to time I and my hon. Friends meet people who have suffered spectacular losses in housing benefit, we end up with a dulled appreciation of their devastating impact on tight weekly budgets of lesser sums. To individuals or couples whose total weekly income is £50, £60 or £70, £7 per week is an enormous sum.

It may be difficult for certain hon. Members to appreciate the enormity of that sum to many people when, to them, £7 represents the price of a large round in the Smoking Room. However, I can tell hon. Members what £7 means in a pensioner's weekly budget. It means one dozen eggs, a daily newspaper, a couple of loaves, half a kilo of margarine, seven tins of soup, and half a stone of potatoes. That is what £7 means to pensioners, and that is what they must give up if they are to find another £7 out of their weekly budget. Those are the purchases that they must do without.

Mr. Frank Haynes (Ashfield): My hon. Friend the Member for Livingston (Mr. Cook), in commenting that the Minister does not care, will have noticed that Conservative Members do not care either. Look at the empty Government Benches. They are not at all bothered about the subject that we are debating today.

Is my hon. Friend aware that there are many widows and pensioners in Nottinghamshire who are being served a dirty deal by the Government? The heating allowance that they receive from British Coal because of their service is linked to housing benefit, and part of that benefit is reduced because those widows and pensioners receive cash in lieu. That is how the Government serve the pensioners in my constituency.

Mr. Cook: My hon. Friend has made a brilliant cameo speech. Let me take him up on his second point first. It was precisely to allow for such local financial considerations that local authorities used to have the discretion to top up the rent rebate scheme that the Government have taken away.

As for the numbers present in the Chamber, I remind the House that in a previous debate I pointed out that each Conservative Member represents an average of 7,500 losers of housing benefit. Many of them, tragically, go unrepresented in today's debate, but I suspect that many will be in touch with their Members of Parliament in the weeks ahead as the rejection slips come in from the housing benefit transitional protection unit.

Among those excluded from transitional protection are the claimants who have fallen into one of the many oubliettes with which the new regulations are studded. I remind Ministers of one of the deepest traps, which I drew to their attention when we debated the regulations last November. That is the provision that, after six weeks in hospital, a tenant effectively loses entitlement to housing benefit, because of the odd notion of Ministers that after six weeks in hospital any person needs only pocket money. Now such people lose housing benefit at 85p in the pound on any income over £8·25 a week.

When I pointed that out to the House in November, the then Under-Secretary said that I had misunderstood the provisions. As he has kindly joined us for his swan song, let me tell him about an elderly constituent of mine who is currently in the local psychiatric hospital. As usual with such illnesses, she has been there for over six weeks. Now, on a single person's state pension, she is paying a weekly rent of £24 a week and is £157 in arrears. Last week she received a notice of repossession from the local authority. It would be an understatement to say that that is unlikely to aid her recovery from a psychiatric illness.

If the House wants to savour the full degree of political bias in the regulations, let me point out that my constituent would continue to qualify for maximum housing benefit if she were in a private hospital, because the regulations make explicit provision to protect the housing benefit of paying patients. However, she qualifies for no transitional protection towards the cut in her housing benefit.

As well as claimants who are not entitled to transitional protection, there are the minority who are so entitled. The real tragedy is that most of them probably will not receive it. Here it is necessary to grapple with the sheer complexity of the structure that emerged from Ministers' panic response to the consequences of their own cuts. We now have a system in which each claimant must apply to the local authority for housing benefit and then make a separate application to an entirely separate agency—the DHSS—for compensation for the cut in housing benefit that the same DHSS has imposed on the local authority.

If the claimant is lucky, he will end up with two separate payments for the same rent: payment of housing benefit from the local authority, and payment of transitional protection from the DHSS. It would be unkind at this point to remind Ministers that they promised us that the scheme would be simple to administer and less confusing for claimants. It has certainly succeeded in confusing some of their own Back Benchers. The Minister of State will recall the hon. Member for Norwich, North (Mr. Thompson) causing some hilarity at Question Time by asking if he would use his influence to get Norwich city council to hurry up payment of transitional protection, as the delay was causing hardship to his constituents. The Minister was rather more reticent than Norwich city council subsequently turned out to be in pointing out that it was nothing to do with the council.

How many claimants are as confused as Conservative Back Benchers we do not know. Nor do the Government. We know from a parliamentary question three weeks ago that the Government have made no estimate of the take-up rate of transitional protection. That is probably wise of them, as the indications are that it will be pretty miserable. In the past couple of weeks, Ministers have made much of the fact that applications are coming forward at a rate of 4,500 a day. That is a tiny fraction of housing benefit claimants. To be precise, it is 0·0006 per cent., or six per 10,000 claimants. On current form, half of them will receive nothing anyway. At the rate of 2,250 successful applications each working day, it will take until February to hit the Government's own pathetic target of one in 20 claimants—and four weeks later, in March, some of them will lose it again.

We now know from a letter from the Secretary of State that some claimants will lose their transitional protection

[Mr. Cook]

at the end of the first year and others at the end of the second. That is because the protection is apparently to be subject to what is described as an erosion factor. That erosion factor has yet to be announced. Let it be announced today. Let us find out just how long "transitional" will be, and just how long the few claimants who receive transitional protection will be entitled to it before they are exposed to the full depth of the cut in their housing benefit.

It was always clear that the emergency package of transitional protection was too late and offered too little help to too few claimants. It is now clear that the scheme is failing to achieve even the Government's meagre targets for it. It is difficult not to compare this grudging, mean little scheme with the unstinting way in which our society helps with the housing costs of more affluent people. In the past week, the press has been full of coverage of the rise in mortgage rates. That 2 per cent. rise will cost the Treasury £900 million in tax relief—nine times the cost of transitional protection. It is given automatically: there is no need to fill out form RR4 and send it to the transitional protection unit. It is not transitional at all, but permanent —or at any rate for as long as interest rates remain high, which, under the present Government, would appear to guarantee it a degree of permanence.

The arrangement that automatically releases that support is not in contention between the two sides of the House. No doubt it is proper that a Government who have just forced up mortgage rates should subsidise owner-occupiers for the extra cost. I am sure that all quarters of the House were impressed a fortnight ago when the Prime Minister made the stirring declaration that she got very cross if anyone wanted to stop mortgage interest relief when they themselves had got their feet on the first rung of the ladder by making use of that relief. But what about the people who buy their houses and get their feet on the first rung with the help of mortgage tax relief, and then vote to take away the benefit that the poor need to pay their rent? Why does that not make her cross? Is it because she is among them?

I will tell the Prime Minister what makes Opposition Members angry. It is sitting in our surgeries and hearing the despair and bewilderment of those who have seen their careful weekly budgets wrecked. It is sitting in the Chamber witnessing how the Government can always find the money for tax handouts that target more help on those who need it least. Ours is not a heated, unwise anger, but a cold and resolute anger that leaves us with the determination that, although we may lose the vote tonight, we will spare no effort in gaining the support that we need to end this wicked Government and their evil priorities.

4.19 pm

The Minister of State, Department of Social Security (Mr. Nicholas Scott): I beg to move, to leave out from "House" to the end of the Question and to add instead thereof,

'applauds the Government's recent reforms of social security; notes that these will result in more taxpayers' money being spent this year than if the old system had continued, and spent in a way better targeted towards those in most need; recognises that the coverage of housing benefit had become too broad; notes that after the reforms housing benefit will still be received by more households than in 1979 and at greater real cost to the taxpayer; welcomes the Government's announcement of 27th April that some transitional protection for losses in housing benefit is to be made available to people in vulnerable groups; commends the Government for the speed with which the unit to administer these payments has been set up; and congratulates it on meeting its stated target of making the first payments in July.'.

I shall respond to the criticisms and comments of the hon. Member for Livingston (Mr. Cook) by putting them in the context of what the Government have done about social security and housing benefit since they came to office. I remind the House of what my right hon. Friend the Chancellor of the Exchequer said in his Budget statement:

"But while tax reform is a simple matter for the armchair critic, it is very much more difficult in practice. It is difficult technically and difficult politically—since any tax system, however it arose, creates powerful vested interests in favour of the status quo."—[*Official Report*, 15 March, 1988; Vol. 129, c. 999.]

If that is true of the tax system, it is certainly true of the social security system.

Since we introduced our reforms in April the Opposition have been looking back all the time to a system to which, after this system has been running for a year or so, I do not believe for one moment anybody will wish to return. This system will be infinitely more desirable, flexible and able to cope with need than the previous system.

Apart from the structural reforms that we have introduced, anybody could be forgiven, after listening to Opposition Members, for forgetting that the Government are spending more, not less, overall on social security in the current year. It is worth reminding the House that, within the scope of the additional resources that we had made available, we have sought to simplify the social security system so that claimants are better aware of that to which they are entitled and staff are better able to administer the system.

We have sought to target the additional help that is available to those who need it most, to get rid of the nonsenses and idiocies of a tax and benefit withdrawal combination in excess of 100 per cent., and, above all, to deliver a better service to those who need the help of the social security system. Of course it is a huge change. It is the greatest change in the social security benefit system since the end of the second world war. No change of that kind can be introduced without problems, but at least the Government have had the courage to tackle the inadequacies, the complexities and many of the nonsenses of the old system.

Mr. Nigel Griffiths (Edinburgh, South): The Minister castigates what he calls the old system. Why does he not tell the truth? The old system was introduced by the Conservatives. The brand new system that they have introduced is causing so much chaos that they are having to rectify it because it is inflicting so much unnecessary pain and damage.

Mr. Scott: If that is to be the quality of Opposition interventions, I do not think that I shall bother to give way again.

Mr. Nigel Griffiths: Answer the question.

Mr. Scott: I intend to answer it, but I should like to develop my speech. However, the hon. Gentleman is wrong. In April we changed a system whose basic structure

was established in 1948. As the years went by bits were bolted on to it, which added to its complexities and difficulties. We had the courage to put that right.

Mr. Rhodri Morgan (Cardiff, West): Will the Minister give way?

Mr. Scott: No, I shall not give way again. This is a short debate. The hon. Member for Livingston was not interrupted, and I should like to get on with my speech. The subject can then be debated for the rest of the afternoon.

It is worth reminding the House and those who read the accounts of its proceedings of the Government's record on social security. The taxpayer is now spending £1 billion a week on social security. That is one third higher in real terms than we were spending in 1979. We have spent that amount at a time when unemployment has come down in each of the last 21 months. It is also worth reminding the House that it is possible to pay the extra benefits only because of the success of the Government's economic policies.

Since 1979 we have steadily been spending more each year on housing benefit than was spent in previous years. Expenditure this year is running at over £5 billion. In real terms that is an increase of about 50 per cent. since we came to office in 1979, even after allowing for rises in rents and rates during that period. During the last Labour Administration, using the same measure, expenditure increased by only 3 per cent. in real terms.

Mr. Frank Field (Birkenhead): Will the Minister give way?

Mr. Scott: The hon. Gentleman knows that I always give way to him, but perhaps he will allow me to finish this point.

About 6 million people now get help—one in three households. In 1979-80, the equivalent figure was 5 million. I am prepared to stand by that record. We have given more help to more people than the Labour Government ever did.

Mr. Field: Will the Minister remind the House that the White Paper on public expenditure shows that expenditure on housing benefit will fall by £1 billion?

Mr. Scott: This year we shall spend £50 million less on housing benefit, but that has to be set against an overall w expenditure of £5·2 billion. That is a minimal clawback of a benefit which was set inexorably to rise and which we believed it right to bring under control. Increases in benefit, increases in the expenditure on social security and increases in expenditure on housing benefit do not matter to the Opposition. To them, April 1988 was Paradise lost.

Today we heard not a word from the hon. Member for Livingston about an alternative strategy. With his incisive intellect, the hon. Gentleman knows the kinds of problems that those in control of the social security system face, but he made no attempt to free himself from the intellectual and political baggage with which the 1987 general election landed the Labour party—a muddled, inconsistent and expensive policy. He set out no new strategy. He simply harked back to what the Opposition regard as the good old days.

Of all the graffiti that have bedecked our walls in recent years, the one proclaiming that nostalgia is not what it used to be might best be used as the Labour party's slogan. The reality under a Labour Government was, as Lord Barnett said, that when they were in office they spent money that they did not have, that they ended up in the arms of the International Monetary Fund and that they had to cut back, not enhance, the social security system. We have never been driven into that position and we do not intend to be.

In April 1988 we embarked on a new strategy. We said goodbye to over 20,000 paragraphs in the manual required to operate supplementary benefit. We said goodbye to the opportunities to be better off on benefit than in work. We said goodbye to an effective marginal tax rate of about 112 per cent. We also said goodbye to housing benefit supplement, the Byzantine bridge between two entirely different systems of help with housing costs for those in work and those not in work. The English language is rich in a variety of wise sayings. The saying that empty vessels make the most noise is the most accurate one to describe the Labour party. We said goodbye to many indefensible anomalies and extraordinary social security complexities which the last Labour Government had failed to tackle. We said goodbye to all those things—and good riddance.

I shall not pretend that there are no problems or dilemmas to be faced in remodelling social security. It is hard to achieve the right balance between providing a safety net for life's emergencies and creating disincentives to employment. It is hard to achieve a balance between the objective of targeting help on those most in need and the wish to avoid over-detailed and intensive means testing. As society changes, and as time goes by, we must constantly review and revise our judgments on these issues. We cannot indulge in the luxury of ignoring them, as the Opposition do.

I re-emphasise the point that the changes and the extra resources would not have been possible without steady growth in the economy, the tight control of inflation and a firm grip on public expenditure. Those were not qualities that were noticeable under the previous Labour Government. That is why we can spend more, not less, on social security. It is worth reminding the House that under this Government inflation over the past five years has been about the same as it was in a single year under the previous Labour Government.

I understand, of course, that the main thrust of the debate is on housing benefit, and it is right for me to set that within the context of the Government's wider policy on social security reform. I shall refer in a little more detail to the system that we have replaced. When we introduced changes to housing benefit, our objective was always to protect the poorest and neediest. Many families on low incomes who receive housing benefit will gain overall because of the more generous family credit scheme, so our reform of housing benefit reflects our overall approach to the reform of the system. We aim for a better targeted, simpler, system that helps those who are really in need, without encouraging dependence on the state—that is, the taxpayer. The old system was costly, complicated and random, and this Government have had the courage to tackle it.

Prior to April this year, 3 million householders on supplementary benefit were getting full rent and rate rebates paid by their local authorities. Another 3 million people on low incomes had their incomes judged by local authorities against a series of needs allowances. The amount of help that they received with rent and rates varied, depending on their individual circumstances. That

[Mr. Scott]

was the system that was criticised by the Supplementary Benefits Commission in 1976. The anomalies that were pointed out and the criticisms that were made were not tackled by the Labour Government, and it was left to us to introduce changes finally in 1983. However, the continuance of two separate means tests made the system difficult to describe, and even more complicated to administer, and it was difficult for claimants to understand. The system worked very badly indeed.

The problems were easy to identify and costs were rising fast, but the system still did not give enough help to those who really needed it. It insulated many people against the real costs of local services, and we continue to believe that accountability suffered as a consequence. Therefore, we introduced a new system, with common rules for the three income-related benefits, and the same income test for everyone. People on similar incomes are treated in the same way. We also introduced the system whereby benefits are calculated on the basis of net, rather than gross, income, and that means that ordinary people see a cash increase for extra money earned. The Labour Government never tackled that problem. People on income support will continue to receive the maximum help available, as will others on similar incomes.

Mr. John Battle (Leeds, West): Will the Minister concede that many of us sought figures in the Green Paper "Reform of Social Security" that would show how the equalisation of benefits would work out, and that the only figure that the Government submitted showed a reduction in housing benefit? That was the only figure in the Green Paper. Does the hon. Gentleman agree that that is in the Green Paper?

Mr. Scott: We never made any secret of the fact that total expenditure on housing benefit was growing inexorably and that we thought it right to cut it back. We made that clear from the outset as we re-ordered our priorities in the overall system of social security. Although we have cut back expenditure very modestly, the reform of social security has meant that we are spending more on social security and are giving more help to those in greatest need. We have given almost £100 million extra to families through the income support structure, in which we have identified the real needs in society.

Mr. Tony Favell (Stockport): Is it not a fact that many Opposition Members will not be happy until 100 per cent. of the population are dependent on the state or their town hall for housing?

Mr. Scott: I have to say that sometimes I have that feeling when I listen to speeches from the Opposition.

In my opening remarks I referred to the issues that face those who have the responsibility of office when they seek to change and reform systems in the sensitive area of social security. One of the most important is the pace at which change can be introduced. When we made our reforms in April this year we recognised that there was a need for transitional protection from the outset for the poorest in our community—those who receive supplementary benefit. In April we listened again to the reasoned and reasonable arguments that changes in housing benefit were too sharp for some vulnerable groups.

We were not forced into that, as the Opposition motion implies. We followed the promise that we had given the House on several occasions to monitor, review and, if necessary, to act if we saw that the benefit system was not operating as it should. We did that, and I repeat today that we intend to continue to do so. That commitment was honoured and led to the changes that were outlined by my right hon. Friend the Secretary of State for Social Services on 27 April.

The changes showed that we could respond sensitively and quickly to areas of genuine concern about the operation of housing benefit, and we took swift action when we had identified what was necessary. We committed another £100 million to the already massive social security budget. My right hon. Friend then announced, less than 12 weeks ago, transitional payments to help up to 350,000 people. The first payment was sent out on 14 July and the unit set up to deal with applications on a national basis is now fully operational. It will quickly build up to optimum efficiency and output.

Any Opposition Member who has seen the application form for payments could not possibly—[HON. MEMBERS: "How many have gone out?"] I shall give hon. Members the figures. Thousands of them have been sent out and are available, and we shall make the process even simpler in future. Special arrangements have been introduced to deal with cases of urgency, and freepost and freeline services have been set up to provide help and advice to those who need it. Those services have been extensively used by the public and by many Opposition Members.

Mr. Alistair Darling (Edinburgh, Central): The form is very simple, but many people simply will not qualify for transitional payments. What will the Government do to help those who have lost out and who do not qualify under this miserable scheme?

Mr. Scott: I have already explained what the transitional protection scheme was designed to achieve, what it is achieving and what it will achieve in the near future. We have already run one national publicity campaign to encourage take-up for this very important protection. We shall launch another campaign later this week, which will run for two weeks. The advertisement will include a cut-out coupon so that people can receive an RR4 application form from the Department by return of post.

Despite the whingeing from the Opposition Benches, by any standards the arrangements for transitional protection have got off to an excellent start. In my letter to colleagues on 5 May I promised that freeline and freepost facilities would be put in place at once, and they were. We undertook to ensure that payments were made immediately to those in urgent need, and that has happened. The first general payments for housing benefit cases were promised for this month, and the first payments were made on 14 July. The next step is to ensure that applications are processed in the week when they are received. We are well organised to do that.

Yesterday I had the opportunity to visit the Glasgow unit. I spoke to a number of the 500 staff now in post there. They have been recruited and trained in record time to do that job and I was impressed by their commitment, their interest and the enthusiasm with which they are tackling the job. There was a feeling of drive, efficiency and commitment in the office. As a result of the applications

that have come in, the staff have already issued 50,000 inquiry forms to local authorities—*[Interruption.]* I thought that the hon. Member for Livingston was at pains not to criticise the civil servants who are doing that important job. The sneering by some of the hon. Members behind him at junior staff who are tackling the job ill becomes them.

About 50,000 inquiry forms have gone out to local authorities to provide the information that we need to process the claims. Of course we depend on local authorities' commitment to turning round those applications.

Miss Joan Lestor (Eccles) *rose*——

Mr. Scott: Our target is to get up to date as quickly as possible with the processing of the applications.

Mr. Tony Banks (Newham, North-West): Will the Minister give way?

Mr. Scott: I intend to set firm and tight targets for the processing of the applications, although, to an extent that remains in the hands of the individuals to apply promptly and the local authorities to turn round the applications quickly. For our part, in the transitional payments unit, we shall seek to meet those very tight targets and to respond to individual needs.

Mr. Tony Banks *rose*——

Miss Lestor *rose*——

Mr. Scott: I should have thought that we should get some credit for coming to the House to talk about a scheme that has been introduced to provide significant help to pensioners, the long-term sick and disabled, widows and families with children, but I should have known better.

In my view, the Government have demonstrated a speedy and flexible response to large cash losses, but we have done that without deviating from the overall aim of providing a simple and straightforward system of housing benefit which is much better than that which it succeeded.

4.42 pm

Miss Joan Lestor (Eccles): After that speech, I do not think that we are in any danger that the phrase "incisive intellect" will be thrown around the Chamber. My hon. Friend the Member for Newham, North-West (Mr. Banks) and I were trying to ask the Minister a very simple question to help us with our own remarks: how many payments have been made to date under the transitional scheme? My hon. Friend the Member for Livingston (Mr. Cook) raised that point. I believe his figures are correct and I have tried to check them. If a scheme is to be talked about in this way, it is essential that we should know exactly how it is working.

I take issue with the Minister on two other points. He made a distinction between the needy and the real needy. He spoke about those in "real need". People are either in need or they are not in need. His definition of the real needy means that large numbers of people who will not qualify for transitional payment will be left in poverty and need. The Minister did not deal with that.

The Minister made great play of the fact that the Government are spending more money now on social security than ever before. Of course they are, given the number of unemployed people in my constituency and throughout the country. That is not something to be proud of. Incidentally, they would not have had that money to spend without the revenues from oil and from selling off many of the country's assets. [AN HON. MEMBER: "He is not listening."] Of course the Minister is not listening; that is part of his arrogance throughout the debate. He should not be proud of the fact that we are spending more money; he should be ashamed of the fact that the rise in poverty and unemployment in areas such as my constituency have forced us into this situation.

I do not have very long, so I cannot read out all the cases, but this morning I spoke to my local DHSS office and my local city council. I have a large number of cases, which I shall be sending to the Minister; indeed, some have already been sent. They include the disabled, the elderly and one-parent families who are in desperate need and who have been badly affected by the changes in benefits, including housing benefit. As far as we can discover from the guidelines on the transitional benefits, insofar as they exist, those people will not qualify for those benefits.

The Minister did not deal with a matter that concerns many of us—the fact that transitional payments will not include the 20 per cent. of housing benefit that people will lose, so the qualifying amount is actually higher.

The Minister said that the scheme is working very well. This morning, I spoke to Salford city council. I understand that there is some pilot scheme in my area, but I am told that there is now a form to apply for the forms to start making applications for transitional payments. I remind the Minister that in my constituency, where the divide between the north and the south is very graphic, where industry declined over the years and where there is a large number of long-term unemployed people, the people who are receiving benefts are all in need. The Minister seems to have forgotten that the people were not receiving benefits that they did not need or to which they were not entitled. The people were already in poverty and already had very grave problems. Those other people have been very badly affected.

I should like to draw the House's attention to a letter that I received today from Salford city council, asking me to draw this point to the attention of the House of Commons:

"the increase in the number of tenants in rent arrears rose . . . by 6 per cent., which represented a rise in monetary arrears of £140,000"

in the period in which we have had a reduction in housing benefits. I am asked to draw to the attention of the House

"this increase in the amount of rent arrears, which is a direct result of the reduction in housing benefits which has made more tenants responsible for paying their water and general rates."

So the burden will be borne by many local authorities which are not in a position to bear it.

I could read out to the House many cases similar to those that were read out by my hon. Friend the Member for Livingston. One particular case is very important. It involves a constituent with injury who claimed supplementary benefit in 1984 but was not entitled, as his income exceeded requirements, even though those included high rate heating addition and diet, the cost of extra baths and a lower-rate diet for his wife. However, he was awarded housing benefit and housing benefit supplement by the local authority. When housing benefit supplement was abolished, he was then entitled only to housing benefit. As a result, he was liable to pay approximately £10 a week more for rent and general rates. Income support replacing

[Miss Joan Lestor]

supplementary benefit was not payable, as it was argued that his income exceeded requirements. Therefore, his total weekly reduction is now about £12 a week.

The DHSS in Salford said that this was very disturbing, but as far as the regulations are concerned, there is very little that it can do to counter it. I have asked whether he will be entitled to transitional payment, but I am told that on the basis of the guidelines he will not. There are many others, including pensioners and disabled people. A mentally handicapped person who is rehabilitating herself and has found a small job is now worse off than she would be had she remained in residential care. A pensioner receiving £40 a week retirement and industrial injury pension is now having to pay £15·90 towards his rent and rates instead of £1·74 before April.

I could go on reading out such cases, as I am sure we all could, but we have not gone around the country looking for them. Details arrive in our postbags, and they come to our constituency surgeries. I do not believe that Conservative Members have not experienced similar cases, and I do not understand why they are not defending their people. Right across the country, those who can least afford to meet the problems and pay the money are being discriminated against. It is an absolute disgrace.

As I said at the start, most of the people in that situation in my constituency were already in need. I object to the hon. Gentleman's distinction between "real need" and need: they were not scroungers. They were not getting something to which they were not entitled. By virtue of the kind of constituency that I represent, they were in need, are in need, and will continue to be in need.

The hon. Gentleman dealt with transitional payments in a cavalier fashion—as though they were flowing well and people's needs were being met. He did not answer the question about how many people had received transitional payments. He did not answer the question about what guidelines will determine what people are entitled to. Many people in my constituency and in other constituencies will be pushed into greater poverty. They were already in poverty, and that poverty will now be greater. As far as I can tell, despair is moving to deep distrust and misery. It is reminiscent of what happened in the 1930s. Poor people will get poorer, while those who have money will get richer. That is an absolute disgrace.

4.50 pm

Mr. John M. Taylor (Solihull): There are three acknowledged staples of life—food, clothing and housing. Food and clothing are predominantly provided by the private sector. There is variety, choice and good standards. There is a much larger public sector component in housing. That is why that staple has always been hedged about with political controversy and argument. It is part private, part public, and inevitably and understandably political. Among political contentions there have been disputes and debates about state and municipal intervention in the cost of housing. General assistance has taken two traditional forms. Tax relief on mortgage interest has benefited the home owner. Subsidised council housing has benefited the municipal tenant. Again, there is a kind of political counterpoint in the two general forms of housing assistance.

Mr. Jim Cousins (Newcastle upon Tyne, Central): Does the hon. Gentleman agree that more than half of owner-occupiers do not benefit from mortgage interest relief? They are owner-occupiers, usually elderly and usually on low incomes, who bought houses way back in the past and have paid them off. Therefore, they do not benefit from mortgage interest relief, and are dependent upon the housing benefit system, in common with all the other people about whom the hon. Gentleman is about to talk.

Mr. Taylor: It might oblige the hon. Gentleman if I concede his contention that not all home owners have the benefit of mortgage interest tax relief. That point must be self-evident. I do not know the exact proportion. I was endeavouring to be fair to an Opposition Member and let him comment on my somewhat undeveloped remarks. I was merely giving the background to financial intervention in housing, and showing that it had taken an essentially political form. On the one hand, by their origin and development, certain benefits tended to favour home owners and, on the other hand, certain other kinds of assistance helped municipal tenants. They are general assistances.

Specific assistance, which is directed to the individual rather than to his ownership or tenancy, has grown out of rent and rate rebates that were initially administered by local authorities. Furthermore, in the earlier stages, various local authorities introduced rebates according to their own rules. There was a different pattern of rules for rent and rates rebates before they became part of a national structure. Another origin from which specific personal housing assistances were derived were housing and rental additions, which were part of the national assistance scheme. That was one of the original principles of the welfare state, and a precursor of what we now call supplementary benefit. Payments of specific help were intended for the poorest members of society, and quite rightly so, and they were invariably means-tested.

We can be sure of one thing, and that is that, with every proper and supportable intention, those who devised the systems to help the poorest people cannot possibly have contemplated that, by 1987-88, amid quite admirable levels of general prosperity, qualifiers for "the neediest need" would have increased to one third of the population. In the words of a satirical newspaper, "Shomething wrong, surely."

I admit that it is easy to point out that something is wrong. One can mock a regime by highlighting anomalies —some hon. Members have made careers out of it—but, by any admission, it is a great deal harder to replace an outworked system with a new one that will be proof against all the old criticisms, cost less to operate, be much simpler to understand, and command instant universal respect, acclaim and even affection. They never found El Dorado, and they will not find such a benefit system either.

Over the course of time, I have learnt that man-made benefit systems are inevitably arbitrary. It is because they are man-made. They follow no natural law, because there is none. Instead, they follow a series of definitions. That is as true of education grants as it is of invalidity allowances and housing benefits.

One critical thing about definitions is that they describe qualifiers, but that is not the most critical thing that they do. The most critical thing that they do is to describe and define non-qualifiers. That is the original sin of man-made

arbitrary benefit systems. Their public face—their appearance from the street—is one of instruments of exclusion. Some people are only just excluded at the margin, frontier or boundary of the definition. They are the truly marginal cases.

Woe betide anyone who thinks that protestations about marginal cases can be bought out or paid off by pushing the frontier outwards a little, slightly extending the definition, or moving the margin. All that one gets for that is a new, larger category of marginal cases who were previously resigned to being some distance from the definition—even content to be so—but who now see themselves as only just outside the adjusted definition. They are a new set of near-qualifiers, who resent what they are only just not getting.

It would surprise me if the Government expected to win battalions of friends by introducing benefit system reforms. But if it is the Government's realistic purpose to tackle systems that have outgrown their original Good Samaritan intention and strength, they will gain respect for doing so, and hon. Members will support their amendment in the Lobby tonight.

4.59 pm

Mr. Charles Kennedy (Ross, Cromarty and Skye): The Minister is popular and respected in the House, even if hon. Members do not always agree with his policies, but in response to the characteristically excellent and incisive speech of the hon. Member for Livingston (Mr. Cook) —this is an important issue to thousands of people—his speech was an utter disgrace. It was a disgrace to churn out that hackneyed cliché-ridden trash and to give so little information about the workings of the transitional payments centre. Hon. Members on both sides of the House have written to him daily on this matter, so he must be aware that a tremendous amount of anxiety is deeply felt by many thousands of people. He did himself and his Department—what is left of his Department—less than justice.

Although the Minister did not have the gall to refer to the amendment too much, it is one—although the Government have made a complete shambles of the issue —that applauds, welcomes, commends and congratulates. I wonder sometimes how Ministers have the gall to do such things.

Presumably the House appreciates that it is being asked to applaud a cut of £540 million in housing benefit. Presumably Conservative Back Benchers are welcoming the fact that many poor people have to start paying 20 per cent. of their rates contribution, and want to commend the fact that the capital limit that has been introduced, along with the taper that is now in place, will leave many pensioners who would otherwise have qualified for support ineligible. No doubt they are willing to "congratulate"—in the words of the motion—a transitional payments system which had to be introduced because of the original shambles and revolt.

From what the Minister said, we have no clearer idea how long that transitional protection will last. That was a specific question put to the Minister, which he skated around completely. He was asked how many payments had been made, but he did not tell us. If press reports are to be believed and it will take some 31 more weeks at present processing levels to meet the full payments, what will happen to those people whose transitional payments may not be fully met until next February, and who may be affected by further changes a few weeks after that? None of those questions was dealt with by the Minister. I hope that when he makes a further contribution we shall hear more.

The transitional protection scheme was designed to limit the losses of some groups of claimants—for example, the elderly, the sick and those with children. In other words, there will be no extra help for young single people. The Government's thinking comes over time and again —they believe that such people should not qualify for help, because they should be working.

We heard another illuminating speech from Ministers in the Scottish Grand Committee, and the hon. Member for Livingston referred to another one a few weeks ago. If the Minister had been at the Committee, he would have heard the figures quoted for job opportunities for young people. For every 50 youngsters coming out of school in Strathclyde, there is one job. How can it be unnatural for them not to be in employment? The Government appear to miss the fact that unemployment continues to bite deep.

Secondly, the Minister did not deal with the fact that the loss is to be limited to £2·50. It must be said again and again that that £2·50 maximum does not include any loss from the 20 per cent. rates contribution. It is much more tightly drawn than many of those who have applied, or who are seeking to apply at the moment, realise. They suspect that they will have a much more significant cushion in terms of their benefit loss than will prove to be the case.

I wonder to what extent the second round of the advertising campaign—I must have missed the first one —will underline that reality. That would avoid a second blow to morale when people make the application, find out about the centre, expect a transitional payment to come through, and then find out that it is limited strictly to the housing benefit implications and will not cover the other losses caused by the social security changes.

Perhaps this is a matter for a written question, but I wonder how much the DHSS is spending on those two advertising campaigns in comparison with how much was spent on the privatisation of British Telecom or the British Airways advertising campaign.

I very much endorse the comments made by the hon. Member for Eccles (Miss Lestor) about the dubious and distasteful distinction that is now being introduced between the needy, and the non-needy, or the legitimate needy and the less needy, when considering applications for transitional protection payments. The Minister makes a face, but his speech was shot through with such a distinction.

I shall take as an example one of my constituents. A Mrs. Corbett, who lives in Invergordon, came to see me recently. Mrs. Corbett has had housing benefit withdrawn. She now gets only £2·26 a week housing benefit towards her rent. Therefore, out of her £62·11 take-home pay as a caretaker in a community centre, she has to meet her rent of £17·67, minus £2·26 which she is losing, and all her rates. That equals £22·45. Her available income to spend is £62·11 minus £22·45, which works out at £39·66.

If Mrs. Corbett chose not to go to work, she would get a weekly allowance of £33·40. On top of that, all her rent would be met, as would 18 per cent. of her rates. Her weekly disposable income would therefore be £33·40, minus 20 per cent. of her rates—£1·24—which would give her £32·13 a week. For working a 40-hour week in a

[Mr. Charles Kennedy]

low-paid job, and looking after a young family as a single parent, she is the princely sum of £7·53 per week better off. However, that does not include her travel costs to and from work. We were told that the Government introduced this system to help people in that position—people whom the previous Secretary of State referred to as those who are poor with families.

Mrs. Corbett could not believe it when this scheme was introduced. She wrote me a letter in which she stated the position rather well:

"Can this really mean that someone with a good salary and any amount of savings is to be asked for only £2·26 more per week (the full rent and rates) than myself?"

The answer is yes. How the Minister can be sanguine about that I do not know.

Mr. Neil Hamilton (Tatton): I appreciate the problems that the reforms have brought about for some individuals, but I cannot understand what general point of principle the hon. Member for Ross, Cromarty and Skye (Mr. Kennedy) is putting forward. Unless he is prepared to say that there will be no rate of withdrawal, regardless of income, and he is therefore proposing a sort of basic earning guarantee which is non-taxable and unrelated to income, we shall always be faced with the problem of tapers and withdrawal of benefit, which will produce high marginal rates, which will be a combination of tax and withdrawal of benefit. The aim of the reforms is to reduce those difficulties to below 100 per cent. Surely that is an improvement.

Mr. Kennedy: The principle which I am enunciating, which I suspect is shared by Conservative Members with guilty consciences, is simply that social security reforms should not hit the poor, who are at the weakest end of the income spectrum. That is the simple principle which should guide any Government with a sense of morality. The case of Mrs. Corbett is indefensible and was a direct result of the changes. She was exactly the sort of person that was supposed to be helped.

For the longer term, I support full integration of the tax and benefits systems and the allocation of credits which are withdrawable as income rises, so that some of the worst marginal effects would be mitigated far more effectively than under the present system. The Government, however, have not seen fit to pursue that course of action.

Mr. Scott: I am not sure which party the hon. Gentleman is a member of at the moment, but the predecessor party which supported the Labour Government in office, and Opposition Members who were making such a noise earlier, supported a system in which there was a combination of tax and withdrawal of benefit of 112 per cent. We have at least got rid of that nonsense.

Mr. Kennedy: I think that the Government have got it down to 85 per cent. withdrawal in certain categories and 65 per cent. for most others. That is an improvement, certainly, but I do not accept the principle on which the new structure is established. I and my right hon. and hon. Friends opposed it in the previous Parliament and we shall continue to oppose it and argue for our alternative.

I have a second example of a problem. It arises because, lo and behold, the Inverness office has had a computer breakdown. That is hardly unheard of, but as a result, it has been impossible to assess many people's entitlement to transitional protection.

Another constituent—a widowed pensioner with an income of £53 a week—has written to me. At the moment, she pays an extra £10 into her rent account each fortnight in the hope that it, with her old rent payment and her new housing benefit entitlement, will cover the new figure. Given her age, she could well be entitled to transitional protection if the council ever manages to work out how much housing benefit she has lost. It is unable to do that, however, because of computer problems.

My constituent writes:

"I have been paying £10 approximately extra but it is hard going and this very long delay has changed me from a happy person to an anxious old woman. . . . I desperately want to go to visit my elder sister who is ill in Aberdeen but want to be clear before I go. I am a widow over 70 and unfortunately just above the magic figure which would entitle me to supplementary benefit so fare worse than most. My total income is £53 and with heating so necessary in this cold glen every penny has to count."

There are thousands of such people. Dozens come to my constituency surgery each weekend. They are confused, upset and dismayed about what they have lost and what they may still lose. Many are under the false impression that the £2·50 cushion is applied generally and is not drawn strictly for housing benefit. Many are confused because they do not know what they are eligible for. They find it almost impossible to believe the loss that they have already suffered.

The Minister has not answered the salient questions asked by the hon. Member for Livingston—how many payments have there been so far, for how long will the transitional arrangements go on, and what happens to the payments that are caught up with early next February? What steps is the Department taking to salvage this sorry and, from the point of view of the lack of political principle involved, increasingly sordid move towards changing housing benefit, with all the attendant misery?

5.13 pm

Mr. Michael Irvine (Ipswich): Before last April's reforms, one household in three received housing benefit. That statistic shows eloquently that housing benefit was being applied wrongly and that it was being distributed too widely and too indiscriminately.

It was absurd that a person with £30,000 in a current account could still be entitled to housing benefit. It was absurd that a person could have £20,000 in, for example, a low-yielding Japanese unit trust and still be entitled to housing benefit. It was unjust that capital was not taken into account.

Housing benefit cried out for reform. Reform was not just necessary—it was imperative. We needed a redirection of benefits towards those people in greatest need. Such a process inevitably means that some will get less. There is, at that point, a political dilemma. Alterations involve grave risk of political unpopularity.

By deciding to do something about the problem, and by facing the dilemma, the Government have shown high political courage. It is all very well for Opposition Members to mock the Government and to accuse them of callousness and hard-heartedness, but I should have a lot more respect for the Opposition's arguments if they acknowledged that there was a problem and a need for reform. Instead of approaching the issue positively,

however, Opposition Members only put forward the solution of never-ending waterfall of additional public expenditure.

Mrs. Margaret Beckett (Derby, South): I am following the hon. Gentleman's argument carefully. He seems to be arguing that, simply because of the number of people who receive housing benefit, there is a need for reform. Has he noted that one third more people get mortgage interest tax relief? What proposals does he have for reform of that system?

Mr. Irvine: The hon. Lady is trying to deflect me from my argument. As much as one household in three received housing benefit. That shows that the benefit was not being directed effectively.

Mr. David Winnick (Walsall, North): As the hon. Gentleman is arguing that people who do not deserve assistance have received it—an argument which I do not accept in respect of housing benefit—can he tell us whether he has ever received tax relief on mortgage interest? If he has, has he refused it on the grounds that, as a lawyer and a Member of the House of Commons, he does not require it? That being the case, did he refund the money to the Exchequer?

Mr. Irvine: I have received tax relief on mortgage interest. The hon. Gentleman is well away from the point that I am arguing. I am attacking Opposition Members because——

Mr. Winnick: Why did the hon. Gentleman take the money?

Mr. Irvine: —instead of making constructive arguments and acknowledging that there is a problem, they are entirely negative, try to deflect the thrust of the argument and resort to jeers, abuse and personal innuendo. That will not do.

In their heart of hearts, the thinking element of the Opposition, in so far as there is a thinking element in the Opposition, acknowledge the need for reform. They also acknowledge that any reform involves deciding priorities and making hard choices about how to allocate benefits. Such changes involve the danger of political unpopularity.

One of the most refreshing features of the Government throughout their nine years in office has been their readiness to face short-term political unpopularity and grasp the nettle of reform to attain necessary, desirable and long-term objectives. The House is debating another instance of that today.

Inevitably, when there is a major reform on the scale of that which was introduced last April, certain hardships and injustices will come to light. Opposition Members have referred to the volume of constituency correspondence that they have received and to the fact that Conservative Members must have received similar letters. I am sure that we have all received them and that we have all made our points to the Government. What is more, the Government listened and, within a month of the reforms coming into operation, announced the transitional arrangements. Far from being a sign of weakness or retreat, that was a sign of the Government's strength and readiness to be flexible and to adapt. Having listened to their Back Benchers, the Government announced the transitional arrangements and, moreover, directed those transitional measures rightly so as to give protection to pensioners, disabled people, low-income families with children, and single parents.

While congratulating the Government on their political courage, may I, however, say to my hon. Friend the Minister that there is no doubt that some people—a minority—have suffered sudden and proportionately severe reductions in their income levels and standards of living as a result of the introduction of the changes. It is a fair point that a reduction of £7 or £8 a week on an income of £70 or £80 is a substantial hardship. I acknowledge that.

The Government must have in mind two essential points. First, it is important that the Government should press ahead with all possible speed to implement the arrangements for transitional protection. I am glad that the transitional protection unit has been set up and is now in operation. It is important that the unit is given all the forresources that it needs to operate effectively.

Secondly, it is essential that the Government remember that there are some people on modest incomes who, for one reason or another, fall just outside the qualification for transitional protection. In recent months I have sent details of cases where that is so, or where it seems to be so, to Ministers for their consideration.

Careful monitoring of the effects of the changes that have taken place in housing benefit is essential. There are bound to be further instances of hardship and further injustices that require to be remedied. However, if there is careful monitoring and identification of such cases, and if injustices are remedied promptly, the underlying merits of the Government's reforms will become more speedily apparent. The Goverment would then end up reaping long-term benefits from their courage in facing short-term unpopularity and taking the difficult decisions necessary to implement the reforms.

5.23 pm

Mrs. Alice Mahon (Halifax): This morning I received some staggering information about soaring rent debt in local authority housing in my constituency. Because I received this information this morning, I tried to raise the problem under a Standing Order No. 20 application, but was advised that I might be called to speak in the debate.

Before April and the so-called reforms of housing benefit, the record of rent arrears in my constituency was comparatively good, despite the fact that the economy has been through troubled times, and despite the fact that we are an area of high unemployment and low wages. Good counselling, a good committee and a good housing management kept rent arrears at a reasonable level, considering the poverty and distress that people face.

However, since April, when the Government introduced the changes, there has been a serious escalation in rent debt. On 1 April the current debt outstanding stood at £468,582. In the 10 weeks that followed, including one free week, rent debt soared to over £639,000. That increase in debt of over one third was almost certainly due to the reductions in housing benefit.

Mr. Irvine Patnick (Sheffield, Hallam): Will the hon. Lady give way?

Mrs. Mahon: No, I shall not give way. The hon. Gentleman should make his own speech.

Mr. Patnick *rose*——

Mrs. Mahon: No, it is a short debate and I want to get some facts on the record.

A similar pattern of escalating debt is evident throughout the country. It is important that the responsibility for such an increase falls squarely where it belongs—at the feet of the Government. In Calderdale, after 48 weeks of the financial year ending April 1988, 11,344 people—76 per cent. of council tenants—received housing benefit, totalling £236,580. By the 11th week of this financial year 10,077 people—68 per cent. of tenants —received housing benefit, totalling £220,076. That is a loss, not only to tenants, but to the local economy, because that money is not available for other things. Therefore, the level of housing benefit has fallen despite the fact that there were rent and rate increases in 1988 which mask the full level of the reduction.

Those shocking figures do not include housing association tenants, of whom there are many. There is no doubt that housing associations have suffered a similar increase in rent arrears. Many elderly people, and many people who fall into special categories, need to live in housing association accommodation. In fact, there are specific schemes for them.

I should like to read out a couple of cases and to give some figures of some of the people whom the Minister claims to have protected. We know that 6,000 tenants now have to pay a weekly water rate charge, plus 20 per cent. of their general rates. Those are the protected people, but they have to pay. The capital cut-off point was £6,000—it is now £8,000—and the national income from capital calculations for persons with over £3,000 has affected about 1,000 rent rebate claims. Steeper taper adjustments of 65p for rent rebate and 20p for rates rebate applied to every pound of excess income over income support levels have meant reduced entitlement for about 3,000 tenants. I repeat that the people who have lost all that enjoyed the Minister's protection. About 400 single parents not on income support have had their benefit entitlement reduced because single parents are no longer treated as couples when benefit entitlement is assessed. None of those people has £30,000 in the bank, which is what the hon. Member for Ipswich (Mr. Irvine) hinted.

A single male, aged 24, recently came to my surgery. He is employed on a Manpower Services Commission scheme for three days a week. Before April he paid £24·26 rent and received a rebate of £15·19. After April his rent was £26·02. He is worse off by £16·95 per week. That is a substantial reduction by any stretch of the imagination.

I also have the tragic case of a 20-year-old who is unemployed and is worse off by £17·55 per week. He is now in serious rent arrears and is before the county court for repossession. That young man had to leave home because of the depressing situation there. Those are the people whom the Minister claims he has protected. He should be ashamed of himself.

My hon. Friend the Member for Livingston (Mr. Cook) already described the difficulties with the transitional arrangements. According to the information that I received this morning from my local authority, it is facing many problems with people complaining that the forms are difficult to understand. The housing staff in my local authority have concluded that the forms appear to be designed to deter people from applying for benefit. They are under no illusion about that.

I do not know whether we will have any impact on the Government, and I do not believe that they will make the transitional arrangements work to the benefit of the poor. I believe that they are designed to do the opposite. I believe that these arrangements are part and parcel of another attack on local authority housing. Perhaps that was the bonus that the Minister handed to the Prime Minister and to the Minister for Housing and Planning.

The housing benefit reforms represent an attack on local authorities as providers of public housing. Any loss as a result of the write-off of arrears must be borne by the housing revenue account. Obviously the reduction in rent income adversely affects a council's cash flow. Ultimately, that will lead to a loss of interest on balances and, therefore, to rent increases.

Mr. Patnick *rose——*

Mrs. Mahon: I have already said that I will not give way. This is a short debate and the hon. Gentleman can make his own speech.

The housing benefit reforms will damage the provision of local authority housing and will also damage housing associations, which the Government purport to want to help.

The Minister has made the outrageous claim that he wants to protect the poor and that the reforms are intended to do that. The poor know that they are worse off. The young man who I shall see in my constituency next week knows that he will be homeless and that he will not have a roof over his head. People who are getting further and further into debt are aware of that possibility. Because one is poor and on an extremely low income, it does not mean that one is brain-damaged or mentally inadequate. People know that they are receiving less money. The Minister should cease to adopt a hypocritical stance and stop talking about reforms, because doing so insults the dignity of people who are in serious debt and it also insults the intelligence of hard-working housing officials and councillors who are trying to cope with the disgraceful increase in debt that the Minister has deliberately triggered.

5.32 pm

Mr. Tony Favell (Stockport): My hon. Friend the Member for Solihull (Mr. Taylor), in an elegant speech, spoke of the three staples of food, clothing and shelter and the danger of allowing the state to assume responsibility for them.

My hon. Friend's speech reminded me of a conversation that I had with a German boy whom I recently took round the Houses of Parliament. We got on to the inevitable subject of the unification of Germany. I asked him if he thought that that was likely and he said that he thought that it was extremely unlikely. On being asked why, he told me that a completely different philosophy exists in East Germany from that in West Germany. He said that 40 years of Socialism had completely changed the East German people. Although the East Germans originally came from the same stock and spoke the same language, he thought it highly unlikely that the unification would take place. I asked him why he had come to that conclusion, and he told me about two boys who had recently joined his school after coming over the border from East Berlin with their families.

At first those two boys were absolutely delighted to be in West Germany and thought that people were better off, that housing was better, that the standard of living was

better, that they had a great future before them and that things were much brighter and more cheerful. However, gradually they became more depressed because their family background was one of complete dependency on the state. The West German boy had come to the conclusion that those two boys would go back to the grey, drab life from which they had come because of the way in which they and their families had been oppressed for the

Conditions in our country are completely different from those in East Germany. In terms of housing—one of the three staples mentioned by my hon. Friend the Member for Solihull—almost 64 per cent. of the population own their own homes.

Mr. Battle: It is 68 per cent.

Mr. Favell: I am grateful to the hon. Member for Leeds, West (Mr. Battle) for his help.

Despite the fact that 68 per cent. of the population own their homes, one third of all households depend upon housing benefit for help towards the payment of their rent and rates. As my right hon. Friend the Secretary of State for Social Security recently asked: where is the sense in two thirds of the people supporting one third of households to meet their housing costs?

The figures are bad enough for the entire country, but in certain parts of the country the position is far worse. In Manchester, for example, 57 per cent. of all households are receiving housing benefit. In Liverpool, no less than 81 per cent. of council house tenants receive rent and rate rebates. That means that more than four fifths of council tenants in Liverpool receive housing benefit. They are dependent upon the town hall and the state for the most basic human need, shelter. Because they are dependent and unable to move they are held capitive within their grey surroundings. What a joy that is to their Left-wing Socialist masters, but what misery for those dependent upon them.

Those people, deterred from work lest they lose their housing benefit and unable to save to provide for themselves, are caught in a vicious circle of dependency and are enslaved by the masters of Liverpool.

I welcome the first brave steps away from housing benefit, away from state subsidy of housing costs and towards a greater concentration upon family credit. That will encourage poorer families to look for and to stay in work, and eventually it will enable them to escape from their grey, drab housing estates in Liverpool and the other northern cities that I know so well.

Mr. Eric. S. Heffer (Liverpool, Walton): Will the hon. Gentleman give way?

Mr. Favell: No.

With a major upheaval such as the reform of the housing benefit system, there have been some hardship cases and it is to the Government's great credit——

Mr. Heffer *rose*——

Mr. Favell: No, I shall not give way because I wish to develop my argument.

Mr. Heffer: The hon. Gentleman does not know anything about Liverpool.

Mr. Favell: The hon. Gentleman has just entered the Chamber.

Mr. Heffer: So what? I heard what the hon. Gentleman has said.

Mr. Favell: My constituency also happens to be on the Mersey, but my constituents do not depend on Socialist masters to provide for all. Four fifths of council tenants in my area do not receive housing benefit because we have an independence culture and the people are happier. Unemployment in my constituency is now under 7 per cent. Such are the differences between a town further up the Mersey and Liverpool, where the people who run that city insist on having the local population dependent upon them because that keeps them in their fat jobs in the town hall.

Mr. Battle: Is the hon. Gentleman suggesting that the unemployed should have their housing benefit cut to price themselves into work? Is that the logic of his argument?

Mr. Favell: The logic of my argument is to encourage people to go out to work rather than to stay at home.

Mr. Battle: Where are they going to work?

Mr. Favell: It is to the Government's great credit that they have recognised the hardship cases. The hon. Member for Livingston (Mr. Cook) has said that the surgeries of Opposition Members have been packed with people bemoaning their loss of housing benefit, but in the previous breath he was bemoaning the lack of people claiming transitional relief. The only conclusion that I can draw from that is that fewer people are dissatisfied with their lot than the hon. Gentleman would have us believe.

I was glad to learn from my hon. Friend of the Government's determination to continue to roll back the sea of housing benefit, which now reaches one in three households in the United Kingdom. I have already mentioned the unemployment trap in places such as Liverpool and Manchester, which are close to my constituency, but such unemployed people will be relieved by the doubling of family credit.

Housing benefit has other unwelcome effects. For example, as much as 57 per cent. of the population of Manchester depend upon housing benefit to pay their rates. Therefore, there is absolutely no incentive for that town hall to keep its spending down. For that reason, I also welcome the introduction of the 20 per cent. payment of the community charge, which will be paid for by everyone. That will control spending. It will bring sense to our town halls; and the sooner it is introduced, the better. I shall have no hesitation in supporting my right hon. and hon. Friends in the Lobbies tonight.

5.40 pm

Mrs. Maria Fyfe (Glasgow, Maryhill): Like other Opposition Members—if not Conservative ones—I have talked to people in my surgery, who are in tears, who wonder how they will cope with the severe loss of the income that they used to get in housing benefit. Some of them have asked me to explain why this is happening, because they cannot quite believe it. I shall send a copy of today's *Hansard* to every one of them. Then they will understand why this is happening—when they read the speeches made by Conservative Members, whose conduct hardly merits the description of "honourable". They inflict misery on people who have done nothing to deserve it.

We have heard how hard it is to achieve the right balance, and that the objective of the Government is to protect the poorest. I shall spend a few minutes talking about a mere sample of the hardship cases that I have

[Mrs. Maria Fyfe]

heard of in my surgery. These people are only a few of the large number of losers in Maryhill and other constituencies. The Government have said that they aim their benefits at those who need them most. I know of a wide variety of people in all sorts of need. Who will benefit if they do not?

I shall use people's initials, because some of them have expressed the fear that if I name them in public they will incur some sort of disbenefit. That shows the sort of mentality that people get into when they are desperately poor and do not know where the next penny to buy a loaf of bread will come from. They fear to raise their cases because of the sort of people who make up this Government.

Mrs. S, a widow on a pension, will have to find an extra £49·60 a month to pay rent and rates. I know of two couples who are losing their higher pension premium on benefit supplements. One of those couples used to be on invalidity benefit. They changed to the old-age pension, so they are denied the higher pension premium and will be worse off by £48 a month. Another couple, have lost their housing benefit supplement and two chronic sickness allowances. They will be worse off to the tune of £37·80 a month. These people are already on very low incomes. There are pensioners in my constituency who are losing anything from £17·36 a month to £66·20 a month—not the £7 or £8 a week of which a Conservative Member spoke earlier.

One man had a distinguished war service. He proudly showed me the commendation with which he left the Army at the end of the second world war. He loses £38 a month. He told me—he could hardly control his voice because he was shaking with anger and very upset—that this was the reward he got for serving his country and being a hero years ago. Now he was being treated like this.

The Government talk about pensioners who have savings over the limit. One couple have a whole £3,000—a fortune. That is nothing to many Conservative Members, who have their profits from the City and from other businesses on top of their salaries as Members of Parliament. This couple received the £3,000 as a lump sum after a recent retirement. They will have to find an extra £23.60 a month.

I shall now give some examples drawn from the single unemployed. One such person, on income support, is a private tenant in the much vaunted private sector, with a private landlord. He used to receive a sizeable housing benefit but now finds he has much more to pay. He will have to find another £70 a month merely to keep his private landlord in the better standard of living to which he is accustomed.

A single pregnant unemployed woman will lose the transitional protection following the birth of her child, and will have £10 a week extra with which to bring up the baby. As was said earlier, that is the price of a small round in the Bar of the House, and it is the amount with which she will have to bring up her child.

Let us consider the mentally ill and handicapped. There are people in a housing association in my constituency which is especially intended for the mentally handicapped. They will lose benefit because the extra services no longer count towards housing benefit.

I could multiply these examples, but I also want to mention people who have been in receipt of industrial injury benefit. A disabled pensioner had an accident at work and could no longer be employed. He will have to find an extra £74·80 a month. A widow of a man who was injured at work and who eventually died from his injuries now finds that she will have to pay £99·07 more a month. The worst case of all that has come to my attention is that of a man who is disabled and retired following an accident at work. He will have to find an extra £102·36 a month——

Mr. Greg Knight (Derby, North): Will the hon. Lady give way?

Mrs. Fyfe: I will not give way; but I will tell the hon. Gentleman something. I am not here to engage in a polite debate, as if this were university debating club. I am here to speak for my constituents, who have no voice of their own—but it will be heard today. I urge my hon. Friends not to make fine speeches—they are wasted on Conservative Members. They should just list case after case of the kind of hardship that people are suffering. They should give the House the facts. The Government keep on saying that there must be balances, that some will benefit and some lose. We are listing case after case of those who lose——

Mr. Knight: Will the hon. Lady give way?

Mrs. Fyfe: I shall not. I have no time for the likes of people who can do this to the poorest among us. They can go and make their own speeches.

If all these people are losing, who gains? We should all speak for our constituents who have no voice of their own. El Dorado? That bunch on the Conservative Benches must be joking. It is far from that: it is a living hell for the people we are talking about.

5.48 pm

Ms. Diane Abbott (Hackney, North and Stoke Newington): Conservative Members have tried to justify the changes in the social security system, particularly the changes in the payment of housing benefit, by complaining that one in three households get housing benefit. When we point out to them that almost one in two households get mortgage tax relief, they have nothing to say. It is entirely characteristic of the Government that when the poor get money it is a problem, but when the rich do, it is a political advance. If the problem is so serious—if it is an ipso facto problem—why have the Government nothing to say about the arrangements for paying mortgage tax relief?

A Conservative Member bravely said—it may have been an attempt at a pun—that the Government would reap long-term benefit from the changes. I do not know about that, but on the evidence of the hundreds of people who have written to me or seen me in my surgery I think that people in Hackney will reap long-term proverty from the changes—in many cases, ill-deserved poverty.

Many of those who come to see me are pensioners. We have heard many sneering remarks about the poor from Conservative Members, but many of the people who have suffered under these housing benefit changes are pensioners who have contributed all their lives to occupational pensions and who now find themselves, despite all the brave words about transitional protection, having to pay £5, £6 or £7 a week more out of incomes as tiny as £30 or £40. What long-term benefit will accrue to

them? It is as if 50 or 60 years of work, service and contributions count for nothing. They speak of paying in for many years and now having the money taken away from them.

I should like to put some questions on behalf of those people mentioned by my hon Friend the Member for Glasgow, Maryhill (Mrs. Fyfe)—people who cannot speak for themselves. Exactly how many staff are in post in the unit in Glasgow? When can the people who have applied up to the end of this month expect to be paid? People in Hackney want to know the detail about the operation of the transitional unit. While the Government are making press statements and statements in the House, people in my constituency are running up rent arrears, and now they cannot pay. Old people are terrified by the threat of eviction. They do not want to know about the Government's press release but about how the unit is working and how soon they can expect to get their money.

I should like to know exactly how long the transitional rent arrangements will apply. That is another question put to me by people in Hackney. I understand that there was a recent announcement about new protection under the arrangements for people on income support. Who will be able to claim protection? There is a great deal of confusion about that.

In my constituency, 5,000 people have lost over £5 in their heating allowances because in the past Hackney used its discretion and was quite generous to old people in its heating payments. What will be the cost of newspaper advertising and the printing of the forms for these arrangements? Presumably the announcement means that the forms will have to be reprinted and new advertisements placed. Would that money not be better spent on housing benefit? Do the Government propose to repeat their advertising campaign?

It is all very well for Conservative Members to talk in generalities and to speak about incentives to go out to work. They talk in high-arching terms of the enterprise culture. Hackney is one of the poorest areas in Britain and I cannot talk in generalities, in wide-ranging terms or in the abstract. I can only talk about the hundreds of cases of real loss and poverty and about the fears that I deal with as a result of the Government's change in housing benefit. I want specific answers to specific questions, because public relations rhetoric will not put food on the tables of my pensioners in Hackney.

5.53 pm

Mr. Neil Hamilton (Tatton): I am sorry that the hon. Member for Ashfield (Mr. Haynes) introduced an unfortunate party political note into the debate, when he sought to advance the proposition that, because very few of us were in the Chamber to listen to the debate Conservative Members did not care about the poor. I apologise to the House for having to pop in and out of the Chamber. That was because constituents and others had come to see me about a variety of matters, basically to do with the Barlow Clowes affair, and I felt that it was right to see them. I should like to correct the record. A majority of Conservative Members are in the Chamber at the moment, and to advance propositions such as that advanced by the hon. Gentleman does not help us to understand the problems of poverty or to cure the inefficiencies of the social security system. We have a long way to go to achieve that.

I am sorry that the hon. Member for Glasgow, Maryhill (Mrs. Fyfe) did not allow my hon. Friend the Member for Derby, North (Mr. Knight) to intervene in her speech. We are not here just to make set speeches into microphones. The hon. Lady should seek membership of inferior assemblies, such as the one in Strasbourg, if she wishes to operate in that way. My hon. Friend wanted to put a point to her and she refused to allow him to do so. If we all took that attitude it would mean the end of parliamentary debate.

I listened to the cases that the hon. Lady described and would have liked to ask her how many of those cases have been reconsidered in the light of the transitional arrangements that have been announced. It seems likely that the transitional arrangements will cover a great many of them.

Mr. William McKelvey (Kilmarnock and Loudoun): A great many people in Scotland applied for transitional benefits, but encountered difficulties because no forms were available. Eventually they got the forms, and two weeks ago I asked a Scottish Minister to name one person who had received a transitional payment, which, after all, is to relieve hardship. He could not supply one name. I put down a parliamentary question asking for the names or the numbers of those in Scotland who had received transitional benefit. The Minister wrote to me saying that he could not do so at the time and that he would reply further at the earliest opportunity. He has failed to do so. May I assume that no one in Scotland has received transitional benefit and that people are suffering hardship because of massive reductions in benefit? Perhaps the hon. Gentleman can answer that question.

Mr. Hamilton: I do not know whether the hon. Gentleman is criticising the public sector and thinks that we would do better to contract out or privatise. It may well be that he is correct. I am not in possession of the facts, and I am not sure whether he is. I am not prepared to attempt to answer the question that he asked without hearing the other side from the Minister concerned.

It is extraordinary that, when speaking about the effect of the housing benefit reforms, Opposition Members are unable to agree that the social security reviews have bestowed significant advantages on people. Nobody denies that under these reforms there are losers. Constituents have come to me with problems similar to those described by Opposition Members. I am not unaware of the problems of poverty, as Opposition Members seek to say.

When we look at the overall effect of the reforms, the whole package—and that is the only fair way to look at it—we see that nearly nine out of 10 people on benefit are now receiving the same amount as before, or are getting more money. Even after taking account of inflation, 57 per cent. of those on income-related benefits, such as housing benefit, are better off, or no worse off, including 81 per cent. of sick and disabled people, 77 per cent. of couples with children and 60 per cent. of single parents. Although there have been losers, there are significant gainers, and they outnumber those who have lost.

Mr. Tony Banks: No doubt the hon. Gentleman accepts that we have not made up these examples. We are only responding to people who come to us and say that they are worse off. We take no pleasure from giving these examples. Will the hon. Gentleman tell me why anyone previously on supplementary benefit should be made worse off? Even if

[Mr. Tony Banks]

there were only one, that would be grounds for complaint. He knows that many thousands are worse off. Why should anyone be worse off?

Mr. Hamilton: I shall come to that later in my speech. My hon. Friend the Member for Ipswich (Mr. Irvine) gave cogent examples of cases where, under the old rules, it could hardly be fairly stated that all recipients of benefit were justified in claiming it. I am not saying that individual examples should be quoted across the Chamber, but some people might be described as deserving cases. In any big reform of the social security system, if we guarantee that no recipient will lose, we will not be able to make sensible reforms that introduce more accurate targeting according to need. Unless we face the problems that the Government have at least partially faced, we shall not be able to sustain the system of social security that has been built up over the years in an ad hoc way without any centralised thought behind it and with very little rationale.

Mr. Robert Hayward (Kingswood): Does my hon. Friend agree that the changes to which he is referring emanate from a level of expenditure by the state that is dramatically higher than the level that we inherited in 1978-79? When we are talking about the changes, we must bear in mind the massive improvements that the Government have introduced over the past few years.

Mr. Hamilton: I entirely agree. Opposition Members talk of savage cuts in the social security budget, but they must be totally unaware that this year the social security budget is in excess of £50,000 million. Even after the changes that have been announced, although we are saving about £600 million on housing benefit, £650 million extra is being spent on family credit and income support. We are seeking—no one is saying that we shall succeed in every case—to target the expenditure more accurately on those who are most in need.

Mrs. Beckett: With respect to the hon. Gentleman and his hon. Friend the Member for Kingswood (Mr. Hayward), if they go back to the Whips Office they will find that they have been given the brief for the debates that we had last year and the year before, not the brief for the speeches that they should be making today.

Let me correct the figures given by the hon. Member for Tatton (Mr. Hamilton), which are completely inaccurate. There is no way in which there are more gainers than losers from the so-called reforms. Even the figures given by the hon. Gentleman for people who stand still are inaccurate, although I accept that they are Government figures, so I do not altogether blame the hon. Gentleman for that. However, his figures for increased expenditure on family credit assume, for example, a vastly greater take-up of family credit. That is not money being spent now; that is money that the Government say will be spent. In fact, the take-up of family credit is running at half what the Government expected, so all the hon Gentleman's figures for increased spending are totally illusory and flawed. I suggest that he goes back to his hon. Friends in the Whips' Office and has a word with them about the Trade Descriptions Act.

Mr. Hamilton: I cannot accept what the hon. Lady says, because the Government have laid down a planning total that is available for spending on social security benefits if those who are entitled to them take them up. I fully accept that in the past the take-up rate on many social security benefits has been inadequate. That has been one of the products of the complexity of the system. People simply could not understand the benefits to which they were entitled. That has been one of the primary causes of poverty. It is not that Governments of all persuasions have not wanted to assuage poverty, but that the huge, conglomerate social security system that has grown up ad hoc over the years has become far too complex for ordinary people to understand. They are intimidated by it.

Mr. Greg Knight: Is there not another point at issue, which the hon. Member for Glasgow, Maryhill (Mrs. Fyfe) did not address, namely, that some of the examples given to the House tonight have been of people with savings? Will my hon. Friend tell the House why someone who has substantial savings in excess of £8000 should look to the taxpayer before using his or her own resources?

Mr. Hamilton: I entirely agree with my hon. Friend. I confess some astonishment at the remarks of the hon. Member for Hackney, North and Stoke Newington (Ms Abbott) in that respect, because the proposition that she appeared to be advancing was that, regardless of the level of savings, a person should be entitled to housing benefit and there should be no withdrawal rates or tapers of any kind. If ever there was an anti-Socialist proposition, it seems to me that that is it. I would welcome the hon. Lady to our side of the House with pleasure, but it appears to me rather peculiar for somebody of her political persuasion to imply that if a person has savings he or she would still qualify for the benefit when there are people on low incomes with no capital who are inadequately provided for at the moment.

Ms. Abbott: Will the hon. Gentleman accept two points? First, no Opposition Member is saying that there is no level of savings at which a person's housing benefit should be reviewed. We are drawing the Government's attention to the failings of the taper currently in operation. That is not a party political point. All the interested voluntary organisations have made similar representations to the Government.

Secondly, will the hon. Gentleman use his imagination and consider the state of mind of people in their 60s and 70s who, all their lives, have been taught that they must save against a rainy day? They are now faced with a Government who tell them that they have no option but to run down their pittance of a saving. If the hon. Gentleman has not met those terrified old people, I have. It makes no sense for a Government who make a virtue of thrift and acquisition above all other virtues to tell people in their 70s, who hold that virtue dear, that they must run down their savings to nothing.

Mr. Hamilton: I vibrate to the hon. Lady's theme, but I am sure that she would not be able to be more specific about the level of savings that she would take as the point at which withdrawals would begin and about what the tapers would be. Although she agrees with my general proposition that there should be a point at which benefits should be withdrawn, she has not been candid enough with the House to confess what the figure should be.

The rent and rate tapers that we are debating today are a significant improvement on what they were before. As the hon. Lady will know, the rent taper has been changed

from 33 to 65 per cent., and the rate taper from 13 to 20 per cent. The starting point for calculating benefit under the new scheme is 100 per cent. of rents and 80 per cent. of rates, rather than 60 per cent. as it was before. That is a significant improvement for people on low incomes with small amounts of capital.

Similarly, to answer the hon. Lady's charge that the Government are introducing a disincentive to save, I should say that we are liberalising the capital rules. Previously, any interest that was received over and above the income on a capital sum of £3,000 was subjected to the withdrawals and tapers. We have now introduced a scheme whereby the interest on the first £3,000 is disregarded entirely, and a person does not lose the benefit entirely, until the sum of £8,000 is reached. That is far more reasonable, because the rate of interest that is assumed on a sum of between £3,000 and £3,250 is 1·6 per cent. No one in this country in his right mind is investing his money and receiving only 1·6 per cent. interest on it. Even on the figures that the Government have chosen to take for the withdrawal of benefit, we are being generous to people and taking only a small portion of the income that they receive as the cause of the reduction in their benefit.

All those are compromises. We can all make claims for different figures, capital limits, tapers and withdrawals. An argument could be constructed for any of them, but it is disingenuous of Opposition Members to criticise the figures that we have chosen, without providing figures of their own in return so that we can subject them to the same criticism that they throw at us. That is the weakness of the Opposition. They will not come clean with us in the way that we, as a Government, have come clean with them.

I welcome the housing benefit review and the changes that have been announced. I welcome also the transitional arrangements, because it is wrong for significant alterations in people's expectations to occur in too sharp a way. That is why I thought it was wrong when Sir Keith Joseph, now Lord Joseph, introduced changes in student grant entitlements in 1985. People had not been able to build into their expectations the changes that were announced. Although I am in favour of making the changes on a long-term basis, there should be a period when we can work ourselves into the new system. That is only fair and just, and therefore I welcome the Government's desire to make the changes that we are debating.

Mr. Tony Banks: How long will that period last?

Mr. Hamilton: We can argue about that. It is much better to take the view that we should monitor how the system works, the take-up levels and how great the need is, and then adjust the system in the light of experience, rather than take a theoretical view at the start and make hard and fast decisions that may turn out to be wrong.

Mr. Winnick: I echo all the views put forward by my hon. Friend the Member for Hackney, North and Stoke Newington (Ms. Abbott) about the hardship and misery that has been caused by the change in the housing benefit regulations. Does the hon. Gentleman receive tax relief on his mortgage interest, or has he decided to refund that sum to the Exchequer? Surely on his income, which, as I understand it, is not exclusively parliamentary, he does not require any such financial assistance.

Mr. Hamilton: I have a mortgage and I claim tax relief on the maximum amount allowed of £30,000. Is the implication of the hon. Gentleman's remark that the Labour party is now in favour of the abolition of mortgage interest relief? Again, the hon. Gentleman—whom I would dearly love to see on the Opposition Front Bench; I cannot think why he has not been promoted, nor why I have not been promoted, because we could make a double act of this—makes a disingenuous point. If we were starting from scratch, we would not introduce mortgage interest relief. It is an anomaly in the tax system that has existed for a long time. However, for practical reasons, neither party——

Mr. Haynes: On a point of order, Mr. Deputy Speaker. The hon. Member for Tatton (Mr. Hamilton) has taken 17 minutes up to now. He knows that there is not enough time for every hon. Member who wishes to speak. Other hon. Members have been present throughout the debate, but he walked in after it had begun and is making a long speech because no other Conservative Members wish to speak. It is completely unfair.

Mr. Hamilton: It is undesirable that Opposition Front-Bench Members should attack their Back-Bench colleagues for intervening in my speech and so protracting it. I am always delighted to give way, because that is what true debate is all about, rather than simply moving from Front-Bench spokesman to Back Bencher bawling out views that add nothing to the debate. The exchanges that we have had across the Floor have brought a great deal of light to the debate, unlike the hon. Gentleman, who merely adds heat and noise, which gets us nowhere.

Mr. Haynes: That is not true. Now sit down.

Mr. Hamilton: As the hon. Gentleman knows, I am always keen to support our democratic parliamentary institutions and to debate, calmly and rationally, matters such as this, which are of great importance to our constituents. I only wish that many more Labour Members took the same view. If they did, I am sure that their party would do much better in the country. I am certainly not attempting to filibuster. I have made most of the points that I wanted to make in an orderly way in a somewhat disorderly way as a result of the interventions of Opposition Members.

Mr. Tom Clarke (Monklands, West): Further to the point of order, Mr. Deputy Speaker. I am sure that the House wishes to assist you in having a genuine debate. Surely it is unreasonable, as well as unfair, for an hon. Member who has not heard all the debate to keep waiting other hon. Members, including my hon. Friend the Member for Leeds, West (Mr. Battle), who have heard all the debate and are anxious to speak.

Mr. Deputy Speaker (Mr. Harold Walker): I hope that the hon. Member for Tatton (Mr. Hamilton) will have regard to the points of order that have been raised.

Mr. Hamilton: I do not wish to be unreasonable. Nothing is further from my thoughts, and I shall sit down shortly. I have been in a similar situation on many previous occasions when Opposition Members have spoken at inordinate length without adding as much light to the debate as my speech has done. I feel for them, and I shall observe the points that have been made.

All I would say about the system that we are defending here today is that we are introducing a simplified system

[Mr. Hamilton]

that will add to the understanding or ordinary people, for whom the system is constructed. It is fairer than the old system. It deals partly with the problems of the poverty trap and it targets more accurately the benefits that are available under our social security system. Therefore, I have no hesitation in supporting the Government's amendment to the Opposition's motion. Conservative Members are prepared honestly to face the problems of the social security system, whereas the Opposition are prepared only to make generalised assertions, without telling us what their proposals would be. They are prepared to attack us without giving us the opportunity to attack them.

6.14 pm

Mr. John Battle (Leeds, West): Government Back Benchers have expressed confusion about particular points that have been made, and that confusion extends to the Government Front Bench. I am glad to see the hon. Member for Fareham (Mr. Lloyd) on the Government Front Bench. The hon. Gentleman has inherited the post of Under-Secretary of State from the fastest moving Minister, as he has been described in the press today, who has moved on to other things.

As we have been reminded, we have said goodbye to paragraphs in the manual and we have now said goodbye to the Under-Secretary of State. However, he has left behind the remains of the debate on housing benefit that I attended, as I have attended every minute of this debate, late at night on 19 July. The Under-Secretary of State might like to recall his colleague to answer a point that arises from something that he said during that debate or ask his Department for a clear answer, because people need to know.

The then Under-Secretary of State was pressed by my hon. Friend the Member for Derby, South (Mrs. Beckett) about the transitional arrangements. He said:

"The transitional protection will run from the beginning of April until 31 July for those who apply after 31 July. The date of 31 July is not a cut-off point for the receipt of applications. I hope that I have made that point clear."

Some of us were surprised by that remark, and when I pressed the Minister further he said:

"We have given that undertaking several times. I said in my introductory remarks that the 31 July date is not a deadline for applications. It is a deadline for transitional protection, which can be paid only up to that date, but applications will be welcome beyond that time."—[*Official Report*, 19 July 1988; Vol. 137, c. 1051-61.]

I am advised that if members of the public telephone the DSS to ask about that reply, they are told that it was wrong. I hope that the Minister will assure the House that it was not wrong. I hope that he will clarify that point, because people do not know what the transitional arrangements are. People may not be put off from applying, but will those who apply after 31 July receive transitional protection only from the date of application and not from 1 April? That could make a world of difference, particularly if the transitional payments cannot be processed until months later, because that will mean that such people are applying after the period of transitional protection so they will not be entitled to that relief. If that reference simply disappears from *Hansard*, it will be a case of Government by Tipp-Ex—rubbing out the inconvenient bits rather than putting before us policies that can be clearly explained to the people whom we represent.

There are only five days to go before the 31 July deadline. Conservative Members do not seem to be aware of the scale of what they simply refer to as anomalies. Leeds has 60,000 council tenants on benefits and 17,000 private tenants, of whom 10,000 receive income support. Originally, the transitional protection did not extend to those who did not receive income support—in other words, 25,000 of those 60,000. Then the Government extended the scheme to those who receive income support, but not to those who receive over 80 per cent. help with their rates, which is the vast majority of that group, nor those who have lost less than £2·50 a week. In other words, they have not lost enough to be cushioned against the changes.

In effect, only 25,000 in Leeds may receive help. According to anybody's arithmetic, there are clearly many more losers than gainers. As I said last week, elderly people are now arriving at my advice surgeries in tears asking why their benefits have been cut for the first time in their lives. They cannot understand the Government's policies.

Mr. Greg Knight: I have been listening carefully to the hon. Gentleman. Will he explain why, if things are as bad as he makes out, on an Opposition day only five Labour Back Benchers are in the Chamber? Is that not a disgrace?

Mr. Battle: I am growing used to the Government's tactics in this Chamber. When Conservative Members do not have an argument to make, they try to slide in a little abuse to keep the debate going.

Mr. Tom Clarke: My hon. Friend was referring to the elderly, but does he accept that the problems he outlines, which are common to most constituencies, suggest that the Government's policies have struck a blow at community care? Is he not surprised that, although the Griffiths report was published the day after the Budget, there has still been no Government statement, no debate, and no understanding of the Government's view of it?

Mr. Battle: Someone has already commented that it seems as though the Government's social security policy is made up day by day. That may now change because the Department has been divided, but we are still looking for clear policies to help people, rather than accepting the fictitious impression given by the Government, which has been reinforced by Conservative Members restating it, that people are being supported. That still does not explain to my constituents where they stand. Before 1 April, they paid £13·60 rent out of their pensions, but then they found that it had been increased to £22·11. It can be argued that the capital rules have changed and that those pensioners will get their money back. However, those repayments will only be backdated to 30 May, not 1 April, which means that such pensioners will lose two months' money at the rate of £8·51 per week. Where do they stand? Why must they lose as a result of the Government changing their mind over a period of three weeks since the original rent regulations came before Parliament?

Leeds city council is currently running a programme to identify cases eligible for transitional protection. However, that programme will be ready only at the end of this week, which coincidentally matches the very date of the scheme's

closure. It seems to many of us that the Government are making up the rules as they fumble along. They produced form RR4, which claimants must obtain and complete before returning it to the Glasgow unit. That unit then sends those details to each local authority, and they in turn fill in form TP3 and return it to Glasgow. Glasgow then sends the claimant a declaration, which must be signed before any payment can be made.

There are two problems with that process. First, form RR4, having barely been distributed, is already out of date because its first draft did not include those who are on income support, but it does now because the rules have been changed. Secondly—and more disastrous for the people whom we represent—claimants are forced to borrow money at high rates of interest so that they may pay their rent while they wait to learn whether or not they will get their money back. As was said by my hon. Friend the Member for Livingston (Mr. Cook), the scheme certainly hits the erosion factor.

In a question for written answer, I asked the Minister whether any account had been taken in the calculations of housing benefit for next year of the rent increases that will result from the implementation of the Housing Act in September. His answer was crystal clear—that housing benefit would not be there to match the rent increases accruing as a result of the introduction of the Housing Act this autumn.

That will mean that in future, the poor in society—I note that the hon. Member for Tatton (Mr. Hamilton), who spoke for so long, does not have the courtesy to listen to the speeches following his, which I assumed was a custom of the House—will have to pay more than one third of their income on housing, which places them in an impossible situation. Those on low incomes will be left with absolutely no margin. There is no question of any problem in implementing increases or extra resources, as has been suggested.

The housing benefit proposals were crystal clear in the Green Paper, "The Reform of Social Security." When the whole process of reform began, the Labour party and many of my hon. Friends pressed for the figures. It was clear from one figure that housing benefit would have to be cut back. That was presented very much in the terms used by the hon. Member for Ipswich (Mr. Irvine), who suggested that people ought not to receive housing benefit, and that, if they did not have a job, the need to get the money to pay their rent will provide them with the incentive to obtain one. The cut in housing benefit—and the Government cannot get out of it now—has come home to roost on the Dispatch Box, and the Minister must answer for that cut, no matter how much he may argue that other changes have made life easier for claimants.

As one pensioner put it to me, the people who will pay the price of those changes can do the arithmetic. Their question to the Government is, "Why can't you do the arithmetic? Why are you spending more on telling the public about Sid or on advertising the 1992 Euromarket than you are on supporting and informing people who are on benefits?"

Mrs. Audrey Wise (Preston): A diabetic constituent of mine, who is aged 75, and his wife will lose £5 per week. He said to me, "This cannot be right." I had to tell him that it is correct in the Government's terms, but certainly it is not right in moral terms. Does my hon. Friend agree?

Mr. Battle: I agree absolutely. The public at large understand that one cannot take money from the poor and give it to the rich, and then claim that one is on the high moral ground. People openly see and acknowledge the injustice of doing so. I would only add this rider to my hon. Friend's observation. Although we present case after case to the Government, they are shrugged off as anomalies or as individual instances, whereas they hallmark a fault in the structure of the changes. It is the structure that is wrong, and we shall continue to challenge and expose it.

Mr. Tony Banks: A whole group of people will not benefit, and I have many instances of them in my own constituency. I refer, for example, to young single people in low-paid work. I could not elicit an answer from the Minister, but what does my hon. Friend think of a single man of 19, having a gross weekly income of £52·56, losing about £14 per week because of housing benefit changes? What am I to say to such a constituent? Should I tell him, "Don't worry, because someone else will benefit from them."? The Minister would not tell me how I should reply, so perhaps my hon. Friend will give me a clue as to what I should say about this vicious and evil Government.

Mr. Battle: What strikes me about my hon. Friend's remark is that I remember that in one of the first weeks of this Parliament, nearly one year ago, a Conservative Member suggested that perhaps the whole social security system ought to be reformed. He did not seem to realise that that process had been going on for years and that the Government set out to reform the system to achieve precisely what some Conservative Back Benchers suggest —a cut in the social security budget, regardless of who pays the price. We all know that those who will pay the price are at the bottom of society. Sadly, we are left to explain to our constituents that that reform is not bettering people but is taking money from the worst-off for redistribution not only in the social security system but also through the tax system to ensure that the best-off in our society benefit from it. That is the difficulty.

I ask the Minister to give a clear and unequivocal statement about the transitional arrangements. Will he assure the House that paragraphs in *Hansard* of the last housing benefits debate will not be rubbed out as a mistake at the Dispatch Box by the former Minister, who has now moved on to another Department? Will the Minister stand by what was said then, or will he tell the House what is the latest situation? Unless those matters are clarified, of course people will remain anxious about whether or not they will receive transitional payments. It is not simply that people have had money taken away from them, but that the Government's proposals to do something even about the margins of that problem are seriously in question.

Let me drive home to the Government a point made to me by a pensioner. The people who pay the price can do the arithmetic. I hope that the Minister is getting his Department to do the arithmetic about all the cases that the Opposition have mentioned this afternoon. Conservative Members who refuse to sit and listen to the debate and who write off our examples—as my hon. Friend the Member for Newham, North-West (Mr. Banks) has said—as if we had invented fictitious characters, should listen to us rather than go into the Lobby tonight to vote against us ostrich-like with their heads in the sand. If they do that, they will be seen to be

[Mr. Battle]

deliberately and blindly voting down the poor into the margins of our society, and they should be held to account in every constituency in the country.

6.30 pm

Mr. Michael Jack (Fylde): I have sat and listened to the debate from the start, and I have paid close attention to the argument by the hon. Member for Leeds, West (Mr. Battle) in his moving address. I acknowledge that he and many of his hon. Friends have considerable knowledge of the subject, and that they have put with passion and care their arguments about the way in which the changes in social security, and particularly in housing benefit, have affected their constituents.

I hope, however, that the hon. Member for Leeds, West does not think that he and his hon. Friends have a monopoly in their handling of these issues, or that Conservative Members are entirely hard-hearted. The present Government have at least had the courage to get hold of the social security system and to recognise the inescapable underlying fact of a decreasing working base and an increasing number of people who are dependent for part of their lives on some form of state benefit.

Mr. Jeremy Corbyn (Islington, North): What about mortgage relief?

Mr. Jack: Part of the Government's policy has been to reduce the standard rate of income tax, and the value of mortgage relief has been falling over a period. Let us put mortgage relief to one side. It may be a way out—*[Interruption.]* If the hon. Member for Islington, North (Mr. Corbyn) would like to make a proper intervention, I shall sit down, but sedentary interventions that have not been thought out are not helpful at this stage. The hon. Gentleman has clearly not thought out his intervention, so I shall continue.

I have paid tribute to my hon. Friend the Minister of State, Department of Social Security for his appreciation of some of the problems that followed the changes in social security. I hope that my hon. Friends will not mind my mentioning what happened when a number of us got together with my hon. Friend the Minister and told him how we saw the first stab at the subject of housing benefit. My hon. Friend listened carefully to what was said, moving quickly and arguing his case well in Government to bring forward the transitional arrangements. It is often said that once Government have decided what they want to do there is no way which they can be moved. It is a tribute to my hon. Friend's powers of advocacy that we are here tonight debating the arrangements.

Let us examine some salient points. According to a Library research note, it is estimated that in the financial year 1988-89 some 3·4 million people will still receive a rebate in connection with rent, and that 5·8 million will receive rate rebates. Despite all that has been said, the Government will be spending some £5·4 billion. That is a good deal of public money. Opposition Members do not often take into account when chastising my hon. Friends on the Front Bench the fact that someone has to pay for it all, and many taxpayers are glad that the Government have had the courage to address the problem.

Mr. Gerry Steinberg (City of Durham): Does the hon. Gentleman accept—or perhaps advocate—that an 86-year-old widow in my constituency, who receives £44 a week in pension, £35 a month in National Coal Board pension and £4·50 a week in concessionary coal allowance in lieu of coal, should now find that the Government no longer allow concessionary coal allowance money to be counted in housing benefit? She must now pay £8 a week extra. Does the hon. Gentleman believe that that old lady should help to pay for the concessions that the Government have supposedly given, or does he think that she should receive transitional help as well?

Mr. Jack: In an earlier debate my hon. Friend the Minister said that he would monitor carefully the way in which the new arrangements were to be phased in, and it is barely six months since he gave us that assurance. I am sure that he will have noted the technical point about the way in which the regulations operate.

When people came to my advice bureau, I observed that much of their confusion was due to the effects not only of increased council rents but of large rate increases. People in Lancashire have suffered from an 18·5 per cent. rate increase. Some of the background details explain why people are complaining about the cost of housing. There is a way out of some of the problems put to us by Opposition Members: to run housing more efficiently and to reduce the costs of local government.

One group has been rather missed out in this debate —the people who bought their own homes and were affected by the £6,000 capital rule. I am pleased that my hon. Friend the Minister decided to change that, because many of those people are now able to gain some benefit. I have been struck by the negative tone of the debate, in which no one has considered whether there are other ways if increasing people's income rather than expecting them to turn to the state for some form of handout. Will my hon. Friend use his Department's considerable powers to see whether there are ways of helping people who have an asset in their homes to unlock it and generate income, so that they can be freed from the dependency culture and given an added impetus?

Will my hon. Friend talk to his hon. Friends in the Treasury? I asked a parliamentary question about the number of people receiving housing benefit who also happened to be taxpayers. Will my hon. Friend ask the Treasury to tip the balance slightly to help such people to stop being taxpayers? The Conservative party has done much to reduce the standard rate of tax and increase allowances, but a little push from my hon. Friend might remove those people's need for housing benefit, thus freeing resources that could then be applied—through my hon. Friend's skills—to deal with some of the cases put to us with such compassion by Opposition Members.

Conservative Members too are compassionate; we are concerned about the factors that lead people to need housing benefit. But we also recognise the need for the social security changes, and we shall support them in the Lobby.

6.38 pm

Mrs. Margaret Beckett (Derby, South): It is right that now, before the summer recess, we should look at what is happening and will be happening to many of our constituents during and after that period. It is also right that we should remember—as my hon. Friend the Member for Livingston (Mr. Cook) said at the outset—that the cut of £650 million from housing benefit payments made in

April is not a mistake, a miscalculation or a misunderstanding, but, as the Secretary of State courteously informed us, a deliberate act of Government policy.

The Minister of State gave us a long list of all the things to which the Government said goodbye in April, but I should like to remind him of an item that he omitted. They said goodbye to 1 million people who were no longer entitled to housing benefit of any kind. The act of taking that money from housing benefit was deliberately and specifically supported by the vast majority of Government Back Benchers, with a few honourable exceptions. I am pleased that so many Conservative Members have defended their Government's policy. They put their names, necks and reputations on the line and said that the Government are right to take this money from people who are suffering.

The Government have alleged that this is a more generous scheme. They say that it costs more now than it did in 1979. There are a number of reasons for that. The number of people who have retired has increased. That is a demographic change. There has been an increase in the number of unemployed people. There have been increases in rents and rates following the cuts in housing support and the rate support grant. For which of those reasons do the Government seek praise in their amendment? They have reiterated that housing benefit is paid too far up the income scale, even though some of the Ministers who have passed before us in dizzy progression at the Dispatch Box knew that the right to housing benefit was lost at far below average earnings, unless rent or rates were exceptionally high.

The next bit of the script, delivered in hushed tones, was that housing benefit went to one in three households. That always worked. It would be unkind to speculate on whether the Government Whips Office holds training sessions for Back Benchers so that it is sure that there will always be cries of "Shame," or other noises off. They were a little more subdued today than they had been in the past.

Finally, it has perhaps begun to dawn on Conservative Members that if one household in three is receiving housing benefit, many of them must be in their constituencies. It is notable that those who cried, "Forward," when they heard that magic statistic in the past soon cried, "Back," when they realised how many of the losers live in their own constituencies.

The Minister of State accused us of scouring the country looking for victims, but they came to us. I am confident that all my hon. Friends and even Conservative Members remember at least one of those who stepped forward—a pensioner who did not understand why the cuts had been made. Nobody had told her. The Prime Minister was utterly shocked and dismayed to discover at her constituency advice bureau that pensioners in her constituency were losing large sums of money.

The Government say that three years of meticulous planning went into the changes and that they were all carried out under the eagle eye of the woman who misses nothing. It looks as though the Prime Minister suffered from a severe case of unpredictable memory loss. Such memory losses are always triggered by serious Government difficulties. It is a form of anxiety neurosis for which the right hon. Lady should seek medical advice. Either the Prime Minister was incompetent because she did not know what the Government were doing, or her staff failed to warn her that this issue would cause her the most difficulty.

There is another possible explanation. Perhaps the Prime Minister hoped that her constituents would blame the local council in whose name the bad news would be sent forth. It has worked often enough in the past. Up and down the land, councils of all political colours have carried the can for cuts dictated by the Government. As with major crimes, the police nail the small fry but the bigger culprit continues to enjoy unscathed his large house and fat income. That explanation fits the evidence.

For three years, while the Opposition and a few very honourable Conservative Members, as well as housing and social security experts across the country predicted the losses that people would experience, the Government remained utterly indifferent. Even in the week after the cuts were made, the Government did nothing and said that they would continue to do nothing. It was only when they realised that they were getting stuck with the blame for their actions that they panicked and rushed through the emergency package.

Ever since, they have loudly congratulated themselves on their wisdom and generosity. Was it wisdom to give back £100 million that they should never have taken in the first place from the most vulnerable groups in the community? The Minister of State said that he thought that the Government ought to be given credit for giving back a bit of what they had taken away. Were the Government generous to keep the other £550 million? Would the Minister be grateful to a mugger who gave him the bus fare home?

Even with this much vaunted transitional protection, the scheme is still in something of a mess. My hon. Friend the Member for Leeds, West (Mr. Battle) referred to the complicated system that local councils and the transitional payment unit have to follow. My hon. Friend the Member for Hackney, North and Stoke Newington (Ms. Abbott) referred to a recent answer to a parliamentary question about people on income support who had been given transitional protection for some of the losses that they might otherwise have faced. She referred to confusion. My hon. Friend is entirely right: many local authorities are confused. Despite the parliamentary answer, they have not been told officially of these concessions. Confusion also exists at Richmond house. When guidance was sought about the changes, all knowledge of them was denied. We are still experiencing substantial difficulties.

My hon. Friend referred to the very considerable rent arrears that are already building up in local authorities. They will be a problem for local authorities. They will be a problem for local authorities. But what frightens me about the cases that have been identified is that the people who are building up rent arrears are doing so because they believe and understand, based on Government propaganda, that they will receive transitional protection for all losses of over £2·50. I shudder to think what will happen when they realise that their enormous debts may not be paid.

It does not seem to have sunk into the minds of Conservative Members who echoed the Minister of State's self-congratulation that even if we take the Government's defence of their package face value it is still, at best, transitional protection. It escaped the hon. Member for Tatton (Mr. Hamilton) who chided my hon. Friend the Member for Glasgow, Maryhill (Mrs. Fyfe) for giving

[Mrs. Margaret Beckett]

various case histories. Even if they are eligible for transitional protection—and it is doubtful whether all of them will be eligible—their losses will be phased in and they will lose that money. It is just a question of how fast they lose it.

Mr. Neil Hamilton: Will the hon. Lady let us into a secret? Ought there to be a needs assessment for housing benefit purposes? If so, what are the capital limits and the tapers that she would apply to the withdrawal of benefit? Furthermore, what is the estimated cost to public funds of her proposal?

Mrs. Beckett: As usual, the hon. Gentleman dwells on the capital limit. The capital limit will result in very few losses. In this day and age, a capital limit of £10,000 might be just. Most of the losers lose because of the taper, and the loss is extremely severe.

Whatever happens, the transitional protection that we are debating will be whittled away as time goes on, as rents and rates rise and as only last year's income is available to meet next year's prices. It is suggested that that process will not be fast enough for the Government. They might decide that next year the so-called acceptable loss should be £3·50 and that the year after that it should be £4·50. That loss, which is acceptable to the Government, will be on top of next year's rent and rates rises. An income of less than this year's income will have to meet next year's price increases.

Next year's rent increases, as my hon. Friend the Member for Leeds, West said, will be substantial, if the Secretary of State for the Environment has his way. They will almost certainly be enough to wipe out the transitional protection that is provided for most of those who receive it. It will leave them, as the Government intended from the first, much worse off than they were in March 1988.

It may not take as long for the scheme to disappear as many Government Back Benchers fondly hope—that is, not before the villains have left the scene and the public have forgotten the names of the guilty parties. It may be next year or the year after, because the point of transitional protection is not to prevent hardship but to break people more slowly into hardship—and I use the word "break" advisedly.

Soon, other voices will be heard—the voices of the newly unemployed, the newly disabled, the newly separated and the newly retired, who are expected to manage on incomes below, in some cases far below, those that they would have received if only they had had the forethought to be 65, or jobless, or sick last year rather than this. The Government have not yet abolished the welfare state, but they are steadily eroding its foundations.

At my weekend advice bureau, I met an extremely intelligent, competent and sensible woman who has worked all her life and is proud of it and who is extremely independent. She has been unlucky. Her marriage failed after many years and she has become afflicted with arthritis. She has only a small occupational pension in addition to the state pension. She receives no other help or support. She is precisely one of those to whom so many Conservative Members have referred in the debate, who are not in sufficient need to deserve help under this Government. She is a sensible person and has no extravagances, but she tells me that she cannot live on her income. She has been fortunate enough to get some part-time work but it is not easy for her to do it because of her arthritis. She asks me what she is to do and how she will manage when she is no longer fit to work, and I do not know what to tell her.

What would the Minister tell her? There is no doubt that her income will drop substantially if she has to cease work. Would the Minister tell her that the country cannot afford any more because we must give priority to those who are already among the wealthiest? Should I tell her that the Government believe that it is wrong to withdraw income from the wealthy at more than 40p in every extra pound, but that it is right to take 80p to 95p from the poor?

The Government have justified the cuts and praised themselves for phasing them in by saying over and over again that we must not help people who do not need help and that we must liberate them from dependency. The Government define the people who really need help as those who are already wealthy. They define those who do not need help as those who are on low incomes. They use the stick for the poor and the carrot for the wealthy.

It is not even true that the Government set their face against dependency. Through the regulations and guidelines, they are telling people to depend on friends and relatives and to scrounge from them. The Government demand that people ask for charity—anything, as long as they do not ask for their rights in a fair society. That would be too independent by half.

The history of the transitional protection scheme is shabby and sordid. The scheme is inadequate, short-term, short-sighted and a sop to public concern. One could call it the figleaf to cover the Government's shame, except that this Government have no shame and show no justice.

6.53 pm

Mr. Scott: I take the opportunity—the last, I imagine—with the leave of the House, not to reassert the reasons why we introduced the housing benefit scheme in its present form or why we were convinced by rational argument of the need for transitional protection, but to allay some of the anxieties that have been raised during the debate and to answer a number of points that have been made.

I shall first take the opportunity utterly to refute the point made by the hon. Member for Derby, South (Mrs. Beckett), that the Government have in any sense embarked on undermining the welfare state or the social security system. Our budget for social security is now about £50 billion a year. It is the largest single programme of the Government, and it is larger now than it has ever been. I cannot accept the hon. Lady's strictures. If we are to be criticised simply because we want to ensure that the money is spent as effectively as possible, she has chosen the wrong target.

It is important to answer some of the points that have been raised, not least because there are people outside the House who may have been made anxious by some of the comments made by Opposition Members.

Mr. Tony Banks *rose*——

Mr. Scott: I shall deal first with the numbers and statistics involved in the introduction of the transitional protection system, because I was criticised for not dealing with them in my opening speech. Opposition Members have had a great deal of fun with the 68 payments made so far.

Mr. Robin Cook: It is right.

Mr. Scott: Of course it is right: the hon. Gentleman announced the figure and I did not challenge the assertion that that is the number of payments that have been made.

Mr. Tony Banks *rose*——

Mr. Scott: Much more significant for the people who are awaiting help from the transitional protection system that we have introduced are the following figures: first, some 4 million application forms have been issued by the Government and the unit; 119,000 and over have been received back; nearly 50,000 have been sent out to local authorities, asking them for information so that the applications can be processed; nearly 8,000 of those have come back; and more than 1,700 people have been told that they will receive payment.

Those figures show that, whatever fun can be had with the 68 payments, the system of transitional protection is now on stream to provide the help that we intend to provide for those who need it. I understand why there was an element of impatience, but it was right to introduce the system with trained staff and properly thought out arrangements.

Mr. Tony Banks *rose*——

Mr. Scott: I cannot resist the impatience of the hon. Gentleman.

Mr. Tony Banks: I assure the Minister that I can resist him with no great difficulty. Why can he not give local authorities more resources—at the moment they receive only about £5 per form—so that they make their checks that much more quickly? Demands are being placed on local authorities that many of them are not in a position to meet.

Mr. Scott: There were negotiations between the Department and the local authorities, and satisfactory arrangements were made to compensate local authorities for their work. I am sure that the vast majority of them will show as much commitment and enthusiasm in helping us to operate the transitional protection as they did in bringing the housing benefits scheme itself into operation.

We estimate that the scheme that we have introduced will help more than 300,000 people, at a cost of £65 million. Opposition Members had fun with projections about the length of time that it would take to process applications. The information that I obtained on my trip to Glasgow yesterday was that some applications are being dealt with in two to three weeks. The maximum time that the processing takes is about eight weeks, and as the staff become more and more familiar with the operation of the scheme, so we hope that the average time will be consistently reduced.

We are anxious to provide the help as quickly as possible to those whose claims are successful. I was immensely impressed yesterday to hear staff answering the freephone and analysing claimants' circumstances so as to give quick and clear advice as to whether they qualified and, if so, how they could apply for help.

Opposition Members were worried about the date of 31 July. I should make it clear that 31 July is the date applying only to those affected by the change in the capital rule from £6,000 to £8,000. Bearing in mind the publicity associated with the introduction of the scheme, I should have thought that three months would have been ample for someone discovering that he had capital of between £6,000 and £8,000 to apply for transitional protection. Even if people fail to do that, however, an adjusted form of transitional protection will be available to them. In any case, the 31 July date does not apply to help under transitional protection in general, and no one should worry about his ability to obtain help if he applies beyond that date for ordinary transitional protection.

The hon. Member for Livingston urged me to make an announcement about the way in which the transitional protection would be eroded, as he put it. The important announcement about transitional protection has already been made. I made it at the Dispatch Box, and other Ministers have reiterated it. Transitional payments will continue as necessary into future years. The exact arrangements will depend on the extent of the loss and the pace at which people's benefits and other income changes in the years ahead. Increasing prosperity in our strong economy may well affect that.

We will come forward with detailed arrangements before the end of the year, but it is important for us to be able to establish, before announcing those details, a clear idea of the extent of successful claims for transitional protection and the average payments that are being made.

I welcome back the hon. Member for Ross, Cromarty and Skye (Mr. Kennedy) and whichever party he is representing this month. I can understand him missing some of our advertising in *The Sun* or the *News of the World*, but I cannot understand him missing the advertisements which appeared in the Scottish newspapers. We spent some £265,000 on that advertising campaign, and we are about to spend rather more on the second stage of our advertising. I believe that, when we have completed that, there will be no excuse at all for anyone not being aware of the availability of the scheme, which will bring real help to those who need it. I commend the amendment to the House, and I ask my right hon. and hon. Friends to support it in the Lobby.

Question put, That the original words stand part of the Question:

The House divided: Ayes 210, Noes 279.

Tellers for the Noes:

Mr. David Lightbown and
Mr. Kenneth Carlisle.

Question accordingly negatived.

Question, That the proposed words be there added, *put forthwith pursuant to Standing Order No. 30 (Questions on amendments), and agreed to.*

MR. DEPUTY SPEAKER *forthwith declared the main Question, as amended, to be agreed to.*

Resolved,

That this House applauds the Government's recent reforms of social security; notes that these will result in more taxpayers' money being spent this year than if the old system had continued, and spent in a way better targeted towards those in most need; recognises that the coverage of housing benefit had become too broad; notes that after the reforms housing benefit will still be received by more households than in 1979 and at greater real cost to the taxpayer; welcomes the Government's announcement of 27th April that some transitional protection for losses in housing benefit is to be made available to people in vulnerable groups; commends the Government for the speed with which the unit to administer these payments has been set up; and congratulates it on meeting its stated target of making the first payments in July.

Transport Policies

7.14 pm

Mr. Robert Hughes (Aberdeen, North): I beg to move,

That this House condemns the Government's irresponsible transport polices which are careless of the social and economic needs of individuals and communities, have failed the travelling public, put lives at risk and caused great hardship and inconvenience; and calls upon Her Majesty's Government to introduce transport polices which give proper priority to people's needs for safety and service.

Hon. Members who are regular attenders of transport debates have a feeling of deja vu. It seems that almost every transport debate is preceded by a ministerial reshuffle. Therefore, my first duty is to congratulate the Secretary of State on having survived this time. My second duty is to pass on my congratultions to the hon. Member for Enfield, Southgate (Mr. Portillo) on his promotion to Minister of State, Department of Transport.

There will be general and genuine regret at the departure of the hon. Member for Hampshire, North-West (Sir D. Mitchell). Yesterday was a good news-bad news day for him. The good news was that he was offered a knighthood, and the bad news was that he had to go to the Government Back Benches to get it. Quite frankly, he deserves more than that. He vigorously defended successive policies with successive Secretaries of State. I am glad to see him in his place. All hon. Members look forward to his further contributions to our transport debates—all the more so now that he is free of the shackles of ministerial responsibility.

One wonders at the unreality of the Government's amendment. They seem to live in a totally different world from that of ordinary mortals. A cursory glance at press headlines over the past few weeks will enable one to see the story of traffic chaos on the roads, and of the Government being under attack for their failure to preserve their road maintenance programme and being behind with their by-pass programme. There is astonishing chaos at airports, and stories of sit-downs in the middle of Luton airport runway because of great dissatisfaction with what has been happening. Yet the Government seem to pretend that everything is all right.

Our motion sets out the truth. The Government are obsessed with deregulation, privatisation and cost cutting. Quite frankly, that attitude pushes safety and the well-being of the public to the back of the minds of those who run the transport system. One of the most chilling statements to come from the King's Cross disaster inquiry was made by one witness, who said:

"We thought of fire in relation to damage to property and not as a hazard to passengers."

That is a most chilling report, and it was made because of the Government's obsession with deregulation, privatisation and cost cutting. It puts a dead hand on the initiative of those who seek to serve public industries. There is no doubt that the people in British Rail who want to plan for a better future find themselves stifled by constant references to bringing in private capital.

I fully understand why the Government are embarrassed at their philosophical inadequacies and the way in which they have been exposed by recent events. I appreciate that they sought to divert people from the real problems that face them by having a question planted and by giving a response to the North committee report. It was an attempt to divert the attention of the general public from what is happening. Having had a copy of the Minister's reply placed on the board at 6.30 this evening, I cannot be expected to comment on it in full or in any great depth. At a quick glance, I see that there is a lot of sense in it. I particularly welcome traffic light monitoring to stop people steaming through intersections long after the lights have changed to red. It is an extremely dangerous practice.

High technology is mentioned in the North report and in the Minister's response, but there is no mention of who is to pay for it. If it is to be the local authorities, it will be no use asking hard-pressed rate-capped authorities in London—where much of the problem of traffic congestion arises—to find the money to pay for that sort of technology. The Minister must be a lot more positive about where the finance will come from.

The Minister ducked the controversial issue of random breath testing. Frankly, I support it, and I believe that it is an additional arm of enforcement that the police need —unlike the Under-Secretary, who appears to believe that it is a substitute for current enforcement procedures. Perhaps the Under-Secretary will explain the difference between random breath testing and discretionary testing. Discretionary testing would appear to be as unconnected as random testing with the commission of an offence. I hope that he is not trying to smuggle in the sus law in another form—"You look a likely candidate for testing" —because that may cause a problem.

We are concerned about the Government's shortcomings, especially in relation to air traffic control and holiday traffic. We have heard all the old, tired and familiar excuses. It is always someone else's fault. It is the greedy holiday company, the strikes of foreign traffic controllers or the Civil Aviation Authority—anybody or everybody is to blame except the Government. However, the Government have accepted responsibility. A few weeks ago they began to see the writing on the wall, so they asked the Civil Aviation Authority to provide, by September, some plans to prevent the chaos next year. They cannot have it both ways; either they have responsibility or they do not.

We have been worried about air traffic control and safety for a very long time. There are no Ministers left at the Department of Transport who were in office when the Airports Act, which privatised British airports, was considered, but officials will remember that when that measure was going through its various stages we moved amendments to regulate the hours and the conditions of service of air traffic controllers. We were concerned about fatigue, and the amount of work carried out, but the Government steadfastly refused to have anything to do with it. We argued that if pilots had regulated hours of work, so should air traffic controllers. The Government, however, assured us that everything was all right.

Flow control has now been introduced because of a spate of near-misses. It was public outcry and concern about what was happening that brought about flow control. The Civil Aviation Authority and the Government between them bungled the whole issue, because none of this was unexpected. The amount of traffic was expected. As late as 14 July, the Under-Secretary told me that in March the Government had been assured by the Civil Aviation Authority that there would be some restriction on the number of planes flying. I am not quite sure what the sentence means, but it says that the National Air Traffic Services

"anticipated an increase compared to the average delay of 10 to 15 minutes experienced in 1987."—[*Official Report*, 18 July 1988; Vol. 137, c. 339.]

I am not sure whether the Minister was saying that the average was 10 to 15 minutes in 1987 or whether he was expecting an increase of 10 to 15 minutes this year. If it was the latter, it was clearly a misprint, because it should be 10 to 15 hours, which is what has been happening.

The problem has not been caused by an increase in traffic. The amount of charter traffic has gone up only by 2 to 3 per cent. That figure is confirmed in a brief which I am sure many hon. Members will have received from Britannia Airways. Britannia Airways claims that its experience is that by using bigger aircraft, it is running 25 to 30 fewer flights weekly than it was in 1987. There has not been a failure in terms of air traffic control and there has certainly not been insufficient runway capacity. There is plenty of that. It is not inefficient management of the current air space; it is simply that, with the equipment available, the best efficiency will not allow any more traffic to fly.

There are two sorts of solutions to the problem of the long-suffering public whose holidays are being ruined by long waits at terminals and the whole experience of flying. In the short term, we must look for solutions other than those so far proposed by the Secretary of State.

I reject night flights. They are an imposition; they transfer the agony from inside the airport terminals to those people living under the flight path. I venture to suggest that the short-term relaxation on night flights will result in permanent night flights next year. The best solution is to transfer some of the existing air space——

Mr. Toby Jessel (Twickenham): It sounds as if the hon. Gentleman does not know that, since the relaxation on night flights, only two extra flights have gone through Heathrow instead of through Gatwick, neither of which was at night. My right hon. Friend the Secretary of State listened to the representations made on behalf of the people living around Heathrow.

Mr. Hughes: I have heard extravagant claims in my life, but that takes the biscuit. The hon. Gentleman knows that night flights have not so far expanded because airlines claim that, if they fly at night, they cannot get in at the other end. It has nothing to do with his representations; it is a fact of life. I suggest that once airlines get used to the idea of flying at night, changes will be made.

We should transfer some of the space permanently reserved for military aircraft to civilian use. I believe that will provide the space needed greatly to ease the problem. That is not a novel suggestion. In West Germany, they have opened up five new air corridors because of demand. I do not see any reason why that cannot be done as a temporary measure here.

In the longer term, the tragedy is that the CAA is way behind with its investment programme. It became infected by the Government's drive for cost-cutting and it now admits that it should have asked for more money some time ago. At least it has now been converted and is willing to ask for more money. Much more money is needed, and quickly, to speed up the present computer strategy.

Mr. Keith Mans (Wyre): Will the hon. Gentleman give way?

Mr. Hughes: No, I think not, because time is moving on very fast.

The CAA must start to bring forward its plans for expansion of the system, which it does not envisage coming into operation until the year 2000. Much must be done also to train new air traffic controllers by the use of radar simulators. I am horrified to discover that those simulators were called for as long ago as 1964, but there is still none in place.

The Government must move away from the impression that it is said they have given to the charter and airline companies: "Just take the customers' money. It does not matter what you do once you have it. Take it and expand the business, and who cares what happens after that."

I want to refer briefly—perhaps too briefly because of the importance that it warrants—to P and O's safety record. During the whole period of the P and O dispute we vigorously expressed our anxiety about the potential damage to safety because of the company's proposals. Regrettably, since P and O has been sailing its vessels again, our concern has been justified. There have been far too numerous reports about safety codes being breached and, although the Minister has said that those breaches will be examined, many people believe that they will not be examined properly.

Is the Minister aware that on 17 July there was a report in *The Observer* about a fire on the P and O vessel European Clearway? Is he further aware that Mr. John Douglas Ball has sought the permission of the Attorney-General to take out a private prosecution because he is so dissatisfied with the Department of Transport's lack of action? As further information is coming forward every day, would the Minister be prepared to meet seafarers with direct recent experience of P and O to ensure that all complaints are thoroughly investigated? That has to be done to allay the fears.

The prime example of the dead hand of Marsham street stifling initiative is the report by British Rail on the Channel tunnel rail services south of London.

Mr. Dennis Skinner (Bolsover): Has my hon. Friend read the full report about John Ball and the European Clearway, which stated that the breaches of safety were so numerous that John Ball referred to them as a horrifying catalogue of breaches of safety by P and O? When there was an oil leak on the ship five weeks ago, which he reported, the people in charge said, "Stick a bucket underneath and catch the oil." A similar incident resulted in a fire. When he reported the problem, he was so disgusted that no action was taken—although a serious fire had occurred, it was dowsed—that he rejoined the strike. Is it not time that the Government wrenched themselves clear from Jeffrey Sterling and P and O, even though he handed over £100,000 for the general election campaign, and sorted out some British justice for once?

Mr. Hughes: I hear clearly what my hon. Friend says. [HON. MEMBERS: "It is rubbish."] Well, I did hear it. If my hon. Friend the Member for Stretford (Mr. Lloyd) catches your eye, Mr. Deputy Speaker, he will no doubt mention P and O in more detail.

I found the British Rail report on the possibility of dedicated lines south of London to the tunnel apathetic and timid in the extreme. The report illustrates the true extent of British Rail's demoralisation. There is no sense of urgency or initiative, and no projection that increased business can be obtained by aggressive marketing. It is all passive and reactive. It mentions the Martin Vorhiees

[Mr. Hughes]

Associates report and the SETEC report—SETC being a French group of consultants for Eurotunnel. The report says that, in certain circumstances, this will happen and that, in others, something else will happen. There is no decision about which set of forecasts it believes to be true. It ignores Eurotunnel's forecasts.

The hon. Member for Christchurch (Mr. Adley) is showing me his pamphlet, but he will do his own puff on it when the time comes. BR's report ignores the Eurotunnel statistics on the grounds that they are not sufficiently detailed for reliable use. It forecasts that there might be additional growth in traffic as a result of the tunnel. The other reports say that there may be some change in business, depending on economic growth.

Having looked at all the figures, British Rail decides that it will provide for only 80 per cent. of capacity. That means that there will be 55 days when the first choice train will not be available and 28 days when there will be unsatisfied demand. That period just happens to be when we would be trying to get traffic. British Rail is already planning for overcrowding. That makes no sense, and it ought to do something about it.

If British Rail cannot bring itself to consider the matter with some inspiration, what hope is there for the future? Under the heading "Financial Evaluations," at paragraph 13.3 of its report British Rail says:

"The results of the financial evaluations indicate that:—
(a) There is no financial case for providing extra route or terminal capacity in association with the MVA forecasts until well into the twenty-first century."

If BR does not have the initiative, gumption and go to see what is happening south of London, what hope is there for those of us who saw the Channel tunnel as an engine for regeneration of economies in the north of England and Scotland? None at all. On the same day as the report is published, we are blandly told in a press release that there will be another 18 months of consultation with local authorities to see what might be done for services to the north.

It is time that BR stopped being so negative and acquiescent to Government policies without so much as a whimper of protest. Of course, the Secretary of State will say that the picture is not all bad. I can see forming in his mind the words "Heathrow rail link", because he thinks that that is a good one to bring out. The Secretary of State may be preening himself on approving BR's participation in a joint venture with the British Airports Authority for a fast, direct link and glorying in the attraction of private capital.

The press release gives the impression that it is all the result of an independent study by consultants and that the right hon. Gentleman is accepting proposals, but that impression is not the whole truth. The report—the "Heathrow Access Study"—by Howard Humphreys and Partners in association with others, gives the game away, on page 64, when it says:

"The most favourable option of those considered during the final stage of this Study ultimately depends on the Government's objectives. If the sole objective were financial viability, it is fair that any of the schemes considered could be chosen, at a suitable fare level. If the object were to improve travelling times and conditions for all users of public rail transport to the airport, the LUL solution is the only one that meets that condition . . . But the analysis we have performed . . . demonstrates clearly that, if what is required is a scheme which:
— is financially viable;
— is attractive to providers of private capital;
— increases consumer choice;
— benefits the maximum number of people and attracts passengers off the roads".

But there is a contradiction. The report states clearly that the best solution to the general travelling public is that of London Underground Ltd. The report continues:

"then the option which seems substantially the best"—

not the best—

"is the proposal which BR/BAA have developed. On the basis of our own understanding of the Government's objectives we would therefore recommend that this proposal is the one that should be taken forward."

It is not the best. The recommendation is made on the basis of what the consultants think the Government want. That is the problem—the Government are not interested in service or objective criteria. They are interested in sheer dogma. The only solution is that which attracts private capital. Nothing else matters. As long as that is what determines the service that is provided, the public will suffer delays and hardship and, ultimately, I believe that their safety will be imperilled as well.

7.37 pm

The Secretary of State for Transport (Mr. Paul Channon): I beg to move, to leave out from "House" to the end of the Question and to add instead thereof:

'congratulates the Government on its success in developing and implementing policies to provide the public and industry with an efficient transport system, giving both value for money and an improved quality of service; welcomes the increased investment in transport infrastructure which is accompanying a reduction in the burden on the taxpayer; applauds the increasing involvement of the private sector in transport projects; and reaffirms the Government's overriding commitment to the safety of travellers.'.

Although there was not much with which I agreed in the speech made by the hon. Member for Aberdeen, North (Mr. Hughes), there were two things. The first is that I also would like to thank my hon. Friend the Member for Hampshire, North-West (Sir. D. Mitchell) for his magnificent services to the Department of Transport and to the Government. I am grateful to the hon. Member for Aberdeen, North for his comments at the beginning of his speech. The only thing about which I should like to correct the hon. Gentleman is that my hon. Friend left for private reasons. We would have loved to keep him for a great deal longer. He will be sorely missed.

The second respect in which I agree with the hon. Member for Aberdeen, North is that I also would like to welcome my hon. Friend the Member for Enfield, Southgate (Mr. Portillo) as Minister of State. Since I have been in the House, all hon. Members from Southgate have been close personal friends. I think that my hon. Friend will make a magnificent contribution to the Department.

Mr. Skinner: Watch him—he will stab the right hon. Gentleman in the back.

Mr. Channon: This concern for me is very kind.

In our previous debate, the hon. Member for Aberdeen, North said that I would last 173 days. I have lasted a little more than that, but we shall see how we get on.

The motion asks us to condemn what it calls

"the Government's irresponsible transport policies".

I do not think that it is irresponsible to start, as the Government do, with a clear understanding of what constitutes a good transport system—one which is affordable, reliable, efficient and convenient. It must be designed, built and operated with proper respect for the environment, and, above all, it must be safe.

Nor is it irresponsible to draw a clear distinction between those features of a good transport system which are the proper concern of the Government and those which are not. I think that it is the job of Government to set standards of matters of safety and the environment. It is our job to ensure that the nation has a proper transport infrastructure, but that does not mean that every new project has to be funded by the taxpayer and approved in Whitehall. It is our job to ensure that there is free and fair competition between transport operators. After that, it is up to operators to provide the service that the public want, at a price that the public are prepared to pay.

I understand that Opposition Members may not like such an approach to transport policy. They hanker after the old days of interventionism, central planning, state finance, monopolies, and regulation of this and that—in fact, all the old stuff that we had in the past.

Mr. Tony Banks (Newham, North-West) *rose*——

Mr. Nigel Spearing (Newham, South) *rose*——

Mr. Channon: Here they are: regulators every one, subsidisers the lot. I cannot give way to both hon. Gentlemen, so I shall give way to the hon. Member for Newham, North-West (Mr. Banks).

Mr. Banks: Will the Secretary of State accept that where transport operators are competing for finite

Mr. Channon: I shall deal with roads in a moment. Before I finish, I want to deal also with rail investment and with investment in the Underground which, when the hon. Gentleman was one of the leaders of the Greater London council, he was so scandalously incapable of providing —*[Laughter.]*

Mr. Banks: Come outside and I will take you all on.

Mr. Channon: You may have to regulate the hon. Gentleman, Mr. Deputy Speaker.

Mr. Robert Adley (Christchurch): My right hon. Friend has laid down as the criteria for public transport, what the public want and what they are prepared to pay. Does he agree that there is another factor in the equation—provided that that transport does not have detrimental effects on other members of the public?

Mr. Channon: My hon. Friend will recall that I said earlier that environment was a crucial factor. I agree with my hon. Friend and I suspect that I know what he is getting at. I strongly recommend the House to read my hon. Friend's booklet, which should be required reading for every hon. Member. We may have an exam later.

I turn first to the Opposition motion. At least the part relating to maintaining safety standards will be common ground between us. The House must face up to the fact that the most serious safety problem that we have to tackle is road transport. Let us consider the facts. Over 5,000 people were killed on Britain's roads last year. Compared with air travel, motorists run 16 times the risk of being killed; cyclists run 170 times the risk; and motor cyclists about 440 times the risk. It is true that Britain's roads are among the safest in Europe, but I do not derive all that much comfort from that. There are far too many avoidable accidents on our roads and their economic cost and cost in terms of human suffering is unacceptable.

Therefore, we have set ourselves the firm target of reducing the number of deaths and injuries on Britain's roads from 300,000 per year to 200,000 per year by the end of the century. We are taking action on several fronts to achieve that. We are putting emphasis on bypasses and orbital routes to divert traffic around towns which are where 70 per cent. of all road accidents take place. We are working with local authorities to improve road layouts in towns and are diverting more effort into research into the causes of accidents and how to prevent them.

Mr. Richard Holt (Langbaurgh) *rose*——

Mr. Channon: I shall give way to my hon. Friend, but this is the last time, because I must get on.

Mr. Holt: Does my right hon. Friend not agree that one of the most dangerous roads in this country is the A1 north from Doncaster? There is no major motorway to the north-east of England. If my right hon. Friend is seriously interested in cutting deaths, he should give us the motorway for which every political party and every local authority in the north of England is asking.

Mr. Channon: I understand my hon. Friend's concern, which he has often expressed to me. Naturally, we shall consider any representations that he makes and we certainly wish to improve the roads in his part of England. I take note of his representations on that important matter.

We have been accused today of being irresponsible about safety. At this very moment, our current motorway safety campaign is in operation. The police are dealing severely with motorway accidents caused by bad driving and are deeply concerned about their prevention. Our main task must be to ensure that we have the right laws and that they are being obeyed. Today we published our interim response to the 137 recommendations of the North report on road traffic law. We accept the conclusion that the offence of reckless driving should be redefined. We agree that drinking drivers who cause fatal accidents must be punished appropriately. We agree that the penalty points system needs rethinking and we agree in principle to the use of video cameras to detect speeding and traffic light offences. We are pursuing the question of insurance policies against disqualification. We shall now consult the police and other interested parties, and I shall publish our final conclusions as soon as I can.

I turn now to a point which the hon. Member for Aberdeen, North (Mr. Hughes) specifically raised—the question of ferry safety. Mr. Justice Sheen's report made a number of recommendations which we are putting into effect——

Mr. John Prescott (Kingston upon Hull, East): As regulations?

Mr. Channon: Yes, as regulations. I am sure that the hon. Gentleman wants to support us—*[Interruption.]* Thank you very much. I am most grateful, and I am glad to hear it.

Regulations are already in place, dealing with some of the key issues raised in the Sheen report—including the

[Mr. Channon]

procedures to be followed to ensure that ferries do not sail with loading doors open. Other regulations have been drafted and will be brought forward. I am determined that the regulations should be right and I am sure that the House will agree that ill-thought-out regulations will benefit no one——

Mr. Skinner: The Secretary of State is in Sterling's pocket.

Mr. Channon: The hon. Gentleman always says that. I shall ask him who the treasurer of the Labour party is. I suppose that the hon. Gentleman is in the pocket of the treasurer of the Labour party—*[Interruption.]*—and not only in the pocket, but in the flat of the treasurer of the Labour party——

Mr. Skinner: In case the Secretary of State wants reasonable, proper and precise information, I can inform him that I am one of the people who has nominated somebody to oppose the treasurer of the Labour party —namely, my hon. Friend the Member for Edinburgh, East (Mr. Strang).

Mr. Channon: I never thought that gratitude was the hon. Gentleman's most conspicuous quality.

Opposition Members have repeated various allegations that the ferries are being operated unsafely. That is simply not so.

Mr. Terry Fields (Liverpool, Broadgreen): It is true.

Mr. Channon: It is not. Marine surveyors have inspected each P and O ferry before its return to service and have made random spot checks thereafter. They have always found the vessels to be carrying a full complement of properly qualified seafarers. Opposition Members are themselves guilty of irresponsibility in this. During our last debate, the hon. Member for Oldham, West (Mr. Meacher) made numerous allegations about safety matters. None of them has been followed up.

Our approach is the responsible one. Where necessary, we will certainly prosecute if offences are committed. I am already prosecuting in the case of the Horsa. I am not prepared to join the Opposition in a mud-slinging session in furtherance of an industrial dispute with people who pretend to be impartial, but are fresh from their triumphs, campaigning on the picket lines as the hon. Member for Kingston upon Hull, East (Mr. Prescott) was this morning. If offences are committed, we shall certainly prosecute. If there are not—*[Interruption.]* Yes, I am prosecuting the Horsa at present.

Mr. Tony Lloyd (Stretford): What about the Herald of Free Enterprise?

Mr. Channon: The hon. Gentleman entirely misunderstands the situation, and I believe that he does so wilfully. It is for the Director of Public Prosecutions to decide.

Mr. Lloyd: Ah.

Mr. Channon: The hon. Gentleman can go on saying, "Ah", until he is blue—or should I say red?—in the face.

I repeat what I have told the House on many occasions. We shall not hesitate to tackle any offences that are brought to our attention, and reasonable Opposition Members know that to be the case.

I turn now to air safety, which is a major issue, which I want to put in its proper perspective *[Interruption.]* Surely the House is interested in air safety. I want to quote some statistics—*[Interruption.]* Well, not as quick as the hon. Gentleman's hon. Friend.

Over the 10 years from 1978 to 1987, there was one death for every 3·6 billion passenger kilometres flown on British aircraft. That record compares favourably with any other form of transport. I want to quote the statistics, although they are bound to be taken by some as evidence of complacency, which they are not. Complacency would be a sign of real irresponsibility, but it is just as irresponsible to sow unnecessary alarm among the travelling public. Therefore, I want to give the exact facts.

Reports of risk-bearing air misses have dropped from 45 in 1977 to 13 in 1987. Of course there is an element of subjective judgment, but the reporting criteria have not changed and the trend is clear. It is not only a British experience but a worldwide one. I am sure that the House would want to reassure the travelling public, and our main task is to ensure that the air safety trend is sustained. Improvements in aircraft design will probably be the major contributing factor, but the European Community harmonisation of airworthiness certificates will be a significant step forward.

The Civil Aviation Authority plans to introduce a ground-based "conflict alert" system by next summer covering all aircraft flying above 25,000 ft, and it is starting trials on airborne collision avoidance systems this year. In all of that, the CAA has the support of my Department and I am determined to support its efforts to improve air safety. For that reason, last year the CAA introduced the system of flow control in response to growing demands on air space. It is extremely important that the House appreciates that demand.

I see no reason why air safety should not continue to improve, but we must not cut corners on safety to relieve congestion at airports.

Mr. Spearing *rose*——

Mr. Channon: I am sorry, but I must press on.

The House will be aware that air transport has increased in recent years by an enormous amount. Increases in demand were anticipated and catered for by Governments and operators. However, the rapid growth on some routes, especially to Greece and Spain, took every European aviation authority by surprise.

There is no overall shortage of capacity at airports or among airlines. Europe's air traffic control system can accommodate normal traffic levels easily enough. They can even handle the abnormally high traffic levels that are experienced on the most popular routes at peak periods. However, there is little capacity to spare if something goes wrong.

European countries are dependent on each other's air traffic control systems. A problem in one system, whether caused by an industrial dispute or a technical hitch, has an immediate impact on other systems. In recent weeks, we have seen the consequences of that all too clearly.

Everyone understands the frustrations caused by long delays at airports. No one saves up to spend their holidays at Gatwick or Luton; they want to get off to Greece, Spain or wherever. We shall do all we can to help, but there are a number of things that we cannot do. We cannot sort out other countries' strikes, nor must we subject people living

near airports to a night flights free-for-all. I was grateful to the hon. Member for Aberdeen, North for his remarks about that. Above all, we cannot compromise on safety. Within those constraints, we are doing everything possible to alleviate congestion.

As a first step—my hon. Friend the Member for Twickenham (Mr. Jessel) referred to this a moment ago—I have changed the traffic distribution rules so that charter operators can take advantage of spare capacity at Heathrow, on a temporary basis, to help holidaymakers who face hardship. That has already happened.

I have also asked the CAA to report to me on various matters relating to airport use and capacity. I have asked for an interim report in the autumn, when the Select Committee's report should also be available, followed by a full report later. Among the issues on which the CAA will have to report to me are sectorisation, discrimination against general aviation and the priority given to larger aircraft. They are difficult issues.

In the long term, we must increase our air traffic control capacity. The CAA plans to implement its new central control system by the mid-1990s, as part of its £250 million investment programme. It has the Government's full support in that—we have never yet blocked any CAA investment. However, it takes time to phase in a new system, while maintaining a 24-hour service that must be perfect all the time.

Air congestion is not a purely, or even primarily, a British problem. It is a European problem, to which we must find European solutions. The CAA took the lead in establishing a "hotline" that will help Europe's air traffic controllers to improve traffic flows. We have made British equipment available to our German colleagues to help them to participate. We have used our presidency of the Commission to move Eurocontrol into more effective action. To be truly effective, however, Eurocontrol needs to bring together all the nations concerned. Greece has just taken the decision to join Eurocontrol and last week I wrote to Transport Ministers in Denmark, Italy and Spain urging them to do likewise. I have also spoken this morning to my German counterpart about ways of improving co-operation between us.

The Government and the CAA are working together to find practical solutions to the problem of congestion. Airspace is, in the last analysis, a finite resource, but I am convinced that we could make much better use of it than we do at present. We must get much better co-ordination between the air traffic control authorities of Europe. In the next few weeks, I shall devote a great deal of attention to that.

Sir Anthony Grant (Cambridgeshire, South-West): Will my right hon. Friend discuss with Defence Ministers, and possibly his European colleagues, whether there is a possibility of European military using rather less space and making more available for civilian purposes?

Mr. Channon: I have discussed that with my right hon. Friend the Secretary of State for Defence. My hon. Friend will be aware that one of the advantages of our system is that it is a joint one operating between military and civilian aircraft for the control of air traffic space. That gives us certain advantages that are not available to some other countries.

The hon. Member for Aberdeen, North has criticised us for having an irresponsible transport policy, but we have done more for transport infrastructure than any other Government in our history. Since 1979, we have added nearly 800 miles of new trunk roads and motorways.

Mr. Tony Banks: Why not repair the ones that we have?

Mr. Channon: We are going to do that too. When the Labour party left office, it left a terrible legacy of backlogs in road repairs and Underground repairs and improvements. That was the "Banks legacy".

The schemes that we have undertaken cover the whole range of improvement, from short stretches of bypass to the construction of motorways. We have increased expenditure on road building by 30 per cent. in real terms and expenditure on road maintenance has doubled.

The hon. Member for Aberdeen, North, in an extravagant turn of phrase, said that British Rail morale was low, but British Rail has never done better than under this Government—[HON. MEMBERS: "Come on!"] That certainly is true. British Rail has undertaken major projects such as the electrification of the east coast main line. It has carried forward its programme of modernising rolling stock and, since 1983, it has opened or reopened some 80 stations. British Rail has invested nearly £2 billion since 1983 and it plans to spend about £4 billion more in the next five years. We have undertaken a far larger programme of investment in real terms in British Rail than that carried out by the Labour party when it was in office. It pays lip service to the railways when it is in office, but its investment programme in BR was negligible.

Mr. Peter Snape (West Bromwich, East): The same old story.

Mr. Channon: It is a jolly good story, and it is true and accurate.

We have secured the increase in capital investment by keeping a tight rein on current expenditure. We insist on value for money, particularly in the roads programme. Nowadays, contractors complete their work within budget and ahead of time—something that was virtually unheard of in the bad old days. We are no longer in the business of doling out grants for this and subsidies for that. Privatisation, which the hon. Member for Aberdeen, North has laughed at, has led to enormous savings. Industries that used to be dependent on the taxpayer are now paying their own way—and prospering, as the employee shareholders of Associated British Ports and the National Freight Consortium can testify.

In recent years, we have seen imaginative new solutions to long-standing transport problems. Within a few miles of this House is London's flourishing docklands community, represented by the hon. Member for Newham, South (Mr. Spearing). It is served by the Docklands light railway, by the Thamesline riverbus and by the City airport.

Mr. Spearing: The Secretary of State will be aware that the City airport had some problems with the CAA. Is he also aware that my hon. Friends the Members for Newham, North-East (Mr. Leighton) and for Newham, North-West (Mr. Banks) and myself regarded the tests that were conducted at the weekend as invalid? The loads involved were not the same as those that would pertain when the aircraft are operating. That airport was imposed upon us by the unelected London Docklands development corporation. In the cause of safety, will the right hon. Gentleman assure the House that there will be a public

[Mr. Spearing]

inquiry into all aspects of safety, particularly as the runway is close to large centres of population and projected shopping centres?

Mr. Channon: I have no application before me for any change in the present procedures. If there were any they would have to follow the normal planning procedures as the hon. Gentleman is well aware.

All the examples that I have given illustrate another important point—coming up with solutions to transport problems is no longer the exclusive preserve of the public sector. The private sector is playing a much more active role than it has done for many years. The hon. Member for Aberdeen, North has already referred to the largest example of private sector finance, the Channel tunnel. That is the most significant transport project in Europe and it is being funded by £6 billion of private capital. There are other examples, and there will be more to come.

Last week I announced the new rail link to Heathrow —unlike the hon. Member for Aberdeen, North, I believe that that is the right solution. It will be largely privately financed and will provide an excellent service for those who wish to travel to the airport. Next week I shall be attending the Dartford tunnel handover, paving the way for another major private sector transport project. When such projects are brought into the reckoning, alongside Government-funded schemes, it is clear that we are seeing an unprecedented regeneration of the nation's transport infrastructure.

What a contrast there is between the picture painted by the hon. Member for Aberdeen, North and Conservative party policy. The Opposition do not have a transport policy—at any rate none has been published yet——

Mr. Robert Hughes: Yes, we do.

Mr. Channon: Where is it? I looked at the Labour policy review—I spent a weary hour reading it—but there was not a word about transport policy. Transport and defence are too difficult for the Opposition to handle. Perhaps the hon. Gentleman should have lunch with the *Independent*; then we will know his transport policy.

The Government have a clear policy based on clear principles: value for money, efficiency, investment and, above all, safety. We are taking the decisions to put that policy into practice and developing a transport network fit for the next century. The hon. Member for Aberdeen, North and his hon. Friends are living in the past. They have nothing to do with their time but criticise. They have nothing constructive to say. I hope that the House will support our amendment.

8.1 pm

Mrs. Gwynneth Dunwoody (Crewe and Nantwich): I always enjoy watching Conservative Ministers sliding out from under the burden of their transport policies. They bear a strong resemblance to break dancers. The trouble is that their facility, always worth looking at, is not always terribly admirable.

Conservative party transport policy has resulted in making it difficult to get from anywhere to anywhere. That does not apply only to people sitting in airports, but to those who try to use the motorways and the train services. Tonight I shall speak briefly about two important results of Conservative policy of the past nine years. No matter how often they reel off vast numbers of statistics, the Government have no basic transport policy. They have made it clear over a number of years that they have no airport policy, either. In due course the Select Committee will report on that lack of policy. It was clear even from the Minister's speech tonight that the Conservatives are not prepared to plan to make radical plans for the numbers of people using the airports. They are even prepared to try to ignore the immediate results of their inability to face the facts.

There is a real problem with air traffic control. The Minister spoke of flow control and the difficulties at Maastricht. He spoke about the inability of all the other European nations to work together. He did not mention the inability of the Conservative Government to support European control policies, even if that was what they wanted to do. He did not point out that flow policies can at best be only a form of crisis management and were never intended to be the usual day-to-day way of organising traffic into and out of important airports. They were intended as temporary measures and, like a great many other such measures, they are turning out to be all too permanent. When the Select Committee reports, I know that it will have a great deal to say about those aspects of Government policy.

I shall deal first with the deregulation of the buses. My constituency provides a classic case of what happens when basic transport services are entered in a haphazard game of chance. When the National Bus Company was divided up, members of Cheshire county council went to the Secretary of State for Transport and told him that they had evidence that one of the main bidders—indeed, the one most likely to be selected—for Crossville Motor Vehicles Co. had a bad record of managing previous companies. The council members did not make up that information. It was based on decisions taken by the north-west traffic commissioners. When the company had operated in other parts of the north-west it had frequently had its licence to operate reduced in considerable numbers. The Minister listened to all that and said that it was not a matter for him but was the responsibility of the National Bus Company.

It became clear from answers to questions that I asked subsequently, when ATL holdings bought Crossville Motor Vehicles Co., that any problems with the reliability of that company were regarded as the responsibility of the NBC. That is the marvellous double bind. Assets can be sold in any way that people like, and if there is a problem the Minister will say it is not his fault but that of the National Bus Company, which by then no longer exists. So when we want to argue about the quality of ministerial decisions that allow such sales to go ahead, we are told that everything is the National Bus Company's responsibility.

What happened in Crewe was simple and uncomplicated. The company is doing there exactly what it has done before. First, it ran down the number of maintenance engineers. Then it sold off the maintenance garage. Thirdly, it decided to get rid of the central bus station and offer an alternative somewhere outside the centre of town. In other words, that was a classic example of asset-stripping, and that was what we said it would be before these people were allowed to bid for the assets. We predicted what would happen when the legislation went through the House—and that sort of thing has happened again and again.

The safety of passengers is of no concern to the company. If it were, it would not have been before the

traffic commissioners and had its licences reduced as often as it has done. The interests of the people of Crewe and Nantwich are of no concern to the company, either, or it would not have sold off the only town centre bus station that was capable of handling the constituency's needs. Furthermore, the relationship between bus transport and other forms of transport is of no interest to the company. It is not prepared to discuss interlinking or the planning of joint services. The company is one of those that move in, buy up assets, take away as much as they can carry in both hands and then apologise for being unable to comply with the undertakings that were asked for originally, because they cannot—a classic case of the results of Conservative transport policy.

Such problems are not restricted to the buses. The other important employer in Crewe is the railway industry. Time and again we have witnessed the effects of Government policy on the railways. The railways are not important to the Government. The Secretary of State gave us statistics to prove that he had offered the railways whatever investment they wanted, but he never points out that, because the railway services must comply with wholly unrealistic financial targets, basic services are deteriorating at such a speed that most passengers experience difficulties every day——

Mr. Michael Jack (Fylde): Does the hon. Lady agree that the introduction of new electric locomotives on the west coast main line will enhance the service to her constituency?

Mrs. Dunwoody: I have no difficulty in encouraging the building of new locomotives. I trust that the jobs that are involved will not be handed to foreign companies—such as the Americans—or to any other companies that submit interesting but not necessarily 100 per cent. accurate estimates of cost.

When asked to examine what is happening to rail traffic in this country, an independent consultant made it clear that British Rail is planning to turn away 3 per cent. of its customers and that it is running its services in a way that is grossly unacceptable to its customers. The independent consultant NERA, working for the Rail Federation, found numerous examples of overloading and suggested, for example, that between Carlisle and Crewe the overloading factor was 200 per cent. That means expensive seats for passengers—if they are lucky. More often than not they find it impossible to travel in comfort, and they are constantly faced with rising fares and falling standards. Yet we are told not to worry because British Rail is prepared to invest a great deal.

The Channel tunnel shows the quality of planning under the Government. I went to the chairman of British Rail and pointed out that in the Crewe and Nantwich area we have an ideal site for a Customs and Excise facility and for the transhipment of goods. We were told that BR was prepared to look enthusiastically at any plans put before it. There has been no real response by British Rail to the immediate difficulties that will arise when the Channel tunnel is in operation. No decisions have been made. As far as British Rail can see, running times between London and the coast seem to be all right as long as the whole journey is within three hours.

French railways have put an enormous amount of money and effort into providing a first-class service between Paris and the coast. It will be possible to run trains through the tunnel at great speed, but when those trains reach the British coast they will have to slow down to little more than 26 or 28 mph. It seems to be difficult for British Rail to understand that passengers might not be too delighted at that. Even the plans now being suggested by British Rail do not make it clear that it is prepared to move at the speed and with the urgency that will make the difference.

I have heard that the amount of money that the French railways are prepared to invest would ensure that French trains could run as far as Ashford, at which point French railways expect that freight and people would be put on the road. That is not an unrealistic assessment, and it will begin to happen if British Rail is not prepared to improve facilities and to update running times and the provision of rolling stock and locomotives on this line. I see no signs from British Rail that it even understands the implications of this measure.

Mr. Irvine Patnick (Sheffield, Hallam): Having looked at the corporate plan for British Rail I see that it is spending £180 million on new traction and rolling stock on the east coast line. It is also spending money on the west coast main line. To say that it is not spending money is twisting the facts.

Mrs. Dunwoody: If the hon. Gentleman reads what I said, he may understand the point. We know that no matter what British Rail says, it intends to balance the books by getting rid of thousands of railwaymen. That can hardly contribute to the safety and comfort of passengers. it also intends to balance the books in such a way that even the improvement of rolling stock will not be carried out in British Rail workshops, but will be used as a means of offering support and jobs to other countries.

To the Government, transport is way down the line in terms of investment and policies. The passenger is the last person that they are prepared to think about. Whether one travels from Manchester on the Shuttle that cannot get into London airport, or on a train that goes through Crewe and on which first-class passengers, let alone standard passengers, are not able to find seats, the reality of Conservative transport policy is less for more and under more difficult circumstances. It is not a policy of which the Government can be proud.

8.13 pm

Mr. Peter Fry (Wellingborough): I have a great regard for the hon. Member for Crewe and Nantwich (Mrs. Dunwoody) who said that she could not get to where she wanted to go. Much is now clear to me. She is obviously emulating the lady in the music hall song:

"Oh, Mr. Porter, what shall I do?
I want to go to Birmingham,
But I ended up in Crewe."

That is a slight digression. I shall not follow the line taken by the hon. Lady. This is a short debate and it can cover everything from air misses to the quality of tea on British Rail. All that any of us can do is pick one or two subjects and try to air them. I shall restrict myself to the subject of air congestion and the need of the travelling public for an adequate transport infrastructure.

The Select Committee on Transport, of which I have been a member since its inception, is currently investigating air safety and runway capacity, especially in the south-east. I cannot anticipate our report, nor can I reveal any of the information because it is not generally

[Mr. Peter Fry]

made public at this stage. However, I must comment on the debate that is now raging on who is to be blamed for the congestion and delays experienced by so many people, particularly those who want to go on holiday.

I should make it quite clear that the blame is most definitely not to be laid at the door of my right hon. Friend the Secretary of State for Transport. It is his duty to respond to the advice given to him by the Civil Aviation Authority and it is the duty of the CAA so to advise. As he said, he recently requested an early response from the CAA on its suggestions about how the present situation may be eased. He had to ask for that response, and that is significant. Clearly, before the crisis that built up this summer, he did not have the advice that he needs, and that is why he had to ask for it.

Secondly, and perhaps surprisingly to some people, the problems are not the sole fault of the present chairman of the CAA—*[Interruption.]* I said, not the sole fault of the chairman of the CAA. Mistakes have been made in the past, and as he is the current front man he has to take the criticism. In due course the Select Committee may pronounce on the CAA's share of the responsibility. However, it is worth quoting to the House at least two of its defences. First, the CAA is not responsible for the actions of foreign air traffic controllers and, secondly, it does not arrange the schedules of the various airlines.

It is also untrue to say that no responsibility at all should be attached to any airline for the present congestion. The schedule set by some operators of four or five return flights per day by one plane would be testing enough at any time of the year. Given the kind of congestion that occurs in the summer peaks, some airline scheduling has been more than optimistic and on the verge of being foolhardy. This problem has not been uniformly shared because delays have arisen with some companies far more than with others. When the CAA and the Government come to consider solutions to alleviate problems that may arise next year and in the ensuing years, tight scheduling must be investigated.

The main reason for congestion at our airports is simply the increase in demand about which my right hon. Friend spoke. It is not true to say that the rise in demand was clearly seen by all the airlines even last year. We must ask why the increase has taken place. It is simply because more of our people are better off and more of them can afford to fly, often more than once a year. Therefore, the problem is of economic success and widespread affluence —not the kind of picture of the United Kingdom in 1988 that the Opposition try to paint. This picture of affluence applies throughout transport. That is why 2·3 million new vehicles took to the roads in 1987 and why projections show that by the year 2000 car ownership will increase by about 20 per cent. to 25 million. Traffic could increase even more as people use their vehicles more regularly.

Congestion on our roads raises the question of road safety. I shall insert a caveat here, because, while it is absolutely legitimate for us to be anxious about this matter, we must put it in perspective. Road deaths today are only 13 per cent. higher than they were in 1926 and we have 10 times the number of vehicles on our roads. Even in the past 12 years road deaths have been reduced by 20 per cent., while vehicles have increased by 22 per cent. One reason for the improved record on our roads is that we have a far better motorway network than for many years. That brings me to my main point.

The increased demand for transport that we are experiencing will mean that a better and more sophisticated infrastructure is needed. An inadequate infrastructure will only lead to more accidents. Accidents on our roads are often due to the sheer frustration that many motorists experience after being in long traffic jams or to being unable to overtake on inadequate roads.

Mr. Skinner: Give us some infrastructure.

Mr. Fry: Of course, there will be those who say that the road safety measures that we have at the moment still need tightening up. Perhaps they are right,; such measures are an inadequate answer to the congestion that we are facing and to the frustration being experienced by some road users.

I say to my hon. Friend the Under-Secretary of State, who I understand will reply to the debate—I hope he will take my remarks as well-intentioned—that sometimes, when he is quoted in the media, his comments suggest that road safety measures can, perhaps achieve rather more than they can, and the main obligation to provide more roads sometimes tends to be lost. That is why some people perhaps criticise him rather unfairly.

Greater road safety alone cannot be a sufficient answer. Of course we can say that lower speeds will reduce accidents. We can produce statistics to show that a speed limit of 50 miles per hour will produce fewer accidents than a speed limit of 70 miles per hour, but we could reduce that argument to an absurd level. A traffic speed of one mile per hour would produce very few accidents. On the other hand, the effect upon our economy would undoubtedly be disastrous. We cannot all go by train, because the trains do not always go where we want to go. That is sometimes forgotten by protagonists in this area.

Our journeys today are becoming increasingly diverse and sophisticated. The sheer congestion on the roads is opening up great opportunities for rail, and light rail, and that challenge is to be met by British Rail and local authorities in the immediate future.

I am not convinced that random breath testing will be approved by those who experience it, quite apart from the people who answer opinion polls on the subject.

Mr. Skinner: Said he, with first-hand experience.

Mr. Fry: Let me tell the hon. Gentleman that I have been breath-tested on the motorway and was found to be totally clear; but it is not a pleasant experience to go through, and many innocent motorists will reject random testing on the ground that it is an intrusion into their personal liberties.

If the hon. Member for Bolsover (Mr. Skinner) wishes to make a speech, perhaps he can catch your eye, Madam Deputy Speaker, in the normal way. I am sure that if I sat and spoke to him while he was speaking, the House would not think that that was the way to conduct its affairs.

Mr. Skinner: Will the hon. Gentleman give way?

Mr. Fry: I would not give the hon. Gentleman anything, even the time of the day.

Mr. Skinner: Very droll.

Mr. Fry: I hope that the Government, despite the pressure from some sources of the media and other lobbies, will not allow completely random testing.

The traveller's safety does not depend on road safety measures alone. Much depends, whether we travel by road, rail or air, on an adequate infrastructure. Our people will travel more, and more often. They can afford it, and it is the Government's responsibility to assist them. I praise the efforts of my right hon. Friend the Secretary of State because he has clearly seen the need for the better service that is being demanded. To his great credit, he has clearly seen that it is unlikely that the Treasury will provide sufficient public funds to provide that infrastructure in full. That is why I applaud his efforts to encourage people to talk and to become involved in the private funding of various transport projects. The Channel tunnel, the Dartford bridge, the City airport and the new Heathrow railroad are all excellent, but we must regard them only as a start.

Mr. David Tredinnick (Bosworth): Is my hon. Friend aware that many of my constituents and many people living in Leicestershire hope that private funding can be found to electrify the midland main line to Sheffield?

Mr. Fry: My hon. Friend knows that I am a joint Chairman of the all-party Committee concerned with that subject, and that the Committee shares his view.

Mr. Skinner: Speak for the midland main line electrification.

Mr. Fry: We shall try to avoid the hon. Gentleman's constituency.

The public are demanding a higher standard of service and the Government are finding it increasingly difficult to finance it entirely from state funds. My right hon. Friend the Secretary of State has my full support in examining every possible scheme for the involvement of private money and private risk-taking. We should look beyond just building new bridges or new airports by private finance, because we must consider how we shall obtain better public transport in our cities, better through communications and more motorways, by-passes and access roads.

Not all the schemes put forward will be financially viable, but many urban roads will give much better access and open up areas of redevelopment, which will be highly profitable to developers. Surely those same developers who will make the profit should therefore be expected to make a greater contribution to new road building. Similarly, it is essential that the Treasury's Ryrie rules, which reduce the Department of Transport's spending budget by the amount of the mixed public-private investment, must be revised and probably changed.

My right hon. Friend is entirely right to think the unthinkable in terms of transport provision, whether it be toll roads or privately funded rail extensions. He, at least, is a man of strong vision and energy, as well as being a realist. It is the Opposition's thinking on transport which appears to be stuck in a 1950s time warp, where subsidy is the sole answer. The Secretary of State is prepared to look to the future and to find any means to secure greater safety and services for the travelling public. I shall have no hesitation in supporting him in the Lobby tonight.

8.27 pm

Mrs. Ray Michie (Argyll and Bute): First, I congratulate the hon. Member for Enfield, Southgate (Mr. Portillo) on joining the Department of Transport. I congratulate also the hon. Member for Hampshire, North-West (Sir D. Mitchell) on his recent honour. I am sorry to see him leave the Department of Transport. In my short time in the House I found him to be a Minister who was prepared to listen. He was always kind, courteous and helpful. I wish him well on the Back Benches.

I welcome this opportunity to take part in the debate. It is right that we should consider safety and the service to the travelling public. The condition of the urban environment has worsened during the past decade. There is greater traffic congestion—none more so than in the City of London—more air pollution and a poorer, but more expensive public transport system. Many of the deficiencies have been catalogued, such as the sight of holidaymakers stuck for hours at airports or on a motorway for two hours negotiating a three-mile contraflow. Traffic is increasing by 13 per cent. every year and the roads and motorways can no longer cope.

It is a costly and dangerous situation. We have suffered from a lack of planning, vision, foresight and political will, and successive Governments must share the blame. *[Interruption.]* Fundamental errors were made by cutting road maintenance programmes—*[Interruption.]*

Madam Deputy Speaker (Miss Betty Boothroyd): Order. I am having some difficulty in hearing the hon. Lady.

Mrs. Michie: Thank you, Madam Deputy Speaker.

Fundamental errors were made by cutting road maintenance programmes in the 1970s, slashing the railway network from 17,000 to 10,000 miles, and even withdrawing the trams from our cities. What complete folly that was.

Mr. Tony Banks: I agree with the hon. Lady. Trams were one of London's great transport boons. She may not have heard, but a Conservative Member said from a sedentary position that the withdrawal of trams was a Socialist policy. The last tram journey, on which I had the great honour to travel as a babe in arms, was in 1953, when we had a Conservative Government. I just remind the hon. Lady of that because she is obviously too young to remember herself.

Mrs. Michie: I wonder who was the younger travelling on the trams. Trams were also withdrawn from Aberdeen, Glasgow and Edinburgh, and that was a terrible mistake.

City transport is a focus for employment, education, retailing, leisure and health care. Cities must depend on transport to function, for the movement of goods and people. This vital service has a considerable impact on the quality of life of those living in the cities. Surely the challenge is to find a compromise between competing demands for mobility and a decent environment. There is no doubt that the urban environment has worsened during the last decade. As I said, there is greater traffic congestion, more air pollution and a poorer, but more expensive, public transport system. Pedestrians in particular have had a raw deal. Abused by motorists and intoxicated by exhaust fumes, they need standards of Olympian fitness, or the mentality of moles, if they are to use some of the pedestrian bridges or subways.

[Mrs. Michie]

The result is that our environment has deteriorated and our standard of living has suffered accordingly. Nowhere is that more true than on the streets where we live. It is our children who have suffered most as a consequence. Because of the dangers of excessive traffic, which is often allowed to travel far to fast, children no longer have the freedom to visit their neighbours without being escorted by an adult, let alone the freedom to play in the streets or cycle to school, and it is often only the street that they can play in because of the lack of playground facilities.

Let me say a quick word about the railways. We have never made the best use of our railways. The cuts and the colossal lack of investment have been a huge mistake. Financially British Rail may say that it is doing better, but at what cost? There is surely room now in which to improve the service to the public. The great mistake that was made was the lack of co-ordination between rail and road transport. There was no co-ordination of freight, and that was one of the failures of nationalisation. It is terrible that freight is carried up and down our roads on huge juggernauts. It should be taken by rail to freight depots spotted all over the country, and thereafter the containers taken to wherever they are required. If containers can be taken on and off ferries, they can be taken on and off trains. That is not a problem.

We have referred to the loss of trams. I hope that the Minister will encourage the expansion of the light rail transit system, to improve safety and reduce congestion —we are looking for that in the midland metro light rail transit system—to relieve pollution, to allow motorists to park and ride and to allow people to shop in a traffic-free environment. The Government talk about privatisation and the private money that must accompany it, but I want to hear how that will help the integration of our transport services.

Mr. David Clelland (Tyne Bridge): The hon. Lady may be aware that Tyne and Wear did have such integration between the light railway system and the buses, but that that has been destroyed by the Government's privatisation policy. The Government have destroyed integration and the promotion of co-ordination. Their privatisation policies led, first, to duplication, and eventually to the elimination of transport systems for the general public.

Mrs. Michie: I accept what the hon. Gentleman says. The Government must not turn their back on integration. That means planning a variety of public transport services to meet identified transport needs in such a way that passenger transfer between services is helped. Passengers should not have to wait a long time between buses, between a bus and a train or between trains. Such changes should be convenient and the ticket should be valid on both services.

However, integration alone is not a panacea. Considerable investment is required to make up for years of neglect of the public transport system. The numbers of maintenance and running staff employed need to be increased if service reliability, cleanliness and passenger safety are to be restored to acceptable levels. We are looking for a better quality service.

We have talked about holidaymakers, but I hope that Ministers and others involved will also think about the ordinary domestic travellers. I should like to see much more traffic going out of airports in the regions of England and the nation of Scotland—from Glasgow, Edinburgh and Prestwick. I hope that the Minister understands that the Scots hate having to travel to London before going on to——

Dame Elaine Kellett-Bowman (Lancaster): So do the Mancunians.

Mrs. Michie: I am talking about the Scots, not about the Mancunians.

In order to understand what the general public have to put up with, Ministers, and, indeed, the Prime Minister, should give up their ministerial cars for three weeks and move 400 or 500 miles away from the House and then travel here and back twice a week. They should see how they get on with trains that leave and arrive an hour late, and aeroplanes that leave Glasgow half an hour late and circle over Heathrow for 25 minutes. The situation is diabolical. My goodness, no wonder we want a Scottish Parliament, so that we do not have to do that twice a week. I believe that the Government's amendment is very bland.

Mr. Tony Lloyd: It is a terrible amendment, not bland.

Mrs. Michie: I hope that the Government will answer many of the points that have been raised, particularly that about integrating the transport services.

8.39 pm

Mr. Terence Higgins (Worthing): This motion takes no account of the tremendous success of the Government's transport policy in allocating massive amounts to additional infrastructure in every form of transport and in using resources more efficiently by eliminating wasteful subsidies. It is important to start from that point. I join the hon. Member for Argyll and Bute (Mrs. Michie) and other hon. Members who have congratulated my hon. Friend for Enfield, Southgate (Mr. Portillo) on his new appointment. We certainly wish him well.

I also join those who have congratulated my hon. Friend the Member for Hampshire, North-West (Sir D. Mitchell), who has every reason to be pleased with and proud of his ministerial career. We have known each other for a long time. We were both selected as parliamentary candidates in the same week, and whereas I failed to get on the short list for his constituency, he got on the short list for mine. Ever since, I have noted with great interest the tremendous contribution that he has made to the House both from the Back Benches and as a Minister. I feel sure that he will continue to make a very important contribution.

I wish to concentrate on road and air transport. I begin by stressing the importance of the Government's commitment that through traffic should be taken away from towns, and I do so for important constituency reasons. The Government recently appointed a firm of consultants to look into the future route of the A27 in the Worthing area, and their proposals would effectively cut the town in two. What we need is a real bypass. At constituency meetings in recent days attended by 400, 900 and well over 1,000 people, there have been strong protests against the consultants' proposals. I hope that my right hon. and hon. Friends will take that feeling into account and ensure that Worthing is given a real bypass, in the same way that every town and almost every village of any

size on the south coast has been provided with a bypass along what will clearly be, in view of the Channel tunnel, the main east-west route for the south.

Other aspects of road transport that require particular attention concern both London and the inner cities, and motorways. The Government are doing far less then they could to facilitate road transport both in the cities and on the motorways. The present policy in London in particular needs to be carefully reviewed in respect of coaches and bus lanes. I am convinced that in many places, if not all, bus lanes seriously slow down traffic flow, and as my right hon. Friend will know, the way in which coaches are allowed to park all over the place and to interfere with traffic flow—not least disgorging passengers in the centre of Westminster bridge, with great risk of loss of life—should be carefully examined. Other proposals for improving traffic flow have proved to be disastrous—such as the Aldwych, which was the GLC's final kick before it——

Mr. Tony Banks *rose*——

Mr. Higgins: No, I shall not give way.

The GLC, in its final kick, introduced a system at Aldwych that has totally fouled up the traffic every day ever since. I hope that the Government will reinstate the original arrangement at the Aldwych, which was much better than the present one. It is important that the Government take action. I feel sure that London's traffic flow can be improved, and I am glad that my right hon. Friend is establishing a specific study to examine the matter.

As to motorway traffic, I welcome the acceptance of the idea that 70 mph signs, rather than signs taking the form only of white circles with a black diagonal, should be erected on motorways, to remind motorists using them of the real speed limit. I hope that that experiment will be successful and helpful in ensuring that the speed regulations, which I believe are set at the right limits, are observed more rigorously than they are at present.

What really concerns me are the appalling hold-ups that occur on motorways because steps have not been taken to divert traffic away from a blockage. A few weeks ago, as my hon. Friend the Under-Secretary of State will know, I suffered an appalling experience when I had to wait about 50 minutes at the junction of the M25 and the M23. That was because a machine was apparently being used to test the road surface at a time when there was a massive amount of traffic on the motorway. All that was needed was one sign at the junction warning of the blockage and directing traffic to another route. I do not believe that the delegation of authority from the Department to county councils takes any account of the need to improve motorway traffic flow, when just a little advanced planning and concentration of thought could make a tremendous difference.

I hope that my right hon. and hon. Friends on the Front Bench will seriously consider setting up a small unit within the Department of Transport that will be notified of all likely major hold-ups and then make sure that action is taken to divert traffic. The waste of resources that currently results from such confusion is often wholly avoidable. That is something on which the Government could reasonably take effective action. Having said that, it must also be recognised that the Government's road building programme is making considerable progress, and I trust that it will continue.

The other point I wish to stress concerns air traffic control. The chairman of the Civil Aviation Authority has been most unfairly criticised over situations that developed as the combined result of several industrial disputes in other countries and the extremely tight schedules set by charter operators, whereby any minor disruption of their programme results in considerable disruption. That combination was the crux of many recent problems and there was nothing that either the CAA or the Government could reasonably have done, given the situation that had been created before the present difficulties arose.

However, it is important that we should not give way to those pressure groups that argue that there should be more night flights. It would be wrong for huge numbers of people to be seriously inconvenienced by an extension of night flight schedules. We tend to express too much concern about aircraft take-offs while ignoring landings. In my constituency, I constantly receive complaints about the level of night noise. The Government have done something to divert certain routes to less populous areas, with the result that there has been an improvement.

I hope that my right hon. Friend will stand firm against those who argue for an extension of night take-offs and will also look carefully at what appear to be completely unnecessary landings at, for example, Heathrow. They disturb many people at something like 5.20 in the morning. There is no need for large numbers of people to be inconvenienced for the sake of a few hundreds' convenience.

The Government have constantly claimed—I believe this is true—that it is not lack of resources that has resulted in air traffic control problems. However, we must carefully consider whether the Government's proposals for central control functions, which are designed to help in the future, cannot be brought forward from 1995. That time horizon surely ought to be shortened, and I cannot believe that the changes envisaged are such that they need to be introduced over that length of time. We are all aware of the considerable difficulties being experienced with that part of the programme, but everything possible must be done to ensure its implementation without the kind of delay that is envisaged.

There are many other subjects on which I might be tempted to speak; in particular, in declaring my interest as a council member of the Institute of Advanced Motorists —totally unpaid, I might add. It is important that we should encourage people to engage in better training after they have passed the present test, which is not sufficiently thorough to ensure that drivers are capable of driving safely in all conditions.

I am tempted also to discuss trams, which were referred to a moment ago. I once had the pleasure of successfully moving an amendment that secured the perpetuation of trams in Blackpool. The main advantage of London trams seemed to me that they were operated by members of a different union from those who operated the buses, which meant that they did not both strike at the same time.

The Government are putting in vastly more resources than before, and many aspects of their policy are now extremely successful. I hope very much that the House will reject the Opposition motion, which is superficial and partisan and the sort of thing that we might expect at this time of year.

8.50 pm

Mr. Ted Leadbitter (Hartlepool): One of the fundamental factors in any consideration of the state of transport must involve the public's view. The public appear to have little say in what happens, yet by any reasonable test of the conditions of our present transport system the number of public complaints is higher than ever, and the House should take serious account of that.

I think that for our present purpose we can ignore the transport experts, many of whom have been indifferent to public opinion. They know best. Members of Parliament are often frustrated when presenting a case involving their reaction to a legitimate public complaint. What we get is an exciting stir of indifference in the Department of Transport. When the right hon. Member for Worthing (Mr. Higgins) talks of more resources being spent on transport than ever before, I cannot disagree, except to suggest that after eight years of Conservative government, the Secretary of State's excuse that he has been dealing with conditions inherited by the present Administration is beginning to wear a little thin. The public are not convinced by that kind of political observation, and it wastes time in the House. While we have perhaps improved the allocation of resources, the concern of the public about the inconvenience caused to them suggests that we have done too little, often too late.

Towards the end of his speech, the Secretary of State said that this was an excellent story. He presented the House with an excessive degree of heavy breathing. It is not an excellent story at all. Let us look at one of the four considerations in his approach to transport—safety. It is a remarkable habit of the House and indeed the country to become more keenly concerned about safety after an accident. We organise inquiries promptly, without hesitation; we wait for some months for their reports; then, as time passes, we seem to wait for the next accident.

Is the Secretary of State really satisfied with safety levels? Will he not admit that the Department has not once taken on board a semblance of responsibility for the conditions that led up to the ferry accident at Zeebrugge? We know where the real culprit is, but the Department has procrastinated. It has been lethargic about pinpointing responsibility. As I recall, most of the blame was placed on two individuals, but where does the real responsibility lie? Despite assurances in the House that something would be done about the conditions that led to the accident, we hear reports from the crews of other ferries that the same laxity prevails. One ferry went about its business, albeit within the port, with the doors open at the front where vehicles are loaded.

Is it enough to say that safety is one of our main considerations? What about the responsible reports of people who have spent a lifetime on the airways? Are the pilots wrong about near misses, or are the official reports wrong? Of whom should we take notice—the pilots who experienced a near-mishap, or the reports churned out by a tiresome bureaucracy with no personal involvement? The country is becoming involved, entirely unprofessionally, in passing the buck.

How does the House feel about roads? Last year I travelled in Europe for some 4,000 miles and never saw a single roadworks. I returned to this country and was soon sick and tired of being stopped. We want large sums to be spent on roadworks, but we have built road systems to be unable to deal with the developing traffic circumstances. When travelling to my constituency—if I travel within the law, as I suppose I must—I can get pretty far up the road to the north-east until I come across those wonderful inhuman things called cones, or Daleks. I am stuck there until I am fed up to the back teeth. Such conditions can promote accidents, and a good deal needs to be spent to put them right.

If, however, I decide to travel by rail, what happens? I get to Darlington—as I may tomorrow evening if sensible people on both sides of the House ensure that the vote is before 7 o'clock—but I then cannot get a train to take me the 21 miles to my constituency. I can afford to pay for a taxi, but what about the dear old lady or the young wife with her bairns? Taxis are costly. They have to catch a bus. To reach the bus stop they have to walk for over a mile and when they catch the bus it goes in and out of little villages and they have a very long ride.

This country has lost a great opportunity to integrate its transport system to meet the requirements of the public—not the requirements of politicians who have allowances and who can ride in their cars. We are not meeting the requirements of the public, because we have never measured up to the great economic benefits that an integrated transport system would provide. We had such a system in Tynemouth. We could get on and off the metro, using the same ticket. Because the bus system was integrated, people could move quickly within the area and, better still, get home quickly. That was stopped. Obeying the orders of the House, I had to chair the Committee on the Bill that led to the deregulation of transport. The result is that even in the smallest towns, six or seven buses are now fighting for customers.

Mr. Clelland: When I put that point to the Secretary f State for the Environment, he replied that deregulation had led to buses queuing for people instead of people queuing for buses. If that is the Secretary of State's view of efficiency, it is no wonder that our transport system is in such a mess.

Mr. Leadbitter: I can think of no better way to round off my contribution than with my hon. Friend's intervention. I had decided to speak only for a short while. I look at the clock and, out of respect for other hon. Members, both before me and behind me, I shall sit down.

9.1 pm

Mr. Nicholas Soames (Crawley): I agree with the point that the hon. Member for Hartlepool (Mr. Leadbitter) made about safety. Concern about safety should always be at the forefront of our minds. I am sure that the hon. Gentleman agrees with me that no Secretary of State for Transport, or his Ministers, could operate a successful transport policy without having the needs of the public at the forefront of their minds. I agree with the hon. Gentleman that it is disappointing that safety matters are not aired in this House as often as they should be and that they are always aired after a sad and tragic event. We have had our bellyful of such events this year.

I join in the paean of praise to my hon. Friend the Member for Hampshire, North-West (Sir D. Mitchell). He always took the trouble to listen to what hon. Members on both sides of the House had to say about transport matters. He dealt with us all with great courtesy and

effectiveness. The Government will be the poorer without him. However, the Department of Transport will be greatly enriched by the presence of my hon. Friend the Member for Enfield, Southgate (Mr. Portillo). Within a short period he brought a unique distinction to his ministerial office. We congratulate him and wish him success in his new office.

The quite exceptional growth in the economy and the real earnings that have gone with it have enabled more people to travel—and a very good thing, too. However, considering the history of economic growth in this country, it is hardly surprising that the Department of Transport and other Departments with responsibility for forecasting traffic growth have not got their sums right. Because of the very heavy burdens that he has recently had to bear, my right hon. Friend the Secretary of State of Transport will be more aware than anybody else of the fact that the forecasting errors that have been made in the past of traffic on the roads and in the air are unacceptable and must never be allowed to happen again, in so far as it is possible to prevent them.

I intend to deal with two separate transport matters —aviation and roads. The British aviation industry is one of our great economic success stories. The transformation of British Airways under the exceptional leadership of Lord King and Sir Colin Marshall, the remarkable efforts of people such as Michael Bishop of British Midland Airways Ltd., of Harry Goodman of Air Europe, of Peter Villa of British Island Airways and of Britannia, Dan-Air and many others, has resulted in an explosion of activity. It has provided much employment and prosperity for people all over the country. Long may it continue, and broader may it spread.

The people who run the airlines and the people who work in them must realise that the great, substantial and happy successes must be balanced with crucial environmental considerations, which are of the greatest importance to people who live near airports. The British Airports Authority, under Sir Norman Payne, has made a brilliant start in the private sector and has confounded all the horror stories that those of us who served—I shall not say, had the fun of serving—on the Standing Committee that considered the Airports Bill heard forecast for it. The BAA has gone from strength to strength. Heathrow and Gatwick are now the two busiest international airports in the world and the BAA team runs a successful and splendid enterprise, which is expanding its interests handsomely and successfully overseas.

My right hon. Friend the Secretary of State and his colleagues have more than done their bit. They have done a remarkable job in liberating air transport, both domestically and internationally, and they have done an excellent job in trying to achieve that important balance between environmental concerns and commercial success.

We are now in substantial and considerable difficulties. The problems of growth in this area, as in so many others dealt with by the Government today, are proving even harder and more intractable to manage than were the problems of decline before 1979. There is very serious congestion at airports and there are unsatisfactory delays for passengers, which are quite unacceptable. Many of the reasons for those delays are entirely unconnected with this country. The Greeks, Spaniards and French have all done their best to ruin holiday travel for our people. It is a Europewide problem, as my right hon. Friend the Secretary of State has said. The problem must be addressed on a European scale because it is not simply a British problem.

My right hon. Friend the Secretary of State must ensure that the directors of each international air traffic control system have their heads collectively banged together until there is a unified system over western Europe. As sure as eggs are eggs, 1992 will bring a greater demand for travel and that must be dealt with before the impact of the open market.

The remarks made by some hon. Members about the Civil Aviation Authority and its chairman and management two weeks ago were, frankly, disgraceful. I am ashamed to say that the rent-a-crowd on the Conservative Benches were largely responsible. I want to place on record my unreserved admiration for the way in which the chairman of the CAA and Keith Mack, the head of air traffic control, are coping with particularly intransigent and difficult problems. I visited the air traffic controllers in my constituency the other day and I was exhausted by watching them. They do a brilliant and highly complex job under very demanding conditions, and the most onerous and appalling responsibilities rest on their shoulders. A great deal needs to be done to improve working practices in that organisation, but huge investments have been, are being and will continue to be made in air traffic control equipment, as I am assured by the Government.

All that is happening after the horse is almost out of the box. What can be done? My right hon. Friend the Secretary of State is already dealing with the problem in the European dimension. I suggest that he gets hold of his right hon. Friend the Secretary of State for Defence and that he shakes from that appalling sink of waste every inch of military air space that he can prise from it. It is ridiculous that in 1988, when the most modern facilities for controlling air traffic exist, the military should insist on retaining in so many areas of this country vast acres of air space that are completely unnecessary for their own requirements and would greatly assist my right hon. Friend's problems.

Decisions in respect of future licences, runways, terminals and technical investments must be made, as they have been in the past, but particularly from now on, in the context of a national and international strategy for air transport.

I now turn briefly to roads. No one can deny the Government's right to claim credit for a very handsome increase in spending on the roads programme since 1979. But that is self-evidently not enough. My constituents and millions of others are daily deeply frustrated and greatly angered by road chaos. On this, as on so many matters in relation to infrastructure spending, we can and must do better.

Finally, I wish to make two key points. The public transport services require, first and foremost, far more effective direction and use of those who work in them and the resources for which they are trustees. Services must adapt to the requirements of the travelling public. My final point to my right hon. Friend is that efficiency is about doing what is right, but effectiveness, which is the true management task, is about doing the right things, as Peter Drucker said.

We must continue to invest at ever-increasing levels in the transport infrastructure of this nation if we are to begin to keep up with our continental neighbours.

9.12 pm

Mr. David Marshall (Glasgow, Shettleston): The question that has to be posed is: do the Government have an overall policy for adequate transportation systems to meet the present and future needs of the nation, taking into account convenience, cost, safety and service? It is patently obvious that they do not. I wonder whether it is the Government's desire to encourage everyone to stay at home, as it is becoming very difficult to travel anywhere without experiencing considerable discomfort, frustration, strain, stress and worry travelling by road, rail, sea or air.

I congratulate my hon. Friend the Member for Aberdeen, North (Mr. Hughes) on securing the debate as half of the Opposition Supply day debate today. Were it left to the Government, we would never have a transport debate in the House. My hon. Friend the Member for Newham, North-West (Mr. Banks) boasted about travelling as a baby on the last London tram in 1953. I believe that I can go one better, having worked for two years as a tram conductor in Glasgow until the last tram ran there in 1962.

I congratulate the hon. Member for Hampshire, North-West (Sir D. Mitchell) on securing his knighthood, and the hon. Member for Enfield, Southgate (Mr. Portillo) on his appointment to the Ministry of Transport. I sincerely hope that he will prove to be a good Minister, particularly in relation to public transport.

I declare an interest as a Member sponsored by the Transport and General Workers Union and also as the Chairman of the House of Commons Select Committee on Transport. As the House is aware, at present the Select Committee is in the middle of an inquiry into air traffic control safety and runway capacity. Therefore, I feel that it would be most improper for me to make any comment on those matters. Suffice it to say that I hope our report will be published in December, or very early in 1989. I sincerely hope that, as usual, it will contain a number of helpful and meaningful recommendations and possible solutions that the Government may see fit to accept.

As an individual hon. Member, I believe that the Select Committee was perfectly right to conduct such an inquiry, and it would have been failing in its duty had it not done so. The concern of hon. Members and of the general public is very well known, and we must always guard against complacency whenever and wherever it arises, especially in matters of safety.

There is a very strong link between congestion and safety, whether it be in the skies, on a crowded ferry boat, in a train, an underground train or on the roads and motorways of our country. Motorways are grossly overcrowded, yet astonishingly, as far as I am aware, the Government have no plans for a new motorway network to meet the expected increase in traffic on our roads in years to come. They should be ashamed of themselves, and even more ashamed that they opened the M25 with no service area facilities for motorists. They seem also to be unwilling to provide, or to encourage someone else to provide, proper facilities for HGV lorries, and long-distance coaches. Drivers and passengers need sufficient, decent places to stop for rest and refreshment.

Facilities for the disabled traveller are also a disgrace. For example, a recent Automobile Association survey found that, at six service areas, disabled people could not rely on getting access to any facilities. Perhaps not enough profit can be made out of the disabled traveller.

I make no apology for again referring to the A74 and to the Government's repeated failure to honour their election pledge to upgrade that road to motorway status along its entire length from Carlisle to Glasgow. It has a horrific accident record and is well known as a killer road. How many lives must be lost on the A74 before the Government do something about it?

Drunk driving is one of the most serious problems facing us today. When will the Government finally get their act together and do something about it? Call it random breath testing, discretionary testing, unrestricted testing—call it what one likes—but the public want action, and they want action now. In making the case against random breath testing, the Under-Secretary of State for Transport, the hon. Member for Eltham (Mr. Bottomley) said that, in other countries, only one in 200 drivers stopped is over the limit. That is a powerful argument for random tests. It suggests that people are unlikely to take a chance if they fear that there is a real risk that they will be caught.

One matter that greatly concerns me relates to motor cyclists and the terrible toll of deaths and serious injuries suffered by young bikers. Has the Secretary of State seen the admirable campaign that was recently waged by the Scottish *Daily Record*, which called for compulsory training before riders are even allowed on to our roads? The Under-Secretary of State for Scotland, the hon. Member for Edinburgh, West (Lord James Douglas-Hamilton), supports the campaign. Will the Secretary of State do the same, and do the sensible thing and introduce the necessary legislation as soon as possible?

The Secretary of State should also consider a publicity campaign along the "clunk-click" campaign lines, to get all drivers to use their indicators properly. He should again consider making motorway driving a part of the driving test, and providing more resources to ensure a high-profile, marked police presence on our roads. Nothing is more effective in making us better drivers than to see a police car on the same road. He should also provide much more of the £14 billion that is derived from road users than the £3 billion provided at present. Research, maintenance and construction are all in need of substantially increased funding. The wonder is not the number of accidents that take place on our roads, but that the figures are not substantially greater.

Despite the Secretary of State's claim about investment, there are no signs of any new railway lines being built, yet the present network is greatly overcrowded in many areas and could not meet an increased demand. No serious efforts have been made to transfer traffic or passengers from road to rail. Staff shortages in the south-east mean constant gaps in services and a lack of service. Overcrowding, especially on underground trains in London, must be a safety hazard and make commuting unbearable.

Why do the Government not give British Rail all the necessary resources to tackle the problems in a proper, responsible manner, thereby benefiting the nation, industry, the travelling public and employees? The Government put profits before people. One of the saddest features of all is the short-sightedness of a Government who are not prepared to invest in long-term safety. They will long stand condemned for that fact alone.

9.18 pm

Sir Anthony Grant (Cambridgeshire, South-West): In the short time available I should like to deal with air and road travel. I declare an interest as president of the Guild of Experienced Motorists and as an adviser to the Guild of Business Travel Agents, which is responsible for four out of five business flights out of the United Kingdom.

A top priority for both means of travel is safety. The difference between the two methods of travel is stark. There is almost hysterical excitement and anxiety when a jumbo jet has a near miss—there is wide coverage in the press and great terror—but the equivalent of a jumbo jet crashing, with total loss of life, takes place every month of every year on our roads and receives nothing like the same publicity. There are 35 road casualties every hour. There have been 100 road casualties in the time that we have been debating this matter. It is no consolation to people who have suffered the misery and horror of a road accident to be told that the statistics are better than those for France or, as my hon. Friend the Member for Wellingborough (Mr. Fry) said, because there are so many cars on the road, the proportion of accidents is smaller.

It is essential to concentrate on road safety, despite what my hon. Friend the Member for Wellingborough said, and I congratulate my hon. Friend the Minister on his work and his attention to this matter. He has emphasised the number of deaths and misery caused by drunken driving. He always states that one in five road accidents are caused by drink, but we should not forget that four out of five are not caused by drink. So what are they caused by? In that respect I welcome the Government's support for the North report, which reviewed road traffic law.

It is right to emphasise the need for more and better roads. As my hon. Friend always says, one is safer on a motorway than on the small urban roads. I know that that is true of my constituency, where ghastly accidents occur, not on the motorways, but on the smaller roads in rural areas. The call for roads to be built is interesting. My hon. Friend the Secretary of State accused the Opposition of being big spenders, of wanting to spend big money and to subsidise, but what did they do when they were in office? They halved the road programme. Therefore, we can dismiss their view. Indeed, the whole of the motion is party political claptrap. The subject deserves much more serious debate.

There are many items in the North report that are important. First, the report is right to emphasise the distinction between major and minor road offences, which at present is somewhat blurred. The offence of recklessness is always difficult to prove in court. The muddles and the wheeler deals, in which I used to be involved when I was involved in the law, were in many ways bringing the law into disrepute. The police would throw in two charges, dangerous and careless driving, and a deal would be struck: "All right, I will plead guilty to careless driving if the dangerous driving charge is withdrawn." I am glad that the North report recommends changes that will differentiate between those two offences, because a diminution of the respect shown for the police has been encouraged by our traffic laws.

I hope that in future, the police will be able to make greater use of warnings and explanations to motorists of what has gone wrong. That would be good public relations and would be helpful to the motorist. I understand that the police can have videos in their cars, and it would be valuable if an offender could be shown on the video what he did wrong, in the hope that he would not do it again.

I am glad that there is to be greater use of technological advances, which I know my hon. Friend is studying. In Japan, heavy goods vehicles have lights that illuminate when they are travelling too fast, and that makes them easily identifiable. The greatest curse of our motorways is the wretched practice of driving too close to the vehicle in front for the conditions on the road. I am advised that it is possible to have a technological gadget—for example a light—that will show clearly that one is driving too close behind the other vehicle for the speed at which one is travelling. The Opposition have asked who will pay for that. The answer is simple. If we are sensible we will ensure, as we did with seat belts, that such gadgets are fitted to vehicles before they are put on the road. That is what must happen if we are to deal with the mayhem.

The magistrates bench is often feeble about disqualification for very bad driving, and I should like greater use to be made of the power to order the forfeiture of the vehicle. I know that it is said that most people do not drive their own vehicles, but I do not believe that that matters. There are many companies which are irresponsible about who they give a car to. They do not check whether the person to whom they are giving the keys is a good driver or sensible. It would be a salutary experience for companies if their vehicles were forfeited and they had to pay a substantial sum to get them back. They might then ensure that their drivers drove more carefully. It is, after all, commercial travellers belting about in other people's cars who are a major cause of mayhem on the roads.

I hope that appropriate measures will be applied strictly to heavy goods vehicles and coaches.

Mr. Terry Dicks (Hayes and Harlington): Especially coaches.

Dame Elaine Kellett-Bowman: Particularly when they are in the outside lane.

Sir Anthony Grant: I entirely agree with my hon. Friends. There are excellent drivers of HGVs and coaches, but, as those vehicles are much more dangerous than anything else, the drivers of them must maintain higher standards.

I entirely support what my hon. Friend the Member for Crawley (Mr. Soames) said about the Civil Aviation Authority. Its chairman, Mr. Christopher Tugendhat, is an old friend and a former colleague of ours. He is a man of great integrity and ability. It is wrong to blame him for what has happened with our air traffic control. There is no doubt that we were all caught out badly in our estimate of the increase in the amount of air travel. It is rather like the M25. It is an excellent concept, but the number of users has far outstripped the number anticipated when the wretched thing was built. For air traffic, we are stuck with a problem that will be with us for a long time.

The CAA is to spend £250 million during the next five years. My view, which I am told is shared by some airlines, is that that is inadequate. I also believe that resolution of the problem, which is predicted for 1995, is likely to slip to 1997. There will be more temporary measures, such as moving charters to Heathrow. Despite what my right hon. Friend the Member for Worthing (Mr. Higgins) said, I think it is unavoidable that some extra night flights will be used. That is regrettable.

[Sir Anthony Grant]

I agree with my hon. Friend the Member for Crawley about the use of military airspace. I am told that the regulations that affect military airspace were laid down a long time ago, and in different circumstances. I ask my hon. Friend the Minister to consult our right hon. Friend the Secretary of State for Defence, who may be able to raise the subject in NATO circles, to see whether some military airspace can be released. That would make a big difference.

Mr. Mans: Will my hon. Friend explain how the release of military airspace will solve congestion on civilian airways?

Sir Anthony Grant: The point was put to me powerfully at a meeting that I had with British Airways air traffic people. They think that if military airspace in Europe were reduced, much more would be available for civilian aeroplanes. Their view is shared by some of their European counterparts.

We are all sorry for the holidaymakers, because it is wretched for them to have their holidays ruined. However, we must remember the other important travellers who have to travel by air all year round, not just at holiday times. I am referring to the business traveller, the person who is concerned with trade for Britain and about our exports as a trading nation. He does not travel for pleasure. He has to travel day in, day out, in all circumstances to trade for Britain. Such travellers should not be inconvenienced or suffer in any way because of the failure to arrange our affairs in such a manner that scheduled flights can take priority over charters. I ask my right hon. Friends to have careful regard to maintaining the scheduled services at all costs, because they are important for the business traveller and the British economy.

The Department of Transport is often regarded as a Cinderella, but I believe that it does a first-class job. It is in the front line when there are difficulties and what it does touches on the activities of all our citizens. It has done a first-class job and I wish it well. I hope that my hon. Friend the Member for Eltham (Mr. Bottomley) who is to reply to the debate, will have close dealings with the Department of the Environment and that there will not be any conflict with the new Under-Secretary of State for the Environment, the hon. Member for Surrey, South-West (Mrs. Bottomley).

9.31 pm

Mr. Tony Lloyd (Stretford): I should like to join the assembled welcome for the hon. Member for Enfield, Southgate (Mr. Portillo) and to add my commiserations to the hon. Member for Hampshire, North-West (Sir D. Mitchell), who I shall miss because of the way in which he took part in the debates that we shared, with me doing the talking and him doing the listening. He did that well for the most part.

If I could give some advice to the hon. Member for Southgate, it would be to read carefully the Government's amendment to our motion and then ignore every single word in it because it is absolute nonsense, as has been borne out by speeches of hon. Members of all parties.

If things are so good, why are they so bad? Why, for example, has the road system in the City of London almost collapsed, so that the London ambulance service has now had to reduce from 95 per cent. to as low as 90 per cent. the number of calls that it expects to make within 14 minutes? That is a terrible indictment of the congestion on London's roads and of the Government's total inability to get to grips with the situation.

I remind the House that it is not that long ago that London Regional Transport was striving to attract traffic off the roads—and succeeding—that the number of accidents on London's roads fell by 3,000 per year, and that the number of cars on London's roads also decreased. That was because at that time London Regional Transport was receiving that terrible thing, a subsidy from the Greater London council and from the Treasury. Because of that subsidy, it could offer the unusual combination of a decent fare structure and passengers attracted back to public transport.

If everything is so good, why did the Audit Commission state in its recent report that since 1980 roads throughout the country have been deteriorating and that their condition is now worse than in 1977? If things are so good under this Government, why are the travelling public throughout the country totally fed up with the motorways being coned off and with being unable to travel from one part of the country to another, and why have those who used to travel on public transport deserted it? Following the great emphasis on deregulation, fewer people use public transport after deregulation than used it before.

The most important item in the Opposition motion is the part that concentrates on safety and the most damning indictment of this Government's record is their record on safety. Although this has been a wide-ranging debate, I believe that it is important to consider safety.

London Regional Transport enjoyed phenomenal success under the Greater London council when, partly in co-operation with the Labour Government and even with the Conservative Government in their early years, low fares made a real change to the fortunes of transport in London. The Government have now withdrawn the subsidy to LRT, and the 1988-89 LRT business plan admits that the London Underground and the London transport system are seriously overloaded.

In April of this year, LRT also announced that new investment, far from coming from the public to satisfy the needs of the public through taxation and other mechanisms, would lead inevitably and inexorably towards higher fares. The inevitable result will be fewer passengers travelling on the transport system—except for those forced off by the congestion on our roads.

Although the Government boast in their amendment to the motion of

"the increased investment in transport",

there are now fewer railway cars on LRT railways than there were in 1979. There is less seating capacity on the Underground than there was in 1979. Basically, the public are being given a shabby deal as a result of lack of Government investment.

The Secretary of State always makes great play of the "caring Government" and of what they have done to improve safety. However, the right hon. Gentleman and his predecessors have neglected safety on London Underground since the day they took it over from the GLC.

One of the first tasks of the new Minister for Public Transport—poor sucker—was to answer a written question from my hon. Friend the Member for Holborn and St. Pancras (Mr. Dobson). My hon. Friend asked

"on what date his Department received London fire brigade inspection reports on the London Underground deep underground stations in 1987, and in each of the preceding five years."

The answer that came back said:

"None were received in 1987."—

or in 1986, 1985 or 1984—

"The last report received from the London fire brigade . . . was dated 10 May 1983".

Surely the Department of Transport and the Secretary of State, or his predecessors, must have realised, when those reports from the fire brigade did not come through, that something had gone wrong. Surely, having nationalised London Underground, the Government appreciated that they had responsibility for safety. Once that transport system had been nationalised, the Government took away any adequate safety regime. The sure and inexorable result has been that the management, pressed to deliver cost savings and profit achievements, has ended up with poor safety conditions. That has led directly to the King's Cross fire and that is a charge that the Government will not be allowed to evade.

There have been previous fires on London Underground, at Oxford Circus and at Green Park. The reports on the inquiries into those fires were available, yet, despite its importance, no steps were taken to ensure the safety of the travelling public in London. That should have been the Government's prime concern and that is a charge that I am levelling against the Government. It is the greatest hypocrisy for the Government to argue that safety is at the forefront of their decision-making.

The most important concern relates to the safety of the ferries that ply between our coastal ports and France—that is a growing sore. The charge that such ferries are unacceptably vulnerable to capsize has been made by people with professional competence and of the highest international repute. That warning has come from the Royal Institution of Naval Architects, from those who suffered a bereavement as a result of the sinking of the Herald of Free Enterprise, and from the Herald Families Association. On each occasion, the Government's response has been that they have taken all kinds of measures to introduce regulations for ferries. They have at no time addressed the basic problem—the ability of such ferries to capsize.

During the passage of the Merchant Shipping Bill, my hon. Friend the Member for Kingston upon Hull, East (Mr. Prescott) and I pointed out the problems of fatigue. In every comparable industry, whether the air service or road haulage industry, there are specific limits on the hours of work that can be undertaken by or allowed for any operative. We pointed out that navigation at sea was an exception in that respect and that the Government had already committed themselves to bringing in legislation on fatigue.

We were told by the then Minister of State, and again on Report, that the Government intended to do nothing about bringing in maximum permitted hours of work for the merchant marine. We did not twig why—that it was a prelude to the introduction of new working conditions by P and O and that if the Government had brought in those acceptable hours of work they would have ruled out the introduction of the new blue book regime which was brought in by P and O and which has done so much damage to the ferry industry——

Mr. David Shaw (Dover): The final terms were red book, not blue book, terms.

Mr. Lloyd: The hon. Gentleman stood before the House some months ago and described how P and O had listened to people like him and had brought in the red book to amend the blue book—but it has ratted on that agreement and brought in the blue book. There are people on its ferries who operate under blue book conditions.

I want to quote some interesting comments made by personnel of P and O, the kind-hearted company whose only aim is to make an honest buck and to ensure the safety of it passengers. The company was described by Lord Justice Sheen thus:

"From top to bottom the body corporate was infected with the disease of sloppiness."

So much has changed that the Dover personnel manager of P and O European Ferries, a Mr. Chaston, was observed by members of NUMAST in negotiation with him to say:

"P and O cannot be seen as putting forward any reduction in manning. Any such changes must come from the union as the company cannot afford to be held responsible for accidents."

He was not saying that the company did not want reductions in manning; he was happy to have them. But he was saying P and O would not accept responsibility for any more accidents caused by what he knew—so much is implicit in his comments—were unsafe manning levels. That is what P and O is up to.

This is the same P and O which, as we have already heard this evening in the case of the vessel European Clearway, allowed operating conditions that defy categorisation as acceptable. P and O has denied none of these charges yet. The Secretary of State told us that he was prepared to prosecute in the event of unacceptable conditions at sea, but that the Herald of Free Enterprise is unfortunately out of his hands. Will he give a guarantee that, if the charges about the European Clearway made by motorman John Ball are proven, rather than allowing him to pursue a private prosecution, he will take all possible steps to ensure that Jeffrey Sterling and his company are brought before the courts to answer for the unacceptable safety standards on their vessels?

Will the right hon. Gentleman consider the position of the European Trader? I have already raised this matter with him. On the night when there was a fire on board the European Trader, an exchange took place between the vessel and the coastguard, who said:

"Please listen to me on Channel 80 and Channel 16."

The vessel's radio operator replied:

"We do not have enough men to monitor on both channels."

The Secretary of State is not an able seaman—no more am I—but we both know that it is vital in such an emergency that monitoring should take place on both channels. On that occasion it did not, because there were not enough men on board. The right hon. Gentleman's departmental inspectors allowed that to happen. I can provide—I have provided—the Secretary of State with the names of witnesses; will he guarantee that if the charge is proven he will prosecute P and O for that?

Will the Secretary of State, through the Under-Secretary, tell us about the charge that surfaced this

[Mr. Lloyd]

morning about the European Trader? On the night when the fire was raging and the crew went in to put it out, they were issued with gear to prevent them from being burned, and with breathing masks. They found that the oxygen cylinders for the breathing masks were empty, so they had to depart and find substitutes before going back to fight the blaze. Any observer would recognise that that delay might have caused a major tragedy which fortunately—no thanks to P and O or the Government—did not take place. Will the Secretary of State guarantee that charges will be laid against P and O if that incident is proven? I invite the Under-Secretary of State to respond to that, because clearly the Secretary of State does not intend to move.

The Government often claim that they are the victims of the success of their policies. That success is reflected in airports that have people lying all over the place and in traffic queued up for miles on our motorways and in the streets of London. The real victims of the Government's success are those who died on the Herald of Free Enterprise and at King's Cross. The Opposition will not allow the Government, who claim that they care for safety standards, to escape responsibility for those victims.

9.45 pm

The Parliamentary Under-Secretary of State for Transport (Mr. Peter Bottomley):

"Every day people lose husbands, wives, parents, children and friends they have loved, whose loss reduces every perspective to dullness, misery and pain. In many cases they carry the pain around with them for the rest of their lives. At moments like this, one realises that under the surface of polite society there is a great well of sadness and bereavement, an aspect of the human condition which is as inescapable as it is seldom remarked, yet looming larger in many people's lives than any of the things they pretend to think important. The only excuse for allowing my own howl of anguish to be heard is to give those yet unbereaved a glimpse into the hellish blackness lying under the surface of their lives before they sensibly turn away and think of something else."

These words are Auberon Waugh's from the *Spectator* of 15 February 1986.

The House will acknowledge that this is an important debate with many aspects. It is regrettable that it draws about as much press attention as our most boring debates. The House knows that for a debate about capital punishment, which might affect the lives of about six or 60 people a year, the Press and Strangers' Galleries would have been full and there would have been newspaper attention throughout the debate. I am not criticising the press; and I shall later deal with what it has achieved.

While not in any way obscuring some of the terrible tragedies that have occurred, I can tell the House that in every category of transport the accident rate for the last available year is lower than it was in 1979. Of course, it should be. We should be able to get rid of avoidable crashes and to reduce the risk of disaster—*[Interruption.]* When disasters occur we should learn the lessons. One of the important things to recognise is that if we spent more time listening rather than speaking, we could work together to reduce the number of crashes.

Some hon. Members spoke about the King's Cross fire. I think that my right hon. Friend the Secretary of State and I were two of the few Members of Parliament who were there. I pay tribute to those who at that disaster and in other disasters clear up the consequences of human error. On the roads, 95 per cent. of deaths and injuries are caused in part or in full by human error.

While we wait for the report of the Fennell inquiry, let us recognise that, because of the increased number of passengers who used the London Underground this year, between 25 and 30 lives have been saved. Seventy per cent. more people now use London Underground than in 1982, when it came away from the GLC. Without that increase in passengers, we would have expected at least 250 serious casualties and 1,000 slight casualties extra on the roads. If the underground passenger miles had been travelled in cars, on motor cycles and pedal cycles the saving would not have been so great.

Those who have managed to promote London Regional Transport so that it is more attractive to passengers have saved lives. By holding fares roughly steady, London Regional Transport has got so many extra passengers that it can proceed to an investment programme of £1 million a day. Capital investment in London Regional Transport is over three times the rate of investment on national roads in London. That should be welcomed rather than criticised by the Opposition if they believe their own rhetoric. People should have a choice about how they move around. They should make their own decisions rather than have them made by the Government or by the Opposition.

I also wish to mention one of the more vulnerable groups—motor cyclists. The House will be aware that over 40 per cent. of injuries to motor cyclists occur to those who are very young. In 1982, which is a useful comparative year—let us not bring party politics into the matter by taking 1979—a motor cyclist between the ages of 16 and 19 was 20 times more likely to be involved in a crash or collision for every mile travelled than a motor cyclist aged 25 or over. That ratio of 20:1 is horrifying, and the House rightly acted in a number of ways.

I am also glad that many people in motor cycling, including the British Motorcyclists Federation and many retailers, have promoted training. The ratio of danger for a young motor cyclist compared with that of a 25-year-old or older motor cyclist has fallen to 13:1. That is a significant improvement, especially when we reckon that between 600 and 700 motor cyclists die each year.

We intend to continue working with people in the motor cycling industry. When they have their rally on Saturday or Sunday, I hope that they will recognise the value of their approval of comprehensive training for young motor cyclists. At present, only 30 per cent. of motor cyclists receive any training before they take to the road.

Mr. David Marshall: If voluntary training has achieved such a substantial reduction in the number of accidents, why not make it compulsory and achieve an even greater reduction?

Mr. Bottomley: We will. We announced our intention to do so, with the approval of the motor cycling world, a few months ago. I pay tribute to the hon. Gentleman, the Chairman of the Select Committee on Transport, who, in a broad speech, covered a number of areas to which the House will want to return.

This has been one of our better debates. We were reminded that the hon. Member for Crewe and Nantwich (Mrs. Dunwoody), who said that she could not move

around the country, managed to move from Exeter to Crewe while a Tory Government were in power. I am indebted to my hon. Friend the Member for Kingswood (Mr. Hayward) for reminding us of that and for pointing out that, when the hon. Member for Newham, North-West (Mr. Banks) said that he was a babe in arms in 1953, his mother must have been quite some person because he was aged 10 at the time, having been born in 1943.

Mr. Tony Banks: I was a child who loved my mother.

Mr. Bottomley: The hon. Member for Argyll and Bute (Mrs. Michie) told us how the urban environment has worsened. I am not sure that she is right. As I go round the country, meeting the 107 highway authorities in England —my road responsibilities stop at the border—I find that the urban environment is improving and that there are more through roads for through traffic. The bypass programme carried forward by the Government allows more people to move around their local roads and allows traffic-calming measures to be introduced. It is interesting to note that, although the hon. Lady's party supports bypasses, there are many areas where local supporters of her party spend their time complaining about road schemes. We recognise the difficulty. We had the same problem with the Channel tunnel when the Liberal spokesman supported the Channel tunnel and the Liberals in Folkestone were spending all their time saying that they opposed it.

The points made by my right hon. Friend the Member for Worthing (Mr. Higgins) are well known to me. I hope to send him a letter in response to those that he has sent me. Perhaps he can then distribute copies of the letter to his constituents who are keenly interested in the road that we cannot call the Worthing bypass, but must call the Worthing relief road. It is controversial. That is why I delayed putting forward what appeared to be the most realistic view of where the road could go. I recognise that this is a disappointment. As one of my ex-constituents now lives on the proposed route for the new road, I realise how strongly my right hon. Friend's other constituents feel about it. My right hon. Friend also made some points about air travel. My right hon. Friend the Secretary of State has dealt with those very effectively.

Mr. Michael Shersby (Uxbridge): My hon. Friend quoted a figure for deaths of motor cyclists of 600. Did he mean in a year?

Mr. Bottomley: Yes.

The hon. Member for Hartlepool (Mr. Leadbitter) made a discursive speech. He talked about travel within the law. It is important to realise how schizophrenic we are about road casualties. On Friday I was looking at red-light jumping with a television crew. That is one of the habits that is getting worse—*[Interruption.]* Forty per cent. of the traffic—*[Interruption.]* The hon. Member for Glasgow, Shettleston (Mr. Marshall) referred to being a Member sponsored by the TGWU; I stand here as a Member not sponsored by the TGWU—*[Interruption.]* Three years ago on "Any Questions" the hon. Member for Kingston upon Hull, East (Mr. Prescott) said that he would give up insulting for the new year.

Mr. John Prescott (Kingston upon Hull, East): I did not.

Mr. Bottomley: The hon. Gentleman is now denying it, but it is true. If he cannot be consistent from one year to the next, I would not vote for him as Deputy Leader.

Going across traffic lights which the car should not do —*[Interruption.]*—red-light jumping, as I described it— was watched by a television camera. The producer asked how to obscure the registration plates of those cars that broke the law. We would not try to obscure the faces of people filmed breaking out of a building society with all the money. No other form of crime kills so many people as driving offences. Driving too close to another vehicle, drinking and driving and many other things that people do are somehow looked on—or used to be—as a game, in which one should have a chance to avoid detection. Would we not tell a good friend not to drink and drive?

It is important to recognise what happens when people drink and drive—one of the biggest single killers on the road. My hon. Friend the Member for Cambridgeshire, South-West (Sir Anthony Grant), the president of the Guild of Experienced Motorists, was speaking for many when he reminded us that two thirds of deaths on the road come from sober road users. The one third caused by motorists and road users who have been drinking have the biggest single cause.

It has been reported in no more than one newspaper that the crime of driving over the legal limit, when people are two, five or 20 times more likely to be involved in a crash or collision, appears to have been halved in the last year and a half. The rate of the crime that has led to 1,000 people a year dying—that is probably an underestimate —has been halved. That is a matter of which the House should be aware and we should recognise how it has happened.

That has not happened as a result of a change in law, although the Government do not rule out change of law in future. It has not happened as a result of a change in sentencing. As has been said, there has not been a change in sentencing, and some people regret that. I can offer no view because I do not comment on the courts' decisions. It has not happened as a result of a change in the amount of money that has been spent. It has changed because the media have treated drinking and driving as news and current affairs. That has helped. It has come about because the brewers have promoted non-alcoholic drinks. Now, 95 per cent. of pubs and clubs have non-alcoholic or low-alcohol beer available. Drink-driving has been 90 per cent. a pub problem, 90 per cent. a beer problem.

It is also worth recognising that the only change that would come with full discretionary testing would be that the police would be able to test people whom they believed had not been drinking. We look forward to receiving a detailed submission from the police on what change they would like in addition to a restatement of the existing law.

I make a plea to people inside and outside the House. Instead of debating random breath testing, they should make it plain that to cut transport casualties people should not drink and drive, offer alcohol to drivers or accept lifts from drinking drivers.

If we reduce those figures as fast as we have reduced those for crashes and risks in the air, on the underground and on the railways, we shall be able to move around Britain more safely. The figures for air misses are going down and the situation on the railways and the roads is improving. We have much of which to be proud. I ask the House to reject the Opposition's motion and to support the Government's amendment.

Question put, That the original words stand part of the Question:—

Question accordingly negatived.

Question, That the proposed words be there added, *put forthwith pursuant to Standing Order No. 30 (Questions on amendments), and agreed to.*

MR. SPEAKER *forthwith declared the main Question, as amended, to be agreed to.*

Resolved,

"That this House congratulates the Government on its success in developing and implementing policies to provide the public and industry with an efficient transport system, giving both value for money and an improved quality of service; welcomes the increased investment in transport infrastructure which is accompanying a reduction in the burden on the taxpayer; applaudes the increasing involvement of the private sector in transport projects; and reaffirms the Government's overriding commitment to the safety of travellers,".

Orders of the Day

Education Reform Bill

Lords amendment in lieu of a Lords amendment disagreed to by the Commons considered.

Mr. Speaker: I draw attention to a misprint in the Lords amendment. In the bold cross-heading, the reference should be to clause 117, not to clause 115. I have selected the amendment to the Lords amendment in lieu, in the names of the hon. Member for Blackburn (Mr. Straw) and others.

Clause 117

THE FUNDING COUNCILS: SUPPLEMENTARY PROVISIONS

Lords amendment: In page 115, line 34, at end insert—

"(3A) Before exercising their discretion under section 115(6) or (as the case may be) section 116(7)(a) of this Act with respect to the terms and conditions to be imposed in relation to any grants each of the Funding Councils shall consult such of the following bodies as it appears to the Council to be appropriate to consult in the circumstances, that is to say—

(a) such bodies representing the interests of relevant institutions as appear to the Council to be concerned; and

(b) the governing body of any particular relevant institution which appears to the Council to be concerned.

(3B) References in subsection (3A) above to relevant institutions are references—

(a) in relation to consultations required to be carried out by the Universities Funding Council, to universities; and

(b) in relation to consultations required to be carried out by the Polytechnics and Colleges Funding Council, to institutions within the PCFC funding sector."

Read a Second time.

10.16 pm

Mr. Jack Straw (Blackburn): I beg to move, as an amendment to the Lords amendment in lieu, at end of subsection (3A) insert—

'(c) such organisations representing staff as appear to the Council to be concerned, and

(d) in relation to consultations to be carried out by the Polytechnics and Colleges Funding Council, such local authorities or their associations, as appear to the Council to be concerned.'.

We all thought that we had had our last debate on the Education Reform Bill last Tuesday, but some of us at least are happy to be back again.

I was very sorry—as, I am sure, many other hon. Members were—to learn yesterday evening of the departure of the hon. Member for Dartford (Mr. Dunn) from the post of Parliamentary Under-Secretary of State for Education and Science. I should like to place on record our tribute to his unfailing courtesy and good humour throughout the passage of the Bill.

I offer the Secretary of State and his ministerial colleagues my commiserations for having had wished on them—without consultation or agreement, I understand—the hon. Member for Coventry, South-West (Mr. Butcher). I only hope that his strike record in offering advice to his senior Ministers is slightly better in future than it was at the Department of Trade and Industry. I have a cutting from *The Times* in which, only a few months ago, the hon. Gentleman was reported as having promised:

"Extra cash may be made available for the HOTOL space plane project."

One can be wrong sometimes. In the case of the hon. Gentleman, one can be wrong most of the time. He wrote in *The Times* on one occasion:

"I'm no deadbeat, and you can quote me."

The Secretary of State for Education and Science (Mr. Kenneth Baker): I thank the hon. Gentleman for his kind words about my hon. Friend the Member for Dartford. I should like to echo his words, because my hon. Friend has made a signal contribution to the work of the Department and to the formation of the Bill and its passage through the House.

The hon. Gentleman's comments about my hon. Friend the Member for Coventry, South-West are absurd. I am pleased to welcome my hon. Friend aboard. He worked for me some years ago at the Department of Trade and Industry on improving technological education. If one thinks of the rather lacklustre and humdrum performance of the Opposition team during the passage of the Education Reform Bill, it seems that it is not only the Government Benches "that need a reshuffle" but the Opposition Benches as well.

Mr. Straw: That was poor, even by the standards of the Secretary of State. I was going on to say that part of the problem of the hon. Member for Dartford was that he mocked the excessive bureaucracy in the Secretary of State's Bill. He mocked the national curriculum and called it a three-wheeled bicycle and a fairy tricycle, and he paid the price for that. His departure serves to remind the House of something which is central to the issues raised by the amendment—the transient nature of Ministers.

Throughout the proceedings on the Bill, when we have suggested the powers of the Bill could be misused, the Secretary of State has stood up and said, "Trust us." Some of us may be willing to take the Secretary of State, or even the Under-Secretary of State, at his word, but the problem that we all face is that Ministers are transient.

That point was made by Lord Swann in the other place, when he explained the importance of amendments that have now been accepted in the other place requiring consultation. He said that the Secretary of State

"is to be congratulated on those promises; they have gone down very well. But—and we believe it is a serious 'but'—Secretaries of State do not last forever; far from it. Their words are not binding on their successors. Therefore, while higher education can feel more confident about the immediate future, there can be no certainty whatever about what will happen as the years go by. Ministers, Governments and financial crises will no doubt come and go. Bureaucracy has an alarming tendency of escalating without anyone realising what is going on except its victims."—[*Official Report, House of Lords*, 25 July 1988; Vol. 500, c. 36.]

Mr. James Pawsey (Rugby and Kenilworth): Will the hon. Gentleman note that the Education Reform Bill has gone through, after nine months or so, virtually unamended? Does he put that down either to the inspiring quality of the legislation or his uninspiring leadership of the Opposition?

Mr. Straw: In so far as the legislation is unamended, I put that down to the bone-headedness of Conservative Members, and I express my commiseration to the hon.

Member for Rugby and Kenilworth (Mr. Pawsey) for the fact that he was not offered preferment in the reshuffle yesterday.

Mr. Pawsey: At least I do not wear white jackets.

Mr. Straw: At least mine is clean, unlike that of the Secretary of State.

Mr. Paddy Ashdown (Yeovil): While we are on the subject of amendments, I am sure that the hon. Gentleman will recall that, far from the Bill being unamended, as the hon. Member for Rugby and Kenilworth (Mr. Pawsey) suggested, I believe that 500 amendments were tabled by the Government alone.

Mr. Straw: The hon. Gentleman is exactly right. There were 569 amendments made in the House of Lords, and, as we all recall, hundreds were made in the House of Commons because, as I have explained, the Secretary of State fails to think things through or to think ahead. There are a whole series of time bombs within the Bill. Again, we commiserate with the Secretary of State that he was not offered a chance to escape in the reshuffle.

The importance of the amendment is to tie down the Secretary of State and the funding councils to ensure that there is proper consultation. Paragraphs (a) and (b) require that the consultation should take place with

"such bodies representing the interests of relevant institutions as appear to the Council to be concerned; and . . . the governing body of any particular relevant institutions which appear to the Council to be concerned."

Obviously, that can include the council and the senate of the university or the governing body of the polytechnic and their representative national bodies, the Committee of Vice-Chancellors and Principals and the Committee of Directors of Polytechnics.

The amendment is unexceptionally worded, so I hope that the Under-Secretary will accept it. It seeks to add a requirement that the trade unions or other staff organisations be consulted. I make it clear to the House and to the Under-Secretary that that is at the discretion of the council. It is to ensure that there is a clear limit, obviously to the extent of consultation as is relevant, and, in relation to consultations carried out by the Polytechnics and Colleges Funding Council, to such local authorities or their associations as appear to the council to be concerned.

The consultations take place in circumstances in which terms and conditions are imposed upon the award of grant by the relevant funding councils. Such terms and conditions have not before been imposed within a statutory framework. Local authorities do and will continue to have an interest in what polytechnics are doing, even though polytechnics may no longer be part of their estate. There is a clear relationship between the courses that will be offered in many local authority colleges, the way in which local authorities have been planning provision at further and higher education level, and what polytechnics are doing. Therefore, it is important that there should be laid down a requirement for consultation with local authorities and their associations, but only in respect of polytechnics.

The Parliamentary Under-Secretary of State for Education and Science (Mr. Robert Jackson): This debate represents what will be the last work in the parliamentary debate about the Education Reform Bill. It is entirely in keeping with the way in which they have conducted themselves throughout the debates that Opposition Members should have made their last word the whimsical persiflage of personalities of the hon. Member for Blackburn (Mr. Straw). I do not bear the hon. Gentleman any ill will. We are all grateful to him for the way in which he and his colleagues have let us off so lightly. It is entirely in keeping with the whole tenor of the Opposition's policy, or lack of it, that the hon. Gentleman's words should have fallen so far below the level of the issue.

The issue is whether the new higher education funding councils, in consulting as they think appropriate, should be obliged to consider consultation not only with institutions in their respective sectors and their representative bodies but with trade unions and, in the case of the Polytechnics and Colleges Funding Council, local education authorities.

I have two observations to make about the proposals. First, as a matter of course, there will be widespread consultation between funding councils and all relevant bodies. Indeed, one could say that consultation is inscribed by definition in the idea of contract funding, which is necessarily reciprocal in character. To meet the concerns that were expressed in another place, the Government have amended the Bill to give explicit recognition to the inevitable necessity of consultation. To do so, we must define the bodies with which consultation must necessarily be considered, but to include some bodies by mentioning them in the Bill does not mean the exclusion of others by failing to mention them.

Therefore, the Opposition's amendments are unnecessary, and are based on a logical fallacy. Moreover, it could be said that they are not only unnecessary but damaging to the interests that Opposition Members have at heart. The longer the list of bodies that the list specifies must be considered, the greater is any presumption that bodies that are not mentioned should not be consulted.

Mr. Straw: The Under-Secretary of State must know that that argument simply cannot wash in circumstances in which he and the Secretary of State have already agreed to two categories of bodies. His observation is nonsense. Does he agree with the purpose of the amendment, which is to ensure that it is clear that the two bodies should be under an obligation to consult, among others, trade union staff associations and, in the case of the PCFC, such local authorities or their associations as appear to the relevant councils to be concerned?

Mr. Jackson: No, I do not accept the hon. Gentleman's proposition, and I am about to explain why. The proposition and the amendment are typically ill-conceived and backward-looking. Hon. Members should note how ill-conceived is the idea of an obligation on funding councils to consider consulting unions. I wonder whether the hon. Gentleman and his colleagues have considered, even for a moment, the implications for the autonomy and self-direction of our higher education institutions if funding councils consider themselves obliged to intervene directly in their internal affairs and to establish direct contacts, bypassing the constitutional structure of the institutions, with selected interests inside that institution. That is the problem raised by the first branch of the Opposition amendment. It is a thoroughly ill-considered proposal. The only excuse for it is that we know from the Opposition's form throughout the debates on the Bill that it was probably hardly considered at all.

[Mr. Jackson]

10.30 pm

Then there is the backward-looking flavour of the Opposition proposal to oblige the PCFC to consider consultations with the local authorities and their associations. This shows that Opposition Members have not come to terms with the reality of what is happening in the polytechnics and colleges. These institutions have outgrown the tutelage of the local education authorities.

We owe a debt of gratitude to the local authorities for what they have done to bring the polytechnics and colleges to maturity, but they have grown up now, and the Opposition's emphasis on local authority interest in this matter is thoroughly out of date.

Ms. Hilary Armstrong (Durham, North-West): Does the Minister acknowledge that the local education authorities will continue to have an important role to play in adult education, that the polytechnics will be a crucial part of that, and that consultation, if only at that level, will be essential to achieve the flexible arrangements that we discussed at length in Committee?

Mr. Jackson: There is no need to make extra provision for that, because consultation is specified in the legislation at various points in the circumstances mentioned by the hon. Lady.

Mr. Harry Greenway (Ealing, North): In the past, local authorities have had to sanction even the smallest appointments—for example, for colleges of higher education. We need a clean break from that system, which tied the colleges absurdly closely to the local authorities. The Bill will provide that change, and that is to be welcomed.

Mr. Jackson: My hon. Friend describes accurately the sort of world Opposition Members hanker after. It is the world they wish to restore. It is the world from which we are breaking by this Bill.

As this is almost the Government's last word in the parliamentary debates on the measure, I will make a few comments which try to aspire to the level which is appropriate to this historic piece of legislation.

Mr. Pawsey: Would my hon. Friend agree that the Bill can truly be called great and that it will take its place——

Mr. Deputy Speaker (Mr. Harold Walker): Order. We are debating a narrow amendment about consultation. Let us stick to that.

Mr. Jackson: My hon. Friend is right, in that the philosophy of this measure has throughout been to release new energies and a new dynamism in our public education by devolving power and by calling in interests to which not enough weight has been attached in the past.

Whether in our schools or in our institutions of higher education, the philosophy is the same—to strengthen choice and competition and enhance institutional self-determination on the basis of wider accountability. History will recognise, as have both Houses, the seriousness and significance of these commitments on the part of the Government and embodied in the Bill.

Mr. George Walden (Buckingham): My hon. Friend the Minister has left me little to say, but there is something to add—in a way to contradict him—because the tone of the hon. Member for Blackburn (Mr. Straw) was appropriate to the subject, so I would not upbraid him as my hon. Friend did. I detected a tone of levity in the hon. Gentleman's speech which spilled over into the amendment. It is not entirely serious of him to introduce such an amendment now.

It is inconceivable, although the hon. Member for Blackburn may contradict me, that he has consulted the directors of polytechnics or that he has gained a majority of their support for the proposal that local authorities should be consulted according to statute. I say that not out of primitive hostility to local authorities but because polytechnic directors to whom I have spoken realise that their institutions will remain in the middle of local communities. We all know what that implies commercially.

Directors will continue to be rational men and women and to have such contact as is necessary with local authorities to ensure that their policies coincide with local interests. It is indeed rather backward-looking to try to force the PCFC into a duty which directors of newly freed polytechnics will carry out of their own accord.

The hon. Member for Blackburn is wearing a white jacket. He is appropriately attired to take himself, and the amendment, away.

Mr. Ashdown: I had not intended to speak, but——

Mr. Patrick McLoughlin (Derbyshire, West): But the hon. Gentleman just could not resist it.

Mr. Ashdown: The hon. Gentleman may be right—or perhaps the sheer bankruptcy of the arguments advanced by the hon. Member for Buckingham (Mr. Walden) and the Minister have induced me to speak.

As has been the case throughout——

Mr. Walden: Where was the hon. Gentleman last week?

Mr. Ashdown: The record will show that I was here last week. The hon. Gentleman's absence and his ignorance on these matters are betrayed by his comment.

Mr. Walden: I wish to pick the hon. Gentleman up on a substantive point. He says that he was here last week. If he had been here last week, he would have heard his colleague contradict him on an absolutely fundamental matter in this Bill—tenure. I wonder what the hon. Gentleman has to say about that——

Mr. Deputy Speaker: Order. I hope that the hon. Member for Yeovil (Mr. Ashdown) will not respond to that point, but will confine his remarks to the amendment.

Mr. Ashdown: The record shows that I was here during that debate.

The Minister and, to an excessive extent, the hon. Member for Buckingham have followed the classic Government technique, which has been employed throughout our proceedings on the Bill. They do not argue the case of the amendment but set up straw men the better to knock them down.

I hold no brief for the amendment, but it suggests nothing more than that reasonable consultation might take place. It does not provide, as the hon. Member for Buckingham said, that consultation must take place. The

Minister suggested that the amendment would impose a duty to consult, but it would merely give discretion to consult.

We have had ample evidence of the fact that the Government have no concern for, or any belief in, consultation. They have shown that from the moment the Bill was introduced. All they are concerned to do is to ram through their ill-thought-out proposals, using the procedures of the House as undemocratically as possible.

The amendment is perfectly reasonable. It suggests merely that, if grants affect staff or the local community, both might be consulted. What an outrageous proposal. The Government have turned their face against reasonable consultation and have sought to introduce a huge structure of compulsion.

In this small and perhaps insignificant debate, the Government's arguments have not been untypical of their approach to the Bill, which has been inappropriate, muddle-headed and wrong.

Mr. Martin Flannery (Sheffield, Hillsborough): The essence of democracy is consultation with the appropriate organisations, so that democracy rules rather than dictatorship. When my hon. Friend the Member for Blackburn (Mr. Straw) tabled the amendment, he was not giving voice to an isolated argument late at night. It was the continuation of a huge debate that had occupied the House of Commons for nearly 250 hours in the Chamber and in Committee. That debate has focused on a vast Bill, the contents of which are sufficient for five major Bills. It reflects the haste with which the Prime Minister has forced the Secretary of State to bulldoze the Bill through the House. This short debate reflects the continuation of democracy and consultation.

The Government are feeling slightly drunk with power. They are feeling dizzy with success. That is the result of the Bill being pushed through Parliament against the wishes of many Conservative Members. We are all fearful of what the Bill will mean when it becomes an Act after it receives Royal Assent on Friday. We are worried about the effect that it will have on an education system that took well over 100 years to build in a democratic manner. The system is now to be violated by an elected dictatorship.

The Government's majority is huge, for reasons that will be set out in future history books. An ex-Foreign Secretary—Lord Pym—once referred to the danger of misusing such a huge majority. He was promptly sacked by the Prime Minister. Lord Pym was merely referring to the very dangers to which we are now exposed by the enactment of the Bill. We wish to ensure that the teachers, their unions and the local education authorities—the authorities represent a democratic system that was carefully constructed over a long period—are consulted.

The hon. Member for Buckingham (Mr. Walden) was a member of the Select Committee on Education and Science, but he rarely attended its meetings. He then became a Minister and showed himself to be a failure, as he was as a member of the Select Committee. The hon. Gentleman was kicked out of the Department of Education and Science, and let him face that. He should stop lecturing us about democracy, of which he knows nothing. We, the Opposition, are democrats, and we are struggling for democracy against this appalling Bill.

Mr. Walden: Will the hon. Gentleman give way?

Mr. Flannery: I am still on my feet, Mr. Deputy Speaker.

Mr. Walden: I do not normally fuss about these trivial incidents, but I wish to introduce a small matter of fact. I was not kicked out of the Government; I resigned.

Mr. Flannery: As a matter of fact, the hon. Gentleman is a trivial incident.

That for which my hon. Friend the Member for Blackburn is asking is surely entirely reasonable. I am sure that the hon. Member for Buckingham and the hon. Lady, who has just entered the Chamber, will allow us to have it.

Dame Elaine Kellett-Bowman (Lancaster) *rose*——

Mr. Flannery: I apologise to the hon. Lady, who has been in her place throughout the debate. I was referring to the Minister of State.

In the interests of democracy, I hope that Conservative Members will accept the gentle amendment that we have introduced. It merely asks for the proper democratic process to be completed. Surely the Government can easily concede that.

All that we are asking is that those organisations that represent teachers who have spent their lives in the education system should be allowed to participate in a proper democratic consultation process. If there is something wrong with that suggestion, the Secretary of State should say so and explain why. He should also explain why he would not agree to proper consultation with the long-established local education authorities, which are elected.

10.45 pm

When the Secretary of State destroyed the negotiating rights of the teachers—we shall debate that again tomorrow night—his action was condemned by the International Labour Organisation, which is an agency of the United Nations.

The Minister is aware that we are struggling against anti-democratic processes. We want the democratic process of consultation to be undertaken with the proper democratic organisations. The Minister must explain why we are wrong to ask for that. If he does not, we shall be forced to believe that he is not interested in democracy and that neither his party nor the Prime Minister, who kicks Ministers from pillar to post and sacks them if they disagree with her, is interested in democracy.

Ms. Armstrong: We are here again to discuss the Education Reform Bill, having thought that we had finished with it. Why?

We are discussing yet another amendment that has been forced on the Government by the Lords. It is clear that the Lords insisted upon that amendment yesterday because they do not trust the Secretary of State. All his smooth words to the vice-chancellors have not reassured them.

The Lords thought that they would simply have to ratify what we agreed last week, but they have pressed yet another amendment, which insists on consultation. They do not trust the process that the Secretary of State has set in train regarding the arrangements between the Universities Funding Council, the Polytechnics and Colleges Funding Council and the universities and polytechnics.

[Ms. Armstrong]

The right hon. Gentleman appears to be much more frightened of vice-chancellors and bishops than he is of any Member of the House.

Mr. Derek Fatchett (Leeds, Central): He is frightened of the Prime Minister.

Ms. Armstrong: Yes; I suspect that he is aware of the Prime Minister's influence.

The Lords were not happy with the consultation process and felt it necessary to identify particular groups that should be consulted. The amendment tabled by my hon. Friend the Member for Blackburn (Mr. Straw) extends that argument.

In uncharacteristic form, the Minister dealt with my hon. Friend's amendment in a cavalier manner and he re-emphasised the impression held by many of us, namely, that the Government hold teachers and their staff organisations in contempt and that they also have contempt for democratically elected local education authorities.

That is the tragedy of the Government's response tonight. If the Minister had been his normal self when replying to my hon. Friend we would not have been so suspicious. However, because of the manner in which he rejected our amendment, I am concerned that, once more, the message from the Government to teachers and to LEAs is that the Government are sick to death of them and would like them to disappear. We cannot continue an education service without the enthusiastic support of staff at schools and institutions of higher and further education. Our amendment, meek and mild as it is, would reassure them that the Government were not contemptuous of them and were prepared to consult them when appropriate.

We raised the issue of education authorities several times in Committee. We told the Government that the message going out from them was that they had no faith in local education authorities. The Government kept telling us that we had things wrong and that they saw a major role for the authorities in the future of education. But the Government are destroying any attempt to give local education authorities a role in the Bill.

I was surprised by the Minister. I know that he has been seeking ways of providing wider access to higher education. We agreed in Committee that a flexible intermingling of local education authorities, voluntary organisations and the institutions of higher education was essential to opening up access. But again the Government reject the opportunity to provide such co-operation. We can ensure that consultation takes place, if we have a good group of people who continue to be concerned. But, with the last breath of this Bill, the Government are sending out signals yet again to teachers and local education authorities, telling them they are not prepared to write their role into the Bill. That is sad, but is probably a true reflection of the mood of the Government.

Mr. Kenneth Baker: The ship is almost in harbour. This is the last little bit with which we have to deal. Tonight's debate has been typical of others that we have had on the Bill.

The hon. Member for Sheffield, Hillsborough (Mr. Flannery) got hold of the NUT brief yet again and read it right through. The only original part of his speech was his calling me drunk with power and dizzy with success: very original. There is much to be proud of in the Bill, and there has been a great deal of success. As the hon. Member for Durham, North-West (Ms Armstrong) said, we are in the final minutes of debating the Bill in the House. Now it will be discussed, debated and implemented in the country over the coming months and years.

I suppose that this is positively the last appearance by the hon. Member for Yeovil (Mr. Ashdown) as education spokesman for the Liberal party. In Committee and on Report we discovered that he was the master of the passing brief. He immediately mastered and spoke to any brief that passed across his desk——

Mr. Ashdown: The right hon. Gentleman has said that three times now.

Mr. Baker: This is like the Bellman:
"What I tell you three times is true."

Mr. Ashdown: I congratulate the Secretary of State on getting that little speech well laid off. This is the third time that he has repeated it almost word for word. I am interested in hearing whether there is any variation by the end.

Mr. Baker: I shall add to it. The one thing that the hon. Gentleman showed in Committee was that he had no profound philosophical view on education, or any ideas.

Mr. Deputy Speaker: Order. I hope that the Secretary of State will have regard to what I said earlier, and address himself to the amendment. We have had Second and Third Reading debates. Perhaps the right hon. Gentleman will stick to the amendment.

Mr. Baker: I stand chastened. I was trying to reply to the speech made by the hon. Member for Yeovil and show that it was superficial and characteristic of the hon. Gentleman. The shallowness of the hon. Gentleman runs very deep.

My hon. Friend the Member for Buckingham (Mr. Walden) supported the views expressed by our hon. Friend the Under-Secretary of State, who handled the higher education part of the Bill outstandingly well. My hon. Friend the Member for Buckingham said that these amendments are inappropriate. I am staggered that the Labour party has suddenly stumbled upon consultation with the unions, because, when the other place debated the amendment yesterday, the Labour party was very content with the amendment as it came back. The Opposition are engaged in last-minute thinking, dredging around to have a little three-quarter-hour debate late at night. The Opposition did not move the amendment and the Labour spokesman, Lord Peston, expressed complete contentment with the amendment moved by the Government.

The first of the two proposals is that the Universities Funding Council and the Polytechnics and Colleges Funding Council should consult the unions. That would be inappropriate, because the right process of consultation is between the UFC and the PCFC with the universities and the polytechnics.

Mr. Straw: Once again the Secretary of State has not done his homework. Lord Peston did not express complete satisfaction with the amendment, but said only that it was an improvement and better than his worst fears. That is a very different way of putting things. Lord Peston helped me draft these amendments, as did other

peers who had been concerned with the matter. Why are the Secretary of State and the Under-Secretary so resistant to the "dangerous" idea of consulting trade unions or local authorities, when in each case the council—the PCFC or the UFC—is given a discretion about whether to hold such consultation? It will take place only when they feel it is appropriate. What is the Secretary of State scared of?

Mr. Baker: The hon. Gentleman should read Lord Peston's speech more carefully.

Mr. Straw: I have.

Mr. Baker: So have I. Lord Peston clearly said that he did not have any of these ideas. This was debated yesterday in the House of Lords. He may well have consulted the hon. Gentleman this morning about these amendments, but why did he not put them down in the House of Lords? He did not table them yesterday, so clearly they were a matter of no great concern to him less than 24 hours ago.

Mr. Straw: That is the fault of the Secretary of State, who gave the House of Lords no time whatever to put down any amendments. He knows that the amendment was moved as a manuscript amendment in the House of Lords.

Mr. Baker: The amendment was tabled yesterday morning in the House of Lords, and if Lord Peston had wanted to put down the amendment he had plenty of time to do so. Plainly, he had not thought of it.

I shall now answer the hon. Gentleman's substantive point about consultation with trade unions. At present the UGC does not consult the different unions where it is determining the grants given to universities. That is right. *[Interruption.]* It is the terms and conditions of the grant. It does not do that now and it would be entirely inappropriate for it to do so. The right relationship is that the UFC, replacing the UGC, should consult the university concerned. That is right, because the university is the employer of the people represented by the unions and it would be constitutionally improper for it to consult the unions behind the backs of their employers.

We have already committed ourselves to setting up a consultative committee for local authorities and the PCFC, and it will deal particularly with the divide in those institutions inside and outside the PCFC. The proposal, like many of the proposals put forward by the Opposition about the Bill, is badly thought out, inappropriate and unnecessary. I invite the House to reject the amendment.

Mr. Andrew F. Bennett (Denton and Reddish): We have just had an amazing performance by the Secretary of State. He congratulated the Under-Secretary of State, his hon. Friend the Member for Wantage (Mr. Jackson), on the way in which he dealt with the higher education part of the Bill, but did not trust him with a little winding-up speech. Five minutes before the Secretary of State started, he whispered to the Under-Secretary of State that he could do the winding-up speech, by leave of the House. He then snatched the brief away and dealt with it himself. We saw that happen time after time in Committee. We remember how he sat through the account of the hon. Member for Dartford (Mr. Dunn) of the national curriculum and then insisted that he had to jump in and save the ship on that occasion.

I should like to pay tribute to the hon. Member for Dartford for his long service in the Department and for enlivening the Committee proceedings. It is a little sad that he should get his cards before the Bill is finished and without any holiday pay. I hope that the hon. Member for Coventry, South-West (Mr. Butcher) will deal as effectively with school closures as did the hon. Gentleman. It is a difficult task and any hon. Member who had to deal with the hon. Gentleman on the subject would pay tribute to the thoroughness with which he tackled the matter. It is interesting to note that the Secretary of State, in his knockabout performance, did not confirm or deny the fact that the hon. Member for Coventry, South-West had been imposed upon him, rather than chosen by him.

However, what is most interesting is why we have had such an ill-tempered debate, in which the Government have protested so much about what they claim to be our incompetence. I assume that, if we were really incompetent, they would not have to draw attention to the fact. Their claims that we are incompetent are an attempt to cover up the real problem, that the Secretary of State has once again had an amendment forced on him that he does not want. As I understand it, there was pressure in the House of Lords for further concessions, and the Lord Chancellor told him that he would have to come up with the amendment. The amendment was produced and he is now pretty peeved about it, and he has shown his peevishness tonight. Instead of setting out to the House clearly how the Secretary of State envisaged the consultation process taking place, he has tried to criticise us for suggesting some of the people who should be included in the consultation process.

This would have been a last opportunity for the Government to clear up how they will co-ordinate funding between the universities body and the public sector body and how far the consultation process will go. It would also have been an opportunity for the Government to throw in the missing part of the equation; they have still not said what they will do about student fees, which are clearly fundamental to those institutions. We realise that the Government have got themselves into a further muddle and have had to delay that matter, but anyone who wants to see a rational process for the funding of those bodies must know what will happen to the fee process.

If the contracts are to be developed, it is important that the proper consultation takes place. Will the Secretary of State tell us now who should be involved in the consultation process? What will be the position of students? Will they be involved in the consultation process? They will be one of the groups most affected. Will the Government talk to the unions representing the employees, whether the professional academics or the non-academics, as they will be considerably affected by any contracts undertaken? It is all right for the Secretary of State to say that it is up to the institutions, but he knows perfectly well that in all those areas, there are national negotiating bodies, and that any contracts negotiated between the funding bodies and the individual institutions will have to take into account those national contracts that apply in terms of conditions of service.

It seems absolutely logical that the Government should include in their consultation both the academic and the non-academic unions on the campuses. Why on earth should the Government attack the idea of consultation with local education authorities? As my hon. Friend the Member for Durham, North-West (Ms. Armstrong) has

[Mr. Andrew F. Bennett]

pointed out, access courses are important. If we are to have co-ordination between further education and higher education, as has happened in many of our polytechnics and colleges of higher education over recent years, it is important that there is a link between the access course and the course that students will pursue later. If the course that they go on to is being funded by the funding body on a contract basis, that must be properly established. It is fundamental that the two funding bodies should carry out consultation.

We must also remember, when the Government so readily denigrate local authorities, just how substantial local authorities are as employers. Many qualified planners, architects and so on go directly into local authority employment. Again, it is logical that in working out contracts for developing courses in such areas there should be consultation with the local authorities.

As so often, the Government have missed the opportunity to use time in the House of Commons to inform people outside how they see the consultation process going along. The Government do not believe in trying to obtain consensus as a result of consultation; they believe in dictatorship. Time after time, in the other place and as a result of all the pressure groups outside, the Government have been persuaded—almost forced—to change their mind and put consultation into the legislation.

The Opposition believe that the Government should not only have consultation in legislation, but should carry out its spirit and aim for consensus in higher education rather than operate by Government diktat. I ask the House to support the amendment.

Amendment negatived.

Question, That this House doth agree with the Lords in their amendment in lieu, *put and agreed to. [Special Entry.]*

Social Security

11.6 pm

Mrs. Margaret Beckett (Derby, South): I beg to move,

That an humble Address be presented to Her Majesty, praying that the Child Benefit (General) Amendment Regulations 1988 (S.I. 1988, No. 1227), dated 15th July 1988, a copy of which was laid before this House on 15th July, be annulled.

It may be for the convenience of hon. Members if I make it clear at the outset that as the regulations that we are debating represent a degree of concession from the harsh legislation inflicted on young people by the Government, we shall not be voting against them. However, we do want to take the opportunity to express not just our reservations, but those of the many groups and organisations who seek to help the vulnerable young, about the implications of what the Government are doing to save, as I recall, some £97 million. I recognise that the Government argue that there are some commensurate costs. However, there is no argument but that a substantial net saving is expected from the legislative cuts that the regulations reflect.

Let us first put on record that the Government have removed the rights to benefit from all 16 and 17-year-olds —not from those who refuse youth training scheme places, not from those who refuse jobs, or any of the other glib excuses that the Government have trotted out over a period of time. Not one 16 or 17-year-old in the country will enjoy the right to benefit when the regulations are approved, as I presume they will be, this evening. But the Government will allow some exceptions to that general deprivation, exceptions which, although welcome, are inadequate in their scope and degree.

We do not query the exemptions that the Government are allowing, but we question how they will work, who will not benefit and how the regulations fit into the general scope of the new social security scheme—a point with which I should like to begin.

Although the age of majority is now 18, not 21, the Government are setting a new age of majority for those forced by circumstances to depend on benefit and setting it at 25. The imposition of a junior rate of benefit below that age, and, still more, its consequential effects on an aligned scheme of housing benefit, has saved the Government, again from memory, £150 million to £200 million.

The attitude that sets that as a new age of majority permeates a wide range of social security law. The assumption seems now to be that all under-25s live at home in a happy and supportive family who welcome their presence and, with the financial and other resources, accept without any serious difficulty their continuing, indeed their permanent, presence up to the age of 25 in their childhood home.

It seems to be only with the utmost reluctance that the Government concede that there are any exceptions to that rosy picture and, with still more reluctance, accept any responsibility to help those for whom that picture is outside their experience—a particularly dangerous assumption when dealing with those aged 16 or 17.

The Government seem to be saying—in this I am following their advice and former slogan of looking at the action and not the words—that if those are not the family circumstances of the young, they should be, and it is no concern of the Government that they are not. It is easy to

say that there ought not to be young people who are homeless, jobless and destitute wandering the streets—we could all agree with that—but there are, and the Government's policies and lack of recognition of the wider scope of the regulations make matters worse.

During the debates earlier this year on the Social Security Bill, of which these are consequential regulations, we asked what would happen to young people receiving income support but who had to wait two weeks. We asked how they were to make £150 bed-and-breakfast payments in London, for example, not because that represented the best type of lodgings for young people, but because it offered the only chance of a bed without strings that most of them would have. The administrative convenience of paying income support in that way alone causes problems for 16 and 17-year-olds in particular.

Recently, the Minister suggested to concerned organisations that payment could be made on a daily basis, enabling people to book into a hotel. However, experience shows that that arrangement is not acceptable to the people running such establishments, and it is not accepted. The Minister also suggested that those starting to receive income support normally already have a regular income, so the payment of income support in arrears does not matter and is simply part of the general pattern of payment in arrears. Again, that is not likely to apply to 16 and 17-year-olds in particular, who may have just left home.

The relationship between benefit and the YTS makes matters even worse. Those organisations which in the past have sought, with some difficulty, to help the young homeless must try to find them not just a bed but a job or a training place if they are to enjoy any income at all. Without the one, they probably will not get the other, and they may be caught in a vicious spiral of despair and homelessness. Now that such young people have no right to income support, and none to an urgent needs payment —which, basically, does not exist anyway—all that they could possibly be offered, as has been suggested, is a crisis loan. However, the people with whom these regulations deal will not be offered a crisis loan because the young, homeless or not, have a low priority need under the Government's guidelines for crisis or any other loans.

Even if the young were not rated as having a low priority need, in the case of the Westminster office, for example, officers took one look at the needs payments made to the young homeless last year and realised that if crisis loans were made to the same people this year, there would be no social funds left for any other claimants.

When one considers the framing of the regulations and the exceptions they embody, one returns again and again to the basic theme that the Government appear to be adopting towards the young—that they should not be homeless or jobless. If they are, what then? To hell with them? That may be an all-too-accurate description of the fate that will befall the most vulnerable. How can suitable or any YTS places be found, and how fast? If they can be found at all, it will take time. Meanwhile, how are those young people to live and eat? How are they to keep clean so that they may impress a prospective employer?

The Government's rules are not merely unjust; they are impracticable. During our debates on the Social Security Bill, we asked Ministers what would happen if it proved impossible to find enough YTS places for all 16 and 17-year-olds who might need them by September. The Minister of State said that that was a matter for the Department of Employment, and it had assured him that everything would be all right. The Under-Secretary of State, who, mercifully for him, has now left that slot, was not so wise. He kept saying that it would not happen. Over and over again, the hon. Gentleman, who now occupies high office in the Ministry of Transport, assured the House that it would not happen.

I have been asked to bring to the Minister of State's attention the situation in Cleveland, using figures from my hon. Friend the Member for Redcar (Ms. Mowlam), who, sadly, is unable to be present. In Cleveland, there are currently on the books 750 pre-1988 school leavers for whom one YTS place is available; there are a further 250 Easter school leavers for whom no YTS place is available; and there are, of course, this summer's school leavers still to come. How are all those extra YTS places to be magicked out of thin air between now and September? If they are magicked out of thin air, we are still confronted by the anxiety that was most forcibly expressed in Committee—that the number of places, not in any sense the quality, will take precedence. That is likely to lead to a mismatch that is even greater than usual between the opportunities that should be available and are right for the individuals involved and those into which they are being forced because otherwise they will not receive benefit. My hon. Friend the Member for Redcar has asked me to seek confirmation from the Minister that if our fears turn out to be justified—if, by September, there are not enough places, whether it be in Cleveland or elsewhere—he will make a commitment to consider extending the bridging allowance beyond the eight weeks for which it could now be on offer.

The regulations offer a possible entitlement to income support for a young person who has left home because of abuse. I suppose we should say, "Thank God for small mercies." But how is that to be judged? Will there be specially trained officers, skilled at dealing with an emotionally explosive situation? Or will the poor DSS counter clerk be told to demand proof—and what kind of proof—or simply to reject most such claims? Those problems, too, arise directly from the decision to remove all right to benefit.

There seem to be anomalies of timing. The framing of the regulations suggests that even young people whom the Government accept cannot live at home—because they have no home, have been kicked out of the home or have been abused in it—will have the limited protection that is offered withdrawn after the child benefit extension period. In other words, those identified by the Government as being at risk will get three to four months' grace to find a YTS place, and after that they will have no rights.

Ms. Joyce Quin (Gateshead, East): Does my hon. Friend agree that the regulations carry a risk of making the problem of homelessness in London even greater, particularly for young people who are attracted to London from the north and other places where unemployment is high because they think that there is a chance of a job, but who will find it almost impossible to get accommodation or to survive because of the lack of benefit? The Government do not seem to have taken that problem into account.

Mrs. Beckett: My hon. Friend is right. The problem is causing great anxiety, and the more pressure that the Government put on young people, as they are doing in the

[Mrs. Beckett]

legislation and the regulations that flow from it, to be in a job or a YTS place, the more likely it is that those who see little chance of such a prospect in their own area will travel to places where they have been told there is a better opportunity and render themselves vulnerable.

The regulations seem to make no allowance for those who, having had the right to benefit in the family from the child benefit extension period, become homeless after that time. They may crack after years of abuse in February rather than in October. The regulations seem to have been framed for the administrative convenience of the Department rather than to take account of those whose life experience does not fit precisely within the dates for which they allow.

I suspect that the Minister's answer will be that such cases could be met by the provision that the Secretary of State is able to recognise cases of severe hardship. The difficulty that we see is that that provision has existed in the board and lodging regulations, and we have noted—as have those who deal with these matters—that the Secretary of State, like every Secretary of State, seems to have extreme difficulty in recognising such cases. Few cases which most of us would think should qualify get past the Secretary of State. In any event, there is no proper appeal procedure for cases put to headquarters—to the Secretary of State—to decide whether there is severe hardship. Only the Secretary of State or his departmental officers have the right to exercise discretion. There is no scope for the judicial consideration of decisions. That is arbitrary in the extreme.

The problem of young people who are abused at home is an emotional and difficult one, but what about another judgment that is less emotionally fraught—whether somebody who is caught by the regulations is over 18? That is likely to occur in the kind of cases that my hon. Friend the Member for Gateshead, East (Ms. Quin) identified, when young people leave home and seek jobs or training opportunities elsewhere.

Will the Department accept birth certificates? They have sometimes refused to accept that evidence. Is the ludicrous guidance that has been used in the past still to apply: that other proof should be sought, such as the family Bible? The people who write this sort of stuff live in another world. How many families ever had a family Bible? How many families have a family Bible now? Is it likely that when young people aged 18 leave home they will think to shove the family Bible into their case? Even if they had, would it survive the sleeping rough, which is the only option that the Government offer, until they can prove that they qualify for benefit?

The Minister knows that the Department is coming under heavy pressure to look afresh at the implications for the homeless of all these questions, including the payment of income support in arrears and the possible extension of benefit to young people who are estranged from their parents and involved in resettlement programmes. The long experience of organisations that have tried to help this most vulnerable group of young people leads them to believe that this further additional burden will create considerable problems. Young people will be required to find a job or a YTS place before they can qualify for a legitimate income. I ask the Minister seriously to consider the case that is being put to him.

I suspect that in this debate we shall concentrate most on vulnerable young people who are being placed seriously at risk by the harshness of the Government's policies. We ought to put on record the concern that is felt by all who know about and understand what the Government are doing and the danger of their approach to this problem. I have no doubt that the Minister of State will refer to the need to offer proper choices to the young, but when we consider the changes that the Government are making to the rights to benefit and to benefit entitlement we have to conclude that in their heart they know that they are not offering proper choices to young people. They are seeking to corral and coerce the young into fitting into an unsuitable system.

Sixteen and 17-year-olds sometimes come to the conclusion that the world is against them. It is a great pity that the Government seem to be working hard to confirm that view. The removal of starter credits is regarded as a levelling down, as this Government always do. There is a real difference between the encouragement and support of young people to exercise sensible choices that will provide them with good opportunities and compulsion, which is all that the Government seem to be prepared to offer.

The Opposition fear that the Government are creating a great deal of resentment and that they are increasing the lack of a sense of responsibility and of a place in society, as well as removing the last life-line from the young, who are in the most desperate need. I beg the Government to monitor carefully the development of their policies for young people and, most urgently, to heed the advice that is being given to them from the organisations that deal, especially in the big cities, with the vulnerable young. They must not wait until well publicised, personal tragedies occur among the young homeless before they take action.

11.23 pm

The Minister of State, Department of Social Security (Mr. Nicholas Scott): I welcome the recognition by the hon. Member for Derby, South (Mrs. Beckett) of the fact that the application of the regulations will be largely beneficial, although they are part of the implementation of a policy with which the Opposition profoundly disagree. Therefore, the Opposition will not seek to divide the House.

The point of principle that forms the background to the debate was settled in Committee and during the other stages of debate on the Social Security Act 1988. We took the view that able-bodied young people capable of work and/or training should not be given the option of moving from full-time education to benefit. Whatever doubts the Opposition may have about the detailed application of the provisions, the vast majority of people in this country will agree with that fundamental principle. I can think of nothing more corrupting than offering young people generally the option of moving straight from full-time education to benefit.

Earl's Court is in my constituency, in the centre of London. I know of some of the problems that have arisen because young people have had the option of coming to London and claiming benefit. They have been subjected to all the temptations and problems of living in the area. I do not want to see——

Mrs. Beckett: With great respect, the Minister has used a very dangerous word. He said that he could think of nothing more "corrupting" than young people being

tempted to come to London and claim benefit straight away. I recognise the case that he is putting, although I know of no evidence to support the argument that young people come to London because they can get benefit. They tend to come to London either because of the bright lights syndrome or because they hope that they will get a job or training place.

I can think of something more corrupting than being drawn to London by the promise, thought or offer of benefit; young people may come to London in the hope of finding better prospects here but then find that they have no income at all because the Government have withdrawn their right. That is the most corrupting option of all.

Mr. Scott: I had intended to deal with that rather later. We need to strike a balance in this matter. Of course, I want to ensure that young people who are in genuine need have proper protection through the social security system and I shall go on to explain why I believe that the regulations will meet that requirement. But the hon. Member for Derby, South, for whom I have considerable respect, does not seem to understand the temptations for those who believe that they can come to London and establish themselves, with semi-independent status, on the benefit system and without the prospect of a job.

I know that many young people come here wanting a job or a training place which may not be available to them elsewhere, but many come on spec, thinking that when they get to London everything will be all right and that they can sustain themselves through the benefit system. Almost always that dream ends in tears, and I have known many tragic circumstances to arise from that in my own constituency of Chelsea.

Ms. Quin: Does not the Minister recognise the contradiction in the Government's policy? They urge young people to show initiative and to move from one area of the country to another to find work, yet when young people reach the place where the work is available, they do not have the financial wherewithal to become established. They have to wait until their first pay packet comes in, and it is difficult for them to find accommodation that they can afford.

Mr. Scott: The hon. Lady's point centres on the problem of the payment of benefit in arrears when young people come to London. Again, we need to strike a balance. People may be encouraged to up sticks, leave their own homes and come to London on a speculative basis in the hope that they will get jobs and that they can live on benefit if they do not, and I have talked about all the dangers inherent in that.

Having said that, although we hear much about young people coming to London and failing to find accommodation, we still have a considerable number of vacant spaces in the resettlement units in central London each night. I am told that many voluntary organisations in central London also have vacant beds at night, and young people could go there if they wished to do so. Our local offices in central London, which deal mainly with the transient population here, have reported not an increase but a decrease in the numbers of those seeking help since the implementation of the reforms on 11 April.

Mr. John McWilliam (Blaydon): That is not our information; our information is that many young people are coming to London, and that they seek help from those organisations that can give them help in the short term. In the long term, however, finding permanent accommodation—somewhere that they can describe as their abode—is a real problem now that the two weeks' benefit is being denied them until they get here.

Mr. Scott: I understand that, but at the moment the evidence is that there is a decrease rather than an increase in demand. There is also evidence that, as those who provide accommodation for young people realise that they will be paid in arrears and as those young people give them a piece of paper which states that the benefit will be payable, albeit in arrears, landlords are adjusting to that situation.

Having said that, I want to find out the truth. Therefore, I have asked officials in my Department to meet the organisations concerned, and to discuss with them the evidence that they have, which may conflict with that which the Department is receiving. As an hon. Member representing a constituency in central London, as well as bearing my ministerial responsibilities, I am concerned to find out the facts. I have asked for that survey and those discussions to take place, and when I have the results, I shall review the situation and consider what, if anything, needs to be done. I believe in my heart that we should be wary of encouraging young people to come to London on the speculative chance that they may be able to obtain accommodation and jobs.

The hon. Member for Derby, South mentioned YTS opportunities. At the end of June, there were 162,000 unfilled places on that scheme. I cannot deal specifically with Cleveland tonight, but it is quite clear that throughout the country there are a considerable number of unfilled places on the scheme. Therefore, I see no difficulty about us being able to fulfil the commitment given by my hon. Friend the former Under-Secretary of State when we discussed these matters in Committee.

Whatever the hon. Lady says, the net expenditure—that is, the withdrawal of benefit from 16 and 17-year-olds unless they are prepared to take a place on YTS and the cost of providing places on YTS programmes—means that there will be a net cost, not a net saving, to the Exchequer. Therefore, we are investing in young people, not making overall savings at their expense.

In simple terms, we believe that it is neither necessary nor healthy for young people to see dependence on state benefits as the natural step to take after leaving school. I am sure that the vast majority of hon. Members agree with that. I shall not repeat the manifesto commitment, except to say that the withdrawal of benefit is closely linked to the guarantee of a high-quality training place for every school leaver under 18 who wants one. I believe that, as the scheme develops, we shall convince even the sceptics on the Opposition Benches of the merits of the training for young people that we shall provide. We all know that the training allowance that they will receive will be substantially in excess of anything that they could get on income support.

However, we appreciate that the burden of the regulations centres on the particular aspect that there are some young people who do not fit into the general pattern and who require special protection. The regulations deal primarily with the situation in which benefits will remain available to young people over the age of 16 when the new arrangements take effect on 12 September.

We have sought to identify two groups for whom income support will remain available. There are those who

[Mr. Scott]

are not required to be available for work or training, such as lone parents, the severely disabled and the registered blind. They will still be able to claim income support at all times. Then there are those who are required to be available for work or training, but may have to leave home because of physical or sexual abuse, broken homes, and so on. They will be entitled to benefit for a short period while they are considering the work or YTS opportunities that are available to them.

The categories of young people who are entitled to support can be found in the schedule to the regulations. All hon. Members will agree that we have gone to not inconsiderable lengths to try to identify as precisely as we can the categories of young people who are most in need. I am sure that, if we trawl through, it will be possible to identify smaller groups who do not fit tidily into the categories. My answer to that is that we have always recognised that it would not be possible to regulate for every conceivable circumstance.

Therefore, we have expressly taken power under the Social Security Act 1988 so that, when a person under 18 is not entitled to income support and it appears that he or she would suffer severe hardship unless benefit is paid, the Secretary of State may direct that the young person should be so entitled. That is an important and significant fallback to protect any who may fall outside the regulations, however much we have tried to identify categories that may need that help.

In short, the vast majority of people in this country will applaud our initiative in seeking to deprive 16 and 17-year-old, able-bodied people who are capable of work or of taking a training place of the opportunity to go directly on to state benefits. At the same time, we shall guarantee a place on the YTS for those who can take their part. We shall have the protection for the most vulnerable groups in the way that I have described. I commend the regulations to the House.

Question put and negatived.

PETITIONS

Gipsy Site (South Woodham Ferrers)

11.36 pm

Dr. Michael Clark (Rochford): With permission, Mr. Deputy Speaker, I present a petition

To the Honourable Commons of the United Kingdom of Great Britain and Northern Ireland in Parliament assembled.

The humble Petition of the residents of South Woodham Ferrers and the surrounding area.

The petitioners state that they are opposed to the creation of a gipsy encampment on the old concrete batching plant in South Woodham Ferrers. They point out that, in 1974, Essex county council promised that the site would be public open space. In 1984, it was designated as within the coastal protection belt, with the most stringent development restrictions placed upon it. Developments that adversely affect the character of that rural and open area are not permitted.

The residents of South Woodham Ferrers are, and have been since the new town was developed, prevented by restrictive covenants from parking caravans on their own property, yet there is now a proposal to bring in caravans belonging to strangers from outside the area and allow them to park legally in the town where other caravans are prohibited.

The petitioners point out that the new town, which is built on a riverside and advertised as a rural country town with a riverside nature and a rural environment, will be spoilt by bringing a gipsy site into the town.

The petition is signed by 315 residents of the town. It is backed up by another substantial petition, with over 5,000 signatures on it, being more than half the adult population of the town of South Woodham Ferrers. The petition concludes:

Wherefore your petitioners pray that your honourable House do urge the . . . Secretary of State for the Environment to intervene in the proposal by Essex County Council, to locate a gypsy site within or within proximity to South Woodham Ferrers. And your petitioners, as in duty bound, will ever pray, &c.

I beg leave to present the petition.

To lie upon the Table.

Maternity Unit (Moray)

11.40 pm

Mrs. Margaret Ewing (Moray): It is with pride in my constituents and in humility as their elected representative that I tonight present to the House a petition of 12,888 signatures collected in just a fortnight supporting the call for a specialist maternity unit in Moray. The petition reads as follows:

That the decision of Grampian Health Board taken on 7 April 1988 is against the interests and welfare of our residents and that there are clear medical, social and economic reasons for the establishment of a full obstetric and gynaecological unit in Moray. Wherefore your Petitioners pray that your honourable House will use its influence to persuade the Secretary of State for Scotland to instruct Grampian Health Board to reopen discussions on a specialist obstetric and gynaecological unit in Moray and further to carry out a feasibility study on the provision of such a unit. We further petition that the Secretary of State investigate the possibility of financial provision to enable the unit to be established.

To emphasise the importance of this matter, I shall mention briefly a case that occurred in my constituency

last weekend. A young mother who went into early labour in Elgin had to undergo a caesarean section by a doctor who had no delivery experience. The flying squad in Aberdeen, about 70 miles distant, said the emergency was too acute for transfer, which would require several hours. As a result, my constituent was delivered of twin girls without the mandatory attendance of an obstetrician or paediatrician.

Fortunately, the skills of the doctor in attendance prevented a tragedy from occurring, but it can only be a matter of time before a tragedy does occur, a point emphasised by the surgeon. We in Moray do not want such tragedies to happen and we seek the basic right of access to a specialist unit.

The petition concludes:

And your Petitioners, as in duty bound, will ever pray.

We ask the House to give serious consideration to this matter.

To lie upon the Table.

Opencast Mineworkers (Gateshead)

11.42 pm

Ms. Joyce Quin (Gateshead, East): I beg to ask leave to present a petition on behalf of opencast workers employed at the Swalwell disposal point in Gateshead. These workers are to be relocated and many will, as a result, lose their jobs.

The petition states that the workers feel unfairly discriminated against, as they do not receive retraining or redundancy payments at anything like the levels of their colleagues who are classified as deep miners and who work for British Coal, even though the same levy is imposed on the coal with which both sector workers deal.

They feel that their situation is unique, as, unlike many opencast sites, theirs has been closed not because there is no longer a market for their coal but because the site has been acquired for another purpose.

The petition concludes:

Wherefore, your petitioners pray that your honourable House will be sympathetic to our unique situation and press Her Majesty's Government to invoke the Treaty of Paris to enable us to be fairly and justly compensated.

And your Petitioners, as in duty bound, will ever pray.

To lie upon the Table.

11.43 pm

Mr. John McWilliam (Blaydon): I present on behalf of my constituents a petition in exactly the same terms as that presented by my hon. Friend the Member for Gateshead, East (Ms. Quin). Bearing in mind that my hon. Friend the Member for Bridgend (Mr. Griffiths) will shortly initiate an important Adjournment debate on the subject of opencast mines, I will not detain the House by reading the terms of the petition.

Settle-Carlisle Railway

11.44 pm

Mr. Bob Cryer (Bradford, South): I present a petition against the closure of the Settle-Carlisle railway on a date which is before the closure date when the TUCC can hear objections on the grounds of hardship. I hope and believe that this will be the first of many more petitions on this subject.

I and the petitioners believe that closure would be an act of organised vandalism. The signatures include people on a train hauled by the "Sir Nigel Gresley", which you will vividly recall, Mr. Deputy Speaker, was built in Doncaster and is a fine engine named after the chief mechanical engineer of the London and North Eastern Railway.

The petition is also signed by people on the train on the Worth valley railway, who know how to run railways and know that a private preservation scheme for the Settle-Carlisle line is, to say the least, unworkable and unlikely. It is also signed by ordinary people from all over the country who treasure the railway, people who live near the line who would face grave hardship if it was closed, and people who love the line and the access that it provides to the Yorkshire Dales.

The petition reads:

The humble petition of the supporters of the Settle-Carlisle railway sheweth that the outstandingly beautiful and historic Settle-Carlisle railway provides an essential transport system for people who live in the area, for people wishing to visit the area, for people travelling between the midlands, Yorkshire and Scotland, for British Rail to use as a diversionary route, for British Rail to use as a potentially important freight route and for hundreds of thousands of people who wish to enjoy the scenery near the line, and the engineering heritage of the line itself. Wherefore, your petitioners pray that the Settle-Carlisle railway and the associated Blackburn-Hellifield railway will be retained as an integral part of the national railway network.

To lie upon the Table.

Opencast Mines

Motion made, and Question proposed, That this House do now adjourn.—*[Mr. Dorrell.]*

11.46 pm

Mr. Win Griffiths (Bridgend): The subject of this debate will be familiar to the Minister as it has for at least a decade been the subject of correspondence and debate in the House and the European Parliament. It relates to the application by successive Governments of article 56.2(b) of the treaty of Paris.

The budget of the European Coal and Steel Community is derived almost entirely from production levies on coal and steel. Every year since 1981 more than £1 million has been levied from opencast coal production, culminating last year in £1,902,000 out of £13,008,000 being paid by the Government in coal levies.

One of the purposes of the money is to contribute to eventualities described in article 56.2(b) thus:

"If fundamental changes, not directly connected with the establishment of the common market, in market conditions for the coal or the steel industry should compel some undertakings permanently to discontinue, curtail or change their activities, the High Authority, on application by the Governments concerned: . . .

(b) may provide non-repayable aid towards:
—the payment of tideover allowances . . .
—the payment of resettlement allowances to workers;
—the financing of vocational retraining for workers having to change their employment."

Because of the failure of successive Governments to apply article 56.2(b), opencast workers have been excluded from the possibility of the Commission deciding whether any redundancy meets the requirements of article 56.2(b) and is eligible for some or all of the aids in it.

I first became involved in the quest for justice for redundant opencast workers at the beginning of 1981 as the Member of the European Parliament for South Wales. In response to my inquiry, the Director-General of Employment and Social Affairs, Mr. J. Degimbe, wrote on 9 March 1981:

"The Commission will participate financially in the aids for all redundant coal miners, whether they be from Deep-mines or Open-cast mines, whenever article 56.2(b) of the ECSC Treaty is applicable."

After unsatisfactory correspondence with the Department of Energy over several years, I tabled a question in November 1983 to the Commission. My purpose was to get on the record the view expressed earlier by Director-General Degimbe. My question read:

"As far as the Commission is concerned, would there be any objection if the British Government brought opencast workers—on whose production the ECSC levy is paid—into the scheme of benefits that can be claimed by the UK Government, under the Treaty of Paris, when coal workers are made redundant?"

The Commission's reply, by Commissioner Ivor Richard, on 27 February 1984, read:

"If the United Kingdom Government revised their policy towards redundancies in the opencast mining sector, the Commission would have no objection in principle to granting aid under Article 562(b) of the ECSC Treaty for the workers concerned. The manner in which this could be done would be a matter for discussion with the United Kingdom authorities. In order for the workers to qualify, however, redundancy would need to arise from fundamental changes in market conditions for the coal-mining industry which compelled the undertaking concerned permanently to discontinue, curtail or change its activities. In practice, the Commission believes that this Treaty requirement is unlikely to be met in the majority of cases arising in opencast coal mining."

The Commission's position is clear: it will consider any application put forward by the British Government for redundant opencast workers. The British Government, however, are not disposed to do so.

To test further the powers of the Commission to act on the Government's failure to implement in full the provisions of article 56.2(b) for all workers involved in the production of coal, on which the levy was paid, two redundant opencast workers, Mr. V. E. Williams and Mr. P. Shepherd, petitioned the European Parliament in December 1984 to request the Commission

"to set in train the steps needed for Opencast Coal Production Workers to have the opportunity of claiming benefits under Article 562(b) of the Treaty of Paris when redundancies arise in the industry."

The Commission's reply was discouraging. Part of it read:

"There is indeed no provision of the Treaty which requires a Member State to grant special aid to workers affected by discontinuance or curtailment of activities in an ECSC undertaking or to apply for non-payable aid in respect of these workers under 562(b).

There is, therefore, no basis on which the Commission could unilaterally grant readaptation aids to opencast coal miners neither could it begin infringement proceedings against the United Kingdom Government for not granting such benefits."

However, the Commission reiterated its previous position. It stated:

"In principle it makes no distinction between opencast coal workers and deep mine (including face) workers for the purposes of Article 562(b) of the ECSC Treaty."

The reply continued:

"In order to verify whether in specific cases this basic eligibility condition is fulfilled, the Commission must rely on information presented by the Member State which under the Treaty is the only entity empowered to submit an application for aid . . . Until now the United Kingdom Government has not submitted to the Commission any such case concerning opencast coal workers."

That leaves us with the important principle that all workers involved in the production of coal which is levied for the ECSC budget should have the right, if made redundant, to receive ECSC benefits under article 56.2(b) if eligible. The plain truth is that the Government have arbitrarily barred opencast workers who have been made redundant from any possibility of access to ECSC benefits. In the past the Government have argued that opencast work is akin to civil engineering, has nothing in common with deep mining, and that opencast workers are, according to a former Secretary of State for Energy, who is now the Secretary of State for Wales, the right hon. Member for Worcester (Mr. Walker)—I quote from his letter to me on 8 October 1983—

"accustomed to the need to move to another site, or find alternative employment, at fairly frequent intervals."

They are not specified in the treaty of Paris as criteria for non-eligibility. The decision to exclude opencast workers is morally and legally unacceptable.

Given that provision has been made in British legislation for deep miners, whose coal production is levied to be eligible for ECSC benefit—when the conditions of their redundancy meet the requirement of article 56.2(b) —there should also be provision for opencast workers whose coal production is levied to be eligible when the conditions of their redundancy meet the criteria of article 56.2(b).

In the past the Government have argued that opencast mine redundancies do not meet the requirement of article

56.2(b) that an undertaking must have had to discontinue permanently, curtail or change its activities as a result of fundamental changes in market conditions in the coal industry. What may have been true in the 1970s is not true of the 1980s. In 1983 workers in my constituency at the Parc Slip site, Cefn Cribwr—incidentally, that is but a field away from my back garden—were given redundancy notices on which the reason for their redundancies was declared to be a reduction in the demand for coal. Those redundancies were permanent, as has been the drop in demand for coal.

More recently, in October 1986, the Llanilid east site, in the constituency of my hon. Friend the Member for Ogmore (Mr. Powell), was closed with the loss of 240 jobs. British Coal also failed to extend the site to Llanilid west. Although the inspector appointed to hear the planning appeal for that site stated:

"On the balance of probabilities, the proposed operations would be profitable,"

in paragraph 265 he also said:

"There is evidence to support a reduced consumption of coking coal by BSC."

In paragraph 266 he said:

"I can see no justification for working Llanilid west on the basis of its coking coal content either in terms of the need to satisfy a particular market requirement or its economic value in the context of its intended purpose."

Plainly, the planning appeal inspector felt that the state of the market did not justify the continuation of work at the Llanilid site, which would have enabled 240 men to continue in employment. Despite satisfying ECSC criteria, those men cannot be eligible for ECSC benefits because the Government have not enacted a scheme to enable application to be made under the provisons of article 56.2(b) of the treaty of Paris.

My hon. Friends the Members for Gateshead, East (Ms. Quin) and for Blaydon (Mr. McWilliam) have already told us how opencast workers in their constituencies have been similarly affected by unforeseen changes. The Government's failure to provide such a scheme discriminates against opencast workers, whose coal production is levied in exactly the same way as deep miners.

The Secretary of State for Energy has the power to rectify that anomaly by establishing a scheme that is specifically designed for opencast workers. I hope that tonight the Minister will declare himself to be on the side of justice and that he will end the unjustifiable, illegal and immoral discrimination against redundant opencast mineworkers.

11.59 pm

The Parliamentary Under-Secretary of State for Energy (Mr. Michael Spicer): I congratulate the hon. Member for Bridgend (Mr. Griffiths) on raising an issue which he has pursued with my Department on several occasions over at least eight years. I congratulate him on his persistence. He will not, I suspect, be surprised if, similarly, my response tonight has a familiar ring to him.

Article 56.2(b) of the treaty of Paris, which he quoted, which established the European Coal and Steel Community, states that

"if fundamental changes . . . in market conditions for the coal or steel industry should compel some undertakings permanently to discontinue, curtail or change their activities, the High Authority,"

—which is now the European Commission—

"on application by the Governments concerned . . . may provide non-repayable aid."

Certain costs associated with a reduction in labour requirements towards which this aid may be given are then listed. The treaty goes on to say that

"the High Authority shall make the provision of non-repayable aid conditional upon payment by the State concerned of a special contribution of not less than the amount of that aid".

As part of the coal industry, opencast mining is in principle covered by article 56.2(b), and if the conditions set out in the article were met it would be possible for the Commission to grant readaptation aid. However, it is clear that these conditions are not met, for two main reasons, one of which the hon. Member touched on.

First, the Government have no special scheme for redundancy or associated payments to workers at opencast sites. Such a scheme would have to be introduced, requiring legislation, before the Commission could make a contribution under article 56.2(b). Such a scheme, were it introduced, would of course be anomalous. It would single out for exceptional treatment a particular group of employees the nature of whose work was similar to that of many others employed in civil engineering and aggregate extraction industries. That is a perfectly fair comparison.

Mr. Win Griffiths: Is the Minister aware that, in other member states, opencast iron ore miners are eligible for ECSC benefits, and that the manner of their operations is exactly the same as that of opencast workers in the United Kingdom?

Mr. Spicer: I am not familiar with iron ore extraction in other countries; but I am familiar with the opencast industry. One of its characteristics—this may or may not be true of the iron ore industry in other countries—is that it is a productive, efficient and thriving industry. That comes into consideration of this matter.

To return to my point about comparable industries, employees in those industries typically need to move from site to site, or to find alternative employment, at fairly frequent intervals, as the jobs that they are doing come to completion. Redundancy payments to all these workers must, of course, conform to the requirements of the Employment Protection (Consolidation) Act 1978; but there is no justification for incurring the substantial extra public expenditure that a special publicly funded scheme for opencast workers would involve.

Ms. Joyce Quin (Gateshead, East): Does the hon. Gentleman agree that opencast workers, who may work alongside other workers employed by British Coal—that was the case in my constituency—are in an anomalous position? A levy is paid on the coal on which they work, yet, oddly, only one of those two groups receives any advantage from that levy. In the case I mentioned when I read out my petition, the opencast site had not come to the end of its useful life. It was closed for a completely different reason, which would meet the criteria that the Minister talked about before.

Mr. Spicer: The hon. Lady raises the matter of the levy, and I shall deal with that in a moment. On the question of conditions that might apply, I must stick to the point that this is a thriving industry and we cannot see any specific reason for singling it out for the public funding that would be required to make it conform to ECSC requirements.

[Mr. Spicer]

The possibility of funds from the ECSC to offset part of the expenditure is no justification, even supposing that opencast workers met the other conditions for aid that are set out in article 56.2(b).

It is highly unlikely that those further conditions would be met in the large majority of opencast sites. Perhaps that addresses the specific points raised. Closure of opencast sites is usually necessary because there are overriding environmental or planning objections to further extraction. Opposition Members are proposing, on the basis of what I suspect they might agree are limited cases, the introduction of a substantial and anomalous public subsidy for an industry that, by and large, is thriving.

Given the present state of the opencast industry, it would be hard to establish that there had been fundamental changes in market conditions requiring permanent discontinuation, curtailment, or changes of activities. The hon. Member for Gateshead, East (Ms. Quin) said that it was inequitable that ECSC funds were raised by a levy on coal production, including opencast coal, but that the benefits of readaptation aid did not extend to opencast coal workers. This point is based on at least three misconceptions.

First, no levy is paid by the contractors operating at opencast sites. They provide the vast majority of the work force and are responsible for redundancy payments. The levy on opencast production is paid by British Coal as the licensor. Secondly, there is no direct link between levy payments and readaptation aid. The coal production levy finances a variety of ECSC expenditures, of which readaptation aid is only one. Finally, and perhaps fundamentally, opencast mining is a thriving, prosperous industry for which ECSC readaptation aid is hardly appropriate.

Mr. John McWilliam (Blaydon): Perhaps the Minister has not been told by his officials that some of those opencast mining companies are financially effective because they are taking opencast coal and running it through private drift mines that they own. They claim the levy on the opencast coal as if it were drift mine coal. If the Minister is so innocent that he does not know about the rip off that is taking place in the industry, he should not be on the Front Bench.

Mr. Spicer: The hon. Gentleman makes strong allegations.

Mr. McWilliam: They are accurate.

Mr. Spicer: If the hon. Gentleman feels strongly about those allegations, perhaps he will write to me, giving specific examples, so that I may consider them. However, we are talking not about drift mining, but about opencast mining. The hon. Gentleman is proposing specific public funding arrangements for an industry which, by and large, is thriving. If he thinks about the matter carefully, he will see that he and his hon. Friends are putting forward a peculiar proposition.

Mr. McWilliam: If the Minister were to study the activities of R and A Young in the north-east, and if his officials and the Inland Revenue were to operate properly, he would discover that opencast coal is being run through drift mines as if it were drift-mined coal.

Mr. Spicer: The hon. Gentleman has made his allegations under privilege of the House of Commons and no doubt they will be seen by other people. I see no prospect of the opencast coal industry in the United Kingdom ever justifying the kind of special and expensive measures that were taken to deal with the social consequences of the closure of high-cost deep mines. They were extraordinarily generous measures that the state funded because of the restructuring of the industry, but they are totally inapplicable to and inappropriate for an industry which, by all acknowledgements, is thriving. British Coal is currently making £240 million a year profit in that industry.

Mr. McWilliam: Crooks.

Mr. Spicer: The hon. Gentleman shouts "Crooks", but this is a thriving industry for which he is implicitly demanding further public funds simply on the basis that the deep mine industry is undergoing considerable and radical restructuring to the great benefit, ultimately, of that industry. We believe it is appropriate that public funds on a massive scale should have been applied to that industry to deal with redundancies.

I do not think that the hon. Gentleman and the hon. Member for Gateshead, East will agree with me, as they have heard these arguments before and have not agreed with them in the past, but I hope that they will, after this useful and interesting debate, at least acknowledge that there are two different sets of circumstances. Because the word "coal" appears in the titles does not mean that it is appropriate to apply public funding to one industry just because the other is going through a massive restructuring. On that basis, I rest the Government's case.

Question put and agreed to.

Adjourned accordingly at twelve minutes past Twelve o'clock.

House of Commons

Wednesday 27 July 1988

The House met at half-past Two o'clock

PRAYERS

[MR. SPEAKER *in the Chair*]

PRIVATE BUSINESS

BRITISH WATERWAYS (NO. 2) BILL *[Lords] (By Order)*
Read the Third time, and passed, with an amendment.

LONDON DOCKLANDS RAILWAY (BECKTON) BILL *(By Order)*
Considered; to be read the Third time.

BRITISH RAILWAYS (NO. 2) BILL *(By Order)*
Order for consideration read.
To be considered tomorrow.

HARWICH HARBOUR BILL *[Lords] (By Order)*
Read a Second time, and committed.

Oral Answers to Questions

SCOTLAND

Local Government Reform

1. **Mr. McAllion:** To ask the Secretary of State for Scotland if he has any plans for reform of local government in Scotland.

The Parliamentary Under-Secretary of State for Scotland (Lord James Douglas-Hamilton): My right hon. and learned Friend the Secretary of State has no specific plans at present affecting the future of local government in Scotland.

Mr. McAllion: The last time the Tories met in conference in Scotland the Minister told them that any reform of local government could be justified only if it led to greater economy and efficiency and if it made local government more responsive to the needs of the Scottish people. Does the Minister accept that his poll tax reforms are less economical, as the collection will cost £28 million more every year than the present rating system? As they are demonstrably less efficient than rates as a mean of tax gathering, and as they respond to neither the needs nor the wishes of the Scottish people, who have overwhelmingly rejected them and despise them as a sop to the rich—which they are—does the Minister accept that he should either resign or stand condemned as a monumental hypocrite, which Opposition Members know him to be?

Mr. Speaker: Order. The hon. Gentleman must withdraw the word "hypocrite".

Mr. McAllion: Under your instructions, Mr. Speaker, I withdraw the word "hypocrite".

Lord James Douglas-Hamilton: The purpose of the community charge was to introduce accountability. Reform of the rating system would not inevitably necessitate the reduction of local government to one tier. The hon. Gentleman referred to the Scottish Tory party conference. I am well aware of the representations from that party and many others, including representations from the hon. Member for Glasgow, Garscadden (Mr. Dewar) who said on 27 January:

"there is a case for a move towards a one-tier, all-purpose local authority below an assembly"—[*Official Report*, 27 January 1988; Vol. 126, c. 327.]

We are anxious to encourage informed debate on this subject and we will look very carefully at any constructive proposals and particularly at the quality of the evidence. All such proposals will receive the most careful consideration.

Mr. Allan Stewart: Further to the second point made by my hon. Friend, does he agree that while there might be a case for a modest change, the move to a single-tier system is simply a superficial gimmick which would increase costs and inevitably lead to a great deal of disruption? Does he further agree that the watchwords for Scottish local authorities should be "cost-effectiveness" and "increased accountability" through the community charge, not spurious schemes for structured reform?

Lord James Douglas-Hamilton: My hon. Friend is right. If a case can be made for the reform of local government, it must be on the basis of more effective and accountable local authorities within the existing constitutional arrangements.

Mr. Canavan: In view of the increasing interference by this over-centralising Government into the affairs of local government, is it any wonder that an increasing number of people in Scotland are concluding that the best way to restore and improve local democracy in Scotland would be to set up a Scottish parliament with economic as well as legislative powers, including the power to introduce a one-tier system of local government?

Lord James Douglas-Hamilton: We have no plans for devolution. We do not want more government; we want better government.

Mr. Kirkwood: If the Minister is really serious about striving towards greater accountability in the context of the poll tax or the reform of local government, will he consider the introduction of a sensible system of proportional representation? Is it fair that in the district elections in Edinburgh in May the Conservatives won only 23 seats, the Labour party won 33 seats and both parties secured only 36·5 per cent. of the poll?

Lord James Douglas-Hamilton: The hon. Gentleman has mentioned an interesting case. More people in Edinburgh voted Conservative than Labour. However, I cannot give any undertaking to support proportional representation. We prefer the system in which people may vote for a person with a direct tie to his constituency and not to strengthen the party list system.

Ravenscraig Steelworks

2. **Mr. Buchan:** To ask the Secretary of State for Scotland what recent discussions have taken place between

his Department and the British Steel Corporation concerning the future of the strip mill capacity at Ravenscraig steelworks; and if he will make a statement.

The Secretary of State for Scotland (Mr. Malcolm Rifkind): Following a meeting on 14 July, Sir Robert Scholey wrote to me confirming that, at present, there is no reason for the corporation to make plans to close the Ravenscraig hot strip mill.

Mr. Buchan: Has the Secretary of State seen the headline in today's *Glasgow Herald*, which says

"MacGregor offers to look at Ravenscraig"?

That is the most ominous headline that one has read in the past decade. I hope that, after the discussions, the right hon. and learned Gentleman will make it clear that the Scottish steel industry is not up for trafficking, that the buck stops with him and that he will carry the responsibility. I noticed that he was described as one of the best Secretaries of State for Scotland that we have ever had——

Mr. Home Robertson: Who by?

Mr. Buchan: By the Prime Minister. That is the kiss of death from the black widow if ever there was one.

Mr. Rifkind: I notice that the hon. Gentleman has rejected the view of his hon. Friend the Member for Motherwell, South (Dr. Bray) about the splitting up of the British Steel Corporation. The BSC is performing extremely effectively at present and, to be completely fair, credit must be given to its management, who have found markets that will purchase the product made by the excellent work force at Ravenscraig. Such excellent teamwork offers the best short-term and long-term prospects for Ravenscraig.

Sir Hector Monro: Bearing in mind Ravenscraig's success in recent years, does my right hon. and learned Friend agree that any reduction in output in any part of the plant will have a detrimental effect on the Scottish economy? Will he do all that he can to encourage the British Steel Corporation to invest in Ravenscraig, to ensure the plant's long-term future?

Mr. Rifkind: I do not know whether a reduction in output would have a significant effect on the Scottish economy, as only 4 per cent. of the British Steel Corporation's products are utilised within Scotland. Ravenscraig's major importance is the employment that it produces for Lanarkshire. Investment has been made in the strip mill in recent years, and I believe that the Arthur Young report, which is often referred to by Opposition Members, said that there was no economic case for new investment in Ravenscraig at the present time.

Dr. Bray: Is the Secretary of State aware that the restrictive strategy of the British Steel Corporation is a continuing threat to Ravenscraig? It seeks to restrict capacity and output to force up prices to the limit that European competition will bear. While the immediate threat to the hot mill will depend on when the next dip in demand occurs, the threat to Ravenscraig will remain until the Government take action to impose on Britain's steel industry a genuinely competitive regime to which Ravenscraig can properly contribute.

Mr. Rifkind: The actions of British Steel's management have, in part, led to the hot strip mill, which some months ago was operating at reduced capacity, working flat out. Clearly, that steel could not be produced unless there were markets for it. It is to the credit of the management that those markets have been identified. Over the past few years the Government and the British Steel Corporation have insisted on rationalisation and modernisation of the industry, which is why we have a steel industry which, instead of making a loss of over £1 billion a year, as it did in 1979, is making a healthy profit. I am sure the hon. Gentleman will appreciate that a profitable steel corporation is a much better prospect for the long-term future of all its plants, including Ravenscraig, than one that makes a loss of billions of pounds a year.

Mr. Salmond: How will Ravenscraig's prospects be affected by the elevation of a sudeten Scot—the hon. Member for Mid-Worcestershire (Mr. Forth), who has joined the Government and therefore left Scottish Question Time, for which we are thankful? Will not the anti-Scottish bias that is so evident among the British Steel Corporation's senior management now be accompanied by anti-Scottish bias in the Department of Trade and Industry?

Mr. Rifkind: Only the Scottish National party could interpret the appointment of a Scot to the United Kingdom Government as being to the disadvantage of Scotland. The hon. Gentleman has a lower opinion of his compatriots than have Conservative Members.

Mrs. Fyfe: What calculations has the Minister made of the number of non-steel jobs that will be lost if Ravenscraig is closed?

Mr. Rifkind: Various calculations have been made, but as there is not the slightest prospect of Ravenscraig closing, certainly in the near future—or, I believe in the longer future—such questions are purely hypothetical. I have emphasised that Ravenscraig is of major importance to the economy of Lancashire. Clearly, there would be grave implications for the economy of the locality if Ravenscraig were to close. The combination of Government policy and the qualities of the industry's work force and management mean that there are no reasons to consider the closure of the strip mill or, in the next few years, Ravenscraig itself.

If the Labour party's policies had been pursued, Ravenscraig could not have hoped to be competitive in world markets, especially as quotas have now disappeared in the European Community.

Mr. Gerald Howarth: In the absence of my hon. Friend the Member for Mid-Worcestershire (Mr. Forth), who is deploying his excellent talents for the benefit of the whole of the United Kingdom, will my right hon. and learned Friend confirm that this year alone Ravenscraig has broken 16 production records, and that it has received £12 million of investment over the past three years? If that is kept up, will it not be the best guarantee of the continuation of Ravenscraig?

Mr. Rifkind: The Department of Trade and Industry's gain is a loss for Scottish Question Time, I will confirm what my hon. Friend said in the latter part of his question, and repeat the important rider that it would be of little value for Ravenscraig to have this superb maximum output if Sir Robert Scholey and his colleagues in management had not been working to find markets for

that output. That combined effort by Sir Robert Scholey, his management team and the work force at Ravenscraig, has substantially increased not only the short-term but the longer-time prospects of Ravenscraig.

Mr. Dewar: The Secretary of State might not have been so optimistic about the increased Scottish presence in the Department of Trade and Industry had he had the pleasure of reading the articles about Scotland written by the hon. Member for Mid-Worcestershire (Mr. Forth) for his local press, and the dismissive and wounding comments that he made about expenditure in Scotland. Will the Secretary of State be a little more specific and go a little further than he has so far? As he knows, the guarantee for the hot strip mill at Ravenscraig lasts only until 1989, and in view of his correspondence with Sir Robert Scholey and his suggestion that closure was not a possibility in the near future, will he give the guarantee that he conspicuously refused to give in the recent Scottish Grand Committee debate, and make it clear that there is no possibility of the mill closing in 1989 when the transitional protection ends?

Mr. Rifkind: My hon. Friend the Member for Mid-Worcestershire (Mr. Forth) was drawing attention to the level of Government expenditure in the constituency of Glasgow, Garscadden, compared with Government expenditure in Mid-Worcestershire. I can fairly say for my hon. Friend's point of view that there may have been a difference between the two totals to the disadvantage of his constituents.

As to the latter part of the hon. Gentleman's question, I have already said that the view of the British Steel Corporation is that it has no reason to plan for the closure of the hot strip mill. Clearly, it is for BSC and the market that it supplies to determine the prospects for all parts of BSC. I am not in the business of giving guarantees on matters for which I do not have ministerial responsibility. I have not had, I do not have and I will not have ministerial responsibility for this matter. I am sure that the hon. Gentleman will want to join me in expressing delight that, because of the combined efforts of management and work force, there is no economic reason for anyone to wish to consider the closure of the hot strip mill at Ravenscraig.

Housing Standards

3. **Mr. Nigel Griffiths:** To ask the Secretary of State for Scotland what consideration he has given to a wider definition and assessment of houses which are below tolerable standard.

Lord James Douglas-Hamilton: My right hon. and learned Friend is currently reviewing the statutory tolerable standard as part of the proposed reform of the home improvement system.

Mr. Griffiths: Why is it taking the Secretary of State so long to review this matter when so much hardship is being caused to many home owners and council tenants in Scotland by the fact that their houses, which have leaking roofs and crumbling stone work, and are riddled with damp, do not come below a "tolerable standard" in his eyes? Why will he not accept the need for a housing condition survey, such as England and Wales have, to ensure that there is available to the House and the public of Scotland an appraisal of the terrible conditions in which so many Scots are housed today?

Lord James Douglas-Hamilton: A housing conditions survey would cost about £5 million and that sum would have to come out of housing resources. Frankly, I would rather that local authorities had that sum now, and we believe that it would be better utilised on that basis.

It is important to remember that the primary responsibility for assessing housing needs rests with the local authorities, which have the greatest need for local information.

We propose to change the definition of "tolerable standard" and the new standard will include a fixed bath, shower or wash hand basin and the requirement that the house should be free from serious disrepair. We shall consider any representations about consultation.

Mr. Buchanan-Smith: Is my hon. Friend aware that the district council of Kincardine and Deeside has frozen all applications for home improvement grant? That has caused considerable confusion, especially as it has occurred so early in the financial year. Will my hon. Friend use his good offices and those of the Scottish Development Department to resolve the difficulties and confusion that have arisen so that those who have a genuine wish to improve their houses—some of which are below the tolerable standard—are given the proper opportunity to do so?

Lord James Douglas-Hamilton: This year £625,000 was awarded as the non-housing revenue account capital allocation to Kincardine and Deeside Council, which represents 87 per cent. of its bid and is above the Scottish average. The problem for the district council is that it appears that it has over-committed the resources made available to it. We have already made it clear that officials will be glad to discuss the problems with the council as soon as it wishes.

The resources available for housing were allocated in March, but if additional resources are identified later in the year the needs of all local authorities will be taken into account.

Mr. Andrew Welsh: Is the Minister aware that 250,000 Scottish people now live in damp and intolerable housing conditions? Is the Government's decision not to raise housing standards based on the fact that they cannot cope with present Scottish housing conditions?

Lord James Douglas-Hamilton: It is extremely desirable that local authorities should carry out their own housing surveys. We are helping them to do so by sending out an information pack and a detailed brief on how best to conduct those surveys. The results of those surveys can be used in targeting resources to those areas that local authorities consider as priority areas.

The hon. Gentleman exaggerated when he quoted the figure. The information from local authorities suggests that, on 31 March 1987, a total of 119,000 local authority houses required treatment for condensation; 38,100 required treatment for dampness and 78,400 required treatment for dampness and condensation. They are somewhat different from the figure that the hon. Gentleman quoted.

Mr. Darling: If the Minister does not want to spend money on conducting a survey, will he make money available to councils, such as Edinburgh district, where all applications for home improvement grants have been frozen? Is he aware that that council has received more

than 8,000 applications, some of which date back to 1983, which cannot be dealt with because of the Government's constant policy changes and because the Government will not make money available for essential repairs? That is causing misery and anger to a growing number of people.

Lord James Douglas-Hamilton: The bid put in by Edinburgh district council this year for non-HRA spending was for £31 million and every penny of that bid was awarded to it. Since that time the district council has estimated that the cost of clearing the backlog of repairs is about £19 million more than it estimated a few months ago. Obviously we are giving careful consideration to that matter as well as to the problems of Glasgow. My right hon. and learned Friend and I are considering what can be done to assist those affected by Edinburgh council's astonishing miscalculation of the figures. We hope to make an announcement shortly.

Mr. Harris: Will my hon. Friend confirm that the total number of houses in Scotland below the tolerable standard has fallen—[HON. MEMBERS: "Reading".] Only the figure. That number has fallen from 121,000 in 1979, under the Labour Government, to 54,000 in March 1987. If those figures are correct—I suspect that my hon. Friend will be able to confirm that they are—will he assure the House that the question from the hon. Member for Edinburgh, South (Mr. Griffiths) was not planted?

Lord James Douglas-Hamilton: My hon. Friend is absolutely right. The figures have fallen substantially, from 121,000 to 54,000. We rely on the latest figures from local authorities. Dundee, for example, recently said that it had 1,000 more below tolerable standard—BTS—houses. That is why the figure is 54,000 today.

Mr. Home Robertson: Will the Minister live up to his responsibilities for once and acknowledge that a house affected by severe condensation, or a house with no bath or shower, is not a suitable or tolerable habitation for any Scottish family? Will he acknowledge that the official statistics, which were parroted by the hon. Member for St. Ives (Mr. Harris)—he is supposed to know about these things—are a scandalously complacent under-estimate of the number of squalid and unhealthy houses in which far too many Scots are compelled to live? Many of those houses are to be found in the Minister's precious private rented sector. What will he do about the shortfall in funds that local authorities need to deal with this scandalous problem?

Lord James Douglas-Hamilton: It is highly desirable that local authorities undertake the surveys for which we have given them the expert information. Then they can identify how best to target resources on priority areas.

Nurses

4. **Mr. Doran:** To ask the Secretary of State for Scotland what guidelines he has given to health boards with regard to the regrading of nurses.

12. **Mr. McAvoy:** To ask the Secretary of State for Scotland what representations he has received concerning nurse regrading.

The Parliamentary Under-Secretary of State for Scotland (Mr. Michael Forsyth): The Scottish Home and Health Department issued written guidance covering organisational and implementation arrangements to health boards on 13 May. Copies have been placed in the House Library.

I have received five letters on the subject and I shall be meeting representatives of the Royal College of Nursing on 8 August to discuss this.

Mr. Doran: We have become used to cynical manipulation of the figures, particularly by Conservative Members, when we discuss the Health Service. Is the Minister aware that a substantial proportion of the nurses who were supposed to receive the recently announced pay award of 15·9 per cent., of which the Government made great play, will get less than half that trumpeted amount? What calculations has he made of how the award will be distributed? How many of those who will receive it will get less than the advertised amount?

Mr. Forsyth: Speaking of the manipulation of figures, the hon. Gentleman should be accurate. The figure is 15·3 per cent., not 15·9 per cent. I am sure that he wants me to be accurate.

The hon. Gentleman probably knows that a review of grading is going on, and it is not possible at this stage to give the precise amount that each nurse will receive according to her grade. To ensure that every nurse gets some increase there has been an interim award of 4 per cent. The average increase will be 15·3 per cent. The hon. Gentleman should reflect that the Government whom he supported cut nurses' pay by more than 20 per cent.

Mr. McAvoy: In view of the Minister's announcement of his meeting with the nurses, will he give a commitment that he will make every possible effort to give positive reassurance to the nurses at that meeting that the principles of regrading will be honoured?

Mr. Forsyth: I shall be happy to give that assurance, of which I think the Royal College of Nursing is aware. We have taken steps to ensure that the health boards are given guidance and that management has enough training and expertise to carry out the grading review as quickly as possible. We expect it to be achieved by the end of October. A nursing sister with substantial clinical responsibilities on the ward will find that her real pay has improved by more than 50 per cent. since 1979 as a result of the Government's commitment to the Health Service and to nursing within it.

Mr. Jack: Does my hon. Friend agree that a 44 per cent. increase in the real pay of nurses in Scotland since 1979, the regrading exercise, the pay increase and the hospital building programme north of the border show a real commitment to developing a high quality Health Service in Scotland?

Mr. Forsyth: I am grateful to my hon. Friend. The Health Service has never been better funded and now has the biggest capital investment programme in its history. It has never had more doctors and nurses, and they have never been better paid. That is because of the success of the Government's economic policies in delivering the resources to provide that care. The last Labour Government failed the Health Service because their economic policies failed the nation.

Mr. Ernie Ross: The Minister has rattled off success stories in Scotland. Will he tell the House why it is that the nurses' representatives in the Health Service in Scotland

do not accept the Minister's statement? Will he also give a guarantee that the actual cost of the regrading will be met by his right hon. and learned Friend the Secretary of State when it has been concluded? Will he answer the original question and tell us what guidelines he is giving?

Mr. Forsyth: The vast majority of nurses who eschew strike action are members of the Royal College of Nursing. The hon. Gentleman is referring to remarks made by the Confederation of Health Service Employees in Scotland. I deplore the campaign of rumour and innuendo that the confederation has mounted. It has suggested that nurses will be made redundant as a result of the regrading exercise. That is completely untrue. It has suggested that nurses' pay will be cut, which is also untrue. I can only imagine that such trade unions are piqued by the success of the Royal College of Nursing in delivering better terms and conditions for its members while not taking any part in strike action.

Sir Hector Monro: Bearing in mind that the Labour Government cut nurses' pay in real terms, does my hon. Friend agree that the present pay award has been well received by nurses? Is it not ludicrous that the Opposition should ask for an open cheque for the payment of the very large award that we have made, bearing in mind that the sum was recommended by an independent review body?

Mr. Forsyth: I agree completely with my hon. Friend. The 15·3 per cent. increase in the nurses' pay bill was calculated not by the Government, but by the review body. The Government gave a commitment to fund that cost, which amounts to £803 million for the United Kingdom and to £92 million for Scotland. That is a substantial additional resource for the Health Service, and a responsible Opposition should welcome that and give the Government credit for what they have achieved.

Mr. Galbraith: The Minister will know that to fund the review body awards, including that for the nurses in the regrading exercise, he allocated £21·6 million to the Greater Glasgow health board. Has he read the minute of the finance and general purposes committee of the Greater Glasgow health board of Tuesday 3 May? Item 53 is headed "National Health Service pay body awards 1988-89" and paragraph 2 reads——

Mr. Speaker: Paraphrase it, please.

Mr. Galbraith: It was expected that the amount allocated—£21·6 million—would be £6 million less than the cost of the pay review body award. The minute goes on to say that the board would have to find the extra £6 million from its own reserves. Is that what the Minister means when he talks about fully funding the nurses' pay award? Why does the Minister constantly maintain that he will fund it fully, when he knows that he will not?

Mr. Forsyth: I have already explained to the hon. Gentleman that the sums were based on the estimates that were made by the review body. I must confess that I have not read the minute to which he referred. However, I can tell the hon. Gentleman that I have had no representations from the Greater Glasgow health board to that effect. Also, the board has taken the unusual step of refuting some of the scaremongering that has come from the trade unions and others. I am sorry that the hon. Gentleman chooses to associate himself with such action.

Waiting Lists

5. **Mr. Neil Hamilton:** To ask the Secretary of State for Scotland what effect the new Scottish performance indicators package for National Health Service managers is expected to have on waiting lists.

Mr. Rifkind: The indicators will help to identify areas where management action is required to improve performance and to speed up the waiting list reductions, which have been stimulated by the extra money that I have made available.

Mr. Hamilton: Does my right hon. and learned Friend agree that, although the performance indicator package is welcome, we still have a long way to go? The National Health Service is still flying blind, in as much as the cost of inputs is largely unknown and the value of outputs is largely unassessed. We need to go rather further than we have.

Is my right hon. and learned Friend aware of a pamphlet that has been published today entitled "The NHS—a suitable case for treatment", which was written by the No Turning Back Group of Conservative Members and edited by my hon. Friend the Member for Mid-Worcestershire (Mr. Forth)? *[Interruption.]* I know that that name has the same effect on Opposition Members as mirrors do on vampires, and therefore that it will appeal to my right hon. and learned Friend the Secretary of State. The essence of the argument is that we shall not solve the problems of the National Health Service until we move towards an internal market where hospitals——

Mr. Speaker: Order. Make it brief, please.

Mr. Hamilton: —sell their services to the district health authorities. It is only in that way that we shall improve the Health Service in the long term.

Mr. Rifkind: I congratulate my hon. Friend on his ingenious way of publicising the document to which he referred. Naturally, I look forward to reading and studying its recommendations. The concept of an internal market within the Health Service is of increasing interest among those who work within it as a way of ensuring better service for the patients with the resources that are available.

Dr. Moonie: I am sure that the Secretary of State, unlike his hon. Friend the Member for Tatton (Mr. Hamilton), is well aware that a package of statistics will not improve waiting lists in Scotland. Does he agree that one way in which they can be improved is to back the findings of the Select Committee on Social Services, which has a majority of Conservative Members, and provide the resources that we have identified the NHS needs to perform its work adequately?

Mr. Rifkind: I can assure the hon. Gentleman that the Scottish Office does just that. For example, in the course of the current year we have allocated an extra £2 million to deal with waiting lists, the very subject with which his question deals, and, as a consequence, the number of patients treated in 1988-89 has been increased by 16,000 out-patients, 6,000 in-patients and over 3,000 day cases. We are seeking to undo the damage caused by the industrial action in the NHS in Scotland in earlier years, which led to an increase in waiting lists of some 30,000.

Rating Reform

6. **Mr. Douglas:** To ask the Secretary of State for Scotland if he will make a statement on the further advice which his Department is issuing to Scottish poll tax payers in order to facilitate knowledge of exempted categories.

The Minister of State, Scottish Office (Mr. Ian Lang): When registration officers send out the notifications in October and November to those whose names are on the register they will also send a supplementary notice detailing all the exemptions. This will enable people who may benefit from the exemptions to approach the registration officer about their entitlement to exemption.

Mr. Douglas: Will the Minister concede that at this stage there is room for alteration of the exemptions? During the recess, will he suggest that one way to be exempt from payment is to put one's father or mother into a local authority nursing home rather than retain him or her in the family home? Will he promulgate that? In addition, will he say clearly that one of the tricks that the Government have deplored is to remove from the rating system certain fishing owners, at a cost of £1·5 million, while those who desire exemption because of severe mental handicap will have to go through the humiliation of registering that fact, through their offspring, patients or relations, with a general practitioner in order to have it recorded that they are "unfit" to perform civic functions? Does the Minister accept that the whole question of exemptions blows a hole in accountability and that a Government who had one scintilla of Christian conscience would not promote such a piece of legislation?

Mr. Lang: Some of the exemptions remain to be prescribed in regulations, but I see no reason for expecting any of the exemptions, or indeed any of the regulations, to lead to any change in the domestic residential arrangements of any family. The value of the fishing rates concession is equal to one fiftieth of 1 per cent. of total local authority current expenditure.

Mr. Nicholas Bennett: Has my hon. Friend seen the report in this week's *Glasgow Herald*, on 22 July, that 12 Scottish Labour Members of Parliament have said publicly that they will not pay the community charge? Therefore, will he give the hon. Member for Glasgow, Cathcart (Mr. Maxton), who said in the same edition that there was no split in the Scottish Labour party on that issue, an opportunity to come here and explain how he squares the circle?

Mr. Lang: I have read the article to which my hon. Friend refers. A battle is raging within the Labour party over the community charge, between those who think that they should obey the law and the 12 members of the law-breaking tendency. There is also one special class which embraces the hon. Member for Greenock and Port Glasgow (Dr. Godman), who intend to obey the law, but whose wife does not. I have to tell him that the joint and several liability provision will cater for that.

Gaelic Language (TV Programmes)

7. **Mr. Kennedy:** To ask the Secretary of State for Scotland what representations he has received in favour of increased Gaelic language programmes on television in Scotland; and if he will make a statement.

Mr. Michael Forsyth: Anns na dha no tri bhliadhnaichean a chaidh seachad tha sinn air tagraidhean fhaighinn o bhuill uasal, comhairlean ionadail agus buidhnean Gaidhlig.—*[Interruption.]* If hon. Members would prefer——

Mr. Speaker: What does that mean?

Mr. Forsyth: I did not realise that you did not have the Gaelic. It means:

"In recent years a number of representations have been received from hon. Members, local authorities and organisations representing the Gaelic community."

My right hon. and learned Friend and I recognise the contribution which the media can make to the preservation of the Gaelic language and we have consistently encouraged the broadcasting authorities to provide a reasonable range of Gaelic programmes.

Mr. Kennedy: I thank the Minister for his sterling efforts. May I assure him that he does not sound any more acceptable to the Opposition in Gaelic than he does in English? Will he take this opportunity to welcome the recent publication by Comunn Na Gaidhlig—that is the correct pronunciation—"Towards a Gaelic Television Service"? Will he say what input, if any, the Scottish Office will have to the Government's White Paper on broadcasting, particularly the degree of influence it could exert to redress the imbalance with the United Kingdom so that Gaelic in Scotland can enjoy the same sort of broadcasting support as Welsh does in Wales? It is high irony that STV and Grampian are contributing towards the Welsh broadcasting service, but we do not have specifically designated funding in that way in Scotland.

Mr. Forsyth: I cannot anticipate what will be in the White Paper. We have received copies of the document to which he referred and we shall study its proposals with interest. The hon. Gentleman might acknowledge that the BBC and the independent television companies in Scotland are planning to increase the time that they make available for broadcasting. I know that there is still concern. The hon. Member for Argyll and Bute (Mrs. Michie) had a recent Adjournment debate and summarised that concern. We are sympathetic and we urge the Gaelic-speaking community to continue to put pressure on the broadcasting authorities, because it is a matter for them.

The hon. Gentleman will know that in Wales a considerable part of the Channel 4 take-up is given over to the language. The numbers are larger and the issues are difficult, but it is a matter that we shall bear in mind.

Mr. Macdonald: I congratulate the Minister on his admirable Gaelic and say "Meala naidheachd airson bruidhinn Gaidhlig agus rinn thu uamhasadh math."

Mr. Speaker: What does that mean?

Mr. Macdonald: Those are the kindest words I have ever spoken to the Minister.

I appreciate what the Minister said in his reply, but he must be aware by now that the broadcasting companies have made it clear that they cannot possibly increase Gaelic provision within their present financial constraints. Is it not the Government's responsibility to increase the financial allocation to the broadcasting authorities to enable them to provide a Gaelic television service or to map out other ways in which it might be done?

Mr. Forsyth: I thank the hon. Gentleman for his kind remarks.

He asked about support for the broadcasting authorities. I understand that the problem is more one of scheduling and that the commitment is there on the part of the broadcasting authorities to do more. No doubt my hon. Friend the Minister of State, Home Office will note what the hon. Gentleman said.

On the matter of giving specific financial support for Gaelic, the hon. Gentleman will be aware that we have increased the support for education authorities for the current year to £500,000 from £300,000. In addition, we are making available nearly £200,000 for grant-aid to organisations that work in support of Gaelic. I should mention that Grampian television is planning a series of programmes to support standard grade Gaelic. Gaelic is strengthening as a language and it has our support.

Mr. John Marshall: Will my hon. Friend accept that 95 per cent. of Scottish people do not know a word of Gaelic and that they want television programmes that they can enjoy and understand in the lingua franca?

Mr. Forsyth: What my hon. Friend says is true. There are 80,000 Gaels in Scotland, which is about 2 per cent. of the population. However, there are concentrations in particular communities. I see no conflict between giving stimulus and support to the Gaelic language and providing the required wider programming interests through the broadcasting authorities. I believe that the development of new technology will enable more broadcasting to be achievable, and that is a matter to which I hope the broadcasting authorities are turning their minds.

Rating Reform

8. **Mr. Worthington:** To ask the Secretary of State for Scotland if he will meet *(a)* the Confederation of British Industry (Scotland), *(b)* the Scottish Council (Development and Industry), *(c)* Chambers of Commerce and *(d)* the Convention of Scottish Local Authorities to discuss the implementation of a uniform business rate.

Mr. Lang: The reform of business rates has been discussed with a number of Scottish business interests. No further meetings are planned at present.

Mr. Worthington: I find it amazing that the Minister continues to be complacent as always when he knows, as he has said in the past, that the Scottish business community is substantially disadvantaged, so that a Marks and Spencer store in Falkirk pays £166,000 in rates and a Marks and Spencer store of similar size in York pays £32,000. It is universally agreed that, after the revaluation in 1990, Scottish business will be further disadvantaged. Neither I nor the business community can understand why the Government wish to impose a higher tax on Scottish business than will be paid in England and Wales. Why is the Minister being so complacent?

Mr. Lang: The complacency is on the other side, when one reflects that the hon. Gentleman was once finance convenor of Strathclyde region. One of the disadvantages that Scottish businesses face is as a result of the depredations of high-spending Labour-controlled local authorities. However, I am happy to assure the hon. Gentleman that Scottish businesses will derive considerable benefit from the index-linking provisions in the Abolition of Domestic Rates Etc. (Scotland) Act 1987. If those provisions had been in force for the past five years, Scottish businesses would have had to pay £200 million less in rates than they have had to do.

Manufacturing Industry

9. **Mr. Millan:** To ask the Secretary of State for Scotland if he will make a statement about the prospects for manufacturing industry in Scotland.

Mr. Rifkind: The prospects for manufacturing industry in Scotland are extremely favourable, Manufacturing output in the final quarter of 1987 was 4·7 per cent. up on the previous quarter and I expect further strong growth this year.

Mr. Millan: Does the Secretary of State agree that it is important to manufacturing industry in Scotland that it should have available to it an efficient and economic electricity supply? Is he aware that today's Energy Select Committee's report on the Government's proposals for electricity privatisation is a devastating indictment of the proposals, showing them to be ill-thought-out and thoroughly muddled? It also shows that the so-called competition by comparison that the Government have claimed would keep down costs in Scotland is largely meaningless, that the proposals pose real dangers to Scottish consumers and, particularly, that Scottish consumers, including industrial consumers, may very well finish up by subsidising the export of Scottish electricity to England. Why does the Secretary of State not drop the proposals?

Mr. Rifkind: I have not yet had an opportunity to read the Select Committee's conclusions, but I understand that they question the value of continuing with vertical integration in Scotland whereby generation, production and distribution are in the same company's control. As the right hon. Gentleman shares the Government's view that vertical integration has been to the benefit of the Scottish economy, and as that will continue, I am surprised that he did not refer to that.

Mr. Steel: Does the Secretary of State accept that the adverse effect of the high value of the pound and of high interest rates is bound to be considerable on manufacturing in Scotland in general and on the woollen trade in the Borders in particular? Does he not receive a warning from this morning's trade figures, which show that we are on target, not for the Chancellor's £4 billion deficit at the end of the year, but, possibly, for a £10 billion deficit? Does the Secretary of State accept, therefore, that the Government's economic policy appears to be constructed on a pack of credit cards?

Mr. Rifkind: No, I do not, because, as the right hon. Gentleman will appreciate, if we returned to the levels of inflation that existed when he was in a pact with the Labour Government, the prospects for Scottish industry would be disastrous. Scottish industry and manufacturers are going through a period of unprecedented growth, which they recognise as being favourable to their interests and those of their employees. The alternative economic prescriptions that the right hon. Gentleman supported during the period of the last Labour Government would create a gloomy future for the textile industry in his constituency, as well as for Scottish industry as a whole.

Mr. Favell: Does my right hon. and learned Friend agree that the recent marked and welcome improvement in the performance of Scottish manufacturing industry comes through a growing awareness among the Scots people that the way to success and to compete against the rest of the United Kingdom is not through the Socialist dependency preached by all three Opposition parties, but through hard work, free enterprise and individual promotion—in other words, Thatcherism?

Mr. Rifkind: Yes.

Mr. Dewar: May I help the Secretary of State by telling him that the Select Committee on Energy did not make the comment that he has reported to the House. Instead, it made the interesting point that vertical integration has been favoured in Scotland and not in England, and that no arguments, except that of historical convenience, have been adduced by the Government to justify that difference of approach. Does the right hon. and learned Gentleman accept that he cannot shrug off a Committee with a solid Tory majority, which has condemned in the most stringent terms as ill-thought-out and ill-considered the Government's plans to privatise the electricity industry? It makes the telling point that no real effort has been made by the Government to establish or argue that there will be any advantage for the consumer. It condemns in the most forthright way the atmosphere of hostility that has, for example, conditioned the Government's approach to the coal industry. Is it not clear that the Secretary of State will have to rethink his position following the devastating job that has been done by the Select Committee?

Mr. Rifkind: I recall that before every previous privatisation there have been those who have made exactly the same predictions, which have been found to be entirely incorrect when the results have been announced. Since the Government have announced their proposals for privatisation in Scotland—those for the electricity industry and the Scottish Bus Group, for example—we have found a tremendous increase in interest among the employees of the industries. Their main interest lies in the opportunity for them and their fellow workers to enhance their participation in the industries that are important to them.

Type 23 Frigate Order

10. **Mr. John Marshall:** To ask the Secretary of State for Scotland what assessment he has made of the impact on the Scottish economy of the recent order for three type 23 frigates from Yarrow Shipbuilders.

Mr. Lang: The order, together with existing work on frigates in the yard, will safeguard over 4,000 jobs at Yarrows well into the 1990s, with proportionate spin-off to the local and national economy. The Ministry of Defence estimates that the equivalent of 10,000 jobs, including those at Yarrows, will be sustained in the defence industry throughout the United Kingdom over the next four to five years.

Mr. Marshall: Does my hon. Friend agree that the news that the jobs have been safeguarded is yet another sympton of the buoyancy of the Glasgow economy, which has led to the Glasgow commercial property market being one of the most vibrant in the United Kingdom? Does he further agree that the order makes it highly likely that Yarrow will be at the forefront of those tendering for the fourth frigate in 1989?

Mr. Lang: My hon. Friend is right to welcome the order and the success that it brings to the Clyde. It was won in fair and open competition. It is a tribute to the work force and its skills and to the forward-looking investment programme of the management at Yarrow.

Mr. Ingram: Is the Minister aware of the excellent design assistance that has been given to Yarrow by the national engineering laboratory at East Kilbride? Will he share in the outrage that has been expressed throughout Scotland at the proposed sell-off of the NEL, and the secretive way in which it has been introduced?

Mr. Lang: I welcome the interest that has been shown in the national engineering laboratory by the number of applications that have been submitted. I believe that that will achieve a secure future for the laboratory.

Mrs. Margaret Ewing: Has the Minister spoken at any stage to his colleagues in the Ministry of Defence to ensure that further defence jobs of this nature come to Scotland? The defence procurement budget acts as a massive subsidy to the south-east and south-west of England. Would it not be more appropriate if more of the budget were spent in Scotland?

Mr. Lang: The hon. Lady is talking bigoted nonsense. Yarrow has seven Royal Navy ships on order or under construction. I wonder how many ships there would be in the Royal Navy of an independent Scotland.

Regional Development Grant

11. **Mr. McKelvey:** To ask the Secretary of State for Scotland what steps he has taken to speed up the process of settling applications and claims for payment of regional grants.

Mr. Lang: A large intake of applications and claims were received in the period just before the scheme was closed to new applications. Additional staff have, therefore, been deployed in the regional development grants office in Glasgow. The number of cases dealt with is running at record levels, but some delay to applicants is unfortunately inevitable.

Mr. McKelvey: The Minister will recall that I wrote on behalf of Forbes and Whiteford Ltd. in my constituency —a small but successful firm—which has been held up for several months. Its application has been forwarded and it is waiting on the cheque. I appreciate that extra staff have been employed in the office to issue the cheques, but does the Minister share my anxiety that if small firms do not receive the money that they need up front for their small expansions there will be job losses? The number might be small, but they will be vital jobs that we require in areas such as Kilmarnock. Will further staff be deployed so that we can reduce the waiting time to weeks rather than months?

Mr. Lang: I understand the hon. Gentleman's concern, and I appreciate the difficulties confronting small firms. More than one year's applications were received by the Department within about three months. The case to which the hon. Gentleman refers is being considered at this time.

Mr. Oppenheim: Would not more of the same reach the right parts faster if it were not for the regional policies of the TGWU, which seems to put the interests of its members in the prosperous south ahead of those of the unemployed in Dundee, but whose sponsorship money Opposition Members still seem keen to take?

Mr. Lang: My hon. Friend is absolutely right. It is also a cause of considerable regret that while the TUC supports the introduction of the employment training scheme, the STUC is resisting the scheme, which is designed to help the long-term unemployed in Scotland.

Mr. McLeish: Does the Minister not accept that the RDG fiasco is another example of the mismanagement of the Scottish economy? Will he tell the House how many applications are still outstanding and when the backlog is likely to be cleared?

Mr. Lang: A considerable number of grants are outstanding. It is impossible to give the hon. Gentleman an exact figure, because of the movement that is taking place. I can tell him that over the past four months 2,000 cases have been cleared and that the clearance rate will accelerate further at the end of the holiday season.

Scottish Bus Group and CalMac

13. **Mr. Lambie:** To ask the Secretary of State for Scotland what discussions he has held concerning the privatisation of the Scottish Bus Group and the future of CalMac; and if he will make a statement.

Lord James Douglas-Hamilton: My right hon. and learned Friend has met the chairman and deputy chairman and the board of the Scottish Transport Group. I have met the Scottish Trades Union Congress and the joint Scottish shipping services advisory committees. My right hon. and learned Friend is presently considering the future arrangements for CalMac and the pattern of privatisation of the Scottish Bus Group.

Mr. Lambie: In view of the Secretary of State's reply to my right hon. Friend the Member for Glasgow, Govan (Mr. Millan) concerning the need for employee participation, will the Secretary of State provide general preferential arrangements for employee bids for the Scottish Bus Group?

Lord James Douglas-Hamilton: Yes. We regard it as particularly important that management and employees are given the opportunity to acquire a stake in their own business, and consideration will be given to how best to encourage that. We are aware that a considerable measure of interest is already being shown by employees, as well as by management, in possible management/employee buy-outs. I hope that privatisation in this case will see a significant increase in employee participation.

Mr Allan Stewart: Is my hon. Friend aware that the Scottish Transport Group and many of the people involved in the industry sincerely believe that privatisation should be on the basis of the existing companies and not on a structure which, perhaps, has purely theoretical merit? Will he assure the House that he will take those representations seriously? Does he agree that bus privatisation will present a major opportunity for Scots and Scottish institutions to take a stake in an important indigenous industry?

Lord James Douglas-Hamilton: Certainly. The Secretary of State's decision was based on the advice of the Scottish merchant bank advisers, Quayle Munro, and has the prime purpose of increasing competition in the Scottish bus market to the benefit of the consumer and to boost enterprise and, in particular, employee participation.

National Farmers Union

14. **Mr. Wallace:** To ask the Secretary of State for Scotland when he last met the president of the National Farmers Union of Scotland to discuss the current state of agriculture in Scotland.

Mr. Michael Forsyth: My right hon. and learned Friend last met the president at the Royal Highland show.

Mr. Wallace: I am sure that the Under-Secretary of State is aware of the disappointment in Scottish agriculture at the relatively small devaluation of the green pound—not least in the beef sector, where a date for it to take effect has not even been announced. Additionally, there are ever-increasing financial burdens as a result of higher interest rates. On the next occasion that the Secretary of State meets the president of the Scottish NFU, does he propose bridging what the president recently described as a yawning credibility gap between the Government's protestations that British farmers must not be disadvantaged and their inability to deliver?

Mr. Forsyth: The position on the green pound is that we achieved a settlement that was very good compared with other countries; only two other countries within the Community did better. As to agriculture's financial position, the hon. Gentleman may be aware that the latest bank figures show a fall in the burden of debt carried by farmers in Scotland. In the year to May 1988 it was down 3·5 per cent. in current money terms and down 7 per cent. in real terms. The figures show increasingly careful financial management among other farmers, which is welcome.

Mr. Eadie: When the Minister met the president of the National Farmers Union, did he have an opportunity to discuss the massive cutbacks in research and development in agriculture? I believe that the total figure is about £75 million. Can the Minister tell the House how many jobs in Scotland will be involved in the cutback, and will he put in the *Official Report* all the institutions in Scotland that will suffer a cutback in employment?

Mr. Forsyth: The hon. Gentleman seeks to present a transfer of responsibility for funding from the state to industry as a cutback, for reasons best known to himself. The overall position on future levels of public spending on agricultural research and development is, as he knows, still under consideration, and no final decisions have been made.

Mr. Buchanan-Smith: Is my hon. Friend aware of the particular difficulties facing the pig industry in Scotland, particularly in areas such as Grampian, where it is an important part of the agricultural economy? Is he further aware that the problem is caused largely by the increase in overseas protein prices? This follows a very

difficult period in relation to monetary compensation amounts. There is deep concern in the pigmeat sector in Scotland, as indeed there is throughout the United Kingdom.

Mr. Forsyth: As my right hon. Friend will know, one of the causes of concern in the pigmeat sector involved the removal of MCAs. He will also know that the recent settlement met our major objectives. It improves the competitive position of United Kingdom pig farmers relative to nine of the 12 member states, and virtually eliminates the pigmeat MCA gap.

Revenue Support Grant (Scotland)

3.31 pm

The Secretary of State for Scotland (Mr. Malcolm Rifkind): With permission, Mr. Speaker, I wish to make an announcement about local authority expenditure and revenue support grant in Scotland for 1989-90.

I propose that the provision for local authority current expenditure in 1989-90 should be £3,930 million. This level of provision is 8 per cent. more than provision for the current year, and £240 million over provision for 1989-90 as set out in the public expenditure White Paper. The figure is also 4·6 per cent. above authorities' adjusted budgets for 1988-89. It includes full provision for the extra administrative costs of operating the community charge, as estimated by the Convention of Scottish Local Authorities.

I propose that aggregate Exchequer grant should be set at £2,500 million. This is £129·5 million or 5·5 per cent. more than the settlement allowed for this year, and local authorities in Scotland and local taxpayers should accordingly find it a very satisfactory settlement. In reaching it I have taken into account the views that the Convention of Scottish Local Authorities expressed to my hon. Friend when it met him on 8 July. The settlement is based on authorities' own budgets for the present year. Grant has been increased by more than the rate of inflation. If authorities do not increase their real level of spending next year, community charges should therefore be set at levels no higher than those that we have illustrated for this year.

I hope that authorities will respond very positively to the settlement in preparing their budgets for next year.

Mr. Donald Dewar (Glasgow, Garscadden): I thought that there was a distinctly smug air about the Secretary of State as he made his announcement. Perhaps he has been influenced by the version of what he said that appeared in this morning's Scottish press, presumably busily leaked by his own information department.

Those reports have inevitably given a misleading gloss on the facts. As I understand it—perhaps the Secretary of State will confirm this—he has taken the 1988-89 budget and added 4·6 per cent. to cover inflation. Does he accept that pay settlements in the local authority pay sector have been running above that, and that when that is combined with the additional burdens to be met—such as poll tax administration, the establishment of school boards, the AIDS campaign and a number of other matters—the increase is wholly inadequate? Would it not be fair to say that an increase of 6 per cent. is necessary to guarantee the present level of services and the increased demands to which I have referred?

The statement refers to an increase in grant. Is it not a fact that there is a fall in the grant percentage from 55·4 per cent. in the current year of the Government's assessment of local government expenditure before penalty to under 55 per cent. in 1989-90? Is it not correct that if the grant percentage figure for the year that we are discussing had been maintained at the same level as last year, £30 million of additional grant would be available to local authorities?

Is not the Secretary of State being hopelessly complacent about the implications of the settlement for the poll tax? Will it not lead either to a further reduction in services or probably to an increase of about £30 per head for the average individual poll tax payer? Does he not accept that it now looks, unless there is a very big reduction in the services offered to often needy groups, as though the average individual poll tax in Scotland will be around the £300 mark, not the £250 mark that Ministers have been talking about?

Does the Secretary of State accept that there is no reason to welcome the new revenue support grant? Judging by today's announcement, it represents another chapter in an all too familiar and dreary story. Will the right hon. and learned Gentleman contemplate the damage that has been done by persistent and sustained cuts in the settlement, which have led to the grant percentage falling in the last eight years from 68·5 per cent. to the present miserable level, representing a cumulative loss of £3,000 million to the people of Scotland?

Mr. Rifkind: In the last two or three years, as the Government have announced generous rate support grant settlements, the hon. Gentleman's attempts to identify bad news from good news have become increasingly unconvincing. The hon. Gentleman is correct when he says that the provision is up by 4·6 per cent., but I think he will appreciate that what is more important to local authorities than provision, which is indicative of what the Government feel that local authorities ought to spend, is the level of grant. That is up by 5·5 per cent.

The hon. Gentleman asked about community charge administration. COSLA's estimate of the costs of administering the community charge is £25 million. In the current year and next year that amount is to be fully accommodated within the settlement that I have made.

The grant percentage includes factors such as loan charges and capital from current revenue. I do not have the precise figures immediately available to me, but that is the cash that local authorities have received. Apart from grant going up by more than the rate of inflation, the fact is that, because grant penalties will no longer apply, every pound of grant that goes to the local authorities will remain with them. We shall not see, as has been the case under successive Governments, a proportion of the grant being returned to the Government because of excessive spending. The hon. Gentleman ought to recognise that fact.

I cannot for one moment understand the basis of the hon. Gentleman's predictions about community charge levels. I appreciate that the Labour party has its own reasons for making as much as possible out of the issue by scaremongering. However, as a result of the generous grant settlement that I described in my statement, unless local authorities choose to increase their real spending, community charges should be set at levels that are no higher than those that we have illustrated for this year.

Sir Hector Monro (Dumfries): I thank my right hon. and learned Friend for his statement. Does he accept that the additional money that is being made available to local authorities will stop them criticising the so-called cuts? Does he agree that local authorities will be able to increase their expenditure while maintaining the level of community charge at no more that 5 per cent. above current rates?

Mr. Rifkind: My hon. Friend is substantially correct. The level of the community charge will vary from locality to locality, depending on the present level of spending. Only if a local authority chooses to increase its real level of

[Mr. Rifkind]

spending will it be necessary to impose an additional burden on the community charge payer. The point of reforming the local government finance system is to introduce accountability between a local authority and the community in its area. If the community wishes additional services to be provided, it will have to contribute more towards their cost. That is the basis of responsible and democratic local government.

Mr. Archy Kirkwood (Roxburgh and Berwickshire): Even for local authorities to maintain their existing level of services, assuming that the police and fire authority pay increases have to be taken from it, will the Secretary of State confirm that any pay awards above 4·6 per cent. in the year 1988-89 will require to be found either through additions to the poll tax or by decreasing services?

Mr. Rifkind: I hope that local authorities will take that into account. One of the problems in the past few months has been that local authorities in Scotland agreed on an increase in teachers' salaries which was considerably higher than the Government recommended and more than was agreed for teachers in other parts of the United Kingdom. If local authorities, at their own discretion, choose to increase teachers' salaries by more than the Government are recommending and more than is being applied elsewhere, that will be an additional burden on those local communities, and that must be brought home to them.

Mr. Alick Buchanan-Smith (Kincardine and Deeside): I congratulate my right hon. and learned Friend on his generous settlement. Can he confirm that it is more generous than those for England and Wales?

Mr. Rifkind: I said that the increase in grant will be £129·5 million, which represents a 5·5 per cent. increase in grant compared with last year. The increase in grant for England was 4·6 per cent. and for Wales 5·1 per cent.

Mr. Dick Douglas (Dunfermline, West): Will the Secretary of State reflect on what he has been saying? Will he come clean and admit that the proportion of revenue expenditure incurred by local authorities subvented by central Government has diminished considerably during his period of office? Does he accept that he is talking about an uptake of 100 per cent., but no one really expects a 100 per cent. payment of community charge, especially if we relate it to people like me who will not pay? The proportion is likely to be between 80 and 90 per cent. Therefore, the level of community charge in Scotland will be close to what my hon. Friend the Member for Glasgow, Garscadden (Mr. Dewar) said—in excess of £300. Will he confirm that?

Mr. Rifkind: The hon. Gentleman pays rates at the moment. If he refuses to pay the community charge, he is saying that he wishes to do well out of the change. He is refusing to make his contribution to the cost of local government and is expecting other people to bear the burden of that. If the hon. Gentleman describes that as a position of principle, he has some very odd principles.

Mr. Allan Stewart (Eastwood): Does my right hon. and learned Friend agree that in their reaction to his statement today Opposition Members have brought their traditional whingeing and whining to a fine art? Is not an increase in provision of 8 per cent. and an increase in grant of 5·5 per cent. generosity almost to the point of excess? I hope that my right hon. and learned Friend will confirm that the Government are still in favour of controlling public expenditure. However, does he agree that the increases will knock on the head the wholly irresponsible so-called forecasts about the community charge to which the Scottish electors were treated before the district elections?

Mr. Rifkind: I agree with my hon. Friend that this is a very generous settlement. If he feels that it is too generous, and if he would like Eastwood district council to be excluded from its benefits, I shall be happy to consider that.

Mr. Andrew Welsh (Angus, East): Is it not the case that this so-called generous settlement should be put in the context of the withdrawal of £2,000 million from local government by the Government since they came to office? While we are grateful for small financial mercies, is this not an admission that COSLA and the local authorities got their sums right in regard to expenses for implementing the poll tax and the Government got it wrong? When will the Government start listening to the men and women who run local authorities rather than imposing centralist solutions?

Mr. Rifkind: I wish that the hon. Gentleman would make up his mind. He started by saying that the Government were acknowledging that COSLA had got it right, yet he concluded by asking when the Government would start to listen to COSLA. The hon. Gentleman cannot make both points simultaneously, otherwise he will end up even more confused than usual; but perhaps in the case of his political party that is a perfectly legitimate position for him to adopt.

Mr. Tony Marlow (Northampton, North): It seems that the Government are offering more individually to the constituents of Scotland than they are to my constituents and that money is being transferred from my people to the people of Scotland. Can my right hon. and learned Friend tell the House how he feels that this will reduce the invidious and malignant influence of Socialism on Scotland and, if not, what does he suggest?

Mr. Rifkind: My right hon. Friends the Secretaries of State for the Environment and for Wales have announced generous rate support grant settlements, as have I. It is not unusual for there to be slight differences between the three territories, and I do not think that any dramatic conclusions should be drawn from any differences. The real message is that the Government are playing their full part responsibly to meet the needs of local authorities throughout the United Kingdom.

Mr. Ron Brown (Edinburgh, Leith): Is not the right hon. and learned Gentleman employing double standards when he attacks the public and hon. Members for saying that they will not pay the poll tax, or the so-called community charge? Is that not hypocrisy, bearing in mind the fact that the Government justify legalised corruption in the form of tax avoidance, which goes on among the rich? Is it not time that the working class fought back by not paying this Tory tax, which does not have any backing in Scotland or, I believe, in England?

Mr. Rifkind I suspect that the hon. Gentleman and those of his colleagues in the Labour party and the

Scottish National party who wish to campaign for a policy of ignoring laws of which they do not approve will find that they are going against the grain of Scottish opinion and will be treated with contempt by the Scottish people. No hon. Member campaigned during the last general election on a manifesto commitment to break the law. The hon. Gentleman did not tell his electorate that that is what he intended to do and I think that he would have got a pretty raw answer if he did.

Mr. John Marshall (Hendon, South): Will my right hon. and learned Friend confirm that, as a result of this settlement, a far higher percentage of local authority expenditure in Scotland will be grant aided than is the case in England? Does he agree that the lesson of the settlement is that those who make irresponsible wage settlements should not expect to be bailed out by the taxpayer? Does he agree that it is high time that Scottish local authorities sought greater value for money through competitive tendering?

Mr. Rifkind: I agree with my hon. Friend about competitive tendering. He is right to say that the various countries of the United Kingdom receive different amounts of grant from the Government. It is not some arbitrary matter. It reflects the different needs of those countries and the revenue which can be expected from the local community if a comparable burden is put on the system of taxation. At one extreme is the Western Isles, where a high proportion of expenditure is met by grant. In other parts of Scotland, where economic circumstances are different, much less expenditure is met by grant. That principle applies throughout the United Kingdom.

Mr. Dennis Canavan (Falkirk, West): Will the right hon. and learned Gentleman answer the point raised by my hon. Friend the Member for Dunfermline, West (Mr. Douglas)? When determining revenue support grant, what estimate has been made of the number of people who cannot or will not pay poll tax, bearing in mind the fact that an increasing number of people seem to be coming to the conclusion—the justifiable conclusion—that the only way in which to stop the poll tax is for enough people to say, "We refuse to pay"?

Mr. Rifkind: I notice that those who hold that view have decided to campaign on the interesting slogan, "Can pay but won't." It appears that the campaign is based not on hardship or allegations of inability to pay but on purely political prejudice. This and, I suspect, any other responsible Government do not make estimates based on the likelihood of the hon. Gentleman and his friends refusing to obey the law.

Mr. Phillip Oppenheim (Amber Valley): Would these professions of poverty not be more credible if more Scottish councils showed themselves more willing to save money by contracting services out and going to competitive tender?

Mr. Rifkind: Local authorities throughout the United Kingdom are increasingly being required to do that. The process consistently shows substantial benefits for the local community, and it enables local authorities to provide better services for the community at reduced cost. That is something which all right-minded people support. Competitive tendering makes sense for local authorities and the Health Service. Everybody does it with their own personal finances, and there is no reason why representatives of the community should not apply similar criteria.

Mr. Jimmy Hood (Clydesdale): Is the Secretary of State aware that at the last general election I campaigned against the poll tax, made no secret of the fact that I would not pay that iniquitous and immoral tax and doubled my majority?

Mr. Rifkind: No doubt the hon. Gentleman will want to continue to pay his rates or will insist on contributing a sum equivalent to his rates to some worthy cause. Hon. Members who claim to be acting on the basis of principle but who end up in the circumstances suggested by the hon. Gentleman are unlikely to gain any significant respect.

Mr. Neil Hamilton (Tatton): Does my right hon. and learned Friend accept that English Members will be astonished by the relatively high proportion of local government spending in Scotland that is paid for by the taxpayer because that proportion is much higher than in our constituencies? Would my right hon. and learned Friend be equally as astonished at the inkling of the dinosaur mentality of the hon. Member for Glasgow, Garscadden (Mr. Dewar), who intimated that the inevitable consequence of a reduction in grant percentages —I know that my right hon. and learned Friend has not announced that today—is that the community charge would be higher or that local government services would be reduced? It has not occurred to the hon. Member for Garscadden that local authorities might be able to become more efficient. Is that the opinion of the hon. Member for Garscadden because the Labour party's paymasters in Scotland are, by and large, the local authority unions which want to keep their noses in the trough and their hands in the taxpayers' pockets?

Mr. Rifkind: Undoubtedly there is a combination of motives which sometimes leads to the effect to which my hon. Friend has referred.

Mrs. Maria Fyfe (Glasgow, Maryhill): I did not promise in my election address to shoot the Prime Minister, but I am constantly urged to do that by my constituents. When does the Secretary of State intend to announce the share out of the grant settlement? We would be interested to know whether that will be carried out fairly according to need or whether the Government will exercise the political prejudice which they have exercised so often in the past.

Mr. Rifkind: The political prejudice to which the hon. Lady has referred has meant, with regard to distribution, acting in the closest consultation with COSLA and in the vast majority of cases accepting COSLA's proposals for distribution. If that is political prejudice, it is a rather interesting kind of prejudice which is apparently shared by the hon. Lady's friends among local authorities.

Mr. Alistair Darling (Edinburgh, Central): What account did the Secretary of State take of rising interest rates which have a major impact on local authority expenditure? Does he not accept that, if interest rates continue to rise as they have, they will push the poll tax well above the Secretary of State's bogus figures unless local authorities begin to cut services, or is that really what the Secretary of State would like to see happen?

Mr. Rifkind: The hon. Gentleman knows perfectly well that the increase in grant that I have announced today is above the rate of inflation. He is also aware that interest rates, when they relate to the loan charges of local authorities, very often lead to adjustments in the support for local authorities. The hon. Gentleman has referred to the worst example that he could possibly have thought of in referring to changes in interest rates affecting local authorities. Traditionally those have been accommodated by central Government.

Mr. John McAllion (Dundee, East): The level of rate support grant percentage is fairly important because if it has been reduced it represents a further shift of the burden of taxation from central Government to the backs of poll tax payers. Will the Secretary of State stop ducking the question and confirm or deny whether the level of RSG percentage this year represents a reduction or an increase over last year's?

Mr. Rifkind: As I have already said to the hon. Member for Glasgow, Garscadden (Mr. Dewar), that kind of calculation does not just——

Mr. McAllion: That means yes.

Mr. Rifkind: If the hon. Gentleman would allow me to answer his question as I allowed him to ask it——

Mr. Speaker: Order. I think it was I who allowed the hon. Gentleman to ask the question.

Mr. Rifkind: I accept your rebuke, Mr. Speaker.

The level of grant is the crucial requirement for local authorities. That is increased by more than the rate of inflation. The percentage relates to the percentage of the figure for provision. That is an indicative figure. It also takes into account loan charges and capital from current revenue. As I said to the hon. Member for Garscadden, I do not have the figures available for loan charges or capital for current revenue. However, the important point for local authorities is the actual cash that they receive. If that cash is more than the rate of inflation, it is undoubtedly one of the more generous settlements that they have received in recent years.

Mr. John Home Robertson (East Lothian): The settlement is supposed to take Scottish local authorities through the first full chaotic year of the Government's new poll tax. Has the Secretary of State taken account of the built-in inefficiency of the tax and the fact that the majority of Scottish people do not want it to work? What advice is he giving local authorities about the level of shortfall in collection for which they should budget? Should it be 10, 15 or 20 per cent.? How can they manage their budgets in the coming year, given the uncertainty that the Government have created?

Will the Secretary of State respond to the specific point made by my hon. Friend the Member for Glasgow, Garscadden (Mr. Dewar)? Is not the grant settlement a lower percentage of the Government's estimates of local authority expenditure than that for the current year?

Mr. Rifkind: The hon. Gentleman asks the Government to make estimates based on people allegedly not paying the community charge or having a lack of enthusiasm for it. *[Interruption.]* The hon. Gentleman referred to inefficiency and said that people do not wish to pay the community charge. Despite the Labour party's campaign to frustrate the registration process—that was one of the examples used during the passage of the Bill to show the inefficiency of the system and how it would not operate effectively—here we are, two months before the target date for the completion of registration, and it is over 90 per cent. complete in the majority of areas. As a consequence, it can be seen without fear of qualification that the Labour party's campaign has been a complete shambles.

Personal Statement

3.57 pm

Sir Anthony Meyer (Clwyd, North-West): Mr. Speaker, I wish to make a personal statement.

There have recently been reports in the press and on television based on a letter written by me to the Chairman of Ways and Means in which I made comments about the hon. Member for Neath (Mr. Coleman) in his capacity as Chairman of the Welsh Grand Committee. That letter was not made public by me, but the views expressed in it have passed into the public domain.

I recognise that it is not appropriate for me, as a fellow member of the Chairmen's Panel, to be associated with the comments that have become public, and I also recognise that what I said in connection with the incident which provoked my letter was based on a misunderstanding. In these circumstances, I wish to withdraw any reflection upon the chairmanship of the hon. Member for Neath, and to apologise to him unreservedly for the embarassment caused to him by this incident.

Points of Order

3.58 pm

Mr. Andrew Bowden (Brighton, Kemptown): As you, Mr. Speaker, are aware, an ever-increasing number of questions are being tabled for oral answer. The Department of Health and Social Security is being split into separate Departments. As has so often happened in the past, with the luck of the draw, during social security Question Time one side of the Department has not had a fair share of the time to give answers. Will you, Mr. Speaker, inform the House whether any action will be taken to ensure that questions for the Department of Health and those for the Department of Social Services are split?

Mr. Speaker: I thank the hon. Gentleman for raising this matter and for giving me notice of it. I appreciate that these are important matters for those who have an interest in oral questions on health or social security. They fall to be dealt with not by me but by the Government after consultation through the usual channels. Like the hon. Gentleman, I venture to hope that an early solution can be found so that the tabling of oral questions can go ahead in a satisfactory manner on Friday this week.

Dr. Norman A. Godman (Greenock and Port Glasgow): On a point of order, Mr. Speaker. In answer to question No. 6, the Minister of State, Scottish Office, the hon. Member for Galloway and Upper Nithsdale (Mr. Lang), mentioned my wife viz her intentions about the poll tax. Given that my wife, fortunately or otherwise, is not an hon. Member, I found that reference to be in appalling bad taste. I do not expect an apology from the hon. Gentleman because I do not expect decent behaviour from a representative of the sleekit, baggy-trousered outfit that runs the Scottish Office.

Mr. Speaker: I am surprised that the hon. Gentleman did not participate in Scottish Question Time.

Fuel and Energy Provision

3.59 pm

Mr. John Hughes (Coventry, North-East): I beg to move,

That leave be given to bring in a Bill to require the provision of essential fuel and energy to each home, to guarantee appliances, to prevent the entry to premises without prior recorded legally authorised notice, to prevent the unauthorised removal of a fuel measuring device, to abolish standing charges; and for connected purposes.

The purpose of the Bill is to eradicate the danger that people on low incomes experience when they are denied a requisite of life. The problems of the poor, the hardships that affect them and their impossible financial circumstances are best conveyed by a letter from one of my constituents. He wishes me to inform the House that he is living in the first home that he can call his own. He says:

"I have lived here two years and I am just starting life as living the meaning of life. I will explain as I go along.

Suddenly I find myself without a job and, not surprisingly, I am in a situation where I am sensitised to the very feeling of financial impoverishment.

And the inhumanity of Gas and Electric companies sending insulting and threatening notices to cut off such people as me without money to meet such demands because of state improverishment.

The very fact that British Gas or the Electricity Board can have permission to make a forced entry into a destitute family's home vexes me.

Whilst companies may have the right to be paid, it is abominably offensive to do the things they do.

Who is the real offender and culprit behind non-payment?

Is it not the state and the heads of state who legislate how much support and unemployment benefit which a family should receive?

And other legislation which affects people in hopeless situations.

I have answered the door this morning to an Electricity Board official, who wanted to cut off the supply.

So I refused him entry, which is the only thing that anyone could do.

As my unemployment benefit is £47 per week, from that I have a direct deduction of £8 per week for gas arrears before unemployment.

That leaves me £39 to pay a £40 per week mortgage; to pay for electricity, the rates, to eat and to pay for everything necessary to run a home.

I only eat what is cheap.

Yet I am unable to respond to the normal domestic situation.

If a light bulb blows, I cannot replace it.

I pay no electricity; I pay no rates or the inevitable things like house insurance.

You must know about it, unlike some, especially those of the Thatcher breed, who know little of what I experience.

So what happens when I appear in court for non-payment?

And I answer the man with the questions over the dock, whom the state appointed to judge me?"

Time denies me the opportunity to read all my constituent's letter, which defines the circumstances of the fuel poor, for which the Government have shown little concern. This is confirmed by the almost total absence of any discussion about the standard of housing and energy efficiency issues. His letter most accurately describes the appalling circumstances of the millions who were given no consideration when £2 billion was given away in tax handouts—tax handouts funded by social security changes and implemented by a majority of Members. They have led to 3,238,000 householders, who were also required to absorb increased fuel prices, being £3·43 worse off. They mean that 3,238,000 householders were unable to achieve an affordable warmth last winter, and will have less money for fuel this winter, and their fuel poverty will be intensified.

That fuel poverty will be further compounded by a British Gas with the sole objective of getting the highest return on capital and bonanza dividends for shareholders, a British Gas that no longer has a social role towards the poor, the low-income groups, the elderly, and the disabled, whose dependancy has beem described as a deadly drug. That mercenary attitude has already been emulated by the Central Electricity Generating Board, even before it has been stolen from the public.

The Government's security changes and the privatisation of fuel supplies have created an alien environment, an environment that can kill, when, without compunction, gas is disconnected as British Gas intensifies its policy of making life hard for the low-income customer, whom it considers troublesome, as they use little gas and generate high administration costs

In our so-called civilised society, there is a hostile and dangerous environment where the elderly and low-income families with young children are at risk of fires or explosions, as they continue to use dangerous cooking and heating appliances. They are frightened to have them checked, and are unable to replace them if they are condemned as unsafe. Day by day, they are forced to live with that worry and fear. It threatens their health and well-being, and it exists because what can be described only as a usurer Government have abolished a special payments system and replaced it with a cash-limited loans fund.

As we near the end of this Session of Parliament, the subject that dominates the conversation is the holiday plans of Members and their families—plans that may have been in the pipeline a year or perhaps months, and that contrast starkly with the unmade plans of millions in our impoverished society. They cannot plan a year ahead, a week ahead or even a day ahead, and they fear what lies five months ahead to winter. They are unemployed; elderly; retired; they are sick; disabled or are families with young children. Their circumstances force them to spend 13 hours a day in their homes. They will spend 20 per cent. of their income on fuel. They will exist in temperatures that would not be acceptable to a shop worker, a factory worker or an office worker and would most certainly be unacceptable to the majority of hon. Members.

Those millions fear what is five months ahead, when winter is with us, because we force them to live in circumstances that contrast so extremely with ours, here in this cosseted, centrally-heated seat of Government. This coming winter, they will exist in a Government-created hell, without heat, which will result in 30,000 deaths. They will die of cold—and it will not be on the ski slopes, and they will not be buried under a snow avalanche. They will die simply because their Government stole their heat.

Question put and agreed to.

Bill ordered to be brought in by Mr. John Hughes, Mr. Dave Nellist, Mr. Ronnie Campbell, Mrs. Alice Mahon, Mrs. Audrey Wise, Mr. Win Griffiths, Mr. Pat Wall, Mr. Terry Fields, Mr. Bob Cryer, Ms. Mildred Gordon, Mr. Harry Barnes and Mr. Tony Banks.

Fuel and Energy Provision

Mr. John Hughes accordingly presented a Bill to require the provision of essential fuel and energy to each home, to guarantee appliances, to prevent the entry to

premises without prior recorded legally authorised notice, to prevent the unauthorised removal of a fuel measuring device, to abolish standing charges; and for connected purposes: And the same was read the First time; and ordered to be read a Second time upon Friday 28 July and to be printed. [Bill 210.]

Mr. Speaker: I remind right hon. and hon. Members on both Front and Back Benches that debates on the motions today may last for one and a half hours each.

Immigration

4.8 pm

Mr. Roy Hattersley (Birmingham, Sparkbrook): I beg to move,

That the Statement of Changes in Immigration Rules (HC 555), which was laid before this House on 7th July 1988, be disapproved.

This is a tawdry little measure, made all the more squalid by the circumstances of its introduction. Its effects on the life of the nation as a whole will be imperceptible, but the suffering and hardship that it will cause to a small number of families living in Britain will be immense. Its immediate origins go back over a year to the general election and a promise given by the Home Secretary to a Tory candidate in a marginal seat—a promise to be tougher on immigration and to impose tougher immigration restrictions.

We oppose the changes because of the hardship and suffering that they will cause and because they are part of the Government's political strategy on race and immigration. The Government believe that they gain electoral advantage by first depicting the ethnic minorities as a danger, and immigration as a threat, and then by claiming to be the only party that will face the danger and overcome that threat with suitably harsh policies.

This morning the Minister of State went on radio to refute the charge that the Government are intentionally increasing and exploiting fear about immigration. He did so first by announcing that, on the sub-continent of India, there are 1,000 million potential immigrants to this country. He used that figure twice. He then went on to refer to the risk of Britain being "flooded" by immigrants. Finally, he went on to warn about the perils of "mass immigration". To some of us the opinions of the National Front are not made any less odious by being expressed in the style of Bertie Wooster. It is instructive to measure the Minister's scaremongering against the proposals that we are debating.

Paragraph 3 of the "Statement of Changes in Immigration Rules" prohibits the entry of second wives. That measure is geared specifically to the custom of a small group of Moslem men who are presently in this country lawfully. Each year, that provision will prevent 25 women from entering this country—25 women out of the 1,000 million potential immigrants with which the Minister of State tried to make our flesh creep this morning.

That provision will stem the "flood" at the rate of one immigrant a fortnight; it will reduce mass immigration by two a month. It is not, however, the provisions of paragraph 3, for all its pettiness, that are the most objectionable part of the statement. The Government will ask the House—I have no doubt that the most supine Back Benchers ever to support a Government will readily agree—to break a solemn promise given by a Conservative Home Secretary in 1971. In that year Mr. Maudling was explicit:

"I do not intend that the position of those already in this country, the rights of those already in this country to bring in their dependants, shall be changed. That is what we promised in the election."—[*Official Report*, 8 March 1971; Vol. 813, c. 47.]

That right is now to be abolished and that promise is to be abandoned. The excuse for that action is that the promise was made to men only and that it referred to the right of men living in this country before 1973 to bring in,

[Mr. Roy Hattersley]

without restriction, their wives and families. The excuse is that that promise was not made to women. As always with Tory immigration policy, when they claim that they are about to achieve equality, they achieve a sort of equality by increasing the problems for one group rather than reducing the difficulties of another. Men settled in this country before 1973 are now to be subject to the primary purpose rule. It is about that rule that I shall principally speak during the few minutes that I shall allow myself.

I believe that the fact of marriage should, in itself, be the sole qualification for entry into this country and that residence and settlement should be automatically allowed as long as the marriage proves to be a stable relationship. However, the primary purpose rule, as presently defined, is more objectionable than the refusal of that simple principle alone. It is deeply and additionally objectionable for three distinct reasons. First, it requires a husband or a wife to prove to an immigration officer's satisfaction that there is no other reason for the marriage than the marriage itself. That task of proving a negative and proving the reasons why they did not enter into the marriage—proving it to the subjective satisfaction of a junior official—is, in many circumstances, immensely difficult. For young men and young women, nervous in the face of bureaucracy, inexperienced in how to deal with officials and sometimes struggling with language difficulties, that task is often impossible. I have no doubt that the Home Office intends that it should be. I shall demonstrate that the primary purpose rule is not supposed to be a check on improper, arranged and inoperative—in the best sense of the word —marriages. It is meant to be a barrier to entry to this country in all circumstances.

Ms. Clare Short (Birmingham, Ladywood): Will my right hon. Friend give way?

Mr. Hattersley: I shall give way a couple of times, but preferably not too often because of the short length of this debate.

Ms. Short: I wonder whether my right hon. Friend remembers a press article that appeared some months ago. It stated that the Minister's officials had said that the rule is penalising genuine marriages and is allowing through only those who understand the complicated rule of giving the right answers. Those officials said that couples with genuine marriages had been prevented entry to the United Kingdom, and that the officials were recommending a change in the rules.

Mr. Hattersley: There are many problems with this subject and were there time I should like to consider them, but one of them is the nature of the questions that are sometimes asked. By any reasonable analysis, those questions are trick questions and they encourage people to give the wrong answers. I shall deal with the attitude of Ministry officials explicitly in a moment—their attitude is my third objection to the primary purpose rule.

My second objection, however, is the way in which that rule is presently applied. The Court of Appeal, in the judgment in Kumar, requires the Home Office and its officials to take into account the nature of the marriage after it was contracted when applying the primary purpose rule—not just how that marriage came about, but how it turned out when the partners lived together in happiness and in a proper relationship.

The evidence of appeals to the Home Office adjudicators demonstrates, beyond doubt, that the Home Office is not following that judgment and instruction from the court. Too often the primary purpose rule is taken simply to mean the circumstances in which the marriage was contracted. As a result couples with genuine marriages, real partnerships, are kept apart for one year, two years or three years until the long, protracted period of appeal is concluded.

Mr. Tony Marlow (Northampton, North): That is not how it works.

Mr. Hattersley: I am willing to give way to the hon. Gentleman who represents all of the opinion that I most detest on this subject. The hon. Gentleman prefers to mumble his opinions rather than to speak in the debate. *[Interruption.]*

Mr. Speaker: Order. Let us have an orderly debate.

Mr. Marlow: I shall answer the right hon. Gentleman's challenge. My hon. Friends and I represent the opinions of the ordinary people of our country, which he most certainly does not.

Mr. Hattersley: I agree that people do not come more ordinary than the hon. Gentleman, but there is more to it than that. The third objection to the primary purpose rule is a crucial matter of principle.

Mr. Tim Janman (Thurrock) *rose*——

Mr. Hattersley: I made it clear that I would give way twice. We have 86 minutes left to debate this matter and, in courtesy to the House, I do not propose to give way again.

My third objection to the primary purpose rule is the most important because it relates to an issue of principle. The primary purpose rule is now being used not to decide whether a marriage is genuine, but to hold down the numbers of immigrants coming to this country.

Six weeks ago, together with representatives of the Immigrant Widows Campaign, I discussed the primary purpose rule with the Home Secretary. The supervising under-secretary—a civil servant—was terrifyingly frank about the intention of the primary purpose rule. He said that it was intended to slow down the rate of entry. When I challenged that view and insisted that the only possible justification for such a rule was an attempt to detect and deter bogus marriages, the Home Secretary supported his official. I noted his words at that time, which were:

"The people out there would not understand if a lot more husbands came in."

The truth is that the people out there are assumed by the Government to be as racially prejudiced as the average Conservative Back Bencher. Perhaps some of them are, but the rest—the decent majority—are now being encouraged to develop prejudices by the constant representation of the black and Asian British as a problem and a threat. That is why the measure removes the right of some men and women who have stayed longer than their visas allow to appeal against deportation even on compassionate grounds. The measure removes the right of British citizens——

The Minister of State, Home Office (Mr. Tim Renton): I think the right hon. Gentleman is about to leave the subject of primary purpose and I want to ask him a question about it before he moves on. He will remember that in the Second Reading debate on the Immigration Bill in November he specifically said that he thought the primary purpose rule should be replaced by a quota. Eight months have passed. Has he developed his thoughts on that matter? What would be an appropriate quota?

Mr. Hattersley: I have made my position clear today. It is, and will remain, that the fact of marriage should be the qualification for entering this country, as it is in others. Quotas do not arise. There should be a right. The Minister must understand that, in a free society, it is not a right if it exists only in law and we do not allow people to exercise it in practice. A man married to a British citizen should be allowed into this country. If the Minister wants to talk about quotas, what quotas does he propose for husbands entering this country from the EEC? There are no quotas for them. The Minister thinks of quotas only in the context of black or brown—or West Indian or Indian sub-continent—quotas. He knows perfectly well—he has encouraged me to develop this subject—that the way in which the primary purpose rule now operates is such that the French citizen living in Great Britain has the right to bring a husband or wife into this country, yet that right is not available to British citizens living here.

Mr. Nicholas Budgen (Wolverhampton, South-West): Will the right hon. Gentleman give way?

Mr. Hattersley: The situation I have described is absurd. The quota, the primary purpose rule, or the limitation is supposed to operate only against the husbands and wives of black and Asian British citizens —and no on else.

Mr. Budgen *rose*——

Mr. Hattersley: I keep saying no. I shall tell the hon. Gentleman again, if he wants me to.

The desire to represent the black and Asian British as a problem and a threat is the reason why the measure removes the right of British citizens to present themselves at Heathrow or Dover and request entry into their own country unless they provide immediately, and have on them at the time, proof positive of their nationality.

No one can honestly doubt how this will work. When a man arrives at Heathrow and claims to be a British citizen and is turned away, he will not be a white South African patrial; he will be a Moslem youth, born in Birmingham and taken as a child to Pakistan. The same will happen to a girl from Jamaica who was born here but went home to live for a period with her parents in Kingston. This is another proposal that explicitly and specifically operates against the black and Asian British. I heard the Minister on the radio this morning saying——

Mr. Janman: Will the right hon. Gentleman give way?

Mr. Speaker: Order. This is a short debate. I heard the right hon. Gentleman say that he was not going to give way. If the hon. Gentleman is patient, perhaps he will be called.

Mr. Hattersley: I am attempting to observe your suggestion, Mr. Speaker, and it is up to other hon. Members to do the same.

The Minister says from time to time that these rules are non-discriminatory because they apply to every group in the community. Some rules which apply to every group in theory discriminate against one group in practice. Were the Minister to promise to penalise everyone called Khan or Hussain, he might try to argue that all Scotsmen called Khan and all Welshmen called Hussain would be similarly penalised, but it would be the Moslem British who suffered. That is how the rules work out: no matter how general they appear on paper, in practice the black and Asian British suffer. That is why we propose to vote against the statement.

I want to add a final footnote about this shabby little measure. It is clearly no coincidence that the Government announced yesterday their acceptance of DNA testing—so-called genetic fingerprinting. In the view of virtually every expert, the pilot study on that system was wholly unnecessary and, to most people's minds, was merely an excuse for delay. It has now been widely said—I hope the Minister will tell me whether it is true—that the evidence from the pilot study has been in his hands since at least last autumn.

Mr. Renton *indicated dissent.*

Mr. Hattersley: Not so? Had the DNA test been applied from the moment when it was available it would have allowed into Britain families whose claims have been denied even though they have the right to be here——

Mr. Jeremy Hanley (Richmond and Barnes): Will the right hon. Gentleman give way?

Mr. Hattersley: No.

The acceptance and implementation of the test have been held back until other barriers to immigration have been erected. The first barrier is the cost, which has risen from £50 a family to £60 a person. The second is today's abolition of the automatic rights of men who have lived here since 1973. That makes the Government's proposal all the more squalid and tawdry and it is why we shall vote against it with passion and enthusiasm.

4.27 pm

Mr. Tony Marlow (Northampton, North): I will not be taking interventions.

The proposals must be seen against a background of immigration policies over the last generation. It is a background of ever increasing availability of access to cheap international travel and of ever increasing awareness of the cornucopia of wealth that exists in the Western world for those of the Third world who can contrive to gain entry to it.

Devices and abuses are rampant. Conservative Members offer every support to the Government and to our hard-pressed immigration services in their efforts to thwart dishonest access to our society. Ours is a society which, in a negatation of democracy, has had its identity threatened in the past by a massive invasion of tribes and cultures which it neither willed nor supported. Our society's political defences were breached by the immediate enfranchisement of the invaders. It was undermined by the perverted idealism, empty racist cant —a more parliamentary word might be cynicism—and unprincipled vote-grubbing of the Opposition. I am pleased to see that the right hon. Member for Birmingham, Sparkbrook (Mr. Hattersley) is in his place.

Mr. Keith Vaz (Leicester, East) *rose*—

Mr. Marlow: I shall not give way.

Freedom of speech has been barred by the thought police of the race relations industry, an incubus on good race relations spawned by Socialists for their own ends and providing lucrative jobs for the boys and for the agitators with whom they have aligned themselves—

Mr. David Winnick (Walsall, North): On a point of order, Mr. Speaker.

Mr. Speaker: Is it a point of order or of disagreement?

Mr. Winnick: My first point of order is this. This is a narrow debate on the immigration rules. I wonder whether what the hon. Member for Northampton, North (Mr. Marlow) is saying meets that criterion.

My second point of order is this. The hon. Gentleman has referred to invaders, which is a deeply offensive term to millions of people who live in our country——

Mr. Speaker: Order. The hon. Member may not make those sorts of points. The debate is on the immigration rules and the hon. Member for Northampton, North (Mr. Marlow) must relate his speech to them. He has been speaking for only two minutes, and no doubt this has been his preamble.

Mr. Marlow: I intend to be brief and, for the benefit of the Opposition, to get through as quickly as possible.

As the rules are set out, all our citizens are rightly equal before the law. There should be no negative or positive discrimination. No one should use our society while belonging to another. Those who have gained access should be the most fervent in their commitment, if only to discharge their obligation for the privilege that they have gained. To coin a slogan, Asian citizens could well drive British cars.

I support the rules in so far as they go——

Mr. Allan Rogers (Rhondda) *rose*——

Mr. Marlow: I shall not give way, and the hon. Gentleman knows why.

I support the rules in so far as they go, but I wish that they went further. There is much talk—we have heard it today from the Opposition—about the reunification of families, a benign objective which I support. But if one family member has left his native land for Britain, we do not, as far as I know, prevent him from returning to the bosom of his family. However, we are rightly anxious about who should have access to our country—minimising those from a different cultural background.

Certain rights have been granted and they should be modified. If two parties to a marriage share a common language, not English, surely it is more appropriate, more humane and more enlightened for the happy couple to settle in the land of their common language. We need to introduce a system of language tests. I am sure that my constituents, and the majority of the constituents of Opposition Members, would support that.

Secondly, the illegal acquisition of abode in our country, although the motive may be flattering, is theft, and thieves are criminals. There is pressure for the introduction of a system of identity cards to support the fight against crime, and if that helps in the apprehension of those criminals, so much the better.

Immigration, for most categories of migrants, should be considered not a right but a privilege—a privilege to be earned, not casually dispensed; a privilege the allocation of which must be firmly supervised. That, as we all know, although some Opposition Members would deny it, is our democratic duty.

4.31 pm

Mr. Keith Vaz (Leicester, East): I will not comment on the speech of the hon. Member for Northampton, North (Mr. Marlow). I was told before I came to the House that it had a number of ranters and ravers and we have just met the ultimate ranter and raver. He is a silly man and his speech, dangerous though it was, should be consigned to the dustbin of history.

Let me deal now with the rules and the Immigration Act 1988 which will take effect on 1 August. Yet again, the Government have come before the House with a proposal that is pernicious and attacks Britain's black and Asian community. Yet again, they have come before the House with a proposal that will divide families and split communities, and put the black community at odds with the police.

I served on the Standing Committee which considered the Immigration Bill for 62 hours along with other colleagues. All our reasonable and moderate amendments were rejected by the Minister. The completion of all the stages of that Bill was marked yesterday with a fiasco of a party held on the 7th floor of the Home Office—a party, incidentally, that cost only £20. One wonders whether one should go to such a party. However, the passing of the Act and the rules were not celebrated with a party in my constituency among the many people who come to my surgeries and those of my hon. and learned Friend the Member for Leicester, West (Mr. Janner) and others.

Mr. Hanley *rose*——

Mr. Vaz: I shall not give way.

No party took place in the queues abroad in places such as Karachi and Islamabad where people have been waiting for many months, and possibly years, for an interview. The rules and the Act are undemocratic and unjust. They break promises made by successive Governments, Labour and Conservative, since 1971, and they introduce fees that have never existed before for certain cases.

I want to draw the attention of the House to one particular change in the rules. Rule 169 initiates something called supervised departure. It gives wide, undefined powers to the Secretary of State. Certain circumstances are referred to, but it is not clear what they are. There is no time limit on the period before a person is removed from Britain. Those who are to be deported are in a better position than those who undergo supervised departure. Under immigration rules 170 and 171 a person who is liable to deportation has a right of appeal. That does not apply to someone who has to undergo supervised departure.

The rules and the Act must be seen in the context of the Government's legislation over the past few years, including pernicious legislation such as the introduction of visas. An absurd situation has been created whereby constituents of mine who have applied for a visa to come to Britain to visit relatives or to attend a wedding have been refused admission and have then become locked into an appeal procedure that takes several months, possibly

years, to complete. That means that by the time the appeal has been completed, even though it is successful, any wedding that was to have been attended will already have taken place.

The rules and the Act must be looked at in the context of the proposals published last week by the Home Office on the registration of the rights of Members of Parliament to intervene in immigration cases. We must look at them in the context of the new fees that were introduced on 1 June this year. The previous charge was £50 per family; it is now £60 per applicant.

There is clearly a need for legislation. There is clearly a need for Government action on immigration policy. I urge the Minister to start by looking at the length of queues in many of the sub-continent posts. For example, in New Delhi a woman waiting for her fiance has to wait eight months for an interview. In Bombay, it is nine months, in Dacca seven months, in Karachi 11 months, and in Islamabad 19 months.

We also have the figures for other posts abroad. I understand from figures that have been published by the Foreign Office that an applicant in Athens has to wait less than a week, in Copenhagen less than three weeks, and in Paris less than a week.

Ms. Short: We should also put on record the fact that a new hidden queue is growing in Britain of families who have been interviewed abroad, who have already waited a year, or perhaps two if it is a second application, and then are kept waiting for more than a year for their sponsor to be interviewed here. The Government will not admit to that. They will not give the figures in reply to parliamentary questions. That is a hidden, secret queue which is making the waiting process longer and longer.

Mr. Vaz: My hon. Friend has much experience in these matters and that leads me on to my next point—the crisis that exists at Lunar house.

On 16 November when the Home Secretary introduced the Immigration Bill he talked about providing a better customer service. Throughout the Immigration Bill Standing Committee the Minister talked about customer service and good value for money as if he were a junior manager with Marks and Spencer. The report of that good customer service was made public on 18 April this year when the Select Committee on Home Affairs described the operation of Lunar house as a scandal. It said:

> "We consider that the Home Office's failure to open and acknowledge promptly the 207,000 letters lying unopened or unacknowledged on 21 February 1988 to be scandalous and the overall aim of dealing with all applications for registration by December 1989 to be totally unacceptable."

Sir Brian Cubbon, a permanent under secretary of state at the Home Office, described to that Committee the mistakes made by the Home Office. Since this is the first opportunity that the Minister has had to speak on that report,. I hope that he will apologise to the House for what has occurred.

If the Minister listens carefully he will hear the weeping of those in my constituency and elsewhere who have been waiting for friends and relatives to visit them. Mr. Dulkon, who lives at 93 Doncaster road, has been told that his family cannot visit him because there is no guarantee that they will go back—no matter that they have provided affidavits and other information. He will hear the weeping and the tears of people such as Mrs. Jogia of 148 Brandon street who has been waiting for nine years to be reunited with her husband. He will hear the weeping and tears of children, husbands and wives who will be unable to enter the country.

The Government's immigration policy, as reflected in these rules and the Immigration Act 1988, is uncaring, uncompassionate and uncommitted to the family. They thrive on the misery, hardship and anxiety of black and Asian people. Even at this late stage, I urge the Minister to withdraw the rules. I warn him that if he does not he will never be forgiven.

4.40 pm

Mr. Nicholas Budgen (Wolverhampton, South-West) : There used to be some sort of reluctant agreement between the two great parties about the need to have something in the nature of the primary purpose rule. The right hon. Member for Birmingham, Sparkbrook (Mr. Hattersley) has now moved away from that. He said that wherever there is a marriage it should give rise to the right to come into Britain. When he first put forward that argument he realised, for he is a wise and well-informed man, that that could give rise to a substantial increase in immigration. He covered himself by saying in a vague way that there would be some form of quota. He knew that it would be unpopular with his constituents if it were known that he was advocating a major increase in immigration.

There is no doubt that the primary purpose rule creates sadness and hardship at the margin. Any immigration control is bound to do that. Anything other than completely open ports, allowing the citizen of another country to join a fellow citizen, is bound to create some form of sadness. It is easy to say, pointing to one person or another, that that is harsh and that therefore the whole rule should be swept away. The House should realise that if Britain were to adopt the generosity being suggested by the right hon. Member for Sparkbrook, it would lead to a major increase in immigration. It would lead not only to an increase in primary immigration but would give rise to secondary immigration.

People coming into this country by reason of marriage would also have the consequential right to bring in their dependants. That is well understood. The right hon. Gentleman understands it because he covered himself by talking vaguely about quotas. Most of all, it would give rise to a major increase in immigration because of the system of arranged marriages. I am not arguing against arranged marriages. As one gets older and looks at the breakdown of so-called love marriages, one wonders whether there might not be a great deal to be said for arranged marriages. However, arranged marriages give rise to massive increases in immigration to Britain. As the right hon. Member for Sparkbrook knows, it would create a great deal of resentment, which would rub off on to the black and Asian community which is already lawfully in Britain. It cannot be in anybody's interests.

Mr. Christopher Gill (Ludlow): Will my hon. Friend accept that there are many people living in my constituency, who previously lived in my hon. Friend's constituency, who already resent the fact that they are almost exiles in their own country because of the way in which the character of our towns and cities has been altered by successive Governments' policies on immigration over the past 40 years?

Mr. Deputy Speaker (Mr. Harold Walker): Order. I remind the House that we are discussing the proposed changes in immigration rules and not immigration generally.

Mr. Budgen: My hon. Friend used to live in my constituency and I have no doubt that——

Ms. Short: He is talking about himself.

Mr. Budgen: Perhaps he is, but he is well aware of the views of many people in the black country.

A major increase in immigration would create tension. That is the limited point I am making and the right hon. Member for Sparkbrook——

Ms. Short: Does the hon. Gentleman agree that if we allow international travel, and we have the European free market and people travel around the world and meet each other, there will be more marriages across national boundaries? If the hon. Gentleman's argument is to hold up, that too will create a problem.

Mr. Deputy Speaker: Order. I remind the hon. Lady that we are discussing specific changes in immigration rules.

Ms. Short: We are talking about provisions for the control of marriage and immigration under the rules. The argument of the hon. Member for Wolverhampton, South-West (Mr. Budgen) is that if we do not control marriages from the Indian sub-continent there will be unending immigration. In order to get married, one has to have a partner here willing to marry someone from abroad. That practice is changing and young people who grow up here are looking increasingly for partners who also grew up here. Therefore, the hon. Gentleman's argument is deeply flawed. There is not an infinite potential. There are two partners to every marriage.

Mr. Budgen: The hon. Lady is talking about the contraction of what is fashionably called a love marriage. I am confining my remarks to the arranged marriage and arguing that, whatever its advantages—they may be substantial—it could give rise to a considerable increase in immigration.

I want to take up another point raised by the hon. Lady. The arranged marriage creates considerable tensions within Asian households in Britain. Many hon. Members have some experience of the Asian community in Britain and I am one of them. For the past 14 years I have spent half the time that I spend on constituency cases dealing with what are described as immigration problems. One of the most frequent features of those problems is the father who says, "I would like to arrange for young Mr. Somebody from Jallunder to come to this country. Will you please do that because I have arranged a marriage between that gentleman and my daughter?" The next week along comes the daughter and says, "I know that my Dad came to see you last week. Please do not allow that gentleman to come to Britain because"——

Mr. Vaz *rose*——

Mr. Budgen: I will give way when I have finished the sentence.

That daughter then goes on to say that she has been brought up in this country and that for better or worse she believes in the concept——

Mr. Deputy Speaker: Order. Will the hon. Gentleman help me by informing me to which of the proposed changes in the rules his speech relates?

Mr. Budgen: The primary purpose rule. I am trying to debate the point properly put forward by the right hon. Member for Sparkbrook. Second generation Asians do not wish to see unrestricted entry to Britain by reason of arranged marriages. The right hon. Member for Sparkbrook believes that he is currying favour by suggesting a relaxation of this rule, but he may find that it is unpopular with a large section of the young Asian community.

I accept that any rule is bound to be seen at the margin as restrictive, unkind and even unfair. I suggest to the right hon. Member for Sparkbrook and the House that, unless we have something approaching the primary purpose rule, we shall see a re-emergence not only of great tension within Asian households but of fears within the indigenous population. Sadly, the primary purpose rule is an essential tool of the control of immigration to Britain.

4.49 pm

Mr. Alex Carlile (Montgomery): The immigration rules are supposedly a system of rules which enables cases to be examined on their merits. As time has gone by, a number of amendments have been made, as we can see in the preface to the statement of changes, which have meant that cases are considered much less on their merits than was originally intended and much more on the basis of political prejudice.

The extravagant exaggeration by the Minister on the radio this morning has done little to enable the public to consider the problems of immigrant families upon their merits and, indeed, has done a good deal to worsen the perception of the problems faced by families who wish to bring spouses and others into this country.

The Minister starts from the premise that there is an enormous desire for mass immigration to the United Kingdom, but there is no real evidence of a desire to enter the United Kingdom in huge numbers, except, possibly, the potential desire in the future of white people from South Africa to enter this country in large numbers. I shall be interested to see, if and when that happens, what will be the reaction of the Government, if they are in office then.

The Government claim to be the party of the family, at least from time to time, but, as described earlier by the right hon. Member for Birmingham, Sparkbrook (Mr. Hattersley), this measure, although modest, does no credit to the Government's attitude towards the family. Their attitude towards the family, in relation to immigration and particularly the primary purpose rule—we are here concerned with paragraph 1B of the statement of changes—is shown by the operation of the new DNA screening system. Of course, I welcome the Government's acceptance of the DNA screening system. I hope that they will not try to take over the system, but will leave its operation in the hands of the company which has skilfully developed it and which can offer the tests at the reasonable cost of about £115.

However, what I find incomprehensible about the Government's attitude to the DNA screening system is that they are not prepared to save money by paying for the tests. If one takes, on the one hand, the cost of the traditional, bureaucratic method of dealing with applications and, on the other hand, the one-off cost of £115 of

producing a sure result from DNA screening, it is quite clear, even at a glance, let alone with close examination, that the DNA screening system is much cheaper. The Minister should therefore go back, look at the system once again and come to the conclusion that, where people have eventually penetrated the long queues mentioned earlier and are able to undergo DNA tests, the Government should economise by paying for those tests.

Ms. Short: The hon. and learned Gentleman will know that it is possible to obtain legal aid to pay for the DNA test when someone has waited a long time, been through the complex and costly bureaucratic system that currently exists and has been refused by officials. Many hon. Members have come across cases that have then succeeded, which is an even more wasteful procedure. Public funds are going into DNA screening, but there are now double spending levels, which could be done away with if we administered the test immediately someone applied for it. That would save time and money for everyone concerned.

Mr. Carlile: The spending of which the hon. Lady spoke is probably at a quadruple or quintuple level because people have had to go to the extent of obtaining legal advice. The Government should adopt the system, not halfheartedly, but wholeheartedly.

I wish to make two other points about the statement of changes. The first relates to new paragraph 90 and new paragraph 150A. Those two new paragraphs specifically exclude rights of appeal. New paragraph 150A excludes as clearly as possible any appeal on the merits. If the Minister were listening, I would be asking him why, particularly in new paragraph 150A, the Government have decided specifically to exclude a right of appeal on the merits. The rules will lose their respect, not just among the legal community, but throughout the world, if they are seen to be the fist of Government rather than a system that ensures fair play.

The second matter that I wish to raise relates to new rule 56 in paragraph 5 of the statement of changes. Is the Minister satisfied that that rule will not prove unfair to legitimate political refugees in the United Kingdom? Those refugees will include people who may well have restructured their lives, for example, journalists from South Africa who have come to this country because they could no longer live with the political system there, but who in restructuring their lives and settling here have only been able to obtain employment abroad. Those people may well be disadvantaged because it may be difficult for them to return to this country for any length of time within a period of two years.

There is no evidence of the need for the changes and no justification for them. The Minister could have made far more constructive changes by, for example, paying for DNA screening for applicants. The statement of changes is merely the annual pandering to political prejudices in parts of his own party.

4.56 pm

Sir Dudley Smith (Warwick and Leamington): I shall be reasonably brief, but I should perhaps declare an interest because I represent about 7,000 members of the Sikh community in my area and have done so for quite a number of years. As the years go by, one becomes accustomed to dealing with their problems, and there have been many problems. We cannot just listen to Opposition Members. It needs saying that the race relations system in this country is much better than it was and, certainly in my area, harmonisation has extended very much to the Sikh community, the vast majority of whom are now well integrated. Although there are always exceptions, many people are well satisfied with their situation.

I wish to make two important points in view of the comments of other hon. Members. My hon. Friend the Member for Wolverhampton, South-West (Mr Budgen), in his excellent and accurate speech, spoke about the people who wish to enter this country. From the beginning of next month, people who want to bring a family or come here for marriage purposes will have to show that they have support and accommodation and that the marriage was not entered into primarily to evade the immigration procedures. As my hon. Friend rightly said, we have all encountered cases in which the girl has come along and said, "I don't want to be married under the arranged marriage system." I wish to take the matter a little further. I am sure that my hon. Friend and other hon. Members have encountered cases in which the people who originally said to us, "Will you arrange for that man to come in to marry my daughter?" have come back and said, "Will you get rid of that man because he married my daughter and came here primarily"——

Mr. Vaz: Will the hon. Gentleman give way?

Sir Dudley Smith: No, I shall not give way because Opposition Members have not given way to us. Hon. Members know that I normally give way, but this is a short debate.

Those people have come back and said that they have realised that the young men had come into this country primarily to evade the immigration rules, had paid scant regard to their daughters, gone off to another part of the country and totally abused the rules and regulations. I have had dozens of such cases, as I am sure have other hon. Members. That does no favour to the genuine cases, those people who want and are entitled to come here and wish to make a success of it. That needs to be understood by the House.

Secondly, those who overstay in future will not be able to plead compassionate reasons—*[Interruption.]* The hon. Member for Birmingham, Ladywood (Ms. Short) and others may not like what I am about to say, but it is the truth. They should ask some of my constituents——

Ms. Short: Will the hon. Gentleman give way?

Sir Dudley Smith: No, I shall not give way. I shall be even less ready to give way if the hon. Lady continues to shout at me.

There have been instances where important compassionate grounds have existed, but if we are honest and place our hands on our hearts, we know that many others have been bogus. Like many other hon. Members on both sides of the House, I have received applications that have been based on compassionate grounds. However, having examined the details and exercised my judgment, I have been sure that the grounds were bogus. It is right that new rules should be introduced in fairness to those who make genuine applications.

I am sure that my hon. Friend the Minister of State is aware, like many others, that, following the changes that were made to the rules a comparatively short time ago,

[Sir Dudley Smith]

almost 99 per cent. of those who visit the United Kingdom for a holiday or other special reasons are now returning without any problem. That is an excellent record. It is one to be valued and the minority populations are to be commended. It is welcomed by the Sikh leaders in my constituency. We know now that those who visit the United Kingdom will be honest and arrange to return to their own country at the proper time. The more that we can ensure that that happens, the better.

The references of the right hon. Member for Birmingham, Sparkbrook (Mr. Hattersley) to "shabby" and "squalid" when describing the statement of changes do nothing to improve race relations. Instead, he foments bad relations. It seems that he wants to do so. We must work for a better understanding with sensible and reasonable guidelines. The right hon. Gentleman, who holds the important position of shadow Home Secretary, should realise that Britain is a small island in global terms. We have a large population and over the past 30 or 40 years we have been extremely generous in terms of the number of people that we have allowed in from the Commonwealth, especially the new Commonwealth. I am glad to say that the vast majority have settled extremely satisfactorily. These immigrants have done a good job and they have integrated. I am not prepared to allow the right hon. Gentleman to pretend that the Government are doing everything that they can to work against the interests of these people. However, enough is enough. We have been promised over many years that, having accepted such a large number of immigrants, immigration would tail off. It is beginning to do so.

Mr. Janman: Will my hon. Friend give way?

Sir Dudley Smith: I shall not give way to my hon. Friend because I wish to be brief.

Immigration is beginning to tail off, and it should now begin fundamentally to come to an end. If it does, there will be far more hope that further efforts towards achieving the better integration of those who have come here will be successful and better appreciated by those who are here. I am talking of those who are reasonable and sensible, who do not try to politicise the situation. I welcome what my hon. Friend the Minister is trying to do. I think that he is on the right lines.

5.4 pm

Mr. Paul Boateng (Brent, South): The spectre raised by the hon. Member for Warwick and Leamington (Sir D. Smith) of all the grateful Sikhs doing obeisance to him because the Government have introduced the statement of changes is the most perverse and wild fantasy. It is nonsense to suggest that the Afro-Caribbean or Asian communities, or any people of good will, would welcome a measure of this nature. It is a sordid and squalid measure. Above all, its great evil is that it is socially divisive. It is the consequence of that division—the rules will create rifts in our society and exacerbate existing rifts —that the House should be mindful of when considering the statement of changes.

The clearest example of that danger was provided for us by the speech of the hon. Member for Northampton, North (Mr. Marlow). The language that the hon. Gentleman used and the tone in which the speech was delivered demonstrated the great evils of measures of this sort. I have some sympathy—I see some of my hon. Friends recoiling in horror at my use of the word "sympathy"—for the Minister of State and the position in which he finds himself.

Mr. Greville Janner (Leicester, East): No.

Mr. Boateng: I knew that that would be the response. I have some sympathy with the Minister for having to introduce a measure of this nature. He is sitting on a volcano in his party. It is a volcano of pus that every now and again is bound to erupt on the Government Benches. When it does, the only way in which someone in his position can survive is to introduce a measure of this sort. Whether he introduces it or not, the pus is still there and it creeps through. That pus was represented by the speech of the hon. Member for Northampton, North. How dare he describe black people in this country—Afro-Caribbean or Asian people—as invaders. Afro-Caribbeans and Asians are here specifically at the Government's invitation. They were invited to come here after the war to do the dirty work which many people in this country were not prepared to do. That is why Afro-Caribbean and Asian people are in this country. Having come here, done that work and made a valuable contribution, they are required to respond to rules and regulations that are socially divisive and damaging.

Mr. Janman: Is the hon. Gentleman not aware that the invaders to whom my hon. Friend the Member for Northampton, North (Mr. Marlow) refers—he correctly referred to an invasion—are indeed invaders because the British people have never given any British Government a mandate to allow the invasion to happen?

Mr. Boateng: That is an argument that the hon. Gentleman should put to the predecessor of the hon. Member for Wolverhampton, South-West (Mr. Budgen). It was Enoch Powell who issued an invitation to women like my mother-in-law from Barbados, and others from elsewhere from the Commonwealth, to work in Britain in the National Health Service. It is an argument that the hon. Gentleman should address to his right hon. and hon. Friends instead of throwing it in the face of Opposition Members.

We then heard talk about people being made aliens in their own land. I have news for the House. The Afro-Caribbean and Asian people who will be affected by the rules and regulations say, "This is our land. We intend to stay here come what may." The Government can put all the rules and regulations on the statute book that they want. They can introduce measures of greater and greater oppression. I believe that the majority of people in this Britain, in this country of ours, black or white, are opposed to measures of the sort that we are now discussing. They know what the social consequences will be. The Minister of State must be aware of the consequences.

Mr. Sydney Bidwell (Ealing, Southall): In the mid-1950s, when there was full employment, there was active recruitment of labour from the Indian sub-continent. Many doctors came here to work in the National Health Service. Indeed, Governments had to put a bar on their coming here. There was active recruitment of medical staff in the Caribbean. A most active member of the Government during that period——

Mr. Deputy Speaker (Mr. Harold Walker): Order. Let us return to the changes to the rules.

Mr. Boateng: My hon. Friend has considerable experience of these matters and his analysis is right.

When we examine the rules against the backcloth of the history to which my hon. Friend has referred, we find measures that, by any rational analysis, are completely unsupportable. It cannot be right to deny people the right of appeal. It cannot be right to require people to go through the sort of hoops that the primary purpose rule imposes on them. It cannot be right to construct an edifice that causes delay, obstruction and administrative chaos, to which the rules and regulations before us will add. The rules and regulations are unfair and they will prove to be unworkable. It does our country and the House no credit that they are being discussed in this way.

We must reflect on the impact that the rules and regulations will have on the reputation and on the perception of our country as being a place where equity counts for something, where it is considered right to be just and to give people access to the courts and review of decisions that affect people's future, their liberty and their quality of life.

What is so sad and sickening about these measures is that, even when the Government recognise the need to make changes, and acknowledge, as they did yesterday in relation to DNA tests, the benefits that changes can bring, still there is a nasty piece of meanness lurking in the background. It is that meanness in terms of who is to pay, and in terms of where the burden will be felt, that suggests to me that the House should rise up and express a degree of protest.

Mr. Janner: Is my hon. Friend aware that there is another kind of meanness, which is vicious, and not far removed from the proposed changes to the rules? It is that people who have been excluded in the past but who would have been admitted had the DNA rules applied and who were wrongly kept out and not allowed to join their parents because the Government had got it wrong will not now be permitted to enter the country, even though the DNA rules have been accepted? That is partly due to the changes that the Government propose making.

Mr. Boateng: If that is so, that will be of grave concern to hon. Members on both sides of the House who are concerned about fairness. It is for the Minister to answer specifically my hon. and learned Friend the Member for Leicester, West (Mr. Janner), who has raised an alarming possibility. I am grateful to him for pointing out that danger.

In addition to the burdens imposed by the new rules and regulations, there will be another imposition in the form of the requirement that people should pay for the oppressive rules to which they are subject. Not only has the application fee been increased from £50 to £60 but each and every member of a family will have to pay that amount. It does not take much of a sympathetic imagination to anticipate the impact of that financial imposition on a family on the sub-continent. They will already have scrimped and saved to accrue £50, and then £60, and now find that for a normal family application they will have to pay £300. It does not take much of an imagination to grasp what that will mean. How can it be justified? Will the Minister justify to the House that degree of meanness? If so, we await his justification, but we have not heard it so far.

What is left behind is the suspicion that these measures are not about revenue or meeting genuine administrative costs, but about ensuring that there is yet another obstacle in the way of families wishing to come together. That, from a party claiming to be the party of the family. We ask the question: what family? Is it only white families that the Government care about? Do they not care about Asian and Afro-Caribbean families? Do they not care about people who just happen to have a different colour skin?

Those are profound moral questions. We have listened to the debate and have not found any answers. It must be appreciated that there are many millions of people outside this Chamber, in the wider world and in this country, who care that we should make the right decision. In this instance, the right decision is to throw out these rules and regulations. They are not worthy of the House, and they are not worthy of our country.

5.13 pm

Mr. Nicholas Baker (Dorset, North): The reason why I welcome these rules is that they are part of the containment of mass immigration that I see as threatening our society. The hon. Member for Brent, South (Mr. Boateng) said very forcibly—because he obviously strongly believes this—that this country does belong to members of the Afro-Caribbean community who have come here to live permanently. Of course he is right. It is because he is right that I also believe it is necessary to maintain strong control over immigration at the borders. If the hon. Member for Brent, South does not share that belief, I find it difficult to understand how he can have had any experience of inner cities. I view these rules as a continuation of the process of containment.

Because of the way in which we have mishandled immigration policies in the past, the damage done by mass immigration still poses a threat to the cohesion of our society. We face a number of social and racial problems. Earlier in the debate it was said that some immigrant communities are regarded as problematical. That is rubbish. It is sometimes in the host communities that problems are created. It does not matter in which section of the community the problems lie; they result from major changes to our country's racial content and from mass immigration.

Another reason for containing mass immigration relates to the population. The first experience of my hon. Friend the Member for Warwick and Leamington (Sir D. Smith) in inner cities was in Peckham, as was mine. He referred briefly to the over-populated nature of this country. If Opposition Members cannot see that many of the problems our country has today derive from heavily concentrated populations and sheer numbers of people —of whatever kind or race—they are blind to reality.

The burden of the problems we are now debating has fallen overwhelmingly on those living in inner cities. The fact that those problems are concentrated among a particular group of people ought to make us more concerned to limit massive immigration rather than pretend that it is not a threat.

Mr. Janman: My hon. Friend spoke about containment, but we appear to be closing the stable door after the horse has bolted. Is he aware that one in three children

[Mr. Janman]

born in Greater London is of ethnic extraction? The national ethnic research group estimates that the country's ethnic population now totals 4·2 million, which is nearly 8 per cent. of the population and twice the Home Office figure.

Mr. Baker: My hon. Friend makes his point extremely well. In the past, we have allowed totally unplanned mass immigration, which has produced problems that have not been properly assessed. As a society, we have also failed to provide for the reception and care of immigrants who have come into our communities, and the problems have been exacerbated as a result.

I welcome the proposed changes. It is important to close the loophole. I support the ending of discrimination between male and female spouses. Unless I misheard him, I understood the right hon. Member for Birmingham, Sparkbrook (Mr. Hattersley) to attack that provision dealing with polygamous marriages. I was interested to hear one raunchy—if one may so describe him in acceptable parliamentary language—African bishop suggesting this week to the Church of England's General Synod that it ought to support and allow polygamy within the Church of England. However, I do not believe that that is acceptable to the Church of England or to British society. I support the rules as a necessary continuation of the containment of mass immigration.

5.18 pm

Mr. Pat Wall (Bradford, North): I begin by congratulating the Minister of State. Any Minister who has managed to survive the absolute chaos at Lunar house in relation to British nationality applications, and the equal chaos surrounding the Passport Office, must have done very well to survive also the Prime Minister's midsummer roundabout. The Minister must have some special talents that he has still to exhibit.

Unlike Conservative Members, I shall deal specifically with the rules. I refer, as did my hon. and learned Friend the Member for Leicester, West (Mr. Janner), to one rule in particular, and ask the Minister for an explanation. I refer to paragraphs 9 and 11 of HC 555, dealing with deportation. One of the matters that struck my hon. Friends during the Second Reading and Committee stage of the Bill was the whittling away of people's deportation rights. This rule is being introduced against the background of the threatened deportation of Tamils, including Virag Mendis, back to a country where there is absolute chaos, widespread killing, destruction, torture, kidnapping and disappearances.

The rule suggests that in certain circumstances—and I ask the Minister to define them—people can be given a supervised departure. I think that we are entitled to know what that means. After they have been "departed" it seems that those people can be excluded from re-entry, although they may wish to return as students, business people or members of any other legitimate category, for an unspecified period. Perhaps it is my suspicious nature, but I have a feeling that the rule is aimed at political people. It is intended to ensure that those who may have political beliefs that are embarrassing to the Government are excluded. I should like a full explanation of this mumbo-jumbo, because I do not think that many people know what these terms mean or in what cases they will apply.

My right hon. Friend the Member for Birmingham, Sparkbrook (Mr. Hattersley) was absolutely right to deal with the primary purpose issue. Conservative Members like to talk about numbers: they like to quantify. Some are particulary happy when they can talk in terms of hordes. The principle of the primary purpose rule, irrespective of the numbers involved, is entirely unfair, unreasonable, impractical and arbitrary. Under this rule, someone who can prove that he or she does not want to come to Britain in any circumstances and has just been married will be allowed in. That is nonsensical and entirely subjective.

Along, no doubt, with far more experienced hon. Members, I advise constituents after examining their cases that they have little chance, and they then sail through. Similarly, when I tell them that I can see no objection, they are rejected. Even someone with the most genuine marriage who will have no problems relating to accommodation or other needs is threatened by the rule. As there is already a rule that the marriage must show itself to be genuine, there is absolutely no reason for the primary purpose rule. The Minister should have altered it, or withdrawn it entirely.

Like many hon. Members, I am very suspicious of a system that makes people wait for one, two or three years on the Indian sub-continent—after which their case is referred back here—then wait another year or 18 months for an appointment and a further eight months for the result of the interview. The system has deliberately been made cruel and difficult. Young people in their 20s, men and women, come to our surgeries and say, "I am married to someone whom I have known for years, and the marriage is one of genuine affection." When we know the decent, nice families involved and witness their worry and heartbreak we realise what such delays mean in human terms.

I wanted to ignore some of the bigots on the Conservative Benches, but I must take up one remark. It was asked, "Why do they not go back if we will not let their husbands in?". What would that hon. Member think if he were a Bradford girl of 20 or 22 who had lived here since she was two or three—[HON. MEMBERS: "Born here."]—who has lived only in Britain and knows only the British way of life, and who has a child who goes to a British school and knows only British education? How can Conservative Members suggest that she should go back to a village in Bangladesh, sit on the floor and collect fuel and water every day? What arrogant, cruel, rotten nonsense that is.

5.24 pm

The Minister of State, Home Office (Mr. Tim Renton): I thank my hon. Friends for their support for the rule changes during the past hour and a half. Let me say at once what a contrast their remarks have provided, even in such a short debate, to the barren speeches of Opposition Members, full of hatred and lacking in any positive suggestions.

Mr. Jeremy Corbyn (Islington, North): Will the Minister give way?

Mr. Renton: No. I have only a few minutes.

Even by his standards, the hon. Member for Leicester, East (Mr. Vaz) was stupendously silly about the small

party given last night by my right hon. Friend the Home Secretary. He and his fellow party poopers—the hon. Members for Bradford, West (Mr. Madden), for Bradford, North (Mr. Wall) and for Hackney, North and Stoke Newington (Ms. Abbott), I understand—instead of attending the small party, paraded outside the Home Office and formed a picket. Doubtless the picket carried placards saying, "Reshuffle Renton".

It caused great surprise to civil servants attending the party to have microphones thrust into their faces and to be asked their views. It is a normal courtesy for a senior Minister on such an occasion to give a small party to thank the civil servants for the work that they have done. No doubt the cost of answering the question posed by the hon. Member for Bradford, West about the party was a good deal more than the cost of the party.

As it has been difficult sometimes to remember what we are debating this afternoon, the subject is the rule changes that followed from the Immigration Act 1988, which we debated at length in Committee earlier in the Session. The rule changes effectively implement the Act and accompany the separate order made by my right hon. Friend the Home Secretary, which brings sections 1 to 5 of the Act into force. Taking those parts of the Act that came into force, automatically on 10 July and those now being brought into force the result is that from 1 August the whole Act will have been implemented, with the exception of section 7(1) and paragraph 1 of the schedule.

The implementation of section 7(1), which concerns European Community nationals exercising their rights under the treaty of Rome, will take place as soon as we are able to bring forward an Order in Council under the European Communities Act 1972 to replace the relevant parts of the immigration rules. The preparation of the order is a complex matter. It will take some months yet. Rather than implementing the rest of the Act, we decided to bring most of it into force now and to change the rules at this stage. We shall complete the process when the Order in Council is ready. Our aim is, if at all possible, to take the opportunity of the further changes to the immigration rules, which will then be necessary, to consolidate the rules into one document. A strong wish was expressed for that in Committee, and I think that it will be welcomed by all.

With only one exception, the statement of changes contains nothing that is not entirely consequential on the provisions of the Immigration Act 1988. That exception relates to the definition of public funds contained in the rules. It is necessary to update the definition to take account of the changes to the social security system brought about by the implementation of the Social Security Act 1986. The revised definition involves changes in nomenclature only; no changes of substance are involved.

Mr. Vaz: Will the Minister give way?

Mr. Renton: No, I will not give way to the hon. Gentleman.

The question of primary purpose occupied a great part of the remarks of the right hon. Member for Birmingham, Sparkbrook (Mr. Hattersley). My hon. Friend the Member for Wolverhampton, South-West (Mr. Budgen) rightly pointed out that a large increase in immigration numbers was likely should we have no clause to make certain that marriage was not used simply as a means of obtaining settlement in this country when it would not otherwise be available. I remind the right hon. Member for Sparkbrook that it was the Labour Government who in 1977 produced the first test of this sort to control marriages of convenience. It was never said in 1971 that section 1(5) would remain in force in perpetuity. The intention was to offer reassurance to those men of working age who were already here at that time that they could bring their existing wives and children to join them here, but it has proved to have much wider effects than that, which are both discriminatory and damaging to effective immigration control.

Those who assumed at the time that the 1971 Act was passed that they would be protected by section 1(5) have now had over 15 years in which to bring their families here. After such a period, it is surely wholly reasonable to draw the line and to say that from now on everybody who wishes to bring a spouse or a child to settle here should be on the same footing.

Mr. Hattersley: Will the Minister make a definitive statement on the primary purpose rule? Is it the intention to distinguish between genuine and bogus marriages, or is it the intention to limit the numbers coming to this country?

Mr. Renton: I shall return shortly to the right hon. Gentleman's demand for a quota. We shall have to explore it because it is the only new Labour party policy on immigration that we have heard of for many months.

Ms. Short: Will the Minister give way?

Mr. Renton: No, I shall not give way. There is very little time left.

I should have thought that the Government's publication of the detailed report on DNA testing, in answer to a question from the hon. and learned Member for Leicester, West (Mr. Janner), would have been welcomed, but instead the right hon. Member for Sparkbrook cast doubt on it.

The hon. and learned Member for Montgomery (Mr. Carlile) asked about the cost. That is not an easy question to answer. We are talking not about £115, plus VAT, for one sample but about a cost of between £400 and £500 for a family. Our firm view is that that cost should not be borne by the taxpayer. We accept the principles that underlie the DNA test, but we shall have to work out with the Foreign and Commonwealth Office how the queues of applicants for the DNA tests are to be managed and how the cost is to be most fairly borne, bearing in mind that it is not to be borne by the taxpayer.

The hon. and learned Member for Montgomery also asked about paragraph 150A. That paragraph goes no further than section 5 of the Act, which was the subject of very full debate earlier this Session. The present appeals system has, in our view, been abused by many people who have sought to extend their stay here by arguing at their appeal against deportation factors that should not be allowed to outweigh the fact that they have overstayed or have broken the conditions of their stay. That is why we are making these amendments.

I agree with the hon. Members for Leicester, East and for Birmingham, Ladywood (Ms. Short) that the past year has put great pressure on the immigration and nationality department. We have simplified the rules. About 20 per cent. of the cases handled by the immigration and

[Mr. Renton]

nationality department will be dealt with automatically. We have introduced the new Immigration Act and today we are introducing further immigration rule changes.

I take this opportunity to thank the staff at Lunar house for all that they have done to help in this difficult year, but at every stage the Opposition have taken the opportunity to vote against what we are doing. It is only fair to ask about their motives.

What is the motive of the right hon. Member for Sparkbrook? In his remarks this afternoon and in the speech that he made in Manchester last night he returned to accusations of racism. Is it because he feels that it is necessary to prove his credentials in the election campaign that is taking place inside the Labour party? Does he wish to prove his credentials as someone who is willing to shout "Racist" from the rooftops against every attempt by this Government to improve the fair but firm operation of the immigration controls? *[Interruption.]* The right hon. Member for Sparkbrook giggles, but if that is his motive I regard it as pitiful.

In the *New Statesman* of 15 July the black section of the Labour party——

Mr. Deputy Speaker: Order. I do not think that the black section of the Labour party has anything to do with the changes to the immigration laws.

Mr. Renton: With respect, Mr. Deputy Speaker, the quotation is relevant. Perhaps you will allow me to refer to it. The black section accuses the right hon. Member for Sparkbrook in particular of being its worst enemy and the beneficiary of godfather politics. Is it for that reason that we have seen this sudden increase in the extreme remarks of the right hon. Member for Sparkbrook? Our motives in introducing the legislative changes of recent months have been entirely honourable. *[Interruption.]* If the right hon. Gentleman is making a rude gesture to me, I have to inform him that that is not appropriate behaviour in this House.

Mr. Hattersley *rose*——

Mr. Renton: Our motives are that we should have a quicker system that is conscious of everybody's rights, that will be able to interview fiancées and spouses more quickly in this country and that will help us to act more speedily to decide the claims of applicants for refugee status and ensure that those who have a genuine and well-founded fear of persecution in their own country are provided with a safe haven here without having to wait agonising years for a decision. Those are the reasons behind the changes that we have introduced.

The Labour party's motives are suspect. It tries to face two ways at once on this issue. For that reason it ends up by voting even against the simplest measures to improve the operation of the immigration controls in this country. Our motives, on the other hand, are straightforward and honourable. It is to make the immigration rules operate fairly and more effectively and speedily that I recommend the rules changes to the House.

5.37 pm

Mr. Hattersley: You will recall, Mr. Deputy Speaker, that the Minister of State promised to say something about the figures. He has intentionally failed to do so. That leads me to the conclusion that all reasonable people will hold that his only concern is to limit the number of black and Asian people coming to this country. It is a deplorable policy and we shall vote against it.

Question put:—

The House divided: Ayes 205, Noes 259.

Police and Criminal Evidence Act 1984

5.52 pm

The Parliamentary Under-Secretary of State for the Home Department (Mr. Douglas Hogg): I beg to move,

That the Police and Criminal Evidence Act 1984 (Codes of Practice) Order 1988, a copy of which was laid before this House on 13th July 1988, be approved.

This is a short debate and I should like to focus on five issues and then try, at the end of the debate, to deal with points made by hon. Members.

I wish first to emphasise the distinction between the codes of practice order which we are debating now and orders that will be laid subsequently under section 60(1)*(b)*of the Police and Criminal Evidence Act 1984. The code that we are debating is laid under section 67(5) of that Act and it is the code referred to in section 60(1)*(a)*. The code regulates the manner in which the taping of interviews takes place. The code does not of itself make the taping of interviews mandatory. The taping of interviews is made mandatory by orders made under section 60(1)*(b)*, none of which has yet been made.

Secondly, I should like to describe the Government's approach to taping. The Government have decided that the entire interview should be taped, but in the great majority of cases the courts will have before them a written summary of interviews. There will be a master tape. There will also be a second tape—the working tape—which will be the source of all copy tapes and any transcripts that may be ordered. In appropriate cases, which I anticipate will be fairly rare, transcripts will be available. This approach has been tested for two years in six trial areas, and the process was overseen by the national steering committee. The conclusions of the trial have been reported and show that our approach is practicable and beneficial.

Thirdly, I should like to consider the introduction of taping under orders that will be made under section 60(1)*(b)* of the Police and Criminal Evidence Act 1984. We intend to phase taping in over five years. We hope and intend that it should be standard practice by the end of 1991. By the end of this year, we expect taping to be prevalent throughout 10 force areas and to be used in all force areas. We anticipate that we shall lay commencement orders, if I may so describe them, in the coming Session.

Fourthly, I should like briefly to mention the effect of breaches of the code. There are two significant effects which the House would like to bear in mind. Non-compliance with the code constitutes a disciplinary offence. That is provided for in section 67(8) of PACE. In appropriate cases, non-compliance with the code could lead to the exclusion of all or part of the interview evidence. It depends on the exercise by the judge of his discretion.

Fifthly, I should like to consider terrorism and cases brought under section 1 of the Official Secrets Act 1911, which are those that concern espionage. Hon. Members will have noted that those categories of offence are exempted from the code. We do not intend, at least for the moment, that they should be subject to the taping requirements. There are two reasons which need to be mentioned. First, they were not the subject of any trials. That is not the substantive objection, however, which is that we fear that if the full tape was made and its contents became available to terrorist organisations it would

compromise national security. We also fear that if an interviewee saw that the entire interview was being taped, that interviewee would be reluctant to proceed with the giving of information.

Mr. Gerald Bermingham (St. Helens, South): What the Minister has just said will create considerable alarm among many practising lawyers because the implication is that, if transcripts of interviews in terrorist investigations are not made available to the defence, there must be some secreting of information about interviews. Moreover, the purpose of taping is to have a true and accurate record of what is said in an interview. Why should a terrorist trial, which is a criminal trial in another form, be treated any differently?

Mr. Hogg: I refer the hon. Gentleman to the provisions of paragraph 3.2 on page 2 of the code. He will see that only some terrorist trials are excluded from the scope of the taping requirement. In very broad terms, IRA and Northern Ireland related cases are excluded from the scope of the taping requirement, as are cases involving international terrorism. However, United Kingdom oriented terrorism, other than cases with a Northern Ireland dimension, are subject to the taping requirement. That should make the position factually plain.

On the specific point raised by the hon. Member for St. Helens, South (Mr. Bermingham), we must make a judgment about what is in the national interest. In the course of any interview between a terrorist of the kind to which the code refers, and to whom I am directing my remarks, and the interviewing officer, the interview will be prolonged. It is quite probable that the interviewee will disclose many matters which we would not wish terrorist organisations to know—for example, his sources.

Let us assume that there is a full tape recording of the interview which contains much sensitive material, in particular about sources, possible leaks or possible plants within, for example, the IRA. Our fear is that that tape could become known to a terrorist organisation. Although the vast majority of lawyers are wholly honest, we cannot exclude the possibility that some may deliberately, or under duress, be induced to give information to terrorist organisations. We must guard against that. In essence, that is the justification for the restriction to which I have just referred.

Mr. Alex Carlile (Montgomery): Does the Minister agree that, in existing circumstances, if someone is interviewed for a terrorist offence, at the very least a contemporaneous record of the interview will be kept? The whole of that record will be disclosed to the defence lawyers unless there is misconduct on the part of police officers in concealing part of it or misconduct by the Crown Prosecution Service—which is most unlikely to happen. What distinction can be made between keeping a contemporaneous record and making a tape recording? Bearing in mind problems with regard to interviews in the Birmingham pub bombing case and other cases, does he agree that a tape recording is a much surer way of giving true evidence to the court?

Mr. Hogg: I asked myself that question. The answer is that the premise is not wholly sound. As the hon. and learned Gentleman will be aware, guidelines are issued by the Attorney-General which permit the editing of such information held in contemporaneous documents. That is more easily done than editing tapes.

The nature of contemporary records means that they are directed to things that are regarded as probative and relevant. Therefore, it is quite common for the contemporary written document not to be an inclusive record of the interview because those making the written record take the view that much of the "sensitive" material is not admissible, probative or relevant. Therefore, that material would not necessarily have to be included in the written account. If the defence counsel took a different view and wanted to bring before the court material not included in the written record, that would be possible through cross-examination. Although I often share the hon. and learned Gentleman's views, on this occasion I believe that he is mistaken.

Sir Eldon Griffiths (Bury St. Edunds): My question is diametrically opposed to the points raised by the hon. Member for St. Helens, South (Mr. Bermingham) and the hon. and learned Member for Montgomery (Mr. Carlile). My hon. Friend the Minister is right to want to safeguard national security by some method of exclusion. However, the worst method of exclusion would involve editing tape. I am glad therefore that my hon. Friend has set his face against editing tape. If that were to happen, it would compromise the whole taping integrity that we are seeking.

How on earth is the ordinary police officer conducting a taped interview to distinguish between terrorism which, although taking place within the United Kingdom, is connected with Northern Ireland and terrorism that involves the affairs of the United Kingdom but not Northern Ireland? That is an almost impossible distinction for an officer to make.

Mr. Hogg: I thank my hon. Friend for his support. I believe that trying to resolve the problem by editing tape is extremely undesirable.

We could approach the problem by taping a summary of the evidence which would be read over at the end of the interview. That summary would be taped. As the hon. and learned Member for Montgomery (Mr. Carlile) will recall, the Royal Commission on criminal evidence and procedure, which originally recommended taping interviews, recommended taping a summary, not the entire interview. The Government have gone beyond the Royal Commission's original recommendation. We intend to explore methods of resolving the kind of difficulties to which both the hon. Member for St. Helens, South (Mr. Bermingham) and the hon. and learned Member for Montgomery have drawn attention without resorting to taping the entire interview.

I want to deal with the difficult point raised by my hon. Friend the Member for Bury St. Edmunds (Sir E. Griffiths). The definitions are included in paragraph 3.2 on page 2 of the code. I notice that my hon. Friend the Member for Bury St. Edmunds is holding a copy of the code. That paragraph is clarified to some degree by the notes to that section and will be further clarified by training and the circular that we intend to issue to the police service.

My hon. Friend the Member for Bury St. Edmunds will bear in mind the fact that the procedure will apply at a fairly senior level because we are talking about a small number of very serious offences. I believe that senior

[Mr. Hogg]

officers will readily be able to make the distinction. I accept that the definition in paragraph 3.2 needs reading several times to master its meaning. However, once one has grasped the meaning, its practical application will not be difficult.

Sir Eldon Griffiths: I apologise for intervening again. By raising the matter now, I hope that I can shorten my contribution to the debate.

My hon. Friend the Minister will be aware that, as a matter of practice, when a police interview of this type is being conducted, information emerges, much of which may be unknown to the police officer at the commencement of the interview. While the officer is pursuing inquiries related to a suspected terrorist offence affecting a Northern Ireland matter, during the interrogation matters pertaining to other types of terrorist offences may emerge. For example, information may arise about the middle east. We all know about Libyan arms going to Northern Ireland. Alternatively, matters may arise affecting this country, for example, the potential assassination of a Minister or a member of the royal family. No police officer can make that judgment at the commencement of the interview. However, the definition requires him to make that kind of judgment. That is impracticable.

Mr. Hogg: Plainly the House will listen with great sympathy to any point made on this subject by my hon. Friend the Member for Bury St. Edmunds. He has a wide experience of these matters. However, I think that he is wrong. I do not deny that one could construct a case in such circumstances. My hon. Friend has a fertile and imaginative mind and I have no doubt that he could do so. In the majority of terrorist cases, one has a shrewd idea of the nature of the offence and whether it is related to Northern Ireland or Libya or whether it is a United Kingdom-directed act of terrorism that is unconnected with Libya or Northern Ireland. It is a mistake to suppose that police officers embark on an interview without having a pretty shrewd idea of the nature and motives of the terrorist organisation that they are investigating.

I recognise that there may be a difference of opinion on this issue, but I hope that the Government's approach is right in principle and practicable in its application. That is my belief, but clearly the House will wish to consider carefully what my hon. Friend has said.

Mr. Tim Rathbone (Lewes): Is it the Government's intention that people suspected of being involved in drug smuggling should be included in the category of international terrorism? No doubt there are strong links between those involved in drug smuggling and international terrorism. Many people—I would be one of them—would describe international drug smuggling as a form of terrorism because it cuts to the root of every community and some nations' ability to rule. If that did not occur to the Government when drawing up the rules, as my hon. Friend develops the application of the rules, will he consider whether they should embrace drug peddlers?

Mr. Hogg: I commend to my hon. Friend the text of paragraph 3.2 of the code of practice. A narrow meaning is there given to the word "terrorism". That narrow meaning derives from section 14(1) of the Prevention of Terrorism (Temporary Provisions) Act 1984. It is defined thus:

> "'Terrorism' means the use of violence for political ends, and includes any use of violence for the purpose of putting the public or any section of the public in fear."

The proper answer to the question asked by my hon. Friend the Member for Lewes (Mr. Rathbone) is that one must determine the primary purpose behind the offence. If it is drug smuggling, it is not a terrorist offence, even though by a process of seepage it may ultimately benefit a terrorist organisation. If the primary purpose and character of the offence being investigated is terrorism, the exclusion or inclusion applies. One must ask, "What is the purpose or character of the offence being investigated?"

I make a final point to my hon. Friend the Member for Lewes, and it is relevant to the question asked by my hon. Friend the Member for Bury St. Edmunds. The effect of a failure to comply with the code or rules is not fatal to the prosecution, nor should it result in the interviewing officer facing criminal proceedings. Either it could constitute a disciplinary offence, or it could trigger the exercise of a discretion by the trial judge to exclude all or part of the evidence. In the circumstances described by my hon. Friend the Member for Lewes, the discretion would not be exercised in favour of the defendant.

I have spoken for longer than I intended because a number of specific and technical questions have been asked. I hope that the House will forgive me for having spoken at such length. I intended briefly to introduce the code and to reply later to the specific questions asked by hon. Members.

6.14 pm

Mrs. Ann Taylor (Dewsbury): Labour Members welcome the introduction of the code of practice, which should lead to better protection for the suspect and the provision of an accurate record of events during police interrogation. I agree with the Minister that the entire investigation should be taped. I hope that he will agree that problems would arise if, for example, an interview of a terrorist were to be partially taped.

Although we agree with the general principle of the order, a number of questions need clarification and we have some concerns. Our first concern, which the Minister rightly foresaw, is about the exemptions in the proposals. Interviews of suspects held under the Prevention of Terrorism Act 1974 or section 1 of the Official Secrets Act 1911 will not be recorded. I did not find the Minister's remarks on that matter very reassuring, and the points made by the hon. Member for Bury St. Edmunds (Sir E. Griffiths) and the hon. Member for Lewes (Mr. Rathbone) about the difficulties of interpreting paragraph 3.2 of the guidelines were valid. It will be difficult to prejudge the intentions behind a crime in the way that the Minister suggested.

One point of hope arose from the Minister's remarks. He said that the guidelines will include those exemptions at least for the moment. That perhaps implies that the Government have an open mind on the issue, but I should have thought that if the Minister was seriously considering the matter he would make an announcement about possible field trials if that is why the exemptions are not being included at present.

Suspects questioned under the Prevention of Terrorism (Temporary Provisions) Act 1984 are held under

draconian powers. They give much scope for abuse, yet the Minister said that suspects will have fewer safeguards. Suspects held under the Act are held for longer than other suspects and can be denied access to legal advice for 48 instead of 36 hours under the Police and Criminal Evidence Act. If the arrest and detention powers are exceptional, Labour Members would argue that the safeguards should be more, not less, stringent.

If the Minister is concerned about the sensitive nature of information likely to be contained in the interview of a suspect held under the Prevention of Terrorism Act or section 1 of the Official Secrets Act 1911, surely measures could be taken to protect that information other than by denying a safeguard on a blanket basis. As hon. Members who are legal practitioners said—they are always keen to speak in these debates—tape recordings will merely be a more efficient method of note taking. Surely there is more need for true and accurate records when problems arise under the Prevention of Terrorism Act than when they arise in normal trials. The Minister should have acknowledged that if there is discussion about the validity of interrogations difficulties may arise. The hon. and learned Member for Montgomery (Mr. Carlile) said that difficulties in the Birmingham Six and the Guildford pub bombing trials might not have arisen if there been tape-recorded interviews.

As well as the points of principle, there are practical but perhaps minor points that I hope the Minister will consider. One of the practical problems with the guidelines is the provisions for deaf people who are being interviewed and interrogated by the police.

We have been approached by the Royal National Institute for the Deaf, which is concerned about some of the implications for deaf people. Reading paragraph 4.4 of the guidelines, I can see potential problems. The RNID is particularly concerned about two matters. First, the profoundly deaf generally use sign language, and the RNID is concerned that there should be a proper recording of what the deaf person has said or communicated. Therefore, it is recommending that such interviews should be videotaped rather than tape recorded. Has the Minister considered that aspect, as videos are being considered for other purposes? We discussed the point in the Standing Committee on the Criminal Justice Bill.

In paragraph 4.2c. there is a requirement that any persons in the room during the interview should identify themselves, so any sign language interpreter would be required to do the same. The RNID recommends that the person be required to state the degree of his qualification, so that the suspect, or his or her representative, will have the opportunity to request a more qualified interpreter, should that be found necessary. There are many letters of qualification for interpreters, and, like anyone else, deaf people should have full confidence that what they are saying is being interpreted correctly.

Will the Minister consider whether the latest equipment for deaf people could be adapted for this purpose? All hon. Members have seen my right hon. Friend the Member for Stoke-on-Trent, South (Mr. Ashley) use the technical magic box to read what is being said almost as soon as it is said. He can follow the proceedings of the House, and I wonder whether such equipment could be used when deaf people are being interrogated and interviewed by the police.

There are concerns, some of which relate to the access of solicitors to the taped interviews. Solicitors should be allowed to hear an interview or part of an interview that has taken place before they have had a chance to advise the client. For the solicitor and for the accused, it may be extremely important that the solicitor knows exactly what has taken place before his or her arrival and the advice of the solicitor may be dependent on hearing what has gone on. If tape recordings exist, it would seem sensible to allow solicitors access to them. There may be occasions when that would not be possible or practical—for example, if there were a kidnapping inquiry, or somebody's life was thought to be at risk if the interrogation did not continue swiftly. In those circumstances, it would be foolish to insist on the solicitor's right to hear the tape taking precedence over anything else. However, the norm should be established that solicitors should have access unless there are good reasons to the contrary.

Has the Minister considered allowing solicitors to take their own tape recorders into interviews? Obviously, solicitors will take notes, but if the proposed new method is to be used for the police, it could also be used by solicitors. That might increase confidence in the system and reduce requests for access to tapes later—a point that concerns the Minister.

The code does not allow access to the tape recording of interviews where the case is not proceeded with, or charges are dropped. I hope that the Minister will clarify why he does not intend to provide such access. It is important that he does so, because it might be useful to have a record, especially if allegations were made later about the conduct of the police during that interrogation. We also want to know what provisions there might be for the destruction of any tape recordings that are made when the suspect has been released or the charges withdrawn. I hope that the Minister will be able to clarify these important points.

Field studies have shown that requests for full transcripts are infrequent, and, generally, the provision of a summary is sufficient for both sides, although there has to be agreement between both sides, because it is important that the defence and the prosecution agree the contents of any summary and that the drafting of such a summary is accurate. The police will have responsibility for that. What training will be provided to ensure that police officers required to carry out that aspect will have appropriate skills? The document—for example, in paragraph 4.5—sets out various points at which the police may take certain action. I do not quibble with the fact that there will have to be some discretion, but if there is discretion, there has to be training and there has to be some mechanism to ensure uniformity in the operation of these provisions.

I hope that the Minister will assure us that there will be full monitoring of the procedures once they are introduced, including the provisions in paragraph 3.3, which deal with the failure of equipment or the non-availability of suitable rooms. I hope that where such problems happen too frequently, there will be an examination and an investigation as I hope that there will be of any trend towards more interviews taking place outside police stations, with the result that they are not covered by these rules.

All these are significant difficulties. If the new rules are to operate properly, to improve the situation and give proper protection for the defence, they must be carefully

[Mrs. Ann Taylor]

monitored and we have to make sure that there are no loopholes that could undermine the intention behind the new rules.

I understand that the defence is to be charged—probably £5—for the acquisition of any transcript. Perhaps the Minister can explain the reasoning behind that decision, because it is part of the prosecution evidence. Moreover, in requesting a full transcript, I understand that the defence is required to notify the prosecution that it has done so. If the defence does that, it will be informing the prosecution that it intends to challenge the interrogation in some way, thus disclosing part, at least, of its case. That breaks with the principle that the prosecution has to prove its case and the defence need not show its case.

What the Minister has said today will take us somewhat further and we welcome the general direction in which he is going. I have raised some important points with the Minister, and I hope that he will consider them before the full introduction of tape recording of interviews. I hope, too, that the Minister will think clearly about the exemptions that he is creating, because they will cause many difficulties. I hope that the Minister will tell the House that he has reconsidered those points and that he will accept what I have said about the need for careful monitoring if the system is to work successfully.

6.29 pm

Mr. Ivan Lawrence (Burton): I am one of those legal practitioners who are keen to contribute to this debate because, since I first became a Member of the House, I have been asking Governments to introduce the sensible measure of tape recording interviews with suspects. I have re-read some speeches on this subject that are now 14 years old and I am pleased that I will be relieved of the burden of pressing this particular campaign so that I can consider others.

The wonder is that it has taken so long to introduce tape-recorded interviews. In June 1972 the Criminal Law Revision Committee recommended an experiment on the feasibility of such recordings. It was not until February 1975 that a committee was set up to consider the matter and it took nearly two years to decide what everybody knew—that it was perfectly feasible to have a tape recording experiment. In July 1977 the matter was relegated to a Royal Commission. The rest is history, but I believe that my congratulations to the Government should also include special congratulations to my right hon. and learned Friend the Member for Richmond, Yorks (Mr. Brittan), who gave the process a big kick forward when he was Home Secretary.

I support the tape recording of interviews with suspects because I believe that that one measure, possibly more than any other, will improve the procedures of our criminal trials. It will ensure that more of the guilty are convicted and that fewer of the innocent are dragged through an unnecessary criminal trial only to be acquitted.

With tape recordings there will be less opportunity for the police to allege, falsely, a confession and there will be less opportunity for an accused person to allege, falsely, policy dishonesty. Because police officers will be less often challenged as liars and less often thought to be dishonest, their standing in the community will rise and so will their morale. It will be easier to recruit the best people to the police service. Fewer police officers will be tempted to be dishonest once we have nation-wide tape-recorded interviews and, as we know corruption often follows from dishonesty, in future years our police force will be even less corrupt and much more honest than some of the allegations that are made daily in our courts would suggest.

If the circumstances surrounding the making of a statement were less open to criticism, more people would plead guilty and more would feel obliged to shorten the length of their criminal trial. Therefore, it would take less time to try a case and trials would come on sooner after arrest. Witnesses' memories would have less time to fade and their evidence would become more reliable—fewer acquittals would occur as a result of that alone.

In short, crime will become easier to fight because the conviction of the guilty will become more certain and, therefore, there will be a stronger deterrent to crime. The money that is saved by shortening the process of our criminal procedures will more than outweigh the present costs of the system, without tape recording.

Since I first spoke about this matter, we have had the benefit of the field test by the Home Office research planning unit. That unit has published a report in the names of Carole Willis, John McLeod and Peter Naish. It is important to place on record the conclusions, to date, that have been drawn from the field tests throughout Britain. First, a higher proportion of suspects have become the subject of court proceedings. That, combined with the greater success of the police in bringing people to trial, is likely to mean that the process of convicting the guilty will become more efficient.

Secondly, there is no evidence that the police have been avoiding the use of tape recorders. On the contrary, the report suggests that they are more likely to carry out interviews at police stations which have them. That is welcome news to those of us who were once worried that the police would be the biggest obstacle in the way of tape-recorded interviews.

Thirdly, tape-recorded interviews tend to be shorter and there will be considerable benefits as a result of the police time that is saved.

Fourthly, there has been an increase in the number of admissions and confessions—some of us expected that. However, I understand from the figures that have been bandied about that, in the test case areas, the increase in guilty pleas is as low as 2 per cent. Perhaps my hon. Friend the Minister will say whether that is the definitive figure because 2 per cent. seems to be a much lower increase in the number of admissions and confessions than we had, I think, expected.

The fifth conclusion of the unit is that more information is vouchsafed by suspects about other offences they have committed. Sixthly, suspects that are not charged are released more quickly. Those of us who are concerned about the civil liberties of the individual innocent of a crime will greatly welcome that.

The seventh conclusion is that there has been no decrease in the quantity or quality of the information obtained from suspects. The opposite is true and there has been an overall improvement in the information gleaned from suspects. Its eighth conclusion is that there has been a reduction in the police time spent on such interviews; and, finally, there has been a small reduction in the average length of trials at both the higher and lower courts, presumably because there have been fewer challenges to

the truth of such interviews. In future, challenges will be likely to relate more to the interpretation of the words used in the interview rather than to the dishonesty of the police officers taking part in it.

The conclusions of the Home Office research planning unit amply justify the Government's actions and the hopes with which those of us who pressed for tape-recorded interviews imbued the debate.

May I conclude by asking the Minister some questions and expressing two thoughts. What are the anticipated nation-wide costs of the installation of tape recorders in major police stations? What savings does the Minister anticipate from the shortening of criminal trials, given the considerable reduction in criminal trial expenses that will result? What action is being taken towards the next step, video-recorded interviews? I believe that one can now buy a video tape recording unit for about the same cost as the audio tape recording machines were themselves when we originally discussed this matter. As the price plummets, it must become more feasible and more sensible—even as a cost-cutting exercise—for police stations to have a video recording facility.

In common with other hon. Members, I have some doubts about why the benefits that would flow from tape-recorded interviews should be denied to those who are charged with or bring charges of terrorist offences. Has my hon. Friend's conclusion been reached on the advice of the Northern Ireland police and prosecution authorities or solely on the advice of the police? Upon what basis has my hon. Friend reached his conclusion? If that basis is not that convincing, I hope that he will reconsider his attitude towards future terrorist interviews.

My one regret is that we did not get all this moving earlier. If we had done so, there would have been less pressure to interfere with the established procedures of our criminal trials. Perhaps people would have been less worried about the abolition of the peremptory challenge of jurymen, and less desirous of the need to increase sentences by appealing to the Court of Appeal. One could go through a gamut of actions—almost panic-stricken actions—that the Government have taken to try to end the increase in crime. They have interfered with the traditional procedures of our criminal trials, yet they have been broadly resisted by those who know most about the functioning of our criminal system as a result of practising in the courts.

Perhaps the success so far—and, I hope, the continued success—of tape-recorded interviews will have this one effect: that it will slow down any movement that my right hon. and hon. Friends may think they observe in the country to interfere with the traditional right to silence. As the House may know, I am not opposed to some limited interference with that right, but I hedge that with this qualification: before we do anything as drastic as that, we should see whether the procedures that my hon. Friend is introducing with this measure are successful. If they are, we need not disturb the traditional procedures which have served this country so well over many years.

I end by offering my congratulations, thanks and best wishes to my hon. Friend for the success of this measure.

6.40 pm

Mr. Gerald Bermingham (St. Helens, South): I shall follow on from where the hon. and learned Member for Burton (Mr. Lawrence) left off. I, too, have an interest in these matters. It occurs to me that there is no rhyme, reason or logic about excluding one type of criminal trial from taping.

A terrorist offence in Northern Ireland or in the United Kingdom is given a criminal trial. When someone is accused of a terrorist offence, the defence is served with all the documents relating to the interviews, usually in the form of contemporaneous notes. In some cases, nothing is said in an interview; in others, a great deal is said. If the Minister implied in answer to my intervention that, in the past few years, when interviews have been taped, they have been carefully and selectively edited, that is an appalling admission. Surely he did not mean that. If not, why should things change merely because the method of recording has changed from contemporaneous notes to tape? Perhaps the Minister will say a little bit more about that in due course.

I want to make one or two points of a practical nature. My first is a cri de coeur about the tapes themselves. There was recently a move to change the sort of tape that is used. I pray that that will not happen. The tapes that were used in the experiments were the sort that can be put in a Walkman or a car radio. Sometimes interviews are several hours long and, having to travel long distances to court, many a lawyer has done so listening to the tape of an interview, perhaps looking for some discrepancy between it and the summary that he or she has been given. Perhaps the client has said that he did not imply this or that, and gave an explanation. If an interview lasts for three hours, it takes three hours to listen to it—a practical point.

Sometimes, when tapes are required to clarify a point, and they are of the type that can be used in Walkman sets or car radios, prosecution and defence counsel can sit in the car park and play the relevant part of the tape, thereby eliminating the need for an adjournment and speeding up matters. So I pray that the Home Office will see sanity and stick to the current sort of tape.

The hon. and learned Member for Burton also referred to my second point. Trial surveys have shown that the length of interviews decreased when tape recording was used naturally and logically. When a contemporaneous note is written down, it takes an awfully long time to complete. Asking questions and receiving answers orally is naturally quicker. But another problem has arisen; it is admirably demonstrated if one listens to the tape of an interview. I refer to the number of superfluous questions which are asked in the course of an interview. A number of senior police officers have told me that the police service would like a little assistance with the costs of training detective officers in the methods and procedures of using tape. I hope the Minister will assure the police authorities that such training will be available and that its costs will be met. Training a police officer to ask questions quickly saves a considerable amount of time: the interviews become succinct and to the point. Most cases are simple and straightforward, and, with a little teaching, considerable savings can be made.

I want to draw one more matter to the Minister's attention. I have already mentioned it to him privately and warned him that I would do so again tonight. Following the decision in the case of Alladyce which, when there is a breach of the code, leaves discretion to the judge under section 78 of the Police and Criminal Evidence Act 1984, will the Minister consider the wording of present codes, particularly as they relate to interviewing techniques?

[Mr. Gerald Bermingham]

It is becoming apparent that, while we have sought to cure one great ill—allegations and counter-allegations about interviews—another has begun to develop. It is nicknamed "the Scotch allegation", because it first broke out in Scotland, where they were a little ahead of us in interviewing techniques. I refer to the supposed confession, made either at the moment of an arrest, or on the way to the police station, or in conversation in the police station before formal interview. As the code is drafted, any interview in a police station must be recorded either by contemporaneous notes, which the defendant is shown and asked to sign, or by way of tape under the new code. It never ceases to amaze me that, when a conversation has taken place and been recorded in a police officer's notebook as soon as he reaches the police station, and it is said to contain some confession, it is beyond the wit and wisdom of police officers to present that written record to the suspect, to tell him that that was what he had said in the car, and to ask him to sign it. That would at least go halfway to overcoming what are increasingly becoming time-consuming arguments in the courts. Will the Minister take that on board? There is clearly a loophole in the current code of practice. It could easily be tidied up, and all of us would benefit from that in the long term.

It has often been said that tape recording of interviews will go a long way to eliminating the courtroom banter and barrage of allegation and counter-allegation about what has been said. This has been a long time in coming. Let us hope the order will be brought into effect quickly and that, throughout the length and breadth of the country, tape recording will become the norm rather than the exception.

6.48 pm

Sir Giles Shaw (Pudsey): I join other hon. Members in broadly welcoming the thrust of the code of practice and the order. I want to say two things about them, one of which my hon. Friend the Minister will understand, knowing of my previous interest in this matter.

I had hoped that the process would be relatively quick once the system was established and tested and the Government had made up their mind, as I had little doubt they would. I am rather sorry that my hon. Friend has told us that it will take another five years before the new system is properly distributed throughout the police service. I ask him to think again about that. Why will it take another five years? There are fewer stations now. Custody stations have been established, and that must have reduced the potential number of interview centres. The Crown Prosecution Service has also been established. Why should this take so long if the change is funded? Surely my hon. Friend, probably aided and abetted by the Lord Chancellor, will be most anxious to provide additional funds so that the courts' time is not wasted and we enjoy the efficiency that I am sure the new system will produce.

My second point has to do with exemption. I am not entirely happy with what my hon. Friend the Under-Secretary said was the reason for it. We have had real benefits from moving to tape recording. My hon. and learned Friend the Member for Burton (Mr. Lawrence) was right to list them and the conclusions of the test area panel that was set up by the Home Office.

Northern Ireland was not one of those test areas—no doubt for fairly good reasons. It is saddening that there should be further disparity between the police and court procedures that are available in the Province and those that are available in other major centres of significant criminal activity. The more that such disparities exist, the less welcome they will be to many people who believe strongly that the rule of law is the way to fight terrorism and that it is the only method by which to argue the popular case against terrorism, even in the Province of Northern Ireland.

I hope that, as my hon. Friend the Minister has previously suggested—a matter to which the hon. Member for Dewsbury (Mrs. Taylor) referred—he will tell the House that the matter will be subject to review. The fewer the disparities that exist, the greater will be the chance for a system of common justice and common police practice throughout the United Kingdom. That will be in the best interests not only of the Province and the rest of the United Kingdom, but of the reputation and probity of the police force.

Mr. Seamus Mallon (Newry and Armagh): Is it not ironic that, following Lord Justice Bennett's investigations at Castlereagh and Armagh holding centres, he recommended that interrogations should be videotaped and tape recorded? Now we find that despite that recommendation what will happen in the north of Ireland will derogate from what is happening elsewhere.

Sir Giles Shaw: I hope that my hon. Friend the Minister will take due note of that intervention. It is eloquent evidence to be weighed in the balance when he makes his decision.

The overall benefit of what my hon. Friend has offered the House is considerable and I congratulate him on bringing in the order.

6.53 pm

Mr. Seamus Mallon (Newry and Armagh): I am aware that there is pressure of time on all of us, so I shall confine myself to one point. A debate on the Northern Ireland order will follow in the next Session of Parliament, but it is essential that we consider the matter that was raised by the hon. Member for Pudsey (Sir G. Shaw) and by almost all other hon. Members who have spoken.

I refer to the exclusion of terrorist trials from the order, which is of great import. Where separate series of legislation operate in the north of Ireland and in England and Wales, there is bound to be an overlap. There can never be a clear distinction between, on the one hand, the Police and Criminal Evidence Act 1984 and, on the other hand, the Prevention of Terrorism (Temporary Provisions) Act 1974 and the Prevention of Terrorism (Temporary Provisions) Act 1984. They will, of necessity, overlap and it is impossible to make a clear distinction between them. Serious problems will arise after people have been apprehended under the emergency legislation or the Police and Criminal Evidence Act. We shall have a difficult time because of that.

The central point, which has been made ably by other hon. Members, is that the protection of this code of conduct is being denied to those who need it most—those who are arrested under the Prevention of Terrorism (Temporary Provisions) Act or the Prevention of

Terrorism Act, which represent the greatest derogation from the normal legal practices in the rest of western Europe.

It is essential that we should consider those matters briefly and I ask the Minister to do so. I hope that if he has discussions with his Northern Ireland counterparts he will at least consider that point.

In Northern Ireland 90 per cent. of the incidents of stop and search take place under emergency legislation. Sixty per cent. of detention, questioning and custody cases take place under the emergency legislation. Well over 50 per cent. of cases involving the search of premises take place under the emergency legislation. We have only to look at the problems that arise from the interrogation of suspects and at Lord Justice Bennett's report and the millions of pounds that have been paid in compensation to see the need for such protection.

The explanatory document which accompanied the Northern Ireland order says:

"The police are under a duty to observe these codes and non-compliance will constitute a disciplinary offence."

It would not be stretching it too far or using poetic licence to say that under the emergency legislation the police are not under a duty to observe those codes, and non-compliance would not constitute a disciplinary offence. Human nature being what it is, there must surely be a tremendous temptation to any police service not to abide by the highest rules and codes of conduct by which they would operate under a different piece of legislation. The police are presented with a choice between wearing two hats—whether to be the good cop when pursuing a case under the Police and Criminal Evidence Act or a not-so-good cop when working under the emergency legislation. That is the difficulty that the police face. Human nature being what it is, if a policeman is not under a duty to observe the codes and if non-compliance is not a disciplinary offence, he may not obey them and he may act differently in those two situations.

Let me deal with another matter and put it into the practical terms of Northern Irish life. If a person sitting here stole £1 million he would be dealt with under a different piece of legislation from a young boy of 16 years of age who was suspected—nothing more—of complicity in an offence that came within the terms of the emergency legislation. That young boy would not have the benefit of the codes of practice that the man sitting here would. That cannot be right. That does nothing for the difficult situations in which the police have to operate. It does nothing for the person who has been arrested and interrogated. Nor does it help the position of the courts. Without parity between the two sections of legislation there could be two different approaches, not just by the police service but by the court service, and that would be dangerous.

My last point highlights a difficulty and an anomaly. One of the greatest problems in Northern Ireland at present is a type of Mafia racketeering. That has now reached endemic proportions and it is difficult to say whether it is a criminal offence to be dealt with under the Police and Criminal Evidence Act or whether it occurs within a paramilitary organisation and should be dealt with under the emergency legislation. It will take the wisdom of Solomon to make such a distinction. Living, as I do, close to the areas where it takes place, I know that there is no known way in which that distinction can properly be made.

If I were a racketeer making millions of pounds a year, as some of those people do, not connected in any way with any paramilitary group, but acting for my own greed, I would have the protection of the codes. In a different set of circumstances, that protection would not apply. That will create a difficult, if not impossible, situation for the police, the courts and everybody else who has to deal with the situation. I hope that in the intervening period the Minister will impress upon his colleagues in the Northern Ireland Office that if we are not to make a nonsense of this in Northern Ireland, we should have a statutory code of practice for every type of offence.

6.59 pm

Mr. Tim Rathbone (Lewes): I welcome the code of practice. It is an important part of the original Act. I shall make three short important points. First, I shall reiterate my concern about the identification of a terrorist act. The hon. Member for Newry and Armagh (Mr. Mallon) mentioned racketeering. Racketeering, and drug trafficking, which is another form of racketeering, can be part of a terrorist activity. Terrible complications will arise from the form of words used in the code of practice. I, like others, ask my hon. Friend the Minister to continue to include that in his review.

My hon. Friend the Minister will be aware that the original Act placed considerable additional burdens on our police force and the order establishes further the operations of that Act. The taping of entire interviews, even if it reduces the length of interviews or the time that police officers spend in interviews, the provision of transcripts where necessary, the provision of summaries, the training that will be required and the supervision necessary to ensure that the code is complied with, will all place considerable extra work on our police forces.

My hon. Friend the Minister said that the practice will be phased in over five years, hoping that it will be standard practice in 1991. However, it is expected to be used to some extent by all police forces by the end of this year. He mentioned five test areas where the practice is presently being carried out. I wonder whether one of those is within the Sussex police force area. As he will be aware, the Sussex police force is under considerable strain. In a recent written answer he mentioned that the Sussex police force had requested seven additional officers in the current year. He inadvertently misled the House because the request was for 27. The request for seven was a hangover from last year and the force requested an additional 20 this year. It could be said that the Sussex police force is now 27 officers under strength.

The difficulties it faced were well illustrated by the report of the chief constable for Surrey on violence in rural areas. Sadly, the report has not been available to the House. For some reason it has been suppressed. The chief constable has been instructed not to publish it or make it available. My hon. Friend the Minister should rescind that instruction because the report would be of great interest to many hon. Members.

Mr. Michael Marshall (Arundel): My hon. Friend knows that he speaks for all Sussex Members in outlining the difficulties. For example, at the recent mayor-making ceremony in Arundel we were unable to have any traffic control by policemen for the parade of Scouts, Brownies and other worthies because the police were being diverted to other duties due to shortages.

Mr. Rathbone: Absolutely. Some of those police will be operating the provisions of the Act and it is important that they should do so. That is why I raised that point.

I plead with my hon. Friend the Minister to reconsider the question of terrorism and to look into the application of the Act by the police and the burdens that will fall on them. Once again, I plead with him to increase the Sussex police force by the number requested.

7.4 pm

Mr. Alex Carlile (Montgomery): I join in the welcome that has been given to the code. The sooner universal tape recording is available, the better. I agree with the hon. Member for Pudsey (Sir G. Shaw) who said that five years is an unnecessarily long time for the introduction of tape recording throughout all police areas.

I shall begin with two practical points. First, the tape recordings appear to be causing no real difficulties in the courts. However, the summaries are causing difficulties. There have been cases in which issue has been taken as to the accuracy of the summary as a reflection of the gist of the tape recording, or at least its most relevant parts. There is a need for officers to be trained in pre-cising tape recordings. Anybody who has tried their hand at sub-editing knows that it is extremely difficult to sub-edit prose. To sub-edit a long and often boring recording of question and answer is a difficult task. Officers need special training to ensure that court time and their own time is not wasted in controversies as to the accuracy of the summary.

Secondly—this is another practical point and a simple one—I wish to put in a plea that the playback equipment should be standard throughout all police force areas. I understand that, largely, that will be so but that there are a minority of areas using a different form of playback equipment. If lawyers at all levels are to have a fair chance of considering in full the tape recordings before trial, they will have to purchase equipment that will play back the recordings in a way that will make them easy to hear. The nature of the tapes means that on some ordinary commercial tape recorders it is not always easy to hear clearly the recording of the interview because of the second track that can intervene in a rather disturbing way. Therefore, solicitors' offices and barristers' chambers will have to buy the appropriate equipment. In the provinces and in London, barrister' chambers and solicitors' offices may be dealing with numerous police areas and it is important that there should be standard equipment in use.

I shall deal with the exceptions. On section 1 of the Official Secrets Act, I am sure that the Minister will recall the Cyprus spy trial. It was the longest spy trial there has ever been in England and Wales. The main issue was the accuracy and fairness of alleged confessions obtained by military police. If for security reasons edited summaries had been produced, if there had been tape recordings, there would have been a failsafe. The judge would have been able to hear the tape recordings to ensure that the summary was accurate. I should have thought that in circumstances such as that a great deal of time could be saved and, on balance, the public interest would be served if a tape recording was available.

In relation to terrorist offences I suggest that there is an even more overwhelming argument for the use of tape recordings. With the Brighton bombing, the Guildford pub bombing and other less celebrated cases in the general area of terrorism there have been challenges to the accuracy and fairness of interviews carried out. Convictions have rested substantially upon the view taken by a jury of interviews that were not tape recorded. Much of the continuing controversy in relation to at least three terrorist cases is dependent largely upon the view taken of police interviews. Necessarily, the interviews will be recorded contemporaneously in any event. It may be that editing will later be carried out as to what goes before the jury. However, it is not for the police to decide what it is in the public interest to edit. Now that we have an independent prosecution service and serious cases are handled at a senior level, surely there is an overwhelming argument for the entire interview to be recorded and for the Crown Prosecution Service, if anyone, to decide the nature of any editing that should take place.

Sir Eldon Griffiths: It is certainly not for the police to edit but it could well be up to the police to exclude material because of evidential factors in a terrorist issue.

Mr. Carlile: I do not agree with the hon. Gentleman. It is not for the police to make them. It is for the Director of Public Prosecutions to make them.

If it is possible to devise a means whereby we can be sure of what was said, we should employ that means. We have that means. It is relatively inexpensive and it is being introduced in relation to all other offences, except terrorist offences and offences under section 1 of the Official Secrets Act. There is a strong logical argument for applying the same standards to the most serious offences. I ask the Minister to think again over the next few months while the tape recording equipment is being introduced into the vast majority of police stations. I suspect that the judges would greatly welcome the introduction of tape recordings in relation to all offences and that the public interest would be served thereby.

7.10 pm

Sir Eldon Griffiths (Bury St. Edmunds): I too welcome the measure because it honours the undertaking given to those of us who soldiered in the vineyards of the Police and Criminal Evidence Act Committee. I also welcome it because it is a case in which technology goes to the aid of justice. I pay tribute to my hon. and learned Friend the Member for Burton (Mr. Lawrence) for the campaign that he and others fought for the measure to be introduced. I freely concede that many police officers were originally sceptical about it, but they have been convinced by the practical experiments that have taken place. It is now overdue that we should make the practice universally available. I associate myself with the comment of my hon. Friend the Member for Pudsey (Sir G. Shaw) in asking whether the process must take five years. I suspect that I know some of the answers and I shall allude to a couple of them.

Mr. Douglas Hogg: I am responsible for the confusion. It is my fault and I apologise. We expect the practice to be in place by the end of 1991, five years from the beginning of 1986.

Sir Eldon Griffiths: I am much obliged to my hon. Friend. His comment coincides with my inevitably limited experience of this matter. The police service is installing the equipment as rapidly as it can in most parts of the country and, for the most part, it has become an enthusiast in doing so.

The House should be under no illusions that, although there is much benefit for the system of justice and for the police service, the measure lays new burdens upon the police. I make no apology for saying to the House that we are asking police officers to make available facilities that, in many cases, they do not have. In many of our bridewells, suitable rooms are not available and it is an expensive and difficult business to provide them when the police have many other priorities. We ask the police to do a great deal in dealing with burglary and rape. These additions will inevitably take police officers off the beat. They will spend less time interviewing, whether or not the interviews are recorded—that is the gain—but no one should be under any illusions that it is not an additional burden upon the police service.

All of the requirements of the code enter at once into the police discipline code and any infraction can be used to bring a police officer before his senior officer. Many of the matters involved are fairly technical. The police must be properly trained, not only to use the equipment, but to make the difficult summaries. The hon. and learned Member for Montgomery (Mr. Carlile) was right when he said how difficult it is to take the unexpurgated language contained in an audio recording and translate it into a summary that will be acceptable to people with the perception of my hon. and learned Friend the Member for Burton and of the hon. and learned Gentleman himself. However well the police do the job, it will be challenged in many cases because it will be convenient for the defence to make that challenge. I want to underline what a difficult task we lay upon young police constables. They will be asked to do the job of translating thousands of words of often extraneous and not totally audible matter into summaries that will satisfy a court of law.

The loading of the police service with paperwork is becoming a major problem. I am glad that the task forces set in motion by no less a body than the Audit Commission are now trying to reduce the paperwork in which the Metropolitan police are drowning. The west midlands force has made a good start in reducing the paperwork. The force orders of the Metropolitan police run to about 18,000 pages. I may need to be corrected; it is possibly 13,000 pages, but it is of that order of magnitude and police officers are supposed to operate within that environment. All that lays more problems upon them. They must have the necessary training and number of staff. Against that background, it is a bad time for the official side of the police negotiating board to be attacking the pay of the young police officers who will have to do the job.

I wish to conclude, as many other hon. Members have done, by addressing the extremely difficult problem of derogating from the code of practice in respect of terrorism and official secrets. I declare some interest in that matter as I have had some experience of police officers having to conduct interviews with terrorist suspects. I hope that hon. Members, particularly those who are not lawyers and do not practise in the criminal courts, are under no illusions about the difficulties of conducting an interview with a suspected terrorist, particularly one who may be a hardened practitioner who knows how to handle an interview, in some cases better than the police officer himself.

I hope that the House will be under no illusions about what it is really like to conduct an interview with an alleged rapist or with someone who has been charged with interfering with a child. We had a debate on that matter some weeks ago. Police officers conducting such interviews about sexual molestation of children or the rape of women, and doing so on an audio recording, will find it an exceedingly difficult task. They already find it a difficult task, but reducing those interviews into a summary for a court of law is an exceedingly difficult task.

The Government have thought about the question of terrorism and have got it right in principle, but not in detail. A police officer, particularly a special branch or CID officer dealing with terrorist cases that cost lives, and perhaps experienced in the mutilations that arise from terrorist action, would be in breach of his duty if he permitted the tape recording to continue when he sees that, as a result of an interview, material would be available that would either exclude further intelligence that the police are pursuing or, if it were made available to the defence lawyers, could aid the very terrorist whom he is seeking to catch and convict.

I am totally opposed to dealing with the problem by editing the tape. That would make nonsense of everything that we are seeking to do, but it must be right in certain circumstances that a police officer can shut off the tape if it is beginning to trespass into those areas that could cause further loss of life. The Government are therefore right to derogate from the generality of the order in respect of terrorist offences. The same goes broadly for the Official Secrets Act, although I am sure that that point will be further debated when we come to the Official Secrets Act reform.

I find myself parting from the Government in respect of the exact method by which they have sought to define the matter that can be excluded from taping. It is too difficult for a police officer, as he proceeds with an interview, to have to decide whether the matter that he is pursuing is terrorism connected with Northern Ireland, international terrorism or domestic terrorism connected with the United Kingdom, in which case his interview must continue. It is to make too many different distinctions for many police officers. I hope that my hon. Friend the Minister will take further advice. He should examine further the definitions before he asks the police to practise them.

7.20 pm

Mr. Douglas Hogg: I have only two minutes in which to respond to those who have spoken. I hope that the House will forgive me if my replies to individual hon. Members are not especially full.

Like other hon. Members, I do not like a disparity between classes of offence. However, having considered the matter carefully, and bearing in mind the views of the Royal Ulster Constabulary and the Northern Ireland Office, I am satisfied that we are right to make the derogation. We must recognise that the sort of information that becomes available in the course of an interview following a terrorist offence can do much to damage national security.

The hon. Member for Dewsbury (Mrs. Taylor) talked about the deaf. As I am short of time, I shall respond quickly to the issues that she raised. The issue is covered in part by the fourth clause of the code. Deaf people have a right of access to an interpreter. I do not believe that it is necessary for the interpreter to state his or her qualifications, if only because a bad interpreter will be of

[Mr. Douglas Hogg]

no use to anyone, not least to the police. Solicitors can use their own tape recorders when interviews take place, but I would not encourage the practice.

I say to my hon. Friend the Member for Lewes (Mr. Rathbone) that we believe that the net effect on police manpower will be beneficial. The hon. Member for St. Helens, South (Mr. Bermingham) talked about interviews in cars. He has a point, and we shall consider it when amending code C. I undertake that we shall consider the arguments that he has advanced.

There are serious training considerations. There will be monitoring by the inspectorate. Monitoring, too, is a serious matter——

It being one and a half hours after the commencement of proceedings on the motion, MR. DEPUTY SPEAKER, *pursuant to the Order [22 July], put the Question.*

Question agreed to.

Resolved,

That the Police and Criminal Evidence Act 1984 (Codes of Practice) Order 1988, a copy of which was laid before this House on 13th July 1988, be approved.

Teachers' Pay and Conditions

7.22 pm

Mr. Derek Fatchett (Leeds, Central): I beg to move,

That the Education (School Teachers' Pay and Conditions) Order 1988 (S.I., 1988, No. 1055), dated 15th June 1988, a copy of which was laid before this House on 17th June, be revoked.

The debate is about the implementation of the report of the interim advisory committee on school teachers' pay and conditions. It is important to understand the background to the debate and to the order.

Last week, during our debates on the Education Reform Bill, we were told by the Minister of State that we were deliberately creating anxiety among teaching and non-teaching staffs about the Government's powers in relation to employment laws. It was asserted by the Minister that the Secretary of State would not contemplate reducing employment rights. As we understand the background to the order, we know how worthless such assurances are. The Secretary of State removed from teachers the most basic of employment rights, the right to bargain collectively with their employers. We would argue that the basic right to bargain collectively is an essential prerequisite of a healthy pluralist democracy.

Mr. Greg Knight (Derby, North): Will the hon. Gentleman give way?

Mr. Fatchett: I have only just started.

Mr. Knight: It is on the very point that the hon. Gentleman has raised.

Mr. Fatchett: Very well.

Mr. Knight: Will the hon. Gentleman tell us how he can bargain collectively when not one Labour Member, apart from himself, is in the Chamber?

Mr. Fatchett: I shall continue with my speech. The intervention was not even worthy of the hon. Gentleman's standards.

To take away the right to bargain collectively—it is a right that has been exercised for many years by teachers and their organisations—is a damaging step away from democracy. When the Government give an assurance on employment rights, as they did last week, we must remember their record with the teachers and GCHQ, which tells us that their assurances have no meaning.

The Government have been condemned internationally for their action in removing collective bargaining rights from teachers. They were condemned by the International Labour Organisation, which concluded that the Government's actions were not in conformity with the fourth article of convention No. 98. The Government have rightly been condemned by the ILO and by international opinion because they have no regard for the democratic, industrial and employment rights of teachers. That is why we are debating the order.

We are unhappy about the order because of its genesis. We do not think that it tackles the major problems facing the teaching profession, but we shall not use the debate as an opportunity to negotiate on behalf of teachers. The Chamber is not a place for negotiation. The necessary negotiations between the employers and teachers' organisations should take place elsewhere, with a clear, defined and recognised role for Government. Because we

believe that the Chamber is not the place for wage negotiations, and because we believe that the right to bargain is an intrinsic right in a healthy democracy, an incoming Labour Government will restore collective bargaining rights to teachers and their organisations. As I have said, we shall not take the opportunity tonight of negotiating in detail the teachers' pay awards.

Can the Minister of State give the House and the teaching profession an indication of the progress that is being made in establishing collective bargaining rights for teachers? It would be interesting to hear the Minister respond positively and constructively to the ILO's decision. It would be interesting also if the Minister were to accept that the Government should feel embarrassed that an international organisation has so severely condemned the Government. It would be interesting, further, to hear the Minister dissociate herself from some of the comments which were made by some of her hon. Friends last week. When the ILO was mentioned, they found it a matter of some amusement and the opportunity to engage in ridicule. It would be useful if we were to hear the Minister show respect for the ILO and to give a sign to teachers and their organisations that the Government will restore to teachers the right of collective bargaining.

There are detailed criticisms that we would wish to make of the report and the Government's action in relation to it. The first criticism and major comment is directed to the sixth paragraph. The hon. Member for Rugby and Kenilworth (Mr. Pawsey), with his keen interest and knowledge of these matters, will no doubt have read the report. He will be able to tell me that the first conclusion reached—a crucial conclusion—was

"that teachers' morale is low. This is not only, nor perhaps principally, a matter of pay, though pay was at the heart of the industrial dispute and it would be foolish to imagine that since the 1987 pay increase it has ceased to be an issue."

The hon. Member for Rugby and Kenilworth and the Minister will recognise that without high morale and teacher commitment we shall not have high standards of performance and of education.

For the first time in Britain's history in the post-war period we have a Government who have presided over a reduction in education standards. If they are to make an improvement, and if our children are to be provided with the opportunities that they deserve, we shall need a teacher force with a high morale and a sense of commitment, and having the feeling that its professionalism and service are recognised by both society and the Government.

Mr. Paddy Ashdown (Yeovil): In responding to the hon. Member for Rugby and Kenilworth (Mr. Pawsey), perhaps the hon. Member for Leeds, Central (Mr. Fatchett) missed the point. He is right to say, as the report does, that it may not be chiefly and principally a question of pay. The hon. Gentleman is right to point out its importance, but the principal reason why teachers' morale is low is surely the way in which they are treated by the Government. The principal act against teachers has been the removal, without any attempt to replace them, of their rights to negotiate pay and conditions. That is the Government's responsibility, whatever the hon. Member for Rugby and Kenilworth) may snigger about.

Mr. James Pawsey (Rugby and Kenilworth, *rose*——

Mr. Fatchett: No, I cannot allow a series of interventions on that point.

I agree with the hon. Member for Yeovil (Mr. Ashdown). I was making the point——

Mr. Pawsey: On a point of order, Mr. Deputy Speaker. Do you not agree with me that there is a substantial difference between a giggle and a cheerful smile? I was trying to give the hon. Member for Leeds, Central (Mr. Fatchett) an encouraging smile, because I agree with much of what he says. That was completely misinterpreted by the hon. Member for Yeovil (Mr. Ashdown), who——

Mr. Deputy Speaker (Mr. Harold Walker): Order. Mr. Fatchett.

Mr. Fatchett: Sometimes, Mr. Deputy Speaker, I can understand your burdens in carrying out your office.

The hon. Member for Yeovil made an effective point. He will recall that my opening remarks referred to the background to the order, which was the Government's summary action in taking away the basic rights of teachers and their organisations to collective bargaining. That is crucial to the collapse in teachers' morale. For nine years, the Government have taken every available opportunity to undermine teachers' professionalism and status.

Tonight, the Minister needs to reassure the teaching force that she recognises that collapse of morale, that the Government are prepared to take action that will deal with it, and that they are prepared, as part of that action, to restore collective bargaining rights. Until the Government do that, as anybody with experience of education and of what is happening in our schools will know, teachers' morale will stay low. The Government's decision to take away their collective bargaining rights was seen by teachers as being central to the esteem in which the Government themselves hold the teaching profession. The report does not relate to that collapse of morale sufficiently, in terms of taking any action to restore it—although it is right to detect it.

There is clear and growing evidence that we are faced with recruitment and shortage problems. There is evidence also that the Government have little idea as to how they are to deliver the national curriculum or of how many teachers they will need for that purpose. The hon. Member for Yeovil may recall that on a number of occasions in Standing Committee we asked whether the Government were prepared to give figures of the number of teachers needed to deliver the national curriculum. First, we were told that there were some mysterious but brilliant calculations on the back of a fag packet in the DES. We now realise that it was probably written on the back of the hon. Member for Dartford, (Mr. Dunn). Later we were told that by the end of this year the Government would provide figures, but I suspect that when we reach the end of this year they will have no more idea then than they have now of how many teachers will be required. If they have, they will not publish those figures, because that would reveal the difficulties of staffing and recruitment that they face.

There is worrying evidence in the interim report which a sensible Government concerned about education standards would act upon. The following point is made on page 29:

"We judge that overall the numbers recruited were just about adequate in 1987-88, but there are already signs that recruitment is becoming more difficult."

Within 48 hours of the report's publication, figures from the teacher training clearing house revealed a 17 per cent.

[Mr. Fatchett]

drop in the number of applicants for mathematics teacher training, a 20 per cent. fall in physics applicants, and an 18 per cent. decline in geography applicants. Those are three crucial subjects forming part of the national curriculum, and all are suffering from a major recruitment shortfall. Again, there is no evidence from the Government, although all the warning signs are to be found in the interim report, that they have a recruitment strategy.

Mr. Harry Greenway (Ealing, North): The hon. Gentleman is being very unjust. Under this Government there has been a tremendous improvement in the pupil-teacher ratio over the past nine years.

Mr. Martin Flannery (Sheffield, Hillsborough): Nonsense.

Mr. Greenway: It is absurd to say that that is nonsense. The pupil-teacher ratio has improved substantially.

Mr. Fatchett: The hon. Member for Ealing, North (Mr. Greenway) is being complacent if he relies on just one set of statistics. Conservative Members know that the crucial point is that we shall face acute shortages of teachers in key subjects and that we are already facing a recruitment shortfall. Until the Government deal with those problems, there will be difficulty in delivering high quality education to our youngsters. The hon. Gentleman ought not to be complacent about that difficulty.

Mr. Flannery: What has been said by the hon. Member for Ealing, North (Mr. Greenway) is partially true, but it is not in any way due to the present Government. The number of primary pupils dropped, while the numbers in the secondary sector, where there were plenty of teachers, increased—so much so that the present Government could not let them all enter universities, for example. The better pupil-teacher ratio to which the hon. Gentleman refers existed when the Government came to office. It was merely a development of the circumstances that then obtained. Ever since, there have been fewer teachers, and there is now a shortage and worse pupil-teacher ratios.

Mr. Fatchett: My hon. Friend is right in his analysis that there was a demographic decline in terms of student numbers so that the pupil-teacher ratio improved. That occurred not because of the Government's actions—over their nine years in office they have cut the real level of spending per child—but because local authorities have increased their expenditure in real terms, though often threatened with penalties and rate capping by the Government for doing so.

Mr. Nicholas Bennett (Pembroke) *rose*——

Mr. Fatchett: I cannot give way because I must make progress. I am sure that the hon. Gentleman will understand that one or two other hon. Members wish to contribute to the debate.

There are two major criticisms of the Government and their reaction to the teaching profession. First, they have no strategy for dealing with the collapse in morale. Secondly, they have no strategy for dealing with recruitment and staff shortages. Until the Government understand those problems and devise a strategy, education standards will continue to decline. It is easy enough for the hon. Member for Rugby and Kenilworth to snigger, but for those youngsters who are suffering under that decline in education standards brought about by Conservative Members there is no second chance. Life provides only one chance in terms of education. The Government are not investing in youngsters, to give them a full range of opportunities. There is need for a strategy and to ensure that teachers enjoy a status and salaries that befit their professionalism and contribution to society.

I remind the Minister that all the evidence shows that it was because of the teachers' contribution that pupils were able this year to complete their GCSE work. If she will talk to youngsters throughout the country, and will study the analysis by the National Association of Head Teachers published yesterday, she will reach the conclusion that it was teachers doing more than was expected of them contractually that kept the GCSE on the road. It would have been useful if the Government, financially and in other ways, had made a contribution to GCSE similar to that made by hundreds of thousands of teachers. The simple fact is that teachers have kept it alive while the Government have under-resourced it and other parts of our education system.

Typical of that under-resourcing is the limitation that the Government have imposed on the interim advisory committee report. Page 2 of the report comments that the limitation to £300 million was a recommendation that the committee found excessively limiting. The Government, however, have taken that limitation a stage further. The fact that the recommendations produced a figure above £300 million has given them an opportunity to impose, via the back door, further cuts on local education authorities. By agreeing not to fund the full amount of the teachers' pay increase, they will ensure that we lose both teachers and other resources that are necessary in the classroom.

There are parallels in the Health Service relating to the nurses' pay increase and the treatment of non-medical staff. The Government have behaved in the same way throughout the public sector. Local education authorities will have to foot part of the bill, and in doing so they must lose teachers or resources. The Government should have provided the additional money asked for in the report: that would have been an indication of their commitment to good education for our youngsters.

We are debating this order because we feel that the Government must provide some hope for teachers that their professionalism will be recognised. So far they have not provided that hope, and there is no indication that they will do so. We wanted the debate also so that we could demand that teachers be given the right that belongs to millions of other workers to bargain collectively with their employers. We should be mature enough, as a society and as a democracy, to allow our teachers and their employers —with a role for Government—to negotiate their pay and conditions. Until that happens, it is a sad day for Parliament and for democracy when we have to debate such an order in this way.

7.42 pm

The Minister of State, Department of Education and Science (Mrs. Angela Rumbold): I suppose that the hon. Member for Leeds, Central (Mr. Fatchett) got at least one thing right: the order arises from the work of the interim advisory committee on school teachers' pay and conditions. The committee was set up in July 1987, in accordance with the requirement of the Teachers' Pay and

Conditions Act 1987. Its members were chosen from a variety of backgrounds, with a correspondingly wide spectrum of experience. The result was a generally well-balanced and independently minded body which was recognised by all shades of opinion.

In October 1987 my right hon. Friend the Secretary of State gave the committee a remit setting out certain detailed issues which he asked it to consider. Among those issues were changes in pay levels and allowances, and possible modifications to salary differentials and teachers' duties. It is true that the remit also included a financial limit of £300 million. That constraint, however, provided an important discipline for the committee's work, and was set against a background of concern about the general level of pay increases and the inflationary pressures that might be created. That concern has proved justified, and there remains a general need for lower pay settlements throughout the economy.

The committee proceeded to consult fully with local authority associations, teachers' unions and bodies representing the interests of voluntary schools, among others. In March this year, it presented its findings and recommendations in the report. The report was unanimous and was widely welcomed for its impartial assessment of teachers' pay, duties and working time. It examined the need to recruit, retain and motivate teachers of the right quality.

I must tell the hon. Member for Leeds, Central—who touched on the problems of recruitment as he saw them—that the committee made it clear that, having looked carefully at the need to recruit, retain and motivate, it detected no suggestion that overall recruitment and retention was inadequate, and it specifically mentioned that the wastage rates were low. But, as the hon. Gentleman dwelt at some length on the matter of recruitment, perhaps I should set his mind at rest with some additional information. We are currently seeing a 19 per cent. increase in the number of people wishing to enter primary school teaching, and they are being recruited as students.

It is true that we have not yet seen the improvement that we saw last year in the numbers wishing to teach in secondary schools and taking part in PGCE or other graduate courses. None the less, I remind the hon. Gentleman that it is quite common at this time of year for young people who have just graduated from university not to decide instantly about their career prospects. We have noted in the past—and it is perhaps slightly more noticeable this year—that in general young graduates have not yet reached a conclusion at this time about what career to pursue.

This afternoon, however, I talked to TASC—the teaching as a career unit within the Department which examines teacher recruitment—and I can report an interesting and, in my view, encouraging trend. Within the past month, we have received no fewer than 650 inquiries from people up and down the country—and even from abroad—about the possibility of coming into, or returning to, the profession. That should go some way to allay the hon. Gentleman's anxieties.

Mr. Ashdown: As the hon. Member for Leeds, Central (Mr. Fatchett) said, this is a key issue. Is the Minister telling us that the Government are satisfied that it will not be a problem? She must have made some decision this afternoon.

Mrs. Rumbold: It would be the crassest of mistakes for any Minister to say from the Dispatch Box that he or she was entirely certain that the future for teacher recruitment was satisfactory. We shall, of course, continue to monitor the position and check that adequately trained responsible people are entering the profession. But I cannot stand here this evening and give guarantees to the hon. Member for Yeovil (Mr. Ashdown), and I have not the faintest intention of doing so.

Mr. Ashdown: With respect, that was not the question that I asked the Minister. Will she now tell us that the Government, according to their own judgments—and she has talked this afternoon about how she made judgments—are satisfied that there is a reasonable prospect that there will be sufficient teachers?

Mrs. Rumbold: The Government remain confident that the measures that we are taking at present will encourage as many people as possible to come into the profession, both as mature students and as graduates straight from university. We shall monitor the position, and we shall be vigilant in ensuring that there are enough teachers to meet not only present but future requirements. That is part and parcel of the Department's work. It is a duty that we have not shirked in the past, and I cannot see us shirking it in the future.

Mr. Harry Greenway: I have every confidence that the Government will continue to maintain their high pupil-teacher ratio. Opposition Members who keep intervening presided over education, in the days of the Lib-Lab pact and the last Labour Government, at a time when there was a tremendous mismatch between what was provided in the classroom and the need for specialist teachers in certain subjects. It ill becomes hon. Members who sit on the SLD and Labour Benches to speak as they have spoken this afternoon.

Mrs. Rumbold: I am grateful for my hon. Friend's intervention. That is true. However, I do not want to point the finger at any Administration for any mismatch within the profession, particularly at the time when there was turbulence in the schools.

I have already made the point that the interim advisory committee's report was unanimous and widely welcomed, but it is also important to say that it tackled the issues in ways that were clear, concise and constructive. Neither the unions nor the management have made serious criticisms of the way in which the committee tackled its task.

On 19 April my right hon. Friend the Secretary of State for Education and Science published the report and began the statutory consultation process on its recommendations. On 26 May he confirmed that after careful consideration he had decided to accept in full the pay recommendations of the interim advisory committee. The Government believe that the IAC's proposals were both sensible and fair, coming as they did on top of the 25 per cent. pay increase that teachers received on average between March 1986 and October 1987.

The proposals implemented by the order gave all teachers a 4½ per cent. rise in their basic pay from 1 April this year. Teachers on the main scale will receive a further 4 per cent., on average, in September as a result of their annual increments. In addition, there is a 7·5 per cent.

[Mrs. Rumbold]

increase in the London allowances—backdated to July 1987—increases in the value of incentive allowances and an acceleration in the introduction of the A allowances.

A teacher who was formerly on scale 2, for example, who receives an A allowance from this September will receive an overall increase of 14·5 per cent. during this year, made up of the increase in all scale points, an increment and the value of the incentive allowance.

The report effectively endorsed the new pay structure, duties and working time for teachers that were introduced last year. The IAC's positive attitude towards the use of incentive allowances as a reward for good teachers has been welcomed on all sides, especially by the local education authorities. The report recorded the local authority representatives as saying that the new incentive allowances provided "a useful managerial tool" which could be

"flexibly applied to secure a range of different objectives."

Mr. Ashdown: Will the hon. Lady give way?

Mrs. Rumbold: I should be grateful if the hon. Gentleman would let me make a few more points. Then by all means I shall give way to him. He knows that I always do.

The interim advisory committee recognised the importance and usefulness of the incentive allowances by recommending that the value of each allowance should be increased and that the proposed rate of introduction of the A allowances should be accelerated. The Government accepted the recommendations, even though they took the total beyond £300 million. The planned expansion of 36,000 A allowances will now take place over two years rather than three. That means that 50 per cent. of teachers in primary schools and 60 per cent. in secondary schools will receive incentive allowances or be heads or deputies by September 1989.

Mr. Ashdown: The hon. Lady mentioned 14·5 per cent. Will she tell the House what the increase will be if we take away the increments that teachers were already due to receive?

Mr. Deputy Speaker: Order. I remind the House that this is a short debate. When hon. Members seek to catch my eye the Chair will be bound to take into account the frequency of interventions. The hon. Member for Yeovil (Mr. Ashdown) has intervened four times. He should bear that point in mind if he seeks to catch my eye.

Mrs. Rumbold: The answer to the hon. Gentleman's question is that it is about 6·5 per cent.

Mr. Ashdown: No. It is 4·25 per cent.

Mrs. Rumbold: The hon. Gentleman cannot even add up. It is 6·5 per cent.

The interim advisory committee made no recommendations that required changes to the part of the school teachers' pay and conditions document of 1987 dealing with the duties and working time of teachers, but it made various comments on mid-day supervision, cover for absent colleagues and teachers on short notice contracts. The Government believe that local education authorities will want to consider carefully the views expressed by the committee on the conditions of service of teachers.

The hon. Member for Leeds, Central also referred to negotiating rights for teachers and linked that important matter to the morale of the teaching profession as a whole. The interim advisory committee did a very good job this year but, by definition, it is an interim arrangement. It remains the Government's aim to introduce new arrangements for the determination of teachers' pay and conditions.

With this objective in mind, the Government put forward certain proposals for the future determination of pay and conditions in the form of a Green Paper that was published last October. The Green Paper aimed to survey the relevant issues and set out a range of possible solutions. It proposed a teachers' negotiating group with a separate committee to deal with heads' and deputies' pay and conditions. That was a consultative paper which did not set out final decisions.

A large number of comments have been received as a result of the Green Paper and we are giving them careful consideration, but I am bound to say that the various comments suggest that there will be difficulties in reaching agreement. My right hon. Friend the Secretary of State has held brief discussions about future machinery for the determination of teachers' pay and conditions with the teacher unions and local authority employers in the context of the meetings held this year about the IAC report. He will be offering further meetings in September, when I hope we shall look to the time when longer and more detailed discussions can be held.

Because of the differences of view among the various parties, it would have been impossible to have new, permanent and acceptable machinery in place in time for the 1989 pay settlement. For the sake of the country as a whole, we must not risk a return to the sort of chaos that has been so damaging to the teaching profession, the pupils and the schools. The interim arrangements have given us a chance to review the whole question of teachers' pay determination. We must use that opportunity to work towards machinery that is acceptable, workable and permanent. It must reflect the interests of parents, teachers, central and local taxpayers and, above all, the children.

Mr. Fatchett: We have had a number of assurances from Ministers at the Dispatch Box that the provisions will be interim and temporary. Can the Minister give a clear commitment that the 1990 pay round will be determined by some form of collective bargaining process?

Mrs. Rumbold: If the hon. Gentleman had been patient and waited for two minutes, he could have saved the House some time. I was about to say that the Teachers' Pay and Conditions Act 1987 made provision for the interim arrangements to last until 1990. We have always made it clear that that was the target date for establishing new permanent machinery. It remains so. My right hon. Friend therefore confirmed last week that the interim advisory committee would advise on the pay settlement for 1989. We are grateful for the fine work that has been done by Lord Chilver and his committee during the last year. We look forward to a further year of thorough analysis by the committee.

Mr. Fatchett: I deliberately asked the Minister about 1990 because that is the time when the interim arrangements run out. The Minister said that it is still the Government's target to change the arrangements after

1990. Will the Minister give a clear commitment now that the Government intend to restore collective bargaining for teachers' pay after 1990? Will she confirm that that is an intention, not a target?

Mrs. Rumbold: Through the negotiating machinery and discussions with unions and the local authority employers, the Government intend to establish sensible negotiating arrangements. We do not want to return to the kind of chaos that reigned before the interim advisory committee was set up.

Mr. Flannery: Who caused it?

Mrs. Rumbold: The hon. Gentleman asks me who caused it. It happened over a period of years. I do not think that the hon. Gentleman will want to go any further into that matter. As I have said, the Government are looking to a firm arrangement, and the target date is 1990.

I now turn to points raised by the hon. Member for Leeds, Central about the International Labour Organisation. Much noise has been made about all this. Hon. Members may not, however, be aware that the ILO has recognised that we are already taking steps towards new and lasting machinery. The committee on freedom of association of the ILO has noted that the consultations now under way will give the United Kingdom Government an opportunity to make legislative amendments.

The ILO is, of course, fully aware of the timing of the interim arrangements as set out in the Teachers' Pay and Conditions Act 1987. It is aware of our intention to set up new machinery for the determination of pay and conditions by 1990 and it has not asked that matters should proceed on any different timetable.

As a signatory to the International Labour Organisation convention, we are considering what the ILO has said and will keep this in mind as we move towards new machinery for determining school teachers' pay and conditions.

The order which we are debating this evening brings into effect the provisions relating to remuneration and other conditions of employment as set out in the school teachers' pay and conditions document of 1988. I recognise that the Opposition felt bound to pray against this order if only to give the hon. Member for Leeds, Central a chance to have a good old rant at me. But I cannot conceive that they expect the debate to result in anything other than approval of the order. Teachers want their pay rise and the Opposition cannot seriously intend to deny it to them.

The making of the order and the publication of the school teachers' pay and conditions document of 1988 followed extensive consultation. During the consultations, very few comments were made on the text either of the order or of the document.

Finally, one of the most encouraging signs during this school year has been the fact that teachers, despite all the comments from the newspapers, the unions and from many others that their morale is supposedly low, have worked closely with pupils without disruption. The evidence of a changed atmosphere has been highlighted by the introduction of the GCSE and the willingness of everyone to co-operate in making it successful. That is a tribute to the teachers' professionalism and the way in which they wanted to make it a success and put their pupils before other considerations.

Mr. Nicholas Bennett: The proof of the pudding is in the eating. Does my hon. Friend agree that when one considers the union membership figures and sees that the National Union of Teachers has lost 74,000 members, the National Association of Schoolmasters/Union of Women Teachers has lost 32,000 teachers, yet the two most professional and most moderate unions, the Assistant Masters and Mistresses Association and the Professional Association of Teachers, have increased their membership by 50,000 and 43,000 respectively in the past nine years, it is clear that professional teachers know exactly where their interests lie?

Mrs. Rumbold: My hon. Friend is absolutely right. Professional teachers are voting with their feet and joining organisations that represent their interests and put their professionalism and the interests of their pupils well above their own personal interests or the interests of some collectivist group that rants against the Government.

I am sure that all teachers would rightly be aggrieved if the order were to be revoked and if they were to lose their pay increase. I hope that the Opposition will not press the matter to a vote, but if they do I must ask the House to vote against the Opposition motion.

8.3 pm

Mr. Barry Jones (Alyn and Deeside): The ILO has put the Government on the spot. I urge them to respond urgently, do the decent thing and let us have voluntary negotiations. My hon. Friend the Member for Leeds, Central (Mr. Fatchett) was right to dwell on morale. The teaching force has been treated very badly by the Government. During the past few years it has been pushed from pillar to post, and I know that the teachers are still smarting from the loss of their free collective bargaining. I was glad to hear my hon. Friend's policy commitment on behalf of the Opposition.

In my constituency, I have encountered a great deal of resentment and frustration in the teaching force. In many visits to schools throughout Wales, in my constituency and in my LEA of Clywd I repeatedly encounter frustrated head teachers who feel that they and their staff must do more with less for children, the parents and the community. The pressure from local education authority headquarters, and from parents, is growing and is relentless. The staff and the profession are always under pressure to deliver. Most head teachers that I speak to about their problems want, above all, extra staff to deliver the highest standards that they are determined to give to parents and children.

At the heart of the many problems that we face in the service are the massive cuts in the rate support grant over the past nine years. Cuts in RSG in England and Wales have borne down severely on the education service. It is argued that in the Principality some £750 million has been lost in rate support grant since 1979. Much of that grant is earmarked for the education service.

In my constituency and my county of Clwyd, there are now major limitations in nursery schooling. In my constituency, in Buckley, a closure is causing uproar among parents.

The Minister did square up to the issue of teachers' pay and tried to respond to the questions of my hon. Friend the Member for Leeds, Central. But the award just is not enough, because 4·25 per cent. barely maintains the purchasing power of a year earlier, and in effect it

[Mr. Barry Jones]

continues the erosion of the teachers' relative position. It is well below the 6 per cent. negotiated for teachers in Scotland. I do not crib at the Scottish teachers getting that amount, but if the Minister is able to respond, will she say why the teachers in Scotland have obtained a 6 per cent. increase, whereas those in England and Wales will get only 4·25 per cent?

I wish to raise one or two matters covered by the report of the interim advisory committee on school teachers' pay and conditions which was chaired by Lord Chilver. It is an interesting and revealing document which highlights many of the problems faced by the service, and which it would face under any Government. My hon. Friend the Member for Leeds, Central dwelt on the question of morale which is very important if our children are to have the best possible education now and if our country, in the run-up to the next century, is to reorder its economy and cope with the increasing competition in industries throughout the world. The document states:

"We judge that commitment is good"

—among the teaching force—

"but we were concerned to find—especially during our visits to schools—that the morale of many teachers is low."

It continues:

"Many teachers complain of a lack of public appreciation and recognition; they feel that they have been blamed for all the faults of the education system, and expected to implement a succession of initiatives, for which resources and training are limited."

The resentment at limited resources and training is widespread. I do not believe it to be an exaggeration to say that many teachers who I meet frequently are seething with resentment.

The report also considers co-operation and says:

"the co-operation of teachers is essential if the planned changes in education are to be delivered in the classroom. In our view, teachers deserve a fuller measure of public understanding for the difficult role which they will be expected to play in those reforms, and an expression of public appreciation, encouragement and confidence in them."

The Secretary of State and the Minister should take more opportunities to say what the report is saying.

Mr. Mark Fisher (Stoke-on-Trent, Central): They never take such opportunities.

Mr. Jones: Indeed not. The Government have taken the big stick to the profession. They have forgotten that the harder they hit, the lower morale will be, so our children will not get the very best in state schools. I want the Government to end their constant sniping at teachers. They should take the lead and attempt to raise teacher morale.

On quality, the report says:

"there is evidence of a mismatch between the demands of the curriculum and the qualifications of teachers; too many secondary classes are already having to be taught by non-specialist teachers, and the problem seems likely to be exacerbated by the demands of the national curriculum."

I do not believe from any of the utterances of Ministers that I have heard recently that the Government have faced up to the fact that, although they want more from teachers, they are not providing sufficient staff in certain areas. The curriculum is narrowing. That is a feature of secondary schools in Wales and I should be astonished if the same were not true in England. I do not believe that the Government understand the seriousness of the mismatch between the demands of the curriculum and the qualifications of teachers. Teachers and parents tell me of their great regret at the narrowing of the curriculum.

The Government have misjudged the mood of teachers. It appears that they have also underestimated parents' anxieties about the shortages of books and equipment in many schools as instanced in the harrowing details in Her Majesty's inspectorate's annual reports for England and Wales. The Government are understating teachers' difficulties. A large majority in the House has made the Government careless and arrogant, but before long they will pay dearly for their misuse of power.

8.13 pm

Mr. James Pawsey (Rugby and Kenilworth): Perhaps the best answer that I can give the hon. Member for Alyn and Deeside (Mr. Jones) is a quotation from a speech which my right hon. Friend the Secretary of State for Education and Science made only today. The hon. Gentleman accused the Government of sniping at teachers and said that that should stop. My right hon. Friend said:

"I pay tribute to the way very many teachers have responded, despite the difficulties in recent years in the relationship between the Government and some of the teacher unions. I welcome the fact that these difficulties are behind us, and that the teaching profession as a whole has accepted last year's settlement on pay and conditions".

The debate arises on an Opposition motion, but when the hon. Member for Leeds, Central (Mr. Fatchett) rose to open the debate, not one member of his party was present. Indeed, not one member of the SLD was present. There was nobody here to support him. Having heard the hon. Gentleman's speech, I understand why none of his hon. Friends were here. His speech was pedestrian and lack-lustre even by his unexacting standards.

I was pleased to read in a parliamentary answer of 22 June that Lord Chilver has agreed to continue for a second year as chairman of the interim advisory committee on school teachers' pay and conditions. His recent report is detailed and constructive, and it should be commended by the House.

Teacher motivation has attracted the House's attention. While pay is important, it clearly is not everything. It has been said that teachers' morale and motivation have been adversely affected by uncertainty about who is in charge in a school—the local education authority and its officers and elected members, governors with a strong parental element or the head teacher and staff. Each of those groups has duties and responsibilities, but they overlap from time to time. I can illustrate the point by referring to last year's pay report. Few teachers read it because its circulation was somewhat haphazard. The report did not reach the people who were most affected by it. Teachers were left unsure, and to the tender mercies of their trade unions' propaganda and the sometimes ambiguous statements of local education authorities.

Management in schools sometimes leaves something to be desired. An important issue which faces teaching is the need for a clear chain of responsibility so that teachers know who is in charge of the day-to-day running of a school. The vacuum left by the absence of responsibility, authority and good communication is filled by speculation and uncertainty, and where there is uncertainty, rumour will abound. The delegation of more power to schools under the Education Reform Bill will help in that respect.

Lord Chilver and his colleagues on the advisory committee have identified an area that needs attention. I listened with some interest to Opposition Members speaking about negotiating rights. We have heard it all before, but I do not believe that anybody would argue for the return of the discredited Burnham committee. It was a shambles of disagreement and a recipe for dispute. A joint negotiating council would be much the same—it would merely be a son of Burnham. In the end, Burnham was sustained only by the Advisory, Conciliation and Arbitration Service. The advisory committee's report proposes an increase of about 4·25 per cent. on average, which my right hon. Friend has accepted.

Mr. Ashdown: Will the hon. Gentleman give way?

Mr. Pawsey: I shall——

Mr. Ashdown *rose*——

Mr. Pawsey: In a minute. The hon. Gentleman is far too impetuous. I can see that he is giggling all over his face, to use his preferred phrase, but he must contain himself for a moment. It is honestly a pleasure to see the hon. Member for Yeovil (Mr. Ashdown) here participating in our debates. I understand that he has other matters preying more deeply on his mind, but it is good to see him.

Mr. Flannery: The hon. Gentleman was here last night and the night before.

Mr. Pawsey: I will not disagree with that. Why should I? The report to which I referred recommends substantial increases in the number of incentive posts which carry allowances and provide a boost to the good, conscientious teacher. I am happy to say that good, conscientious teachers still remain the majority in their profession.

Most teachers are dedicated to the children in their charge and to their profession. I want to refer to an article that appeared in *The Times Educational Supplement* on 24 June. The article refutes a point made by the hon. Member for Leeds, Central. The article states:

"Certainly the recent pay review has stemmed the flow of good teachers out of schools especially those who work outside London. But it would be an insult to the vast majority of the teaching force if it were suggested that they come into teaching essentially because of money. Most consider their work to be a vocation."

How I applaud the sentiments in that article.

One virtue that springs from the abolition of Burnham and the introduction of the interim advisory committee is that the recruiting and propaganda platform provided by Burnham no longer exists. That platform was used for those purposes by some unions. Interestingly, the unions are no longer as militant as they were. That point was made by my hon. Friend the Member for Pembroke (Mr. Bennett) in his interesting observations.

I notice that the loss of membership in the National Union of Teachers coincides with a reduction in militancy by that union. The more militant, the fewer members. I urge hon. Members to consider that. The dislocation that occurred over 18 months including the half-day strikes was damaging not just to our schoolchildren—and God knows, that was bad enough—but to teachers and their profession. The dislocation reduced their prestige and in turn adversely affected morale.

Pay is not the only and overriding issue. However, the 16·4 per cent. award last year helps to ensure that teachers are appreciated. However, teachers have concerns other than pay. For example, they are apprehensive about school discipline. They are also apprehensive about certain changes in the Education Reform Bill.

Teachers require more reassurance and appreciation. As I said earlier, most teachers do a splendid job. My right hon. Friend the Secretary of State has a persuasive manner. I am sure that he will use that manner to good advantage when he meets members of the profession. I am certain that unless we enjoy the good will of the teaching profession, we shall have difficulty carrying through the reforms in the Education Reform Bill.

I am quite convinced that the Education Reform Bill will substantially improve the quality and standard of state education, where the majority of our children are educated. I am convinced that we shall have the full support of the teachers in this country.

8.23 pm

Mr. Paddy Ashdown (Yeovil): I listened to the hon. Member for Rugby and Kenilworth (Mr. Pawsey) today, as I have listened to him for so long in Committees, with interest, but not much agreement, However, he did get one matter right and he should be congratulated on that. He was blunt enough and accurate enough to give the real increase in teachers' pay. He was right to say that it is 4·25 per cent.

It would benefit the House if he were to take the Minister aside. She is clearly as inaccurate and off the record as she has been so often before. She said that the award was 6 per cent. Of course she was wrong. She has been wrong before. As she will not listen to Opposition Members, it would benefit the hon. Member for Rugby and Kenilworth, hon. Members on both sides of the House and the cause of truth if he were to educate the Minister in this matter. She is clearly not educated. For the record, the award is 4·25 per cent. and not, as the Minister said, 6 per cent. after taking increments away or, as she tried to say, 14·5 per cent. That is a characteristic example of the Government's lack of attention to detail and an example of their characteristic capacity to manipulate figures to make people believe what the Government want them to believe.

We need a clear answer from the Minister on another point. Your predecessor in the Chair, Mr. Deputy Speaker, rightly asked us not to intervene too much. I wanted to intervene in the Minister's speech because we require her to be clear on a specific point. If she provides me with the right answer, I will finish my speech now. The Minister told us that the Government's target date for operating the permanent mechanism is 1990. I will happily give way to the Minister if she will answer me. Does she mean in place by 1989 to deal with 1990 pay or does she mean in place by 1990 to deal with 1991 pay? The Minister was not clear on that. It would benefit the House if she could tell us which of two options is right. The Minister is spending a lot of time thinking about the matter—enough time for her to send a Parliamentary Private Secretary to ask an adviser. Is the target 1989 for 1990 or in place for 1990 to negotiate pay for 1991? We have a right to know.

Hon. Members: Answer.

Mr. Pawsey: The answer will come in the Minister's reply.

Mr. Ashdown: In the interests of time, I would be prepared to finish if the Minister would clarify that point.

[Mr. Ashdown]

It should stand on the record that the Minister does not seem to know the nature of the commitment that she made.

Mr. Pawsey: Wait and see.

Mr. Ashdown: The hon. Member for Rugby and Kenilworth says, "Wait and see." I should not have to wait and see.

The Secretary of State for Education and Science gave a commitment on the record on 5 May last year that the Government were heading for the mechanism to be in place by 1989 to deal with the 1990 pay rise. Is the Minister sticking to that? If so, the House should know. If, on the other hand, the target date that the Minister has put forward is a full year later, the Secretary of State's commitment has not been honoured. The House must take that matter very seriously.

For fear that anyone should doubt what the Secretary of State said, I point out that he said in response to a question from me:

"I do not think that it will be possible to get an agreed new permanent machinery by April 1988. However, that does not mean that we will not be able to get it in place by April 1989 —that is, before 1990"—[*Official Report*, 5 May 1987; Vol. 115, c. 675.]

The Secretary of State declared that as the target. Is the Minister saying that there is a slippage of a year? If so, we have a right to know why.

I do not speak against the motion on the basis that I oppose the Chilver report. I agree with some of the comments. Lord Chilver's report was good and well rehearsed and I am delighted that he had the courage to resist the Government's £300 million limit. Of course we could expect the Government to accept the recommendation, but then cynically to fail to give local education authorities the money to fulfil it.

We also expect the Government to manipulate the level of the pay rises in the way that the Minister has been exposed as doing. Nor will I vote against the principle of incentive allowances, even though the scales that the Government have suggested are very confining. They lack flexibility to such an extent that the headmaster of the comprehensive school which my children attended told me that the allowances are so confining that he has no real chance of allocating them except on the basis of new responsibility.

Lord Chilver commented on precisely the same point, but that is not why I am speaking against the motion. I am doing so because a commitment was made a year ago in the House by the Secretary of State for Education and Science that steps would be taken to put the permanent machinery in place as soon as possible. To honour that commitment, in October 1987 the Government published their proposals and sought responses by January 1988. From that date to this, no discernible movement has taken place. The Minister said that there have been brief discussions; they were very few and very brief. I suspect, as I imagine do teachers and others outside the House, that the failure to meet that commitment was not an accident. The truth of the matter is that the Government want the Gerbil in place so that school governors have the right to remove allowances, to abolish automatic salary increments and to introduce performance pay by stealth before the permanent body is established to reintroduce teachers capacities and to give them some say in their terms and conditions.

I am not, in principle, against a sensible system of performance pay. It must be introduced by consultation and negotiation with teachers, not by stealth. I hope that the Minister will make it clear whether the Government have shifted their target. If they have, they have done so cynically so that conditions will be in force when the permanent body is established, thus undermining the democratic consensus-based system.

Mrs. Rumbold *rose*——

Mr. Ashdown: The hon. Lady has her answer. It has taken her five or six minutes to get the answer from her minders in the Box and, perhaps, as long to digest it. The House awaits, with some anticipation, for her answer.

Mrs. Rumbold: May I read to the hon. Gentleman—who appears to be deaf and dense, among other things —what I clearly said. The Teachers Pay and Conditions Act 1987 made provision for interim arrangements to last until 1990. The Government have always made it clear that that was the target date for establishing and having in place the permanent machinery, and that remains so.

Mr. Ashdown: It has taken the hon. Lady six minutes to get it wrong. I asked her to tell me whether the Government's target is to put the permanent machinery in place, as the Secretary of State said, by April 1989 to deal with pay for 1990 or by 1990 to deal with pay for 1991. It is no good the hon. Lady looking to her minders; they will not give her an answer. She must have sufficient mastery of her brief to allow her to answer one way or the other. I give the hon. Lady the opportunity so to do. Perhaps when she replies to the debate she will have received the answer. Will the machinery be in place by 1989 to deal with pay for 1990 or by 1990 to deal with pay for 1991? In the interests of receiving an answer, and having said what I want to say, I shall finish my remarks.

8.33 pm

Mr. George Walden (Buckingham): I apologise to the hon. Member for Leeds, Central (Mr. Fatchett) for not being present to hear his speech.

We are talking not only about pay but pay and conditions, which are both mentioned in the motion. There are conditions on either side. Teachers' conditions are to supply quality teaching. My hon. Friend the Minister paid tribute to the professionalism of teachers. I understand why she has to say that—it is part of the functions of her job. I draw attention to the report of Her Majesty's inspectorate that was published yesterday. It said that 75 per cent. of the classes that the inspectors attended were guilty of the most heinous education sin —low expectation. It is difficult to square what my hon. Friend the Minister naturally felt obliged to say about the professionalism of teachers with the HMI report, which mentioned low expectation in 75 per cent. of the 8,000 classes that the inspectors attended. That signifies that a basic and fundamental problem of quality remains within the British education system.

I know perfectly well that my hon. Friend and the Government are doing what they can to improve the position, and I know that many teachers are concerned about the quality of their profession, but it is not fair on

the ordinary children who receive state education—who can never aspire to attend a private school and receive a higher quality of education—to delude ourselves that there is an untapped mass of professionalism, when we know perfectly well—it was confirmed by the HMI report—that there is a major problem of low expectation.

The other side of the conditions coin is what teachers are expected to do. If one asks teachers to have higher expectations of their pupils and to compete with the private sector—which is growing, flourishing and producing better standards—one must reduce class sizes. I know that nationally the figures have been decreasing, but they need to decrease further. The size of classes in private schools is normally 14 to 20 pupils. Clearly that is a major advantage for the teacher and brings out the best in him or her. It encourages him or her to demand and receive higher expectations, which are of crucial national importance. I know that the overall record and the pupil-teacher ratios are good, but I should like the size of classes to be reduced further. As the hon. Member for Alyn and Deeside (Mr. Jones) said earlier, it will not be possible for teachers to deliver all the additional effort and professionalism that is rightly being asked of them by the Government, even with smaller classes. Class sizes must reduce further, and if that costs money it will be money well spent. It would have a good effect on the private sector, which at present is having life far too easy. It is impossible to talk about pay without mentioning the quality of teachers and the obligations that class sizes and other problems place on them.

I am convinced by my hon. Friend's remarks about the pay increases teachers received that 4·25 per cent. is reasonable, but I should like to enter one important caveat. It is impossible to discuss this subject without having regard to the whole economy. My hon. Friend said that high inflation damages teachers as much as anyone else, but given the crucial importance that I attach—perhaps privately my hon. Friend does also—to education and the quality of teachers, it would be serious and damaging if we returned to the position of the past when teachers were the only people marching in step and keeping high wage claims down.

I understand the background to this matter and the Treasury's viewpoint—it is responsible to take account of its viewpoint. If we want the élite teaching force that ordinary children—whose parents do not have the money to give them a private education—have a right to expect, we shall have to watch the quality of education, watch class sizes and watch teachers' pay. Teachers should at least be adequately rewarded for their extremely difficult task.

8.39 pm

Mr. Martin Flannery (Sheffield, Hillsborough): It was interesting to see how the hon. Member for Buckingham (Mr. Walden) under-estimated, just as the Minister did, the report from the inspectorate, which said that 25 per cent., not 75 per cent., of teachers were dissatisfied. Like the Minister, the hon. Gentleman has got it the wrong way round in his eagerness to condemn teachers.

It is necessary to give some of the history of what has happened to teachers. Last night, there was a debate about democracy and the failure to consult the teachers' unions and local education authorities. This is a continuation of that debate in different circumstances. The Minister let the cat out of the bag. There is not a semblance of democratic thought in anything that she said. The interim report says:

> "The interim advisory committee was established as a result of a major change in the framework in which the pay and conditions of school teachers in England and Wales are determined."

It speaks of that happening in 1987, but now we have to wait until 1990. Therefore, teachers will have had four years without negotiating rights. It is no wonder that the International Labour Organisation, which is part of the United Nations, condemned the Government for not having a proper negotiating machinery.

The Minister compounded her felony by going on to praise the interim advisory committee. The issue is not whether that advisory committee under Lord Chilver made a good report. It comprised a hand-picked group of people, unelected by anybody and chosen by the Secretary of State. Naturally he chose the members so that they would produce the report that he wanted. People condemned the Burnham committee, but it was an elected body. I was elected to serve on it by the National Union of Teachers. That committee was smashed by the Government. It had weaknesses, but all democracy has weaknesses. The House has weaknesses. Many hon. Members are not here for the debates—often fewer than 25 per cent. of all Members are present.

The teachers' unions asked that, instead of the interim advisory committee, there should be an elected body, which they called the joint national council. The International Labour Organisation watched what was happening and took action. However, it cannot compel the Government to do anything, so the Minister was wrong to say that it connived at this process because it did not interfere. The ILO cannot bludgeon the Government into doing as they are told. It has to watch them and see what they do. I am sure that any honest democrat will agree that it will be a disgrace if the teachers have no negotiating machinery for four years. Well over 100 years of free negotiations have been cast aside, and this order continues that felony, despite the fact that it is possible to have proper negotiations.

This lack of negotiating rights is wrong and will have profound effects. The teachers were defeated after they were provoked into action by the pitiful wages they were being paid, so they are now in a difficult position. However, they have a democratic approach to the problem that the Government do not have, and a lack of democracy will always catch up with a Government. The Government are arrogant and over-proud because of their huge majority, but in time this will catch up on them.

The hard facts about wages have not been given. My hon. Friend the Member for Alyn and Deeside (Mr. Jones) gave some of the figures when he talked about an increase of 4·25 per cent. and the hon. Member for Yeovil (Mr. Ashdown) noticed the 6 per cent. mistake that the Minister had made. The Scottish teachers have got 6 per cent., and good luck to them. However, it has not yet been mentioned that the national average wage increase is 8·5 per cent., so a 4·25 per cent. increase for the teachers takes them back a year. The teachers are rightly angry about that.

The teachers have repeatedly asked to see the Secretary of State, but he has repeatedly put them off. He was asked at the beginning of the year and spoke about 29 January. He was asked later and told the deputy general secretary of the NUT that the meeting would happen in a month or

[Mr. Martin Flannery]

two. Then, he said that it would happen a bit later, and then he said it would happen in June. It has not happened, so there has been no negotiation and only a report from an unelected body. No matter how good that report might be, it has come from an undemocratic body.

We would like from the Minister an answer to the question that the hon. Member for Yeovil asked many times. Will the teachers spend three years with no negotiating rights, or four years? If it is to be four years after assurances that it would be three, who knows whether it will not be five years? Who knows whether the Government will not go on in the same old way because of their huge majority?

Although we shall not vote against the order, it must be pointed out that it is a continuation of a lack of democracy in dealing with a long-established profession. No amount of slanging about that profession or against teachers will do anything to alter that.

Mr. Walden: Will the hon. Gentleman give way?

Mr. Flannery: I am about to finish so that another hon. Member can speak.

Will the Government extend democracy or will they carry on with no democracy for the teaching profession? If they do the latter, it will catch up with them in the long run because a lack of democracy always catches up with those who engage in it.

8.46 pm

Mrs. Rumbold: With the leave of the House, may I say that the Government are as keen as anyone else to have some organisation to negotiate pay and conditions for teachers in a way that is satisfactory to the profession, to the local authorities and to the Government. With that in mind, we wish to embark as soon as possible on serious discussions with the various parties whom we hope will come together eventually with a proper negotiating group.

In case the hon. Member for Yeovil (Mr. Ashdown) does not understand this, it is not possible to have negotiations in 1990 with a negotiating body unless such a body has been thought through and some conclusions have been reached by the end of 1989. The Government have given that commitment already, and that is the answer to his question. In other words, if there are to be negotiations on pay and conditions, there must be negotiating machinery.

Mr. Fisher: Will the hon. Lady give way?

Mrs. Rumbold: I have only a few minutes to reply, so I shall not give way.

It has been alleged on a number of occasions that teachers' pay has not been increased by more than 4 per cent. The average main scale teachers' pay will rise by just under 4 per cent. as a result of increments, but it is important to remember that teachers' pay has also increased by 4·25 per cent. across the board. By anybody's reckoning, this leads to an increase of more than 4 per cent. for everybody, because teachers are not all paid at the same rate all the way through.

Mr. Christopher Gill (Ludlow): It may be convenient for the House to know that a head teacher on the maximum scale earns nearly £32,000 a year. Will my hon. Friend confirm that the teacher on the top of the scale —not a head or a deputy head—will be earning nearly £14,000 with possibly £4,500 extra as a result of the incentive allowance?

Mrs. Rumbold: In fairness, the heads and deputy head teachers have not managed to receive as high increments as the rest of the profession as a result of the pay round. Therefore, although my hon. Friend the Member for Ludlow (Mr. Gill) is correct, it was the principal task of the interim advisory committee to consider the main group in the profession.

I do not accept the allegation that the Government are not considering seriously the establishment of proper negotiating machinery for the teaching profession. I also do not accept that the Government have not thought carefully about the rewards for the teaching profession's hard work, given that, in the past three years, they have received a 25 per cent. pay increase as a result of restructuring. On top of that, this year, teachers have received an increase of more than 4 per cent. plus increments representing a further 4 per cent. increase. I believe that that is a good and adequate payment for the hard work that teachers do.

8.50 pm

Mr. Fatchett: With the leave of the House, I shall reply. The hon. Member for Buckingham (Mr. Walden) made an appropriate and necessary contribution to this debate. It is sad that that speech did not come from the Minister. The hon. Gentleman spoke about the need for professionalism and the need to reward it, which affects morale and recruitment. Such issues are crucial and have been spotlighted by the interim advisory committee. It is a shame that the Minister did not respond in accordance with the importance of those issues.

It is also a shame that, yet again, the Minister was dismally inept in discussing when the negotiating machinery will be in place and the Government's intentions. The Secretary of State made it clear, in response to the hon. Member for Yeovil (Mr. Ashdown), that it was the Government's intention to establish that negotiating machinery by April 1989. Every word that the Minister has uttered has suggested that that is no longer the Government's intention. We must either reach that conclusion or conclude, as was self-evident during the passage of the Education Reform Bill, that the Minister does not understand her brief and does not understand the issues involved.

The Minister also failed to understand the importance of democratic collective bargaining rights for teachers. The loss of those rights goes to the heart of the collapse of teacher morale and the Minister——

It being one and a half hours after the commencement of proceedings on the motion, MR. DEPUTY SPEAKER, *pursuant to the Order [22 July], put the Question.*

Question negatived.

Building Societies

8.52 pm

Mr. Chris Smith (Islington, South and Finsbury): I beg to move,

That an humble Address be presented to Her Majesty, praying that the Building Societies (Transfer of Business) Regulations 1988 (S.I., 1988, No. 1153), dated 4th July 1988, a copy of which was laid before this House on 5th July, be annulled.

The Building Societies (Transfer of Business) Regulations set out some of the detailed procedure that must be followed and the information provided when a building society wishes to convert to plc status. We remain fundamentally opposed to conversion and we have made our views especially clear in view of the current rush by Abbey National to convert.

A mutual society is owned by its members and is answerable to them. It has no shareholders and it folds all its surpluses back into the running and prosperity of the society. As a result of the regulations, a society has ample powers to compete flexibly and fairly with banks and other financial institutions.

It is worth mentioning that our scepticism about the necessity for conversion of the building societies is shared by a number of Conservative Members. I studied the debates that took place on 4 June 1986 when the Building Societies Bill was considered on Report and Third Reading. The hon. Member for Southend, East (Mr. Taylor) referred to the ability of foreign banks to buy up converted building societies as, "a real threat." The hon. Member for Mid-Staffordshire (Mr. Heddle) spoke about conversion and the loss of mutuality and said:

"If that sense of mutuality is broken . . . that link of loyalty, which is inestimable, will be broken."

The hon. Member for High Peak (Mr. Hawkins) asked:

"why do we want to allow companies which are not building societies to buy building societies?"—[*Official Report*, 4 June 1986; Vol. 98, c. 939-41.]

The hon. Member for Uxbridge (Mr. Shersby) also spoke against the idea of conversion. Therefore, it is clear that there is widespread unease about the prospect of building societies, with all the benefits that mutuality brings, converting into plcs and becoming just like any other financial institution.

If, however, conversion is proposed by the board of a society we must be certain that the case for and against is put impartially to the members of that society before they vote. That is what the regulations are all about. We feel that they go some way towards ensuring fairness and partiality, but nowhere near far enough. It sets out the information that is required to be given in detail to the members of the society—borrowers and investors—before they vote.

I received a letter dated 8 July from the deputy chairman of the Building Societies Commission. That letter sets out the commission's view with admirable clarity and it is worth quoting. The deputy chairman said:

"This statement"—

the statement presented to members by the board of a society—

"will have to present all material facts relating to the proposals in clear and unambiguous terms so that the members can base their decisions on how to vote on an objective view of the consequences of conversion for members and employees."

That is the intention of the Building Societies Commission and also the intention of the regulations. The letter continues:

"When the Commission approves these statements, it will be concerned to ensure that a fair balance is drawn between a clear presentation of all the material facts and masses of detail which might obscure the central issues."

There can be little quarrel with that. That statement is fine as far as it goes, but what would happen if the Building Societies Commission approves the statement that the board proposes to send out to members but, as the result of its issue, there are serious objections from many quarters among the society's membership that it has not presented an entirely fair and balanced case?

What are the real chances of the Building Societies Commission using the powers that are available to it to refuse confirmation of the conversion? They are negligible, because it is impossible for the Building Societies Commission to be both judge and jury in its own scrutiny, which is precisely what the legislation seeks to make it. It is worth pointing out in passing that too little time was allowed between the draft statutory instrument being circulated for comment and the final version being decided upon. The group of Abbey National members—the Abbey Members Against Flotation—who have been waging a valiant campaign as David pitted against the Goliath of the board of Abbey National, made their detailed representations at a meeting with the Building Societies Commission late one week, and the final version of the statutory instrument was published the following week. So there was not enough time to take account of the detailed objections that they had to this instrument——

Mr. John Butterfill (Bournemouth, West): Of the 6,500,000 members of Abbey National, how many are represented by the body to which the hon. Gentleman has referred? How many turned up at their recent meeting?

Mr. Smith: Quite a large number turned up at the meeting, which I think took place last weekend. There are several hundred members in the organisation and that number is growing weekly. They began their campaign against flotation only a few months ago; their resources are severely limited: they have been afforded no facilities by Abbey National to contact members; and they have been refused permission to place their leaflets in building society branches to enable them to contact more members. In view of all that, their record is fairly creditable, and their arguments have been put with skill and vigour, in spite of their seemingly small numbers, to which the hon. Gentleman is doubtless attempting to draw attention.

Mr. Butterfill: Would it be correct to say that there were 60 members at the last meeting?

Mr. Smith: I was not present at the meeting, so I cannot confirm or deny that number. If it is correct, it was still a creditable turnout, which may well have been much larger than the turnout at meetings of Conservative associations around the country.

I come now to the crucial issue of how tough these provisions are. I am forced to the conclusion that they are not tough or strict enough. We must remember that the board of the society will put the case to its members. It will send out the information and, having decided to recommend conversion, it will tend to put the case in a partisan way. Let us consider the mailing that Abbey National recently sent out to all its members—at their

[Mr. Smith]

expense, because the funds for it came from the funds of the society. The cost was considerable. The brochure that Abbey National sent out asked one or two questions that had been raised by members who were anxious about the process of flotation. The answers are thin to say the least. For example, to the question

"What would be the basis for allocating the shares in the PLC?"

the response is:

"An acceptable scheme will have to be worked out".

A few lines further on the brochure states:

"we would recognise Members' rights in an appropriate way."

What on earth is that supposed to mean? What sort of guidance can that statement give members about the board's intentions?

Further on in the document, the arguments for converting to plc status seem to be that

"None of the business we do today is safe from competition. Our ability to compete on equal terms with our large financial institutions is still restricted."

No mention there of the decisions that have already been taken by the Halifax and the Nationwide Anglia building societies—that their powers are ample to enable them to compete effectively. They have a flexible enough regime to be able to prosper without conversion.

However, the Abbey National says:

"we must recognise the highly competitive reality of today and build for a prosperous future."

It is like listening to speeches from Ministers at Conservative party conferences. There is no solid content to the document. Apart from having a patronising tone, it is verbose, repetitive and gives almost no concrete reasons about why conversion to plc status is a suitable and sensible option for Abbey National members.

The document is also very one-sided. The chief executive of the Abbey National seems to be rather proud of that. In an article that he wrote in *The Independent* of 18 July he said:

"They have been receiving"—

that is, Abbey National members—

"the first of several mailings that will set out the arguments that have convinced the Abbey National board that conversion into a plc offers the best opportunities for the future."

That was the chief executive's statement about the intention and content of the first of a number of mailings that Abbey National members will receive. Where is the two-sided balance? The chief executive says that the board will set out the argument that conversion offers the best opportunities for the future. In other words, the mailings will be entirely in favour of the recommendations that the board wants to put to members.

That leads me to the first of my four principal demands of the Government, which seek to improve and toughen the regulations over the next few months. My first demand is that the necessity for impartiality and balance should apply not just to the final transfer statement that is made to members when they are on the point of voting but to all documents sent out to members during the flotation campaign. If an argument were needed for that, the Abbey National has just supplied us with it. If there is no requirement for balance from day one of the campaign, members will be deluged with mountains of propaganda from the board telling them—at their own expense—how wonderful the idea of conversion is, long before they receive the supposedly balanced statement. It is important that there should be balance throughout the process rather than just at the end of it.

My second demand is that there should be an independent auditors' validation of all the financial information provided to members, not only those aspects of information that are covered by the provisions of paragraph 14(a) of part I of the schedule to the regulations. The provisions of that paragraph mean that paragraph 8 of part I, which refers to

"The future financial prospects of the successor company",

is omitted from the auditors' required assessment. We see no reason for that omission.

Mr. Butterfill: Is it not true that, in addition to the requirements of the transfer statement, there will be a requirement to obtain the approval of the Bank of England to achieve the objectives of the flotation? Will not the information required by the Bank of England be considerably more onerous than is likely to be required by almost any other document?

Mr. Smith: That is correct. However, we are discussing the information that is available to members of the society. I should have thought that it was unarguable that the members of the society should be assured that the information that they receive has been properly validated. That is what we request.

Thirdly, we would want to see a truly independent assessment of all the aspects and consequences of conversion, financial and non-financial, to be sent out to all members. If possible, it should be drawn up by the Building Societies Commission after consultation with groups of members opposed to flotation. It should be sent out alongside the statement made by the board. It should not be left just to the board to mount its case. If we need an argument for that, the Abbey National literature stands testament to it, as does the Abbey National's board's refusal to allow the use of facilities in its branches, at public meetings it intends to hold around the country and within its own mailing. It has denied any such facilities to any group of members of Abbey National opposed to flotation.

Fourthly, the information to be provided to members should be in plain layman's language. Many of the provisions of transfer will inevitably be complex. It is important that members have an understandable set of provisions upon which they can make a judgment.

Those are all improvements that should be made to the regulations. We shall not divide the House, because the regulations go a substantial way towards ensuring the balance we seek. However, supplementary provisions could be brought forward in due course to ensure that the improvements that we believe are necessary are made.

The Lex column at the back of the *Financial Times* is always worth reading. It is a column of considerable percipience. I shall watch with interest to see what it has to say tomorrow about today's news that the balance of payments deficit for June has gone over the £1 billion mark. It is yet further confirmation of the trend in the economy about which we have been warning Conservative Members and the Chancellor of the Exchequer for some considerable time.

On 21 July the Lex column said:

"The clearing banks have demonstrably failed to prove that their access to the capital markets has improved their

performance, and the mutual Scottish life companies often provide a much better service than their joint stock competitors."

That is absolutely right. In terms of money management and service to their customers, the mutual societies within the insurance world perform much better on the whole than those that have attained plc status. The Lex column continues:

"mutual status provides a kind of financial discipline on management which is sorely missing elsewhere."

Lex was absolutely right. There is virtually nothing to be gained and much to be lost when mutual status disappears. At the very least we must ensure that the case for or against flotation is not presented in a loaded manner but is properly, fully and fairly put. We need tougher regulations to ensure that that happens. Building society members must not be dragooned into voting the way the board wants.

9.15 pm

Mr. John Butterfill (Bournemouth, West): I am puzzled that the hon. Member for Islington, South and Finsbury (Mr. Smith) should assert that mutual status is so entirely desirable. One of the great criticisms that have been levelled at the building society movement, although it has done great work, is that it is effectively accountable to no one and that the boards of building societies have, in many cases, become self-perpetuating oligarchies simply because the representation of their members is so difficult to achieve in any effective way. The boards have effectively been able to do what they wish. Any proposal to make building society boards more accountable must, therefore, have some advantage. I am by no means totally persuaded that it would be in the best interests of this country as a whole if all our building societies went down the route of flotation.

On the other hand, it is right that different companies and their respective boards should take different views on that. What the Halifax board may decide may be quite different from what the Abbey National board decides, and that is an entirely healthy situation. There should be room for difference of opinion as to which is the best way to proceed to maintain one's competitiveness in a market in which all sorts of players who were not even envisaged a few years ago are now playing. Large American banks and Japanese organisations, such as Sumitomo and Continental, mortgage and bond-issuing houses, are now in a market that was traditionally filled by the building societies. It is right that we should be giving the building societies at least the power to respond in the way that their boards think fit.

I am also convinced that we should do that only if adequate controls exist. The controls contained in the regulations before us tonight are more than adequate. The hon. Member for Islington, South and Finsbury mentioned the requirements of the schedule in terms of the information to be given to members. Paragraph 1, which relates to the consequences of the transfer, states that the consequences are required to be given

"for members holding shares in the society;"

for borrowing members of the society; and, because the consequences will be different for them, for the employees.

I understand that the Building Societies Commission has made it clear that any statement produced will need to be a fair and balanced statement, giving the case from all sides. I believe that I am correct in saying that Michael Bridgeman has written a letter to the Abbey National requiring that. I am led to suspect, therefore, that the concerns expressed by the Opposition this evening stem more from their reluctance to see new private sector companies being created than from anything else. There is more than a suspicion in the case of the Abbey National that AMAF—Abbey Members Against Flotation—may be substantially organised by the Labour party.

Mr. Chris Smith: The hon. Gentleman must not be allowed to get away with that. I have had considerable contact over a number of weeks with key members of AMAF. Many of them would be outraged by such a suggestion as the hon. Gentleman has just made. I live in hope that they may in due course see the light and come to support the Labour party, but the hon. Gentleman's statement is completely incorrect.

Mr. Butterfill: I am sorry that the hon. Gentleman takes exception to what I said. Perhaps I can try to justify my suspicions. The hon. Gentleman must correct me if anything that I say is incorrect. I believe that the chairman of AMAF is a Mr. Alec Leaver, who is a prominent member of the Labour party and a former trade union official. I believe that one of the most active members of AMAF is Mr. Peter Lowndes, who I believe is a research assistant to the hon. Members for Redcar (Ms. Mowlam) and for Fife, Central (Mr. McLeish). Another leading light in AMAF is a Mr. Hugh Raven who I believe is a research assistant to the hon. Member for Islington, South and Finsbury.

Mr. Smith: The hon. Gentleman is totally factually incorrect. Mr. Hugh Raven is indeed my research assistant, but he is not a member of AMAF. He has had a number of discussions with AMAF in preparation for this debate, and others, as I have had with Abbey National board members. He is certainly not a member of it, and to describe him as a leading activist is incorrect. I must ask the hon. Gentleman to withdraw that remark.

Mr. Butterfill: I am grateful to the hon. Gentleman for that assurance. I accept what he says. I understand, however, that Mr. Hugh Raven has been taking part in the meetings of AMAF. I am sure that the hon. Gentleman will tell me if he has not been present at those meetings. As I understand it, Mr. Peter Lowndes is a member of the AMAF committee. Mr. Lowndes is the research assistant to the hon. Members for Redcar and for Fife, Central. I shall give way to the hon. Member for Islington, South and Finsbury if he wishes to deny that.

Mr. Smith: The hon. Gentleman is developing an extremely thin argument. He has established so far that two members of the AMAF committee happen to be members of the Labour party. I suggest that that is no argument to support his outrageous statement.

Mr. Butterfill: I thought that I had established that three of them were, including the chairman and at least one member of the committee, and that two of them were closely associated with leading Labour Members. It is that, combined with the fact that AMAF was able to muster only 60 people at its meeting—that must be set against 5·5 million investing members and 1 million borrowing members—that leads me to have some scepticism about AMAF's right to speak for Abbey National members. It leads me to support the view of the Abbey National board that AMAF's suggestion that the AMAF statement

[Mr. Butterfill]

should be sent out along with the transfer statement to all Abbey National members would be to give AMAF a prominence which would not be entirely deserved or reflected by its membership or supporters.

Be that as it may, that which is proposed in the regulations is entirely reasonable. It will give more than adequate safeguards to any potential investor. It will certainly give more than adequate information to the existing members of any building society. Therefore, I commend the regulations to the House.

9.23 pm

The Economic Secretary to the Treasury (Mr. Peter Lilley): The questions whether a building society should convert into a public limited company and, if so, how the process should be regulated are important ones. It is right that the House should discuss them before departing for the summer. I welcome the opportunity to contribute to the debate.

The Building Societies Act 1986 gives building societies the option to convert from mutually owned institutions into plcs if they and their members believe that it is in their interests to do so. I am sure that it is right that the option to convert should be available. It is right also that the decision on conversion should be made by society members and no one else.

The Government's position on any particular proposal to convert is a simple one—we are neutral. The Government wish neither to encourage nor to discourage conversion. The Government want the choice to convert to be made on a level playing field according to fair rules. The Act empowers the Building Societies Commission, with the consent of the Treasury, to set out such rules in the form of transfer regulations, and that is what we are considering.

The regulations have been made after wide and extensive discussions with all concerned, including, as the hon. Member for Islington, South and Finsbury (Mr. Smith) mentioned, the members of the organisation entitled Abbey Members Against Flotation. I understand that that group was given the opportunity to comment on the draft regulations soon after it was formed, and it has acknowledged that its comments were taken into account. The consultation process has been continuing since the first paper was issued in 1987, with draft regulations being issued in December 1987. Therefore, the views of all concerned expressed during that long consultation process have been taken into account in the final regulations laid before the House.

The regulations cover three major areas and a number of minor areas. First, they provide for the continuity of agreements, documents, rights and liabilities from the society to its successor company. They thereby ensure that, for example, mortgage contracts are unaffected by conversion. The successor company simply steps into the society's shoes. Secondly, the regulations deal with the priority liquidation rights of former members of a society that converts. Thirdly, and most important, the regulations set out the matters to be included in the transfer statement that must be sent to members of the society considering conversion. The purpose of that statement is to give members a clear and balanced presentation of all the material facts that they will need to know before making up their minds on which way to vote. It cannot be circulated until it has been approved by the Building Societies Commission.

The main requirement is that the statement shall give an explanation of the consequences, both positive and negative, of conversion for the members, borrowers and employees of the society. It will have to cover, for example, the treatment of investment and mortgage accounts and employment prospects. The society's financial record and present position will have to be set out, together with particulars of the proposed business plans of the successor company and forecasts of its future financial prospects. Those will be certified by a qualified auditor.

The hon. Member for Islington, South and Finsbury (Mr. Smith) mentioned item 8 of part I of the schedule, concerning future financial prospects, and asked that it, too, be audited. It is not really appropriate to audit a forecast, but the commission will ensure that the requirements of regulation 3(2)—specifying all necessary assumptions, who made them, and who will stand by them —are incorporated in the transfer document. That meets the spirit of the hon. Gentleman's point.

I shall not enumerate all the items listed in the schedule which it is required that the transfer document contains, as they are clearly specified therein. The schedule to the regulations is intended to be comprehensive, but, in addition, the commission has the power to require other matters not specified in the schedule to be included in a transfer statement if the commission thinks that that would be appropriate in a particular case.

The hon. Member for Islington, South and Finsbury has taken up the idea that, in addition to being required to circulate all that information, societies should be obliged to circulate the views of members opposed to flotation. I do not believe that that proposal is either necessary or practical. The regulations and the commission together provide powerful safeguards against a society tempted to put only partial and one-sided information to its members. It is not reasonable to require a society to circulate all its members with the views of every opponent, at any length and regardless of cost.

However, it is worth noting that the Building Societies Act 1986 requires that if a group of 50 members propose a resolution at the AGM, the society must circulate not only that resolution but a copy of a short statement of up to 100 words to all members qualified to vote, provided that the resolution and statement are not frivolous and would not damage confidence in the society. Therefore, a small group of members can have their views circulated to thousands or even millions of their fellow members. A group of 100 members can also requisition a special meeting of the society if they think fit.

The hon. Member for Islington, South and Finsbury called for transfer documents to be certified as fair and accurate by an independent person, or for a parallel document to be produced and certified as fair and accurate by an independent person. As I have already said, the transfer document must itself be approved by the Building Societies Commission before it can be sent to members. Therefore, it will be subject to scrutiny by an independent body to ensure that it is fair and accurate. The commission is the only body empowered to undertake that function, and it is a very suitable one for the commission. Moreover, the financial information contained in the statement must be certified by a qualified auditor.

The hon. Member for Islington, South and Finsbury also wanted similar vetting and objectivity requirements applied to all statements made by the society prior to the issue of the transfer document. I do not think that that would be reasonable or sensible. The management of a building society has been selected by members of the society and entrusted to manage and lead it. It is only reasonable that the management should be given a free hand to give a lead without every statement being censored while its critics and opponents are free from such restriction in general discussion that may last for months before the transfer documents are ready.

Under the Building Societies Act 1986, the management, rightly, has a considerable hurdle to jump before conversion can be carried through. Not a simple majority but a 75 per cent. majority of investing members of the society is required to support conversion. A minimum of 20 per cent., a substantial number in many instances, must take part in the vote, and 50 per cent. of voting borrowers must also support the conversion. I do not feel that it would be reasonable to require the management, prior to that, to maintain an almost monk-like silence unless every word has been vetted.

In any event, once resolutions have been passed the transfer still cannot go ahead until the commission has confirmed it, and it cannot do that if it considers that the vote does not represent the views of the members. In that case, it will hold a hearing at which objectors will have an opportunity to say if they do not believe that the vote was carried out fairly, or if any material information was withheld or misrepresented in the transfer statement. If the commission is persuaded that material information was withheld, it will not grant the conversion before taking remedial action.

Another matter that has caused concern is the possibility of takeovers once a society has converted. The Act does not set out all the details of the new company's articles of association; however, they must incorporate protective provisions that prevent any one person from holding more than 15 per cent. of the shares for the first five years of the successor company. Those provisions are intended to give societies a reasonable breathing space after conversion without the threat of a change in control, so that they can adapt to their new environment of company and banking legislation. Those are important conditions. We consider it right that the institutions involved should have a limited period of stability after conversion, free from the threat of takeovers, and that they should adopt such measures as are necessary to maintain their independence during that period.

Mr. Jim Cousins (Newcastle upon Tyne, Central): Can the Minister tell us whether the important, if now somewhat neglected, aspect of mutual status—the right of members to put resolutions to the meetings—will be preserved in the company status that will result if building societies take advantage of the opportunities that the regulations provide? Will members find themselves in the position in which I found myself as a shareholder in Beecham? I was unable to participate in the annual general meeting to protest at Beecham's contributions to the Conservative party because under the company's rules the backing of 2 per cent. of shareholders was required in order to put a resolution. That would probably require the presence of more than 100,000 people.

Mr. Lilley: The successor society will be a company under the Companies Act. Members of that company will therefore have the rights of any members of such a company, plus any rights granted by the articles of association that will be presented to them in the transfer period.

Mr. Chris Smith: Will the Minister confirm that after conversion a building society would be answerable to its shareholders and only to its shareholders? That would not necessarily include, as membership does at the moment, all borrowers and investors.

Mr. Lilley: That is the very essence of conversion. Any borrower or investor would be able to buy shares and become a voting member, or in the process of conversion he might acquire or be given such shares. That is a factor that members will have to take into account when they decide whether it is right for them to convert. If they like the total package, they will support it. If they do not like it, they will not support it. That is up to them, and we believe that it should be left up to them.

This is not a party political matter. It is for the members of each society to reach a decision in the context of a fair set of rules and regulations that ensure that all material considerations are made clear to them during the discussions. It would be regrettable if it were to become a party political matter. I am glad that the hon. Member for Islington, South and Finsbury has not sought to politicise it to any great degree. By promising not to oppose the regulations the hon. Gentleman has recognised that they pave the way for fair consideration of decisions that should be made by members of each society, not by hon. Members.

Mr. Butterfill: Does my hon. Friend agree that in order to protect the interests of society members they will be given priority rights in the event of a liquidation after conversion?

Mr. Lilley: That is correct. That is laid down in the Act, and the regulations specify how liquidation rights are to be calculated and secured. Society members will retain those rights after conversion. I hope that the House will not annul the regulations.

9.37 pm

Mr. Malcolm Bruce (Gordon): I listened with care and interest to the Minister's speech. His latter remarks will be welcomed by all hon. Members, but a few points need to be elaborated.

The Economic Secretary said that mortgage contracts will be unaffected by transfer. I accept that that is correct, but I am sure that he agrees that the future conduct and performance of a building society, once it has become a corporate entity, could affect the rate of interest that the building society, or the incorporated bank as it would then be, might subsequently charge. When voting, society members should take that fact into account.

The Economic Secretary also said that managements have been entrusted with the duty of leading building societies and that it should be accepted that managements have leadership qualities. Again that is not in dispute, but to run a building society as a mutual body is quite different from running it as a bank. A few commentators have said that that could make the switch very difficult. The management of a building society, which is very competent

[Mr. Malcolm Bruce]

at running a mutual society, could unwittingly lead its members into taking commercial risks for the commercial consequences of which they are not prepared because they lack the necessary expertise. Managers of building societies are not bankers, yet the transfer will convert them into bankers without necessarily providing them with the necessary wisdom and experience to be bankers. That fact must also be borne in mind by all society members when voting for or against conversion.

I do not wish to enter into the debate about whether a particular society—for example, the Abbey National—will serve its existing members and its own future interests better by conversion. I would be very disappointed if that was the course of action that all building societies might wish to follow like gadarene swine. I hope that the Economic Secretary will accept the need for diversity of choice. Putting it bluntly, if we simply converted all building societies into joint stock banks, we would reduce rather than increase the diversity of choice. I hope that as the regulations progress that will be borne in mind.

I anticipate that the Government may take the view that the market and the customers' wishes will automatically determine that. But experience shows that that is not necessarily so. There are fashions in market trends and economic developments change. It would be unfortunate, particularly as building societies vary enormously in size, capability, experience and geographical base—I hope it would not happen—if building societies sought to abandon their commitment to a particular locality. There is merit in a building society having a regional base which it knows and understands, and that is not necessarily a disadvantage.

To some extent, if building societies are likely to convert to a banking mechanism—and I understand the pressures on them to do that—it would be nice to think that some of them might convert to local banks with a particular local knowledge and regional expertise. That would ensure that the changes and the dynamism that is operating within the market led to increased choice, diversity and variety. I hope that the Government and their supporters genuinely wish that to happen but accept that simply saying that the members should be allowed to make their own decisions will not necessarily produce the desired result.

There is no doubt that the current or previous operation of the Building Societies Act has been unduly restrictive and has prevented building societies from moving into related areas. In previous years, it has led to nonsense whereby people who thought that they were mutual members of a building society because they were savers found that they were precluded from acquiring a mortgage or changing their mortgage because of the restrictions that were imposed on building societies. I have been in that situation, and I quite understand that members of building societies do not regard that as an impressive example of the flexibility and function of a building society.

I do not wish to oppose the regulations, and I accept the qualifications that the Economic Secretary has made. I simply wish to make the marker that, as we move into increasing diversity and flexibility, with which building societies are allowed to respond to the developments within banking, I hope that we do not lose sight of the fact that there is benefit in mutuality and in having local and regional knowledge. The best result of the regulations will be if some opt to take advantage of the regulations and move in different directions so that we continue to have a diversified system of mortgages and banking which is national and regional and offers a genuine choice rather than a bland, across-the-board picture which makes choosing between one society or bank and another a lottery that makes no difference.

Real choice matters. The regulations do not preclude choice; they extend choice. But we should be aware of the dangers of opening up too quickly and leading too many building societies down a similar path and so restricting diversity.

9.43 pm

Mr. Chris Smith: I should like to comment briefly on two points which have arisen during the debate, and first to take up the argument made by the hon. Member for Bournemouth, West (Mr. Butterfill). In an uncharacteristic display of incompetence, he departed from the Minister's injunction that this was not a party political matter and sought to characterise it as a party political matter.

The hon. Gentleman based his entire argument—that the regulations provide more than adequate safeguards—on a rather cack-handed attempt to besmirch one organisation, for which I hold no brief, that has engaged in a campaign against the flotation of Abbey National. His was an inaccurate and rather unfair attempt to rest an argument on flimsy foundations.

Mr. William Cash (Stafford): The hon. Gentleman may not be aware that my family founded the Abbey National building society. I believe that the object of the regulations would be much approved by its founders, as they were criticised in the 1870s because they were supposed to be taking away from smaller societies the opportunity to look after their investors. Does the hon. Gentleman agree that, as we approach 1992, it is important that building societies should compete and that they should be able to provide the kind of service which is relevant to the late 19th and 20th centuries?

Mr. Smith: I should have known that an hon. Member with the hon. Gentleman's name was part of a family which founded a major financial institution. The hon. Gentleman is correct. We trawled over this subject at considerable length a few weeks ago when we considered a statutory instrument. I said clearly that there is a need for building societies to compete in the modern financial world and that that instrument gave building societies the opportunity and flexibility that they require to do that. There is no need to convert to achieve what the hon. Gentleman wants.

The Economic Secretary said that it would not be reasonable or sensible to place a duty of impartiality on the board of a building society when sending out literature before the final transfer document. It is Abbey National's stated intention to put out several pieces of literature before the final transfer document. We believe that it is sensible and reasonable to put a duty of impartiality on it. The Economic Secretary said that, if we did that, the board would be censored but its critics would not. We should remember, however, that the board sends out literature at the members' expense. It is members, through the society,

who fund such literature, whereas any opposing literature is paid for entirely out of the pockets of the members involved. That is a crucial difference.

Mr. Butterfill: Will the hon. Gentleman give way?

Mr. Smith: No. I am drawing to a conclusion.

I hope that the Economic Secretary's mind is not closed on this matter and that he will consider it during the summer recess. It is an important matter, and I hope that, although we shall allow the regulations to go through without a Division, we shall be able to consider closely any possible and necessary improvements to the procedures for conversion.

Question put and negatived.

Road Transport

9.49 pm

The Parliamentary Under-Secretary of State for Transport (Mr. Peter Bottomley): I beg to move,

That this House takes note of European Community Document No. 6048/88 on social legislation relating to road transport.

In December 1985 the EC approved two regulations —3820/85 and 3821/85—prescribing the maximum permitted driving hours and minimum rest periods for drivers of goods and passenger vehicles, and providing for the use of tachographs for checking drivers' activities. The House debated the regulations in draft form in March 1984 and the related Transport Act 1968 regulations on 15 July 1986. Those concerted regulations, which apply to both domestic and international driving, came into effect on 29 September 1986.

The EC regulations were in many ways a "British kilometre post" or a "European milestone". Against the decision by the Council of Ministers in May 1985 to implement the single market by 1992, they were an attempt to provide harmonised rules on driving in the interests of fair competition, improved working conditions and road safety, while at the same time providing sufficient flexibility to meet the diverse needs of a modern transport industry. Those regulations were not everything that the United Kingdom Government would have wished. They represented the results of over two years' difficult negotiation with other member states in Europe. But as a package, they were acceptable to us.

The draft proposals that we are considering tonight, those contained in EC document 6048/88, have two strands. Both relate to the 1985 regulations. First, there is a proposed directive aimed at better enforcement of the regulations. Making sure that the agreed rules are complied with by means of more and standard checking procedures must be in everyone's interest. The Government fully support the aims underlying the directive on checking procedures. The second strand is the proposal for a new regulation amending the regulations. The Government are opposed to the proposed changes to the existing regulations.

The drivers' hours and tachograph regulations have three main objectives—to promote road safety by requiring drivers to have adequate rest and breaks and preventing excessive driving, to ensure that competition between hauliers and coach operators in this area is fair and on a common basis, and to give drivers reasonable conditions of work and leisure and prevent their exploitation.

To achieve those objectives within what the regulations provide for, efficient, effective checking on a standardised basis by all member states is necessary. The directive sets out to achieve that. It has been discussed in detail by officials in Brussels and was considered by the Council of Ministers in Luxembourg on 20 June. There is widespread support. Agreement on the details is close, but it cannot be approved until Parliament has pronounced on the requirements. The opinion of the European Parliament is also required. In explaining the draft directive to the House, I will endeavour to indicate where modifications to the Commission's proposals contained in document 6048/88 are contemplated by the Council.

Mr. Teddy Taylor (Southend, East): I was delighted to hear my hon. Friend the Minister say that nothing could happen until the House of Commons did something. Is this not one of the matters covered by article 100A whereby it can be considered by a majority vote? Or am I quite wrong in that?

Mr. Bottomley: I am not sure. If I can give my hon. Friend an answer in a moment, I will. I would prefer to explain why the——

Mr. Taylor: My hon. Friend does not know. That is outrageous.

Mr. Bottomley: My hon. Friend has asked me a question. Perhaps I might be allowed to respond in my own way to the question he has chosen to ask.

The first part of what is proposed is acceptable, subject to minor modifications. The second part is not only not acceptable to us, but we think will be unacceptable to all member states. Therefore, the point raised by my hon. Friend does not appear to be terribly relevant.

The main substance of the directive is contained in draft article 3. This specifies—article 3(1)—the annual level of checking to be carried out by member states—30 per cent. of vehicles in circulation and 30 per cent. of operators. Modifications to this have been suggested and the Council looked favourably on an alternative of checking 1 per cent. of working days carried out under regulations 3820 and 3821 in each country as represented by the daily tachograph charts. At least 15 per cent. of the checking of charts under the alternative regime would have to be carried out at the roadside. Neither the Commission's original requirement nor the alternative proposal would cause difficulties for the United Kindom. Our checking is done by the Department of Transport and Northern Ireland traffic examiners as well as by police officers. The Department of Transport's national enforcement plan sets out, among other things, the checking requirements for traffic examiners. They will meet the levels proposed in the directive. We are planning to check over 1 million daily tachograph charts a year.

Articles 3(2) to 3(6) specify that the checks should be carried out at the roadside and at the operators' premises, and give the items to be considered by investigating officers. Modifications considered by the Council would further amplify these requirements by giving better and more detailed guidance on what these checks should entail, which would be useful.

Article 3(7) requires the numbers and results of checks to be conveyed to the Commission annually. We consider that this requirement is already present in article 16 of EC regulation 3820/85.

Article 3(8) requires authorities to carry out checks at operators' premises at the request of another member state concerned. This would cause no difficulty for the United Kingdom. We consider such co-operation necessary to prevent those who abuse the rules escaping detection by crossing national borders.

More general requirements for simultaneous checking operations and the exchange of data between member states are set out in articles 4 and 5. Article 4 requires member states to carry out simultaneous checks on four specified days each year. While we support the underlying idea of highlighting the importance of checking and demonstrating member states' commitment to it, we feel that to pre-advertise the dates of the combined operations would be somewhat naive. I suspect that this is one of the points that my hon. Friend the Member for Southend, East (Mr. Taylor) had in mind. The Council has considered an alternative whereby member states would carry out at least twice-yearly concerted operations with at least one other member state. This would be a better arrangement. I suspect that those who break the rules would think that it is a worse arrangement, which is one of the reasons why we support it.

Article 5 specifies the data that are to be exchanged between member states on breaches of the regulations. Article 17(3) of regulation 3820/85 and article 19(3) of regulation 3821/85 already require data exchange, and we consider the further proposed provisions to be unnecessary. The Council has considered an alternative which would simply specify that the bilateral data exchanges under the present regulations should take place every 12 months, while allowing other specific requests on demand. This is a better and more flexible solution.

Articles 1, 6 and 7 are purely definitional and procedural. Article 2 lays down 1 January 1989 as the date for implementing the directive. Again, this would cause no problems for the United Kingdom.

The Government's position on the proposed directive is one of support, subject only to the minor modifications I have outlined. Enforcement of the rules is crucial. I feel confident that the House will want to give its support to the objective of achieving better standardised checking procedures among all EC member states. The draft regulation in EC document 6048/88 would have the effect of amending the present regulations 3820 and 3821/85. The House will note that the intention of the proposal is to

"clarify certain definitions in order to avoid misinterpretation and abuse."

This is a laudable aim, but examination of the draft articles shows that either the real aim or the effect is to change radically the present regulations.

Agreement on regulations 3820 and 3821 came only after more than two years of hard and detailed discussions in Brussels. Both sides of industry were consulted during those discussions. In those negotiations we could not expect to have it all our own way, but there were positive results. Benefits for drivers were increased weekly rest, up from 40 to 45 hours, and decreased driving, down from 92 to 90 hours in a fortnight. Benefits for operators were increased operational flexibility, with the ability to increase daily driving from 9 to 10 hours twice a week, and to postpone part of daily and weekly rest subject to later compensation for the drivers. Both sides would have wanted more, but the new rules represented a reasonable, hard-won compromise arrived at between member states and, overall, the best deal we could negotiate for both sides of the road and passenger transport industries.

The regulations were implemented less than two years ago. Quite significant costs were involved in implementation. It meant retraining the whole of the work force in the freight and passenger industries as well as officers in the enforcement agencies. Those costs were borne by Government, operators, unions and police forces. They applied not just here but across the whole of the Community. It is too soon to contemplate radical changes, and that is what the small print of the draft regulations implies.

Sir Geoffrey Finsberg (Hampstead and Highgate): My hon. Friend listed all the organs that had to pay the cost of this. Has he not missed out the most important one —the consumer, to whom all the costs are, in the end, passed on?

Mr. Bottomley: I apologise to the House for dealing with the technical issues in the main. When I was taking the draft regulations through the House, as the hon. Member for Stretford (Mr. Lloyd) will acknowledge, I made it clear that the aim was not to increase costs to consumers or the end users of the transport industry but to provide flexibility, as we called it. The Transport and General Workers Union, and some who spoke in support of its views from the Opposition Benches, argued for a relaxation of drivers' hours regulations and the abolition of some of the duty hours requirements. During those debates, there was no suggestion of increased costs to those paying for road haulage. My argument was to allow flexibility so that drivers would not be faced with ludicrous situations. For example, a driver might run out of hours half an hour's drive away from the depot. He would have to ring up the depot manager, who would come out in a car. The driver would drive the car back and the manager would drive the truck back. Such situations are ludicrous, even before we move on to the provisions in the new regulations.

My hon. Friend has rightly made a point that the Government take seriously and, if there were a choice, we would want to ensure that we were taking cost compliance analysis fully into account. The House can be assured that this issue comes up neither under these regulations nor in the changes that came two years ago. No doubt the hon. Member for Stretford will correct me if I am wrong on that.

I was explaining why the second part of the draft directive is wrong. It comes too soon because the industry is just beginning to settle down under the new rules, because industry and Governments—not just this one—should not be asked to bear the additional cost that would be involved and because the changes proposed would bring no new benefits and would in fact bring disbenefits. To put it less diplomatically, it is just wrong and should not happen.

In opening up the regulations for revision, as is proposed in the draft regulation, it is not certain that the United Kingdom could retain some of those important points, hard won in negotiations last time round. The draft regulation has not been considered in detail by officials in Brussels or by the Council. It would seem that it commands no significant measure of support among member states. I hope that my hon. Friend the Member for Southend, East will accept this point. The answer to his question, which I should have been able to answer immediately, is that the directive and regulations would be subject to majority voting by the Council, if necessary. I hope that my speech has made it plain that this is not necessary and that the unacceptable second half does not have support, while the acceptable first part does.

Many of the difficulties arise in the context of definitional points contained in article 1. This would change the present definition of the "week" from the fixed period between midnight Sunday to midnight of the following Sunday to any period of seven days, this period starting when the driver starts driving following a weekly rest period. It is difficult to see any benefit whatsoever in this change. It would be to revert to the position that existed before regulation 3820. The "fixed week" was introduced in the present regulations to counteract the abuses under the "rolling week" system. The proposal would simply reintroduce those abuses. If every driver has a different starting point for calculating weekly rest and compensation requirements, the difficulties of both comprehension for drivers and enforcement are enormous. That was the position which existed before September 1986. At a more practical level, the change would involve altering the software systems used for computer scanning of charts by enforcement agencies and commercial bureaux. I do not regard that as the most important reason for imposing this definitional change in the regulation to change the regulations.

Article 2 refers to the mandatory exemption from the social regulations of vehicles used for sewage, flood protection, water, gas and so on. It seeks to limit this exemption to vehicles used by public authorities or under contract to public authorities. The present regulations exempt all vehicles carrying out the specified transport operations. We fought hard to achieve that during the earlier negotiations. If private operators are competing with public authorities for the same work, they must compete on equal terms. That is fundamental to this Government's policy and the requirements of the single market. We would not find the proposed amendment acceptable.

Article 3—amending article 6 of the existing regulations —would limit driving to nine hours—10 hours twice a week—in any 24-hour period. The present regulations define these driving period limits as coming between daily rest periods. This amendment would prevent a driver who had driven for nine hours and then taken an 11-hour daily rest from driving again for another four hours. That seems to be an attempt not only to limit driving, but to limit total working duty time. The House will recall that that was raised during the discussions of regulation 3820 but found no support among member states. We would not wish to see duty limits reintroduced through the back door by this proposed regulation.

There is a great deal more at this level of detail inherent in the draft amending regulation. I would be willing to explain further if the House wishes. I have probably sufficiently demonstrated the point that if the laudable aim of the draft regulation were to clarify definitional points, the draft before the House is flawed. I would not claim that the regulations as we have them are perfect, but they represent a reasonable compromise set of rules capable of practical enforcement. If and when the draft regulations come forward for detailed discussion in Brussels, the United Kingdom Government would wish to make the points I have explained to the House.

10.6 pm

Mr. Tony Lloyd (Stretford): The hon. Member for Hampstead and Highgate (Sir G. Finsberg) asked about consumer interests, but the other interest that should be taken into account in our discussions is road safety.

We must establish a balance between the number of hours that drivers work and the costs to industry and the consumer, while ensuring that drivers are not forced to work overlong hours. I am sure that the hon. Gentleman would agree that that is in everyone's interests. In 1984, in

[Mr. Tony Lloyd]

a transport debate, the Minister of State, Department of Transport, now Minister of State, Foreign and Commonwealth Office, said:

"There is no disagreement about the broad objectives of the regulations. Since the 1930s, Governments of all complexions have recognised that commercial pressures can lead transport operators and drivers to indulge in excessive driving that can endanger both themselves and other road users . . . one's own common sense is enough to show that tired drivers are dangerous."—[*Official Report*, 3 December 1984; Vol. 69, c. 132.]

I agree with the Minister that the regulations, in common with a lot of European legislation that comes before the House, are not helpful. It is a mystery to me why there is such mad pressure to introduce some sort of European standardisation when it would not be in the interests of the consumer or road safety.

The way in which this matter will be dealt with by the Council of Ministers is important. I hope that when the crunch comes the British Government—should they find themselves isolated—will be able to prevent the introduction of the regulations.

The directive is a different matter and it contains some things of merit. However, the Minister is right to draw attention to the nonsensical idea of having four days a year.——

Mr. Peter Bottomley: Eurodays.

Mr. Lloyd: Yes, Eurodays on which the forces of law, order and enlightenment will move to prevent abuse by the already extremely suspicious travelling commercial traffic. It is obvious that they will be just as prepared for those Eurodays as the Department of Transport. It is a ludicrous idea and why the Commission put it in the directive is a mystery.

It would be wrong not to acknowledge the sense of the Commission's suggestion that about 30 per cent. of vehicles should be checked every year. The Minister claimed that the Department would have no problems with that, but I am a little more sceptical. I know that the Department of Transport insists that it is on the way to being able to check such numbers, but I am not sure whether that is based on accurate statistics of how many vehicles are already checked. There are considerable difficulties with enforcement. The number of traffic inspectors is relatively small—perhaps fewer than 200 are in charge not only of enforcing tachograph compliance, but of the overloading of lorries and so on, all of which takes considerable time.

In June this year Department of Transport inspectors, in co-operation with the police, cracked down on foreign vehicles on the M1. It was found that about nine out of 10 of them were in breach of regulations of one sort or another—not all to do with tachographs. If we are serious about enforcement we shall need more traffic inspectors, and unless the Minister can tell the House that the money and political will are available for such enforcement, by providing more inspectors, it will not take place.

The aim of checking 30 per cent. of vehicles a year is laudable, but enforcement is bedevilled by various factors, including the growth of international traffic. With the approach of 1992 and of much traffic from the non-English speaking world, Britain's police will face considerable problems. I note in the directive the suggestion that police should be issued with a language chart which will allow them to converse at least at a basic level with non-English speaking drivers—or with those who choose to be non-English speaking when their vehicles are pulled up at the roadside. I am assured that the scheme operates successfully in Germany, where the police have comprehensive language charts that allow them to monitor and enforce their traffic regulations. That is not done here, so I urge the Minister to give serious consideration to the quality of the charts for his inspectors and the police who will be involved.

I also draw the House's attention to another point raised by the Minister—the connection between roadside checks and checks at premises. It is critical that both are done. Roadside checks are important, but if there is no follow-through at the place of work where the tachograph records are kept for a longer period there can and will be widespread abuse of the system.

It might be useful if I mentioned to the Minister an amendment to the directive that was proposed in the European Parliament by a Labour Member, who said that it would make sense to have a regulation that made it compulsory for all drivers to be issued with consecutively numbered record tachograph discs, so that when stopped drivers would have to show—this could easily be checked—their tachograph records. Otherwise, they could say that they had slipped in new ones five minutes before and did not have the other ones because they had just taken over their cabs. It is important that such physical checks take place.

The relevant trade unions, which have always taken a line that is undeniably related to the safety of their members and that would avoid their being pressurised by their employers, have told me that it would be valuable if the discs were signed by an authorised employee of the company concerned. The argument runs that an authorised signature would wonderfully concentrate the minds of those involved, and there would be no systematic attempt to abuse the tachograph system. Such abuse is unfortunately all too prevalent now.

I want to make a number of points on the existing situation. The Minister has drawn attention to the importance of recognising how impractical the proposed new regulations are, but it is equally important to recognise the problems of the present system. There is no particular merit in the European Commission's proposal. The Commission has not helped us, but we must recognise that there is the potential—some would suggest that it exists already—for large-scale abuse.

Mr. Peter Bottomley: Is the hon. Gentleman suggesting that tachograph charts should be signed by the operator when they are issued to the driver or when they have been checked by the operator after being used by the driver?

Mr. Lloyd: Both. It would be helpful if the company took steps to guarantee that the discs issued to drivers were recorded and that they were signed back in at the end. That would establish a proper mechanism by which to check which discs went out.

There are abuses of the present regulations. Under the present system there is a global limit of 90 hours over two weeks and an allocation of up to 56 hours in any one week. It is difficult to avoid the possibility of a driver working 56 hours in two consecutive weeks. In the first week of a four-week cycle he could operate for only 34 hours a week, allowing him to operate for 56 hours in the second and

third weeks, to be followed by 34 hours in the fourth week. That is against the spirit and perhaps even the letter of the regulations. However, without enforcement, that is difficult to stop.

Article 3 provides for limited driving periods of 56 hours for one week or 90 hours for two weeks. Does that mean any period of two weeks, however defined, or two consecutive weeks? That may be a question of semantics, but it is not unimportant if a driver operates 56 hours on two consecutive weeks.

In the same vein, there is a real question about rest periods. The Minister said that he did not want to reintroduce the old system of duty hours through the back door. Nevertheless, there is a widespread practice of getting round the regulations whereby a driver uses his rest period for loading and unloading so that rather than being a rest period it is merely a period during which the tachograph is not operating.

It is important that the rest period should be a physical break, not simply an alternative form of work. Drivers can operate many hours a day while still complying strictly with the letter of the regulations. Fatigue is dangerous, as the then Minister for Public Transport said in 1984. That fatigue is dangerous whether it is caused by loading and unloading or by driving. I hope that the Minister will address that point.

It has also been suggested that there is fairly wide abuse of the tachograph system in terms of the weekly break entitlement. It is possible to ask a driver to pull over to the side of the road, but the driver's tachograph record over a long period is not always examined. The weekly break entitlement of 45 hours is spelt out in the regulations, but, because it is possible to take advantage of the exemptions and move to a 36-hour break, or even, in some circumstances, a 24-hour break, drivers can regularly operate with 36-hour or 24-hour breaks without compensating in the following weeks, and that is a widespread abuse.

There is some advantage in article 5 of the Commission's regulations because that makes it clear that any compensation has to take place in the following week, not simply over a prolonged period. That depends on the mechanisms for enforcement. I hope that the Minister will turn his attention to how that breach of the regulations could be avoided.

I should like to put a technical point. Under article 4 the break of 45 minutes in every four and a half hours driving period would have to be taken within that period. The present position is that the 45-minute break can be taken after the four and a half hour driving period. There is a difference of interpretation between the police and the Department of Transport. The police argue—they are supported by some of the trade unions—that for every four and a half hour driving period there should be a 45-minute break. The Department of Transport seems to argue that as long as the 45-minute break is taken after the initial four and a half hours, it is possible to continue the rest of the nine or 10 hour driving period without any extra break. To that extent there would be an advantage in the idea promoted by the Commission that the 45-minute break should be integrated into the four and a half hour period. It would avoid dispute between the Department of Transport and the police. On this issue I think that the Department of Transport is wrong.

This is a fairly technical debate, but it is important because we are talking about road safety. I have already made it clear that I do not see the relevance of the European Commission's proposals for new regulations. However, some aspects would be useful. The Minister should continue with his declared intention to ignore the Commission on the regulations. I note that tonight the Prime Minister was distancing herself significantly from the European Commission. I am sure that that will give heart to some Conservative Members. On that issue, if not on much else, I have some sympathy with the Prime Minister's position. The Minister should note the position of his leader and make it clear to the Commission that the regulations would be dangerous in terms of what we are trying to promote. However, I hope that he will accept that it would be sensible to introduce some aspects into the British legal system because they would enhance road safety in Britain.

10.23 pm

Mr. Teddy Taylor (Southend, East): I want to ask three specific questions. The Commission's proposals on driving hours are outrageous. The starting and finishing times for weekly and daily driving would become less suited to the irregular patterns of work within the road haulage and passenger transport industries as would the compensating rest period arrangement. I agree with what my hon. Friend the Minister said about the outrageous proposals.

How will the regulations be determined? I have become concerned—from what she said today it seems that my right hon. Friend the Prime Minister is also concerned—about the attitude of Ministers in the Council to the issue of majority voting or unanimity. The Prime Minister said that she is concerned that some of the directives coming before the Council are unsuited to common sense and to the interests of the United Kingdom. When we discuss the directives I ask Ministers repeatedly whether we are dealing with an issue of majority voting or unanimity. The Minister, as always, has been extremely courteous and said that this was an issue for majority voting.

The biggest worry is that the Commission in its quest for an extension of its powers is forcing, under article 100A, issues that should never be matters for majority voting. I suspect that the proposals should probably be dealt with under article 75, which would, according to the paper, have been an issue for majority voting and that the proposals are simply an extension or clarification of the 1985 regulations on driving hours.

Whenever proposals come up before the Council, the Government must first ask whether there will be an unanimous or a majority vote. If the Government take the view that the decision should not be taken by a majority vote, they must challenge the decision at the first instance because, unless the challenge is issued immediately, it is impossible to alter the basis of the consideration, unless there is unanimity in the Council.

Even if the provisions will not be effective—I suspect that they may come under the treaty of Rome's regional article 75—I ask my hon. Friend the Minister and his colleagues to inquire about the basis of voting before discussions start. If they do not, they may find themselves with their trousers down, having something pushed through by majority vote. I appeal to the Minister to have a word with the Home Secretary on the issue of summer

[Mr. Teddy Taylor]

time which was found out, belatedly, to have been decided on the basis of majority voting. It is too late to change that, unless everyone else agrees.

Perhaps my hon. Friend the Minister will tell us what was the view about article 2 of those who were at the Council meeting. The most worrying things about the proceedings in the Commission are the extension of Socialism and the favours for public enterprises. The Minister will know that, in almost every aspect of the Commission's current policies, we see all the things that we thought a Thatcherite Government were against—extension of subsidy, control, centralisation and protectionism. The Minister must surely be aware that the Commission, under the present leadership, and the Council are forcing through measures that we in this country have fought against.

My hon. Friend the Minister will be aware that, for example, local authorities are now instructed that they must put services out to competitive tender to ensure a fair balance of decision-making, but, if he looks at article 2, he will see that there is a specific proposal that private contractors should not be treated in the same way as public authorities. I appeal to him to look at page 7 of the document where it states specifically that article 2 would amend article 4

"by excluding from its scope only those vehicles used by Public Authorities or under contract to Public Authorities in connection with the provision of the public services listed in paragraph 6."

It goes on to state that

"With the increasing 'privatisation' of public services, this ensures that private operators who provide such services are not exempt . . . unless they are under contract to Public Authorities."

I appeal to my hon. Friend the Minister to say what were the views of the various members of the Council on article 2, which is simply an extension of Socialism and undermines a Bill that the Government fought hard to get through this Parliament. The Minister must be well aware that under majority voting, although drivers' hours themselves may be rejected, it is possible for some compromise to be brought forward which might include something of that sort. I hope that the Minister is watching that, and that he can give us some kind of assurance.

I also appeal to my hon. Friend the Minister to tell us what he means by saying that we must ensure that enforcement is improved. He must know what the rules are and what is happening. He must know some of the standard stories that I have been passing on to him, for example, about Southend. He will know from his colleagues and from Ministers in the Foreign Office, who have been helping me, that although Community regulations made it an essential part of Community law that a bus could go from Ostend to Frankfurt, there were discussions four years ago between the Foreign Secretary and Herr Genscher, who was then the appropriate German Minister. The Minister will know that the Minister of State, Foreign and Commonwealth Office took infraction proceedings at the Commission and that there were flights across the sea to German Departments, but that there was constant blockage against Community rules. The final blockage was when the authorities in Frankfurt claimed that they could not find a parking space for the bus.

My hon. Friend the Minister may also be aware from a question that I asked this week that a firm called Upsons in Southend runs splendid buses to Germany. The company has been astonished to find out that it is now being charged a levy of so much per metre, per passenger for taking a bus into Germany. If we are to have equal treatment and fairness, it is unlikely to be lawful for that to be done.

My hon. Friend the Minister will be aware that a rather different attitude is adopted to transport regulations from that adopted to other regulations. I hope that he will come to Kent to see some of the ports where we have the appropriate arrangements for testing vehicles that come from abroad. He should ask some of the operators and inspectors about the percentage of vehicles found not to conform with the current regulations.

I hope that the Minister will think about my three questions and give me some assurances. I ask him to clarify the status of the proposal to amend European Community document No. 3820/85. Is it dead? Will the Council not discuss it again? Is the Council planning a mini-directive to cover only certain parts of the document? It is rather a sad moment for parliamentary sovereignty, this being a day when my right hon. Friend the Prime Minister has made some splendid remarks about Parliament's control of this sort of matter. We are discussing an issue which was discussed in the Community on 20 June. We want merely to know what the next step will be. Is the issue dead or is it still alive? Will we see a mini-directive, with article 2 being passed by a majority vote?

10.31 pm

Mr. David Marshall (Glasgow, Shettleston): As my hon. Friend the Member for Stretford (Mr. Lloyd) has made most of the main points, I wish to ask the Minister only four simple questions, which I hope he will answer.

First, will it be possible for a driver to work two weeks of 56 hours each back to back, and to continue to do so?

Mr. Peter Bottomley: No.

Mr. Marshall: Thank you. Secondly, can the Minister guarantee enforcement of the regulations? There are only about 200 Department of Transport inspectors. How will he manage to achieve his target of 1 million checks per annum? Is that figure sufficient? It will amount only to about a 30 per cent. check. Should not the Minister be setting his sights higher?

Mr. Tony Lloyd: My hon. Friend has asked an important question about 56-hour back-to-back weeks. Would he care to——

Mr. Bottomley: Will the hon. Gentleman give way?

Mr. Lloyd: With respect, I do not think that I am in a position to do so.

Would my hon. Friend the Member for Glasgow, Shettleston (Mr. Marshall) care to press the Minister on the issue? The Minister maintains that the regulations will prevent the working of 56-hour back-to-back weeks, but are the enforcement provisions sufficient to guarantee that a driver who is confronted with two 56-hour weeks will not say, "Of course, I am going to work the two weeks." Enforcement is important.

Mr. Marshall: Some of us have doubts about the sufficiency of the enforcement provisions. The Minister may be able——

Mr. Bottomley: I am sorry that the hon. Member for Stretford (Mr. Lloyd) would not allow me to intervene. I am grateful to the hon. Member for Glasgow, Shettleston (Mr. Marshall) for allowing me to do so. The hon. Member for Shettleston has more courtesy than the hon. Member for Stretford.

Madam Deputy Speaker (Miss Betty Boothroyd): Order. The hon. Member for Stretford (Mr. Lloyd) was intervening in the speech of the hon. Member for Glasgow, Shettleston (Mr. Marshall) when the Minister asked him to give way. That is why the hon. Member for Stretford did not give way.

Mr. Bottomley: I did not think that I would get away with that observation, Madam Deputy Speaker.

There cannot be more than 90 hours worked in any fortnight. That means that anyone who works two 56-hour weeks back to back is breaking the law. Sadly, we have begun to learn—if we did not know before—that passing laws does not make people obey the law. We know, however, that there cannot be total enforcement, for that would mean that nothing else would happen. We must create the right conditions and penalties so that individuals find that the chances of being caught, multiplied by the penalty, bring them into the paths of righteousness.

Mr. Marshall: I have my doubts. I think that there will still be a temptation to break the law.

Thirdly, I ask the Minister to estimate the increased costs that will be incurred by the road haulage and coach industries, and by Government, who will be responsible for implementing the regulations.

Fourthly, thousands of overloaded lorries are entering Britain. If the inspectors are spending all their time checking drivers' hours, how will they be able to check vehicles to ensure that they are not overloaded, especially those that are carrying hazardous and toxic substances or dangerous chemicals? What measures does the Minister propose to take to prevent overloaded lorries entering and leaving Britain in even greater numbers when inspectors are spending all their time checking drivers' hours?

[Mr. Marshall]

10.35 pm

Mr. William Cash (Stafford): My hon. Friend the Minister has told us that steps are being taken under article 100A. I have said on many occasions as a member of the Select Committee on European Legislation that the expenditure memorandum, copies of which we have been supplied with, states clearly that matters are proceeding under article 75. I have great difficulty in understanding how that switch is taking place. One can only conclude that it is more convenient to deal with it under article 100A, for the reason that it will be dealt with by majority voting. On 23 June, an article of mine appeared in *The Times* in which I clearly stated that I was very concerned about the way in which this matter was proceeding. There is increasing evidence of creeping federalism in Europe.

It may be that at this late hour this is a glazed-eye subject, and that it is just too boring for the British Parliament, whereas this issue is being suborned—and this is just one instance of it—by a system within which there is an increasing tendency for the Commission to take more and more power over this Parliament. We must face the fact that that is happening.

The Prime Minister has made her own position entirely clear. She is deeply concerned about that drift. M. Delors of the European Commission has made it clear that he wants European government. I am not—emphatically not—against the European Community. Nor am I against sensible conclusions, some of which may have to be discussed and negotiated within the Council of Ministers. What I am against is the apparent bypassing of the House in respect of important legislation. A matter of this kind would be dealt with in a Bill on a line-by-line basis. Instead, we are presented with a series of continuing documents, which come before the Select Committee on European Legislation, and which are then referred back to the House at a late hour, when they are not capable of being intelligently discussed. I note that my hon. Friends seated behind me are nodding in approval at what I say, for the simple reason that what I say is absolutely true. There is no question about it.

Even in our own governmental paragraph, under the heading "Policy Implications" there is almost total condemnation of the provisions we are now considering. However, my hon. Friend the Minister, understandably, has made the best of the dog's dinner with which he has been provided. He has said that there are two halves——

Mr. Peter Bottomley: My hon. Friend is absolutely right in saying that some of this is absolute nonsense. However, it is clear which bits are nonsense and which are not. The reason why I am delighted to move the motion is that we want support in achieving the sensible bits, and support in getting rid of the nonsense.

Mr. Cash: I am delighted to hear my hon. Friend say that. He is receiving great support from me in making the argument for continuing opposition to those parts which, from the point of view of the consumer, and from that of my hon. Friends the Members for Hampstead and Highgate (Sir G. Finsberg) and for Southend, East (Mr. Taylor), contain a considerable amount of nonsense. It is nonsense of a kind that would do credit to Edward Lear.

As I recently stated in a memorandum I wrote on this very subject, I hope that my hon. Friend the Minister will be able to return to Brussels in the knowledge that the United Kingdom Parliament profoundly disagrees with the nonsensical parts of the provisions.

Mr. Tony Lloyd: I hope that I am not beating the hon. Gentleman to his punch, but he makes an important point. It is not good enough to acknowledge that some parts of the provisions are nonsensical and to seek agreement at Council of Ministers level or wherever. It is important that Parliament should recognise that, almost by definition, much of this legislation—whether it concerns traffic regulations or any other matter—is totally irrelevant. The hon. Gentleman addressed a point of principle about which areas are sovereign.

Perhaps the Minister will address another question. Given that the Prime Minister has placed on record the fact that she is extremely suspicious of this creeping federalism, to use the hon. Gentleman's own phrase, why does she not do something serious about it, because she is head of the Government?

Mr. Cash: The plain fact is that we have passed the Single European Act, and within the context of that Act are provisions that are subject to majority voting.

According to the explanatory memorandum, these measures are being taken under article 75. In his introduction, however, the Minister said that they were being taken under article 100A. The Select Committee on European Legislation—I was present at both sessions—recently cross-examined the Treasury solicitor on the use and misuse of article 100A. The Minister may or may not know—I am telling him because it is something with which the Committee is familiar—of the increasing tendency for the Commission to say, "We want the Common Market to operate." We in the United Kingdom Parliament also want the Single European Act to work effectively, but if there is a tendency for article 100A to be misused, we are forced to abide by majority decisions that may be invoked in a manner that is—to use the technical expression—ultra vires.

How can we deal with that? Not by saying, "Oh, well, that is just too bad; it is ultra vires." We must go off to the European Court for the matter to be determined on judicial review, in the context of the powers of the Court of Justice and article 177 of the treaty of Rome. We are in a new ball game. It is a question not of whether the House wants something done, but of viewing the matter through the telescope of the treaty of Rome and working out whether we are in a position to defend ourselves after the event.

If the Minister has grave doubts about whether the policy implications of his document dated 13 June suggest that the nonsensical parts should be dealt with effectively, he has no option but to take appropriate action in the Court of Justice. That appears to be the only means by which we can retrieve the situation at this stage. It is not good enough for us to wring our hands in the House and to say that we do not like this, that or the other.

Will the Minister bear in mind that a great deal of time would be saved, over and over again, if the United Kingdom Parliament were brought into consideration of these questions earlier rather than at this late hour? I notice my hon. Friend the Minister looking at his watch, and I do not blame him. We would then be in a position

to influence such consideration. Matters of this kind that would otherwise be dealt with by a billion Parliaments on a line-by-line basis should not be dealt with in such a truncated fashion.

If we are to do what the Prime Minister wants us to do, for heaven's sake let us consider the legislation earlier and in a proper way. By improving the scrutiny process of the European Legislation Committee and other Select Committees, we may at last be able to retrieve some of the power that has moved from this House.

10.43 pm

Mr. Roger King (Birmingham, Northfield): I heartily endorse what my hon. Friend the Member for Stafford (Mr. Cash) has said. I was gratified to hear my hon. Friend the Minister comment on some aspects of the proposed change in the legislation, especially those relating to article 1.

Let me first declare an interest, as I want to mention a specific example of how badly article 1 will affect the operator concerned if it becomes law. I am a non-executive director of National Express Ltd., which is one of the success stories of the Government's deregulation policy in that it is now a privatised business and performs a vital and valuable function for the community.

A few facts and figures will give the House some idea of the extent to which this operator—the biggest national operator—has grown during the last few years. It carries 15 million passengers a year and its vehicles travel 5 million miles a week. There are 1,500 services and 900 coaches. It is an extensive operation. That does not include the Scottish City Link partner, which has about 150 coaches. It is a much smaller operation but it is extremely important. It is a unique European organisation. Its services are interlinked. They convey passengers from Penzance to John o'Groats and right across the country. They go to parts of the country that British Rail cannot reach and they are provided at a price with which the user is well satisfied.

The cost to the company and to other coach operators of having to accept article 1 and a return to the rolling seven-day week would be substantial. As the services are interlinked, to have drivers and those who run the coaches starting their weeks at different times and on different days would make it very difficult for the company to get the drivers on the right services at the right time.

When the European Commission looked at this aspect I do not think that it was aware of the extent of this type of operation, thanks to our policy of deregulation and free enterprise. There is no equivalent operation on mainland Europe. More power to my hon. Friend's elbow in combating the effects of article 1. It will only lead to passengers having to pay considerably more if article 1, the rolling seven-day week, has to be implemented.

Mr. Cash: Can my hon. Friend say how the Council of Ministers would be able to deal with his point?

Mr. King: I regret that I cannot answer my hon. Friend's question. I am presenting a factual case that I hope my hon. Friend the Minister will take on board and use in evidence to the European Commission. I hope he will say that there are exceptions to what is happening elsewhere in Europe and that our Government's deregulation policy will almost certainly be extended to Europe in 1992 when European operators develop similar systems.

The rules are designed to ensure safety. Despite all the miles covered and the number of passengers carried, I am happy to be able to tell the House that according to the statistics with which the company has supplied me nobody has been injured or killed in the last two years. Many people believe that coaches are unsafe and that they are more prone to accidents than other forms of travel, but the facts do not support that belief. Coaches provide a particularly safe form of travel. I hope the company's record of nobody having been injured or killed in the last two years will continue indefinitely. The safety of passengers must come first. The present rules and regulations came into effect two years ago. They have probably played their part in ensuring a high standard of safety.

It seems to me that there is often wide discrepancy between how each country interprets the spirit of the rules that are laid down. An olympic contestant has been banned from competing for life because he took steroids, yet some other European countries might not have inflicted such a high price. Russian children are probably fed steroids for breakfast. The requirements are laid down generally and we are all supposed to obey them, but some member states—and ours in particular—are a little more disciplined than other countries in enforcing them. Can we be sure that Spain will adopt the same determination to check vehicles, to look at tachographs and to implement safety requirements? The existing European laws say that it should, but there is some argument as to how conscientious some of our European partners are in containing drivers' hours, vehicle weights and so on.

Mr. Cash: Does my hon. Friend accept that it is not simply a question whether the member states can look into these matters; that it involves their manpower, whether they can afford to do that, and whether the European Commission can provide the level playing field that is supposed to result from the proposals? Fair competition is not possible without an enormous amount of extra bureaucracy and expense for the member states and the consumers, unless there are sufficient people to make sure that the laws are being exercised in a manner which is fair to all.

Mr. King: I agree with my hon. Friend. I am not suggesting that there should not be European laws. We want to get those laws absolutely right. Of course their implementation will vary from state to state, depending on financial ability and the determination to police those laws, but that does not remove the necessity of having laws that are sensible and are worth implementing. We require uniformity across Europe for the standards whereby we produce, trade and provide services, but that may take some time.

The proposals that we are considering do not go very far to establish a broad consensus as to how we should regulate drivers' hours. As I have illustrated, in the United Kingdom there are circumstances which make the implementation of the rolling seven-day week which the European Commission would like, very difficult and wholly unneccessary.

10.53 pm

Mr. Peter Bottomley: I remind those who read *Hansard* that our debate has shown that the House of Commons, on both sides and in many ways, takes seriously its debates on European draft directives. A variety of points have been made. We have heard the major constitutional points, which may be seen to follow from the Single European Act. Other issues have been brought forward concerning precisely when a three-quarter hour break may come in a four and a half hour driving period. We have heard examples from the Opposition spokesman, the hon. Member for Stretford (Mr. Lloyd), from the Chairman of the Select Committee and from my hon. Friends who have spoken for the general interests of drivers and for the coach industry. I also understand that our debates are of concern to people in other parts of the country. I had to decide whether to wear my Transport and General Workers Union tie or my United Road Transport Union tie today. I am not a member of the URTU. I was sent a tie because it was rather jealous that I was always wearing the TGWU one.

I look forward to Friday when, at the suggestion of a member of the national executive of the TGWU road haulage section, I shall go and see it at work in west London. I suspect that I shall not hear too many complaints about the regulations that were taken through the House two years ago. There may be some, but in general we have managed to combine safety with flexibility.

The hon. Member for Stretford rightly reminded us that this is, in effect, a continuation of yesterday's debate on transport safety. My hon. Friend the Member for Birmingham, Northfield (Mr. King) reminded us how safe coach travel is. We intend to make it safer still by, for example, having speed limiters which will ensure that the reduction in speeding by coaches continues. There is less speeding in the road haulage industry. That is not true for light vans, but there is an improvement in major freight distribution.

The professionalism of drivers must be praised again and again. Not everyone reaches the highest standard, but we want to get the average standard up, the bad people out and the good to be able to earn their reward rather than for them to be cheated by the cowboys who break the hours regulations and the weight limitations.

I shall not go into enormous detail about our enforcement plans, but even without allowing for the efforts of the police, the Department of Transport's own plans would meet the acceptable part of the draft directive's targets on checking tachographs. We take all the actions mentioned anyway.

My hon. Friend the Member for Southend, East (Mr. Taylor) mentioned buses. I understand that the service from Southend to Frankfurt has now been approved. I shall not even dare read out Germany's explanation for the levy because I am not certain that it is acceptable to me, let alone to my hon. Friend.

Mr. Teddy Taylor: What does the Minister think of it?

Mr. Bottomley: I have not had responsibility for buses for very long and I suspect that my hon. Friend the Minister of State may want to take a view of his own. The change in the ministerial team took place only about 24 hours ago, so my hon. Friend ought to allow us slightly longer to have some effect.

The House should not be too frightened of getting involved in discussion and negotiation in Europe. When I was at another Ministry, an anonymous Minister from another Community country asked me to explain why Britain is not so keen on the Vredeling draft fifth directive. It was after dinner and I was tired, and I said that half the people in Britain who oppose it have not read it and the other half who oppose it have read it. I thought that that was quite an entertaining answer, but he nodded wisely and said, "Nobody has ever explained it to me that clearly before."

If necessary, I shall continue to explain clearly in Europe, and to others who are interested, why some of the definitional changes that are proposed are crazy. I shall also explain why we should not put the private sector at a disadvantage when it provides services which were provided in Britain by a state authority, and still are in some other countries.

I should like to refer to the first joke in the April edition of *Reader's Digest*. Mr. Gorbachev is supposed to be driving to Moscow airport to meet the Prime Minister, and his driver refuses to break the speed limit, so they change places. They are stopped by the police but are let off because the junior police officer who stops them tells the senior officer that there is a very important person in the car. "Who was it?" asks the senior officer. "I do not know," says the junior one. "How do you know they are very important?" asks the senior one. "Well, the person in the car had Comrade Gorbachev as his driver."

I argue that the House provides the very important person for the country. When people make a half-baked proposal which they think will improve safety or flexibility, but which will not, they should see how Russia is learning the British lesson. It is that deregulation, competition and privatisation, while maintaining necessary safety standards, are all-important. If we had not had competition in the coach industry, as a result of which National Express is doing quite well and firms in Southend are running services to Germany, consumers would not be in such a good position. They would not be in that position if we did not have that small extra flexibility combined with protection for the driver in the drivers' hours regulations.

I doubt whether we would have obtained that flexibility without the European Community taking an interest. We would have found it more difficult to make changes domestically. We owe something to Europe, and many of us are willing to move forward with the single European market and we will be willing to argue our case. We will not succeed all the time, as I said two years ago when we discussed other draft regulations.

If the House will forgive me, I will not become involved in too many of the arithmetic questions raised by the hon. Member for Stretford. I pay tribute to the way in which the hon. Gentleman persistently does his homework and brings forward interesting points.

We should understand that the key point made by the hon. Member for Stretford related to the 56 hours back-to-back. That would be illegal. The sensible proposals included in the motion and my speech related to how it will be possible to achieve higher standards of enforcement in other European partner countries. That is what the good bit achieves.

My hon. Friend the Member for Stafford (Mr. Cash) reminded the House that we should be very careful about simply accepting declarations of article 100A and should

be prepared to use the European Court. I do not think that I am fully qualified to answer my hon. Friend's points, but I will ensure that they are passed on to those who wish to know that there is very strong support in the House for ensuring that, where possible, the European harmonisation is achieved to maintain minimum standards and to recognise equivalent standards elsewhere rather than simply to go for the common denominator which may be most convenient for the person who knows very little of what he is talking about.

One example is driver licensing. It is worth reminding the House, the people of this country and the rest of the European Community that this is the only country—with the possible exception of Ireland—which has a thriving minibus industry, not just in their manufacture, but in use by community groups, student organisations and people going to parties who hire them when one person drives and the others drink. No other country has that provision because their licensing requirements do not allow people to drive a minibus or vans weighing between 3·5 and 7 tonnes.

I hope to convince the rest of Europe not that Britain must eliminate that provision and service for the handicapped, poor, unprivileged and the elderly, but that the rest of Europe should consider what is happening in this country. I hope that they will discover that there is no road safety case for this ludicrous harmonisation although we are slightly bound by that in the Vienna convention. I hope that we can extend the provision to the other 200 million or more people in Europe so that they can enjoy what we have enjoyed here, so long as the safety case is made.

Mr. Cash: Which member states are in favour of the nonsensical provisions? Given that there is majority voting and presumably the member states in favour of the nonsensical provisions are against my hon. Friend the Minister, how can we carry the day? What can we do about that when we make protestations under the provisions of the explanatory memorandum policy, the implication of which could not be more emphatically condemnatory of the provisions? What on earth are we going to do about it?

Mr. Bottomley: I was not at the Council of Ministers meeting. However, I understand that no country supported the redefinition point. If one did, I suspect that the point would have made further progress. It is worth noting that the implementation date is supposed to be September this year. If others had supported it, that support would have been declared and I could have given the names off the cuff. I do not think any one else supports it.

A child who experiences darkness for the first time thinks that it will never become light again, but it becomes light in seven hours; the cycle is repeated. There may be discussions, the cycle will be repeated and we will end up with the nonsense being jettisoned. The good things will be brought in and the level of enforcement will rise for the rest of the Community to the levels enjoyed in this country.

I hope that, partly as a result of this debate, there will be an opportunity for the private sector to come in and for competitive tendering—this is one of the points made by my hon. Friend the Member for Southend, East—to come about. We want improved enforcement and opportunities for the private sector. However, the basis of the consideration is an issue to which the House will want to return rather than have me go on too long about it now.

This has been one of the better debates which should inform people in the Community and the Commission. I hope that the European Paliament will come to the same view as the House—that we want to do the good things, not the bad ones.

Mr. Teddy Taylor: The Minister has not answered my question about article 2, but perhaps he will say under which article the directive is proposed. Is it article 75 or article 100A? If it is article 75, will he ask his clever advisers —some of us are worried about the extent to which they are keeping up to date with European affairs—why the explanatory memorandum says that the voting procedure and a qualified majority apply, because article 75 of the treaty of Rome says:

"For the purpose of implementing Article 74 . . .the Council shall, acting unanimously until . . . the second stage, . . . lay down, on a proposal from the Commission".

It clearly says that under article 75 there is not a majority vote but unanimity until the end of second stage.

Will the Minister say under which article the directive is proposed and why he mentioned qualified majority voting when article 75 of the treaty is abundantly clear? Is it not time that he arranged for his clever people to go on those splendid courses on Community law? These matters are terribly important, because every one of us will be affected by what the Community does.

Mr. Bottomley: I hope that those who read the debate will realise that the House is united about enforcement, which my hon. Friend the Member for Southend, East supported, is unanimous in wishing to get rid of the nonsense in the draft directive and will not be too put off by the dissection of article 75 and the issues on majority voting that my hon. Friend raised. I do not want us to appear reluctant to work with others in the European Community because to achieve enforcement we need to do so. The best thing that I can do about the precise point that my hon. Friend raises is write to him and have a copy put in the Library. If that is unacceptable to my hon. Friend, he can now say why.

Mr. Teddy Taylor: We are having a vital debate about future transport policy. I am merely asking under which article the directive is being proposed. This is one of the few opportunities that we shall have to discuss a Common Market proposal that will affect every person in the land. If we do not know under what article the scheme is being proposed, we do not know on what basis the majority voting will be conducted or on what basis the Minister will address the Council. You, Madam Deputy Speaker, are one of the fairest-minded people that I have known in the Chair, but we must be given an answer before the debate concludes.

Mr. Bottomley: The simple answer is article 75. I do not want to go into detail about the more complicated answer, because I suspect that my hon. Friend knows more about it than I do. I encourage my hon. Friend to listen to me for one moment because it might be helpful to him and the House. We want to lift the parliamentary reserve on the good things, such as enforcement in other countries. We believe that not one other Community country supports the proposal to amend the regulations. We should send a clear message from the House that we are all united about

[Mr. Bottomley]

that, rather than have our lawyers and those of the Community spend time on a point that my hon. Friend makes inside and outside the House effectively and frequently.

Mr. Teddy Taylor: Why does the explanatory memorandum say one thing but the treaty of Rome something different?

Mr. Bottomley: I thought that it was the right answer. If it transpires that I was wrong, I shall have no difficulty in saying that I was wrong. If it transpires that I was right, I shall write to my hon. Friend and say why I was right.

Mr. David Marshall: Earlier, I asked the Minister to give some idea of the costs involved, but it appears that he will not answer that question. I draw his attention to his Department's memorandum to the Select Committee on European Legislation. It says:

"changes envisaged would impose further expense and new burdens on the road haulage and coach industries"

and

"would involve significant cost to central Government."

The Minister must have some idea what the additional costs will be. Will he give them to the House?

Mr. Bottomley: I believe that the additional costs of the first part of the enforcement will not be significant because our existing enforcement plan covers what the draft directive would require. That is why we would be prepared to accept that part, subject to this debate and the parliamentary reserve that would have to be put on in the Council of Ministers. We have made it plain that we regard the regulation to amend the regulations as unacceptable, and we have given our view that we think that other member states regard it as unacceptable as well. We have said that if members states came together and said that they wanted to accept the regulation to amend the regulations, there would be significant costs. My hon. Friend the Member for Hampstead and Highgate (Sir G. Finsburg) made that point first, and it was then made by my hon. Friend the Member for Southend, East. As we have the implicit support of the Chairman of the Select Committee on Transport, people in Europe had better watch out, We are not having it.

Question put and agreed to.

Resolved,

That this House takes note of European Community Document No. 6048/88 on social legislation relating to road transport.

STATUTORY INSTRUMENTS, &c.

Motion made, and Question put forthwith pursuant to Standing Order No. 101(5) (Standing Committee on Statutory Instruments, &c.).

PESTICIDES

That the draft Pesticides (Maximum Residue Levels in Food) Regulations 1988, which were laid before this House on 12th July 1988, be approved.—*[Mr. Alan Howarth.]*

Question agreed to.

EUROPEAN COMMUNITY DOCUMENTS

Motion made, and Question put forthwith pursuant to Standing Order No. 102 (Standing Committees on European Community documents).

CHROMIUM IN WATER

That this House takes note of European Community Documents Nos. 4236/86, and the Supplementary Explanatory Memorandum submitted by the Department of the Environment on 11th July 1986 and 4498/88 on water quality standards for chromium; and supports the Government's intention to seek to ensure that any such standards are based on clear scientific principles consistent with the proper protection of the aquatic environment.

ELECTROMAGNETIC COMPATIBILITY

That this House takes note of European Community Document No. 9715/87 and the Supplementary Explanatory Memorandum submitted by the Department of Trade and Industry on 30th June 1988 on electromagnetic compatibility; and supports the Government in seeking adoption of the measure and in seeking to ensure that any Commission action in this field takes account of United Kingdom interests.

ANTI-DUMPING

That this House takes note of European Community Documents Nos. 5017/87 on protection against dumped or subsidised imports and 6358/87 and 5151/88 on anti-dumping and anti-subsidy activities in 1985 and 1986; and supports the Government's aims that anti-dumping measures should not be circumvented by assembly operations whilst ensuring that genuine inward investment is not discouraged and that United Kingdom interests should continue to be taken fully into account in the Commission's anti-dumping actions.—*[Mr. Alan Howarth.]*

Question agreed to.

PETITION

Opencast Mining (Marley Hill)

11.11 pm

Mr. John McWilliam (Blaydon): Rather than delay the hon. Member for Hampstead and Highgate (Sir G. Finsberg), who has a most important Adjournment debate this evening, my hon. Friend the Member for Durham, North (Mr. Radice) and I have decided that I shall present this petition, although it is signed by 684 of my constituents and by 349 of his. The petition reads as follows:

The Humble Petition of residents of the Metropolitan Borough of Gateshead.

Sheweth,

That the proposal to opencast mine coal in the area to the south of Marley Hill and remove the coal by road would result in the net destruction of jobs, cause blight to the countryside and congest the already inadequate roads.

Wherefore your Petitioners pray that your Honourable House encourage the Secretary of State for the Environment to resist this proposal.

And your Petitioners, as in duty bound, will ever pray &c.

To lie upon the Table.

Camden (Right-to-buy Legislation)

Motion made, and Question proposed, That this House do now adjourn.—*[Mr. Alan Howarth.]*

11.12 pm

Sir Geoffrey Finsberg (Hampstead and Highgate): This is only the second Adjournment debate that I have had in 18 years, which is a signal of how very angry I am at the way in which the London borough of Camden has been operating the right-to-buy scheme, and my extreme unhappiness about the way in which the Department of the Environment has been trying to permit my constituents to operate within the law.

I welcome my hon. Friend the Minister to his first debate on this subject. I hope that he will spare the House and me details of how the right to buy operates and concentrate on telling me why the Department has been so unwilling to help my constituents, and to implement our Act of Parliament. With my right hon. and learned Friend the Member for Tunbridge Wells (Sir P. Mayhew), I had a hand in drafting the legislation, and we included measures to be used against recalcitrant authorities. I am a little puzzled to know why my successors have been unwilling to follow our example. For example, Norwich council would not operate the right to buy. It took us to court and lost, and we did not need to take over its functions.

The London borough of Camden has, from the beginning, expressed its outright opposition to the right to buy. In May 1987, it made this very clear by removing official right-to-buy leaflets from the shelves in all its libraries. My hon. Friend the then Minister for Housing, Urban Affairs and Construction warned that he would send a task force of Government commissioners to sell council houses unless the hard Left toed the line. That was in May 1987 and after that Camden turned to dumb insolence and pretended to let the scheme operate. For example, one member of staff was doing all the work. It refused to sent out right-to-buy forms to tenants who asked for them and told those tenants that they had to call for them. I have already said that those forms were not available in the libraries. I circumvented that by obtaining a stock of them, which were available at my advice bureau. However, it was not my job to do that; that is what the council should have done.

The council also used other ways to put off its tenants from buying. It inflated service charges, but, fortunately, the Government have changed that part of the law. My hon. Friend the Member for Hendon, South (Mr. Marshall)—I do not blame him for his absence at this late hour—has some Camden properties in his constituency. He has been most active on behalf of those Camden tenants and he managed to make Camden offer an even more extraordinary reason for the delay than usual. It told him that it cannot define the correct boundaries of a particular property. I am sad to say that, in correspondence, the Department was apparently willing to accept that that was possible and that it was an acceptable reason.

Whenever tenants inquire about valuations or anything else they are told of massive delays. I have been receiving monthly performance, or lack of performance, figures, and at the end of June there were 1,884 overdue section 125 notices. I do not believe that the Department should ever have permitted that.

When tenants have bought their properties, the council has got back at them. It charges those people a higher rent than council tenants for the use of a garage. In some cases there is a £6 differential in such rents. I appreciate that, under present legislation, the Government can do nothing about that. Such practices, however, put off tenants from buying.

Alas, when I have drawn such cases to the attention of the Department, it has been rather slack about taking action. First, it summoned the leader and chief executive of Camden and wrote to me to say that it had met representatives of that borough on 14 May. Camden promised to put positive proposals before the Department. By August, Camden had not even recruited the staff, but it offered "news" in September. After further pressure from the Department, it was forced to employ 19 extra staff, but it took as long as was decently possible before appointing them—they were not all in post by November. My hon. Friend should note that, because of the Department's attitude, Camden got an extra six months' grace before complying with the legislation.

I asked the Department whether it would make Camden put conveyancing and valuations out to the private sector, but the answer was, alas, no. Even now, when I draw attention to individual cases, the Department's attitude is less than urgent. I informed the Department about a complaint that I had received from a constituent in Lissenden gardens. In March 1988 the London regional housing division wrote to Camden about that and said:

> "Bearing in mind that your authority is under a statutory obligation to issue an offer notice within 8 weeks of the admittance of the right to buy (or 12 weeks in the case of a leasehold sale) I am to say that Ministers are concerned at the delay that is occurring in this case. In the circumstances, I would be pleased if you could let me have your detailed comments on this matter, together with your best estimate of a date by which you now expect to despatch an offer notice. I should be grateful for an early reply to this letter."

When someone is in statutory breach, one should ask for a reply within seven working days and not

"for an early reply to this letter."

It took the Minister six weeks to fix another meeting with the leader of Camden council. Camden is laughing behind my hon. Friend's back and behind the back of the Government. Its message to me is, "Your Government are doing nothing," but I know that the Government will catch up with it. I hope that my hon. Friend will be able to tell me that nemesis has caught up with it. My hon. Friend does not have to face tenants week after week in his advice bureau. Five or six come to each of my surgeries complaining that they have to pay £40, £50 or £60 a week in rent when that money should be set off against their mortgages.

All the letters tell me that the purchase price is fixed at the date of application. That is marvellous, but many of my constituents have paid out hundreds of pounds in rent that they would not have had to pay if the Department had been willing to act more swiftly. As tenants grow one or two years older and their cases become one or two years out of date, mortgages become less easy to deal with. Now, after a certain amount of pressure from me, the Government say that they will introduce an amendment in another place to the effect that if, after a certain period, the council is in default, the rent will be set towards the purchase price. The Government are not even prepared to backdate that to Second Reading. They are producing a

[Sir Geoffrey Finsberg]

lawyer's paradise—almost a page-and-a-half schedule of notice and counter-notice which not even I, who helped draft the original legislation, am sure I understand.

I ask my hon. Friend, who is new to his responsibilities, to put this schedule in workmanlike English and to simplify it to state that, if a property has not been sold by a certain date, or if the council has not complied with the statutory requirement, rent will automatically be set against purchase price unless the council can prove that it should not be. It should not be up to my constituents to serve notices on Camden; they have done that. It is up to Camden to comply with the law.

A greater difficulty has now arisen, and I ask my hon. Friend to recognise it. The Finance (No. 2) Bill provides that tax relief on purchases not completed by 1 August will operate on the property, not the people involved—unless they are husband and wife. Two sisters in my constituency were purchasing a property from Camden. Because Camden would not comply by 1 August, they ran the real risk of losing half the tax benefit that they should have had. Fortunately, they had a good solicitor, who has prepared a document that will satisfy the Inland Revenue, but there must be hundreds of such cases—I note that the Law Society is concerned about them—of people who will lose because Camden and other local authorities are failing to comply with the law.

I ask my hon. Friend to take this up with the Treasury. The Finance (No. 2) Bill cannot be amended now, but the Revenue should be persuaded to produce an extra-statutory concession to cover people whose only fault is that they happen to be buying from the London borough of Camden. I bet there are people in a similar position in Islington, Lambeth and Hackney, all of whose councils are defying the law and getting away with it.

I am sorry for being more vehement than my hon. Friend might have liked, but I have reached the end of my tether. I ask my hon. Friend to tell Camden that it has four weeks—or two months—in which to get its act together. I said earlier that there are 1,800 section 125 notices. They are valuations, and my hon. Friend could force Camden to go outside to have them done. The conveyancing could be done by outside solicitors. If Camden does not dramatically reduce the number of cases pending in the time stipulated, my hon. Friend should use the powers provided in the right-to-buy Act to take over the council's functions. I remind my hon. Friend that it will cost the Department more to carry out those functions. Then perhaps an action for surcharge could be taken out against the council by the district auditor. That would double the threat.

Secondly, I ask my hon. Friend not to allow the new schedule and the notice and counter-notice to set rent against purchase price stay in their present gobbledegook form. I apologise again for keeping my hon. Friend the Minister here late tonight, but this is a matter of real anxiety to many of my constituents.

11.24 pm

The Parliamentary Under-Secretary of State for the Environment (Mr. David Trippier): It is essential that I should at the outset pay tribute to the assiduous way in which my hon. Friend the Member for Hampstead and Highgate (Sir G. Finsberg) has represented his constituents seeking to exercise their right to buy. Many of them, I know, suffered enormous frustration as a result of the shortcomings in Camden's performance, which my hon. Friend has so ably described. They could have no more determined champion. He has corresponded with Ministers regularly on this matter, both on behalf of individual constituents and more generally.

My hon. Friend's complaint is that Camden's performance in carrying out its right-to-buy responsibilities has been woefully inadequate, and that can hardly be disputed. Camden is one of the 11 authorities whose right-to-buy performance is formally monitored by the Department so that we can keep a regular check on its performance. The evidence of the figures suggests that the council has not been dealing with applications at a rate anything like sufficient to ensure that its tenants applying to exercise their right to buy are able to do so reasonably speedily.

There are two stages in the right-to-buy process for which statutory time limits are laid down and, rather than indulge in explaining the right-to-buy legislation, which my hon. Friend urged me not to do, it is important that I should explain precisely what that procedure is, so that I can explain how bad Camden has been.

The first stage is the landlord's notice admitting or denying the tenant's right to buy. That must normally be served within four weeks of the tenant's claim to exercise his right to buy and is not complex for the landlord in the vast majority of cases. Yet in May 1987, when Camden had virtually ceased issuing notices, there were over 800 cases where it had not complied with the statutory time limit.

However, I am glad to say that the latest report shows that there were no cases in which the first notice had not been served by the due date. Therefore, it is clear that the intensive lobby that my hon. Friend has mounted, and the way in which Department of the Environment Ministers have responded, have had that effect already.

The other stage for which there is a statutory time limit is the service of an offer notice under section 125 of the Housing Act 1985, giving the landlord's opinion of the price at which the tenant is entitled to buy. That must also include a statement of known structural defects and, in the case of a leasehold sale, details of service charges payable including binding estimates for repair and improvement costs in the first five years of the lease. The landlord has eight weeks in the case of a freehold sale and 12 weeks in the case of a leasehold sale to prepare that, starting from the date at which the tenant's right to buy is admitted.

The number of cases in which Camden council has not met that deadline has been rising alarmingly in recent months and is currently almost 1,900. The rate at which Camden issues offer notices has increased—I shall say more about that later—but not by nearly enough to match the increased number of applications.

We know from complaints passed on by my hon. Friend, and those that we receive direct from his constituents or others, that there are also delays in completing the legal formalities leading to sale when a tenant has decided to continue with his purchase on the basis of an offer notice. Statistics are less easy to interpret, since delays may be attributable to a variety of causes, some ascribable to the tenant, some to the landlord.

However, at the end of June there were 665 cases where completion was awaited, against an average this year of about 22 sales a month.

Against that background, I can understand my hon. Friend's wish that my right hon. Friend the Secretary of State should use his powers to take over Camden's role in processing sales, and I shall return to that specific point later.

It may well be that Camden is not the only authority in London whose performance in handling right-to-buy sales is less than satisfactory, but in numerical terms, the problems in Camden seem to be the most acute. All the evidence reflects that. A number of inner London boroughs have had difficulty in handling right-to-buy applications over the past 18 months. A major factor in that has been a substantial increase in the number of applications received. The number of applications by Camden tenants was, on average, 79 a month in 1986. That rose to 165 a month in January 1987, no doubt due in part to the higher discounts introduced in January 1987 for those buying flats under the right-to-buy. The trend has continued into 1988. The average monthly number of applications so far is 281, with 467 received in June alone. The Government are delighted that so many people are expressing an interest in becoming home owners. However, the number of applications is not easy to predict, and it is hard for local authorities to adjust to such an increase overnight when staff are scarce. I understand that.

I shall turn now to the steps that Camden council has taken in the past year to try to improve its performance. As my hon. Friend is aware, these have had some, albeit limited, success. Following a meeting to discuss the council's right-to-buy performance held last July, the council informed us that 19 additional posts were to be approved with the intention that the output of section 125 offer notices would increase to between 120 and 140 a month once they were filled. Those additional posts were approved, we were told, against a background of reductions in staffing and funding in other areas of the council's responsibility from which the right to buy was protected.

The council's output did begin to improve as the additional posts were filled. The number of offer notices issued in any month did not exceed 20 between February and September 1987, and has never been below 72 since. The council now seems to have reached its target of 140 notices a month promised last year. Greater central co-ordination, helped by additional staff, seems to be at the root of the improvement. I understand that the council's valuer and estates surveyor took on overall responsibility for right-to-buy matters in September 1987.

At a meeting earlier this week, the leader of the council acknowledged that the improvements delivered by the council were not sufficient to keep pace with the larger numbers of applications now being received, but said that the rate is over three times that in 1986. He said that the council is now considering proposals to establish a central unit of administrators devoted to right-to-buy work and that that would involve some extra staffing. It was expected that that should enable the output of offer notices to be increased to some 180 a month well before the end of the year—possibly more if a greater number of those involved in right-to-buy work could be located in the same building.

That is a significant increase. However, it is clearly not sufficient if applications continue to be received at the present level. The leader therefore agreed that, in the light of the trends in applications in the autumn, the council will also consider whether further staff resources for right-to-buy work are necessary in the medium and longer term.

It is clearly important that the council should make the best possible use of existing resources, as well as devoting more to the right to buy. The leader said that there was no obstacle to staff working overtime on a voluntary basis and that the council was making every effort. The leader did not rule out the use of the private sector, for example in conveyancing, where that would help.

The leader has confirmed—he is prepared to be quoted—that it is the council's policy to fulfil its statutory obligations. That needs to go on record. He also pointed to the fact that additional staff resources had been devoted to the right to buy at a time of reductions elsewhere. He also stressed—this is something that I welcome—that the council was dependent on the capital receipts from housing sales to maintain its repair programme. Against that background, he gave assurances that the case for extra staff would be considered urgently if the proposed reorganisation did not prove adequate.

The Department will continue to receive monthly progress reports from the council and will keep in contact with it over the steps it is taking, so that the Secretary of State can review the possible use of his powers of intervention. I shall give my hon. Friend a clear undertaking. It is abundantly clear to me, as it will be to him, that, if the situation does not improve in the short term, we should have no alternative but to use those powers.

My hon. Friend is, of course, primarily concerned about his constituents who have suffered unconscionable delay. I remind him, if I need to, that the amendments to the Housing Bill were designed to meet his concerns and those of many other hon. Friends on that issue.

I hope that my hon. Friend will welcome the specific points that I have made and the assurance that I have given him. Although I took on these additional responsibilities only some 24 hours ago, I am nevertheless aware of his grave concern about this matter. I have enormous sympathy for the points that he has raised and am grateful to him for the additional information that he has supplied in the debate.

Question put and agreed to.

Adjourned accordingly at twenty-five minutes to Twelve o'clock.

House of Commons

Thursday 28 July 1988

The House met at half-past Two o'clock

PRAYERS

[MR. SPEAKER *in the Chair*]

Orders for Second Reading read.

To be read a Second time on Thursday 20 October.

Oral Answers to Questions

NORTHERN IRELAND

Gibraltar Shootings

1. **Mr. Flannery:** To ask the Secretary of State for Northern Ireland what assessment he has made of the repercussions to date in Northern Ireland of the killings of three suspected terrorists in Gibraltar.

The Secretary of State for Northern Ireland (Mr. Tom King): I am aware of the interest in Northern Ireland in the deaths of three Provisional IRA terrorists in Gibraltar earlier this year. The inquest will be held in September by the Gibraltar coroner. It will address matters of substance and it is therefore not appropriate for me to comment any further at this stage.

Mr. Flannery: In view of the seriousness with which the inquest is rightly regarded, and assuming that proper precautions will be taken in the interests of safety, may we have an assurance that the Government will not intervene to stop the SAS soldiers who carried out this operation from attending the inquest?

Mr. King: My right hon. and learned Friend the Foreign Secretary, my right hon. Friend the Secretary of State for Defence and I have already made it clear that we hope that the fullest evidence can be given at the inquest. It is in everyone's interests that that should be clear, not least so that no one is in any doubt about the appalling outrage that would have been committed in Gibraltar had the terrorists' plans not been interdicted.

Mr. Cormack: Is my right hon. Friend aware that his latter remarks are those that should go out from the House? Two things are not in dispute: that those people were terrorists, and that they were planning the most brutal and dastardly outrage in the history of the IRA.

Mr. King: I agree entirely with my hon. Friend, and it cannot be said often enough. What might have happened on that occasion if more than 60kg of Semtex had gone off in that confined space in the centre of Gibraltar would have been outside the realms of any previous outrage. As my hon. Friend said, the IRA has admitted that they were its members engaged on active service.

Mr. McNamara: We are all agreed that it would have been the most terrible atrocity had those 60 kg of Semtex gone off in the centre of Gibraltar. That is why we want to know why the Government were prepared to allow a car, which had been checked through Spain, across the border and into the centre of Gibraltar, to be left alone for two and half hours when it was believed that it might contain such explosives. Why did the Government take the action that they did in relation to the car when they believed that the explosion would not take place until the procession on Tuesday——

Mr. Harris: Weasel words.

Mr. McNamara: They are not weasel words. From that decision and those deaths in Gibraltar came the deaths at Milltown and the tragic deaths of two British soldiers. They were a direct result. The Government should be concerned about maintaining peace and respect for the law in the British Isles and in Northern Ireland. That is at risk, and that is why I ask the right hon. Gentleman to ask the Secretary of State for Defence to withdraw the reply that he gave to my hon. Friend the Member for Bolton, South-East (Mr. Young) about the restrictions that will be placed on the amount of evidence that can be given by the SAS soldiers, if they attend the inquest. Will we get all the facts, or only the circumscribed facts that the Secretary of State is suggesting?

Mr. King: The first thing that I can do in response to the hon. Gentleman is simply to say, as I said in my answer, that the inquest will address matters of substance. The issues that the hon. Gentleman has raised are not for bandying across the Floor of the House. They are extremely germane to the inquest. No doubt they will have to be thoroughly examined, and will be, I have no doubt, by those concerned and the counsel representing them. In the interests of the proper proceedings that will now take place, that is the procedure that should be followed.

Identity Cards

2. **Mr. Favell:** To ask the Secretary of State for Northern Ireland what assessment he has made of the effect of the introduction of an identity card in the Province; and if he will make a statement.

The Minister of State, Northern Ireland Office (Mr. Ian Stewart): We have no present plans to introduce identity cards, but this is a matter that is regularly reviewed in consultation with the security forces.

Mr. Favell: Does my hon. Friend agree that it would be helpful to the security forces, who have to carry identity cards, if, after a terrorist atrocity, they could readily identify whether people stopped at road blocks were local, from another part of the Province, or from over the border where people do not even need to have a passport?

Mr. Stewart: I remind my hon. Friend that in Northern Ireland the security forces already have powers under the emergency powers legislation to establish identity. The question of identity cards is a practical matter and I am certainly aware of the arguments. However, in Northern Ireland the problems are different in nature from those in the rest of the United Kingdom. We would need to be persuaded that the advantages clearly outweighed the disadvantages before we incurred not only the cost and administrative problems, but the obvious difficulties of enforcement.

Mr. William Ross: If we are to have a card to identify under-age drinkers, a card to identify football hooligans, and as people in Northern Ireland already have to identify themselves when they come to vote, is there any good reason why we should not have a comprehensive identity card system, not only in Northern Ireland, but throughout the United Kingdom? Surely the only people in Northern Ireland who would object to identity cards are the fellow travellers of terrorists. Normal law-abiding citizens would be delighted to carry cards to help the security forces.

Mr. Stewart: I am aware of the points that the hon. Gentleman raises. However, this is not a simple issue. Very considerable questions are involved in the matter of implementation and enforcement. If we were persuaded that this was undoubtedly an advantage and that it outweighed the difficulties, then, as I say, that could be taken into account in future when the matter is reviewed. We keep the matter under review, as I said earlier.

Mr. Kilfedder: Why does the Minister say that it would be difficult to administer an identity card system? Could not that system be linked, as it is in other countries, with the social security system? At the moment the police and the Army can check immediately the registration and ownership of a motor car by signalling through to the central computer and receiving the answer back within seconds. Surely there is an unanswerable case for identity cards, especially as the Government have leant on the soccer clubs to force them to introduce identity cards.

Mr. Stewart: I assure the hon. Gentleman that we keep the matter under review. I note what has been said this afternoon. I hope that the hon. Gentleman will not expect me, after such a short spell, to be able to pass judgment on what is a very intricate matter. These are important questions, and I was very interested to hear the exchanges today.

Education

3. **Mr. Harry Greenway:** To ask the Secretary of State for Northern Ireland what action he is taking to improve the standard of education of the lowest 40 per cent.; and if he will make a statement.

The Parliamentary Under-Secretary of State for Northern Ireland (Dr. Brian Mawhinney): Curriculum initiatives, which the Government have already undertaken in Northern Ireland, are aimed specifically at enhancing the educational opportunities available to less able pupils. In addition, one of the main objectives of the proposals for education reform is to provide a balanced curriculum and common means of assessment for all children so that pupils with learning difficulties can be identified more effectively and the necessary remedial action taken.

Mr. Greenway: Does my hon. Friend accept that there is wide admiration for the education provided for academically inclined children in Northern Ireland, but real concern about the under-achievement of the bottom 40 per cent.? Does he also accept that the whole curriculum for children in that area needs to be re-thought, and that it is especially important for that to happen so that those children may be given the chance that they deserve?

Dr. Mawhinney: I agree with my hon. Friend's assessment of the situation in Nothern Ireland. I assure him that, although decisions have not yet been taken as a result of consultation on the education reform proposals, we wish to make available to children and to their teachers a system that is as flexible as possible, so that it might best be shaped and moulded to meet the needs of the less able children.

Mr. Beggs: Will the Minister assist those who are preparing for change in Northern Ireland by publishing all examination results this year and relating those results to the attainment levels and abilities of the pupils? Does he agree that qualifications must have relevance to the world of work? Does he further agree that preparation for life and work often means more than attaining a questionable little certificate at the end of one's school career?

Dr. Mawhinney: I agree that the education system should prepare people for the world of work. I agree also that education involves more than a simply utilitarian function. With respect to employment, it also involves the broadening of the mind and the developing of the personality. Having said all that in agreement with the hon. Gentleman, I am not sure that I share the perception that I have of the underlying reason for his question.

Ms. Mowlam: Is the Minister aware of the recent national report on child care, which highlights the appallingly inadequate system of child care in Northern Ireland? It is a system that provides only 2·8 places per thousand in Northern Ireland, compared with 16·7 per thousand for the whole of the United Kingdom? What is the Minister's response to those parents with nursery age children in Northern Ireland?

Dr. Mawhinney: First, I do not accept the designation of the position in Northern Ireland as appalling. Secondly, the hon. Lady will be aware that in primary schools in Northern Ireland there is a much higher proportion of nursery age children than in England and Wales.

Mr. Speaker: Order. May I ask for private conversations to take place elsewhere?

Intergovernmental Conference

4. **Mr. Canavan:** To ask the Secretary of State for Northern Ireland what subjects were discussed at his last meeting with representatives of the Government of the Republic of Ireland.

Mr. Tom King: My hon. Friend the Minister of State and I met Irish Ministers yesterday at a meeting of the Intergovernmental Conference. A copy of the joint statement issued after the meeting has been placed in the Library. As indicated in the joint statement, among the subjects discussed were security, Government proposals for disadvantaged areas of Belfast, for promoting fair employment, the International Fund and relations between the security forces and the community.

Mr. Canavan: In view of the report that the Stalker-Sampson inquiry was discussed during yesterday's talks and that the British Government gave assurances that disciplinary action would be taken against certain members of the RUC, why is no disciplinary action being taken against Jack Hermon, who is clearly unfit to hold office as Chief Constable? If we believe even half the allegations in Mr. Stalker's book, early retirement is not good enough. The man should be dismissed and charged.

Mr. King: On the first point, the hon. Gentleman is not entirely correct. He may be aware that disciplinary charges have been preferred against a number of members of the RUC. The position of Sir John Hermon, the Chief Constable of the RUC, was considered by the Police Authority for Northern Ireland, whose responsibility it is, and its decision has already been announced.

Mr. Dykes: Does my right hon. Friend agree that, despite obvious difficulties in a number of areas, the Anglo-Irish Agreement is a developing success and that yesterday's meeting is a further example of that development?

Mr. King: I have yet to hear any convincing argument in the House or elsewhere, and nobody can seriously believe, that we are likely to be more successful in tackling the evil of terrorism if we do so in isolation in Northern Ireland rather than in co-operation with the Republic of Ireland. Yesterday's meeting was extremely encouraging in the respect that I described. It showed increasing goodwill between the RUC and the Garda, represented by the Chief Constable and the Commissioner.

I should like to pay tribute, as did the Irish Ministers yesterday, to the leadership of Sir John Hermon, especially in respect of the RUC, its growing reputation and standing and most recently in the matter of its conduct with respect to parades and marches in Northern Ireland, about which all sides have paid their compliments to the RUC.

Mr. Hume *rose*——

Mr. Speaker: Mr. John D. Taylor.

Mr. Hume: Thank you, Mr. Speaker.

Mr. Speaker: Very well, Mr. Hume.

Mr. Hume: In relation to security matters that may have been discussed, does the Secretary of State accept that the vast majority of people in Northern Ireland recognise that adequate protection for police stations is not only necessary, but seriously necessary? Can he tell me why the protection given in the city of Derry is so different from that anywhere else in Northern Ireland? It disrupts the life of the entire city and is causing serious concern. Will he consider urgently reviewing the protection that is given to police stations with a view to ensuring that adequate protection is provided which does not disrupt the life of the entire city, especially when other Departments agree that the city is starting to move forward?

Mr. King: There is a real difference between the right hon. Member for Strangford (Mr. Taylor) and the hon. Member for Foyle (Mr. Hume).

The hon. Gentleman raised a serious issue, about which I am concerned, but I hope that nobody will forget who is responsible for the disruption and inconvenience. It is the deliberate determination of the IRA to inflict, by explosion, attacks on the police stations. Evidence has already been given for that and it leads, unfortunately, to measures having to be taken. I can give the hon. Gentleman the assurance, however, that my hon. Friend the Member for Wiltshire, North (Mr. Needham), who is the Minister with responsibility for the environment, was in Derry yesterday, where he was made aware of anxieties about this matter. I have discussed the issue further this morning. We shall be anxious to see how we can tackle this real problem while causing the minimum disruption to commercial and social life in that city.

Sir John Farr: Has my right hon. Friend had an opportunity to raise with the people from Dublin a matter that is causing a good deal of anxiety in the House—the lack of security on important information that is passed from Belfast to Dublin about the movements of important people when travelling to or from Dublin to go abroad by air?

Mr. King: The matter to which my hon. Friend refers is of concern and it is still under investigation. I await a full report. The matter was mentioned in passing. Irish Ministers share our feeling to the full and the Taoiseach is on record as expressing his horror at the outrage. It is a little early to identify how the problems arose. There is considerable traffic of people backwards and forwards and, in general, security has been extremely good in terms of information. Any lapse such as this is most serious and tragic. Perhaps I might mention in passing that, as the House is meeting, the funeral is taking place at Hillsborough of the Hanna family. I know that I speak for the whole House when I say that we condemn the outrage and express our deep sympathy to the family of the victims of this latest IRA atrocity.

Mr. Duffy: The Secretary of State mentioned the International Fund for Ireland. Can he say something about any agreement that was reached at the meeting on its early and effective application to disadvantaged areas?

Mr. King: The International Fund for Ireland is already involved in a range of projects. I have expressed my hope that it will be able to play an increased role and complement some of the initiatives in which I and my hon. Friend the Minister with responsibility for the environment, whom I have asked to take responsibility for the "Making Belfast Work" initiative, have been involved. We shall be anxious to see how the fund can complement such initiatives.

Mr. Stanbrook: Is not the good faith of the Government of the Irish Republic in question? Did my right hon. Friend ask the representatives whom he saw yesterday to justify the restrictions that they have recently placed unilaterally on the extradition process from the Republic to the United Kingdom?

Mr. King: I have made clear my anxieties, and did so again yesterday, about the problems that have arisen over extradition. My hon. Friend will be aware that in respect of one problem which has arisen recently the Irish Government intend to appeal against the district court's judgment. We attach the greatest importance to effective extradition. Clearly there are problems in that area and they relate to both terrorist and non-terrorist crimes. It is also clear that the Irish Government view with some concern certain aspects of this matter which we shall discuss again.

Rev. Martin Smyth: Does the Secretary of State accept that it is inadequate for the joint communiqué merely to condemn continuing terrorist outrages in a week when we have been mourning, among others, the Hannas? We share the sympathy that the Secretary of State expressed on behalf of the House. Does he accept that there is something wrong if the brigade that is supposed to be looking after the border is logistically under strength?

Mr. King: I can assure the hon. Gentleman that our approach is a great deal more comprehensive than merely expressing our horror or outrage. We discussed several specific matters yesterday designed to heighten that co-operation, but all start from the basis of whether there can be good will and trust between the respective security forces north and south of the border. In that respect, I was much encouraged by yesterday's meeting. We have additional Army resources over those which used to exist in Northern Ireland, and it is certainly not a question of a lack of resources for the security forces.

De Lorean Motor Cars Ltd.

5. **Mr. Latham:** To ask the Secretary of State for Northern Ireland whether he will make a further statement on progress in recovering public moneys owing since the collapse of De Lorean Motor Cars Ltd.

The Parliamentary Under-Secretary of State for Northern Ireland (Mr. Peter Viggers): As I informed my hon. Friend on 7 June in answer to his written question, some £12·6 million has been recovered through the receivership. The recovery of further amounts will depend on the outcome of legal actions and inquiries in the United Kingdom, the United States and Switzerland. In the United States the trustee in bankruptcy has not yet paid a dividend, as the process of proving and agreeing claims is not yet complete.

Mr. Latham: Will my hon. Friend confirm that more than £50 million of taxpayers' money remains outstanding from this disgraceful scandal, which includes $5 million, which were stolen from British taxpayers by Mr. De Lorean in the GPD swindle in Switzerland? Will my hon. Friend assure us that he will continue to press hard to get back every penny that was stolen by Mr. De Lorean?

Mr. Viggers: I can certainly assure my hon. Friend that the Government are satisfied that all necessary courses of action are being followed expeditiously. As legal proceedings are pending in relation to the responsibility for those losses, it would not be advisable for me to add to what I have already said.

Mr. Cryer: Does the Minister accept that I resigned from the Labour Government, who approved the original payment, and that I criticised both the original payment and the subsequent payments by Conservative Governments? In pursuing the recovery of the money, will the Minister turn his mind to how the money was approved in the first place, the advice from civil servants and the link between the Civil Service, De Lorean and the company? Clearly, bad advice was given to Ministers, which tragically led to wrong decisions.

Mr. Viggers: I know the hon. Gentleman's long connection with the case and I recognise the points that he has made, but it would be inappropriate to add to what I have already said.

Short Brothers

7. **Sir Michael McNair-Wilson:** To ask the Secretary of State for Northern Ireland what further proposals he is considering for privatising Short Brothers.

Mr. Viggers: I informed the House in a statement on 21 July that the Government were ready to consider suitable proposals that might lead to the acquisition of Short Brothers by private sector interests.

Sir Michael McNair-Wilson: While privatisation remains the ultimate goal of the Government's policy towards the company, can my hon. Friend say what steps are being taken in the meantime to return the company to profitability and to give it the long-overdue capital restructuring and the same approach that has been given to other state industries that have been returned to the private sector?

Mr. Viggers: I recognise that the company would benefit from further capitalisation. However, we take the view that the proper disciplines of the private sector are appropriate to the company and that it would be for the private sector acquirers of the enterprise to decide what further capitalisation they propose to make.

Mr. Orme: Is the Minister aware of the Opposition's deep concern about Short Brothers? The firm is a flagship for Northern Ireland because of its high technology and modern development. If it were to be sold off and then broken up, that would be a disaster. The Government should leave Short Brothers in public hands and develop the company, rather than retard it.

Mr. Viggers: We are well aware of the importance of Short Brothers to Northern Ireland and I recognise that the work force must be apprehensive. However, we believe that the long-term interests of the employees and of the company generally will best be served by the company operating within the private sector.

Mr. A. Cecil Walker: Given that the production of commercial aircraft is subsidised either by open subsidy or by the construction of military aircraft, will the Minister explain why Short Brothers has been singled out and accused of being a loss-maker?

Mr. Viggers: It is quite wrong to say that Short Brothers has been singled out in terms of privatisation. The policy of privatisation—in which the Government firmly believe—has been extended to some 17 enterprises in Great Britain and we believe that it is right that companies and organisations in Northern Ireland should also benefit from the disciplines and opportunities of the private sector.

Mr. Kilfedder: If Short Brothers is sold off by the Government—and I hope that it will not be—will they ensure that the purchaser gives a guarantee to maintain the employment level in that admirable firm, which, as the right hon. Member for Salford, East (Mr. Orme) said, leads in technology in Northern Ireland? Will the Minister also ensure that the eventual purchaser will not be receiving money from Libya, especially in view of the important missile division at Short Brothers?

Mr. Viggers: We shall, of course, take account of all interests, including the national interest, in considering all the proposals that we have for the acquisition of Short Brothers by the private sector. We shall also, of course, take account of employment interests.

Mr. Jim Marshall: Is the Minister aware that in London today there are representatives of all the work force of Short Brothers in Belfast and that they are unanimous in the view that privatisation of Short Brothers would be to the disadvantage not only of their own jobs but of the company as a whole? Is the Minister further aware that they feel that if the company is sold, either wholly or in parts, that will lead inevitably to closure and to massive job losses? What reassurance can the Minister give to those people in London today and to the work force as a whole?

Mr. Viggers: The future of Short Brothers is best served, not by continued dependence on public ownership, but by the disciplines and opportunities of the private sector. I must tell the hon. Gentleman that in the 17 public sector organisations that have moved to the private sector in Great Britain there are about 655,000 workers, many of whom now find it far more advantageous to be operating within the private sector and very few of whom, I suspect, would want to be transferred back into the public sector.

Security

8. **Mr. Livingstone:** To ask the Secretary of State for Northern Ireland if he will make a statement on the current security situation in Northern Ireland.

16. **Mr. Molyneaux:** To ask the Secretary of State for Northern Ireland if he will make a statement on the current security situation in Northern Ireland.

Mr. Tom King: Since I last answered questions on 30 June, 11 people have been killed in Northern Ireland. These deaths include the murder of the Hanna family at Killeen, a technical officer and two civilians by the Falls road swimming baths, a taxi driver caught in cross fire in a Provisional IRA attack, and a PIRA member blown up by his own mortar and two others killed in apparent sectarian attacks. I must also inform the House that, sadly, the soldier seriously injured at Cullyhanna yesterday has since died.

The efforts of the security forces are continuing to yield significant results and a number of potentially serious attacks have been prevented. Since the beginning of the year a total of 217 people have been charged with serious offences, including 12 with murder and 15 with attempted murder. A total of 360 weapons, approximately 72,000 rounds of ammunition and 4,000 lb of explosives have been recovered in Northern Ireland

I also understand that the Garda Siochana has recovered some 240 weapons, 140,000 rounds of ammunition and 600 lb of commercial explosives.

Mr. Livingstone: May I join the Secretary of State in expressing shock at the record that he has read out? Does he agree that, for the security forces to be effective, they must be seen to be impartial? Has he any comment to make on the statement of a former Secretary of State for Northern Ireland, my right hon. Friend the Member for Morley and Leeds, South (Mr. Rees), on Channel 4 on 17 July that there was a dirty tricks propaganda unit operating in Northern Ireland? How does he equate that statement with the statement of the Parliamentary Under-Secretary of State in answer to me on 24 March this year, to the effect that if I had any evidence of such a unit I should make it available to him? I assume that the Secretary of State will accept the word of the right hon. Member for Morley and Leeds, South, so will he now hold a full public inquiry to lay the issue to rest once and for all?

Mr. King: I am not aware of the comments made by the right hon. Member for Morley and Leeds, South (Mr. Rees), who is one of my predecessors, but I have nothing to add to any previous comments that I have made on this matter.

Mr. Molyneaux: Further to the previous answer that the Secretary of State gave regarding risks in crossing the frontier, will he seek to convince those public figures who seem to make a habit of crossing the frontier that they have a heavy responsibility, first, to the security forces who protect them and, secondly, to the general public if they run unnecessary risks? Perhaps the right hon. Gentleman would remind them of the wartime question, "Is your journey really necessary?"

Mr. King: Until I have a full report, the right hon. Gentleman will understand if I do not follow him in detail on that. He has raised important considerations for everybody in public life and in a position of responsibility in Northern Ireland. It is our desire, and it is certainly the desire of everybody responsible for protection in the security forces, that those whom they protect should be able to live as normal a life as possible. At the same time, I accept that people have a responsibility to consider the security of those who are appointed and required to protect them.

Sir Eldon Griffiths: Against the background of killings, woundings, and grief that lies behind the list of atrocities that my right hon. Friend has reported to the House, would we not be better occupied, not in arguing the toss, as the hon. Member for Brent, East (Mr. Livingstone) just has, but rather in demonstrating our undying support for the police, the security forces and all people on all sides in Northern Ireland as they face a horrendous onslaught on the freedom and democracy for which this House seeks to stand?

Mr. King: I am grateful to my hon. Friend for the clear and forthright way in which he puts his argument. The people of Northern Ireland and the security forces have had to face a challenge, a trial, a time of endurance beyond parallel in the Western world in recent history. It is against that that one judges the efforts of those whose only interest is to dive into the gutter to find any bit of dirt that they can throw at some very brave people.

Mr. Bowis: Will my right hon. Friend say what success he is having in defeating terrorism by attacking the funds of terrorists used to buy the weapons that cause the death and destruction to which he referred—in particular by attacking a protection racket that destroys jobs in Northern Ireland?

Mr. King: I am fully persuaded that the removal from terrorists of the resources that fund much of their activity is as important as the direct attack on terrorism itself. I am under no illusion, and I know that many of their resources come not from collections overseas but from racketeering, gangsterism and Mafia-type activity throughout Northern Ireland and the island of Ireland. It is interesting that the recent efforts of the Garda Siochana in respect of cross-border smuggling show a clear understanding between our Government and the Government of the Republic of the threat posed by racketeering in all forms.

Mr. Campbell-Savours: Have the security forces in Northern Ireland—in the widest sense of the Army and the police—at any stage in the past been involved in training people who work for private security firms? As I am not asking a question relating to security, I ask the Secretary of State not to hide behind that as an excuse. The question is to do with the relationship between the private and public sectors.

Mr. King: As the hon. Gentleman said, that matter does not seem to arise under this question.

Mr. Gow: Do the Chief Constable of the RUC and the General Officer Commanding, Northern Ireland believe that it would assist them in their attempts to defeat terrorism if there were the mandatory introduction of indentity cards for all in the Province?

Mr. King: No, I have had no such representations.

Kilroot Power Station

11. **Mr. Meale:** To ask the Secretary of State for Northern Ireland if he will now give the go-ahead to phase II of the development of the Kilroot power station; and if he will make a statement.

Mr. Viggers: I announced on 15 July that the Government had decided to meet the need for new generating capacity in Northern Ireland, which will occur in the mid-1990s, by installing the third and fourth generating sets in the Kilroot power station as dual coal-oil fired units. On the same day I announced plans to examine ways of privatising the entire Northern Ireland electricity system.

Mr. Meale: Will the Minister explain what effect that will have on the projected time scale for lignite exploitation and on the proposed building of a lignite power station?

Mr. Viggers: After the completion of the Kilroot power station, the next generating station will probably be lignite-powered. The lignite resources in Northern Ireland remain available for development for the benefit of the people of Northern Ireland. On this occasion it was more advantageous from the national point of view, and for all concerned, that the Kilroot power station should be completed.

Education

12. **Mr. Flynn:** To ask the Secretary of State for Northern Ireland how many representations he has received recently from educational groups in the Province; and on what subjects.

Dr. Mawhinney: I have in recent months received a large number of representations, written and oral, on a wide range of educational topics. These include representations on the consultation paper on education reform, substitution provisions in schools, school development proposals, the cross-community contact scheme, youth service review and funding for arts, museums, sport and community services.

Mr. Flynn: Following the decision by the High Court that the Department of Education in Northern Ireland is guilty of sex discrimination in its administration of the 11-plus examination, what is the Government's view of that judgment? What action will the Minister take to ensure that the girls who have been disadvantaged this year will have that disadvantage corrected? What guarantee will the Government give that in future the administration of the 11-plus examination in Northern Ireland will be decided entirely on merit and not on the sex of the participants?

Dr. Mawhinney: That case remains sub judice and it would, therefore, be inappropriate for me to comment.

Harland and Wolff

13. **Mr. Madden:** To ask the Secretary of State for Northern Ireland what is the expected level of Government subsidy to be provided for any potential purchaser of Harland and Wolff shipyards; what is the present level of subsidy; and if he will make a statement.

Mr. Viggers: The terms of any sale would be a matter of negotiation. Any proposal would be carefully scrutinised to take account of European Community requirements. Harland and Wolff received £58 million of Government funding in 1987-88.

Mr. Madden: In view of the persistent high unemployment in Northern Ireland and the fragile nature of the economy, why do the Government persistently push their doctrinaire and dogmatic plans for privatisation in an economy and country where those plans are most unwelcome?

Mr. Viggers: First, the amount of public money that has been spent with Harland and Wolff and with Shorts in recent years has been large. Secondly, those organisations stand to benefit from private sector disciplines and opportunities. On the question of Harland and Wolff, we have had intimations of interest from parties other than Mr. Tikkoo and, as I have previously made clear, we welcome such approaches and will consider carefully any proposals that are put to us.

Dr. Godman: As the sale of Harland and Wolff has a significance that extends far beyond Northern Ireland, especially if EC shipbuilding intervention fund money is used by the Government on Mr. Tikkoo's plans, will the Minister give an assurance that if that shipbuilding intervention fund money is used, the engines and other major items of equipment will be purchased from British companies and not from companies outwith the European Community?

Mr. Viggers: I cannot give the hon. Gentleman the assurance that he requires, although if he wishes to table a specific question I shall, of course, address that.

Rev. Martin Smyth: Will the Minister estimate the proportion of subsidies for Harlands and Shorts which are actually going to subsidise employment in Scotland and England?

Mr. Viggers: The hon. Gentleman makes a fair point. There is certainly some benefit that flows to parts of the United Kingdom other than Northern Ireland through those subsidies.

Mr. McNamara: The disciplines of the private market have generally meant capital reconstruction and large falls in the number of people employed. Will the Minister give an assurance that there will be no capital reconstruction and no sell-off of Harlands and Shorts on the cheap to the private sector, and a guarantee that whoever buys the companies will maintain present employment levels?

Mr. Viggers: If the hon. Gentleman were to look at the balance sheets of Harlands and Shorts he would agree that some form of capital reconstruction is required and could be beneficial. It would be for the future owners to decide on future employment levels.

PRIME MINISTER

Engagements

Q1. **Mr. Winnick:** To ask the Prime Minister if she will list her official engagements for Thursday 28 July.

The Prime Minister (Mrs. Margaret Thatcher): This morning I presided at a meeting of the Cabinet and had meetings with ministerial colleagues and others. In addition to my duties in the House, I shall be having further meetings later today.

Mr. Winnick: What is the most up-to-date excuse that the Prime Minister can offer for the latest appalling trade figures, which show how fragile is the economic recovery of which she constantly boasts? Is the Prime Minister not concerned that the trade figures will merely give further ammunition to her dear and close friend the right hon. Member for Old Bexley and Sidcup (Mr. Heath) in his criticism of the Government, when he is, after all, only trying to help?

The Prime Minister: As I indicated on a previous occasion, the present current account deficit is being readily financed by an inflow of private sector capital. That reflects confidence in the United Kingdom as a place to invest and is helping to finance high investment by the private sector—I am sure that the hon. Gentleman agrees with that—which will boost future export performance.

Sir Anthony Meyer: In view of this country's irrevocable commitment to full membership and participation in the European Community, does my right hon. Friend believe that our interests there are really best served by a policy of isolation, however splendid?

The Prime Minister: No, and nor has this country followed a policy of isolation. Indeed, if I may gently say so, this country has been very practical in making progress in the European Community: first, on budgetary matters; secondly, in sorting out the common agricultural policy; and thirdly, during this country's presidency of the European Community, starting on the single market to be completed by 1992. The single market now actually comes above the common agricultural policy, which seems to be left behind in the objectives of the EEC. I should also point out that, far from being isolationist, it was this Government who got a Channel tunnel started.

Mr. Kinnock: Does the Prime Minister recall just four months ago telling me that the balance of payments deficit of more than £1 billion for February was a freak? There have now been four such deficits in six months. Were they all freaks—*[Interruption.]*

Mr. Speaker: Order. I ask the House to allow the right hon. Gentleman to put his question.

Mr. Kinnock: There have been deficits of more than £1 billion four times in the past six months. Were they all freaks, or were they proof of the Chancellor's brilliance?

The Prime Minister: If the right hon. Gentleman had read the speech by my right hon. Friend the Chancellor to the Institute of Economic Affairs he would have learnt the answer that I gave to his hon. Friend the Member for Walsall, North (Mr. Winnick), who rather pre-empted the question that the right hon. Gentleman asked. Yes, there has been a deficit on current account. Part of it is accounted for by very high investment in this country, which the right hon. Gentleman has always wanted. Secondly, there is very high growth and a number of semi-fabricated components coming in. Thirdly, I agree that we must get some of the demand down, and I hope that the measures that we are taking to bring down inflation will also deal with the current account.

Mr. Kinnock: The Prime Minister speaks of success. Can she tell us how she arrives at the conclusion that one month's £1 billion deficit is a freak and that four such deficits are a success?

The Prime Minister: There was a change in the Common Market in the way in which imports and exports are accounted for—*[Interruption.]* I do not expect the right hon. Gentleman to know the facts, but there was that change, which affected us all. On the first quarter of the balance of payments—we now have the second quarter—there was, yes, a deficit. There was also a positive balancing factor, which was greater than the deficit.

Mr. Redwood: Will my right hon. Friend accept that one of the consequences of her early reshuffle is to take away many speculative stories from the press over the summer? The result will be that the press will have to concentrate on the precarious position of the Leader of the Opposition.

The Prime Minister: I hope that perhaps we might all have an August off.

Mr. Steel: —*[Interruption.]*

Mr. Speaker: Order. This is all a waste of time.

Mr. Steel: Such enthusiasm is rare. I ask the Prime Minister whether, during the summer recess, she will ponder on the fact that throughout her premiership the Government have enjoyed the unprecedented benefits of the income from North sea oil, yet throughout she has told the country that it must endure higher unemployment, curtailments in health and education and growth in poverty, all to make sacrifices for economic recovery. Is the expected trade deficit of £10 billion by the end of the year evidence of that recovery?

The Prime Minister: The evidence of the recovery can be seen throughout the country in a higher standard of living, greater enterprise, greater profits and greater export volumes. Having heard what the right hon. Gentleman has to say, I can understand why the Liberal party is at last selling off the family steel.

Q2. **Mr. Hind:** To ask the Prime Minister if she will list her official engagements for Thursday 28 July.

The Prime Minister: I refer my hon. Friend to the reply that I gave some moments ago.

Mr. Hind: My right hon. Friend will be aware of the launch of the new employment training programme in September and the opposition to it from some of the occupants of the Opposition Front Bench, from Labour-controlled authorities, such as Liverpool and Bristol, and from the TGWU, NUPE and NALGO. Will my right hon. Friend give the House an undertaking that, despite the opposition of the shortsighted in denying the long-term unemployed the skills to obtain jobs, she will presss ahead with the employment training programme as a real way of tackling unemployment?

The Prime Minister: Yes, I gladly give my hon. Friend that assurance. It is vital that the programme succeeds. We shall need a higher proportion of the work force to be skilled, and therefore many more of its members will need training. Moreover, as we enter the 1990s a smaller proportion of the work force will be leaving school. Therefore, training programmes will assume an even greater importance in future.

Mr. Fatchett: To ask the Prime Minister if she will list her official engagements for Thursday 28 July.

The Prime Minister: I refer the hon. Gentleman to the reply that I gave some moments ago.

Mr. Fatchett: Is the Prime Minister saying that it does not matter how great the trade deficit becomes?

The Prime Minister: No. We are not complacent about it in any way. There is a great budget surplus, which means that the trade deficit is not caused by the public sector in any way. Private sector investment and finance for the future is easily being met by the confidence of outside investors in the United Kingdom. I had thought and hoped that the Opposition were in favour of higher investment in industry.

Q5. **Mr. Amess:** To ask the Prime Minister if she will list her official engagements for Thursday 28 July.

The Prime Minister: I refer my hon. Friend to the reply that I gave some moments ago.

Mr. Amess: Will my right hon. Friend join me in welcoming the recent remarks of Mr. Ed Koch, the mayor of New York, following his visit to Ireland? Does she agree that some of his countrymen, including candidates for the presidency, would do better to make statements following experience rather than engage in blatant political vote-grubbing?

The Prime Minister: I do, indeed, welcome Mayor Koch's remarks, which I have seen reported in the press, and I admire his forthrightness in making them. I am glad that he took time to come to Northern Ireland to see what is happening, and to do so with an open mind. If more people came with open minds and looked at what is happening on the ground, many others would be making similar remarks, which would be a very good thing for us all.

Mr. Harry Ewing: All her political life the Prime Minister has used people ruthlessly to get what she wanted for herself. Was it really necessary this week for her to use her junior Ministers and Back Benchers as she did to divert attention from the disgraceful pay-off to the right hon. and learned Member for Richmond, Yorks (Mr. Brittan), and also from the scathing attack on her by her right hon. Friend the Member for Old Bexley and Sidcup (Mr. Heath)?

The Prime Minister: I remember the total ruthlessness, wholly supported by the Opposition, during the coal strike. If one wanted ruthlessness, that was it, and most of us will never forget it. That was pure Socialism—intimidating.

My right hon. and learned Friend the Member for Richmond, Yorks (Mr. Brittan) will be an excellent commissioner, both for Europe and in representing this country in Europe and maintaining the British identity.

Mr. Tebbit: Will my right hon. Friend reflect further on the point made by our hon. Friend the Member for Lancashire, West (Mr. Hind) about the importance of training as a guard against long-term unemployment? Will she make time, before she goes to Australia tomorrow, to call in the Leader of the Opposition and give him a little instruction, as it is most important to both her interests and those of the Government that the right hon. Gentleman keeps his job?

The Prime Minister: No, but I think that my right hon. Friend could probably give him a bit of advice.

Mr. Ieuan Wyn Jones: If the Prime Minister is so keen on developing the road towards the internal market, why does she want to dismiss the commissioner who has pioneered that work—and, furthermore, dismiss the commissioner for the environment and consumer affairs, who has shown a great grasp of his brief and yet has been thrown aside? Will she explain that?

The Prime Minister: When the two commissioners were nominated and appointed by the Commission, I made it perfectly clear that I did not think that commissioners should stay there for too long. I believe that the new commissioner whom we have nominated—my right hon. and learned Friend the Member for Richmond, Yorks—will take forward the single market. All his experience will

be appropriate to that end, and he will do the job extremely well. I did not think it right to give Lord Cockfield a further term of four years, although I am the first to admit his splendid services in starting off the single market.

Q6. **Mr. Page:** To ask the Prime Minister if she will list her official engagements for Thursday 28 July.

The Prime Minister: I refer my hon. Friend to the reply that I gave some moments ago.

Mr. Page: The House knows of the increase in house prices, and with it gazumping and less than ethical behaviour by both sellers and estate agents. In the next Session of Parliament, will my right hon. Friend consider introducing legislation to bring our law more into line with that of Scotland, or a code of practice with the same status in law as the codes of practice for employment and industrial relations?

The Prime Minister: I have great sympathy with those who find themselves gazumped because of such practices. I understand that a number of the pre-eminent groups of estate agents are getting together to try to formulate a code of practice. That is very welcome news and I hope that they will be sucessful. So far, we have not thought of making it statutory.

Q7. **Mr. Kirkwood:** To ask the Prime Minister if she will list her official engagements for Thursday 28 July.

The Prime Minister: I refer the hon. Gentleman to the reply that I gave some moments ago.

Mr. Kirkwood: Does the Prime Minister think it fair that a civil servant or journalist can face a two-year gaol sentence for revealing fraud, crime or abuse of official authority, yet there is no defence in law even if he or she can show that the only way of stopping such abuse was to expose it in the public domain?

The Prime Minister: I would not accept the hon. Gentleman's last premise. I do not believe that the only way of stopping such abuse is to expose it in the public domain. The way of stopping such abuse is to report it to the proper authority, where it will be taken up.

Business of the House

3.30 pm

Mr. Frank Dobson (Holborn and St. Pancras): May I ask the Leader of the House whether he will state the business for the half week when we return?

The Lord President of the Council and Leader of the House of Commons (Mr. John Wakeham): Yes, Sir. The business for the first week after the summer Adjournment will be as follows:

WEDNESDAY 19 OCTOBER—There will be a debate on a motion to approve the Defence Estimates 1988 (Cm. 344).

THURSDAY 20 OCTOBER—There will be a debate on a motion to approve the Defence Estimates 1988 (Cm. 344).

FRIDAY 21 OCTOBER—There will be a debate on the educational needs of industry on a motion for the Adjournment of the House.

Mr. Dobson: How long is the spillover session before the Queen's Speech likely to last? An enormous queue of Government business seems to be developing. Can the right hon. Gentleman put an end to the rumour that the spillover period is likely to last so long that Her Majesty may be tempted to combine the Queen's Speech with her Christmas day broadcast?

When does the right hon. Gentleman propose to have health questions and social security questions, now that his right hon. Friend the Prime Minister has bifurcated the old Department, so that we can question the two Secretaries of State separately? Will he also be arranging during the spillover period for the Chancellor to come to the House to give us the Treasury's latest estimate of the likely annual trade deficit, currently believed privately to be about £10 billion?

Will the Leader of the House take note of the serious criticisms made by the Select Committee on Energy of the Government's plans to sell off the electricity supply industry? Will he assure the House that no legislation will be brought before it before that report has been fully debated here and before the consultations proposed by the Select Committee have been completed?

To return to the subject of strip searching of women at Greenham common, will the Leader of the House recognise that the parliamentary answer given by the right hon. Member for Tonbridge and Malling (Mr. Stanley), and the two subsequent letters from Defence Ministers to my hon. Friend the Member for Stalybridge and Hyde (Mr. Pendry) are plainly and flatly contradicted by the sworn evidence of a police witness? Therefore, will he arrange in the spillover period for a Minister to come before the House to put the record straight?

Mr. Wakeham: I cannot at this stage tell the hon. Gentleman exactly how long the spillover session will be, but it will be a sufficient time to deal with the outstanding matters. Judging by the Session so far, that will not be unduly long.

I can confirm that arrangements have been made for the Department of Social Security and the Department of Health to have separate slots for oral questions. The Department of Health will be top for questions on Tuesday 1 November, and if the House is still sitting the Department of Social Security will be top for questions on Monday 14 November.

On the question about the Chancellor of the Exchequer, I am sure that my right hon. Friend would come to the House if he had anything important to say. I do not believe that he will necessarily accept any instructions or guidance from the hon. Member for Holborn and St. Pancras (Mr. Dobson), whose judgment in these matters is somewhat faulty.

The report of the Select Committee on Energy which has just been received deals with an important subject to which I am sure the House will wish to return, but perhaps we should wait until there has been a chance to study the report rather than the press reports about it, which do not seem to present the full picture.

With regard to strip searching at Greenham common, my hon. Friend the Minister of State for the Armed Forces gave a very full reply to a parliamentary question by my hon. Friend the Member for Dover (Mr. Shaw) yesterday confirming that his predecessor's answer was correct. I have nothing further to add to that answer.

Mr. Michael Latham (Rutland and Melton): Will my right hon. Friend arrange for a statement to be made in the recess and repeated during the first week we come back on the report of the inspector on the Barlow Clowes scandal that is likely to be produced during the recess? Will he ensure that if, in the recess, the inspector holds the Department of Trade and Industry even vaguely liable, immediate and full compensation will be paid to the distraught savers?

Mr. Wakeham: The House is aware that inspectors have been appointed under the Companies Act 1985 to investigate the affairs and membership of James Ferguson Holdings plc, the parent company of Barlow Clowes. In addition, Sir Godfray Le Quesne expects to complete his report on the DTI's handling of the case before the end of the recess, provided that there is no legal impediment. The report will be published as soon as is practicable. Any statement should await the outcome of those investigations.

Mr. Tom Pendry (Stalybridge and Hyde): Notwithstanding an apology of sorts to Stella Mann-Cairns from the current Minister of State for the Armed Forces yesterday, in which he said:

"I should like to take this opportunity of offering your former constituent an apology for the treatment to which she was subjected and the distress which the circumstances of her arrest must have caused her",

following her successful court action against the Ministry earlier this month when strip searching at Greenham common was proved, is the Leader of the House aware that to date no statement of apology either to me or to the House has been given following the denial by the Minister at the time, the right hon. Member for Tonbridge and Malling (Mr. Stanley), that strip searching had taken place? At least he had the decency to resign from the Government this week, no doubt over this issue.

Is the Leader of the House aware that there is an early-day motion signed by 113 right hon. and hon. Members demanding an apology from the Secretary of State for Defence and from him for the disgraceful, despicable and degrading practices which are taking place at Greenham common? Will he either apologise or resign at the earliest possible moment?

Mr. Wakeham: I have nothing to add to what I said to the Member for Holborn and St. Pancras (Mr. Dobson),

except that, first, my right hon. Friend did not resign from the Government on this issue and it is quite wrong of the hon. Gentleman, who knows that it is wrong, to say that that is the case; and, secondly, if he is quoting from letters or answers, he should quote in a more balanced way.

The judgment of the Newbury county court did not imply that the lady had been strip searched. In the case of other personal searches conducted at Greenham common at the time, to the best of our knowledge, the practice of the Ministry of Defence police conducting the searches did not include a requirement to remove all clothing.

Several Hon. Members *rose*——

Mr. Speaker: Order. I remind the House that business questions are about business for the week that we come back. Any wider issues can possibly be raised in the summer Adjournment debate.

Mr. John Hannam (Exeter): May we have a debate as soon as we get back on the Select Committee report on electricity privatisation? Is my right hon. Friend aware that the press reports were a grave distortion of the conclusions of the Select Committee, which were generally supportive of privatisation? Is he further aware that most of us fully support the proposals of our right hon. Friend the Secretary of State for Energy, which will create greater diversity of supply and therefore downward pressure on prices?

Mr. Wakeham: My hon. Friend is right. I remember the warm welcome given to the announcement by my right hon. Friend of his proposals on 25 February, including that by a number of members of the Select Committee.

Mr. Alex Salmond (Banff and Buchan): Will the right hon. Gentleman allow time when we return to debate the other report released yesterday by the Select Committee on Energy, which described the costs of relocating the Department of Energy to Buckingham Gate as unjustified and excessive and which suggested that the Department and staff be relocated outside London? In particular, it suggested that the oil division staff should be relocated to Aberdeen, where there are only 21 employees of the Department at present.

Mr. Wakeham: It would be more helpful to the House to rely on our usual practice of the Government first responding to the Select Committee report. Then we can consider any debates that might arise.

Sir Anthony Grant (Cambridgeshire, South-West): Is my right hon. Friend aware that before the House reassembles in October it is likely that the Secretary of State for the Environment will make a number of decisions on county structure plans which are of immense importance to various localities? As there will not be an opportunity to question him in the House, will my right hon. Friend urge the Secretary of State to let hon. Members who are concerned know of his decision at least at the same time as he informs the press and media and not afterwards?

Mr. Wakeham: That sounds like a reasonable request. I shall certainly refer it to my right hon. Friend the Secretary of State.

Mr. Dennis Skinner (Bolsover): Will the Leader of the House arrange for a debate on the Common Market when we come back, so that the Prime Minister can take part in it? On the Jimmy Young programme yesterday she tried to give the impression to the nation that she had suddenly become an anti-marketeer. Perhaps a debate would give her a chance to explain why, in spite of all the cosmetics that were used yesterday, since 1984 the Prime Minister has presided over the handing over of more than £5 billion net of taxpayers' money to the Common Market, has gone along with the single European market theme, and has allowed and cajoled Britain into becoming embedded in Common Market bureaucracy—even more, some would say, than did the right hon. Member for Old Bexley and Sidcup (Mr. Heath), who is supposed to be her right hon. Friend.

Mr. Wakeham: My right hon. Friend's leadership in dealing with Common Market matters in recent years has been an example to a great many other people of how these things should be done. I can promise the hon. Gentleman this: we shall return to these issues because we have a matter of unfinished business to deal with. It will be dealt with in the overspill, and when it is the hon. Gentleman can contribute to the debate.

Mr. Tim Devlin (Stockton, South): Is my right hon. Friend aware that during the recess Cleveland county council will be considering its response to the Butler-Sloss report on the child abuse controversy in that county? Will he therefore arrange for a statement on that response to be made to the House when we reconvene, so that Cleveland, which is a Socialist local authority in the hands of the town hall unions, will not be tempted to tackle this matter by means of a media-relations whitewash?

Mr. Wakeham: Certainly we shall refer to these matters and discuss them again in the House. I hope that my hon. Friend will let me wait until after the recess to decide on the form in which it would be most appropriate for those discussions to take place.

Mr. Frank Cook (Stockton, North): When considering the petition just made by the hon. Member for Stockton, South (Mr. Devlin), will the right hon. Gentleman bear in mind the fact that much of the damage that surrounded the Cleveland child abuse inquiry came as a result of the same sort of irresponsible accusations as those that have just been made by the hon. Gentleman? Remembering that we are talking about child abuse and the damage that can be done to families, will the Leader of the House give an undertaking that inquiries will be allowed to get on with their work of inquiry and to come up with responsible clinical results and recommendations without interference from busybodies like the hon. Member for Stockton, South?

Mr. Wakeham: I do not think that I disagree with the hon. Gentleman that inquiries should be allowed to get on with their work and that their reports should be considered at the conclusion of the inquiry, but the hon. Gentleman did not put his point in the constructive way that he usually does.

Mr. Richard Holt (Langbaurgh): Will my right hon. Friend take it from me that there is no need whatsoever to introduce this unconstructive attitude into the Cleveland child abuse case? If my right hon. Friend had listened to me several weeks ago when I asked for a debate on the matter, these exchanges would not have happened and we would not have had to wait for the whitewash by

[Mr. Richard Holt]

Cleveland county council. The House is superior to that body and should have had an opportunity to express its opinion.

Mr. Wakeham: I certainly listened to my hon. Friend's advice, and I am sorry that I was unable to accept it. My hon. Friend is being optimistic if he thinks that another debate in the House would resolve many of the substantial issues arising from the case; more substantial remedies are required.

Mr. Archy Kirkwood (Roxburgh and Berwickshire): Will the Leader of the House confirm that there are a number of outstanding matter days yet to be allocated to the Scottish Grand Committee? Is this not an unsatisfactory state of affairs, and will he correct it early in the overspill period? What provision is he making in the overspill period for a debate on the non-formation of the Select Committee on Scottish Affairs?

Mr. Wakeham: Both matters must be dealt with and are best discussed through the usual channels.

Mr. Patrick McLoughlin (Derbyshire, West): Will my right hon. Friend arrange for an early debate on questions? Some of us will have learnt with some sorrow of the decision to take social security questions on Mondays. In the past, an average of 300 questions have been tabled for health and social security matters, but only 50 for Scottish Question Time. Some 55 minutes is allowed for Scottish Question Time, yet we will be allowed only 35 minutes for questions to the Department of Social Security. Will my right hon. Friend reconsider the matter?

Mr. Wakeham: My hon. Friend makes a good point, but Question Time is ordered for the convenience of the House in a way that we think most likely to receive general support. I shall bear in mind my hon. Friend's suggestion, but I do not believe that I can make an early change.

Mr. Bill Michie (Sheffield, Heeley): Bearing in mind the questions and concern expressed about the balance of payments, will the Leader of the House find time for, and guarantee, a debate on the manufacturing base of this country, which at present is in disarray? We cannot cope with the expansion that the Government claim is happening and therefore cannot control the economy. After 10 years of warnings about what would happen, we need to have a discussion about the manufacturing base of this country so that we can run it properly.

Mr. Wakeham: If the hon. Gentleman has not recognised that the economy is being run substantially better than when his party was in government, he has much to learn. We shall return to issues of the economy in the autumn, when no doubt the hon. Gentleman will have an opportunity to put his views.

Sir John Farr (Harborough): Will my right hon. Friend take careful note of what my hon. Friend the Member for Rutland and Melton (Mr. Latham) said about Barlow Clowes? My hon. Friend's view is supported by many hon. Members. When does my right hon. Friend expect the Firearms (Amendment) Bill to return from the Lords, and are the Government contemplating adding an amendment to deal with the possession and sale of crossbows?

Mr. Wakeham: I cannot say at this stage what will be dealt with when the Bill returns to the House. We shall deal with Lords amendments when it returns, at which stage there is limited scope for changing a Bill. I recognise the anxiety that has been expressed about Barlow Clowes, but it would not be right for me to add to what I have already said.

Mr. Greville Janner (Leicester, West): May we have an early debate on the problems of young first-time house buyers that have been created by the constant series of increases in mortgage rates? Young people have been encouraged to buy their own homes, but they have no control over what they must pay because interest rates are being increased to cope with the balance of payments deficit. Is it not time that the Government and the House had some regard to the miseries that these increases are creating for young people who are fortunate enough to be in work?

Mr. Wakeham: I am sure that the hon. and learned Gentleman will agree that under the Government home ownership has increased throughout all sections of the community. I hope that that is welcomed by the hon. and learned Gentleman and every other hon. Member. These matters are debated in the House from time to time, but I cannot promise an early debate.

Mr. Nicholas Winterton (Macclesfield): Will my right hon. Friend give an assurance to the House that, if the report on Barlow Clowes is published about the time that the House reassembles, there will be an immediate statement from the Department of Trade and Industry and an early debate?

Will my right hon. Friend say whether, in the light of the separation of the Departments of Health and Social Security, time will be made available to the House to debate whether there should be a separate Select Committee? The present Select Committee would be happy to continue to monitor both Departments.

Mr. Wakeham: On my hon. Friend's second point, I have no plans at present for any change in the basis of Select Committees. However, it is early days yet and I want to take soundings from all parts of the House before any final decision is made.

On the matter of Barlow Clowes, I do not believe that it would be right for me to add anything further. However, I recognise the strong concern in the House and I will ensure that my right hon. Friend the Secretary of State for Trade and Industry is aware of it.

Mrs. Gwyneth Dunwoody (Crewe and Nantwich): Will the Leader of the House ask his colleague with responsibility for social security to come to the House before we rise tomorrow and make a statement about the changes in the consultation paper on bed and board lodging for women's refuges? The paper contains no suggestion that any change has been considered which would protect women who are the subject of violence and who need urgent support. If the proposed changes are made, the refuges will close.

Mr. Wakeham: I cannot promise the hon. Lady that there will be a statement in the House, but I will certainly refer her comments to my right hon. Friend the Secretary of State and ask him to write to her, if that would be appropriate.

Mr. James Hill (Southampton, Test): Is my right hon. Friend aware of the most serious problem I have outlined in my early-day motion on cricket in schools?

[That this House recognises the value of cricket as a contribution to the health of school children and to this country's prospects of future success in international cricket; and calls on the Government to establish a national committee to develop criteria for the teaching and assessment of this sport and to issue guidelines to local education authorities to provide adequate funding for both indoor and outdoor cricket pitches, so that in the future more youngsters will take up cricket as a profession.]

In England, we have suffered a series of humiliating defeats and we have also seen behaviour by members of the English cricket team which cannot be approved. Most schools now completely ignore cricket. There is a need for the Government and local education authorities to turn sports sections towards our national game.

Mr. Wakeham: The answer I have before me is probably not adequate for the immensity of the problem facing us, but the Education Reform Bill includes provision for physical education to be a foundation subject within the national curriculum. Guidelines will be produced in due course on attainment targets, programmes of study and assessment arrangements for physical education. I am not sure whether my hon. Friend thinks that that is a comfort, and I am not sure that I do.

Mr. Allen McKay (Barnsley, West and Penistone): May I return the Leader of the House to the recent report by the Select Committee on Energy? I agree that we should look in depth at the report and the Government's response to it. Does he agree with me that it would be wrong, given the conclusions of the report—they do not take a lot of reading—to introduce a Bill to privatise the electricity industry before the House has debated the report and the Government's response to it?

Mr. Wakeham: I do not accept that. I have said that we will be returning to that matter. I think that the hon. Gentleman will agree that a substantial number of the recommendations in the report refer to regulatory requirements that will happen post privatisation and on which the Government have not yet made their proposals known. To that extent, the Select Committee's report will be valuable to my right hon. Friend the Secretary of State for Energy.

Mr. David Wilshire (Spelthorne): Can my right hon. Friend say when the House will have an opportunity to enable those of us who believe in the fundamental importance of family life to register our total opposition to the proposal to reduce the age at which children can get married without their parents' consent?

Mr. Wakeham: I cannot promise my hon. Friend an opportunity in the business in the first week after the summer recess, but it is an important matter and there are a number of ways in which my hon. Friend could bring it before the House. I suggest that he takes up one of the opportunities available to him.

Mr. Tony Banks (Newham, North-West): There is great disappointment on both sides of the House at the failure of the Select Committee on the televising of proceedings of the House to publish a report before the summer recess, which all of us were led to believe would be the case. When may we expect a report? Will the Leader of the House give an assurance that he is not dragging his feet—in conjunction with hon. Members on both sides who are still smarting from the decision of the House to allow the experiment to go ahead—to delay the production of a report? When does he expect the cameras to be in the Chamber? To what parliamentary event can we look forward? It will not now be the State opening, but will it be next year's Budget?

Mr. Wakeham: The hon. Gentleman is taking advantage of the opportunity afforded by the absence of the big fellow who usually sits beside him—the hon. Member for Warley, East (Mr. Faulds)—to express his views more freely than he sometimes does. I reject entirely his comments about the progress of the Select Committee. What is more, every member of the Select Committee, of whichever party, will agree that it has made good progress. It will report as soon as it can. It has not delayed consideration of the complex issues, but is considering them properly. I cannot give a date, because that depends on the rest of the Committee agreeing to the report, but we shall announce it as soon as possible.

Mr. Patrick Cormack (Staffordshire, South): Is my hon. Friend aware that there is bound to be anxiety about the Prime Minister's statement this afternoon which appeared to rule out legislation on gazumping? Will he arrange for the Minister responsible to make a full statement on the negotiations that will take place with estate agents between now and October, and at that stage will the Minister make it plain that if no effective code of practice is in prospect the Government will consider introducing legislation?

Mr. Wakeham: I can go no further than my right hon. Friend the Prime Minister went, but I did not hear her comments in the same way as my hon. Friend did. She said that she thought a substantial amount could be achieved by voluntary means. My hon. Friend and I will agree that, if the voluntary approach is possible, it would be the best way of proceeding at this stage.

Mr. D. N. Campbell-Savours (Workington): Now that there is clear evidence that people in Harvard Securities have been manipulating the price of over-the-counter stock, and it is clear that many investors will lose more money in the coming months—people who invest in OTC stocks sold by Harvard Securities—is it not about time that the Department of Trade and Industry or someone moved in to close that company? Does not the investor protection legislation that has been introduced by the Government during the past few years extend as far as protecting those who, because of bad judgment, persist in wasting their money and throwing it down the drain of the over-the-counter market?

Mr. Wakeham: The Government are as committed as any to stamping out fraud and abuse wherever it occurs, and have taken practical steps to make the job more effective. The hon. Gentleman would be better advised to pass any evidence in support of his allegations to the appropriate authority, but I shall refer his comments to my right hon. and noble Friend the Secretary of State for Trade and Industry.

Mr. Andrew Mitchell (Gedling): Has my right hon. Friend had a chance to read the excellent report published

[Mr. Andrew Mitchell]

on Monday by the Services Committee on access to the precincts of the House? Is he aware of the considerable anxiety on both sides of the House about the use and abuse of our facilities by lobbyists and researchers? Will he find time for a debate on the matter either during the overspill or early in the new Session?

Mr. Wakeham: It is an excellent report on a very important subject in which many hon. Members take a close interest. The report proposes that its recommendations on photo-identity passes should be implemented at the beginning of the financial year 1989-90. I hope that it will be possible to arrange a debate in time to allow that to happen, should the recommendations be approved by the House.

Mr. Bob Cryer (Bradford, South): Will the Leader of the House arrange for a statement to be made when the House returns after the summer recess about the anti-dumping application by the textile industry against the imports of Turkish acrylic yarn? Is he aware that this problem has caused the loss of nearly 600 jobs in the Bradford textile industry which the area and the economy can ill afford? The anti-dumping application should be pursued with vigour by the relevant Ministers at the Department of Trade and Industry to encourage the EEC commissioners—about whom there has been so much fuss, but who are still in office—to do something about the anti-dumping application instead of the EEC trampling all over us, as it usually does.

Mr. Wakeham: I do not accept what the hon. Gentleman says, except to agree that this is an important subject. I will see my right hon. Friend and, if a statement is appropriate, one will be made.

Mr. Nicholas Baker (Dorset, North): Is my right hon. Friend aware of the widespread interest and concern on both sides of the House about the provisions of the Democratic Oaths Bill introduced by the right hon. Member for Chesterfield (Mr. Benn) and supported by the hon. Member for Liverpool, Walton (Mr. Heffer) and a substantial number of Labour Members, which seeks to abolish oaths of allegiance to the Crown and to substitute democratic oaths? Will my right hon. Friend find time for a debate on this Bill in the next Session? It is quite possible that after the Labour party elections we will have a Labour Opposition who are no longer loyal but are opposed and antagonistic to the Crown.

Mr. Wakeham: In all friendliness to my hon. Friend, I must say that I have a list of Bills for which I am not prepared to find time for debate and the Bill to which my hon. Friend refers is pretty near the top of the list. If my hon. Friend believes that this is an important matter—as it is—and he wishes to bring it to the attention of the House, may I respectfully suggest that he finds another way of doing it.

Mr. Paul Flynn (Newport, West): Has the Leader of the House observed the outbreak of a new illness among Members of Parliament, one of the symptoms of which we saw demonstrated by the hon. Member for Dorset, North (Mr. Baker)—increased noisiness and yobbishness? Although the disease has yet to be classified by medical science, it goes under the name of PRT—pre-recess tension. Will the right hon. Gentleman guarantee that in the next Session we will work towards a more rational division of the parliamentary year for briefer Sessions and briefer recesses?

Mr. Wakeham: With regard to the question of absence through illness, it is a fine judgment for others to make about who seems to be suffering most at the present time. However, I realise that the parliamentary year is a serious matter. I like the recesses to be long and the Sessions to be short. I work very hard for that as best I can. If the hon. Gentleman will promise to help me, we may make better progress next year.

Mr. John Bowis (Battersea): My right hon. Friend may be aware of the acute anxiety felt in the training world, particularly among those dealing with the disadvantaged and the disabled, at the allocation of training places and training supplements for the scheme coming into effect in September. Will he talk to his colleagues at the Department of Employment to ensure that that anxiety is resolved as soon as possible so that when we return in October a satisfactory statement to that effect may be made.?

Mr. Wakeham: That is an important matter. I understand that talks are going on, and I have no reason to believe that they will not be resolved satisfactorily.

Mr. Tony Marlow (Northampton, North): May we have a very short debate on the valuable facility provided by Her Majesty's Foreign Office to right hon. and hon. Members about to travel overseas whereby they are briefed on the local circumstances and, particularly where these circumstances could be adverse, are advised how to react in a dignified way? Would it be possible during that debate to discover, although there might be security implications, whether that advice extends to every hon. Member, including even the Leader of the Opposition?

Mr. Wakeham: Advice to every hon. Member travelling abroad is available from the Foreign Office which, I know from personal experience, is as helpful as it can be in the circumstances. The fact that advice is issued does not mean that it is read or understood. Each hon. Member must decide how best to use the advice.

Mr. James Couchman (Gillingham): In the light of the review of the Anglo-Irish Agreement which is to take place in the autumn, will my right hon. Friend arrange for an early full day debate, perhaps on the Adjournment of the House, on the subject of Northern Ireland? Such a debate would give us the opportunity to discuss the grotesque irresponsibility of Opposition Members, including the Opposition Front-Bench spokesman, who has called for troops out. In the light of what my right hon. Friend the Secretary of State for Northern Ireland told us this afternoon, a more inappropriate call cannot be imagined.

Mr. Wakeham: That is a very important subject and I should like to be able to organise a debate on it, but I do not immediately see the prospect of that in the near future.

Mr. Tony Favell (Stockport): My right hon. Friend will be aware of the current interest in the possible introduction of a British photo-identity card. Eighty-four per cent. of the people taking part in a television poll voted in favour for such cards. As the Home Secretary is now

taking soundings among the police, may we expect a statement within the first few weeks of our return after the recess?

Mr. Wakeham: My right hon. Friend the Prime Minister and my right hon. Friend the Home Secretary said last week that they were not persuaded that a case had been made for a national identity card, but that the matter would obviously be kept under review. In my work as chairman of the committee on the misuse of alcohol, I can tell my hon. Friend that the committee believes that there is a case for a voluntary identity card to try to curb some of the worst excesses of under-age drinking, which is a problem that is causing us much concern.

Mr. Harry Greenway (Ealing, North): I support the call of my hon. Friend the Member for Southampton, Test (Mr. Hill) for assistance to improve the game of cricket in this country, bearing in mind the serious decline affecting children and their attitude to games and our present lack of success in international cricket. Will my right hon. Friend accept that what is not covered in the Education Reform Bill—for all that he said—is the real need to enshrine in the Bill the fact that cricket should be referred to by name in the Bill and that there should be proper cricket coaching for boys and perhaps girls? Does he believe that the Marylebone Cricket Club needs some assistance in choosing its team to represent the country? Could not the Government do something to assist Graeme Hick to be selected for England?

Mr. Wakeham: My hon. Friend tempts me into areas into which I should not stray, particularly as I was at school with Peter May. I had better not deal with his job as I have quite enough to cope with in my own. I agree with my hon. Friend to the extent that competitive sport is an important part of a child's upbringing whether he is particularly good, only average or below average—as I was as a cricketer. I was rather better as a scorer than a batsman.

Second Severn Crossing

4.7 pm

The Secretary of State for Transport (Mr. Paul Channon): With permission, Mr. Speaker, I wish to make a statement. I am now able to announce the next step in the provision of the second crossing of the River Severn.

The Severn bridge is important to Wales and to economic development on both sides of the estuary. That is why in July 1986 we announced that a second crossing would be built at the English Stones, and that preparatory and survey work would proceed with a view to providing that crossing in the mid-1990s if traffic levels showed it was needed by then. The Government have now decided to give the private sector a major opportunity to participate in the provision of this important project.

Essential geotechnical and hydrological surveys are being carried out urgently, and will be completed early next year. As soon as possible after that, I shall be publishing guidelines and inviting bids to build the new bridge. Promoters will be asked to submit proposals on two bases: to design and build the new bridge and to finance and operate it in conjunction with the existing bridge; or to design and build it with the Government responsible for funding and operation. In either case the costs will be recovered through tolls. Promoters will be asked to indicate possible completion dates and the toll levels associated with them. Whichever option is chosen, legislation will be needed to provide, amongst other things, for levying tolls.

We also need to take immediate steps to place the finances of the existing bridge on a sound footing. This is required to meet the objectives laid down when tolls were first introduced in 1966. The accumulated deficit of the bridge is now approaching £100 million. It is therefore proposed that the tolls on the existing bridge should be increased with effect from 1 September 1989 to £1 for cars and £2 for lorries. The present strengthening will have been completed before the new tolls are introduced.

Mr. Robert Hughes (Aberdeen, North): There is only one item of substance in the Minister's statement, which is that the Severn bridge is important to Wales and to economic development on both sides of the estuary. The statement brings forward the completion of the bridge not one iota. There is no starting date, finishing date or target date. There is nothing except a hype for private industry. All the Minister has said is that he intends to ask private industry to submit bids as soon as practicable next year.

Will the Minister tell the House which solution he prefers? Does he prefer the wholly private sector solution? Does his statement mean that the new company, if there were to be one, would take over the running of the existing bridge too, and become an entirely private company, as is the case with the Dartford-Thurrock crossing? Why does he not take the most obvious and direct solution and have the bridge built with public money and by direct public tender, which he has the opportunity to do?

Secondly, is it not the case that his statement is an attempt to dampen down the anger that there will be on either side of the bridge about the doubling of the tolls, and the fact that he has now totally abandoned any possibility of free estuarial crossings? Tolls must be paid by people who need proper investment in their areas, but which they are not getting from the Government.

Mr. Channon: I am a little astonished by the latter part of the hon. Gentleman's question. He speaks about abandoning free estuarial crossings, but it was his party when in office which introduced tolls on the bridge. The history of the Severn crossing is that the Labour party, when in office, has tolls, but when out of office says it will not. That is the standard against which we must judge the hon. Gentleman's remark.

My statement advances the building of a new crossing considerably. We are now asking for designs. We shall give the private sector the opportunity of participating in this important project next year on these two bases. They can come forward with suggestions for funding in the public or in the private sector. My right hon. and noble Friend Lord Crickhowell, when he made a statement a few years ago, made it perfectly clear that the public sector would proceed with a view to providing the crossing in the mid-1990s if traffic levels showed that it was needed. One of the potential advantages of the private sector is competition. Private promoters will be asked for a range of opening dates and associated tolls.

The hon. Gentleman asked me about my preference. I have none. I am happy to await the outcome of the competition, but anyone living in Wales or Severnside is likely to prefer the private sector solution.

Mr. Gwilym Jones (Cardiff, North): My right hon. Friend will not need me to tell him that the increase in charges will not be warmly welcomed. No matter how much of a saving the Severn bridge represents, there will always be a response of wanting something for nothing. The only appropriate consolation for this increase will be his firmest commitment that the second crossing will be in place by 1996 at the latest, because he will know as well as I that estimates of traffic volume across the Severn bridge have notoriously underestimated the problem.

Mr. Channon: I am grateful to my hon. Friend, and I fully understand his worry about the existing tolls. However, the present tolls are lower in real terms than they were 20 years ago. Even after the increase, they will be lower than tolls on other estuarial crossings.

From what my hon. Friend said about the desirability of an early start and completion of this crossing, it sounds as though he will be one of the supporters of a private sector solution, because private promoters will be asked for a range of opening dates and, therefore, there may be the prospect of advancing the project much faster.

Mr. Roy Hughes (Newport, East): Does the Minister appreciate that his statement will be recognised throughout Wales as nothing more than a sprat to catch a mackerel? Does he appreciate that it is important that our main point in and out of Wales should not be handed over to private speculators? When will he recognise that tolls are nothing more than an abomination, especially when the Treasury is receiving no less than £16 billion from motor taxation, and only £3·6 billion of that is being spent on roads and maintenance?

Will the right hon. Gentleman also recognise the cost of delays in collecting tolls, which is an important commercial consideration? Will he reconsider the recommendation of the Select Committee on Transport which called for their abolition? Does he recognise that the basic figures for the existing bridge are a complete farce? The bridge cost £8 million to build, £52 million has been collected in tolls, and there is now a debt of £100 million. Why should there be this additional tax on Wales, an area of such deprivation and mass unemployment?

Mr. Channon: Again, I find it astonishing that the hon. Gentleman should launch a strong attack on tolls across the Severn, when it was his own party that introduced them. It was his party that retained them when it had a second period in office. His party was in office from 1966 to 1970 and from 1974 to 1979, and it did nothing about the tolls, but now that it is out of office it complains. I hope that any reasonably minded person in Wales and Severnside will recognise that my announcement is an opportunity for the bridge to be completed earlier than it otherwise might have been. The promoters will be asked to give a range of opening times, and at the end of the day we shall see whether it is a private or public sector bridge.

The hon. Gentleman referred to private speculators. Of course, the private sector will build the bridge whichever solution is chosen, and, therefore, the hon. Gentleman is talking only about its financing. The private sector might provide a Severn crossing more quickly than would otherwise be the case.

Sir Anthony Meyer (Clwyd, North-West): I am not sure whether my hon. Friend has said anything about access roads to the new crossing, but will he ensure that access roads are so designed as to provide for toll plazas of reasonable width? One of the main problems of the present bridge is its narrowness and the inevitable queues to the toll booth.

Mr. Channon: My hon. Friend has mentioned two extremely important points. Of course, we shall have to provide access roads in time for the completion of the new Severn crossing. That is a matter which is in hand and in which my Department is involved.

It will be important to make sure that the toll plazas do not cause delay. The advances in techniques used at the Dartford bridge have made it a far quicker operation, and I believe that by the time the Severn crossing is open there will be further advances.

Mr. Donald Anderson (Swansea, East): Is it not clear that the doubling of the tolls is the price that the people of Wales must pay to make this second bridge construction and financing attractive to the private sector? That is the motive behind the doubling of tolls. Is this not clear proof that, when it comes to the test, the Government will always give priority to privatisation and the ideological obsession of rolling back the frontiers of the state rather than the regional development needs of Wales?

Mr. Channon: No. The tolls were put on in the first place by the party which the hon. Gentleman supports. They have now to be increased, because we have had two reports from the Comptroller and Auditor General saying that the increase was long overdue. I am surprised that Opposition Members should disagree with the Comptroller and Auditor General's desire to see a proper economic situation prevail at this bridge as at other estuarial crossings.

Mr. Nicholas Bennett (Pembroke): I welcome my right hon. Friend's statement about the second crossing—I am a frequent user of the Severn bridge—but can he explain why those who have to cross estuaries, alone of all people

who use trunk roads, have to pay for that privilege? Also, when will there be automatic tolls on the Severn bridge to speed up the crossing?

Mr. Channon: My hon. Friend will know that successive Governments of all political persuasions have taken the view that it is right to charge tolls on certain estuarial crossings. Next week, I shall go to the start of the new Dartford crossing, which will be financed by tolls and provide an extremely important service to travellers and the economy as a whole. The policy has been followed by successive Governments.

The House should realise that tolls on the Severn crossing have increased only twice since the bridge was opened 22 years ago in 1966. The increase that I have announced should be compared with the toll across the Humber, which is £1·50 for cars and £8 for lorries, and an increase is proposed.

Mr. Ieuan Wyn Jones (Ynys Môn): Is the right hon. Gentleman's statement made with the full authority and consent of the Secretary of State for Wales? I see that the Under-Secretary of State for Wales is here, but will the right hon. Gentleman confirm that the Secretary of State for Wales agrees with the main thrust of the statement, which is that the second crossing is to be financed by private funds? Has the right hon. Gentleman discussed with the Secretary of State for Wales how the programme for a second crossing fits into an integrated road network for Wales? I am sure that he appreciates that it must be viewed in the wider context of the development of east-west roads and the much needed north-south road.

Mr. Channon: As the hon. Gentleman knows, we have not necessarily decided to build with private financing. We shall have a competition to see whether there should be private sector financing or Government responsibility for funding. We shall see what comes forward and make a decision accordingly. I take the hon. Gentleman's point about the provision of roads. My hon. Friend the Under-Secretary of State for Wales and my right hon. Friend the Secretary of State for Wales will examine carefully what the hon. Gentleman has said. My right hon. Friend the Secretary of State is, of course, in agreement with the statement and the presence of my hon. Friend the Under-Secretary of State for Wales proves it.

Mr. Michael Stern (Bristol, North-West): Does my right hon. Friend agree that his statement will be welcome in my constituency and in Northavon as it puts a terminal date on the uncertainty about the southern link road, its route, its grade, and its relationship with the Avonmouth relief road? Would my right hon. Friend care to estimate the cost to the motorist or lorry driver of going around via Gloucester?

Mr. Channon: I am grateful to my hon. Friend for what he says. I read with interest what he said when a similar statement was made a few years ago. It is difficult to estimate the cost of going around the estuary, but I should have thought that it would be infinitely greater than taking the crossing.

Mr. Paul Flynn (Newport, West): Does the Secretary of State recognise that he has made one statement which he hopes will be eclipsed by another? There is to be an increase in tolls which is unpalatable to all parts of the House. The right hon. Gentleman has tried to eclipse that announcement with his re-announcement of a recommitment made two years and four days ago when the Secretary of State for Wales announced that there was to be a second Severn crossing.

Is it not true that the absence of the Secretary of State for Wales today is proof that Wales and its Secretary of State have received a bloody nose with this decision? Does the right hon. Gentleman agree that there has been a great change of attitude towards tolls? Does he agree that the increase has nothing to do with the original cost of the bridge, which was £8 million? Tolls have gone up because of the Government's disgraceful neglect and the fact that the bridge has been shaken into premature senility by lorries which could have been controlled five or six years ago. The Government are culpable, and we are paying for their incompetence.

Mr. Channon: I am afraid that I do not agree with a great deal of what the hon. Gentleman said. I assure him that there is a need in any case to increase tolls on the Severn crossing, for the reasons that I have given. The report of the Comptroller and Auditor General criticised the fact that tolls have not been increased. They have been increased only twice in 22 years. They were imposed by the hon. Gentleman's party when it was in office. If it is so wrong to have tolls, why on earth did the Labour party impose them in the first place?

If the hon. Gentleman reads the statement which was made in 1986, he will see why I have made this statement. The former Secretary of State for Wales said that this is a major piece of infrastructure and that

> "The Department of Transport has the technical expertise, which clearly makes it appropriate for it to be the responsible Department."—[*Official Report*, 24 July 1986; Vol. 102, c. 612.]

As for giving my right hon. Friend the Secretary of State for Wales a bloody nose, since I was his Parliamentary Secretary in the early 1970s I have taken the view that it is much better not to fall out with him on anything, and nor have I on this.

Mr. David Nicholson (Taunton): Is my right hon. Friend aware that rapid completion of the second Severn crossing will be of great importance to Wales and the English side of the Bristol channel, given the rapid growth of the Welsh economy recently and the expectation that that will continue under the present Government? Is he aware that involvement of the private sector in this enterprise is greatly welcomed and may well be the harbinger of private sector involvement in future desirable infrastructure projects?

Mr. Channon: I am most grateful to my hon. Friend, and agree with him.

Mr. Alun Michael (Cardiff, South and Penarth): Does the right hon. Gentleman accept that the failure of the Secretary of State for Wales is reflected in his announcement because the Secretary of State would have had to declare it a "pay more" initiative? It is all initiatives from the Secretary of State for Wales. Does the right hon. Gentleman recognise that local authorities and industry in Wales have made great efforts to achieve economic recovery and that both have pleaded for the burden of the toll to be lightened because it is a tax on being Welsh, on doing business in Wales and on tourism in Wales? Will the right hon. Gentleman think again?

Mr. Channon: I cannot agree. If it is such an awful thing to have tolls on estuarial crossings perhaps it would have been better if the hon. Gentleman's party had not introduced them.

Mr. James Couchman (Gillingham): I am tempted, in view of today's news that the Severn bridge is to be closed for a couple of weekends soon, to ask whether that is a necessary step for having a second crossing, but that would be frivolous. As one who spent seven weeks serving on the Select Committee which considered the Dartford-Thurrock bridge, may I be assured that my right hon. Friend will do the most exhaustive studies into wind shielding before any Bill is committed to a Select Committee?

Mr. Channon: Yes, I certainly will. We are minded to have wind shielding on the bridge because winds on the Severn are thought to be considerably greater than those on the Thames.

Mr. Gareth Wardell (Gower): Is the Secretary of State saying that there is a choice here between further increases in tolls and the quick erection of a new crossing using public funds, and waiting for a long time for a bridge if public funds are to be used? If the answer is yes, provided that the necessary toll increases are reasonable, from my end of the M4, the view is that, the sooner a second crossing is built, the better it will be. I hope that the Secretary of State can tell me whether I have summed up the situation correctly and whether we are likely to have a second crossing in the very near future so that there can be more inward investment in Wales. We must remember that 1992 is looming large.

Mr. Channon: I am grateful to the hon. Member, especially for the constructive way in which he asked his question. He is not quite right. There must be an increase in tolls whatever happens. As I have already said, the Comptroller and Auditor General has severely criticised the present regime. It is clearly necessary to bring tolls up to date. The hon. Gentleman may very well be right when he says that, if there is a private sector solution, that may result in a second Severn crossing being available more quickly.

Mr. Michael Colvin (Romsey and Waterside): Will my right hon. Friend tell contractors who are submitting designs to bear in mind the fact that, by the time the new Severn crossing is constructed, approval may well have been given for the Severn barrage which will generate power by using the tides and have a road across the top of it? Will my right hon. Friend bear in mind the traffic that is likely to travel on that road before finalising designs for the second crossing?

Mr. Channon: My hon. Friend raises an interesting point. I shall consider it carefully.

Mr. Win Griffiths (Bridgend): Has the right hon. Gentleman's Department made an in-depth study of the level of toll likely to be necessary on the new bridge if it is to be run by a private company? Does he have a view about what would be an acceptable toll if the bridge were built by a private company? As the new bridge would be in competition with the existing one, would the Government automatically increase their tolls to enable the private operators of the second bridge to make a profit? Does he agree that if the bridge is built entirely with private money there will be no access to money from the European regional development fund? Under the rules of that fund, although the bridge is not in an assisted area, money could be forthcoming as it would assist considerably an assisted area—Wales—which is eligible for funding. Is this not a missed opportunity?

Mr. Channon: I certainly do not agree with the hon. Gentleman's point about the European Investment Bank, which I am hoping to meet. I shall certainly examine the point in conjunction with my right hon. Friend the Secretary of State for Wales. We must see what level of tolls is proposed, whether it is acceptable and whether a solution involving that comes from the private sector. *[Interruption.]* Let us decide that matter when we have more evidence. If there were a private sector solution the odds are that we would run the two crossings together, as is the case with Dartford, to which my hon. Friend the Member for Gillingham (Mr. Couchman) referred. That seems to have been widely accepted. All those considerations must be taken into account when a decision is finally taken. All that I am saying today is that here is another opportunity which will have to be considered carefully and it may well provide a quicker solution to the problem.

Mr. Gerrard Neale (Cornwall, North): I congratulate my right hon. Friend on accepting the need for a second connection between the south-west and south Wales and on seeking possibilities of encouraging private investment in such a scheme so that it does not impact so much on the rest of his road building programme. Does he accept that it makes the case for extending the principle to non-estuarial crossings and seeking more private investment to accelerate the road building programme? Will he press his colleagues in the Treasury to review what many of us on this side consider to be a somewhat eccentric interpretation of the Ryrie rules, so that this matter will encourage more money and speed up the road building programme?

Mr. Channon: I read with great interest my hon. Friend's article on that very point a few weeks ago. He will not expect me to comment on the Ryrie rules, but I shall draw the attention of my right hon. Friend the Chancellor of the Exchequer to what he says about them. I am grateful for what he said about the possibilities. We shall have to see what is proposed, and at the end of the day Parliament must decide whether to build the crossing with the normal method of financing or with private finance.

Mr. Frank Cook (Stockton, North): In considering the need to attract private capital and to keep toll charges as low as possible for consumers, will the Secretary of State bear in mind the amendment to early-day motion 1425 in the name of the hon. Member for Devon, North (Mr. Speller) which proposes

"that consideration be given to the possibility of combining this second Severn Bridge with a hydro electricity generating scheme."?

Will he bear in mind the fact that in drawing the outline for the design of the bridge he can incorporate hydro-electric schemes which would bring in income and reduce the need for higher toll charges, which in turn could reduce both the most adverse, disadvantageous ecological effects that environmentalists dread from the Severn barrage and the need for more nuclear power? Will he take that into account and include it in the design specification?

Mr. Channon: I shall study with care all that the hon. Gentleman has said and all that my hon. Friend the Member for Devon, North (Mr. Speller) has said.

Mr. Michael Jack (Fylde): Does my right hon. Friend agree that the time savings that will result from this bridge will be welcome and that the decision to press ahead with the new bridge is wholly justified in the light of the £56 million which has already been spent on maintenance of the existing bridge?

Mr. Channon: I understand my hon. Friend's point, and I agree in particular with his first point that the time savings will be welcome.

Mr. Chris Butler (Warrington, South): Will my right hon. Friend tell me whether the £1 level will be sufficient to pay the debt, or will we face ever-increasing tolls on the Severn bridge in future? Is there a difference in writing off the debt between the Humber bridge, the Mersey tunnel and the Severn bridge?

Mr. Channon: Each is a different case. As I have explained to the House, we have not yet written off anything. We are considering a proposal to write off a proportion of the Humber debt, which otherwise would be utterly unrealistic. I should like to receive firm proposals on Merseyside, and anything that my hon. Friend can do about that would be appreciated.

There is no doubt that there is a need now to increase the tolls on the Severn bridge. In real terms they are less than they were in 1966. If my hon. Friend is interested, I can give him a list of the tolls on other estuarial crossings, and he will find that some are higher than the Severn crossing toll. If I have not dealt fully with his point, I shall write to him.

Mr. Alan Williams (Swansea, West): I am not astonished at the absence of the Secretary of State for Wales. Clearly he has been defeated in Cabinet on the issue of Government funding for the bridge. Will the Secretary of State confirm that today's statement does not commit the Government to one extra, single penny towards the construction of the bridge? He has put up a smokescreen behind which to announce a draconian doubling of the tolls on the bridge. There is no clear statement on dates for the completion of a bridge. Do we understand from his announcement that the decision on dates will be not according to traffic flows, but left to the whim of a private investor? That seems to be what he has been saying.

Will the Secretary of State note that in his statement he talks of

"providing that crossing in the mid-1990s if traffic levels showed it was needed by then",

which is far less specific than the announcement yesterday in the Welsh Select Committee by the Secretary of State for Wales, who said that he expected it to be completed by the mid-1990s on current traffic flows? Who is right? Who is wrong? Does he agree unequivocally with that estimate by the Secretary of State for Wales?

What does the Secretary of State mean by saying that private investors may operate the bridge

"in conjunction with the existing bridge"?

Does that mean privatisation of the existing bridge, or handing managerial control of the existing bridge to private operators? In either case, what has happened to the Government's commitment to competition as the best way of achieving results? Is this not the reverse, in that the Government are saying that we need a private monopoly of the two bridges to obtain the funds to build a bridge at an early date? Is it not a fact that, because of the need to make a profit on the second bridge if it is privately constructed and owned, he cannot allow low tariffs or tolls on the existing bridge, even at the levels he has announced today, because that would divert traffic from the new private bridge to the existing bridge?

As the new bridge is crucially needed for Wales, as the Secretary of State said, as part of our regional policy to help Welsh industry develop, and as, by the time the bridge is completed, if it is, the Government will have robbed Wales of £1 billion in regional aid, why will not the Minister undertake to provide Government funds for the bridge and give us some of our money back?

Mr. Channon: I am absolutely astonished at the grudging way that the right hon. Gentleman greets this announcement. I am surprised because, before he started to speak on Welsh affairs, he used to be reasonable. I do not know what has happened to him in recent months—and, incidentally, nor does his hon. Friend, who is not present.

In answer to the right hon. Gentleman's important point, my right hon. Friends have made it perfectly clear about public sector financing of this bridge. They will

"proceed with a view to providing that crossing in the mid-1990s if traffic levels showed it was needed by then."

If the bridge goes ahead in the public sector, that was, is and will remain the case. As the right hon. Gentleman said, it will depend on traffic levels. If the bridge goes ahead in the private sector, which it may or may not do depending on whether private sector competition shows that that is the better solution, it will be open to promoters to propose schemes which will provide, conceivably, for an earlier opening of the crossing. I should have thought that that would be welcome to people in Wales and on Severnside. If that is an insuperable objection to involving the private sector, it is someting to be debated at the time. Let us see what comes forward. Running the new bridge in conjunction with the existing crossing seems likely to prove extremely satisfactory for the Dartford-Thurrock crossing and I see no reason at this stage why it should not prove satisfactory for the Severn crossing. We are not at that stage yet, so we must wait to see what develops.

The important point is that I have announced today a major opportunity to create the bridge. As soon as the geological and hydrological surveys are completed, we shall have a design and build competition for the new bridge. It makes much more likely the provision of a second Severn crossing in the mid-1990s. That is a substantial step forward, and I am utterly amazed that the Opposition should respond to the announcement in their typically grudging and mean-spirited way.

BILLS PRESENTED

HEARING AID COUNCIL 1968 (AMENDMENT)

Mr. Jack Ashley, supported by Mr. Malcolm Bruce, Mr. Allen McKay, Mr. Alfred Morris, Miss Emma Nicholson and Mr. Roger Sims, presented a Bill to amend the Hearing Aid Council Act 1968: And the same was read the First time; and ordered to be read a Second time tomorrow and to be printed. [Bill 213.]

CONTROL OF INTERCEPTION

Mr. Bob Cryer, supported by Mrs. Alice Mahon, Mr. Harry Barnes, Mr. Bernie Grant, Mr. Eric S. Heffer, Mr. Ken Livingstone, Mr. Harry Cohen, Mr. Ron Brown, Mr. Dennis Skinner, Mr. Eddie Loyden, Mr. Dennis Canavan and Mr. Bill Michie, presented a Bill to further control electronic interceptions, eavesdroppings and telephone interceptions; and for connected purposes: And the same was read the First time; and ordered to be read a Second time upon Wednesday 19 October and to be printed. [Bill 214.]

Adjournment (Summer)

Motion made, and Question proposed,

That this House, at its rising on Friday 29th July, do adjourn until Wednesday 19th October, and that the House shall not adjourn on Friday 29th July until Mr. Speaker shall have reported the Royal Assent to any Acts which have been agreed upon by both Houses.—*[Mr. Durant.]*

Madam Deputy Speaker (Miss Betty Boothroyd): I should tell the House that Mr. Speaker has not selected the amendment standing in the name of the hon. Member for Bradford, South (Mr. Cryer).

4.43 pm

Mr. Alfred Morris (Manchester, Wythenshawe): It must have been the expectation of right hon. and hon. Members in all parts of the House that, in a Session that commenced over 12 months ago, there would have been less unfinished Government business this July than in previous years. The backlog is, of course, a tribute to the Government's critics on both sides of the House and in all parts of another place. Of course, we all know that the last edition of *Hansard* before the recess will be fat with written replies to ministerially inspired questions, which the Government have been too shy, or too fly, to give while the House is still here to hold them to account.

The issue that I want briefly to raise, as the Leader of the House may have anticipated, is one of the first importance to millions of disabled people and their families; and at the outset I acknowledge that the right hon. Gentleman is not unfamiliar with some of the more daunting trials of disability.

My concern in this debate is about information that Ministers have now withheld from Parliament for over two months and which, on present plans, will not be published even tomorrow. By any reckoning, it must be totally unpardonable for the Government to scuttle into the recess without a debate on the long-awaited results—known to have been with Ministers since May—of a new and definitive survey of Britain's disabled population by the Office of Population Censuses, and Surveys. It is, by common consent outside this House, quite disgraceful that we have been unable to debate the OPCS's findings and have not even been told officially what they are.

Rumours abound that the results fully vindicate the charge, long made by voluntary organisations, that Whitehall has been grossly understating both the number of disabled people and the scale of deprivation among them. Nor is there simply rumour. "Whitehall sources" who have seen the OPCS's findings say that they show there are now more than 6 million people with disabilities in the United Kingdom, large numbers of them pensioners who live in poverty.

That is double the figure given by the Amelia Harris report, commissioned by the then Labour Government 20 years ago, and Whitehall sources are said to have told parliamentary journalists that the new findings are seen as "disastrous" by Ministers in their implications for public spending.

"We never truly knew what the numbers were until now", one senior journalist has been told,
"but we do now and there's no going back."
His source went on:

"We now know who these people are. We almost know their names."

The OPCS's report is said to give special emphasis to the problems facing elderly people with severe disabilities,

who are excluded from the Government's official estimates of losers from this year's social security changes. Many of them suffer multiple deprivation and the Government are said to be delaying publication of the new survey's findings in an attempt to find ways of disguising their significance. They are in no doubt that, if Ministers had published the OPCS's findings when they first became available in May, the public would already have demanded urgent action to relieve the suffering they reveal.

The Government's only recent initiative to help people with severe disabilities has been to set up the Independent Living Fund at a cost of £5 million. That was done a full two months after the Social Security Act 1986 came into force and two years after the Government had been told unequivocally what its effects would be for severely disabled people, old and young alike, striving to sustain their independence on inadequate incomes. They are people whose claim, and compelling need, was for benefits as of right.

Mr. Tom Clarke (Monklands, West): Would my right hon. Friend agree that, in addition to the important point that he is making, it is astonishing that we are almost at the end of the second Session of Parliament after the Royal Assent was given to the Disabled Persons (Services, Consultation and Representation) Act in 1986, yet the Government still do not have proposals for its full implementation? The fact that the Government have dealt so inadequately with the Griffiths report suggests that—alas—these matters are not given the priority that my right hon. Friend would have given them.

Mr. Morris: I utterly agree. Moreover, I take this opportunity to pay further tribute to my hon. Friend the Member for Monklands, West (Mr. Clarke) for his work in piloting that important piece of legislation to the statute book. He has support from right hon. and hon. Members on both sides of the House and it is grossly unacceptable that there should still be delay in implementing legislation of such importance to disabled people, their carers and their families.

The Independent Living Fund is a sticking plaster if ever there was one and, unless there is rapid action to translate the OPCS's data into social security benefits and the report by Sir Roy Griffiths into a coherent policy for community care, more and more disabled people will be consigned to the fringes of society. Sadly the OPCS's findings are already outdated by the punitive effects of the Social Security Act for very large numbers of the most needful disabled people and their families.

The Amelia Harris survey in the late 1960s, now reported to be extensively revised by the new OPCS report, found that two thirds of all people with an appreciable or severe disability were over pension age. On that basis, of the new figure of 6 million there must now be some 4 million disabled pensioners. Yet the Government's estimate of disabled losers from this year's social security changes left out disabled pensioners, as well as disabled children and people with disabilities who are unemployed. That is why the Government's estimate of 80,000 disabled losers so sharply contrasts with that of around 1 million made by the Disability Alliance, which represents over 100 voluntary organisations of and for disabled people.

When the Secretary of State for Employment, then the Secretary of State for Social Services, commissioned the OPCS's survey, the impression was given that the incomes of disabled people would be protected until its findings became known and a full review of current benefits had taken place. Whenever MPs pressed for improvements in benefits they were told to await the OPCS's findings, while the Government perfected their plans to make some 1 million disabled people worse off last April.

In a recent letter to the then Minister for Social Security and the Disabled, the Disability Alliance wrote:

> "We believe that the proposed publication of the OPCS's survey in September, in a manner apparently designed to stifle public debate, is demeaning to millions of people with disabilities. We urge you most strongly to make the survey's results available immediately so that they can be fully discussed before Parliament goes into Recess."

But the Government are packing us off tomorrow having resisted every parliamentary attempt to secure publication of a social document which, if it appears in September, will no doubt do so under the guidance of "news management" specialists of the highest skill.

That is seen outside the House as an inexcusable case of deliberately avoiding parliamentary scrutiny and debate. Many will think it demeaning and contemptuous not only of disabled people but also of Parliament itself. If the Government still refuse at least to publish the findings they received from the OPCS in May—there is still time to do so before we rise for the summer recess—we must hope that news editors, now forewarned, will prove more than a match for the "news managers" when the OPCS's disturbing revelations finally see the full light of day.

It is no exaggeration to say that people with disabilities have been thrown into more confusion and despair by the Government's legislative programme for this Session than I can remember for 20 years. In almost every policy area, the Government either ignore them or positively harm them. As the Leader of the House knows from our debate on 20 July, there is deep concern among disabled people about the poll tax. In education, representations in both Houses on behalf of children with special educational needs have been swept aside; in housing, Shelter has reported both that the number of new houses built by local authorities and housing associations has declined and that most of the housing stock suitable for adaptation has been lost to local authorities; in the inner cities programme, the access needs of disabled people are apparently being left to chance.

Throughout the last Parliament, the Government seemed committed to driving people into residential care by ensuring that the money available from supplementary benefit was vastly greater in private residential homes than for disabled people living in their own homes. So towards the end of 1986, Sir Roy Griffiths was asked to investigate and to recommend a solution.

At least the Government have published the Griffiths report but, unlike others by the same author, it is gathering dust because its findings and suggestions do not fit in with the prevailing ideology of bashing local authorities. That too is indefensible and we need to know the Government's response to the Griffiths report before the House rises tomorrow.

The argument about the deeply harmful effects of the Government's legislative programme for disabled people is not only one between Ministers and the Opposition parties in this House. It is an argument, indeed a fierce clash, between the Government and all the major voluntary organisations of and for disabled people. They deserve a definitive response to the concerns they are expressing, before this House rises for the recess tomorrow.

4.53 pm

Sir Ian Lloyd (Havant): I shall not follow the right hon. Member for Manchester, Wythenshawe (Mr. Morris) in the subject that he knows so well and on which he speaks with such great authority. However, I am equally concerned about the public scrutiny of decisions of great importance and relevance to public policy. I wish to refer to two in particular which I think we should know more about. I refer first to the decision not to fund in full, or at least on the previous scale, the fast breeder reactor development in the United Kingdom and, secondly, to the decision effectively to cancel the extremely ingenious and promising British technological development known as HOTOL, the spacecraft which will apply new British technology to the conquest of space.

The relationship between the two projects will interest the House. In a sense, both have been either curtailed or placed on the slow burner for very much the same reason. In the case of the fast breeder reactor, the Government's reason is that they can see no particular requirement for the fast breeder reactor for 30 to 40 years. In the case of HOTOL, the main reason given was that there was no foreseeable market requirement for space launchers well beyond the end of the century. I believe that the phrase was "no foreseeable need".

Why are those two decisions important? I am raising the question of the fast breeder reactor this afternoon not because I am well known as a pro-nuclear buff, although I believe that the nuclear contribution to our civilisation in the civil sector is of immense importance, that it will grow in importance and that it is indispensable—I am raising this issue for a much more basic reason.

I refer the House to the international conference which took place in Toronto two or three weeks ago on the crisis of atmospheric pollution in our civilisation. I draw the House's attention to one of the principal conclusions reached by that conference:

"Humanity is conducting an enormous, unintended, globally pervasive experiment whose ultimate consequences could be second only to a global nuclear war."

The conference warned:

"without rapid remedial action, the world's temperature will rise by between 1·5 and 4·5 °C before the middle of the next century. . . . That would devastate coastal areas and islands by flooding, contamination of water supplies by salty waters, loss of farmland, and a dramatic increase in the number of tropical cyclones."

I will not develop that point further, but I should like to draw the attention of the House to some of the conclusions which the scientific journal *Atom* has reached on very much the same subject. It has pointed out that there are two consequences of what is happening, one of which is already accepted because we could not possibly stop it—it will probably inevitably take place over 10 to 20 years; the other is possibly within the limits of control, but both have substantial and devastating effects on the atmosphere. The article points out:

"A warming of 4·9 °C would be comparable to that which occurred between the coldest period of the last ice age 18,000 years ago and the present interglacial—all within the next 100 years! . . . in a mere 42 years, the world would be warmer, on average, than at any time within the recorded history of mankind . . . It is therefore crucial that science receives the support it requires to sharpen our understanding of the greenhouse effect"—

for that is what the phenomenon is—

"and its potential impacts on environment and society. The longer we wait, the larger will be the climatic change to which we are committed."

In what way can we contribute to that scientific understanding? As I understand it, the main way is by enlarging the present generation's scientific knowledge of the atmosphere, and of inner and outer space. In what way do we do that? We do it best by increasing our potential for placing scientific instruments in space. How can we best do that? By developing what are known as spacecraft—and the most eligible spacecraft available to the United Kingdom is HOTOL. So, where do we go from there? What judgment has been reached on HOTOL?

I can do no better—the House can do no better—than refer to the report of the House of Lords Select Committee on Science and Technology, and to some of its principal conclusions on space, which I believe are of outstanding importance. The Committee took evidence from the director general of the space agency in France, who reached an interesting, if Gallic conclusion, which is nevertheless relevant. For France,

"man in space . . . was simply a matter of sovereignty, 'like the sea around the United Kingdom'",

and therefore seen as a matter of immense and overriding importance.

British Aerospace, in its evidence to the Select Committee, said:

"Between now and the end of the century there will be a dramatic acceleration in space exploitation in line with the growing realisation by the civil and military communities of the substantial benefits that it offers".

The judgment of British Aerospace should not be lightly overridden, however biased or interested it may be. Another example is the recent decision of a major United States firm voluntarily and on its own account to reinstate the Atlas-Centaur production line to produce launch vehicles for commercial availability.

Other interesting and important conclusions of the House of Lords Select Committee include the following from the university of Southampton:

"Few of the potential benefits from space activities will be fully realised until a routine, low cost, re-usable launcher with simplified logistics is developed."

The United Kingdom Industrial Space Committee regarded this as an "over-riding priority", and British Aerospace stated:

"Many people believe that space is the key to national security and economic well-being. But the key to space itself is the launcher."

Superficial and rather glib comparisons have been made with Concorde, but the university of Bristol makes the following comment:

"Unlike Concorde, there seems to be every prospect of a genuine economic return because the basic cost of launch is massively reduced."

The House of Lords Committee itself then makes the interesting statement:

"Opting out is not an option . . . The Committee recommend that the United Kingdom play a visible and effective part in the exploration and exploitation of space."

At this point, the following recommendations fully serve my purpose. The Select Committee states:

"keeping the space budget fixed at about £112 million, has got the level wrong. This level of spending gets the worst of all worlds—too much for real savings, too little for lasting achievements. If the budget is to stay at this figure, the United Kingdom might as well bow out of space now."

It concludes:

"the Committee do not find it reasonable to suggest that it is for private industry to step in where Government itself has declined to act. The Committee have argued repeatedly that British industry should spend substantially more on R & D, especially on D. They have also welcomed the systematic

efforts now being made to capitalise upon exploitable areas of science. But they do not look to private industry, in space or any other field"—

and nor, for all my political philosophy, do I in this context, because it is totally unrealistic—

"to be the major source of funds for activities where the commercial returns, even if they were assured, lie well outside normal commercial timescales."

The word "timescales" brings me to the essence of what I have to say. I say it with the greatest reluctance, but it seems to me that in both these contexts the Government's policy is unimaginative, short-sighted and dangerous when considered in the fundamental context of the national interest. I ask myself, because I must, why that is so. Why have we spent only three hours in the past year or so debating fundamental scientific policy matters of this kind? Why do highly responsible and senior Ministers, whom I greatly respect in every other sense and who have before them the evidence that I have cited today, reach the decisions that they do? Can it be purely a matter of finance? Is it because they see a figure such as £5 billion and react—understandably, after the long history of uncontrollable subsidy—by saying that we must have no more of this? I entirely agree with that judgment, but there are areas in which the time scale is so long that it is entirely unreasonable to expect the private sector to undertake the risks inevitably involved. That is where a mistaken judgment has been made.

A sum of £5 billion is the kind of amount that has been bandied about in relation to HOTOL, but it is £5 billion over 10 to 20 years, and thus involves a maximum of £500 million or a minimum of £250 million per annum. Even then, I agree with the House of Lords judgment that this must be shared with Europe as a whole, because it is a project best brought to fruition on a European basis, with a major British contribution, but I cannot see such a contribution being based on the present arrangements or the judgments on which they are founded.

Those sums should be compared with the £2 billion per annum allocated by the Government for subsidy to the coal industry and other global budgets of that magnitude. In that context, £250 million does not frighten me. We must look critically at the balance of all these matters and if it means a little more stringency elsewhere, I would support such stringency so that resources can be released for major efforts in this direction.

Mr. John Wilkinson (Ruislip-Northwood): Apart from blindess and apparent ignorance, is not the problem the lack of any forum in this House such as the old Select Committee on Science and Technology whereby my hon. Friend and others with great expertise in these matters can bring that expertise to bear and enlighten and advise Ministers? Does my hon. Friend agree that the HOTOL project required only £4 million to £5 million per annum for the next three or four years until project definition was completed? If that had been successful, more would then have had to be spent for development. Nevertheless, we are talking about tiny sums compared with the £50,000 million per annum that we spend on social security.

Sir Ian Lloyd: I entirely agree with my hon. Friend on both points. This House is enormously indebted to the other place for taking up the gauntlet that we flung down and establishing its own Select Committee on Science and Technology. We have certainly missed the contribution that such a Committee could make. The establishment of a parliamentary office for science and technology may in due course make a modest contribution, but it is no substitute for a House of Commons Select Committee.

To my mind, the situation reflects a fundamental weakness in the organisation of the whole scientific community within the total community of the United Kingdom. When I say that that is a criticism of my party's Government, I hope that the Opposition will not gloat, as they made the same mistake. That failing has been a feature of both major parties throughout all the years that I have been in the House, and it will not be put right until the lack of balance is properly recognised at the very top. So far, it has not been recognised and there is no sign that it will be.

I therefore ask my right hon. Friend the Leader of the House to urge his colleagues to consider most carefully not just what I have said today but the evidence on which my comments have been based. That evidence is of profound importance, and I have seen no convincing arguments to refute it. Until I hear or read these arguments, I cannot support my right hon Friends in their decision to curtail the development of the fast breeder reactor or to reduce substantially—virtually to abolish—support for HOTOL.

If the greenhouse effect which I have described proves to be a major environmental phenomenon that successive Governments will have to address towards and beyond the end of the century, and if as a result—this is conceivable, although not yet proven—there has to be a dramatic and major reduction in the burning of coal and other fossil fuels, there will be only one alternative. By "major reduction" I mean thousands of millions of tonnes. All the fashionable alternative energies will not bridge the gap that will be opened when it is ordered that thousands of millions of tonnes of fossil fuels will not be burned. At the most, the fashionable alternative energies will produce 20 per cent. of our energy requirement. There would remain, of course, 80 per cent. If we have to reduce 80 per cent. to 40 per cent., the gap, as it were, of 40 per cent. can be filled only by nuclear power.

Will the gap have to be filled by nuclear power worldwide? I remind the House that the Chinese are now burning 1 billion tonnes of coal a year. Indeed, they take first place in the worldwide league table of coal burners. If nuclear power has to be generated on such a scale, it can be done with safety for our civilisation over a prolonged period only if we use fast breeder technology, which burns uranium 10 times more efficiently than the pressurised water reactor.

These are the perspectives that I believe the Government have neglected. If they have not, I should be delighted to know why and how.

5.12 pm

Mr. Archy Kirkwood (Roxburgh and Berwickshire): It is always a pleasure to participate in a debate after the hon. Member for Havant (Sir I. Lloyd) and the right hon. Member for Manchester, Wythenshawe (Mr. Morris) have contributed to it. The hon. Member for Havant, in speaking of science and technology, and the right hon. Member for Wythenshawe, in talking of disability, have raised important and urgent aspects of public policy. They are right to argue that the Government should bend their mind to these considerations before the House rises for the summer recess.

[Mr. Archy Kirkwood]

I crave the indulgence of the House to raise a more human, more urgent and more current issue, which is the conditions that prevail in the prisons of the United Kingdom generally and particularly, because it is the area that I know best, in Scotland. I am not sure of the proprieties, but it occurs to me that I have not yet advised the hon. Member who represents the constituency in which Glenochil prison is to be found——

Mr. Nicholas Budgen (Wolverhampton, South-West): I should sit down.

Mr. Kirkwood: Perhaps it is right that I should do so. If I should have informed the hon. Member concerned —I want to refer to Glenochil—I apologise in advance to whoever it might be.

There is deep and widespread anxiety in Scotland about what is going on in Glenochil. The general public are perplexed. Trouble is brewing, and I believe that it will continue to brew over the summer months. That belief is shared generally by the public in Scotland. If some of the worst predictions and fears are fulfilled, we may find that during the summer additional damage will be done to the fabric of the prison building. There is the danger that injuries will be sustained by prisoners, prison staff and the officers and wardens who look after the staff. The disturbances could easily get out of hand. There is a potential crisis in Scottish prisons generally, and in Glenochil especially.

Glenochil has been the subject of great controversy over recent years because of fatalities and other incidents. The prison authorities in Scotland decided to make Glenochil a full-blown prison in its own right earlier this year. A riot started on 4 May, which lasted on and off for nearly five days. Since then there has been what can be described only as a war of attrition between the prison management and the prisoners. My information comes from press reports. It is only through these reports that I and the general public can learn of anything that is going on in the prison.

Press reports suggest that the riot was caused by a lock-down after an assault on a prison warden. Following that assault, every prisoner was locked up and all visits were cancelled. An open day was allowed, and press reports suggest that it showed a great sense of hopelessness. There were allegations of brutality and of continuing and persistent degradation. The authorities allowed the open day to take place, but when the members of the press asked to cross-examine some of the inmates who were involved in the original fracas which caused the riots, they were told that they were not available. If prisoners are locked up for 23 hours out of every 24, I fail to see how inmates can be described as not available.

There are more than 400 prisoners, and they have in various ways made allegations. These include having to strip naked before they are fed. It is said that they have to hang from cell bars before they receive their food. The prisoners are locked up for 23 hours of every 24. They have no toilet facilities and none of them has any bedding facilities. If my memory serves me right, a 27 -year-old hanged himself in the prison in June.

The press reports and the other pieces of information that are available to me are extremely disturbing and worrying. The management say that the trouble has been caused by a hard core of difficult and intractable recidivist prisoners who are not responding to reasonable attempts to compromise. It is alleged that they are leading a revolt and are responsible primarily for the trouble.

I was prompted to raise this issue this afternoon when I read a letter printed in the *Glasgow Herald*. It caused me a great deal of deep concern. The letter was written by Stephen Small from Her Majesty's prison, Peterhead. He explains in his letter—I think that the *Glasgow Herald* was right to publish it—that he was a prisoner in Glenochil until recently. He was there until he committed an offence, after which he was taken to Peterhead so that the matter could be investigated.

In a disturbing letter, he states:

"There were a few minor incidents between Christmas and May. Then on May 4, at 4.30 pm in D hall, an officer offered a prisoner a 'square go' during an argument. The prisoner overcame the officer but was then attacked by another officer. The fuse was lit.

There was a very heavy Mexican stand-off and everyone was locked up until the police came in to take statements, which they did that night. We were told we would be locked up that night and told the reason.

There was no trouble that night. The following day everyone was expecting to get back to normal. We didn't. We got no slop-out, no exercise, no visits and late, cold meals. By teatime, people started smashing their cells. We weren't told anything about what was happening. The following day things got worse. Again, no slop-out or exercise or visits or hot food. The whole prison erupted."

This prisoner argues that there was

"no small core of hard men. Instead, there were 200 very disgruntled inmates who had up to that time done absolutely nothing wrong."

His conclusion is:

"The reason it has continued so long"—

that is, the riot—

"is that the Governor . . . has taken it upon himself to ride roughshod over the regulations contained in the Prison Scotland Act 1952. No less than 25 regulations are being broken . . . every day."

That contradicts and refutes the allegation that a small hard core of difficult prisoners is causing the problem.

I do not blame the warders or the staff, however. I think that the filthy conditions are a direct result of the prisoners' activity. Prison officers can now patrol A hall only in full riot gear, and live in constant fear of being taken hostage. According to the press reports, they are pelted with urine and human excrement every time they enter A hall, and there have been three reported attempts at snatching officers and 12 alleged assaults.

There has been much talk of prison management breaking prisoners, or trying to bend them to their will. If the press allegations are true—they are the only information available to me; I have not visited the prison, and am not even an expert on the penal system—the management must be held at least partly responsible. I certainly think that there can be little excuse for denying prisoners slop-out rights for so long, and for denying them exercise rights for a total of 432 hours since the problem blew up in May.

I should like to call for an urgent independent inquiry, into Glenochil in the first instance but also into the general position, taken against the background of the recent difficulties and disturbances in Peterhead, Barlinnie and Perth in Scotland, not to mention Haverigg and Lindholme in England. This is a matter of public concern which requires urgent attention from the Government if we are to avoid trouble over the summer months.

My constituents, and other people in Scotland, are concerned to see in television sequences drugs being handed from cell to cell by inmates. It is also worrying that warders and staff are taking such long spells of sick leave. That, I believe, is symptomatic of the pressure under which they are working. It is also a disgrace and a scandal that some 5,588 prisoners are locked up in Scotland, which is a much larger proportion per thousand head of population than in any other civilised country on the continent.

The problem needs both urgent short-term action and longer-term investigation. There are long-term solutions to be found without much difficulty, including better access to parole. Only violent criminals really need to be gaoled. Far too many people are now in prison for defaulting on fines, for instance, and the number on remand—although the problem is worse in England and Wales than in Scotland—is also far too large. I was impressed by the recent report by the Church of Scotland, which advocated a wide range of non-custodial options. A number of other regimes are available to the Government, and could be made available in turn to the courts to accommodate and lessen the problem. The report also mentioned the probation service, which is woefully underdeveloped and under-resourced at present.

We were expecting a Government White Paper about the prison service with reference to Scotland. It should have been published by now, but the most recent news is that we must wait until September for this important document. Nor has the parole review yet been published which was to examine the Scottish position with a view to bringing the qualifying period for parole in Scotland into line with that in England. That too should be done as a matter of urgency.

There is a legal fiction in this country that we imprison people not for purposes of retribution, but to try to rehabilitate them. That has been blown out of the water by the disturbances that we see from day to day in our prisons, particularly in Scotland. Of course no hon. Member would or should condone violence or vandalism in prisons. It is a matter for the courts in the first instance to decide how crimes should be punished and dispose sentences. The Government, however, have a responsibility to provide public policy, resources and organisation to meet the needs of the day, and I do not think that that duty is being discharged.

The Government should immediately close A hall in Glenochil and relocate the prisoners until the problem can be investigated by an independent inquiry. They should then set up a wide-ranging inquiry into the state of the prisons in the United Kingdom. If they do not do that over the summer, I fear that the consequences may be not just more damage to the fabric of our prisons, but injury and loss of life to prison inmates, warders and staff.

5.25 pm

Sir Anthony Meyer (Clwyd, North-West): I shall be a good deal briefer than any hon. Member who has spoken so far.

There is a matter that I would have wished to raise if the House had not been about to disperse, and which may develop rather too swiftly during the recess. The "bed and breakfast" racket has been with us for some time now, but there is an ingredient which, if not new, is becoming increasingly prominent.

The seaside resort of Rhyl in my constituency is a very pleasant place to be. For a long time now, the advantages of being unemployed in Rhyl rather than in Manchester or Liverpool have been sufficiently manifest to attract to Rhyl people with little chance of finding a proper job there, other than the briefest of seasonal employment at the most down-market end of the tourist trade. As a consequence, the level of unemployment there appears to be scandalously high for about nine months in the year.

Now, however, the nuisance is becoming something rather worse. A number of rather dubious firms have begun to realise that a steady and lucrative business can be built up not just by providing bed-and-breakfast accommodation for those with no job and nowhere to live, but by attracting people to such accommodation from far afield. What is more, the profits are so substantial and so certain that the firms are now in the market to buy up property for that purpose.

The profits are substantial because the scale of lodging allowance paid by the DHSS for this so-called hostel accommodation is higher than the level of housing benefit that would be paid by the council—which would, of course, have asked the rent officer to fix a reasonable rent. Such firms are making a fat and assured profit, and they are making it entirely at the taxpayers' expense.

Recently, the YMCA building in Rhyl came on the market. The council, in pursuance of the Government's intention that it should act as enabler rather than provider of housing, invited the Clwyd Alyn housing association to buy it, and to convert it to sheltered housing as part of the much-needed housing improvement in this rather rundown part of the town. The housing association, however, was easily outbid by a speculator, who then resold the YMCA premises to a company called Bideawhile, which has converted it into what it openly describes as a DHSS hostel.

Let me quote from a letter that I have received from Rhuddlan council's housing director:

"If this property was providing for a local need, then, no doubt, we would not have the same concern, but it would appear that the premises are filling up with families who are being encouraged to move here from other areas by press advertisements. The Area Office of the Clwyd Social Service Department is particularly concerned at the increasing workload that is being placed upon them, as already they have been consulted by 13 families who arrived at the former YMCA building, and have subsequently approached the Social Service Department with their problems, and some of these families are already known to have serious problems. Examples of places from where they have come include Trafford, Salford, Halifax, Winsford, Preston and Blackpool. As a result of contact with Social Service staff in their home towns, it is known that a family from Trafford and a family from Halifax both voluntarily walked out of secure Council housing accommodation in those areas to move to this new accommodation in Rhyl.

The following example of a press advertisement was spotted in the Manchester Evening News on the 22nd June, 1988 and read as follows:—

'SINGLE MOTHERS/PARENTS and children. Secure accommodation offered. DHSS welcome. Telephone Rhyl 4201 (Office Hours).'"

That is the number of the YMCA building in Rhyl.

The housing director continues:

"I have had discussion with the Deputy Manager of DHSS in Rhyl who advised that they have no power to prevent this type of situation arising or increasing. He advised that provided his staff were satisfied the claimants were genuinely in residence in this type of accommodation and were not here on holiday, then the claimants were entitled to board and

[Sir Anthony Meyer]

lodging payments, up to the maximum set down in DHSS regulations . . . The only limitation on payments of this nature would be to single persons under the age of 26."

That process is also damaging the efforts of the council and others to improve the West End of Rhyl, which is a rundown housing area.

As the housing director puts it:

"Rhyl West End is considered a stress area by Community Agencies as a result of the high levels of unemployment . . . anti-social behaviour, drugs and a general high demand being made upon various agencies, particularly Social Services. It has also been our housing stress area . . . with the high concentration of houses in multiple occupation. In a determined effort to reverse the decline of the Rhyl West End, the Council has adopted a housing strategy involving the declaration of Housing Action Areas, and with the support of the Welsh Office has either completed, or work is in progress on, six Envelope Schemes involving some 250 properties."

All that good work is liable to be undone if more and more properties in the area are snapped up by unscrupulous operators who will then scour the country for problem families with the promise of seaside accommodation paid for by the DHSS, and pour them into this most unsuitable accommodation, lining their pockets nicely at the taxpayers' expense.

It is easy to diagnose the problem; it is a lot harder to suggest a solution. There is an obvious racket, and an obvious discrepancy between the money that can be provided by way of housing benefit and what the DHSS can pay for bed and breakfast—and it is usually the sketchiest of breakfasts.

One thing is clear. This is a problem which calls for the tightest possible co-operation between the Department of Social Security, the Department of the Environment and the local authorities. I am not sure that the present arrangements have resulted from such tight co-operation, and I hope that during the 10 weeks of the recess those Departments and local authorities will put their heads together to good effect.

5.31 pm

Mr. Alun Michael (Cardiff, South and Penarth): I want to touch on another housing scandal, which also results directly from the Government's policies and shows the unacceptable face of the so-called enterprise economy. I want to challenge the Government on a matter of vital and urgent importance to millions of people which is given fresh impetus and urgency by the Prime Minister's shocking and uncaring reply in the House this afternoon.

The Prime Minister was asked about problems with house prices and she said that that should be left to action by the voluntary sector. The Leader of the House said the same. They meant that they do not care and will not act. I warn the Prime Minister and other Ministers that they cannot sweep aside the scandals of gazumping and the house price spiral so easily. Many right hon. and hon. Members have demonstrated that by signing early-day motion 1311 tabled by me and my hon. Friend the Member for Torfaen (Mr. Murphy) a couple of weeks ago. Many people outside the House applauded its terms. Let me briefly remind the House of what it says.

The motion suggests that we should regard a decent standard of housing for all as a minimum objective in a civilised society, and notes the appalling effects of the present spiral in house prices, particularly on young couples and other first-time buyers. It deplores the way in which gazumping can, at the last minute, snatch security from people who thought that they had reached agreement on a price for a home of their own. It calls on the Government to introduce emergency legislation for England and Wales, including the Scottish system for registering price agreements, at an early stage in order to achieve fairness for buyers and sellers alike, and to curb the excesses created by the pressures of the present over-free housing market. We hoped that that gentle appeal to common sense might receive a response from the Government, or perhaps a promise of emergency legislation, or at least a statement.

Mr. Roy Beggs (Antrim, East): Does the hon. Gentleman agree that any such legislation should also apply to Northern Ireland, because exactly the same thing is happening there?

Mr. Michael: I hesitate to suggest that something should be introduced for Northern Ireland, but I would happily endorse representations from Northern Ireland Members who sought the same end that I do in respect of England and Wales. There is a clear need for emergency legislation, and if the situation is the same in Northern Ireland I am sure that the hon. Gentleman will support my point this afternoon.

We expected some action from the Government—perhaps a promise of emergency legislation. After all, many hon. Members have illustrated the problem. We expected at least a statement, but at first there was nothing. Then, the weekend before last, it seemed that the Government had decided to respond to our plea and to do something. In a number of television and radio interviews, we saw and heard the then Secretary of State for Industry and Consumer Affairs talking of action to end gazumping and the house price spiral.

What a welcome and refreshing piece of news that was. The Minister specifically mentioned gazumping and the Scottish law, so we were pleased to have some reaction. We were a little perturbed at the suggestion that a voluntary code of practice for estate agents was all that was needed, but at least there seemed to be something on which we could comment; something on which a debate could be founded.

However, when we asked for details the following week, a mystery seemed to shroud the whole affair. There was no statement in the House of Commons. No consultative document was produced. There was not even a press release, although, as I have said, there was media discussion. When I contacted the Minister's private office, his staff could give no information.

Therefore, I tabled a series of written questions to Minister's from the Department of Trade and Industry asking for details of the proposals on which they intended to consult. The reaction has been simply to deflect those questions to the Attorney-General, the Secretary of State for the Environment, or whoever they could think of, exposing the fact that there was never any intention to tackle the problem of the house price spiral. There are no proposals. The announcement of consultations was clearly a sham and a piece of media hype. Instead, we have a shoddy case of buck-passing.

In my string of questions came the honesty of an answer from the Under-Secretary of State for Wales. When I asked what proposals he had under consideration to end

the practice known as gazumping in Wales and to slow house price rises, and what consultations he intended to undertake, he answered:

"I do not consider that Government intervention in the market for owner-occupation would improve the situation."

To say that that is an honest answer is to highlight its only virtue. Like the answers given by the Prime Minister and the Leader of the House this afternoon, it exposes the Government's callous indifference to a real problem. It exposes the Government's intention to run away from the scandal of house prices. It exposes the cynicism of a Government who want to look as if they are listening when they have in fact closed their minds to all pleas.

The Attorney-General and the Under-Secretary of State for the Environment have also given stonewalling responses which confirm that from the Welsh Office. The hon. Member for Broxbourne (Mrs. Roe) told my hon. Friend the Member for Edinburgh, Central (Mr. Darling):

"House prices are determined by individual buyers and sellers, and the Government do not propose to intervene in private negotiations."—[*Official Report*, 4 November 1987; Vol. 121, c. *725*.]

What an appalling and heartless response that is. Anyone—that must include most hon. Members—who has sought a first home or to move house will know that that is a traumatic and difficult process, governed by forces far outside the control of the individual buyer or the individual seller. Those answers expose the narrowness and bigotry of Ministers. The media hype of the Department of Trade and Industry appeared to offer care and humanity for a brief moment, but even that is being snatched away from us. Let me make it clear that, in his non-statement, the Minister was offering us very little in the first place. To suggest that a voluntary code for estate agents would solve the problem is manifest nonsense.

Rather than inaction or a voluntary code, the Government should bring in the best aspects of the Scottish legislation—it does not have to be the complete system—as quickly as possible, so that everyone is protected within a framework of law. There would be no need to bring in all aspects of the Scottish system. All that is needed is that element of certainty by which a price can be agreed and remain certain before all the legal niceties have been worked through.

At the moment, uncertainty is damaging to everyone. Those of us with homes do not gain, because if we sell our house it will have gone up just as much. Those without a home have the horror of seeing prices escalate beyond their reach. It is the young couples starting out in life and the elderly who want security in their old age who are most damaged by that situation.

The Government should come clean. If, as the Minister seemed to suggest on radio and television, the Government consult on the matter, they should set out the basis of consultation. Certainly a large number of people have a great deal of experience to recount because they have suffered personal loss in recent weeks and months. Talk of a voluntary code is a diversion. If the Government do nothing, they should say so clearly, and explain to people their reasons for that extraordinary and callous neglect. They should either give us the basis of the negotiation or say that they will do nothing before the recess so that we know where we stand.

Without an immediate and positive response now, before the recess, the Government must stand exposed by the answers of Ministers, the Leader of the House and the Prime Minister. They must stand guilty of failing to act, they must stand guilty of a cover-up, and they must be exposed as guilty of running away from the house price scandal and abandoning millions of ordinary people who need a simple framework of legal protection as they undertake the single most important financial transaction of their lives, to put roofs over their heads.

5.40 pm

Sir Fergus Montgomery (Altrincham and Sale): I am grateful for the opportunity to raise three issues before we adjourn for the summer recess.

In 1984, the Government were so concerned about advances in medical science relating to research projects involving the human embryo that they established a special committee of inquiry under the chairmanship of Lady Warnock. That report, which was far from unanimous, was subsequently debated in Parliament and it was clear that there was general opposition to the use of the human embryo for the purposes of research. Mr. Enoch Powell, who at that time was a Member of Parliament, chose to use his place in the private Members' ballot to introduce a Bill—the Unborn Children (Protection) Bill—to prevent the use of the human embryo for experimental purposes.

When that Bill was debated in Parliament, it received an overwhelming majority on Second Reading, but it failed to make progress due to the vagaries of our private Members Bill procedure, which make it possible for a small but determined handful of hon. Members to block progress on any Bill, no matter how great the support it enjoys in the House.

In the next Session, the Bill was again given a substantial majority when it was reintroduced by my hon. Friend the Member for Hyndburn (Mr. Hargreaves). Again, a majority blocked its progress. In the ensuing Session, my hon. Friend the Member for Bury, North (Mr. Burt) made an unavailing attempt to get the Bill through, and in the current Session, the Bill has been picked up by my hon. Friend the Member for Lancashire, West (Mr. Hind).

I should have thought that it was obvious that the House wanted to legislate on that subject. Recognising that, the Government produced a consultation document, and after receiving evidence, last year published a White Paper setting out their plans for legislation which would involve bringing forward a Bill with alternative clauses —one allowing embryo experimentation and one preventing such experimentation. Indeed, during the last general election, they gave a commitment that legislation would be brought forward as soon as practicable.

Therefore, I hope that the inclusion of such proposals will appear in the forthcoming Queen's Speech. But there are disturbing rumours that the Government have no intention of taking action on that important issue. I do not believe that the House should rise for the summer recess until we have had an assurance from my right hon. Friend the Leader of the House that he accepts that failure to legislate would be greeted with profound disappointment by many hon. Members and by millions of people in the country.

Similarly, we cannot go into recess with clear consciences until we have reached a decision on abortion law reform. I have raised that issue before, and I make no apology for raising it again.

[Sir Fergus Montgomery]

It was clear from the repeated majorities in favour of the Bill introduced by the hon. Member for Liverpool, Mossley Hill (Mr. Alton) that the House believes that the time is long overdue for the reform of our too-liberal abortion laws. The Abortion (Amendment) Bill was a limited measure and would have allowed the House to reach a decision on this important issue. However, the Bill was lost because a small but determined group of opponents used the procedures of the House to prevent the necessary votes from being taken. All that was needed was a little extra time. All the arguments had been made and people outside Parliament could not understand why, having debated the issue, Parliament was prevented from expressing its will.

I hope that, before we rise, we can receive from my right hon. Friend an assurance that in the near future the Government will find some way for the House to reach a conclusion. I warn my right hon. Friend that the problem will not go away. If no action is taken, similar Bills will continue to appear, and the more that opponents of abortion reform do to prevent a decision being reached, the more the House will be brought in disrepute.

Unless those matters are dealt with before the House rises, many right hon. and hon. Members will not be able to start the recess with easy minds, and we will join that other large group of deeply troubled people—the Barlow Clowes investors, some of whom, through the collapse of the Barlow Clowes companies, have lost their entire life savings. Those people were not greedy, and they were not speculators; they are ordinary retired people, some of whom invested their redundancy payments in that unfortunate venture. They have in common a sense of disbelief and shock at what has happened to them.

I am always wary of giving publicity to constituents' private problems, and many constituents have told me about their heavy losses over this fiasco. However, a church in Altrincham has been hit by that debacle. A recent article in the *Manchester Evening News* stated:

"An Altrincham vicar fears his church has lost £42,500 invested in the crashed £190 million empire of Cheshire tycoon Peter Clowes.

Building work at St. John the Evangelist, in St. John's Road, Altrincham, has been left unfinished after construction of a parish and community centre in the west end of the Victorian building stopped days after the crash."

It went on to say:

"they went ahead with the investment on the advice of 'a practising Christian', Mr. Gordon Pettie. His Poynton-based Gordon Pettie Investment Services was last week suspended by Fimbra, the watchdog for financial intermediaries.

The money came from the sale of the church hall alongside St. John's, which is a landmark in the Altrincham area."

Later in the article the vicar stated:

"'What really sold us on this investment was that the brochure for BCI portfolio 68 implied that all the money would be invested in gilts.'

In the event, when the liquidators moved in they discovered that out of £138 million invested in the offshore BCI fund only £2 million had been placed in gilts, and there was only a further £24 million in bank accounts."

I was delighted that my right hon. Friend the Secretary of State for Trade and Industry set up an urgent inquiry by Sir Godfray Le Quesne, and we can expect a report in mid-October. I went to see my right hon. Friend the Secretary of State on behalf of my constituents. He told me that he had read every letter that had been sent to the Department of Trade and Industry by Barlow Clowes investors. He had been saddened and upset by some of the letters; he promised that the report would not be a whitewash and that it would get at the truth.

However, I was disturbed to read in the *Daily Mail* on 25 July:

"A battle between Trade Secretary Lord Young and virtually the entire Tory party is boiling up over the Barlow Clowes financial scandal.

He has told MPs he will vigorously oppose Whitehall compensation for about 17,000 small investors."

It continues:

"But Lord Young, fully backed by the Treasury, is digging in hard. It is not so much the money as the principle. If the Government is found to have been negligent, the Barlow Clowes affair could become the benchmark for other cash claims on Whitehall when other firms crash on the Stock Exchange."

That is not good enough. If the report proves that there were faults in the Department of Trade and Industry, then some compensation must be paid.

Many of my constituents have told me that they invested in Barlow Clowes because it had the stamp of approval from the Department of Trade and Industry. Many investors feel that they should have been alerted long before the crash.

Therefore, before the House rises, there should be a statement that the Secretary of State for Trade and Industry has not set his face against compensation, if it is proved that there is culpability at the Department of Trade and Industry. I hope that justice will be done for the 18,000 unfortunate investors.

I hope that we can have a statement on those three important subjects—the protection of the human embryo against experimentation, abortion law reform and the need to reassure the Barlow Clowes investors—before the House rises for the summer Adjournment.

5.49 pm

Mr. John Garrett (Norwich, South): I want to follow the issue raised by my hon. Friend the Member for Cardiff, South and Penarth (Mr. Michael), although I hasten to add that there was no collusion between us.

Before the House rises, I wanted to consider the stress that is caused by the shortage of affordable housing to rent and to buy, which is at its worst in East Anglia, and worst of all in my constituency. The problem is reaching crisis proportions, and is a result of Government policies, high mortgage rates, uncontrolled house prices and a virtual end to house building by local authorities.

I shall exemplify what I have to say by showing the extent of stress caused by these factors in my constituency. In Norwich, a small terraced house costs about £45,000 —although it may have gone up while I am speaking. It is not unusual for the price of a house like that to rise by £1,000 overnight. Gazumping is rife. Many of my constituents have complained to me that they wish that the Government would follow through an ostensible promise made by a Minister last week to do something about gazumping, if only by moving to an approximation of the Scottish system.

Norwich has the highest rate of house price increases in the country. Last year, house prices in the city rose by 40 per cent., and in the last quarter by 25 per cent. I do not know whether the changes in the Finance (No. 2) Bill will make any difference from the end of this month, but at the

moment it looks as if house prices are rising geometrically, with about 50 per cent. increases every half year, as against 40 per cent. in the whole of last year.

East Anglia in general, and Norwich in particular, have traditionally been low-wage areas. Many people there work in occupations with an average wage of £6,000 a year. So even if a building society or insurance company is willing to offer a multiple of three times a person's income, the cheapest house is still out of reach. If a person and his partner can raise between them three times the former's income and one and half times the latter's, the smallest terraced house will still be out of their reach.

The council's waiting list contains 5,000 applicants—the highest number ever—of whom 3,500 are now in shared accommodation. Five hundred elderly or disabled people are on the waiting list for sheltered accommodation, of which the city has 170 units. The waiting list for such accommodation can be imagined. A typical elderly person waiting for transfer to more suitable accommodation—typically from a house on an estate into a ground-floor flat, sheltered accommodation or a bungalow—has a wait of four and a half to five and a half years. Many of them die while on the waiting list.

A single person's average wait on the list is five years or more, so many single people end up sharing accommodation in houses in multiple occupation. The number of such houses in the city has risen dramatically in recent years. Many of them are overcrowded and unsatisfactory, with poor facilities and inadequate fire safety standards. The council's programme of inspection has been put under pressure by the sheer number of properties to be visited, and it is not even known for certain how many there are.

Many families with children in upper flats are in desperate need of suitable accommodation. There are 1,700 such people on the waiting list with 50 per cent. or 100 per cent. priority. Not one of my surgeries goes by without a couple or a single parent being reduced to tears by the fact that they are stuck in an upper flat with no prospects for years to come of moving themselves and their children into a more appropriate property with a garden and a space to play in which the children can be supervised.

Norwich city council used to have one of the finest housing records in the country, with 25,000 council houses under its control. Ten years ago it built 528 in one year; in 1988 the prospect is that it will build 76, of which 20 or 30 will be sheltered accommodation. It will take 20 years to clear the backlog of private house owners who are waiting for home improvement grants under present Government allocations.

The city of Norwich housing committee's annual report shows the financial contribution that the city can make to decent housing. Like any other district, it draws up an annual housing investment programme for new housebuilding, improvements and modernisations. This year's bid was for £22 million, part of which would be met by borrowing. However, borrowing for housing investment by local authorities must be approved by the Government, who have consistently refused to allow Norwich to invest in local housing. The amount approved was £5 million. As a result of being able to keep 20 per cent. of the funds realised from the sale of council houses, the final outturn was £12 million. Local freedom to set a realistic and responsible budget for housing investment has all but disappeared.

To summarise: extraordinary market forces in the private sector have driven owner-occupation beyond the means of many local people—particularly young people setting out on an independent life, and newly married people. These forces have created a shortage of rented accommodation too. Government policies on housing investment mean that the council is trying to meet the need for affordable rented property without adequate resources, which are continually refused by the Government. As a result, housing waiting lists are longer and longer, there are new levels of homelessness and more people are being forced to live in overcrowded and unsatisfactory conditions.

As I said before, Norwich has an exceptional record for good housing. I am pleased to say that it has been under Labour control for 55 years. It now has the largest Labour majority in its history and I have no doubt that it will be under Labour control for the rest of my lifetime.

Given the opportunity, the council could provide the decent housing for which it was famed until the onset of this Government. Government policies have forced all this housing stress on my constituents, and that is a matter that should be drawn to the Government's attention before the House rises.

5.58 pm

Mr. Michael Latham (Rutland and Melton): I thank you, Madam Deputy Speaker, for calling me, as the first non-knight to speak from the Conservative Benches in the debate.

I agree with the remarks made by my hon. Friend the Member for Altrincham and Sale (Sir F. Montgomery) about Barlow Clowes. I raised this subject with my right hon. Friend the Leader of the House in business questions this afternoon: it is a matter of the greatest importance. If, when the report appears during the recess—as presumably it will—it blames the Department of Trade and Industry directly or indirectly, many hon. Members will expect immediate action to be taken to compensate those who have been left in a distraught state.

There is no point in shirking this. We must ask ourselves, in the event that the DTI is blamed, who takes the responsibility? If nothing happens and we go on as before, we shall have to conclude that ministerial responsibility no longer counts for anything in this country. I shall expect something to be done immediately if blame is apportioned to the DTI—and so will my constituents who have been affected. I cannot say this too strongly to my right hon. Friend.

A few days ago, a disturbing report appeared recommending that the Government should consider abandoning the formula of the resource allocation working party—the so-called RAWP formula—which was first put in place by the last Labour Government, specifically by the then Minister of State responsible for the Health Service, Roland Moyle.

I first entered the House as a Member representing Leicestershire in 1974. At that time the Leicestershire health authority—or its predecessor, the area health authority—received only 75 per cent of average National Health Service funding. Largely as a result of the RAWP formula, it is now up to 96 per cent., but I stress that we are still 4 per cent. below the average. The RAWP formula should not be taken away from Leicestershire. Further, it should not be taken away from the whole Trent region,

[Mr. Michael Latham]

which, as the hon. Member for Ashfield (Mr. Haynes) knows only too well, is poorly funded. It is essential to the Trent region and Leicestershire district health authority. I entirely understand why Ministers want to help London hospitals, but they must not do so by messing around with the RAWP.

We must give more attention—I know that we had a debate on this subject on Tuesday—to the state of our roads, especially our motorways and the need for more bypasses. The M1 and M25 are an absolute scandal. It is disgraceful that deplorable forecasts were made years ago, yet we are still building new roads that will be over capacity before they are even opened.

When Ministers bring forward the transport policy programme allocations to local authorities later this year, money should be found for essential bypasses. Traffic is fast grinding to a halt in Oakham in my constituency. We must have a bypass, but it appears that it could be 10 years or more before anything is done. As a modern industrial country, we should be ashamed of the state of the M25 and M1 and of the delay and inconvenience that they are causing motorists and lorries taking essential exports abroad.

Please will my right hon. Friend the Leader of the House, as a matter of urgency when we return after the recess, arrange for the annual debate on the reports of the Public Accounts Committee? There is an essential wealth of material to be brought to the attention of the House about gross waste of money by one Department after another, especially the Ministry of Defence. We need to hear how Ministers will respond to the reports of the National Audit Office and the Public Accounts Committee. Apart from my constituency work, I regard serving on the Public Accounts Committee as the most important and constructive work that I do in the House.

6.1 pm

Mr. Roy Beggs (Antrim, East): I welcome this opportunity to bring to the attention of the House a problem about which I feel as strongly as hon. Members do about the problems in their constituencies—the Government's privatisation proposals for Northern Ireland.

It has already been said that the Northern Ireland electricity service will be privatised. An announcement has been made about Harland and Wolff, and, to top it all, Short Brothers plc is to be privatised. My right hon. Friend the Member for Lagan Valley (Mr. Molyneaux) will address these problems later, but I express my views in the hope that the Government will respond positively to our joint appeals.

Today, a group of responsible trade unionists from Belfast came to London to express to hon. Members their concerns about the disasters that they perceive of massive job losses and irreparable damage being done to the Northern Ireland economy at a time when we need evidence of continuing good will and support. I sincerely hope that the Government will not try to provoke confrontation and industrial conflict, because it can and should be avoided at all costs.

Ulster Unionist Members do not dogmatically support nationalisation or privatisation. We recognise the merits of privately managed industry, and, in certain circumstances, further privatisation of industry in Northern Ireland may gain acceptance and support, but the time and circumstances are not right for wholesale privatisation. It is being done for the worst possible reason—to gain the Prime Minister's approval by implementing her policies regardless of the consequences for Northern Ireland. To some, that would seem the only possible reason for the lemming-like rush to privatisation.

The Shorts sell-off will be regarded as sounding the death knell for Ulster industry. Following the proposals for Harland and Wolff and the Northern Ireland electricity service, it shatters confidence in our fragile economy and will produce uncertainty across our weak manufacturing base.

As elected representatives, we cannot condone complacency or inefficiency. Evidence of industrial co-operation between trade unions and management has shown a commitment to higher productivity, greater efficiency and a desire to give value for money. Our recent experience is a catalogue of collapse among major industries. Private sector companies such as ICI, Courtaulds, Klingers, British Enkalon and Careeras in Carrickfergus—which for several years received Queen's awards for exports—have all closed down, despite their efficiency and productivity. Confidence is therefore not inspired by claims that private sector industry will secure long-term employment.

Jobs at Shorts can be sustained until it is profitable. Jobs in all sectors could be secured if assistance were given through public funding. The current spate of privatisation proposals do nothing to give hope to young graduates, school leavers, the long-term unemployed, those undergoing retraining or those whose jobs are threatened.

Privatisation could result in more damage to our industrial base than the sustained terrorist campaign of the past 20 years. If there is a withdrawal of support for large industries, terrorists will claim success and say that they have had a further victory in their "Brits Out" campaign.

Hundreds of companies take sub-contract work from large firms, thus providing employment throughout the Province, in which people from all sectors can share. The whole industrial community, because of the position at Shorts, feel threatened. Managers employed in the public sector foresee an opportunity for greater reward in private industry. Their interest in, and judgment of, privatisation is coloured by the salary increases that have occurred after denationalisation.

As elected representatives, my colleagues and I continue to support the public funding of industries in Northern Ireland. Since direct rule was imposed, the policies pursued by successive Governments have not produced peace, security or prosperity. We are tempted to ask whether privatisation is the final sabotage. When will the Government listen and respond positively to Northern Ireland's representatives?

Shorts is recognised internationally, and operates at the frontier of modern technology. We want it to remain a single entity. We accept responsibility for the allocation of necessary funding from the Northern Ireland block grant to sustain existing industries until there are other employment alternatives for our people. The credibility gap between the ordinary people of Northern Ireland and the Government is growing and becoming more difficult to bridge.

We appeal to the Government to recognise the special difficulties of Northern Ireland, such as high unemployment, which at current job-creation rates, will not be significantly reduced for nearly 20 years. There are more people unemployed than there are employed in our wealth-creating manufacturing sector. We have still to benefit from the boom in British business that is so often referred to. Government support for our large industries is needed to maintain progress, to maintain the confidence of existing investors and to encourage potential overseas investment in Northern Ireland.

I am tempted to ask whether there is a deliberate policy to secure equal unemployment for everyone in Northern Ireland. The privatisation proposals could achieve just that. We ask for an opportunity to get Northern Ireland manufacturing industry on a sound base before any decision on privatisation is taken. Her Majesty's Government could prove that there is no economic withdrawal by withdrawing the proposals to privatise Shorts.

I appeal to the Secretary of State for Northern Ireland and his Ministers to undertake to support the management and trade unions at Shorts with an imaginative investment policy, to modernise facilities and machinery and support development projects that will ensure the continuation of Shorts as a design/engineering aircraft manufacturer. That is a much better option than a sell-off, with all its dangers for future employment. I hope that there will be a positive response before the House adjourns.

6.11 pm

Sir Dudley Smith (Warwick and Leamington): As I said yesterday in the debate on immigration, in global terms we are a small island with a large population. It is vital that we should consider in detail the structural and physical development of our country so that sensible, enlightened and protective systems are in place at the beginning of the next century.

With some glaring exceptions, our record on planning and protection has been fairly good, particularly when compared with continental countries. It has been better than large city reconstruction, where architects and builders have effectively ruined so many city centres. The pressures for expansive further development appear to be irresistible—some of them have been mentioned today by Opposition Members—and it is essential that we should adopt a fresh and refined approach.

For years I have been saying that we must guard against the ultimate concrete jungle running from the Trent all the way to Brighton. However, every generation and every decade brings with it more building and a worrying diminution of the countryside. There are new pressures, for a variety of reasons. The chief reason is the need for less land for agricultural purposes, and there is the question of what use should now be made of it. More and more people want to live in the south-east—in London, the home counties and the southern part of the west midlands.

Mr. Tony Banks (Newham, North-West): Will the hon. Gentleman give way?

Sir Dudley Smith: Usually I would willingly give way, but I wish to be brief because many colleagues want to take part in the debate. I intend no discourtesy to the hon. Gentleman, and I hope that he will understand.

My concern has been stimulated by developments in my immediate area. The probable opening of the M40 motorway next autumn has turned mid-Warwickshire into a gold-rush area. Everything is booming. The value of many houses has doubled in a short time. With the coming of the motorway, people, companies and national organisations are discovering that mid-Warwickshire is the heart of England and that it has excellent communications, is pleasant and desirable, with a good infrastructure and atmosphere. The result is escalating house prices, almost on a par with London, and the inevitable pressures for much more building.

The extraordinary thing is that our population has increased far less than was anticipated 30 years ago and will show only modest increases for the foreseeable future; yet we have a vast concentration of population in the south-east and it is now beginning to spill over into the west midlands. The penalties are over-priced property, traffic snarl-ups of horrendous proportions, referred to by my hon. Friend the Member for Rutland and Melton (Mr. Latham), and a general environment that is far less attractive than it used to be.

It is opportune that this week the Countryside Commission produced a discussion paper entitled "Planning for change: Development in a green countryside". That should be debated in the House and I hope that we will have an opportunity to do that when we return in the autumn. After reading the excellent report, which is still in its draft discussion stage, and listening to the debate in my area on the intensifying pressures, I am convinced that we need to embark on some essential courses.

We must maintain the integrity of the green belt and the continued separation of urban and rural areas. There must be a much more determined bid to convert derelict, vacant and available land in towns and cities into housing areas. I know that there are already rules on that, but they do not appear to be effective enough. We need a latter-day Domesday Book survey, a veritable crusade by the Department of the Environment, to achieve an impact. We must retain the integrity of attractive and well-developed communities, such as those in mid-Warwickshire, despite the calls for considerable expansion due to population pressures.

We need new villages, attractively and imaginatively developed on suitable sites, with housing of an expensive and modest type, which is compatible with a village atmosphere and which does not look as if it had been transported from an urban housing estate. We need to revise our planning laws, particularly the appeals procedures, which at present enable many developers to press and press until finally they overthrow the decisions of elected councillors and the wishes of the local residents.

Those are vital and substantial matters for the future. They certainly need to be discussed, and I commend a reading of the report to all hon. Members who are interested in the future of our country. It is our responsibility, and we must discharge it properly.

6.17 pm

Mr. Harry Barnes (Derbyshire, North-East): The motion we are discussing says:

"the House shall not adjourn on Friday 29th July until Mr. Speaker shall have reported the Royal Assent to any Acts which have been agreed upon by both Houses."

I do not know whether there are any outstanding Acts or whether the poll tax Bill has yet returned for its Royal

[Mr. Harry Barnes]

Assent. If it has not, I would gladly see it lost until the next general election rather than put such a constitutional and democratic monstrosity on the statute book.

We are about to move into recess for almost three months. That harms considerably our constituents' interests. Hon. Members have no parliamentary avenues for the redress of grievances on behalf of constituents. There are no parliamentary questions, written or oral, no petitions can be presented, no early-day motions can be presented for Departments to read, no Adjournment debates and no interventions or contributions in debate. There is one value in Parliament going into recess for three months, and that is that no fresh legislation can be put on the statute book in that time.

The position for constituents is serious. The only avenues that remain open to hon. Members are to write letters to Ministers, many of which take a considerable time to be answered during the recess, or engaging in publicity. The chances for publicity are greater for some hon. Members than for others. As an honest tradesman and a new Member, I am wedged between my hon. Friend the Member for Bolsover (Mr. Skinner) and my right hon. Friend the Member for Chesterfield (Mr. Benn). Their avenues for publicity may be somewhat greater than mine, However, if the House is sitting, I can follow parliamentary avenues.

I grant that it has been a long slog since Christmas and that the House has examined a vast amount of legislation. Hon. Members are ready for a meaningful break. I suggest that we develop different working patterns, and I am glad that the Leader of the House and my hon. Friend the Member for Holborn and St. Pancras (Mr. Dobson) are present to hear my suggestion. I believe that we should operate in three or four-week cycles and then have a week off from parliamentary duties so that we can concentrate on constituency work and catch up on correspondence. We could then limit ourselves to a six-week summer break which would be concentrated more clearly on holiday periods and party conferences. In that way, our constituents would not lose their avenues of redress. Our constituents' interests dictate the introduction of such a working pattern, and it would allow constituency and parliamentary matters to be dealt with fully and properly.

A delegation from Derbyshire county council has just visited the Department of Trade and Industry. The council wants intermediate status to be given to the Chesterfield travel-to-work area. To make the sort of speech that I should make about the proposal will mean a wait of three months, but perhaps I may mention it briefly today. The criteria for determining the map of assisted areas were set out by the former Minister of State, Department of Trade and Industry—the hon. Member for Kingston upon Thames (Mr. Lamont)—when the review of regional policy was presented to the House on 28 November 1984. He said:

"The map has been drawn on the basis of objective criteria, and unemployment, long-term unemployment, job opportunities, industrial structure and peripherality, have all been taken into account."

Earlier, he said:

"In redrawing the map we considered the present and future employment patterns of each area, along with other factors, including the risk of distortions where non-assisted areas are adjacent to assisted areas."—*[Official Report*, 28 November 1984; Vol. 68, c.936-42.]

If I had time, I would establish why those criteria mean that the Chesterfield travel-to-work area, which covers Chesterfield constituency, sections of Bolsover constituency and the great bulk of my constituency, should be considered for intermediate status. The area has suffered tremendously from cuts in the coal industry and its future is unsure. It requires Government assistance, and certainly intermediate status.

An area that retains an element of coal mining and coal dependency will have tremendous problems when electricity is privatised, with all that that entails for the competitiveness of coal. The ports Bills that are proceeding through the House—my district council has laid objections to the North Killingholme Cargo Terminal Bill and the Associated British Ports (No. 2) Bill—will allow cheap coal from overseas to flood into Britain, and we know that South African and Colombian coal is produced in circumstances of great exploitation. A map given to me by the Opencast Executive of British Coal shows its interests in the constituency. Opencast developments would turn the area into a dustbowl. They will produce some jobs, but they will not be permanent and they will not replace the jobs lost in the deep mines.

Another problem in the area is the non-development of the east midlands railway line. The east coast line is being electrified, and the danger facing Derbyshire is that places such as Sheffield will be linked to the east coast line, so that passenger and goods development will be maintained in the north while the east midlands will be unable to compete. It could lead to a decline in goods services in the east midlands. In that context, there is a clear case for granting intermediate status, as one method of Government assistance, to the Chesterfield travel-to-work area.

Much more could be said about that, and I hope to do so in the House in the future. If we had more sensible working practices, that opportunity would come sooner rather than later.

6.25 pm

Mr. John Wilkinson (Ruislip-Northwood): I hope that the House will not rise for the recess until the Government have made a statement on the reasons why they decided not to support further the HOTOL project. It would have been even better if the Government had allowed parliamentary time to debate an issue of such magnitude. It was an abuse of the House that my right hon. and learned Friend the former Chancellor of the Duchy of Lancaster announced in a written answer that the Government would withhold further funding for the project.

There is no project of comparable significance for the future of space development in Britain, and experts much wiser than I have commented that the project offered immense hope for the future. Conventional launchers, such as Ariane, the Atlas Centaur and the shuttle, will prove far too costly in the future, and when horizontally launched reusable space vehicles become available, projects such as HOTOL will become the norm because they will be infinitely cheaper than conventional systems for putting payloads into space.

In November last year the Government were in a minority of one in dissociating themselves from the European Space Agency's long-term space programme. The Government decided not to support the optional

programme, Ariane 5—a man-rated heavy launch vehicle —secondly, not to support Hermes—a re-usable mini-shuttle—and, thirdly, probably not to support Columbus —a manned module—although they withheld their decision on this. I am glad to learn that the United Kingdom will participate in a platform associated with Columbus, which is of the greatest importance because it is Europe's contribution to the international space station project that is being led by the United States.

Space stations are the building blocks for future space activities. The Soviets know it well and have concentrated on ambitious programmes. For example, they are developing a very heavy launcher—Energiya—which will form the basis of a shuttle system. They have a somewhat less powerful launcher, the HL16, which will carry a space plane rather like Hermes. They have had Salyut and Mir space stations in orbit for protracted periods. They intend to send probes to Phobos, and eventually they will send their space vehicles to Mars and beyond.

In short, what is at stake is of the greatest strategic, as well as commercial and technical, importance, yet my right hon. and learned Friend the former Chancellor of the Duchy of Lancaster thought it appropriate to fob off Parliament with a curt written answer.

My right hon. Friend the Leader of the House will have found me repetitious and boring in the past, because for week after week and month after month before the ESA ministerial Council meeting last November I suggested that the Government should find time to debate space policy. It seems to have been impossible for them to do so, so it is not surprising that they were at odds with expert opinion. In that sense, in this country we are somewhat poorly provided in Parliament. In the United States, in Congress there are Senators Glenn of Ohio and Jake Garn of Utah and a former senator of New Mexico, all of whom have been astronauts. Congressman Nelson, the chairman of the present House of Representatives space committee is also an astronaut. In the United States, space is a normal activity. It is a totally everyday activity whose commercial potential and strategic significance are understood.

In this country, we believe that space is weird and wonderful, out and beyond and fantastically expensive. Are we to suggest that our people in future will not be able to play a part in space activities commensurate with their technical competence and their undoubted innovative genius? The Government have been woefully shortsighted.

My emotions have alternated between fury and sorrow. To be candid, sorrow has predominated. I do not particularly blame my right hon. and noble Friend Lord Young, the Secretary of State for Trade and Industry. He does not have experience of international collaboration. My right hon. and learned Friend the former Chancellor of the Duchy of Lancaster similarly lacks such experience. Collaboration is the name of the game. Space is a totally international business. We have had a meaningful, worthwhile space programme in Europe because we have collaborated and worked together with partner nations.

By opting out of the European space plan in November, the Government have put themselves at a disadvantage. If we hope to attract partners for HOTOL, it would have helped if we had supported other programmes in the European Space Agency's overall strategic programme. International collaboration is a game of quid pro quo. We enter some programmes which do not appear to have short-term national interest to us and support programmes which may be of benefit to other partners. Overall, however, the benefit to all partners is indubitable and must be recognised.

I know that the Government judge these matters by short-term commercial criteria. We opted out of the launcher business deliberately when we allowed the Blue Streak launcher, which became Europa I, to be cancelled. Fortunately, the French pursued the Ariane series of rockets. Arianespace, the commercial launch company, is now making extremely good profits. It has a large order book and with the temporary failure of the shuttle programme it offers great potential for the future. Had the French not shown their strategic vision, Europe would be out of the space business in any significant sense.

The Government said that the European Space Agency was an expensive club. They said so out of sheer prejudice and blind ignorance. With its Ariane series of launchers, the Spacelab, the meteosat series of remote-sensing satellites and with ERS1 in the future and other new programmes, not to mention scientific programmes like Giotto and others, ESA has shown that Europe, for a relatively small investment, can offer a capability fully comparable with the United States of America and the Soviet Union, although on a smaller scale.

I do not want to see this country relegated to the third eleven. It is not worthy of the United Kingdom. In the technical area within Europe, we should be playing a leading role. We have the capacity to do so. When Ministers and others say that we cannot afford it, I ask, as I said to my hon. Friend the Member for Havant (Sir I. Lloyd): if we can somehow find £50,000 million per annum for social security, why cannot Ministers find £4 million in the next four years to continue the project definition of HOTOL? Ministers' statements are not true. They do not make sense and the Government are shortsighted. I am very sad and particularly regret that the Government did not act in the proper parliamentary way and allow us a debate or at least make a statement to the House so that we could question Ministers on what appears to be a quite extraordinary decision.

6.34 pm

Mr. Nigel Spearing (Newham, South): We should have at least two debates before we adjourn. The first should be on the Committee stage of the European Communities Finance Bill whereby the House is asked to vote £800 million extra to the European Community. We understand that that may be paid before Royal Assent. Although that may be just legal, it is dodgy.

The second debate that we should have is even more important, not in procedural terms, but in current terms. We should debate the appointment of commissioners to the European Economic Community. There have been acres of space and comment in the press and commentary in the news media on that subject. My hon. Friend the Member for Linlithgow (Mr. Dalyell) has raised questions germane to that matter relating to the Westland affair. The new appointments risk weakening our interests in Europe.

Mr. Bob Cryer (Bradford, South): Will my hon. Friend give way?

Mr. Spearing: If my hon. Friend will excuse me, time is of the essence and I want to make as brief a speech as possible.

[Mr. Spearing]

One of those to be appointed as a commissioner has a questionable track record and we do not know the other. The latter will be a novice and less experienced than the former Member of this House, Mr. Clinton Davis. Lord Cockfield did his job too well. He spilt the beans and said what it was all about. It is wrong, therefore, for the Prime Minister to attach M. Delors. Anyone who knows anything about European legislation and the speed with which it is now coming out of Brussels will be aware that 80 per cent. of the legislation will come from Brussels in a few years time is a very reasonable estimate from M. Delors and reflects the degree to which the House will lose power.

We should not expect any of our commissioners to do anything about that. They take a treaty oath and one of the major objectives of the treaty of Rome is European union. Two rookie novice commissioners can at best only affect the speed and possible terms of the movement; they cannot question the principles.

Recently the Prime Minister covered up the embarrassment of the appointment with her reshuffle and by banging the nationalist drum. I agree with the objectives of that in terms of her approach to the EEC, but she does that on entirely the wrong basis. She does it from a basis of certain ignorance. That ignorance was also shown by the right hon. Member for Old Bexley and Sidcup (Mr. Heath) about 14 years ago. He said that the powers of the Queen would not be affected. He did not realise that this legislation reaches the citizens of this country direct without requiring Royal Assent or Her Majesty's signature.

I want to raise the question of ignorance by referring to what the Prime Minister said in an article in the *Sunday Express* last Sunday. She was talking about power and Parliaments and said:

"When Europeans start talking about European union and this, that, and the other, I always say: 'What do you really mean? I can't see any of you going home and saying to your Parliaments: 'Look, I've taken away all your rights to do anything about what happens in this country; it's all going to Europe.'

They are not going to do it, however much they talk. I wouldn't be prepared to do it anyway."

The Prime Minister has done that. However, I must be careful. She used that little word "all". That is the way the Prime Minister goes about her work. She will include a little word which qualifies quite a lot.

We have given that power away. The Prime Minister has done that perhaps unwillingly. We have the Single European Act, which neither the Prime Minister nor the Foreign Secretary signed. In fact, the Minister of State, Foreign and Commonwealth Office was sent off to sign it before she was a Privy Councillor.

That Act is still not properly printed in this country in terms of the new treaty of Rome. That says:

"Resolved to implement this European Union."

Note the capital E and the capital U. That is not economic and monetary union, because the last line of the preamble to the single European Treaty says:

"approved the objective of the progressive realization of Economic and Monetary Union."

There are two different things. The European Union is in the treaty of Rome to which the Government have given their assent.

Article 8A of the Single European Act provides:

"The Community shall adopt measures with the aim of progressively establishing the internal market over a period expiring on 31 December 1992".

It says "expiring" and not "starting".

Article 100A, which is important, says:

"The following provisions shall apply for the achievement of the objectives set out in Article 8A. The Council shall, acting by a qualified majority on a proposal from the Commission in co-operation with the European Parliament".

In other words, anything to do with the realisation of that market in 1992 can be achieved by the majority vote of the Council of Ministers, even against the will of the Government and possibly against the will of the House.

Yet the Prime Minister says that she has not given power away. She implies that she has by the use of that misleading word "all". When talking on the Jimmy Young show she gave the impression that in future she will be able to hold the line, but that is not true because the Single European Act was put through the House in the summer of 1986. However, the small print was not understood by Conservative Members.

The Prime Minister wants the fruits of European union, or at least economic and monetary union, but the means by which it will be achieved are, of course, ill based. It is not a co-operative organisation, such as GATT or the European Free Trade Association or any of those things that hon. Members think it may be. The EEC is coercive and autocratic. The power is in Brussels. It is arbitrary political power, and we are told that it can be controlled in one of two ways: by the House taking power to control what our Ministers do there—and if the Prime Minister is concerned about parliamentary power, that is something to which she would agree and which she would implement —or by all the power going to Strasbourg and there being some sort of European Parliament, which would be a united states of Europe without the states, because there is no power for national assemblies in the treaty of Rome. The Prime Minister cannot bluster and fluster, because it is in the treaty and she has done what she told Jimmy Young she would never do.

I turn briefly to the questions of my hon. Friend the Member for Linlithgow (Mr. Dalyell), because they are important and they have not been properly answered. We must remember that terrible weekend when there was the official leak of the letter of the Solicitor-General, which was clearly solicited with a view to it being leaked before 4 pm on Monday 13 December 1986. It was only by getting it out at that time that the views of the then Secretary of State for Defence could be put into question with the imprimatur of the Solicitor-General. That letter contained many qualifications that were not part of the leak, so it was clear what was intended. It is a matter of evidence that the Prime Minister not only knew of it, but she condoned it; indeed, some people believe that she may have suggested it.

In paragraph 183 of its fourth report 1985-86, HC 519, the Select Committee on Defence said:

"In replying to a supplementary question after her statement in the House on 23 January the Prime Minister said of the extract from the Solicitor-General's letter: 'It was to get that accurate information to the public domain that I gave my consent'. In her statement the Prime Minister had said that her office did not seek her agreement, and later in answer to supplementary questions she said 'I have said that I was not consulted at the time' and 'I say again that I was not consulted'. In confirmation of this Sir Robert Armstrong told us that he asked both Mr. Ingham and Mr. Powell whether they sought clearance from the Prime Minister and they told him they did not. Sir Robert understood from the Prime Minister that her words in column 455 of 23 January, quoted

above, were a slip of the tongue. When questioned on the point on 27 January the Prime Minister explained that she had given her consent to an inquiry but did not give her consent to the disclosure."

It continues in bold print:

"The evidence is that the action of the Prime Minister's office on 6 January in relation to the disclosure was without her direct authority. She has stated that she had no knowledge on 6 January of what was taking place. We accept this."

The Prime Minister may not have had any knowledge on 6 January. She said that she was not consulted at the time, but she may have been consulted before.

On 23 January 1986, the Prime Minister said:

"In so far as what my office said to the Department of Trade and Industry was based on the belief that I should have taken that view, had I been consulted, it was right."

In other words, she said that they had acted in line with what she would have done had she been consulted. However, they would not have done that without knowledge of what was in her mind.

On the same occasion, the right hon. Member for Woking (Mr. Onslow) asked the right hon. Lady a friendly question and she hit out from the boundary. She walked down the crease. She said, "We must get this into the public domain." She further said:

"It was to get that accurate information to the public domain that I gave my consent."—[*Official Report*, 23 January 1986; Vol. 90, c. 450 and 455.]

That was quoted by the Select Committee.

How did she get out of it? That could not have been the consent to the inquiry, because the question of the right hon. Member for Woking was not about that. The Select Committee took up that matter and asked questions of that economist of the truth, Sir Robert Armstrong. It was followed up in questions 1251 and 1252.

"1252. You have not taken any opportunity to clear that up yourself in the post facto of your inquiry? (Sir Robert Armstrong.) I gather from the Prime Minister it was a slip of the tongue."

A slip of the tongue, which we all sometimes make, is when we say something that is not true. I suggest that this was not one of those at all. It was something that was only too true and something that the Prime Minister wished she had not said, which was consistent with the slip of the tongue phrase.

It also explains that enigmatic point that she made in a television interview. The interviewer asked:

"But why on that date, though, January the 27th, were you so down that you said, 'I may not be Prime Minister by six o'clock tonight' after the Westland debate?"

The Prime Minister replied:

"You suddenly come out with these things."

I suggest that she said it for the reasons stated in the Select Committee report and *Hansard*, which I have quoted. The Prime Minister was being quite honest—"Yes, I did give my consent." Of course, it could have been given some time before that weekend.

The Select Committee then made some remarks about the behaviour of the right hon. and learned Member for Richmond, Yorks (Mr. Brittan). It said at paragraph 177:

"Although those involved must carry blame for what occurred, what seems especially reprehensible is a manner of doing business where the direct and honourable course does not present itself to the exclusion of all else."

It continues at paragraph 179:

"This was an outrageous way in which to treat a Law Officer of the Crown".

They solicited an opinion, which was immediate and conditional, and then used it for purposes of civil war inside the Government.

Having studied the texts that I have quoted, I suggest that the culpability for that unfortunate incident in which the right hon. and learned Member for Richmond, Yorks —now the commissioner-elect—was involved is to be shared in equal measure by the Prime Minister. If by any chance she did not know that it was going on, what sort of Government are they and what sort of Prime Minister is she? What sort of political integrity is it that allows a Government to be run on that basis? She cannot have it both ways. She either knew or, if she did not, she was running a Government which had run amok through civil war.

We should have a debate on this matter before we adjourn. I shall briefly put to the House the questions which the Prime Minister should answer, and they are the questions which should be debated.

First, is it not a fact that the Government resisted the drafting and method of introduction of the Single European Act but nevertheless introduced it to the House against the initial desires of the Government?

Secondly, does not majority voting deny the Government and Parliament power over large areas of legislation, and is that not contrary to the spirit of what the Prime Minister declared on the Jimmy Young show she would never do?

Thirdly, was not the Prime Minister's slip of the tongue on 23 January 1986 in fact a correct statement and the "slip" arose only because she said something true which she would have preferred not to have said?

Fourthly, as all the evidence and what the Prime Minister said about her wishes shows that she approved the principle of disclosure of the Solicitor-General's letter, should she not share the strictures of the Defence Select Committee? Should she not appoint the right hon. and learned Member for Richmond, Yorks to the Commission of the EEC? Should she not share to some extent the fate that befell that right hon. and learned Member, and should she not consider whether she should remain as Prime Minister?

Several Hon. Members *rose*——

Mr. Deputy Speaker (Mr. Harold Walker): Order. There is very little time left and several hon. Members still wish to speak.

6.50 pm

Mr. Ivor Stanbrook (Orpington): I am sorry that the hon. Member for Newham, South (Mr. Spearing) has chosen to speak at some length, thus taking up precious time available before the House rises for the summer recess, on a subject which has already been debated many times.

There are many reasons why we should not adjourn tomorrow and there are many subjects which we ought to discuss, but there is one which I venture to suggest we must debate before the House rises as it involves a matter which will have to be adjudicated on by the Foreign and Commonwealth Office and the Treasury before we resume in the autumn. I refer to the entitlement of colonial service pensioners to war service being counted towards their pension entitlement.

Do you realise, Mr. Deputy Speaker, that all public servants in Britain are entitled to count war service—either the whole of it or half of it, depending on whether their pension is contributory or non-contributory—towards

[Mr. Ivor Stanbrook]

their pension, but that that is not true for those whose service was overseas? This is a curious anomaly which affects a branch of the public service which has rendered signal, loyal and devoted service to the country in tropical climes, often in adverse, primitive and distressing circumstanc

About 4,500 people are involved, and they are retired and mostly in their seventies. The number is therefore diminishing yearly. Why are they not entitled to count their war service towards their pensions? The answer is that, although they are all British citizens who, apart from their service abroad, have always been resident in Britain, they were employed and paid by the colonial Governments they served. That is despite the fact that the Secretary of State recruited and trained them and sent them out to our colonial empire to do service for the Crown.

Because these people were not employed by the British Government, they were told that they could not count their pre-appointment war service towards their pension entitlement. Teachers, local government officers, policemen and other civil servants are entitled to count such service. Colonial service officers are the only exception.

This is a great injustice, and it ought to be remedied. Not many people are involved, and not much money is involved. I must say that I would be a beneficiary if any such claim were granted, but it is such a stark injustice that I feel obliged to draw attention to it. I understand that, in the next few days, presumably, the Foreign and Commonwealth Office will again consider what claims to make by way of its estimates for the coming year.

If the Treasury does not agree to a Department's claim, after negotiation, the matter is referred to a thing called the Court of Star Chamber. At one time, I understood from reading the newspapers—I know that I should not have done it—that my right hon. Friend the Leader of the House would be chairman of the Court of Star Chamber. I understand, however, that my right hon. Friend the Secretary of State for Energy has been appointed to that function. That is a pity, because I have been asking my right hon. Friend the Leader of the House about this matter for weeks in the hope that he would remember it when he came to help adjudicate on this small claim on public expenditure.

I have just discovered that if the Department concerned does not include a claim in its preliminary Estimates, the claim gets nowhere. How, therefore, am I to ensure that the Foreign and Commonwealth Office puts this entirely just, overdue and well-merited claim to the Treasury in the first place? There is provision for superannuation payments to overseas service officers, but how do I know that the Foreign and Commonwealth Office will include this extra item so that it might be considered by the Treasury? I am sure that the Treasury would agree to the claim if it considered the merits of the case, but if the Foreign and Commonwealth Office does not put it forward, the claim can get nowhere.

I am therefore forced to raise the matter now. There is overwhelming support in the House for the claim to be met. Early in this Session I tabled an early-day motion commending the claim to the Government. No fewer than 260 hon. Members signed it in its original form. Another 88 signed an amendment suggesting that the claim should be met immediately. That means that some 348 hon. Members support the claim. That is an absolute majority in the House.

What more does one have to say to persuade the Foreign and Commonwealth Office to put the claim before the Treasury, for the Treasury, having considered it on its merits, is bound to grant it? We are talking about a budget of thousands of millions of pounds. There must be an order of priorities. No doubt there are other considerations which must be taken into account, but an exception or anomaly which is an injustice, and which involves a debt of honour which should be paid, should be put at the top of that list of priorities.

The claim should be met before other and more substantial new claims are met. I hope that, as a result of my raising the matter today, the Foreign and Commonwealth Office will include the claim in its draft estimates which are to be put to the Treasury in the next few weeks, and that the Treasury will see the merit of the case. If it does, it will at last have brought some justice justice to a small and dwindling group of people who have devoted their entire lives to the service of this country abroad. They deserve to have this injustice remedied. I hope that my right hon. Friend the Leader of the House will, in so far as he has influence in the matter, support it.

6.59 pm

Mrs. Alice Mahon (Halifax): The House should not rise for the recess until we have thoroughly discussed the Government's claims that savings released through competitive tendering for hospital services have in any way contributed to improved patient care. I challenge that claim with the full backing of the victims of this policy, who include patients, workers and users of the Health Service. When the savings—£106 million at the last DHSS estimate—are claimed, they do not account for the full costs of abandoning workers to the dole queue and of further reducing low-paid workers' wages. They certainly do not take account of the reduced services to patients and the increased stress on other workers left to pick up the burden of extra work.

I worked for many years in the National Health Service and later as a member of my local health authority. I voted and campaigned against the privatisation of the local laundry and domestic services. It will come as no surprise to hon. Members to hear that, because of the way in which the Government have packed district health authorities with their supporters, I lost the vote. In my authority, 250 workers, most of whom were women, lost their jobs when Mediclean gained the contract. By any standards that has been a failure. Initially, the contractors thought that only half the hours needed to clean our hospitals was necessary. Those who stayed to work for Mediclean lost their bonus, holiday pay, sickness benefit and holiday entitlements, and were expected to work twice as hard as previously. After 12 months there had been a 100 per cent. staff turnover and a report from the local infection control committee which warned that unhygienic conditions were prevailing. That pattern has been repeated across the country. Since then, complaint after complaint has been ignored and if people visit my local hospitals they will see that they are dirtier than previously.

Many low-paid workers lost their jobs and many remain unemployed, but unemployment statistics do not show that. It is well known that part-time women workers

often do not have any entitlement to benefit in their own right. Mediclean has failed on six of the 37 contracts that it is known to have held since 1983, which is a failure rate of 15 per cent. But in my book it has failed the NHS, because the in-house staff offered a much better service.

When staff are sacked to make way for private operators, redundancy costs are not systematically accounted for in the savings figures, but the financial and human costs are undoubtedly high. Health authorities are expected to recoup redundancy costs against savings over the period of the contract, but if a contractor is sacked or pulls out, as often happens, the authority must carry the whole cost itself and that is not accounted for.

I challenge head on the claim that savings have been made for taxpayers. Ninety-two thousand ancillary workers have lost their jobs, which is 30 per cent. of all ancillary staff in the NHS, since contracting out began. When people are thrown on to the dole or forced to claim other benefits, it is at a great cost to taxpayers. Moreover, it is immoral to throw people out of work just to save money. Many of those jobs provided secure and regular work for thousands of people and even if we thought that they were low paid—for many years I was a shop steward working on their behalf—they at least had a secure income. We have lost national insurance contributions and taxes to the public purse because of this policy. If I had more time, I would detail exactly how much we have lost.

Even the National Audit Office, which does not normally side with low-paid workers, has admitted that savings from privatisation have arisen from less favourable conditions for workers. These people take home only £70 a week. We are witnessing an increased casualised work force replacing a stable established one. As wages and conditions deteriorate, so do standards in the Health Service.

I dispute for other reasons the Government's claims about savings from competitive tendering. The exercise has never been properly examined. Staff time, preparing timetables, specifications, evaluating bids and monitoring contracts involve enormous costs which are not easily measured. The Government have not taken them into account. They have never tried to quantify that aspect of this costly experiment, in which public money, standards and livelihoods are at stake, nor have many district health authorities, although individual managers have recently said that 80 per cent. of their time is spent on competitive tendering.

I cannot conclude without talking about my experience of the laundry services in Halifax. The new Secretary of State for Health was the Minister for Health when we were forced to privatise our laundry services. Although we twice won the in-house tender—the second time by a margin of £250,000—after the 1983 election we were instructed to go out to tender and we are now putting out our laundry services. I shall invite the Secretary of State to come and see the disaster that he has created for us in Calderdale. We have no new linen for new babies, surgeons are complaining that there is no linen in the theatre and elderly patients are having to sit without underwear. That is disgraceful.

Privatisation in the Health Service has meant selling NHS workers' jobs to the lowest bidder. The only real savings come from job losses, cuts in wages and service standards, and poorer working conditions. One central point which is all too often passed over in debates about Health Service funding needs to be reinforced. It is that as the largest employer in western Europe there is nothing outdated or imprudent about the NHS recognising its responsibilities to its work force. A civilised society has a duty to care not only for its sick and elderly, but for its carers. A system which sacrifices people to the demands and dictates of a market which has nothing to do with quality or caring and everything to do with shortchanging the workforce and patients on jobs and services is not only inhuman but inefficient, as the limited experience of introducing competition into the Health Service has shown. It is vital that we have a statement from the Government before the House goes into recess.

7.6 pm

Sir Charles Morrison (Devizes): I welcome the arrival of the recess, because it gives Ministers time to relax and ponder objectively what they have done, what they have not done, what they intend to do and what they should do. If they do all that, they should have a full and mentally exciting recess.

Foremost in the matters that Ministers should consider, particularly in the Treasury, the Department of Education and Science and the various Departments directly concerned, is the state of British scientific research and the research councils. It is extremely worrying that I should have read in an article in *The Independent* recently:

"Britain is shutting down its science".

It is worrying to learn that already proposed cuts amount to almost £20 million for arable, horticultural and poultry research. It is worrying to learn that the Institute for Marine Biochemistry at Aberdeen faces outright closure and that the Institute for Oceanographic Sciences and Terrestrial Ecology may lose a quarter of its scientific staff. Those examples cover only a small area of science. There are many other research councils and establishments which are also facing considerable cuts.

The achievements of British scientists are remarkable, but if investment in research is cut, their ability and chances of maintaining that record of achievement in future will be enormously reduced. I understand that total expenditure on research and development as a percentage of gross domestic product has remained at its 1964 level in Britain, while in other countries, such as France, Germany, Japan and the United States, there has been a steady increase to the extent that the United Kingdom has now been overtaken.

Naturally, industry has a part to play, but industry-sponsored research is likely to be mostly market-orientated. In a science-based world, the Government have a growing responsibility to finance fundamental research. That may be relatively remote from the market and may not always produce results, but the benefits of fundamental research today will provide the basis for market-orientated research tomorrow and a new product for consumers the day after.

In his Dimbleby lecture this year, the president of the Royal Society, Sir George Porter, said:

"There are no obvious limits to the advancement of knowledge or to the practical application of this knowledge to improving our health, wealth and happiness. In health, medical research has still much to do to reduce the suffering still with us. In wealth, rich as most of us are in material things compared with our ancestors, we have seen only the beginning of what will be available to us."

It is my sincere hope that a high proportion of what will be available will have been British-researched, British-developed and British-made. If it is so produced,

[Sir Charles Morrison]

we shall be able to take pride in it. It will be good for exports, it will save imports and it will be good for the balance of payments. My brief plea to the Government tonight is that they should make available more money for research. The Government now claim that Britain is a rich country and becoming even richer. Our investment in science is a measure by which to judge that claim.

7.12 pm

Mr. Frank Dobson (Holborn and St. Pancras): A number of interesting and important matters have been raised in the debate. I shall confine my remarks to three of them and, briefly, to the matter to which the hon. Member for Devizes (Sir C. Morrison) referred—the Government's lack of investment in research.

Britain used to be renowned for inventing things that British industry was then extremely poor at developing. It appears that the Government have applied some Right-wing think tank to the task of eliminating that embarrassment and that its answer is not to do more to develop inventions but to cut research and thereby to stop the inventions occurring in the first place. That does not seem to be the most sensible way of developing a modern economy.

My second topic, housing, was referred to by Conservative and Opposition Members. The housing situation in this country is quite deplorable. We should remember one or two basic facts. In 1979, the year the Government came to power, 240,000 new homes were completed. Last year, only 202,000 new homes were completed. In the public sector—that is, council housing and housing association housing—104,000 homes were completed in 1979, compared to just 30,000 last year. It comes as no surprise to anybody with sense that one of the results of that has been a massive increase in homelessness. The figure was a little more than 50,000; it is now 112,000.

It is a sobering thought for all of us tonight that within a mile or two of the House more than 7,000 parents are trying to settle their children down for the night in bed-and-breakfast hotels, where all the members of a family are expected to live, wash, cook and eat in one room. It is a disgrace and a shame on all of us that that is happening. It is a shame on the Government, who produced a White Paper about the future of homelessness that did not even mention the word "homeless" or "homelessness".

All over the country tens of thousands of people are living in ever more crowded conditions because they cannot move out of their parental homes. Many newly married couples have to live with their parents and couples with children have to bring them up in their parents' homes. That is not a sound way to begin married life or to try to bring up children.

All over the country—I emphasise that—people who are not well-off are finding it more and more difficult to find somewhere to live at a price that they can afford. That is not a characteristic that is confined to the inner cities. Some of the greatest difficulties are to be found in rural areas, where massive house price increases combined with the sale of council housing are causing many villages—particularly attractive villages—to become no-go areas for farm workers, for people who deliver the milk, for people who deliver the post, for the local bobby and for the local primary school teacher.

All over rural Britain, large numbers of people who are absolutely vital to the continuing organisation of the local community are finding it impossible to get anywhere to live because places to rent have disappeared and places for sale are priced far beyond their reach. Nowhere is that more true than in East Anglia, where there have been staggering increases in house prices. Under this Government, house prices have doubled in the country as a whole, and in East Anglia, London and the south-east they have more than trebled. While that remains the case, large numbers of the less well-off will find it more and more difficult to find somewhere to live.

I agree with the hon. Member for Devizes (Sir C. Morrison) that our people have a right to the benefits of science and space, but they have rights more basic than that. They have a right to a decent home, and we should meet that basic need before we even start talking about science and space.

My hon. Friend the Member for Newham, South (Mr. Spearing) referred to the appointment and dismissal of British members of the European Commission. The Prime Minister, who originally chose Lord Cockfield, has decided to dump him. In view of his opinions, I cannot say that I blame her, although it causes me to have doubts about her judgment in appointing him in the first place.

However, I unreservedly deplore the right hon. Lady's decision to dump Stanley Clinton Davis, the Labour nominee, who has served the country and the Community well since he was appointed three and a half years ago. He was fit to be appointed originally, and he is fit to continue in office. He has been caught between the upper millstone of the Prime Minister's spite against anyone who is not a member of the Tory party and the nether millstone of her desire to appoint her right hon. and learned Friend the Member for Richmond, Yorks (Mr. Brittan) as the senior British commissioner.

Mr. Cryer: Does my hon. Friend agree that if my amendment had been selected, we could have had a statement from the Prime Minister explaining the criteria on which she has based her decision to hand this soft job, involving loyalty to the Common Market and not to this place, to her crony the right hon. and learned Member for Richmond, Yorks (Mr. Brittan) at a salary of £90,000 a year and probably double that in expenses?

Mr. Dobson: I accept what my hon. Friend has said. Anything that would get the Prime Minister to come to the Dispatch Box to explain what went on and why she made the appointments would be a step forward. On Tuesday, the Prime Minister said that the right hon. and learned Member for Richmond, Yorks as "an excellent nomination". After paeans of praise that beggared belief, she challenged the Labour party

"to put up names that are as distinguished."—[*Official Report*, 26 July 1988; Vol.138, c. 251.]

The word "distinguished" has several meanings. It can be used to describe something of conspicuous excellence but it can also be used to describe something that is differentiated from others by character. I can only believe that the Prime Minister was referring to the latter meaning.

In the light of the character and record of the right hon. and learned Member for Richmond, Yorks, no one could

justify his appointment. He resigned from the Cabinet in disgrace during the Westland scandal. The actions for which he was responsible were described as "outrageous" and "reprehensible" by the Select Committee on Defence, on which the Conservative majority believed its duty to Parliament and the people to be above its duty to its party.

The Select Committee's report said:

"The disclosure of the Solicitor-General's letter without his permission was an improper act."

That was a charge of impropriety. The report said:

"Mr. Brittan, a Queen's Counsel, would have been aware of the . . . confidentiality of Law Officers' advice".

That was a charge of unprofessional conduct.

The Select Committee said:

"Only by releasing the information unattributably could the disclosure be limited to those parts of the letter that damaged Mr. Heseltine."

That was a charge, it would appear, of deception.

When asked by the Select Committee about all those things, the right hon. and learned Member for Richmond, Yorks refused to answer. The Committee was referring to the partial disclosure of information of the same degree of security confidentiality as that released by Mr. Clive Ponting. For that, Mr. Ponting fetched up at the Old Bailey. It now appears that for the same action the right hon. and learned Member for Richmond, Yorks has fetched up in Brussels on £95,000 per year. There seems some difference in the treatment given to those people.

Mr. Spearing: Does my hon. Friend remember that Mr. Ponting sent his piece of paper to my hon. Friend the Member for Linlithgow (Mr. Dalyell) who then passed it on to the Chairman of the Select Committee on Foreign Affairs—it did not go outside those circles—whereas the right hon. and learned Member for Richmond, Yorks (Mr. Brittan) was responsible for authorising his press secretary to ring the Press Association?

Mr. Dobson: As ever, my hon. Friend the Member for Linlithgow (Mr. Dalyell) behaved as we all should, honourably.

If the Prime Minister challenges the Labour party to produce someone with that sort of record as the Labour nominee, I am afraid that we will be unable to meet her challenge. We do not have anyone with such a scandalous record in public office. We do not have anyone on our side who has been so comprehensively described, one might almost say blackguarded, by a Select Committee.

However, the members of the Select Committee were decent and careful people, and stated in the last paragraph of their report:

"As far as individuals are concerned, we have made our best judgments on the evidence before us. If anyone feels himself or herself to have been traduced by our findings, we are prepared at any stage to take oral or written evidence, in public or in private, from anyone involved in the events we have examined. If that evidence leads us to modify our conclusions, we will of course make a further report to the House."

I understand from the Clerk to the Select Committee on Defence that no person asked to be heard further or asked that further evidence should be considered either in public or in private. Presumably the right hon. and learned Member for Richmond, Yorks accepts as reasonable the charges levelled against him by the Select Committee.

There are those who say that it was not the fault of the right hon. and learned Member for Richmond, Yorks and that in a sense he was behaving decently because he was, in the American phrase, "taking the rap". But who was he taking the rap for? If one reads the Select Committee's report, the answer appears to be, for the person in charge of the Prime Minister's office. I know that some of my hon. Friends have suggested that that is Mr. Bernard Ingham, but I do not think that he is that important. I think that the Prime Minister is in charge of the Prime Minister's office.

The fact is that the Prime Minister was responsible for all the wrongdoing listed in that report and that she remains personally responsible. That is why many people is this country, a large number of Opposition Members in public and a substantial number of Conservative Members in private will say that the right hon. and learned Member for Richmond, Yorks is getting his money and has got his appointment because he agreed to pay, and has paid, the price of covering up the Prime Minister's involvement in all those disgraceful events.

In those circumstances, what can we say? One thing that we can say is that the right hon. and learned Gentleman is either the fall guy or that he is wicked because what is outlined in the report is wickedness in public life by any standards. We do not think that somebody who can reasonably be described a wicked and who has not disputed that should be appointed; nor do we think that somebody who has been a fall guy for the Prime Minister should be appointed.

Mr. Latham: Will the hon. Gentleman assure the House that before he made that personal attack on my right hon. and learned Friend the Member for Richmond, Yorks (Mr. Brittan) who is a Back Bencher, and called him "wicked", he gave him notice that he was going to do so?

Mr. Dobson: I put a note on the board this morning.

Sir Fergus Montgomery: Just before this speech.

Mr. Dobson: No, I did not do that just before my speech. I put a note on the board this morning in Norman Shaw north.

Mr. Deputy Speaker: I have been reflecting carefully on the hon. Gentleman's remarks. If he is saying that the right hon. and learned Member for Richmond, Yorks (Mr. Brittan) is wicked, that is an expression which Mr. Speaker would not accept. The hon. Gentleman should withdraw it and think carefully of an alternative form of words.

Mr. Dobson: If "wicked" is out of order, Mr. Deputy Speaker, behaviour which is "outrageous" and "reprehensible"—that is a quotation from the Select Committee on Defence—must be in order, because I am entitled to quote from the Select Committee on Defence. I will stick by that. Either the behaviour was "outrageous" and "reprehensible" and the right hon. and learned Member for Richmond, Yorks should not be appointed, or he was covering up for the Prime Minister and she should not stay in office.

If we are to have a reputable Parliament, we must have people who report and explain themselves to this Parliament. Perhaps the best development that could come out of this whole affair would be for us to adopt the procedures and attitudes of the American Congress and ensure that any further nominees for important public office would have to appear before Select Committees of this House at which both the Government and they themselves would have to justify their appointment.

7.25 pm

The Lord President of the Council and Leader of the House of Commons (Mr. John Wakeham): Having added up, I find that I am the 18th speaker in this relatively short debate. We have had many speeches and nobody seems to be very much against the idea of a holiday, although one or two do. I think that we have earned a holiday and I wish everybody in the House a good holiday when we rise.

I shall do my best to answer the points that have been raised, but I must deal with each one briefly and I must go at a pretty fast pace if I am to do so.

The right hon. Member for Manchester, Wythenshawe (Mr. Morris), who courteously sent me a note because he thought that he might not be back—I am delighted to see him in his place—is a great and internationally recognised expert on disabled people. I think that he would be the first to admit that the Government's record of increasing assistance to disabled people by over 80 per cent. in real terms is a pretty good record by any standards.

The right hon. Gentleman asked me specifically about the disability study carried out by the Office of Population Censuses and Surveys. I have checked, and I can assure the right hon. Gentleman that that study was sent to the printers as soon as it was ready. It will be published in early September. There has been no unnecessary delay on it.

We are making good progress in the staged implementation of the Disabled Services, Consultation and Representation Act 1986, and have already implemented sections 4, 5, 6, 8(1), 9 and 10 and are currently addressing section 7.

My hon. Friends the Members for Havant (Sir I. Lloyd), for Ruislip-Northwood (Mr. Wilkinson), and for Devizes (Sir C. Morrison) all raised in their different ways the Government's commitment to research. I shall make some general remarks about that, but will deal first with the fast breeder reactor and the HOTOL project. I recognise the considerable knowledge of my hon. Friend the Member for Havant in these matters. It is greater than mine. In the relatively short time when I was junior Minister in the Department of Trade and Industry and took part in some of the decisions on our research projects, I found them some of the most difficult decisions because in the end they are always decisions about priorities and about choosing between one thing and another. From my experience, it is sometimes very difficult to make that choice.

The Governmnt's decision to cut the funding for the fast breeder reactor programme was based on the fact that the commercial requirement for fast reactors in the United Kingdom is likely to be some decades way. The Government's aim was to obtain a position in that technology for this country, but at an economic cost.

The Government have concluded that any further development of HOTOL must take place on the basis of international collaboration. We will support efforts by United Kingdom companies to find suitable collaborators, but will not provide further financial support in the foreseeable future. A memorandum has been sent to their Lordships' Select Committee on Science and Technology in response to its report on United Kingdom space policy. Copies of that memorandum have been placed in the Library today.

Mr. Wilkinson: Will my right hon. Friend give way?

Mr. Wakeham: I cannot possibly give way to anyone, as I have only just enough time to finish.

The hon. Member for Roxburgh and Berwickshire (Mr. Kirkwood) rightly raised the subject of prisons, especially Glenochil. It is regrettable that a small number of inmates continue to behave in a disruptive manner in a modern establishment with good facilities. The governor is moving fast towards normalising the regime for the large majority of inmates, but control must remain firmly in the hands of the governor and staff. There are 600 new prison places in Scotland and more staff have been and continue to be recruited. The White Paper, "Custody and Care", published in March, highlights the importance of security and control as well as the positive opportunities for inmates, and points the way forward to improvements in the running of Scottish penal establishments for the benefit of both staff and inmates. Nevertheless, I recognise that this is a matter of great concern.

My hon. Friend the Member for Clywd, North-West (Sir A. Meyer) referred to abuses of bed-and-breakfast accommodation in Rhyl. The Government are especially worried about the excessive and increasing cost of the use of such accommodation. We recognise the problems of seaside resorts where accommodation is used by non-local people, and we shall consider that aspect as part of the review of legislation on homelessness.

The hon. Members for Cardiff, South and Penarth (Mr. Michael) and for Norwich, South (Mr. Garrett) both referred to gazumping, an important problem which causes great concern but which it less easy of solution than the hon. Member for Cardiff, South and Penarth suggested. All the expert bodies that have examined the matter—the Law Commission in 1975, the Conveyancing Committee in 1985 and the Conveyancing Standing Committee in recent reports—have agreed that legislation is not the answer. The answer lies in changes in practices and attitudes.

The Conveyancing Standing Committee has suggested ways in which practices could be changed so as to lessen or eliminate the risk of gazumping. The Government hope that buyers and sellers of houses and those advising them will give careful consideration to the suggestion made by the standing committee. That is why we believe that a voluntary approach is best, certainly in present circumstances. As the Member for Norwich, South pointed out, the practice in Scotland could be adopted on a voluntary basis in England and Wales and would make the problem less difficult than it otherwise might be.

My hon. Friend the Member for Altrincham and Sale (Sir F. Montgomery) raised a number of issues. The Government's proposals for legislation in relation to artificial reproduction and the use of human embryos are set out in the White Paper published last November, which was fully debated in both Houses earlier this year. We have made clear our intention to legislate in this Parliament, although my hon. Friend will appreciate that I cannot anticipate the Queen's Speech, so I cannot say any more than that.

I said something about the Barlow Clowes affair during business questions. We are determined that the matter should be examined fully and as quickly as is consistent with thoroughness. The Government are fully aware of the distress and hardship caused, and have great sympathy with those who have suffered. While so many issues are

unresolved, however, I must emphasise that the Government do not take it for granted that they will have to accept any liability to investors.

The hon. Member for Norwich, South also referred to the shortage of housing in Norwich and East Anglia. The Government fully share the concern for the homeless, and have made an extra £74 million available since last November, targeted on authorities bearing the brunt of the problem. Our concern is compounded by the number of empty properties. Authorities have more than 112,000 empty properties, 28,000, or 25 per cent., of which have been unoccupied for more than a year.

My hon. Friend the Member for Rutland and Melton (Mr. Latham) raised some important questions about the Barlow Clowes affair, to which I have already referred. He also spoke of the roads programme. I appreciate the frustration of being stuck in a traffic jam and assuming that it is all the fault of the Government. Nevertheless, we have some 350 schemes in the present programme with a total value of more than £5 billion and the roads vote provision is more than than £1 billion for the first time. For new construction, our aim is to start within the year all the planned schemes that are now ready. We hope to keep motorway delays to a minimum by careful planning, the use of lane rental contracts and mobile lane closures.

As my hon. Friend knows, the aim of the RAWP formula is to allocate resources in such a way as to ensure, over time, equal opportunity of access to health care for people in equal need by reducing historical disparities and responding to population changes. The National Health Service Management Board has explored the scope for improving the way in which the current formula measures relative need across the country. The Government will consider the resulting recommendations in the context of the wider review of the National Health Service. I assure my hon. Friend that his comments will be drawn to the attention of the Minister, as I appreciate the concern that my hon. Friend has expressed.

The hon. Member for Antrim, East (Mr. Beggs) was courteous enough to tell me that he had to leave for Northern Ireland. As the hon. Gentleman and the leader of his party will know, the debate following this one will deal in more detail with industry in Northern Ireland, so I shall not say anything further at this stage.

My hon. Friend the Member for Warwick and Leamington (Sir D. Smith), in a commendably brief speech which was nevertheless important and worthy of consideration by an audience wider than that in the House today, described problems of development in and around his constituency. The Government fully recognise the difficulties to which he referred. He was wise to raise the subject of the green belt. The Government are determined to keep the green belt, so there is no change of policy in that regard. Government policy is to encourage development wherever possible in the inner cities and on recycled land, which is an increasing part of the development pattern in this country, although there are still difficulties.

The hon. Member for Derbyshire, North-East (Mr. Barnes) was among those who were not keen to have a long recess. I appreciate his view and I assure him that Ministers do not have anything like the whole period in recess.

Mr. Tony Banks: Nor do Back Benchers.

Mr. Wakeham: I fully recognise that, although I see the hon. Member for Ashfield (Mr. Haynes) sitting on the Opposition Front Bench in a very relaxed manner and wish him a happy holiday.

The hon. Member for Derbyshire, North-East referred to practices in the House. I can only say that the current practices seem generally acceptable, although not entirely so. The Select Committee on Procedure could consider the matter again if necessary.

The decision to electrify the east midlands line is a commercial one for British Rail. Electrification would not make the service faster, but British Rail is continuing to improve the high-speed diesel service on that line.

The hon. Member for Newham, South (Mr. Spearing) raised a number of issues, originally with a European flavour but going on to wider matters. The hon. Gentleman's enthusiasm for getting on with the European Communities (Amendment) Bill makes me somewhat cautious and leads me to believe that I was right to put that into the programme for the overspill Session, although I have no doubt that the hon. Gentleman will be ingenious enough to find ways to raise most of the issues that he wishes to explore.

The hon. Member for Newham, South and others talked about the European commissioners and asked whether there would be a debate on the subject. There is plenty of time for such a debate. If the Opposition want to debate the matter, various courses are available to them. The new commissioners will not take office until 1 January 1989.

The hon. Member for Newham, South referred also to matters of significance and importance at the beginning of 1986. He knows perfectly well what I am about to say. As my right hon. Friend the Prime Minister has said repeatedly, she gave a full account of the events surrounding the disclosure of the then Solicitor-General's letter on 6 January 1986, in her statement on 23 January and in her speech on 27 January. We have nothing to add to that except to deplore in the strongest terms the unwarranted attacks on my right hon. and learned Friend the Member for Richmond, Yorks (Mr. Brittan) and on civil servants who cannot reply. The hon. Gentleman would be well advised during the recess to read the statements of my right hon. Friend the Prime Minister and to come better informed to debates on the next occasion.

Question put and agreed to.

Resolved,

That this House, at its rising on Friday 29th July, do adjourn until Wednesday 19th October.

STATUTORY INSTRUMENTS, &c.

Motion made, and Question put forthwith pursuant to Standing Order No. 101 (Standing Committees on Statutory Instruments, &c.).

HOUSING

That the draft Grants by Local Housing Authorities (Appropriate Percentage and Exchequer Contributions) (No. 2) Order 1988, which was laid before this House on 8th July 1988, be approved.

LEGAL AID AND ADVICE (SCOTLAND)

That the draft Advice and Assistance (Assistance by way of Representation) (Scotland) Amendment Regulations 1988, which were laid before this House on 11th July 1988, be approved.

LEGAL AID AND ADVICE (SCOTLAND)

That the draft Advice and Assistance (Scotland) (Prospective Cost) Regulations 1988, which were laid before this House on 11th July 1988, be approved.

NORTHERN IRELAND

That the draft Corneal Tissue (Northern Ireland) Order 1988, which was laid before this House on 28th June 1988, be approved.—[*Mr. Lightbown.*]

Question agreed to.

Orders of the Day

Consolidated Fund (Appropriation) (No. 2) Bill

Order for Second Reading read.

Question, That the Bill be now read a Second time, *put forthwith pursuant to Standing Order No. 54(1) (Consolidated Fund Bills), and agreed to.*

Bill accordingly read a Second time.

Question, That the Bill be now read the Third time, *put and agreed to.*

Bill accordingly read the Third time, and passed.

Motion made, and Question proposed, That this House do now adjourn.—*[Mr. Lightbown.]*

Northern Ireland (Economy)

7.42 pm

Mr. James Molyneaux (Lagan Valley): First, I note with appreciation the presence on the Treasury Bench of the Secretary of State for Northern Ireland and the Under-Secretary, the hon. Member for Gosport (Mr. Viggers), who has responsibilities for economic development. Their attendance shows that they realise that the future of the two major engineering industries are crucial to Northern Ireland in terms of jobs. They are important to the employees of the two undertakings and to those who are employed in factories in Great Britain. I trust that the presence of the Secretary of State and the Under-Secretary of State means that they are willing to listen, and having done so perhaps to grant a stay of execution.

It can be said that there is widespread recognition of the facts of life in this context by those who occupy the Opposition Front Bench, and by others elsewhere in the House. Up to that point in our consideration, there is common ground. Unfortunately, from then on there is divergence. Earlier today at Question Time, the Under-Secretary of State asserted that privatisation had been good for 17 major undertakings in Great Britain. It might have been an underestimate. My research suggests that about 28 undertakings have been privatised, but I shall not quarrel with the Minister about that.

I am sure that it will be accepted that the majority on the list could be classified as coming within what we might call the service sector. These undertakings have an advantage because they have, in effect, a captive market. Included in this category are Associated British Ports, the British Airports Authority, British Airways, British Gas and British Petroleum. These undertakings have a multitude of customers, but by the nature of their products Short Brothers and Harland and Wolff have lists of potential customers that reach single figures only.

Of the other privatised companies to which I have not referred, some may fail. If they do so, their skilled employees will be mopped up by other industries. Unfortunately, that could not and would not happen in Northern Ireland. If I might borrow a phrase from the Prime Minister, there is no alternative. That is why the Government must be ultra-careful in making their decisions.

Earlier today, my hon. Friend the Member for Antrim, East (Mr. Beggs), who is my party's spokesman on trade and industry, told the House that we in the Ulster Unionist

party have no particular hang-ups in the arguments over the merits of privatisation. We have always preferred to judge each case on its merits. Perhaps I have already implied that in service industries great benefits probably accrue from a reduction in bureaucracy. There is much to be said for making a service-type industry more responsive to its customers.

A geographically isolated shipyard and aircraft factory do not fall into that category. In Belfast, Harland and Wolff and Short Brothers plc provide the main industrial base. The stark fact is that there is no substitute or replacement to be found for either or both in Northern Ireland. It is fair to say that the Labour Government of the 1970s recognised that. For that reason they resisted all pressures to include Harland and Wolff in British Shipbuilders and Short Brothers in British Aerospace. The then Government's fear was that, when order books became slim, the two Belfast limbs would be the first to get the chop.

The memoirs of the right hon. Member for Morley and Leeds, South (Mr. Rees) recount the discussions on this issue. The right hon. Gentleman concluded that, if Shorts had then been included in British Aerospace, the Belfast works would probably have been closed years ago. The right hon. Gentleman's successor, who is now Lord Mason, took a similarly robust view of the shipyard and the aircraft factory. They were both ably and strongly supported by the right hon. Member for Salford, East (Mr. Orme), who had direct responsibilities and who withstood all the pressures throughout the controversy, many of which were coming from his right hon. and hon. Friends.

I do not suggest or imply that the present Secretary of State is any less robust than his predecessors. I hope that he will be equally realistic. Ten or 12 years later, who can say that the Ministers of the 1970s were mistaken? In the interval, we have seen free enterprise multinationals such as ICI, Courtaulds and British Enkalon amputate their Northern Ireland limbs when confronted with a shrinkage in world markets. In those years there was an ugly and sinister tendency on the part of national and multinational companies to close down their Ulster factory. They did so because it was in competition with other of their factories nearer to their central base and not because it was unprofitable. It would be less than truthful to suggest that such sharp practices have been snuffed out or discontinued. Like it or not, they will recur.

In the light of the bitter experience of the past 12 years, how could the Under-Secretary of State say:

"there is no future for a company that is supported by Government. The future lies in the private sector, where there is enterprise and the opportunity of growth."—[*Official Report*, 21 July 1988; Vol. 137, c. 1304.]

If the Government's approach to Shorts is based on that philosophy, there can only be disaster ahead. If Shorts is to be expected to stand on its own feet, it is being singled out for the chop.

At Question Time today, when my hon. Friend the Member for Belfast, North (Mr. Walker) asked whether it was not true that all other aircraft manufacturers in the world were dependent on Government subsidies in one form or another, the Minister—perhaps misunderstanding the question—was unable to give a very convincing answer. I have a clear duty to repeat my hon. Friend's question to the Secretary of State and his ministerial team: do they know of any major aeroplane maker anywhere in the world that is not propped up by the state in which it is situated? Do they know, for that matter, of any aircraft that has made a profit for its makers? I make an earnest plea to the Secretary of State and his colleagues to rid themselves of the notion that Shorts alone in the world, unlike all its rivals, can stand up to state-subsidised competition elsewhere.

Common sense dictates that such an experiment will fail, simply because the whole judgment is flawed. I cannot believe that the present Secretary of State would knowingly put his hand to an instrument of economic destruction that will undoubtedly bring ruin and misery to an entire community.

7.51 pm

Mr. John Hume (Foyle): The three industries under discussion—Shorts, Harland and Wolff and the Northern Ireland electricity service—have not endeared themselves to my constituents by their employment practices. But we are not interested in the doctrine of "an eye for an eye", because that leaves everyone blind. The skills and technology that those three industries represent are essential to the future of all the people of Northern Ireland, and I wish to support and protect the maintenance and development of that technology and those skills.

The Government have repeatedly sought to achieve agreement between the parties in Northern Ireland, and I support them in that endeavour: this is one issue on which we are entirely agreed. I therefore ask the Government to encourage such agreement by rewarding it.

7.52 pm

Mr. James Kilfedder (North Down): I wish to suport what has already been said by the right hon. Member for Lagan Valley (Mr. Molyneaux), and to echo what has been said by the hon. Member for Londonderry——

Mr. Hume: Foyle.

The Secretary of State for Northern Ireland (Mr. Tom King): Not Strangford.

Mr. Kilfedder: Yes, I recall that Mr. Speaker mistook the hon. Member for Foyle (Mr. Hume) for the right hon. Member for Strangford (Mr. Taylor) during Question Time.

I wish briefly to urge the Government to abandon their plan to privatise Shorts. This company has contributed enormously to technology in Northern Ireland, and if the plan goes ahead to sell it, in whole or in part, it will imperil the company's future. When the sale was announced last week, it was clear that if it went ahead the industrial vultures would descend on this company that has contributed so much, pick the bones bare and then depart. The Government say that they will protect the company because they will sell it if possible to a single buyer, but we have experience of such speculators in other parts of the United Kingdom. A buyer will come along, but he will sell what is not profitable and keep what is. I fear that, at the end of the day, despite the Government's grand words, the company and the work force will suffer.

Shorts employs 7,500 people. That is a colossal number of jobs, vital to Northern Ireland. To those jobs can be added the jobs of all those working in other companies directly linked to Shorts. There are also the jobs of people who work in shops that supply goods to the families of Shorts' workers, and there are the families themselves.

[Mr. Kilfedder]

It was nauseating to hear the unctuous words of the Minister when he made the announcement, pretending that the firm and its large work force would benefit from privatisation. I cannot see how all that work force will be maintained by a speculator who will come along to make a quick profit. As a consequence, Northern Ireland will lose the high technology that Shorts generates. Its excellent design team will be at risk. The Ulster economy, as we all know—it has been repeated often enough in the Chamber—is fragile, and such a blow will have lasting unfortunate consequences for our part of the United Kingdom.

Those unfortunate consequences, however, will not be confined to Northern Ireland. Hon. Members from Great Britain should remember that Shorts provides benefits for this part of the United Kingdom as well. The reduction in the size of the company and its work force will affect engineering firms in England that are engaged on contract for Shorts.

It has been argued that privatisation has been a success in England. That may be so, and I would not argue otherwise, but there is no comparison between the economic position in Britain—certainly in the south-east of England, where all the wealth seems to accumulate—and that in Ulster. I am not a slave to ideology, and I have no political objection to privatisation. My argument is against the privatisation of Shorts at this time and in the foreseeable future, especially in view of the vile campaign of terror being waged by the IRA.

For 20 years the IRA has sought to destroy the Northern Ireland economy, just as it sought to destroy lives and to mutilate members of the population. It has undoubtedly frightened away many potential investors, and perhaps, I regret to say, some of those who formerly provided employment in the Province. In my constituency, a building contractor—part of a worldwide concern, with its headquarters in Great Britain—abandoned work on which it was engaged in Palace barracks, Holywood, as a result of IRA threats.

I fear that the Government's announcement will appear to be a capitulation to the IRA campaign. It certainly helps the propaganda campaign—I want to emphasise that—which has been skilfully and persistently waged by the IRA and its sympathisers, particularly in the United States, against Shorts and other companies in Northern Ireland. They would love to see Northern Ireland's economy undermined, because they would then be well on their way to the destruction of that part of the United Kingdom.

Bearing in mind the courage, fortitude and restraint of the hard-working and conscientious people of Northern Ireland, the Government should have told them that they will stand shoulder to shoulder with them; that, no matter what they say and do politically in the rest of the United Kingdom, they will make sure that they in no way endanger Northern Ireland's economy and put at risk everything that has been done to build up and maintain that fragile economy. Sadly, the Government prefer to force on the people of Northern Ireland, at a bad and dangerous time, their privatisation policy, which will unfortunately have bitter consequences.

The propaganda campaign waged by the IRA against Shorts has also been waged against the Belfast shipyard. I and my colleagues in the House have paid tribute to the work force. It is composed of hard-working and dedicated people. It is my duty, and that of my colleagues, to fight for them, their jobs and the rights of their families. It is tragic that the Government also wish to privatise Harland and Wolff now.

I want to make a plea to the Government—although I am sad to say that it will probably be rejected out of hand by Ministers whose commitment is not to Northern Ireland jobs, as it should be. I plead with them to ensure that Shorts and Harland and Wolff, two great and major firms, remain within the public sector. I know that in making that plea I have the support of all people in Northern Ireland, regardless of religion and political beliefs.

The hon. Member for Foyle, referred to the work force in those two companies. I have already said that I and my colleagues are prepared to go to the United States with the hon. Gentleman and his colleagues to fight for jobs, not just for Shorts, and not just in Loyalist but in Nationalist areas. Our concern is to ensure that prosperity is restored to Northern Ireland and that the terrorists do not succeed in their vile and obscene campaign.

8.3 pm

Mr. A. Cecil Walker (Belfast, North): There are times when the rights of the people must take precedence over all other considerations. The time has now arrived when the Government must take stock of their privatisation policy in Northern Ireland and examine the social consequences of such policies on the small regional economy of the Province.

It is highly irresponsible at this time for the Government to announce privatisation plans for Shorts and Harland and Wolff. Such announcements are perceived by the population as further evidence of the Government's intention to withdraw from Northern Ireland, which can do nothing for political and economic stability and will only fuel the fires of insurrection. In addition, such decisions would be disastrous from a social and humanitarian point of view.

It is a matter of record and public disquiet that such expansion as has occurred recently has been confined to the south-east of England. But, as every hon. Member knows, there has been little sign of any significant improvement elsewhere within the United Kingdom. The recent depressing trade figures point to the folly of following policies which favour one part of the kingdom at the expense of the others.

The Government cannot stand aloof and opt out of their responsibilities to Northern Ireland, which is considered to be one of the most deprived areas in the United Kingdom.

In taking my stand tonight specifically in defence of Shorts, I ask the Government to re-examine, logically and objectively, their decision to privatise that most dynamic company in the aircraft construction and allied industries.

Shorts contributed greatly to the defeat of Nazi Germany by its superhuman efforts in the production of battle line aircraft which were renowned throughout the world for their performance and reliability in destroying strategic targets in enemy territory.

The contribution of Shorts to the commercial side of the aviation industry is also exemplary, going as far back as 1909, when a Short biplane won the *Daily Mail* award for the first British aircraft to fly a circular mile. The big flying boats produced for Imperial Airways opened up the

air routes to Australia and the far east. Today we have the renowned Skyvan and the 360, which has been adopted by more than 30 carriers worldwide.

Selling that most valuable public asset will be seen as a betrayal of the skill and innovation of the aerospace and engineering industry in Northern Ireland. The effects on the engineering industry and the local economy will be catastrophic. It will also affect many parts of the United Kingdom where engineering companies engage in contract work for Shorts.

The Government say that they wish to privatise Shorts because of financial losses, but the level of loss is not as great as the Government are making out. Last year there was a loss of £47 million, but £25 million of that was simply the repayment of loans. Because of those debts the interest charges will inevitably increase each year, and that will be exacerbated by the higher interest rates charged by outside agencies compared with the cost of Government grants or low interest loans.

It must also be appreciated that substantial losses were in part due to underfunding and cuts in Ministry of Defence expenditure. I would respectfully point out to the Government that most aircraft manufacturers throughout the world are in receipt of visible or invisible Government subsidies. It is generally recognised that high technology products require high investment to make them profitable. That is borne out by the Dutch Government supporting Fokker and America supporting Boeing.

What is needed now is a commitment from the Government to Shorts, since there is no way in which investment from within or outside the Province could compensate for the large-scale reduction in employment that would occur if the company were privatised.

We particularly need a commitment to the aircraft manufacturing sector and support for the new FJX aircraft as a worthy replacement for the SD3. It is absolutely essential that that project is fully supported if Shorts is to continue as a design/engineering aircraft manufacturer, particularly as the company has the highest concentration of research and design skills in Northern Ireland and has trained the largest number of skilled apprentices.

Contract work has provided thousands of additional jobs in other parts of the United Kingdom and other unemployment blackspots in the Province. Privatisation would deal a blow to the equal opportunities programme which Shorts has embarked upon. Such a programme cannot be successful if jobs are at a premium under privatisation.

I contend that privatisation is totally unsuitable to a small, deprived economy such as that in Northern Ireland, which is already suffering from perhaps the worst unemployment in the United Kingdom. No amount of small, transnational operations on green field sites can replace Shorts at the heart of the engineering industry. The survival of Shorts is essential to the survival of the Northern Ireland economy. Without it, we shall become an industrial wasteland, and any small, modest recovery already achieved will be wiped out and reversed.

8.12 pm

Mr. Harry Barnes (Derbyshire, North-East): The Government are convinced of the correctness of their policies and believe that they should press ahead with them despite our opposition, but they must accept that their policies are divisive. They may think that in the end they will be able to overcome that, and people will see the good that they believe they are doing. But their policies are hated by working-class people in my constituency. Applying those policies to Northern Ireland, which has a divided society and sectarian battles and clashes, is an utter disgrace. The Government should respond to the market in which they seek to operate their policies. If there is a case for sticking with or returning to some past consensus or moving towards some improvement, that case is within Northern Ireland.

Different policies need to be directed to the Irish question than to England, Wales and Scotland. Although I oppose them in a more traditional battle, the only good that can result from the Government's policies of privatising electricity, Short Brothers and Harland and Wolff is that it will bind together some of the different factions in Northern Ireland. As I have said, they may be able to produce some unity among the different parties and individuals who represent constituencies in Northern Ireland, and the political parties not represented in the House. People are being directed to fighting class politics in which working-class interests are dominant.

I recall a delegation that came over from Strabane and included representatives of Sinn Fein, the SDLP, the Ulster Unionists, Independents and others. They were here because of the flood damage in Strabane and they wanted the Government to provide funds to deal with it. Problems of that nature overcome the sectarian divide because key economic and social questions have to be faced. I ask the Government to back off from the policies they are using and to do something about uniting Northern Ireland.

8.14 pm

Mr. Jim Marshall (Leicester, South): I congratulate the right hon. Member for Lagan Valley (Mr. Molyneaux) on drawing first place in the ballot for debates on the Consolidated Fund. I am sure that we all agree that it is the best position in the list. I thank the Secretary of State for Northern Ireland for being present on the Government Front Bench to reply to this short debate. It shows that he considers of paramount importance the economy of Ireland and the possible privatisation of the three industries that have been discussed. If he is to solve his other problems in the Province, the economy and the growth in the economy in Northern Ireland must be tackled successfully.

It is significant that, despite the geographical differences between my hon. Friend the Member for Foyle (Mr. Hume) and the right hon. Member for Lagan Valley, they are at one on the need to maintain Shorts within the public sector and on the need to protect jobs. Perhaps that is the first sign of the agreement between party leaders that the Secretary of State has been trying to achieve during the past few years. Perhaps he should seize the first small fruit of consent and build upon it so that that agreement can be used to build agreement in other aspects of political and economic life in Northern Ireland.

The official Opposition, together with other Opposition parties, met representatives of the work force of Short Brothers who made absolutely clear their opposition to privatisation. They will fight the proposals to privatise the company and they feel that if the company is privatised, rather than providing the guarantees of job security, to which the Under-Secretary of State referred on previous

[Mr. Jim Marshall]

occasions, privatisation will be the thin end of the wedge and the Government will shed responsibility not only for the companies but for the economy of the Province, and closure and redundancy will inevitably result. They are strongly opposed to privatisation and certainly the Opposition have pledged their wholehearted support to them in their opposition to privatisation.

It would be churlish of me not to have due regard to the comparative improvement in the economy of Northern Ireland during the past 18 months or two years. As the Secretary of State and the Under-Secretary of State have told us on previous occasions, during 1987-88 unemployment fell, and it continues to fall. Congratulations are due to them for that. I also give due respect and credit to the enterprise schemes which are being operated in Northern Ireland and the encouragement which the Government continue to give to inward investment in the Province. We all agree that there is a desperate need not only to sustain existing jobs, but to attract new jobs into Northern Ireland. We welcome without hesitation those improvements.

As I have said on previous occasions, it is as well to remember that industrial productivity in Northern Ireland is still substantially below what it was in the early 1980s. The number of people unemployed is substantially higher than it was in 1978. We should remember that the number of new jobs created last year fell far below the reduction in unemployment. Thus, the fall in unemployment was produced not by job creation but by the creation of new aid schemes, migration from the Province and the fall in the number of school leavers. As I have said, it must be borne in mind that industrial production is static and is still at or below the level it was in 1981.

Industrial production in Northern Ireland has remained static, whereas in the rest of the United Kingdom it has grown by 12 per cent. since 1981. It is as well to remember that manufacturing in Northern Ireland is dominated by two giants—Short Brothers and Harland and Wolff. Of 90,000 manufacturing jobs, 11,000 are directly associated with Short Brothers and Harland and Wolff and perhaps a third—30,000 manufacturing jobs —are directly or indirectly related to those two giants. If they were threatened with closure, that would have a dramatic effect on unemployment in the Province. If, by some disaster, they closed, 20,000 or 30,000 jobs in Northern Ireland could be lost. Furthermore, subcontracting jobs in Great Britain would be at risk.

We would all agree that Harland and Wolff has made great strides in improving efficiency and productivity over the past few years, and that it has been innovative in using the latest computer-designed techniques for designing ships. The company can now compete, expecially in the high technology sector of shipbuilding, with any other in the world. Management and workers have worked together in a way that can serve as an example to any other company in the United Kingdom. Together they have improved productivity and agreed on a common goal for the company—to ensure its survival and to make it as competitive as possible. As a consequence they have managed to reduce losses per man—unfortunately, they are not profits per man—to one third of the United Kingdom shipbuilding average, and losses per man at the company are now comparable with those of any other shipbuilding yard in the world. These are great steps forward by Harland and Wolff.

A few months ago there was a great sense of anticipation that the company, having made sacrifices and lost jobs in recent years, would achieve continuity into the early 1990s with the advent of Ravi Tikkoo. It was anticipated that the yard could be kept going and that jobs in it could be held at around 3,000. We all thought that if Mr. Tikkoo's concept of the Ultimate Dream was viable and the vessel could be built at Harland and Wolff, it should be.

Some questions must be answered. First, can Harland and Wolff build the ship? The company says that it can. Secondly, can there be an agreement on its price? Again, it appears that Harland and Wolff and Mr. Tikkoo can agree on that. So those two questions have been answered by the company, but the next two must be answered by the Government—we desperately want these answers. Can Mr. Tikkoo's company be assured that normal export credit guarantees will be available in this case? We need a yes or no answer to that, not prevarication. Next, if a contract were signed, would it receive support under the sixth directive of the EEC? Again, that needs answering with a yes or no, not with prevarication.

Instead of providing direct answers, the Government have tried to concentrate on the ownership of the yard. We now face the charade of the potential customer, Ravi Tikkoo, turning into a potential buyer, purely because the Government see this as an opportunity of ridding themselves of a loss-making shipyard. The Government should stop playing this game and answer the two questions I have asked.

I have other questions for the Secretary of State about the Ultimate Dream order. Why are discussions about the Ultimate Dream order and about the sale of the yard now so inextricably linked? What is the current state of those discussions? When will the Government come clean about them, and about their results?

Short Brothers has been the main topic of this debate. As we all know, a "For Sale" notice has just been slapped on it, which is not too surprising in the light of the Government's privatisation proposals for the rest of the United Kingdom, or of the track record of the new chairman of Short Brothers, Mr. Rodney Lund. He has the unique distinction in the aerospace industry of knowing nothing about it. That seems unfair to Short Brothers, as most aerospace companies throughout the world like to have people in charge, and in charge of their negotiations, who have vision and who know something about the industry over which they exercise control.

Short Brothers, which is in the forefront of the aerospace industry, now has a chairman who knows little about it. What he does have is a track record of privatisation. We are driven inescapably to the conclusion that he has been appointed for his skills in that direction and for his familiarity with the City. Privatisation and the possible break-up of the yard seems to have been in the forefront of the minds of the people who appointed this gentleman to his present position——

Mr. Kevin McNamara (Kingston upon Hull, North): Yard? We are talking about Short Brothers now.

Mr. Marshall: I apologise if I gave the impression that I was referring to Harland and Wolff. The chairman and

managing director of Harland and Wolff have our confidence. I wish we could say the same of the higher management of Short Brothers.

We have noted the Minister's repeated assertion that, if the company is privatised, the Government want it to remain as a whole. In our view, which is shared by the shop stewards, that position is untenable. If the company is privatised as a whole, we are convinced that the buyer will be interested in only one part of it—the missiles section. The future of the other two sections—aircraft and aero-structures—would be insecure. If the company is sold, we should like a guarantee that the buyer will keep it as a whole and that jobs will be guaranteed for perhaps five or six years.

Ministers appear to have misunderstood what Harland and Wolff and Shorts symbolise to the people of Northern Ireland. They are regarded as symbols of the Government's continued commitment to the economy of the north of Ireland. Rightly or wrongly, the recently announced decisions to privatise the companies are regarded by a substantial number of people as the Government's intention to withdraw, perhaps not fully, from the economy of Northern Ireland and as a shot across the bows to show that the level of support given in the past cannot continue indefinitely.

The debate gives the Secretary of State an opportunity to nail those allegations as lies and to say that the Government will continue to support the economy of Northern Ireland and Harland and Wolff and Shorts. The best way of showing that determination and giving those guarantees is to do away with the nonsense of privatisation, accept that Harland and Wolff and Shorts should remain in the public sector and offer continued hope of prosperity to Belfast and Northern Ireland as a whole.

8.33 pm

The Secretary of State for Northern Ireland (Mr. Tom King): The subject for the debate chosen by the right hon. Member for Lagan Valley (Mr. Molyneaux) is the economy of Northern Ireland, with particular reference to the future of Short Brothers and Harland and Wolff. The House will therefore understand if I begin by discussing the economy of Northern Ireland.

I have two rather contrary messages to deliver. First, I enormously welcome the debate. Thank goodness hon. Members representing Northern Ireland have expressed interest in economic issues. I congratulate the right hon. Member for Lagan Valley—there is no point in being churlish because it would be rather like a vicar berating the congregation for being too small—on his initiative in launching the debate.

I appreciate very much the comments by the hon. Member for Leicester, South (Mr. Marshall) and others. They correctly identified my presence as being not only symbolic but a sign of the close personal interest that I have taken—as has my hon. Friend the Under-Secretary of State, the hon. Member for Gosport (Mr. Viggers)—in the economy of the Province. We were delighted to be joined by other hon. Members, who showed their interest in the subject.

Secondly, having made those tolerably friendly remarks, I have found this the most appallingly depressing debate. I do not think that I have ever listened to so many speeches with which I profoundly disagreed. In certain respects I resented them, and in others they were an insult to the skills, ability and industry of the people of Northern Ireland, who have shown their abilities to triumph over all the problems of the Province. They have not come pleading with begging bowls, saying, "We have not a hope of competing in world markets unless we receive special assistance and twice as much subsidy as anyone else."

Anyone who pays a visit to Northern Ireland will see its abilities and achievements. Its people do not moan about the disadvantages they face. They are succeeding and earning a worldwide reputation because of their hard work, determination and skill. I have the deepest admiration—it is often defined as the work ethnic that exists in many parts of the Province—for the inventiveness, scientific skills, education achievements and qualifications of many people in Northern Ireland, which is why its economy has recently moved forward in so many respects.

The economy in Northern Ireland has suffered from high unemployment. When I heard the hon. Member for Belfast, North (Mr. Walker) say that there was little sign of improvement, I thought that he was selling Northern Ireland short. I have recently received the review of the Trustee Savings bank for Northern Ireland. It is appropriate to quote from its document because it was in the public sector but is now in the private sector. I hope that its review will not immediately be regarded by hon. Members as discredited. It mentions the present position rather differently from the miserable language that we heard in the debate.

The review says that the steady growth of the United Kingdom economy—which has out-performed other European countries and, in many respects, the United States and Japan—has, although it has taken longer to arrive, had an impact on Northern Ireland. It further says:

"Evidence from the most recent CBI Business Surveys, however, indicates a degree of optimism."

It says that there is

"Considerable business confidence . . . Capacity utilisation remains good and there is little evidence of capacity constraints despite growing local, national export demand . . . Both CBI and PA Management surveys of investment intentions indicate that strong capital investment is taking place and is likely to continue over the coming year . . . The CBI report positive investment plans across manufacturing and service industries and PA attribute the healthy manufacturing investment outlook to buoyant demand, increased order books and the success of past capital investment."

Listening to hon. Members, I wondered whether they had recently visited the Province or whether they were aware of what is going on there.

Although the figures given by the hon. Member for Leicester, South were correct, I genuinely believe that the continuing falls in unemployment are being reflected in an increase in employment. After the debate, I shall show the hon. Gentleman an interesting graph in the Trustee Savings bank review, which tends to confirm the unemployment decline. In September 1986, unemployment reached 135,000. As a previous Secretary of State for Employment in England and Wales, I came to the Province determined to do my best to help employment in Northern Ireland. As we stand here now, unemployment is down to 115,000. That is last month's figure. It is confirmation not of a continuing decline but of the improvement that every hon. Member welcomes.

I see the hon. Member for Foyle (Mr. Hume) present. I am sure that he will accept that there is a spirit of greater

[Mr. Tom King]

confidence in what he would call Derry. There is greater confidence in the Province in future economic prospects and employment. In addressing the real problems, we should not sell the Province short. We should not underrate the real achievements of many people who in the past year have been recruiting, investing, scoring export successes and expanding their businesses. In that improvement lies one of the best hopes for the Province.

Mr. Kilfedder: I wish to make it clear that I resent the arrogant words of the Secretary of State, who queried whether Unionist Members—I assume he also included the hon. Member for Foyle (Mr. Hume)—ever visit the Province. We live there and are committed to it. My speech was restricted to the two giant industries—Short Brothers and Harland and Wolff. I referred to the fragile economy of Northern Ireland. Is the Secretary of State saying that the economy is not fragile? Did he meet the workers at Shorts? Did he speak to those workers, or did he speak only to the management? Apparently he thinks that he is speaking for everyone in Northern Ireland. We live there and meet the people every weekend when we go home. The Secretary of State should understand that people in Northern Ireland resent anyone who expects the Ulster people to shout "bwana" to the Secretary of State in his cantonment at Stormont castle.

Mr. King: The point I was making is that my perception and that of many visitors and customers in Northern Ireland is different from the presentation that the hon. Gentleman gave. To try to describe Northern Ireland as a Province without hope, prospects, skills or abilities——.

Mr. Kilfedder: On a point of order, Madam Deputy Speaker. I did not say that the Province——

The Lord Commissioner to the Treasury (Mr. David Lightbown): That is not a point of order.

Madam Deputy Speaker (Miss Betty Boothroyd): Order. It is for the Chair to decide whether it is a point of order.

Mr. Kilfedder: On a point of order, Madam Deputy Speaker. I seek your protection, because the Secretary of State is saying that I said that Northern Ireland was a country without hope or skills. I did not say that, and I resent——

Madam Deputy Speaker: Order. This is a debating Chamber and that is not a matter for the Chair. The debate must continue.

Mr. King: I am grateful for your ruling, Madam Deputy Speaker.

The hon. Member for North Down (Mr. Kilfedder) may not have heard my opening remarks. He may have addressed his remarks solely to the two companies concerned, but I have made it clear—the right hon. Member for Lagan Valley knows this—that the topic for debate is the economy of Northern Ireland, with particular reference to those two companies. Therefore, I am addressing those issues.

The Northern Ireland economy faces challenges and starts from a more difficult position. However, it has achieved more and made more progress in the past year than it has in other recent years. That should be recognised. I say to the hon. Member for North Down that the two companies concerned can be sustained, not by Government subvention, but by orders, which may in certain circumstances require Government assistance.

There would be no order in Harland and Wolff after the present SWOPS order were it not for the fact that a Ministry of Defence order is about to be constructed. That order makes it possible for the yard to consider taking further orders. It is no great secret in the House that I did what I could to ensure that the order went, in fair and successful competition, to Harland and Wolff. There are a number of orders in Shorts now which are there because of the skills of the company, the quality of its products, the commitment of the Government and whatever part I could play in helping to support export orders. The hon. Member for Belfast, North said that Ministers have stood aloof from the problems and have not sought to support employment. He said that Ministers are strangers to Northern Ireland and have not made a commitment to it. The hon. Gentleman will have to stand by his own conscience and judgment in those remarks.

Having dealt with the comments about the general state of the economy, I want to turn to the central issue, which is the fear that has echoed round the Chamber. Hon. Members seem to equate privatisation with liquidation. The right hon. Member for Lagan Valley inadvertently, or perhaps deliberately, pleaded for a stay of execution. That is what many people in Northern Ireland think is about to happen.

Mr. Molyneaux: In a legal sense.

Mr. King: I understand that, but people are talking about the concept of privatisation as if it is the greatest threat that the companies have ever faced. I wonder what Mr. Harland and Mr. Wolff would have said as they embarked on their career. If somebody had said, "You should be part of a Government Department. You think that you can build ships, but you would be much better off if you had civil servants advising you at every step," I think I know what Mr. Harland and Mr. Wolff, who built a company with a name that echoes famously around the world, would have said to that suggestion.

Mr. Molyneaux: I do not resent the slap on the wrist that the Secretary of State administered earlier. However, I do not think that we were as guilty as he suggested. I agree that Mr. Harland and Mr. Wolff would have been horrified if they had been told that they could build ships and sell them only with a Government subsidy. At that time, their competitors were not benefiting from Government subsidies. That is the central problem.

With respect, I should like the Secretary of State to address his mind to the question that was put to him by myself and by my hon. Friend the Member for Antrim, East (Mr. Beggs). Can the Secretary of State point to an aircraft manufacturer anywhere in the world that is not being propped up by subsidies? The problem for the future is that if the two industries are privatised they will not be put out into a world where there will be fair competition. They will be meeting unfair competition. That is the central theme of our argument.

Mr. King: I took careful note of the direct question that the right hon. Gentleman asked, and I intend to answer it.

I wish to analyse the arguments that have been advanced in the debates as to why the idea of moving from

public to private ownership is bound to be disastrous for companies in Northern Ireland. One of the right hon. Gentleman's arguments was that the shipyard has a limited range of customers, unlike many of the industries that have been privatised in the service sector. Let us consider what happened with the Rolls-Royce aero engine company. It has a pretty limited range of customers—only people who manufacture or buy aircraft. That company was not in the service sector.

What about the Royal Ordnance factories? I had some personal experience of their privatisation, because there was one in my constituency. They had a limited range of customers, and there was a great fear whether, in private ownership, they could succeed outside the umbrella of the Ministry of Defence. There has since been a much more effective sales and marketing effort, and there is a much better prospect of long-term security of employment in that industry.

The most obvious illustration is British Shipbuilders. The right hon. Gentleman talked about the disadvantages of Harland and Wolff being geographically isolated. At that point, I said to my hon. Friend the Minister, "Can you think of any industry where it matters least if it is geographically isolated?" A shipyard would be the most obvious example. No one has ever told the Koreans that they are geographically isolated, yet they dominate the shipbuilding market and are considered fully competitive. No one seriously suggests that the future of the Govan shipyard would be secured by its continuing to be part of a loss-making nationalised industry that attracted orders at such a rate of public subsidy that, in the end, every order was a crisis and every month or year of survival was a bonus. Now owned by Kvaerner, a specialist company that has identified a market for its products, the prospect of long-term employment in the Govan yard is much better than it would have been in a general purpose nationalised industry.

The right hon. Gentleman said that we cannot keep companies in Northern Ireland unless they are publicly owned, and he cited the companies that have been there and left. I understand the problems that affected the synthetic fibre industry, such as the Courtaulds clothing plant and British Enkalon, but it is also worth remembering Du Pont. It is making its third consecutive investment in Northern Ireland in recent years. It is a successful company whose presence in Northern Ireland is based not on massive Government subsidy—certainly not on public ownership—but increasingly on the performance of the plant and the quality of the work force. It is a tribute to the skills of the engineering work force at Du Pont that when the company carries out chemical engineering work at its other plants in Europe, the engineers from Maydown are asked to do it.

In addition to public ownership, Shorts and Harland and Wolff have benefited from a substantial network of public finance of one sort or another. In shipbuilding, some finance comes through the intervention fund. The hon. Member for Leicester, South asked whether intervention fund assistance would still be available. We shall try to ensure that it is maintained, although it is discretionary. We recognise the need to make it possible for Harland and Wolff to compete against other yards within the terms of the European directive.

The right hon. Gentleman asked me to name any aircraft company that operated either without subsidy or without some involvement in defence. Shorts produces Tucano aircraft, and it has won the Starstreak missile order—the largest missile order ever placed by the Ministry of Defence—for a sum in excess of £200 million. The company is a valued and respected Ministry of Defence contractor, and its products command markets and continued support.

Against that background, I can see how Shorts will play its part. Other aerospace companies that have defence contracts—they may be development contracts, such as the one for the Starstreak missile—won those orders by virtue of their capabilities and their products in competition with others. I expect that to continue.

The fear that has been expressed in the debate has been a feature of other privatisations. I understand why, when the first companies were privatised, there were serious fears about the risks to employment, but, to use the hackneyed phrase, there is no need for us to look in the crystal ball when we can read the book. Very few Jaguar employees are saying, "Please let us return to the benefits of public ownership." Not too many people are saying, "I do not care for Associated Ports. I much preferred the British Transport Docks Board." Few of the employee shareholders of the National Freight Corporation say, "Bring back the good old days of British Road Services." Privatisation may be new to Northern Ireland, but it is not an English phenomenon. Privatisation has taken place in England, Scotland and Wales and the logical economic benefits have been felt everywhere.

I believe that our proposals must be accompanied by a consideration to secure employment, and that was the only part of the remarks made by the right hon. Member for North Down with which I agreed. We are concerned about that, as our record shows. It is essential that we achieve a good understanding of the intentions of anyone who might acquire the companies. We shall look very carefully at any proposals that come forward, not simply at the price or financial arrangements, but in the widest possible sense at the implications for the Northern Ireland economy.

I stand by the record that I spelt out at the beginning of my speech. I made my commitment on the steps of Stormont castle, when I made it clear that I would do all that I could to help the economic progress of the Province. I have explained that unemployment has fallen by 20,000 since its high point in September 1986. I intend to do all that I can to ensure that that fall continues.

I want to see maximum employment and the best possible prospects in Harland and Wolff and in Shorts. I passionately believe that through private ownership and by the private sector approach there is a better prospect of a brighter future than will ever come through a continuing and dead dependence on public support and subsidy, which tends only to enfeeble and enervate companies. The evidence of the improvements that can come from a private sector approach is all too apparent.

Both the companies are operating in the most difficult market conditions facing any product that is manufactured in the world at the moment. That is especially true of shipbuilding. The aircraft industry is also extremely difficult. If we cannot obtain orders, that will be a very serious problem. There can be no guarantee that orders will be obtained. The Government will do all that they can to support genuine efforts to sustain employment on a viable basis for both companies. I say that against a background in which Harland and Wolff has faced major problems. It has a proud name, but its future will determine whether there are to be jobs and orders. I note

[Mr. King]

that the company has major assets. It has excellent facilities and very good equipment, as the hon. Member for Leicester, South said. It has had major capital investment to its advantage, and it has considerable skills.

We embark on the challenge with those assets to our advantage. I note also for those who are concerned about the recent financial progress of Shorts that it has excellent products, not least in its missiles. I believe that it holds what is known as the "Pride in Excellence" award, which was awarded yet again to the company by Boeing for the quality of its manufacturing for Boeing to the very highest standards. It has real achievements.

Both companies have assets, real achievements and potential. The challenge that we face is to see how most effectively they can make a valuable contribution to the economy of Northern Ireland. We believe that our proposals are the right way to proceed. They have brought great benefits to companies and employees in Great Britain. We want to see those benefits in the rest of the United Kingdom and applied in Northern Ireland as well.

Bophuthatswana

9.2 pm

Mr. Colin Shepherd (Hereford): I am sure that the House will be very grateful to my right hon. Friend the Minister of State, Foreign and Commonwealth Office for coming to the House to participate in this short debate on the Government's policy towards the republic of Bophuthatswana.

I do not profess to be an all-purpose expert on the affairs of South Africa. I became intrigued by the situation in Bophuthatswana as a consequence of considering southern Africa after my son went to work there. I became more and more intrigued the more I considered it. As my right hon. Friend the Minister will be aware, I took advantage of an invitation to visit the republic of Bophuthatswana at Easter. I thank my hosts for the thoroughness with which they took me and others in the party around and made it possible for me to talk to those on the meeting list, those in official agencies and Government Departments, and also people who were not on the list. I was pleased to be able to seize the opportunity to talk to the man in the street whenever I could. I am pleased to say that that was quite often. I was impressed by the general atmosphere of freedom, of life, and of the relaxed air and confidence of the people. In one respect that was amazing, because it was not very long after the wretched and disfiguring coup, which was without doubt a sore point with everyone that we came across.

Among the people to whom I spoke were university students, who were especially refreshing and interesting. Once we had broken down the initial reserve and had become relaxed in our conversations, time and time again the remark made by one student after another of all disciplines was that they felt free in Bophuthatswana. Unibo does not just have a catchment area of Mmabatho, but goes far wider. Part of its attraction is its mix, with freedom of expression, action and thought, and freedom from oppression. I report that as something that was told to me and which I have no reason to doubt.

All in all, I found a fascinating conundrum. I found a multiracial, free enterprise, Christian, open, gay—I hate the misuse of that word—and friendly society. It was one that all the world would want for the whole of southern Africa. The paradox of it is that they are pariahed and condemned for being a product of apartheid. I hope it goes without saying, but I hold no brief for apartheid—hence the paradox. On the one hand, I do not like what it does and, on the other, when I go to what it has done, I find the very thing that we are trying to create in southern Africa as a whole.

The easy way out for those who wish to resolve that dilemma is to condemn the republic of Bophuthatswana as a puppet state. They say that it is not in charge of its own defence. It has a treaty with South Africa, which it initiated and negotiated when it secured its independence in 1977. It was only right that that treaty should be invoked by South Africa as a consequence of the coup. I am delighted that it did so and restored the democratically elected Government.

As for the officers in its army, it may be that the force of 3,400 men has in it two non-Bophuthatswanans—a brigadier and a lieutenant colonel—but the remainder, including the commissioner and the major general, are Bophuthatswanan. It is said that the Civil Service is

administered by South Africans on secondment. However, the figures show that 246 South Africans have been seconded, out of a total of 28,140 Civil Service employees, which is not the biggest percentage that there ever was. People say that the South Africans are perhaps in key positions. I cannot agree with that, because when I looked through the list I found that the South Africans there have been seconded for training and instructional purposes. I cannot help but commend the sentiments of President Lucas Mangope, when he said "My objective, as soon as we have people trained, is to have Bophuthatswanan citizens in charge of the Civil Service, but I cannot do that until I have achieved the instruction." The conditions that are used to run down Bophuthatswana's image are perfectly natural in the transition towards the self-educated state that it wishes to be.

We even have the prison service slung at us. It is run by a secondee, but I like a country that is not too proud to go to outside sources for advice when it feels that there is expertise to be had there and it wishes to learn, on the clear understanding between instructor and learner what the eventual outcome will be.

The economy is used as evidence with which to run down the independence of Bophuthatswana. It is said that 20 per cent. of its budget is funded by South Africa by way of grants, which amount to 403 million rand out of a total of 1,745 million rand. If a country is developing and trying to better itself and has infrastructural and development needs but is not recognised and therefore cannot go to other sources of aid, the only place to which it can go is its sponsor from whom it achieved independence and say, "Please help."

Mr. Michael Colvin (Romsey and Waterside): This is an important point. Is there not also some inconsistency among front-line states? Bophuthatswana has no one to whom it can turn, but the front-line states are not slow to trade with South Africa. I dare say that their economies can also be said to be 20 per cent. dependent on the Republic of South Africa.

Mr. Shepherd: I went to South Africa with open eyes and, I hope, an open mind and no prejudice. I recognised that a substantial amount of trade was going on. I was about to say before my hon. Friend intervened that front-line states that gained their independence from Britain do not hesitate to come to us when development aid is required. That is perfectly natural.

I had considerable sympathy for the Economics Minister of Bophuthatswana, Mr. Kiekelame, when he gave evidence to the Foreign Affairs Select Committee in May 1987. He said that if his country was recognised by other countries he would have access to the International Monetary Fund and the World Bank and would probably be able to avoid the mistakes that were made by Zambia. Such wisdom and the desire not to try to reinvent the wheel and not to make every mistake in the book is to be encouraged. It saddens me that the country's economics are used to bludgeon it into the ground. Who else is there to turn to but South Africa?

If we look for parallels, not far away, from South Africa's point of view, there are Swaziland and Lesotho, which were fortunate enough to be part of the British empire before being given their independence. They are geographically similar to Bophuthatswana in that they are islands in a sea of South Africa. They, too, have development problems. They have had greater difficulties with finance than does Bophuthatswana. It is not surprising that that country looks somewhat bewildered at the outside world, which refuses to recognise its plight.

I came to the conclusion that this is not an economic problem, but a political one. When I looked through the speech that my right hon. and learned Friend the Foreign Secretary made to the Commonwealth Institute on 17 May, I saw that he reminded us of what Harold Macmillan said as Prime Minister in his famous "wind of change" speech. He declared the British Government's commitment to

> "a society which respects the rights of individuals, a society in which men are given the opportunity to grow to their full stature . . . a society in which individual merit alone is the criterion for a man's advancement, whether political or economic."

That rang a bell with me, because that is what I saw when I visited Bophuthatswana.

In so far as Bhophuthatswana has a right to be recognised on a wider basis than just South Africa, we have always placed great importance on the will of the people. So far as I can make out, the people want the present status of independence to continue. In 1987 the Select Committee asked hypothetical questions, such as if there were a whole different set of circumstances in South Africa, what would the case be, but as nobody has a crystal ball, or the least awareness of what the nature of the circumstances might be, it is perfectly reasonable for the country to say, "We like what we have and we want to stay as we are."

That was manifest by the election results of 1987. The two main political parties, the BDP and the PPP, secured 72 seats—the whole of the elected part of the Parliament. The BDP won 66 and the PPP six. The third party, which wanted independence on a different basis, secured no seats. The manifestation of the people is that they want the independence that they enjoy at present. They have reaffirmed that both by their vote and, paradoxically, by their non-vote. If they did not vote, it must be considered a vote for the status quo.

Mr. Andrew Hunter (Basingstoke): My hon. Friend may wish to reflect on the fact that the third political party, which was opposed to the present status of Bhophuthatswana, could not field a candidate in the Odi-Moretele district to the east of the country, where, arguably, support for the status quo is at its weakest.

Mr. Shepherd: That is a good point and worth taking into account.

We have said to our friends in the Falkland Islands and elsewhere, "If you wish to leave, you may go." It could easily be said, "We have nothing to do with southern Africa and the republic in the middle of South Africa, which is a creature of South Africa, so we have no view on this matter." We say that we have no view about whether parts of Armenia go to Azerbaijan, or whether the Kurds go to Pakistan, Iran or Iraq. I do not accept that, because the British people have a responsibility in this sector.

We set up the boundaries around the Union of South Africa. We took southern Bechuanaland into the Cape colony, despite the representations of the chiefs and elders in 1885 that we should not do so. Therefore, we who have set up the present circumstances cannot absolve ourselves from them. The people of what used to be southern Bechuanaland, who were given their lands by virtue of

[Mr. Shepherd]

British Acts of Parliament in 1913 and 1936, ask why they should be abandoned by the British. Moreover, it would be in Britain's interests to tap that enormous source of support in that part of southern Africa, for the benefit of both Britain and southern Africa.

That leads me to my last point. There is an interest for Britain in this argument. We all agree that the future of South Africa is highly uncertain, but in Bophuthatswana there is an oasis of potential stability, if it can be given outside recognition. There is an opportunity for industrial investment in a strategically located and friendly country, with implications for north-south trade within the African continent. If that opportunity is being spotted by countries such as Taiwan, we should be spotting it too and securing investment there.

It must be in Britain's interest to secure the sources of platinum that we require. We no longer have platinum refining capacity in this country. The old days when sub-refined platinum came to this country to be refined are gone. The new refining capacity to be opened soon in Bophuthatswana will give that country added value, but will leave us more vulnerable. It makes sense for us to secure our sources of supply in the future.

In seeking to raise this matter tonight I was reminded of the speech, "South Africa: No Easy Answers", that was made by my right hon. and learned Friend the Foreign Secretary and the message that it gave. He said:

"there is another message common to both black and white in South Africa. Avoid intellectual or political straitjackets. Be ready to think the unthinkable."

I ask my right hon. Friend the Minister, as nicely as I can, to think the unthinkable. I was disappointed by the resolute stance that she took in May at Question Time, but I hope that if we set out the arguments again she will see them through fresh eyes and be induced to accept an invitation to visit southern Africa—not as Minister of State, with all the panoply of power—and to include in her visit the territory of Bophuthatswana. Perhaps she will encourage further contacts at an unofficial level so that a greater understanding can be achieved of the real contribution that that country can make.

9.23 pm

Mr. Andrew Hunter (Basingstoke): I congratulate my hon. Friend the Member for Hereford (Mr. Shepherd)—with more than a degree of envy—on introducing the debate. Like him, I derive no particular pleasure from the opportunity. It is a sad fact that the Government, whom I staunchly support in every other respect—not least with regard to their policy towards South Africa—are deeply and profoundly mistaken in their interpretation of the situation in Bophuthatswana and in their policy towards that country.

Without doubt, this debate will not attract attention in the headlines of the national media tomorrow. It will, however, have a far wider audience. In time, reports of the debate will be read by the southern Batswana, the people of Bophuthatswana; and they will see the debate as another small landmark in their relentless and unceasing bid for justice. It is their argument—an argument that, with consideration of the evidence, I have come to accept—that the southern Batswana have been wronged by the policies of successive British Governments. That seems, alas, to be the case. British foreign policy seeks to deny the people of Bophuthatswana their past, to ridicule their present and to condemn their future. I shall elaborate briefly on those three points.

On 8 February, I tabled a written question asking the Foreign Secretary

"on what interpretation of the relationship between the territory of modern Bophuthatswana and the native reserves established for the Southern Botswana by British Governments is Her Majesty's Government's policy towards Bophuthatswana based."

I received the reply:

"Our policy is based on the fact that Bophuthatswana was created out of the Republic of South Africa, as a key element in the policy of separate development".—[*Official Report*, 8 February 1988; Vol. 127, c. *56*.]

It was not. That is a gross misinterpretation of the past. It is a rewriting of history which I and many of my hon. Friends will not accept. The territory which is now called Bophuthatswana is the historical and traditional territory of five Batswana tribes: the Barolong, the Bathlapiry, the Bathlaro, the Bakwena, and the Bafokeng. Those were the southern Batswana tribes which existed in that territory for nigh on 700 years. They were awarded independence in 1872 when, through the spokesman of the governor of Natal, the British Government said, "I order, adjudge and adjudicate that from henceforth this will be their territory." That future was very short. It lasted only a few years.

In 1885 the British Government divided the Batswana people. The north became the protectorate of Bechuanaland and in due course the independent republic of Bophuthatswana. Good luck to it. It is a magnificent country. The southern Batswana were, against their will, assigned to the Crown colony of the Cape. British Governments promised that that would not be the case, but it became the case. Then there was the rape and pillage of their land. The native reservations and native locations were established. The Land Act 1913 robbed from the southern Batswana even more of their land. It was marginally restored in 1936 and more greatly restored in the 1950s.

It simply is not the case that the southern Batswana, with their territory of Bophuthatswana, are the creation of apartheid. They existed hundreds of years before a Nationalist party was conceived and before the word "apartheid" was acknowledged. It is greatly to the discredit of any rational person to assume that this traditional and historic land of the southern Batswana was created in 1948, or whenever, by a Nationalist Government in South Africa.

Not only do we deny the past of the southern Batswana; we malign, either through ignorance or—I hope not—through malice, their present. I tabled a written question to the Foreign Secretary on 4 May 1988, asking

"if he will take steps to ensure that the British embassy in Pretoria obtains more accurate information about the situation in Bophuthatswana."

I received the reply:

"Her Majesty's embassy in South Africa already provides full and accurate information on all relevant aspects of the South African scene, including developments in Bophuthatswana."—[*Official Report*, 4 May 1988; Vol. 132, c. *465*.]

That was a most unfortunate reply. It came a fortnight after I and half a dozen of my hon. Friends had had the opportunity to speak to our embassy staff in Pretoria. Not only did they demonstrate their lack of knowledge; they specifically confessed it. More than that, they said they did not know why they should have any reason to talk about

Bophuthatswana. That led me to write a letter to my right hon. Friend the Prime Minister, in which I listed nine points—nine howlers of omission and commission. I readily accept the fact that the embassy staff in Pretoria are now looking closely at events in Bophuthatswana.

Last week my right hon. Friend the Member for Wallasey (Mrs. Chalker) addressed a meeting of the British Bophuthatswana all-party group and, in good faith —I have no quarrel whatsoever with her on that—she made a number of observations which compounded our worry. My right hon. Friend spoke—I believe that my hon. Friend the Member for Hereford referred to this—

Mr. Donald Anderson (Swansea, East): The hon. Gentleman and his hon. Friends are wont to refer to all-party groups on Bophuthatswana, Namibia and South Africa. Will he tell the House whether there are any Labour Members in the group to which he refers?

Mr. Hunter: To date, no Labour Member has chosen to apply for membership, although we have members from the Opposition Benches. It is a matter of great regret not least that the hon. Gentleman himself will not join our meetings, and I extend a warm invitation to him to do so on any future occasion.

Mr. Allan Rogers (Rhondda): Who pays for the trips?

Mr. Hunter: Ignorance and lack of information do not constitute a sound basis for foreign policy. I give just one illustration. My right hon. Friend the Minister of State referred to the police force of Bophuthatswana. She spoke in good faith, having been informed that the police force was under the control of South Africa. The police force has an establishment of 3,500 and is under the command of the magnificent General Seleke. I have not had the privilege of meeting a pleasanter man in any walk of life and a bigger, blacker Batswana I cannot imagine. The mind boggles at the proposition that he is a white South African—the disguise is certainly remarkable.

My central point is that British foreign policy towards Bophuthatswana is based on a lack of factual information. That cannot be a sound basis for any policy.

Mr. Terry Dicks (Hayes and Harlington): Does my hon. Friend agree that if Bophuthatswana had been Marxist and militant rather than Christian and good, overseas aid would have been pouring out of the Foreign Office to that country years ago?

Mr. Hunter: Once again, my hon. Friend not only anticipates my next point but makes it with greater clarity than I could have achieved. One can indeed speculate on the irony of the fact that Oliver Tambo and Lucas Mangope were contemporaries at the same school. Oliver Tambo chose the route to command an organisation which flirts with Marxism and murder. Lucas Mangope follows a road which seeks to implement democracy and capitalism, to encourage free enterprise and to enshrine human rights. I deeply regret that it was Oliver Tambo, and not Lucas Mangope, who had the opportunity to speak to the Foreign Office.

Mr. Alan Meale (Mansfield): Will the hon. Gentleman give way?

Mr. Hunter: I will give way in due course.

The third point, and perhaps the heart of the matter, is the relationship between the republic of South Africa and Bophuthatswana. As my hon. Friend the Member for Hereford said, we must dismiss irrelevance and double standards in argument. Dependence on South Africa by other southern African countries is regarded as a matter for regret and steps are taken to relieve it, but Bophuthatswana is rejected for it. As Lucas Mangope has said on more than one occasion, to a large extent the wealth of South Africa was built on the efforts, the labour and the land of his people, and he will bleed Pretoria for every last rand. I entirely endorse those sentiments.

What are the intentions of the republic of South Africa towards Bophuthatswana? It is my belief that there has been a subtle change in thinking on this score. About 18 or 20 months ago, when we last debated Bophuthatswana, my right hon. Friend the Minister of State rightly said that South Africa wished the world to give credence to its policy of grand apartheid. When the subject was raised again in May of this year, my right hon. Friend offered an alternative interpretation. It was that South Africa wished to retain control of Bophuthatswana. I concede that I find myself in agreement with her. I have talked many times and on many occasions to politicians, diplomats and civil servants of the Republic of South Africa. I have heard their protestations on international recognition for Bophuthatswana, but it is not my belief yet that the evidence substantiates that point of view. The thesis that I put to my right hon. Friend is simple. It is that international recognition of Bophuthatswana would arguably defeat rather than further the purposes of Pretoria.

I shall conclude with three observations. First, there is the essential truth and justice of the historical cause of the southern Batswana. Secondly, our foreign policy is founded on a lack of accurate information and analysis. Thirdly, ultimately something has started that will not be stopped. It invokes the wrath and ridicule of Labour Members; so let that be. The southern Botswana have their historical cause and case. They seek to regain their independence. As the years pass, they obtain more and more friends. The other day Vice-President and Foreign Minister Rathebe said, "It is a long, long walk for the southern Batswana. They will walk every mile of it." They will not walk alone.

9.37 pm

Mr. Tim Rathbone (Lewes): Bearing in mind some of the comments that have been made by Labour Members, I shall start by declaring an interest. I have had trips to South Africa that have been paid for by the South African Government. I have had trips to Bophuthatswana that have been paid for by the Bophuthatswanan Administration, probably with funding from the South African Government. I have had trips to Namibia that have been paid for by the interim Administration, probably helped also by the South African Government. I have been to other places in the world, and my trips have been paid for by the Governments of those other places.

I maintain that after these funded trips I can be my own self and have my own thoughts along with my own mind. I think that hon. Members on both sides of the House can maintain their independence in spite of trips of this sort. I do not think that I would have a point of view developed to the happiness of some of my hon. Friends and to the frustration of others if I had not made such trips.

Mr. James Pawsey (Rugby and Kenilworth): Will my hon. Friend give way on that point?

Mr. Rathbone: I hope that my hon. Friend will agree with me.

Mr. Pawsey I shall indeed agree with you. If I may, I shall help with your argument. The fact that you have visited such countries gives you a much——

Mr. Speaker: Order. The hon. Member must address the Chair.

Mr. Pawsey: I beg your pardon, Mr. Speaker.

My hon. Friend the Member for Lewes (Mr. Rathbone), because of his visits to other states, has a much better understanding of the systems that must exist in those countries. Therefore, he is better equipped to speak on these issues. That is one of the reasons why we are listening to him so intently.

Mr. Rathbone: I thank my hon. Friend.

Mr. Colvin: I am sure that my hon. Friend will agree that it is a pity that Opposition Members do not sometimes take up some of the invitations that are extended to them. If they were to do so, perhaps their understanding of the situation in southern Africa would be a great deal better than it is.

Mr. Rathbone: I shall try to move on from my background and that of other people to the subject of the debate. I should add, however, that I have friends in all the countries I have visited and in many others as well.
